BUSH, IRVING T. (1869–). Born in Ridgeway, Mich.; after a preparatory school education, he traveled around the world in his father's yacht, *Coronet*. At 19 began his business career with the Bush and Denslow Mfg. Co., of which his father was president. He early conceived the idea of building docks and warehouses to relieve the congestion of business in New York. In 1895, under the title of the Bush Company, Ltd., he began building warehouses. In 1902 he founded the Bush Terminal Company. The plant of this company includes 8 piers, 123 warehouses, 10 industrial buildings, covers an area of about 30 city blocks, and affords every facility for receiving, shipping, storing, and selling goods. In 1929 Bush formed the Bush Service, Inc., U. S. A., which assumes responsibility for shipments from the point of origin to the point of distribution, taking care of all repacking, marking, routing, and import requirements that arise in transit. By using this service, a manufacturer in a midland town can put goods for export on the train and give them no further thought until he receives the money for them from the Bush Service which will collect his bills in Europe.

BUTTERICK, EBENEZER (1826–1903). Pioneer manufacturer of patterns for clothes. Born in Sterling, Mass. Became a tailor and shirt maker. In 1863 he placed on the market a graded set of shirt patterns made of stiff paper; the venture was an immediate success. To the shirt patterns was soon added a set for boys' suits. The demand increased so rapidly that Butterick hired a disused academy in Fitchburg as a factory, and opened a branch office in New York. Within a few years tissue paper was substituted for stiff paper, and patterns for women's clothes were added. In 1867, with two partners, Butterick formed the firm of E. Butterick & Co.; the factory was moved to Brooklyn, and a fashion magazine, which later became the *Delineator*, was started in order to increase the demand for patterns. In 1871 the company sold 6,000,000 patterns and by 1876 branches had been established in London, Paris, Berlin, and Vienna. In 1881 the company was reorganized as the Butterick Publishing Company, Ltd. of which Mr. Butterick became president. He retired from the business in 1894.

CANDLER, ASA GRIGGS (1851–1929). The Coca Cola Man. Born in Georgia; after leaving public school, he was for three years apprentice in the drugstore of Best and Kirkpatrick in Cartersville, Ga., for five years more a clerk in another drugstore. In 1878 he started a small store of his own where, about 1887, he began selling the beverage called Coca Cola. So great a success did he make of this venture that in 1919 he sold the business for $25,000,000. He has given generously of his wealth, more than $1,500,000 to Emory University, $75,000 to the Wesley Memorial Fund and smaller amounts to various worthy causes. He has often been styled the "Merchant Prince of the South."

CARLTON, NEWCOMB (1869–). President of the Western Union Telegraph Company. Born in Elizabeth, N. J. Received the degree of M. E. from Stevens Institute in 1900; practised as a mechanical engineer in Buffalo for a number of years, later was connected with both the Bell Telephone and the Western Electric companies. In 1910, he went to the Western Union of which he was made president in 1914; he was also president of the American Telegraph and Cable Co., International Ocean, Gold and Stock telegraph companies.

CARNEGIE (*kär-nĕg'ĭ*), **ANDREW** (1837–1919). Capitalist, manufacturer, philanthropist; born at Dunfermline, Scotland. He came to Pittsburgh in 1848, and began his remarkable career as a weaver's assistant in a factory. He studied telegraphy, and secured a position in an office of the Pennsylvania Railroad, advancing step by step until he became superintendent of the Pittsburg division. The beginning of his fortune was made as partner in the Woodruff Sleeping Car Company, and careful investments in oil lands increased his wealth. After the Civil War he turned his attention to the iron industry; introduced Bessemer process in 1868; and in a few years was chief owner of Homestead and Edgar Thomson Steel Works, and of other large plants. In 1899 all these were merged into the Carnegie Steel Company, and two years later consolidated in the United States Steel Corporation. In 1901 he retired from business. His donations have exceeded those of any other American philanthropist.

CHALMERS, WILLIAM JAMES (1852–). Manufacturer; born in Chicago; was vice-president and treasurer of Fraser & Chalmers (1889–1891), president (1891); vice-president of Allis-Chalmers Company since 1900; bank and trust company director; director Fraser & Chalmers, Ltd., London; has been member Chicago board of education; director World's Columbian Exposition, Chicago Athenaeum, and Commercial National Bank.

CHENEY, WARD (1813–1876). Pioneer silk manufacturer. Born at South Manchester, Conn. In the early 30's, many people became interested in the project of producing raw silk in this country. Mulberry trees were planted and cocooneries established. Mr. Cheney and his brothers entered enthusiastically into the scheme; they not only raised silk worms, but, when the boom was at its height, they organized the Mount Nebo Silk Manufacturing Company with a capital of $50,000, an organization that has had a longer history than any other similar enterprise in the country. When, in 1854, the organization was incorporated as the Cheney Bros. Silk Manufacturing Company, Ward became president and served until his death in 1876. He was not only a successful business man, but was noted for the active interest he took in promoting the welfare of his many employees.

CHESEBROUGH, ROBERT AUGUSTUS (1837–1933). Manufacturer. Born of American parents in London, England; early brought to this country; engaged in the manufacture of petroleum, in 1870 he discovered and patented the process of making what is now known as vaseline. He is trustee of the Chesebrough Manufacturing Co., makers of various vaseline products.

CLAFLIN, HORACE BRIGHAM (1811–1885). Merchant. Born in Milford, Mass.; was educated in the common schools and at the Milford Academy. With $1,000 loaned him by his father, he started a small store in Worcester and was so successful that in five years he had a trade of $200,000 a year. In 1843 he went to New York and with others engaged in the wholesale dry goods business which was soon selling to retail stores all over the country. At the outbreak of the Civil War, the debts of southern customers could not be collected, and the Claflin firm was obliged to

make an assignment, but within two years all debts had been paid in full. Before 1875 the business of the firm had grown so rapidly that it exceeded that of A. T. Stewart, commonly called New York's merchant prince. This great success was undoubtedly largely due to the business acumen and personal integrity of Mr. Claflin, the senior partner.

CLARK, WILLIAM ANDREWS (1839–1906). United States senator; born near Connellsville, Pa.; studied law, but never practised; taught school in Missouri, and in 1863 went to Montana, where he became successively merchant, banker, mine owner, and manufacturer; president United Verde Copper Company of Arizona; elected senator (1901–1907).

CLEWS, HENRY. See under DICTIONARY OF FINANCIERS.

COFFIN (*kof'in*), **CHARLES ALBERT** (1844–1926). General Electric man. Born in Somerset County, Me. In the 80's he became head of the Thompson-Houston Company, an electrical company, which in 1892 combined with the Edison General Electric Company. The new firm took the name of the General Electric Company, and Mr Coffin was made president, an office he held until 1913, when he became chairman of the board (1913–1922). The growth of the General Electric under the leadership of Mr. Coffin was remarkable. He supported every effort for the development of improved methods and machinery; he endorsed the movement for the establishment of the research laboratory which has contributed greatly to pure science as well as to electrical development. It has been stated he stood "supreme in contributing more to create the magnitude of the whole electrical industry than any one or many men, by his encouragement of invention along useful lines, by his financial powers, by his talent for organization, by his tireless energy, and by his course in introducing and his abilities in selling new apparatus." When, in 1922, Mr. Coffin retired from the General Electric, the company established in his honor a fund of $400,000, to be known as the Charles A. Coffin Foundation, the income of which was to be used to encourage the science and application of electricity. During the World War, Mr. Coffin was active in Red Cross work and for his services was the recipient of honors from several European nations.

COLGATE, WILLIAM (1783–1857). Manufacturer of soap and toilet preparations. Born at Hollingbourn, Kent, England; at the age of 12 went with his family to Baltimore where three years later he started working for a tallow chandler. On becoming of age, he went to New York, finding employment with a large firm of tallow chandlers of which he soon became business manager. Setting up for himself in 1806, he was from the first successful; he established one of the largest starch factories in America; made great quantities of soap, at first only the cheaper grades; later, the making of "fancy" soaps and a great variety of toilet preparations was begun on a large scale. In this line he was a pioneer in the country. Mr. Colgate gave a considerable share of his wealth to benevolent purposes. He was a liberal supporter of Madison University, (Hamilton, N. Y.) which in 1890 became Colgate University. In 1816 he organized the American Bible Society. On the death of Mr. Colgate, his son Samuel succeeded to the business.

COOK, THOMAS (1808–1892). Cook's Tours. Born in Melbourn in Derbyshire, Eng. Began work at ten; was in turn gardener's helper, turner, and printer. At 20 became a Bible reader and missionary. In 1836 became a total abstainer and was soon an ardent worker for the temperance cause, and printed at his own expense various publications in its interest. In the summer of 1841, a large meeting was to be held at Loughborough in connection with this movement; Cook induced the Midland Counties Railway Company to run a special train from Leicester to the meeting. On July 5, 1841, 570 passengers were carried from Leicester to Loughborough and back for a shilling apiece. This is believed to be the first publicly advertised excursion train ever run in England. The event created great excitement, and Cook received many requests to organize similar excursions. In 1845, he advertised a pleasure trip from Leicester to Liverpool and back with opportunities for visiting Dublin, the Isle of Man, and the Welsh Coast and supplied the passengers with a handbook describing the trip. A trip to Scotland followed, and there the excursioners were received with music and a salute of guns. In 1851 Cook helped 165,000 visitors to attend the Great Exhibition. In 1855 he arranged an excursion from Leicester to Calais and back for 10 shillings; the next year came the first grand tour of Europe; each year the tours became more numerous and extensive; in 1869 they were extended to Palestine. In 1872, the son, James M. Cook, went into partnership with his father under the firm name of Thomas Cook and Sons. This firm was employed to convey General Gordon to the Sudan and later all the men (18,000) and stores sent out to relieve him. In 1891, the year before the death of Thomas, the firm celebrated its jubilee.

CORD, ERRETT L. (1894–). Manufacturer. Born in Warrensburg, Mo.; attended the high school in Los Angeles. In 1924 he became president of the Auburn Automobile Co. which under his administration became a going concern.

COREY, WILLIAM ELLIS (1866–1934). Capitalist; born in Pennsylvania; entered chemical laboratory of Edgar Thomson Steel Works at 16; became superintendent of a plate mill at 21; invented Carnegie reforged armor; succeeded Charles M. Schwab, and has been president of the Carnegie Steel Company, and others; president of the United States Steel Corporation (1903–1911); director of many other corporations.

CORLISS, GEO. H. See under LEADING INVENTORS.

CORNELL, EZRA (1807–1874). Western Union Founder. Born at Westchester Landing, N. Y. When he was twelve years old the family removed to De Ruyter in Madison County, N. Y. There Ezra attended the village school and helped his father on the farm. When 21 he went to Ithaca where for 8 years he managed a flour mill. He became interested in Morse's electric telegraph and realized its great commercial possibilities. He assisted greatly in the work of demonstrating it, enlisting capital and building lines; helped to organize the Magnetic Telegraph Company to connect New York and Washington. In 1845 he built the line from the Hudson to Philadelphia, and in the next few years built many miles of telegraph line connecting the principal cities of the East and Middle West. Numerous competitors arose so that in some towns there were three or four rival telegraph offices. Realizing that some form of coöperation was necessary, Cornell and others formed the Western Union Telegraph Company, a consolidation of 7 major and several minor systems. This company within a few years extended its operations to most parts of the United States and Canada. In 1858, having accumulated a large fortune, Mr. Cornell settled on a farm in Ithaca. The remainder of his life was largely devoted to public service. He built a free public library in Ithaca; for two years he was a member of the State Senate and he was the chief mover in the founding of Cornell University to which he gave a half million dollars.

COUZENS, JAMES (1872–1936). Born in Chatham, Ont. At 18, went to Detroit where for several years he was employed as a car checker for the Michigan Central Railroad. In 1903 Mr. Couzens invested $2,500 with the Ford Motor Co. and assisted in organizing the firm, later becoming sales manager, vice-president, and treasurer. He resigned in 1915, selling for $30,000,000 all his holdings in both the American and Canadian firms. In 1918 he became mayor of Detroit. In 1922 he was appointed a member of the United States Senate to finish the unexpired term of Truman S. Newberry, and was elected Senator for the term 1925–31. Mr. Couzens gave of his great wealth to many public enterprises, among his gifts being $5,000,000 for a hospital for the treatment of crippled children.

CRAMP, CHARLES HENRY (1828–1913). American shipbuilder; president of the famous Cramp Shipbuilding Company; assisted in reconstructing the United States navy, and in the reëstablishment of the United States merchant marine; built the ill-fated battle ship *Maine;* the ship yards include 31 acres of land employing 6,000 operatives.

CRANE, RICHARD T. (1832–1912). Manufacturer; born in New Jersey. He worked as a machinist in Paterson, Brooklyn, and New York, but in 1855 went to Chicago. His uncle, Martin Ryerson, gave him a piece of land on which he built a brass foundry. Later he and his brother, Charles S., joined forces as R. T. Crane & Brother, and 1858 began making steam heaters. Reorganized as Crane Company they manufactured pipes and fittings, and later, as the Crane Elevator Company, passenger and freight elevators. The latter especially grew into a big business. Mr. Crane in 1907 practically retired from active work.

CRANE, WINTHROP MURRAY (1853–1915). Paper manufacturer and statesman. Born at Dalton, Mass.; received degree of A. M. from Williams (1897).

Entering political life, he became lieutenant governor of Massachusetts (1897–1899); governor (1900–1902); United States senator to fill the unexpired term of Senator Hoar (1904–1906), re-elected (1907), continued till 1913.

CROWLEY, PATRICK E. (1864–). President, New York Central Railroad. Born at Cattaraugus, N. Y. Without completing the grammar grades in school, he entered the employ of the Erie Railroad as messenger boy, later becoming telegraph operator, and then train dispatcher. In 1890 he went to the New York Central Railroad as train dispatcher. From that position, he advanced steadily step by step until in 1916 he was made vice-president in charge of operation, and, in 1924 was chosen president. Mr. Crowley's outstanding achievement has been the successful handling of large amounts of traffic by the New York Central since the war; this has contributed greatly to the success of the road.

CUDAHY (*kud'a-hi*), **MICHAEL** (1841–1910). Born in Callan, Ireland; came to the United States (1849); partner in Armour & Co. (1873–1890); head of Cudahy Packing Company of Omaha, Sioux City, and Los Angeles (1890–1910).

CUDAHY, PATRICK (1849–1919). Packer; born in Callan, Ireland; came to the United States (1849); at 12 became a delivery boy for a Milwaukee grocer; at 14 employed by Roddis Packing Company; became a partner with Plankinton & Armour (1876); with brother, John, bought Mr. Plankinton's interest (1888), firm becoming Cudahy Brothers; moved plant to Cudahy (1893), organizing Cudahy Brothers Company, now one of the largest packing houses in the United states, of which he acted as president and general manager; director Wisconsin National Bank.

CUNARD (*kū-närd'*), **SAMUEL** (1787–1865). Steamship king. Born in Halifax, N. S., he early became successful in the coasting trade, and owned vessels trading from Newfoundland and Boston to the Bermudas. He undertook for the British government, the project of substituting steamships for the slow-going sailing vessels then used in the mail service. In 1839 he formed the Cunard Company. The first voyage of a Cunard steamship was successfully made by the *Britannia* from Liverpool to Boston (July 4–19, 1840). In acknowledgment of his services, Cunard was created a baronet in 1859.

CUNLIFFE-OWEN, PHILIP FREDERICK (1855–1926). Publisher. Born in London, he was educated in England and at the University of Lausanne. He first visited the United States in 1876, to represent officially at the Centennial Exposition, his father, Sir Francis Cunliffe-Owen, director of the South Kensington Museum. After returning to England for a short period, he came back to America and settled in New York. There he soon became connected with the New York *Tribune* as a contributor on foreign topics; this position he retained until 1913. With his wife and Willis F. Johnson he formed a newspaper syndicate, which was carried on by himself and wife together after Mr. Johnson withdrew. Mr. Cunliffe-Owen was a voluminous writer of scholarly articles widely quoted in both American and English newspapers. His remarkable collection of newspaper clippings and magazine articles was given by his executors to New York University.

CURTIS, CYRUS H. K. (1850–1933). Publisher. Born in Portland, Me. At the age of 20 he went to Philadelphia where, in 1883, he established the *Ladies' Home Journal;* the first edition consisted of 8 pages; in 1928 it had a paid circulation of 2,500,000 copies; in 1897 Mr. Curtis bought the *Saturday Evening Post* which had been founded as the *Pennsylvania Gazette* in 1728 by Benjamin Franklin, and has been published continuously since then except for a few weeks during the British occupancy of Philadelphia. In 1928 this paper had a weekly circulation of about 2,750,000 copies. In 1911, Mr. Curtis purchased the *Country Gentleman,* the oldest agricultural journal in the country; in 1925 it was changed from a weekly to a monthly paper and three years later had a circulation of 1,500,000. Two hundred twenty-five large presses are kept running day and night to print these three publications. Mr. Curtis is president of the Curtis Publishing Company. In 1913 he bought the *Public Ledger* and in 1923, the New York *Evening Post.*

CUTTER (*kut'ar*), **VICTOR M.** (1881–). Banana king. Born in Dracut, Mass.; educated at Dartmouth College and Tuck School of Business Administration and Finance. After graduation in 1904 he entered the fruit business in Porto Rico with the United Fruit Company and after filling minor positions was elected president. This company is one of the largest producers and transporters of tropical products in the world; it deals largely in bananas, sugar, cacao, and coconuts; owns nearly two million acres of land in Porto Rico, Guatemala, Panama, and Colombia; owns and runs a large fleet of steamships for both passengers and for transportation of its own products; operates 1,600 miles of railroads; and is capitalized at $181,000,000 with no bonded indebtedness. Besides his interest in United Fruit, Mr. Cutter is a director in many other corporations.

DAVIS, HENRY GASSAWAY (1823–1916). Capitalist; born in Baltimore; was successively brakeman, conductor, and agent of the B. & O. Railroad at Piedmont, W. Va.; assisted in establishing the West Virginia Central & Pittsburg Railway; built the Coal and Coke Railway of West Virginia, of 200 miles, of which he became president; is president of Davis National Bank of Piedmont, Davis Trust Company of Elkins, and other corporations. Member House of Delegates, W. Va. (1865); state senator (1868–1871); United States senator (1871–1883); has been delegate to several conventions; member United States Intercontinental Railway Commission; was Democratic candidate for vice-president (1904).

DAVIS, GEORGE S. (1845–). Manufacturer. Born in Detroit; educated in the public schools of that city. After graduation from high school he entered the wholesale drug company and made a systematic study of the drug business. In 1867 he purchased an interest in the firm of Duffield, Parke & Co., manufacturing druggists. After the retirement of two partners, the firm became Parke, Davis & Co. It was largely due to Mr. Davis's untiring and persistent efforts and to his unusual executive ability that the firm of Parke, Davis & Co. developed into the largest concern of its kind in the country, if not in the world, and acquired an international reputation.

DAVIS, JAMES J. (1873–). Secretary of Labor, in cabinets of Harding and Coolidge, was born in Wales, but came with parents to America and entered the steel industry at eleven. Prominent in the Order of Moose, being founder of Mooseheart, and other enterprises of the society, as general since 1906. Held minor political offices before director, 1921, and was President of Bond and Mortgage Company of Pittsburgh. Elected United States Senator for Pennsylvania in 1930.

DETERDING, HENRI WILLIAM AUGUST. Oil king. Born in Java. In 1890 a Netherlander, Kessler, having accumulated a fortune, set up an organization in the Hague called the Royal Dutch Company for the Working of Petroleum Wells in the Netherlands-Indies; in the company, members of the Royal family are reported to have been interested. Kessler went to Batavia, and engaged there for his assistant, Henri Deterding, then a bank clerk. Within six years Kessler had died and Deterding, then in his late thirties, became managing director and the dominating figure in the company. He began by selling cheap Borneo oil in the interior of China and succeeded in driving the Standard Oil Company from some parts. In order to overcome the difficulties of transportation, a combine was formed with the British Shell Co., and the French Rothschilds interest, with Deterding at the head of the whole. In 1903, he began furnishing England oil for the navy; during the World War, he greatly assisted the Allied cause by providing oil for ships, autos, and tanks. For this service, Deterding was knighted by the English king. In a letter dated at the Hague, March 15, 1930, Sir Henri states that the total production of the group of companies controlled directly or indirectly by the Royal Dutch Company amounted in 1929 to an aggregate of approximately 163,000,000 barrels of crude oil, constituting more than one-tenth of the estimated world production for that year. He died in 1939.

DOHERTY, HENRY LATHAM (1870–1939). Utility organizer. Born in Columbus, Ohio. Began at 12 as office boy with the Columbus Gas Co. and remained with the firm until 1890; later was connected with public utility corporations in many cities. In 1905 he organized, and since then become manager of, Henry L. Doherty & Co. bankers and operators of public utilities. Five years later, he organized the Cities Service Co. of which he is president. This company is a holding company for more than a hundred public utility and petroleum properties with assets of $660,000,000.

DOLE, JAMES DRUMMOND (1877–). Pineapple king. Born in Boston, Mass. In his early

twenties, he went to Honolulu where he became interested in the raising of pineapples; he incorporated the Hawaiian Pineapple Co. Ltd., of which he is president and manager. The company has 30,000 acres, producing 3,000,000 cases of canned pineapple annually. He was an organizer of the Hawaiian Pineapple Growers Association which, in 1908, launched a national advertising campaign, claimed to be the first instance of associated advertising.

DOLLAR, ROBERT (1844–1933). Ship builder. Born in Falkirk, Scotland, went to Canada at an early age. He began at 13 as a chore boy to the cook in a lumber camp, later becoming foreman, then in 1872 going into business for himself, first in Canada, then in Michigan, and finally in 1888 in California. He was 47 before he owned his first ship, a small steam schooner. Within the following ten years, the gold rush to the Klondyke and the Spanish-American War had made an increased demand for ships; Mr. Dollar bought or built a number of vessels and established a prosperous shipping along the west coast. It was not until he was 57 that he entered the Oriental trade, in which he later became such an important factor. He then formed the Robert Dollar Co., with his sons for partners. During numerous trips to the Far East, he came in contact with important Chinese and Japanese merchants, built up a prosperous trade, and did much toward establishing more friendly relations between the United States and China and Japan. When Mr. Dollar was nearly 80 years of age, he turned his attention to passenger service. He bought from the United States Shipping Board a number of big passenger ships and added to his immense freighting business a highly successful tourist business. He is known as one of the largest operators of ocean vessels in the world; it has been said of him that he has done more to build up the foreign commerce of the United States than any other citizen and has done most of it after the time when men generally feel that their life is over.

DORRANCE, JOHN THOMPSON (1873–1930). Campbell's Soup. Born in Bristol, Pa.; received B. S. degree from the Massachusetts Institute of Technology in 1895, and Ph. D. degree from the University of Göttingen in 1897. After returning from Germany he began as a chemist in the Joseph Campbell Preserve Company at Camden, N. J. He originated the canned soup industry; placing on the market at first five kinds; within thirty years the business has grown to such proportions that there are now twenty-one varieties. In the plant at Camden nine and a half million pounds of tomatoes are used each year, besides vast quantities of other ingredients. Since 1914 Mr. Dorrance has been president of the Campbell Soup Company. He is director of the Pennsylvania Railroad, the Prudential Life Insurance and many other corporations.

DOUBLEDAY (*dub'l-dē*), **FRANK NELSON** (1862–1934). Publisher. Born in Brooklyn, N. Y.; educated at the Brooklyn Polytechnic Institute. At 15, he started as an office boy with the firm of Charles Scribner's Sons; he remained with the firm for 18 years; in 1886 when the *Scribner's Magazine* was established, he was made manager. In 1897 he became a member of the firm of Doubleday & McClure Company; publishers; 3 years later, McClure withdrew and was succeeded by Walter H. Page, afterwards famous as ambassador to England during the World War. The firm then became Doubleday, Page & Co. In 1927 this was consolidated with the George H. Doran Company. With a capital of five and a quarter million, it is claimed to be "the largest publishing house of English language books and periodicals in the world." Mr. Doubleday is described as being quiet, precise, and possessed of an exceptionally keen mind. From his initials F. N. D., he is often called Effendi which means Master and is a Turkish title of respect often applied to a man of learning.

DOUGLAS, WILLIAM LEWIS (1845–1924). Manufacturer and statesman; born at Plymouth, Mass. Owing to the death of his father in 1850, William was obliged to find employment, and for eight years worked for his uncle, pegging shoes. Learned boot making, and after spending a few years in Colorado, he returned to Massachusetts. In 1876 he was able to establish a small shop, from which his business has grown until to-day he controls two factories with an output of 15,000 pairs daily; and the well-known Douglas shoe is sold in 75 of his own stores. Member Massachusetts House of Representatives (1883–1884); State Senate (1886–1887); mayor of Brockton (1891); governor (1904).

DRAKE, EDWIN L. (1819–1880). Oil pioneer. As a young man he was in turn a clerk, an express agent, and a railway conductor. In 1854 the Pennsylvania Rock Oil Company was formed, the first oil company in the country. Its purpose was to obtain in commercial quantities the oil found in Northwestern Pennsylvania floating on the surface of rocks and streams. The company leased some land where oil was thus found; for four years little more was done; then the company, reorganized as the Seneca Oil Company, sent Edwin L. Drake, then about 40 years old, to dig for oil. It was long before he succeeded in getting together the necessary material; winter came and suspended the operations. The following spring work was resumed. After four months of digging a bed of rock was struck; a drilling engine was installed and in August 1859 oil was struck at the depth of 69 feet. The well yielded some 1,000 gallons daily, the value of this daily output being about $500. Drake's success created the wildest excitement. Hundreds of speculators rushed in, and soon the section was dotted with oil wells.

DRAPER, EBEN SUMNER (1858–1912). Manufacturer. Born in Hopedale, Mass.; educated in the public schools and at the Massachusetts Institute of Technology. He studied in machine shops and cotton mills; in 1880 became a member of the firm of George Draper & Sons; when this was incorporated as the Draper Company, he became selling agent. He was director in numerous corporations and for two years was Governor of Massachusetts.

DUKE, JAMES BUCHANAN (1857–1925). Tobacco king. He engaged with his family in the tobacco business at Durham, North Carolina, and then in New York organized the American Tobacco Company and other corporations. In 1912 he became chairman of the board of directors of the British-American Tobacco Company. Mr. Duke gave large sums to charitable enterprises, the most important gifts being to various educational bodies in North Carolina, including a fund of thirty-two millions, a considerable part of which went to Trinity College at Durham, which was renamed Duke University.

DU PONT (*dü"pōn'*), **ELEUTHERE IRENEE DE NEMOURS** (1771–1834). Manufacturer. Born in France; son of the famous economist and statesman, Pierre Samuel Du Pont de Nemours, who fled to America in 1800, returned to France for a time, then again found refuge in the United States. Eleuthere Irenée learned to make gunpowder in the French government factory under the famous chemist, Lavoisier; he came to America with his father in 1800 and in 1802 established a powder mill near Wilmington, Del. There he made in 1805, 22,000 pounds of powder for the American frigates sent to suppress the Barbary pirates. In the War of 1812, he supplied some 750,000 pounds to the American government, and the firm which he founded, now the E. I. Du Pont de Nemours Company, has been the chief source of military explosives in all the succeeding wars of the United States. In the World War it supplied 40% of the explosives used by the Allies.

DU PONT, PIERRE SAMUEL (1870–). Manufacturer. Born in Wilmington, Delaware; educated at the Penn Charter School, Philadelphia, and graduated from the Massachusetts Institute of Technology in 1890. He became connected with the family firm, the E. I. Du Pont de Nemours Company, of which he is now chairman of the board; holding the same office in the General Motors Corporation. Under his guidance, the Du Pont Company has expanded its activities, manufacturing not only explosives but artificial silk, motion picture films, paints, varnishes, and a variety of other products.

DU PONT, T. COLEMAN (1863–1930). Senator and capitalist, from 1893 became interested in coal mining in Kentucky and electric power there and elsewhere. President Du Pont Powder Company, 1902–1915. Senator from Delaware by appointment, 1921–22; elected for full term beginning in 1925. Known for benefactions, including a cement highway costing four millions given to Delaware.

DURANT (*diu-rant'*), **WILLIAM CRAPO** (1861–). Manufacturer. Born in Boston, Mass.; educated in the public schools of Flint, Michigan. In his middle twenties, he founded the Durant-Dort Carriage Co. in Flint and developed a large business. Later he became an outstanding figure in the automobile world; has organized and been connected with several companies, the Buick, General Motors, the Chevrolet and others. After 1920 he lost control of General Motors, but still retained interests in the Locomobile Company and the Durant Companies in various states. Mr. Durant made and lost several fortunes.

EDISON, CHARLES (1890–). Manufacturer. Born in West Orange, N. J.; son of Thomas Edison. Educated at the Massachusetts Institute of Technology. He is now president and chief operating executive of Thomas A. Edison, Inc., including Edison Phonograph Distributing Co., Edison Wood Products, Inc., Edison Storage Battery Co., and others.

ELLIOTT, HOWARD (1860–1928). Railway president. Born in New York City; in 1881 graduated from the Lawrence Scientific School with the degree of civil engineer. The fall after graduation he entered the service of the Chicago, Burlington, and Quincy Railway; within 10 years he had advanced to the position of general freight agent of the Missouri lines of the Burlington system. In 1903 he was elected president and director of the Northern Pacific Railroad, a position he held ten years. Under his administration the road grew and developed. In 1913 Mr. Elliott was called to the presidency of the New York, New Haven, and Hartford, then in a precarious condition, but within four years he resigned because of a threatened loss of health. Later he resumed his connection with the Northern Pacific, becoming chairman of the board, and he was actively identified with that road until his death. From 1917–1927 Mr. Elliott was a member of the Railroads' War Board. He was director of more than a score of large corporations; was at one time president of the Board of Overseers of Harvard, was a life member of the Corporation of the Massachusetts Institute of Technology and was a recipient of honorary degrees from several colleges.

ERSKINE (*ûr'skin*), **ALBERT R.** (1871–1933). Manufacturer. Born at Huntsville, Ala. After holding responsible positions in a number of corporations, he went to the Studebaker Corporation as treasurer in 1911, and in 1915 became president.

EVERITT, GEORGE BAIN (1885–). Merchant. Born in South Dakota. In 1921, became assistant to the president of Montgomery Ward and Company; later, general manager, and in 1926 president.

FABER (*fā'bĕr*), **JOHANN LOTHAIR VON** (1817–1896). German manufacturer. Born in Stein, Bavaria. About 1839 he inherited the business of manufacturing lead pencils which his great-grandfather had founded in 1760. When he assumed control, only about 20 persons were employed; he introduced improvements in machinery and methods, and brought his factory to such a high state of efficiency that it became a model for all other German and Austrian manufacturers. He established factories in New York, Paris, London, and Berlin; by contract, he gained control of the entire output of the graphite mines in eastern Siberia; he had his own cedar mills at Cedar Keyes in Florida; he extended the business to include the manufacture of slates, slate pencils, drawing instruments, and paints. For his services to German industry he received a patent of nobility.

FARGO, WILLIAM GEORGE (1818–1881). Pioneer express man. Born in Pompey, N. Y. In 1843 he became the Buffalo agent of the Pomeroy Express Company. The next year, in partnership with two others, he founded the first express company west of Buffalo. In 1868 Mr. Fargo was made president of the company which by this time had extended its lines to the Pacific Coast. Before he died the company had 2,700 offices and over 5,000 employees with a capital of $18,000,000. The city of Fargo, N. D., was named in his honor.

FARRELL, JAMES A. (1863–). President of the United States Steel Corporation. Born in New Haven, Conn., and educated in the public schools of that city. At 16 he went to work in a wire mill in New Haven; later, he went to Pittsburgh where he was connected with various mills in different capacities until 1903. He then became president of the United States Steel Products Exports Company, a subsidiary of the United States Steel Corporation, handling the export business; in 1911 he was made president of the United States Steel Corporation, not only the largest steel company in the United States, but also exporter of 60% of the American steel going abroad. Mr. Farrell was the first recipient of the new Elbert H. Gary Memorial Medal of the American Iron and Steel Institute for Distinguished Achievement.

FIELD, CYRUS WEST (1819–1892). American financier; born at Stockbridge, Mass. At 15 he went to New York and worked for A. T. Stewart & Company, but before he was of age he was in business for himself, manufacturing paper; and at the end of a dozen years he was at the head of a prosperous business. In 1854 he became interested in a scheme to lay a transatlantic cable and formed a company of five men, with Peter Cooper as president. Three fourths of the necessary capital was raised in England, there the cable was made, and the first great attempt came in 1857. It was a failure; and the next, in 1858, was successful for a short time only. The third attempt was made in 1865, with the help of the biggest ship then afloat, but it was a failure. The next year saw him afloat with yet another cable, and this time it was a success. During the succeeding years he did much toward promoting railroad development, until his resignation as president of two roads in 1880.

FIELD, MARSHALL (1835–1906). Merchant; born in Conway, Mass. He began by clerking in Pittsfield, Mass., and in Chicago from 1856 to 1860. In the latter year he was made junior partner, and in 1865 became one of the firm of Field, Palmer & Leiter, which was changed to Marshall Field & Company in 1881. Under his management the firm conducted the largest retail and wholesale dry goods business in the world, with immense headquarters in Chicago, and branches in France, Germany, and England. He founded the Field Columbian Museum with $1,000,000, as a permanent repository for valuable exhibits, especially from the Columbian Exposition of 1893.

FILENE, A. LINCOLN (1865–). Merchant. Born in Boston, Mass.; after receiving a common school education, he began work in his father's store, now known as William Filene Sons Company, of which he is now treasurer and general manager. With his brother (see below) he has been interested in improving the welfare of his own employees through the principle of coöperation and a sharing of the responsibilities of the business; vocational guidance has also been another of his interests.

FILENE, EDWARD A. See under DICTIONARY OF PHILOSOPHERS, THEOLOGIANS, AND REFORMERS.

FIRESTONE, HARVEY SAMUEL (1868–1938). Manufacturer. Born in Columbiana County, Ohio; attended high school and business college. In 1900 he organized at Akron, Ohio, the Firestone Tire and Rubber Company; at first employing about 17 men, the business of this company has increased enormously; the number of its employees now equal the population of a fair sized city; it has extensive rubber plantations in Liberia, and in the value of its output ranks fourth among the rubber companies of the United States. Mr. Firestone is a warm friend and a great admirer of Thomas A. Edison; he is the donor of a yearly scholarship providing the expenses of a complete college education to the high school student who writes the best essay on good roads.

FISH, STUYVESANT (1851–1923). Banker, railway official; born in New York; after leaving Columbia University he entered the office of the Illinois Central Railway as clerk (1871), secretary to president (1872); clerk Morton, Bliss & Company, New York, and Morton, Rose & Company, London (1872–1877); he acted as director and officer of many railroads; president Illinois Central Railroad (1887–1906); and also director and trustee in various insurance and trust companies; was president of American Railway Association for 1904–1906, and chairman of the seventh International Railway Congress, Washington, 1905.

FISKE (*fĭsk*), **HALEY** (1852–1929). Insurance official. Born at New Brunswick, N. J.; graduated from Rutgers University in 1871; studied law and practiced until 1891, when he became identified with the Metropolitan Life Insurance Company of New York, and was a leading mover in the great expansion of the business of that company; after serving in various other capacities, he was made president in 1919. He was especially interested in the dissemination of knowledge concerning matters of health and deemed it a duty of his company to its policy holders, not merely to pay them a death benefit, but also to give them the latest scientific knowledge of how to live rightly and long. It is safe to say that he was one of the leaders in the science of preventive medicine. Besides his business interests, he was a trustee of various educational and religious institutions.

FLAGLER (*flăg'lĕr*), **HENRY M.** (1830–1913). Capitalist; born at Canandaigua, N. Y.; began as clerk in a country store. After manufacturing salt at Saginaw, Mich., he went to Cleveland and became partner in Rockefeller, Andrews & Flagler, oil refiners, later the Standard Oil Company, of which he became vice-president and director (1870–1908); a director till 1911. He became interested in the de-

velopment of Florida in 1885; bought Jacksonville and St. Augustine Railroad (1888); constructed 10 hotels in the state connected by 600 miles of railroad, and two in the Bahamas. His crowning achievement was the Florida Keys Railroad, 156 miles from Miami to Key West. Director in many railroad companies and other corporations.

FLEISCHMANN, JULIUS (1872–1925). Yeast manufacturer. Born in Cincinnati, Ohio; son of Charles Fleischmann, who in 1868, with his brother Max, founded at Riverside, Ohio, the firm of Fleischmann & Co. for the manufacture of yeast. Julius attended the local schools, then entered his father's factory where he proved himself so efficient that at 23 he was made manager of the company, becoming president upon his father's death in 1897. In 1900 he was elected mayor of Cincinnati and three years later was again elected. He moved to New York in 1910. The Fleischmann Company makes nearly all the compressed yeast used in the United States; it has 11 factories, and in 1928 its net sales amounted to more than $64,000,000.

FLEMING, SANFORD (1827–1915). Born in Scotland; did important Canadian engineering work on Northern Railway, Intercolonial, Pacific Railway, etc. (1845–1871); surveyed road for St. John's to St. George's Bay Railway in Newfoundland. Retired to devote himself to politics, and special branches of science and literature (1880); did great work on "cosmic or universal time," making Greenwich the standard of the world; advocated Pacific Ocean cable, giving plans forming a Pan-Britannic service encircling the world (1879).

FLINT, CHARLES RANLETT (1850–1934). Merchant. Born at Thomaston, Me. Partner in important exporting firms; Chilean consul, New York (1877); consul general Nicaragua and Costa Rica to United States; established Flint & Company, shipowners (1885); formulated important reforms in customs, etc.; fitted out war fleet for Brazil (1895); bought cruiser for Japan (1894); sold submarine and torpedo boats to Russia during war with Japan, visiting Turkey and other countries in its interest.

FOKKER (*fok'ar*), **ANTHONY HERMAN GERARD** (1890–1939). Dutch airplane builder. Born at Kediri, Java. In 1912 he established an airplane factory at Johannesthal near Berlin, and the following year founded another factory at Schwerin in Mecklenburg. During the World War he built planes for the German army. After the war he returned to Holland and established the Fokker Aircraft Works there. In 1924 the Atlantic Aircraft Corporation, of which Mr. Fokker is director, was founded, with a factory at Hasbrouck Heights in New Jersey.

FORD, EDSEL BRYANT (1893–). Manufacturer. Born in Detroit, Mich., son of Henry Ford; educated in the Detroit schools; became connected with his father's automobile business at an early age; is now president and treasurer of the Ford Motor Company.

FORD, HENRY (1863–). Born in Greenfield, Mich.; educated in the district school and then learned the machinist's trade. By the time he was 30, after facing incredible hardships, he finally built an automobile that would run. In 1903 he organized, and became president of, the Ford Motor Company. By 1927 this company had manufactured 15,000,000 cars on the T model, was manufacturing the expensive Lincoln car, and turning out a large number of tractors and airplanes. That year Mr. Ford discontinued the T model and after much experiment and expense brought out a new model which was a great improvement over the old one. In the summer of 1929 the Ford Motor Co. was producing 9,000 cars a day and employing more than 200,000 men. By buying timber land and mines and by establishing factories for the production of the necessary upholstering material, Mr. Ford secured control of the supply of most of his raw materials. In 1928 the principal seat for the manufacture of the Fordson tractors was transferred to Ireland; in the spring of 1929 the Ford Company contracted to supply the Soviet government with $30,000,000 of cars and tractors. In a magazine article published in 1929, Mr. Edward Filene paid the following tribute to Mr. Ford: "I think of Henry Ford as the greatest business man, not merely of America, but of the world. . . . He has done more than any other living man to demonstrate that the prosperity of business depends upon the prosperity of the consumers, and that no nation can afford to have another nation exploited."

FRANCIS, DAVID ROWLAND (1850–1927). Grain merchant. Born in Richmond, Ky.; graduated from Washington University, St. Louis, in 1870. Starting as clerk in a commission house, he advanced to a partnership. In 1877, established the firm which became later D. R. Francis & Bros. Commission Co., grain merchants, of which he was president. He was elected president of the Louisiana Purchase Exposition; in 1905 was sent to Europe to thank rulers of various countries for their part in making the exposition a success; he was decorated by the German and Austrian emperors and by the Queen of the Netherlands. He was Secretary of the Interior under President Cleveland; was Ambassador to Russia during the period when Emperor Nicholas was dethroned and was the first diplomat of any country to recognize officially the Kerensky government.

FRICK, HENRY CLAY (1849–1919). Manufacturer; born at West Overton, Pa. He began as a clerk, then became a small dealer in coke, and later president of the H. C. Frick Coke Company, now largest in the world, producing 25,000 tons daily. Was shot and stabbed in famous Homestead strike (1892). Chairman board of managers of Carnegie Steel Company from 1892; and official in many large concerns.

FROHMAN (*frō'man*), **DANIEL** (1853–1941). Theatrical manager. Born in Sandusky, Ohio; educated in the public schools of Sandusky and New York City. He began his career with the New York *Tribune* as office boy and was in the newspaper business for five years. He then became manager of traveling theatrical companies throughout the country. He later was manager of the Fifth Avenue Theater and of the Madison Square Theater; also manager of Daly's Theater with the Daniel Frohman Stock Company; in 1885 he became manager of the Lyceum Theater; and was also vice-president of the Famous Players Film Co. and president of the Actors' Fund of America.

GARY, ELBERT HENRY (1846–1927). Financier; born at Wheaton, Ill. Graduate of University of Chicago; admitted to the bar in 1867. Was for five terms mayor of the village and (afterward) city of Wheaton; county judge, two terms; practised law for 25 years in Chicago; general counsel for important corporations connected with the Federal Steel Company, of which he has been president since 1898. Was prominent in organizing the United States Steel Corporation and as chairman of its board of directors; director in several banks and corporations in Chicago and New York; president Gary-Wheaton Bank; trustee of Northwestern University.

GATES, JOHN WARNE (1855–1911). Capitalist; born on farm near Turner Junction (now West Chicago), Illinois; began business life by conducting a small hardware store at his birthplace; built up large business in barbed wire while acting as salesman for I. L. Ellwood in Texas, and later established for himself in St. Louis; organized Southern Wire Company (1880), which became the Braddock Wire Company; absorbed other companies in Consolidated Steel and Wire Company, which was sold to Federal Steel Company in 1898; organized American Steel and Wire Company (now part of the United States Steel Corporation), (1897); director of numerous financial enterprises.

GIFFORD, WALTER SHERMAN (1885– President of American Telephone and Telegraph Co. Born in Salem, Mass.; graduated from Harvard University in 1905. After graduation, was for three years connected with the Western Electirc Co. In 1911 he went with the American Telephone and Telegraph Company of which in 1925 he was elected president. He was secretary of the United States Representation on the Inter-Allied Munitions Council, Paris 1918.

GILLETTE (*ji-let'*), **KING CAMP** (1855–1932). Safety razor king. Born in Fond du Lac, Wis.; educated in the Chicago public schools. He invented the Gillette Safety Razer, and in 1901 organized the Gillette Safety Razor Co. of which he was president for some years. He was the author of several books among them being *Human Drift, Gillette's Industrial Solution,* and the *People's Corporation.*

GLOVER, CHARLES CARROLL (1846– Financier, banker; born on farm in Macon County North Carolina; entered Riggs & Company, bankers as clerk; became partner in firm (1873); president of the Riggs National Bank since its organization (1896); instrumental in procuring for District of Columbia site for Fort Reno reservoir; aided in securing the establishment of Rock Creek and Potomac

parks; director, trustee, and officer of various organizations; ex-president Washington Stock Exchange; member Washington National Monument Society; vice-president and treasurer Corcoran Gallery of Art.

GOLDWYN, SAMUEL (1882–). Theatrical man. Born in Warsaw, Poland. Came to the United States at the age of 14; educated in night school. Became a naturalized citizen in 1902. In 1916 he organized the Goldwyn Pictures Corporation, and in 1919, the Eminent Authors Pictures, Inc. He was active in interesting American authors in the improvement of motion pictures.

GOMPERS, SAMUEL (1850–1924). Was president of the American Federation of Labor from 1886 to his death in 1924, with the exception of 1895. Mr. Gompers was born in England and after his fourteenth year advocated the rights of labor with zeal and fidelity. He was one of the sponsors of the Cigarmakers International Union, representing the trade to which he belonged. For years he also edited the *American Federationist*, official organ of most of the unions of America. He was honored during the World War by being made a member of the Advisory Committee on the Council of National Defense, and president of the international commission of labor at the Peace Conference, besides being appointed by the president of the United States to several important commissions, including the *Unemployment Conference*, 1921. Mr. Gompers openly opposed some of the later radical and communistic movements here and abroad.

GOULD, FRANK JAY (1877–). Capitalist; born in New York; entered the railroad service (1897); has been first vice-president of several railroads; president of Big Creek Lumber Company, Pacific Railway in Nebraska, Richmond & Chesapeake Bay Railway Company, and Old Dominion Iron & Nail Works Company; director in numerous companies.

GOULD, GEORGE JAY (1864–1923). Capitalist; born in New York; president (1893–1911) and director of Missouri Pacific Railway; St. Louis, Iron Mountain & Southern Railway Company; Texas & Pacific Railway Company; International and Great Northern Railway Company since 1893. Was also president of many other railroads, and director of railroads and corporations throughout the country.

GRACE, EUGENE GIFFORD (1876–). Bethlehem Steel man. Born in Goshen, N. J.; a graduate of Lehigh University in 1899; since then connected with the Bethlehem Steel Company, beginning in charge of an electric crane and advancing steadily until in 1913 he became president.

GRACE, WILLIAM RUSSEL (1832–1904). Merchant. Born in Queen's County, Ireland. At 14 he ran away from home and by working on a sailing vessel, made his way to New York. In 1850 he went to Callao, Peru, where he became a clerk in a firm of shippers and commission merchants; before long he was made a partner, and finally became the leading member of the firm. In 1865 he returned to New York and organized the firm W. R. Grace & Co. to trade with South and Central America; in 1891 he established the New York and Pacific Steamship Company. He was twice elected mayor of New York.

GRAY, CARL RAYMOND (1867–1939). Railroad president. Born in Princeton, Ark. When less than 16 years of age he became telegraph operator for the St. Louis and Sante Fe Railroad; he remained with that road until 1911, when he had advanced to the office of senior vice-president. Since then he has been president of the Great Northern, then president of the Western Maryland, and on January 1, 1920, president of the Union Pacific.

GREEN, WILLIAM (1873–). Labor leader. Born at Coshocton, O. Received only a common school education, going to work at an early age as a coal miner; he became interested in trade unionism and identified himself with the United Mine Workers, serving in district and state organizations of the union in Ohio; in 1913 he was elected secretary-treasurer of the United Mine Workers of America, serving until 1925. On the death of Samuel Gompers in 1924, Mr. Green was elected president of the American Federation of Labor and has been reëlected annually since that year. He was a member of the Ohio Senate for two terms and a delegate to several Democratic national conventions. He is the author of the Ohio Workmen's Compensation Law, and has written many articles and made many addresses on trade unionism and the advancement of labor.

GRIFFITH, DAVID W. (1880–). Theatrical man. Born at La Grange, Ky.; received a common school education. In 1908 he became identified with the motion picture industry. He brought into first practical use certain methods of pictorial emphasis, such as the "close-up," the "cut-back," the "fade-out," and the "dissolve." As an independent producer, he has produced a number of very popular and noteworthy pictures,—the *Birth of a Nation, Way Down East, Orphans of the Storm, America*, and others.

GUGGENHEIM, DANIEL (1856–1930). Copper king. Son of Meyer Guggenheim, founder of M. Guggenheim & Sons, one of the largest miners and smelters of copper in the world, and now doing business as Guggenheim Brothers. From 1873 to 1884 Daniel was buyer for a commercial house in Switzerland; in 1884 he became associated with his brothers in the mining business. In 1926 he donated $2,500,000 to the Daniel Guggenheim Fund for the promotion of aviation.

GUGGENHEIM, HARRY FRANK (1890–). Copper king and aviation promoter. Son of Daniel; he was a student at Yale, 1907; also at Pembroke College, Cambridge, Eng., where he received the B. A. degree in 1913 and M. A. in 1917. Began with an American smelting company in Mexico; was sent to develop the Chile Copper Company; he built in the desert a mining town with a population of 10,000 and made the Chile Copper Company the cheapest low grade copper producer in the world. Since 1926, president of the Daniel Guggenheim Fund for the Promotion of Aeronautics. In 1929 appointed by President Hoover ambassador to Cuba.

GUGGENHEIM, MURRY (1856–1939). Copper king. Born at Philadelphia, was educated in the public schools. He assisted his father and brothers in the formation of the firm of M. Guggenheim & Sons in 1881; the firm is now known as Guggenheim Brothers and includes Daniel, his son Harry F., Murry, Simon (see below), Solomon R., and William Guggenheim. The firm is interested in mines in Alaska, Colorado, Mexico, and Chile; it has a controlling interest in various mining and smelting companies such as the Chile Copper Company, the American Smelting and Refining Company, the Braden Copper Company, and others. The American Smelting and Refining Co., in which the Guggenheims are the leading factors, is the greatest refiner and marketer of non-ferrous metals in the world.

GUGGENHEIM, SIMON (1867–). Copper king and philanthropist. Born at Philadelphia; educated in the public schools and studied languages in Europe for two years. He began his mining career in Colorado and became a member of the Guggenheim firm; he served as United States senator from Colorado from 1907 to 1913. He was much interested in educational and philanthropic affairs; in 1925, jointly with his wife, in memory of a deceased son, he established the John Simon Guggenheim Memorial Foundation with a gift of $3,000,000. The fund is to be used "for scholarships for advanced study abroad, without regard to sex, race, creed, or color." In 1929 he gave $1,000,000 for exchange fellowships between Latin America and this country.

HAMMOND, JOHN HAYS (1855–1936). Mining engineer; born at San Francisco; graduated from Yale (1876); took mining course at Freiburg, Saxony. He has examined mining properties in all parts of the world; consulting engineer for Barnato Brothers, 1893, and later for Cecil Rhodes; for the Consolidated Gold Fields of South Africa; for the British South Africa Company; and for the Randfontein Estates Gold Mining Company. After Jameson's raid he was arrested and given death sentence, later commuted to prison for 15 years, finally released on payment of $125,000. Went to London; returned to United States; traveled extensively as a mine specialist for Venture Corporation of London and Guggenheim Exploration Company of New York. He has lectured at Columbia, Yale, Harvard, and Johns Hopkins; contributed largely to scientific magazines, and received many honorary titles; president American Institute Mining Engineers (1907–1908).

HARAHAN, JAMES THEODORE (1843–1912). Railway president; born at Lowell, Mass. Employed by Orange & Alexandria Railroad, Alexandria, Va. (1864–1865); held several responsible positions with other railroads; general manager Louisville & Nashville Railroad (1885–1888), Chesapeake & Ohio Railway, Louisville, New Orleans & Texas Railway; second vice-president Illinois Central Railroad (1890–1906); president same road (1906–1912).

HARMON, WILLIAM ELMER (1862–1928). Realtor and philantrophist. Born in Lebanon, Ohio; at-

tended the National Normal University at Lebanon, Ohio, and the Louisville School of Medicine. He became interested in real estate in Cincinnati where he began selling house lots for $1.00 down, the balance of the price to be paid in regular installments. This was the beginning of the partial payment plan now so widely used in the marketing of many products. He organized the firm of Wood, Harmon & Co. which at one time operated in the development of suburban estate in 26 cities but was later concentrated in New York. He was president of Wood, Harmon & Co., the Third United Realties Company and of a score of other corporations. In 1922 Mr. Harmon established the Harmon Foundation for humanitarian purposes, especially for the establishment of playgrounds and the financing of loans to college students. For some years before Mr. Harmon's death, many persons received checks enclosed in cordial, encouraging letters which were signed Jedidiah Tingle. These letters were sent to writers of good books, minor poets, doers of heroic deeds, and to many in trouble, "to comfort and cheer those who do exceptional things or suffer." It was not until after Mr. Harmon's death that the secret was disclosed that he was Jedidiah Tingle.

HART, HARRY (1850–1929). Clothier. Born in Eppelsheim, Germany; came to the United States at the age of 8; was educated in the public schools of Chicago. In 1879 he organized the clothing firm of Hart, Abt, & Marx, which, upon the withdrawal of Mr. Abt a few years later, became Hart, Schaffner & Marx, now one of the largest clothing firms in the world. Mr. Hart was president of the company from its foundation until his death; he survived both his partners. The firm worked out what is known as the Hart, Schaffner & Marx Agreement by which all labor questions are settled through equal participation of both employer and employees; it has also given prizes for economic studies.

HARTFORD, GEORGE HUNTINGTON (1833–1917). Chain stores. Founder of the A. & P. Born in Augusta, Me. Before the Civil War he went to New York, and there at first engaged in a small leather and hide business. In 1859 he went to work for a spice and tea merchant as manager; when the proprietor withdrew, Mr. Hartford carried on the business; he became prosperous and, in 1864, organized the Great American Tea Co. He soon opened neighborhood stores in various parts of New York and Brooklyn. In 1869, when the completion of the Union Pacific Railroad united the Atlantic with the Pacific coast by rail, Hartford renamed his company the Great Atlantic and Pacific Tea Company. He gradually established stores in many cities; in 1912 telephones were taken out of all the stores of the company, and no more deliveries were made. This enabled the firm to lower prices and caused a 65% increase in business. Mr. Hartford died in 1917, and the business is now managed by his two sons. The number of stores has increased enormously in recent years, and has been estimated at between 15,000 and 20,000. It is not, however, until very recently that the company has opened stores in the cities of the Pacific coast and thus become in fact the Great Atlantic and Pacific Tea Company.

HAVEMEYER, JOHN CRAIG (1833–1922). Merchant and sugar refiner; born in New York. Began by clerking in 1851–1852. After traveling in Europe, Syria, and Egypt, he clerked in a sugar refinery (1854–1856) in Brooklyn; partner in Havemeyer Brothers & Company (1871–1880). He was director in several railroads and corporations. Writer and speaker on political, moral, and religious subjects.

HAYS, WILL H. (1879–). Motion picture czar. Born in Sullivan, Ind. Graduated from Wabash College in 1900 and that same year was admitted to the bar. He became interested in politics and occupied several political positions in Indiana. In 1921 he was appointed postmaster general but, after serving one year, resigned to become president of the Motion Pictures Producers and Distributors of America, Inc.

HEARST (*hûrst*), **WILLIAM RANDOLPH.** See under RULERS AND STATESMEN.

HEINZ (*hīnz*), **HENRY J.** (1844–1919). 57 Varieties. Born in Pittsburgh; attended public schools and business college. At 25 he began in a small way in the packing of food products at Sharpsburg, Pa. In three years he moved to Pittsburgh (1872) where he carried on business for some time under the firm name of Heinz, Noble, and Co. which later became F. & J. Heinz, then in 1888 H. J. Heinz & Co., a partnership until 1905, then organized as a corporation with Mr. Heinz as president. The main plant in Pittsburgh covers 22 acres of floor space; there are 16 branch factories, and 30,000 acres of land under cultivation; there is a plant in Canada, one in England, and one in Spain and the "57 Varieties" are sold by agents in every part of the world. In 1908 Mr. Heinz succeeded John Wanamaker as president of the Pennsylvania Sabbath School Association, and retained that office until his death.

HERRESHOFF (*her'es-hof*), **NATHANIEL GREENE** (1848–1926). Superintendent Herreshoff Manufacturing Company; born in Bristol, R. I.; educated at Massachusetts Institute of Technology (1866–1869), and holds the Sc.M. of Brown University. Designer of yachts and torpedo boats. Member of the Institution of Naval Architects and Marine Engineers, New York; and of Institute of Naval Architects, England.

HERTZ, JOHN DANIEL (1879–). Yellow cab. Born in what is now Czecho-Slovakia; he founded the Yellow Cab Company of Chicago in 1915; the Chicago Motor Coach Company in 1922, and in 1924 the Omnibus Corporation of America.

HILL, JAMES J. (1838–1916). Railway official; born near Guelph, Ont. Worked in a steamboat office in St. Paul (1856–1865); agent of the Northwestern Packet Company (1865); and later engaged in fuel and transportation on his own account. In 1869–1875 he was at the head of Hill, Griggs & Company; established Red River Transportation Company (1870); organized Northwestern Fuel Company (1875), but later sold his interest to organize a syndicate to secure control of the St. Paul & Pacific Railroad. This was the nucleus of the Great Northern system which he projected from Lake Superior to Puget Sound, with northern and southern feeders, and direct steamship connection with China and Japan (1883–1893); president Great Northern system (1893). In 1907 he retired, retaining chairmanship board of directors. Now president Northern Securities Company, and director in Manhattan Trust Company, Chase National Bank, First National Bank of New York, First National Bank of Chicago, and many other corporations.

HOLMES, RALPH CLINTON (1874–). Texaco oil. Born in Sharon, Pa.; graduated from high school at Olean, N. Y. in 1895. He was with the Standard Oil Company at Olean for five years after graduation, with the Texas Company since 1902 and president since 1920. "Texaco" gasoline is the only brand sold in every state of the Union. There are (1930) 40,000 distributing stations in the United States alone.

HOYT, COLGATE (1849–1922). Banker, railway official; born at Cleveland, Ohio; became a banker; government director (1882–1884), company director (1884) of the Union Pacific Railroad; vice-president Oregon & Transcontinental and Oregon Railroad & Navigation Company (1889); vice-president North American Company until 1889; now first vice-president Missouri, Kansas & Texas Railway of Texas.

HUBERT, CONRAD (1854–1927). Flash-light king. Name originally Akiba Horowitz. Born in Minsk, Russia, of Jewish parents; educated in a Hebrew school. When 13 he went to Germany where he engaged in the distillery business; returning to Russia after 6 years, he became a partner in his father's firm and achieved success, but, finding his progress impeded by Czaristic persecution, he sold his business and in 1882 emigrated to the United States, later becoming an American citizen and changing his name to Conrad Hubert. The turning point in his career came when he bought the invention of the flash-light, patented it, and began its extensive manufacture. He organized the business under the name of the Eveready Battery Company of which he became president. The business prospered and Mr. Hubert amassed a fortune; about 1915 he sold the business to the National Carbon Company. Under the terms of his will, drawn up two months before his death, Mr. Hubert directed his executors to appoint three prominent men to divide three-fourths of his fortune of $8,000,000 among benevolences of their own choosing. The men selected were Calvin Coolidge, Alfred Smith, and Julius Rosenwald. They selected thirty-four institutions—educational, medical, social, religious, white, Negro, Jewish, Catholic, Protestant, undenominational—as beneficiaries under the will.

HUNTINGTON, COLLIS POTTER (1821–1900). Railway official. At 16 he secured $3,000 worth of clocks on credit in New York, and sold them in the South and West; started his fortune in the hardware business in California (1849); with Leland Stanford,

Charles Crocker, and Mark Hopkins he organized the Central Pacific (1860–1869). At his death he was president of the managing board of the Southern Pacific system, comprising 26 corporations, besides owning 9,000 miles of steamship lines. He gave liberally to worthy objects.

HUNTINGTON, HENRY E. See under DICTIONARY OF FINANCIERS.

HYDE, HENRY BALDWIN (1834–1899). Insurance. Born in Catskill, N. Y. Before he was 20, he entered the employ of the Mutual Life Insurance Company of New York; at 22 he was cashier. Three years later he founded the Equitable Life Assurance Society in competition with the Mutual Life, and until his death he was its master spirit and director. He aimed to make it the largest life insurance company in the world and this led to a fierce and bitter contest for business.

INGALLS, MELLVILLE EZRA (1842–1914). Railroad president. Born in Harrison, Maine; attended the district school in winter and worked on the farm in summer; at 16 he passed an examination for teaching, and taught for several winters in order to get money for a college education; he spent some time at Bowdoin, then went to the Harvard Law School, from which he graduated in 1863. He built up a successful practice in Boston, specializing along the laws of transportation. He was engaged as counsel for the Indianapolis, Cincinnati & Lafayette Railroad and gave such satisfaction that he was elected president. Later this road was reorganized as the Cincinnati, Indianapolis, St. Louis & Chicago Railroad and Mr. Ingalls became president. The popular name "Big Four" dates from this period. In 1889 this road was consolidated with another under the name of Cleveland, Cincinnati, Chicago, and St. Louis with Mr. Ingalls as president, a position he retained until 1905 when he became Chairman of the Board. His success as a railway manager was noteworthy even during that period of remarkable railroad expansion.

INSULL, SAMUEL (1859–1938). Corporation official; born in London; came to the United States in 1881, and was private secretary of Thomas A. Edison, having full charge of his business affairs for many years. He represented him in the organization and management of Electric Tube Company, Edison Machine Works, and Edison Lamp Company. In 1889 the different Edison concerns were consolidated into the Edison General Electric Company, with Mr. Insull as second vice-president. In 1892 there was further consolidation with the Thomson-Houston Company, into the General Electric Company, of which he became second vice-president. Since 1907 he has been president of the Commonwealth Edison Company, controlling all electric lighting in Chicago. He is president also of numerous other corporations—electric, gas, heat, power, and traction.

JEEJEEBHOY (*jē-ēēb-hēt'*), **JAMSETJEE** (1783–1859). Indian merchant. Born at Bombay of poor parents and early left an orphan. At 16 he began a series of business travels which eventuated so successfully that he was able to settle at Bombay and from there direct his widely expanding commercial enterprises. The fortune he acquired was largely expended in relieving the unfortunate in his own country. He founded and endowed hospitals, schools, homes for the poor, and pension funds; gave money for the building of bridges, reservoirs, and other public works in many parts of India. In recognition of his services he was knighted in 1842 and in 1858 was made a baronet.

KEITH (*kēth*), **BENJAMIN FRANKLIN** (1846–1914). Vaudeville king. Born in Hillsboro Bridge, N. H.; educated in the district school. He joined a circus and later became proprietor. He then became part owner of the Gayety Theater in Boston, and in 1885 began a continuous performance theater. With F. F. Proctor, he formed Keith and Proctor controlling vaudeville theaters throughout the United States.

KEITH, MINOR COOPER (1848–1929). Merchant and art collector. Born in Brooklyn, N. Y. After experience in the lumber business and in the cattle business, he went to Costa Rica in connection with the construction of a railroad there. In 1899 he organized the United Fruit Company. He became interested in the Maya ruins in Central America and at Mercedes, made a valuable collection of Maya sculptures and pottery. This collection is now in the American Museum of Natural History. Mr. Keith was made chairman of the board of the International Railway of Central America.

KENT, ARTHUR ATWATER (1873–). Radio manufacturer. Born in Burlington, Vt.; educated at the Worcester Polytechnic Institute. In 1902, he established in Philadelphia, the Atwater Kent Manufacturing Works, where at first he made telephones and meters. In 1922 he began the manufacture of radio receiving sets. He was an active promoter of the movement for broadcasting concerts by the world's foremost musicians.

KRAFT, JAMES LOUIS (1874–). Maker of Kraft's Cheese. Born in Canada; came to the United States in 1903, settling in Chicago where he began in cheese business about 1906 when he drove a horse called "Paddy" and sold cheese to Chicago stores. He is now president of the Kraft-Phenix Cheese Co., which has an annual sale volume around $85,000,000.

KRESGE, SEBASTIAN S. (1867–). Merchant. Born in Pennsylvania. In 1897 he started with J. G. McCrorey in a five and ten cent store in Memphis, Tenn. He later went to Detroit where he was a member of Kresge and Wilson. In 1912, when the S. S. Kresge Co. was incorporated, he became chairman of the board. The company has stores in over 100 cities in the United States.

KREUGER, IVAR (1880–1932). Match king. Born in Sweden. At 19 he graduated as a mechanical engineer from the Stockholm Technical College; the following year he came to the United States, going first to Chicago and later to New York where, as a member of the engineering staff, he worked on the Flatiron, Metropolitan Life, and other large buildings. In 1907 he returned to his native land; there he formed the construction firm of Kreuger and Toll which has built some of the finest buildings in Stockholm. In 1913 he entered the match industry by gaining control of all the independent match factories in Sweden and forming them into one corporation; in 1917 by merging his own with the only other match corporation in Sweden, he formed the Swedish Match Company, controlling the entire match production of Sweden. By the end of the World War his company owned vast tracts of forest land in Sweden and other countries, pulp and paper mills, power plants and laboratories for the production of the necessary chemical, thus gaining control of the supply of raw materials. It now holds a complete monopoly of the match industry in eight European and two South American countries, and in Japan and a partial monopoly in many other countries; it has 160 branch factories in foreign countries all under the direction of Swedes, and produces more than 75% of the world's matches.

KROGER, BERNARD H. (1860–). Chain stores. Born in Cincinnati, Ohio. In 1883 he started in the grocery business in Cincinnati, and gradually established stores in other places until there are now nearly 4,000 Kroger stores in various parts of the country. He has donated the grounds and buildings for Kroger Hill Camp, for anemic children.

KRUTTSCHNITT, JULIUS (1854–1925). Railway officer, was born in New Orleans and educated at William and Mary College, Virginia. After teaching a while, he entered the railway service and gradually rose through various positions to those of great responsibility in the Southern Pacific system. He was general manager of the S. P. in 1895–1904, one of the vice-presidents, 1898–1904, assistant to the president, 1904–1911, and eventually became chairman of the Board, besides being interested in other companies and banks.

KURN, JAMES M. (1870–). Railway president. Born at Mt. Clemens, Mich. At 14 he started his railroad career as messenger with the Michigan Central and worked his way up until in 1913 he was general superintendent. He then went to the Detroit, Toledo and Ironton Railroad as president. In March 1920, he was elected president of the St. Louis and Santa Fe.

LANDIS, KENESAW MOUNTAIN (1866–). Born in Ohio, educated at Logansport, Ind., and the Union College of Law, Chicago. Except for two years, when he was private secretary of J. Q. Gresham, U. S. Secretary of State, Mr. Landis practiced in Chicago from 1891 to 1905; and was U. S. Judge for Northern Ills. District, from 1905 to 1922, when he resigned to become Commissioner of the American and National Base Ball Leagues of America. Judge Landis became well known in 1907 by his handling of the Standard Oil rebate cases in Chicago. As arbitrator, in 1921, he fixed the wages of the building trades employees in Chicago.

LASKER, ALBERT DAVIS (1880–). Advertising. Born of American parents in Freiburg, Germany; at an early age was brought to America.

At 15 he was writing dramatic criticisms for a Galveston newspaper; at 18, having graduated from high school, he went to Chicago where he found employment in an advertising agency; within four years he owned the agency; at forty-one he was a multi-millionaire. For two years (1921–23) he was chairman of the United States Shipping Board. In 1926 he became chairman of the board of Lord & Thomas and Logan, one of the largest advertising agencies in the United States.

LASKY, JESSE L. (1880–). Paramount pictures. Born in San Francisco where he graduated from the high school. After graduation he tried a number of different occupations; he was a reporter, a band master, a vaudeville actor; he went to Alaska to find gold. Then in 1914 he organized the Jesse L. Lasky Feature Play Co., of which he was later president. He is also vice-president of the Paramount Famous Lasky Corporation.

LAWRENCE, AMOS (1786–1852). Merchant and manufacturer. Born at Groton, Mass. In 1814, with his brother Abbot Lawrence, he formed the firm of A. & A. Lawrence which became the foremost wholesale mercantile establishment in the country. The firm did much for the cotton textile industry of New England by financially aiding the mills of Lowell and by financing the building of mills at Lawrence. Besides other benefactions, Amos Lawrence made generous gifts to many educational institutions, to Williams, Bowdoin, Wabash, and Kenyon colleges, to Bangor Theological Seminary, and to Groton Academy which was renamed Lawrence, in honor of the family.

LEWIS, JOHN L. (1880–). Labor leader, recently has lived in Illinois. Has been connected with the United Mine Workers of American since 1917, as president since 1919, after serving as legislative agent and vice president, and for a time as legislative agent of the American Federation of Labor. Member of the Unemployment Conference in 1921 and of the advisory committee to the Arms Limitation Conference in 1921–22. Author of *Miners' Fight for American Standards.*

LEVER (*lē'vẽr*), **WILLIAM HESKETH** (1851–1925). English soap king. Born in Bolton, Lancashire, England. At the age of 19, entered his father's grocery store where he worked for a number of years. In 1885, with his brother, he began the making and selling of a soap made from vegetable oils instead of tallow as were the soaps then in general use. To this soap, the Lever Brothers gave the name, "Sunlight Soap"; within three years it became the most used soap in the United Kingdom. The brothers built a large plant on the Mersey River which they called Port Sunlight. It is still the main plant of the company, but a number of smaller plants have been built in different parts of the world. Sunlight Soap, although not so well-known in the United States as either the Levers' Pears Soap or Lifebouy Soap, is however, estimated to be the largest selling soap in the world. The company with its 200 associated companies, its chain stores, and controlling its sources of raw material is claimed to be the largest soap company in the world. In order to secure control of an adequate supply of palm oil, a chief constituent of their soap, the Lever Brothers in 1911, obtained from King Albert of Belgium, an immense concession, about 1,860,000 acres of land in the Belgium Congo, with authority to build roads, canals, railways, and telegraph systems. This concession has been successfully developed, and the firm of Lever Brothers is a dominating influence in West African trade.

LIGGETT, LOUIS KROH (1875–). Chain drug stores and patent medicines. Born in Detroit, Michigan, and educated in the public schools, he began his merchandising career as a traveling salesman for John Wanamaker. Later he went into the business of making and selling headache powders; he soon became interested in the marketing of proprietary medicines. In 1903 he formed the United Drug Company of which he has since been president. It controls 525 Liggett stores in various cities and through subsidiary corporations, controls Castoria, Bayer's Aspirin, the Rexall products, Cascarets, 3 in 1 Oil, and other well-known products.

LINCOLN, ROBERT TODD. See under RULERS AND STATESMEN.

LIPTON, THOMAS J. (1850–1931). Tea merchant and yachtsman. Born in Glasgow, Scotland, of Irish parents. At 15 he emigrated to America where he had a varied experience; he worked in a grocery store, was a street car driver, a traveling agent for a portrait firm, and worked on a plantation in South Carolina. Returning to Glasgow, he opened a sm provision store and in time established similar sto all over the United Kingdom. To supply his re shops, he acquired extensive tea, coffee, and co plantations in Ceylon and established fruit farms, j factories, and bakeries in England. In 1898 he w knighted and in 1912 made a baronet. He was keen yachtsman and several times attempted to captu America's cup.

LITCHFIELD (*lich'fēld*), **PAUL W.** (1875– Tires. Born in Boston and graduated from the Mas chusetts Institute of Technology in 1896; in 1900 became connected with the Goodyear Tire and Rubb Company of Akron, Ohio, in which he filled varic offices until 1926 when he became president; he w also president of the Goodyear-Zeppelin Corporati and other Goodyear subsidiaries; interested in aviati and its development, and in the peaceful solution labor difficulties concerning which he has written interesting booklet on *The Industrial Republic.* D ing Mr. Litchfield's administration, the company came the largest manufacturer of tires in the worl and is now taking the lead in the building of n super-Zeppelins.

LOEB, JAMES (1867–1933). Banker (retired born at New York; graduated from Harvard (1888 in banking business (1888–1901); member Engli Society for Promotion of Hellenic Studies.

LOVETT, ROBERT S. (1860–1932). Railro president. Born in San Jacinto, Texas; attended t high school in Houston; was admitted to the bar 1882. In 1892 he became attorney and general cou sel for all the Southern Pacific lines in Texas, th general counsel for the Harriman System. In 19 he was appointed president of the Union Pacific Ra road and in 1920 became chairman of the board.

LOWELL, FRANCIS CABOT (1775–1817). M chant and manufacturer. Born at Newburypo Mass.; graduated from Harvard in 1793. During t War of 1812, he had cotton looms constructed fr his own models and started some cotton mills, first Waltham, and then on the Merrimac River, at t place afterward named Lowell, in his honor.

MACAULEY, ALVIN (1872–). Packard au mobile. Born in Wheeling, W. Va., son of a Ci War veteran and West Virginia's first Secretary State; he attended Lehigh University and studied la at George Washington University; admitted to the b in 1897. He became patent attorney for the Nation Cash Register; general manager of the Burroug Adding Machine Company; general manager and, sin 1916, president of the Packard Motor Compan makers of fine cars and builders of the famous Liber Motor. The business of this company doubled in t two years (1927–1929).

Began as clerk in office of Northern New Hampshire Railroad; clerk Central Vermont Railroad (1872–1873); employed by Northern New Hampshire Railroad (1873–1880); Boston & Lowell Railroad (1880–1881); Boston & Lowell and Concord railroads (1881–1888); Union Pacific system (1888–1892); second vice-president New York, New Haven & Hartford Railroad (1892–1896); president (1903–1913); president Northern Pacific Railway Company (1896–1903).

MORRISON, FRANK (1859–). Labor leader, born in Canada, received his law degree at Lake Forest Law School in 1894. Previously he followed the trade of a printer. In 1896 he became Secretary of the American Federation of Labor. Recently he served on the executive committee of the Council of Churches, and the Board for Near East Relief.

MUNSEY, FRANK ANDREW (1854–1925). Publisher; born at Mercer, Me. Began in a country store; manager Western Union Telegraph office, Augusta, Me.; established the *Golden Argosy* (now *The Argosy*) in New York (1882); in 1889 he started *Munsey's Weekly*, converted into *Munsey's Magazine* two years later. Munsey also owned the *All-Story Magazine, Scrap Book, Ocean, Railroad Man's Magazine*, Washington *Times*, and New York *Mail and Express*.

MUNSON, FRANK C. (1876–1936). Born in Cuba and educated in Brooklyn, N. Y. Began business as office boy of Munson Line of steamships, rising to be manager of Cuban dept., treasurer, vice-president, and since 1916 president. Director in shipping corporations, Munson Building, Gold Dust, N. Y. Canal and Great Lakes Co., P. R. Mallory, and other companies. Member War Trade Board, Shipping Com. of Nat. Council of Defense, N. Y. Parks and Playgrounds Assoc., and President Brooklyn Y. M. C. A.

NEWMAN, WILLIAM H. (1847–1918). Railway official; born in Prince William County, Va. Began as station agent for the Texas & Pacific (1869–1872); from 1872 to 1883 he was general freight agent; traffic manager for the Southwestern system (1883–1885); traffic manager for the Missouri Pacific (1885–1887); vice-president (1887–1889). Since 1898 he has been president of the Lake Shore, since 1901 of the New York Central, since 1905 of the Michigan Central and of the Big Four.

NIXON, LEWIS (1861–1940). Ship builder. Born at Leesburg, Va.; graduated at the United States Naval Academy and studied at the Royal Naval College, Eng. In 1890 he designed the battleships *Oregon, Indiana*, and *Massachusetts*. Resigning from the Navy, he started the Crescent Shipyard at Elizabeth, N. J. where within 6 years he built 100 ships, 8 of this number being submarines, and one, the cruiser *Chattanooga*. Mr. Nixon was a staunch Democrat and succeeded Richard Croker as leader of Tammany Hall.

OCHS (*ŏks*), **ADOLPH SIMON** (1858–1935). Publisher. Born in Cincinnati, Ohio. At 14 he started his career as printer's devil in a newspaper office, later becoming a compositor. At 20 he gained control of the *Chattanoogo Times* and made it one of the outstanding newspapers of the South. For his energy in promoting the prosperity of Chattanooga he was called the "Founder of Chattanooga." In 1896 Mr. Ochs acquired control of the New York *Times*, which after many years of prosperity was at that time run down. Under his management the *Times* has become one of the most widely read papers in the country with, in 1929, a circulation of 425,000 week day and 750,000 Sunday copies. Taking as the motto of his paper "All the news that's fit to print," Mr. Ochs by maintaining a high standard of work, has been a beneficial influence in the newspaper world. He was a pioneer in introducing rotogravure printing of news pictures and in establishing a book review supplement. By printing on rag paper a special edition of the *Times* for libaries, he has made his paper "A newspaper of record." In 1918 the New York *Times* received the first Pulitzer Gold Medal in Journalism for Meritorious Public Service.

OGDEN, ROBERT CURTIS (1836–1913). Merchant. Born in Philadelphia; began work at 15; four years later, he went to New York where he became connected with the firm of Devlin & Co. His business ability was so evident that he soon became a member of the firm, remaining until 1885 when he returned to Philadelphia to take a responsible position in the Wanamaker store. When it was decided to open a branch in New York, Mr. Ogden was placed in charge of the enterprise. Under his management the New York store took a leading place in the retail trade and like Wanamakers in Philadelphia, became very successful. Mr. Ogden remained identified with it until 1907 when he retired. He was greatly interested in many philanthropic enterprises, especially in the promotion of education among all classes in the South. He coöperated with General Armstrong in the founding of Hampton Institute in Virginia, for the education of the negroes and the Indians, and he was a trustee of Tuskegee Institute.

OLIVER, GEORGE T. (1848–1919). Steel manufacturer and publisher. Born in Dungannon, Ireland, of American parents. He was educated at Bethany College, W. Va.; was admitted to the bar in 1871 and practiced for about ten years. He then withdrew from practice and became connected with the steel industry. Until 1899 he was vice-president and then president of the Oliver Wire Company. In 1901 he disposed of all his manufacturing interests, having the previous year purchased the *Pittsburgh Gazette* and the *Pittsburgh Chronicle-Telegraph*. Six years later he bought the *Times* and merged it with the *Gazette* under the name of the *Gazette-Times*. For eighteen years he directed the papers. In 1909 he was appointed a member of the United States Senate to complete the uncompleted term of Philander Chase Knox, and was later elected for the term 1911–1917.

OXNARD, BENJAMIN A. (1855–1924). Manufacturer; born in New Orleans, La.; graduate of Massachusetts Institute of Technology (1875) and influential in promoting beet sugar manufacture. Until 1889 he was engaged in sugar refining in Brooklyn; since that time he has been producing both cane and beet sugar. Now president of the Adeline Sugar Factory Company, Ltd.

OXNARD, HENRY THOMAS (1860–1922). Manufacturer; born in Marseilles, France; graduated at Harvard in 1882; has promoted the beet sugar industry of the United States. He is president of the American Beet Sugar Association, including all the factories in this country.

PABST, FREDERICK (1836–1904). Brewer; born in Saxony, and emigrated to the United States in 1848; educated himself, and married the daughter of Philip Best. For a time he acted as captain of the steamer *Comet* on the Great Lakes. In 1862 he took up brewing and advanced until he became president of the Pabst Brewing Company, owning one of the finest plants in the world.

PENNEY, JAMES CASH (1875–). Chain stores. Born in Hamilton, Mo.; graduated from the high school. When he was 8 years old, his father told him that he must, thereafter, provide his own clothes; by raising first pigs and then watermelons he not only made enough to clothe himself but also saved a considerable sum. At 18 he became a clerk in a store in Hamilton; three years later, he went to Denver where he finally found employment in a Golden Rule Store as a clerk and proved himself so efficient that he was made manager of a newly established store in Kemmerer, Wyoming. Some years after he bought out the store. Later he opened a store in Idaho and one in Utah putting in charge of each a man who had worked under him and to whom he gave the

privilege of buying a one-third interest in the new store. This was the beginning of the Penney chain stores now found in hundreds of cities in the United States. Mr. Penney is chairman of the board of directors of the J. C. Penney Company.

PHIPPS, HENRY (1839–1931). Manufacturer; born at Philadelphia, Pa. At 13 he was working in a store in Pittsburgh, and about 1856 he was promoted to be bookkeeper for Dilworth & Bidwell, spike manufacturers; partner in Bidwell & Phipps, powder agents, and also in Kloman & Phipps, running a small iron mill. Still later he was associated with the Carnegie Brothers in iron and steel manufacture. In the United States Steel Corporation he held the largest interest next to Andrew Carnegie; director United States Steel Corporation, Mellon National Bank, and Philadelphia Rapid Transit Company. Phipps Institute was added to the University of Pennsylvania as a result of his gift of $1,000,000. He contributed $1,000,000 to New York City to be used in the construction of tenement houses and he built a psychiatrical clinic for Johns Hopkins hospital at Baltimore.

PILLSBURY, CHARLES ALFRED (1842–1899). Flour miller; graduated from Dartmouth in 1863, and went into a Montreal house as a clerk, where he stayed until 1869; removed to Minneapolis, where he was employed as a clerk; later his uncle, John S. Pillsbury, who had come to the Falls of St. Anthony in 1855, took him into partnership in his flour mill; introduced the roller process, and extended the business until in 1872 the firm of Charles A. Pillsbury & Company began building the largest mills in the world. In 1889 the firm sold out to an English syndicate which combined all their purchases into the Pillsbury-Washburn Flour Mills Company, of which he was president; was president also of the Minneapolis and Northern Elevator Company, and was state senator (1877–1887).

PLANT, MORTON P. (1852–1922). Capitalist; railway official. He was educated at Russell College, Connecticut, and began his business career at the age of 16 with the Southern Express Company in Memphis. From 1884 to 1902 he was with the plant system of railroads, of which he was vice-president until 1902, when the system was absorbed by the Atlantic Coast Line Railroad, in which he is director; vice-president and director in the Peninsular and Occidental Steamship Company; chairman of board of directors of Southern Express Company; director in Casualty Company of America, Interborough Rapid Transit, Lincoln Trust Company, Union Gas and Electric, etc.; trustee American Surety Company.

POPE, ALBERT AUGUSTUS (1843–1909). Manufacturer; born in Boston, Mass. Began his business career as a shoe clerk. He served so well in the Union army for three years that he was brevetted lieutenant colonel for gallantry in several battles. After the war he went into shoe findings business (1865–1876); in 1877 started the Pope Manufacturing Company for making and selling small patented articles; and at the same time he began to sell imported bicycles; introduced the bicycle manufacturing industry in the United States (1878); founded *The Wheelman* (now absorbed in *Outing*) in the interests of cycling; leader in good roads movement; had large interests in numerous corporations.

PRATT, CHARLES (1830–1891). Merchant and and philanthropist. Born in Watertown, Mass. In 1851 he went to New York and later amassed a fortune in the oil and petroleum trade. In 1887 he founded Pratt Institute in Brooklyn for instruction in the industrial arts and home economics, also Pratt Institute Free Library and Pratt Institute of Library Science.

PROCTER, WILLIAM C. (1862–1984). Ivory soap. Born at Glendale, Ohio; graduated from Princeton in 1883. Immediately after graduation, he began work with Proctor and Gamble Company, soap manufacturers, and became president of the company in 1907; through original advertising methods he has made "Ivory soap—it floats" known the world over. The company under his initiative has introduced participation in the profits of the business by its employees and also a guaranty of fifty weeks of work a year. He has given large sums to Princeton and to various other educational and philanthropic institutions, including a gift of $2,500,000 to the Children's Hospital of Cincinnati for pediatric research.

PULITZER (*pū'lĭt-sĕr*), **JOSEPH** (1847–1911). Publisher and philanthropist. Born in Hungary; came to the United States in 1864 and enlisted in the Union army for a year. Afterwards he went to St. Louis where he became reporter and later proprietor of the *Westliche Post*. In 1878 he laid the foundation of his fortune by buying the run-down *St. Louis Dispatch* which he merged with the *Post* under the name of the *Post-Dispatch*. Under his management the paper became prosperous, the profits running from $40,000 to $85,000 annually. In 1883, he bought the New York *World* which under his guidance won immediate prosperity, bringing its owner wealth and fame. In 1893, Mr. Pulitzer gave $100,000 to Columbia University and in 1903 a $1,000,000 for a school of journalism with a conditional pledge of a million more. In his will be established a series of prizes, known as the Pulitzer prizes, to be awarded annually for letters, the drama, music, and newspaper work.

PULLMAN, GEO. See LEADING INVENTORS.

REA, SAMUEL (1855–1921). Railroad president. Born at Hollidaysburg, Pa.; at 15 he left school and became connected with the engineering department of the Pennsylvania Railroad; except for a short intermission he continued in the service of this road until his retirement. In 1897 he became assistant to the president and was steadily advanced in rank until in January, 1913, he was elected president; in 1925 he retired on a pension and was succeeded by General Atterbury. Two notable achievements stand to Mr. Rea's credit,—one, the building of the tunnel under the Hudson River and the erection of the magnificent Pennsylvania Railroad Station in New York; and, the other, the building of the New York Connecting Railroad including the Hell Gate Bridge over the East River. For his engineering feats he received honorary degrees from several colleges.

RHONDDA (*rŏnd'da*), **LORD.** See THOMAS, DAVID ALFRED.

RINGLING, JOHN (–1936). Circus owner The only one now living of seven brothers who in the late 70's organized a concert troupe, to which was later added acrobats and a menagerie, and which gradually developed into a circus troupe. In 1907 Mr. Ringling bought control of Barnum and Bailey. In 1929 by buying out the American Circus Corporation he became owner of every circus in the United States of any considerable size. He is interested in art; in his museum at Sarasota, Florida, he has an excellent collection of pictures including works of Gainsborough, Romney, Corot, Tintoretto, Rembrandt, and other classicists.

RIPLEY, EDWARD PAYSON (1845–1920). Railway official; born in Dorchester, Mass. After receiving a high school education he went into railroad work in 1869 as clerk in the Boston office of the Pennsylvania Railroad. By 1872 he had risen to be agent for New England and six years later he was Eastern agent, employed by the Chicago, Burlington & Quincy Railroad (1886–1890); third vice-president Chicago, Milwaukee & St. Paul Railway (1890–1895); president Atchison, Topeka & Santa Fe Railway Company since 1896.

ROCKEFELLER, JOHN DAVISON (1839–1937). An American oil magnate, born at Richford, N. Y. At 16 he left school in Cleveland, Ohio, and was a clerk and bookkeeper at $12.50 a month. Started in the oil business on borrowed capital with Samuel Andrews and by combinations had, in 1872, control of one fifth of the oil-refining business in the United States. Formed the Standard Oil Company in 1870 with a capital of a million dollars: the Standard Oil Trust in 1882; dissolved in 1892. His fortune is estimated at $700,000,000 and he is believed to be the richest man in the world. Among his many benefactions are millions to the church, $85,000,000 to education, science, and charity, including $35,000,000 to the New York Educational Board. Within the corporation he controls there are over 1,500,000 employees. In private life he is moral and blameless. His success is attributed to hard work and economy. Though his income exceeds that of any European monarch, his life is one of marked frugality—even approaching penuriousness.

ROCKEFELLER, JOHN DAVISON, JR. (1877–). Capitalist; born at Cleveland, O.; associated with his father in financial enterprises; member board of managers Delaware, Lackawanna & Western Railroad Company; director Standard Oil Company, United States Steel Corporation, American Linseed Company, trustee University of Chicago.

ROCKEFELLER, WILLIAM (1841–1922). Capitalist; born at Richford, N. Y.; was in produce commission trade, first as bookkeeper, then partner; associated with his brother, John D. Rockefeller, in the

oil business; president of the Standard Oil Company of New York; vice-president and director Standard Oil Company of New Jersey; trustee Anaconda Copper Mining Company, Consolidated Gas Company, United States Trust Company, director in several railroads, banks, etc.

ROEBLING, JOHN AUGUSTUS (1806–1869). A famous civil engineer, born in Prussia and educated in the Royal Polytechnic School in Berlin. Came to America and lived on a farm near Pittsburgh (1831); became engaged in many minor engineering works; appointed to survey the route across the Alleghanies adopted by the Pennsylvania Railroad; began manufacture of wire rope, and built a suspension aqueduct across Allegheny River (1844–1845); constructed suspension bridge at Pittsburgh, and four aqueducts on the Delaware & Hudson Canal (1848–1850); established works at Trenton, N. J., and began suspension bridge over the Niagara River in 1851; began Cincinnati suspension bridge (1867); his last task was the bridge over the East River, connecting Brooklyn and New York.

ROEBLING (*rō'lĭng*), **WASHINGTON AUGUSTUS** (1837–1921). Bridge builder. Born in Saxonburg, Pa., son of John Augustus Roebling; was a graduate of the Rensselaer Polytechnic Institute; served in the Union army during the Civil War, rising from a private to a brevet colonel. He aided his father in the building of the suspension bridge across the Allegheny River at Pittsburgh and of the suspension bridge between Cincinnati and Covington. The father had the contract and plans for the building of Brooklyn Bridge but died in 1869 before the actual work was begun; he left the entire construction in the hands of his son who directed it to completion. Mr. W. A. Roebling was for many years president and director of John A. Roebling Sons Co., manufacturers of iron and steel wire and wire rope.

ROSENWALD (*rō'zĕn-wäld*), **JULIUS** (1862–1932), since 1910 president and in 1925 chairman of the board of Sears, Roebuck and Company of Chicago. He has led in many philanthropies, including houses for negroes and the poor, for which he has given large sums.

SARNOFF, DAVID (1891–). Manufacturer and president of Radio Corporation. Born in Minsk, Russia, he was brought to the United States in 1900; he delivered meat, sold newspapers, and did various odd jobs while attending the public schools. In 1906, when his father died, he began as a messenger boy with the Commercial Cables Company at $5.00 a week; with money he saved he bought a telegraph instrument and soon entered the employ of the Marconi Wireless Telegraph Company; later he served as wireless operator on several steamships; was wireless operator at John Wanamaker's, 1910–11. Returning to the Marconi Company, he became by successive steps radio inspector, assistant chief engineer, contract manager, assistant traffic manager and commercial manager. When the Marconi Company was absorbed by the Radio Corporation of America in 1917, he retained his position. In 1922 he was made vice-president and general manager of the Radio Corporation.

SCHWAB, CHARLES M. (1862–1939). Capitalist; born at Williamsburg, Pa.; removed to Loretto, Pa.; drove stage from Loretto to Cresson; entered engineering corps of Edgar Thomson Steel Works; became superintendent Homestead Works; president Carnegie Steel Company, Ltd.; president United States Steel Corporation (1901–1903); president and chairman board Bethlehem Steel Corporation; is also director in important financial enterprises.

SCOTT, THOMAS ALEXANDER (1824–1881). Railway official; born at London, Pa. Employed in 1851 by the Pennsylvania Railroad, he advanced steadily until in 1859 he became vice-president. During the Civil War he was temporarily in the service of the government as assistant secretary of war, rendering invaluable assistance to the Union cause by reorganizing the whole system of transportation. Later returned to the railroad business; was president of various roads; president of Pennsylvania Railroad (1874–1880).

SCRIBNER, CHARLES (1821–1871). Publisher; born in New York City; graduated from Princeton in 1840. After a European trip he started in the publishing business in New York City as partner in Baker & Scribner. The works of many famous authors were published—N. P. Willis, J. T. Headley, Donald G. Mitchell, J. G. Holland, Noah Porter, Horace Bushnell, James McCosh, etc. In 1857 he started the importing house of Scribner & Welford, which published also many educational books. In 1870 *Scribner's Monthly* was established with Dr. J. G. Holland as editor.

SCRIPPS, EDWARD WYLLIS (1854–1926). Publisher. Born at Rushville, Ill. Having obtained some journalistic experience, Mr. Scripps founded the *Cleveland Penny Press* which under his management achieved immediate success. He gradually gained possession of other newspapers in Ohio and elsewhere which later became known as the Scripps-Howard group. In conjunction with Milton A. McRae, he formed the Scripps-McRae Press Association which some twelve years later was merged with another organization under the United Press Association, Mr. Scripps holding a controlling interest. Two years before his death, Mr. Scripps founded and endowed Science Service, a news bureau for the dissemination of scientific news. The Scripps papers form one of the two largest groups of chain newspapers in the country.

SEARS, RICHARD W. (1863–1914). Founder of Sears, Roebuck & Co. Born at Stewartsville, Minnesota; attended grammar school and high school. At 17 he began as a station agent at North Redwood, Minn. In 1886 he started a mail order watch and jewelry business in Minneapolis; three years later he took in Mr. C. A. Roebuck as his partner. Shortly after, the concern moved to Chicago; then in 1890, when he was 27 years of age, Mr. Sears sold the business for $100,000 on condition that he would not within five years establish another mail order business in Chicago under his own name. Mr. Sears returned to Minneapolis and in 1893 formed another company styled A. C. Roebuck & Co.; this soon was changed to Sears, Roebuck & Co. Its first catalog was issued in 1893. The next year other lines of merchandise besides watches and jewelry were added and a large catalog was issued, marked with the retail price of $1.00 a copy. Agents were sent out to sell the catalog from house to house. That same year Mr. Roebuck retired; in 1895 Mr. Sears moved to Chicago, when Mr. Roebuck's interest was purchased by Julius Rosenwald who became vice-president of the corporation then formed. This organization continued until 1906, when, assisted by his friends, Mr. Rosenwald bought out Mr. Sears' interest and Mr. Sears retired from the business, although he was retained on the board of directors and the old name, Sears, Roebuck & Company was kept. Since 1906 the business has had a remarkable growth. The company is now not only the greatest mail order house but one of the greatest retail mercantile institutions in the world.

SELFRIDGE, HARRY GORDON (1864–). English merchant. Born in Ripon, Wis.; began his career in the dry-goods business with a brother of Marshall Field in Jackson, Miss.; moved to Chicago and worked up with the Marshall Field Company until he became a partner and the manager of the retail store; retired in 1904 and established a business of his own in Chicago. In 1906 he went to London and organized the firm of Selfridge and Co., Ltd., wholesale and retail merchants, which opened in 1909. The firm has developed into one of the most successful business enterprises of its kind in the world. Mr. Selfridge wrote a book entitled the *Romance of Commerce* which depicts the development of commerce from earliest times to the present day.

SHAUGHNESSY (*shô'nĕ-sĭ*), **SIR THOMAS G.** (1853–1923). Born in Milwaukee. Went to railroading (1869); taken to Montreal by Sir W. C. Van Horne, when assuming management of Canadian Pacific; became purchasing manager, general assistant manager and vice-president; director in important companies; great worker, phenomenal memory; knighted (1901).

SHAW, HENRY (1800–1889). An English lad opening a store in St. Louis (1820); became wealthy and did great work in botanical gardening on a 276 acre park, having 20,000 trees, library, and museum buildings, etc. He duplicated the famous gardens of Chatsworth House, England, leaving as his monument Lower Grove Park, where he is buried.

SHONTS, THEODORE PERRY (1856–1919). Capitalist; born in Crawford County, Pa. At 20 he graduated from Monmouth College, Illinois, and went immediately into banking at Centerville, Iowa. Later he took up law, and was a member of Drake, Baker & Shonts, practising four years. In 1882 he engaged in railroad construction, built two short lines, and later finished the Indiana, Illinois & Iowa, of which he was chief owner. In 1905–1907 he was chairman Isthmian Canal Commission, resigning to become president of the Interborough-Metropolitan Company of New York.

He is president of the Toledo & Western Railroad, director in the Iowa Central Railroad, American Trust and Savings Bank, and Western Cold Storage Company.

SHOUP, PAUL (1874–). Railway president. Born in California, with a high school education, at 18 he was a ticket and freight agent of the Southern Pacific R. R.; later he became telegraph operator; at 31, assistant general freight agent. In 1912 he was made president of the Pacific Railway Company; in 1925 executive vice president of the Southern Pacific and in 1929, president.

SIEGEL, HENRY (1852–1915). Merchant; born at Eubigheim, Germany; came to the United States (1867); moved to Chicago (1876); established cloak manufacturing firm of Siegel, Hartsfeld & Company, later Siegel Brothers; established department store of Siegel, Cooper & Co.; established Siegel, Cooper Company, in New York (1896); purchased store of Simpson-Crawford Company (1902); manager of six large department stores.

SINGER, IRA MERRITT (1811–1875). Sewing machine manufacturer. Born in Connecticut. When a Yankee peddler, he saw one of Howe's first machines, imitated and improved it, and, in 1851 in a small shop in Boston made the first practical sewing machine. In 1853 he formed a partnership with Edward Clark under the name of I. M. Singer & Co., and opened a factory and office in New York. Ten years later the company was merged into a corporation, the Singer Manufacturing Company.

SLATER, SAMUEL (1768–1835). Often called the "father of American manufacturers," was born in Derbyshire, England. For more than six years he worked under the partner of Arkwright and acquired a thorough knowledge of cotton spinning. In 1789 he emigrated to the United States with the intention of establishing a cotton mill there. British law did not allow him to bring drawings of cotton machinery; he left England secretly lest attempts should be made to prevent him carrying his knowledge and skill to a foreign country. In 1790 he went to Pawtucket, R. I. where he built from memory spinning machinery modeled on the Arkwright system. In 1806, with his brother, Slater constructed extensive cotton mills at what is now Slatersville, R. I. In 1810 there were 100 mills in the United States all constructed after Slater models. In 1812 Slater erected mills at Oxford, Massachusetts, and in 1815–16, he built several woolen mills. In 1799 he established in his mills one of the first Sunday Schools in the United States.

SMITH, LYMAN CORNELIUS (1850–1910). Smith typewriters. Born at Torrington, Conn. After some experience in lumbering and manufacturing, he began the manufacture of typewriters; in 1890 he organized the Smith Premier Typewriter Co. which was afterwards sold out to the Union Typewriter Co., of which he was for a time chairman of the board. He resigned in 1903 and with his brothers, organized the L. C. Smith & Bros. Typewriter Co. He had large financial interests in many other corporations. In 1900 he gave Syracuse University the Lyman Cornelius Smith College of Applied Science.

SOLVAY (*sŏl'vā*), **ERNEST** (1838–1922). Chemical manufacturer and philanthropist. Born in Belgium, the son of a salt refiner of small means, at his death he was reputed to be the richest man in Belgium, and was frequently styled the "Carnegie of Belgium." His prominence and wealth came principally from his originating the Solvay process for the manufacture of soda. The first patent was taken out in 1861. In the beginning the invention was threatened with commercial failure; it was the inventor's great perseverance and energy which finally made it a success. In 1863 soda cost $55 a ton; due to the Solvay process, in 1913 it was but $20 a ton. The method was adopted in Europe and in America, especially at Solvay, N. Y. During the war he took a foremost part in war relief work in Belgium; in recognition of his services he received honors from France as well as from his own country. He left $100,000 to the Universities of Paris and an equal amount to the University of Nancy; he also gave $1,000,000 for educational and philanthropic work in Belgium and to the employees of his firm, the Solvay Society of Brussels.

SPRECKELS, CLAUS (1828–1909). Sugar refiner; born at Lamstedt, Hanover; came to the United States (1846); went to San Francisco (1856), where he conducted a store and later a brewery; established Bay Sugar Refinery (1863); bought sugar properties in Hawaii; invented new refining processes; established a factory at Watsonville, California, and had a beet sugar farm of 1500 acres there; was owner in Oceanic Steamship Company.

SPRECKELS, JOHN DIEDRICH (1853–1921). Merchant; born at Charleston, S. C.; in 1880 founded J. D. Spreckels & Brothers Company, $2,000,000 capital, shipping and commission merchants, owning large fleet of tugs and vessels trading with Hawaii; president of Western Sugar Refining Company, Oceanic Steamship Company, Beaver Hill Coal Company, and other financial enterprises.

STEWART, ALEXANDER TURNEY (1803–1876). Merchant; born at Lisburn, Ireland; came to America in 1823. He had taught school here for two years when a small legacy received enabled him to start in dry goods business. In 1848 he built a store at Broadway and Chambers streets, New York City; 14 years later he built the store at Broadway, Ninth, and Tenth streets for his retail business, keeping the old store for wholesale trade. The new store cost him $2,750,000. At the time of his death the business had branches and agencies in the chief cities of Europe and several mills and factories in the United States.

STINNES (*stĭn'ĕs*), **HUGO** (1870–1924), German financial baron, from a business in which only a few thousands were invested a generation ago, by the end of the World War, secured control of much of the industrial life of Rhenish-Westphalia and had arteries of commerce extending into various parts of the world. After the War he and his companions made much from the continual fall of the value of German money.

STRADIVARI (*strä-dē-vä'rē*), **ANTONIO.** See DICTIONARY OF FINE ARTS.

STRATHCONA (*strath-kō'na*), **DONALD.** See DICTIONARY OF HISTORY.

STRAUS, ISIDOR (1845–1912). Merchant; born in Rhenish Bavaria; in 1854 came to United States; sent abroad (1863), by Georgia Export and Import Company, to assist agents who were to purchase steamers and supplies for shipment to the Confederate States; in 1866 he and his father formed the firm of L. Straus & Sons, importers of pottery and glassware; in 1888 became partner with brother, Nathan, in R. H. Macy & Company; member of firm of Abraham & Straus, Brooklyn (1892); first president New York Crockery Board of Trade; represented New York City on New York and New Jersey Bridge Commission; president Educational Alliance; vice-president J. Hood Wright Memorial Hospital; member Chamber of Commerce; director of numerous financial enterprises; connected with various tariff reforms; as member 53d Congress advised the formation of the Wilson tariff; on board of trustees of many charitable and philanthropic institutions; with his wife perished in *Titanic* disaster.

STONE, CHARLES AUGUSTUS (1867–). Construction engineer. Born in Newton, Mass. In 1888, he received the S. B. degree from the Massachusetts Institute of Technology. The next year with his classmate, Edwin S. Webster, he organized the firm of Stone and Webster to do a general engineering business. The firm has constructed central plants which now supply light and power to one-sixth of all United States citizens; has aided in the revival of the Pacific Mail Steamship service, and has conducted extensive building operations in South America and elsewhere.

SWIFT, GUSTAVUS F. (1841–1903). Packer. Born on Cape Cod, Mass. At 16, with $25 given him by his father, he bought a heifer; he slaughtered it, packed the meat on a cart and sold it from door to door. The business thus begun, expanded until at 35, he was owner of a market in Clinton, Mass. and partner in two other well established meat firms. In 1875 he went to Chicago, where for a while he shipped cattle to his own firms in the East, but he soon conceived the idea of slaughtering the animals in Chicago and shipping the dressed meat. He began to make experimental refrigerator car shipments and after some failures, the project was successful. By hard work, elimination of waste, and an increased utilization of every part of the animal, Mr. Swift built up an immense business in Chicago, with smaller plants in Omaha, Kansas City, and St. Paul. By 1903, the year of his death, his company had become one of the two largest packing concerns in the United States. Because of his part in making the shipment of western dressed meat to the East a commercial success throughout the year, Mr. Swift is regarded as a real pioneer of the modern packing industry.

SWIFT, LOUIS (1861–1937). Packer. Born in Sagamore, Cape Cod, Mass. After the death of his father, Gustavus F. Swift, in 1903 he became president of Swift & Co. Under his administration the business has continued to expand. In his address to the stockholders in January 1930, Mr. Swift reported that during the preceding year, the company's total sales of meat, butter, eggs, cheese, poultry, and all by-products was more than a billion dollars, that there are now 39 local packing plants in the United States and Canada, 17 fertilizer plants, 7 cotton seed oil mills, and 13 shortening plants.

TAYLOR, FREDERICK W. (1856–1915). Production expert. Born at Germantown, Pa., and educated at Phillips Exeter Academy and abroad. He became an apprentice in a small Philadelphia machine shop and studied at evening schools. When a gang boss with the Midvale Steel Company, he began investigation in the field of management, and studies in what constitutes a day's work; thus he elaborated what is now known as scientific management. He also found a new method of tempering steel so as to allow metal cutting at a high speed. Much of his life was devoted to spreading the doctrine of scientific production which, by increasing production, would result in increased profits and higher wages in American industry.

TEAGLE (*tē'gl*), **WALTER CLARK** (1878–). President of the Standard Oil Co. of N. J. Born in Cleveland, Ohio; graduated from Cornell University in 1900; began his career in the oil business by driving a tank car for the firm in which his father was a partner. At 23 he became vice-president of the Republic Oil Co., and two years later entered the export department of the Standard Oil Company. In 1910 he was elected director, and in 1917 president of the Standard Oil Company of N. J., the largest of all the United States oil companies.

THOMAS, DAVID ALFRED, VISCOUNT RHONDDA (1856–1918). Welsh coal king. Born in Monmouthshire, Wales; graduated from Caius College, Cambridge, in 1880, and three years later received his master's degree. Having made a thorough study of the coal business, he entered his father's firm, Thomas and Davey, coal sales agents, and the same year entered Parliament for Cardiff. In 1910 he became the senior member of the firm; he became not only the largest coal operator in Great Britain, but the largest exporter of coal, controlling 20 depots in various parts of the world; in his collieries more than 50,000 men were employed and the output was more than one-fourth the production of South Wales. He was known as the "Welsh Coal King." In the World War, Mr. Thomas served his government in various capacities until 1917 when he was made Food Controller, and in this position rendered invaluable service. In 1916 he was elevated to the peerage as Lord Rhondda.

THOMAS, SETH (1785–1859). Clock maker. Born in Walcott, Conn.; he had few educational advantages, being at an early age apprenticed to a carpenter and joiner in New Haven. Later with two partners, he began the manufacture of clocks at what is now Thomaston, Conn. Finally he became the proprietor of an establishment which grew to be one of the largest and most famous clock factories in the world.

THORNTON, HENRY (1871–1933). Railroad president. Born in Indiana, he was graduated from the University of Pennsylvania in 1894. Immediately after graduation he began as a draftsman in one of the offices of the Pennsylvania Railroad; later became superintendent of several roads. In 1914 he was appointed manager of the Great Eastern Railroad, England; was a member of the executive commission of general managers which controlled and worked the English railways during the war; in 1918 was appointed inspector general of transportation with rank of major general. In 1919, he became a naturalized British subject. Has been president of the Canadian Railways since 1922. In 1930 he received the Guggenheim award given annually to the most famous alumnus of the University of Pennsylvania.

THYSSEN, AUGUST (1842–1926). German industrialist. Born in Eschweiler, Germany. With his brother, he founded at Duisburg, a firm for the manufacture of hoop iron. This became very prosperous during the Franco-Prussian War. After the war he established a factory at Mulheim and began the policy of grouping interdependent industries. He formed a metal "vertical trust" which had interests in the iron fields of Lorraine, in other raw materials for his products, and in shipping and electrical work. The power of this trust was strengthened by the World War, and Thyssen became an industrial autocrat. He conducted the business personally until within four years of his death.

TIFFANY, CHARLES LOUIS (1812–1902). Merchant. Born at Killingly, Conn. When a young man, he removed to New York where within ten years he developed a successful jewelry business. In 1848 when the price of diamonds had fallen 50%, he purchased as many as he could get. As a result he made an immense profit and became established as one of the principal diamond merchants of the world. He made a specialty of importing historic gems, jewelry, and art works. He established branches in London and Paris, and in Switzerland owned a watch factory. The sterling silver standard .925 fine adopted by him in 1851, has become the recognized standard throughout the world.

VAIL (*vāl*), **THEODORE N.** (1845–1920). Telephone. Born in Carroll County, Ohio; his parents moved to New Jersey where he was educated at Morristown Academy. In 1868 he went west as a telegraph operator of the Union Pacific in Wyoming; at 31 he had become general superintendent of the Railway Mail Service. That same year Bell invented the telephone and Mr. Vail became much interested in its great possibilities. Against the advice of his friends, he resigned his position in the mail service to head the first American Bell Telephone Company. He became especially interested in long distance telephony and established many intercity lines. In 1883 he resigned as head of the original company to take charge of the newly formed American Telephone and Telegraph Company which at first made a specialty of long distance, but later was the nucleus of a great telephone combine. In 1893, having severed his connection with the telephone business, he went to Buenos Aires where, with the aid of British capital, he purchased the existing street car lines, built a power house, electrified the lines, brought cars from the United States, and gave the city a modern traction service. Mr. Vail returned to the United States in 1904; three years later, he again became head of the American Telephone and Telegraph Co., a position he retained until his death. Because of his giant physical stature and the magnitude of his achievement, Mr. Vail was known as "the biggest man in the telephone world."

VANDERBILT, WILLIAM HENRY (1821–1885). Capitalist and financier; born at New Brunswick, N. J., son of Cornelius Vanderbilt and father of Cornelius II. Began as bank clerk in New York. As receiver for the Staten Island Railroad he cleared it from debt in two years and became its president. After that his father made him partner and manager in all his railroad and financial transactions, vice-president of the New York & Harlem, and of the New York & Hudson River Railroad. At his father's death in 1877 he became president, extended the system, and acquired the "Nickel Plate" and the West Shore Railroad.

VANDERBILT, WILLIAM KISSAM (1849–1920). Capitalist; born on Staten Island, son of William H. Began in the office of the treasurer of the Hudson River Railroad; second vice-president New York Central & Hudson River Railroad (1877–1883); chairman board directors Lake Shore & Michigan Southern Railway from 1883; president New York & Harlem Railroad, and president or director in numerous other corporations.

VAN HORNE, SIR WILLIAM CORNELIUS (1843–1915). Born near Joilet, Mich., of old patroon family. Began life as telegraph operator; rose to division superintendent of Chicago & Alton Railway (1867); general superintendent St. Louis, Kansas City & Northern Railway (1872); general manager Southern Minnesota Railway (1874); general manager Canadian Pacific Railway (1880) then projected. He established the 9,000 miles of road and outlined the steamship extension to China and Japan, becoming president (1888–1889). Created K.C.M.G. (honorary) (1894). Example of American and Canadian product.

VAUCLAIN, SAMUEL MATTHEW (1866–1940). President Baldwin Locomotive Works. Born in Philadelphia. As a mere lad, he became apprentice in a shop of the Pennsylvania Railroad at Altoona. He was with the Baldwin Locomotive Works for many years beginning as foreman. Since 1919 he has been president. He was the driving force for many years in various official capacities in making this company the largest manufacturers of locomotives in the world; received awards at the Paris Exposition in 1900; Buffalo Exposition, 1901; St. Louis Exposition, 1904; Seattle Exposition, 1908.

WANAMAKER, JOHN (1838–1922). Merchant; born at Philadelphia, Pa. At 14 he was errand boy

in a bookstore; a retail clothing salesman (1856–1861). In the latter year he united with Nathan Brown to start a clothing store in Philadelphia, which was enlarged to a department store in 1876. Twenty years later he succeeded to the business of A. T. Stewart with a New York department store, and his two stores were the largest in the United States. He declined nomination for 48th Congress, also candidacy for mayor of Philadelphia (1886); was presidential elector (1888); member National Republican Executive Committee (1889–1893); United States postmaster general (1889–1893). He was interested in religious work, and has done much to promote it.

WARD, AARON MONTGOMERY (1843–1913). Merchant. Born in Chatham, New Jersey; attended school until 11; was then employed at various odd jobs. Later when his family moved to St. Joseph, Mich., he entered a general merchandise store there, at a salary of $5 a month and board; within five years he had been placed in charge of the store with a salary of $100 a month and board. In 1865, Mr. Ward went to Chicago and was there employed in various capacities by several dry goods firms. In 1872 he began in the mail order business in a small way with a capital of $2,000, part of which was borrowed. At first, a one-page handbill, giving various items of goods and their prices, was sent out several times a year. In 1874 the first catalogue was issued, a small pamphlet of but eight pages. By 1876 the catalogue had increased in size to 150 pages and for the first time pictures of the merchandise were shown. That year the sales amounted to $300,000 and each succeeding year they rapidly increased. Soon after starting his business Mr. Ward took his brother-in-law, George R. Thorne, into partnership; these two men and their families carried on the business as a partnership until 1888 and then as a corporation until Mr. Ward's death in 1913; that year the value of the sales amounted to $40,000,000. Mr. Ward has often been called the "Father of the Mail Order Business."

WEDGEWOOD, JOSIAH (1730–1795). English manufacturer of pottery. Born in Staffordshire. When less than ten years of age, he was taken from school and set to learning the elements of pottery making. After acquiring a thorough knowledge of all details of the business, in 1762 he began manufacturing for himself. He devoted much attention to improving the Staffordshire ware then made; within a few years he succeeded in making the best pottery the world had seen. Having built up a flourishing business he opened the splendid works near Hanley which he named "Etruria." There he began making artistic pottery and produced some of the most beautiful examples of pottery ever made. He employed artists of ability to make his designs, the most famous of them being John Flaxman. Wedgewood has been pronounced "the most successful and original potter the world has ever seen."

WELCH, CHARLES EDGAR (1852–1926). Manufacturer. Born in Westfield, N. Y.; educated in the common schools. For twenty years he practised dentistry in Philadelphia, and was one of the organizers of the Welch Dental Company there. A staunch prohibitionist, in 1869 he began the manufacture of grape juice as a substitute for intoxicating beverages, and this product brought him national fame. In 1916 he ran for governor of New York on the prohibition ticket; he was mayor of Westfield for six terms; he was long a member of the Board of Foreign Missions of the Methodist Episcopal Church and was four times a delegate to its general conference.

WESTINGHOUSE, GEORGE (1846–1914). Inventor and manufacturer; born at Central Bridge, N. Y.; removed to Schenectady (1856). His inventiveness showed itself early, when he was a boy in his father's machine shop and invented a rotary engine. He served through the Civil War in the Union cavalry and as assistant engineer in the navy, and then went to college for a year. A very long list of valuable inventions stands to his credit, mostly railway, steam engine, and electrical improvements; but his greatest service to the public has been the invention of the Westinghouse air-brake and automatic railway signals. He has been at the head of many great engineering feats, especially the building of the huge electrical generators at Niagara Falls, and has received recognition by several foreign decorations. Thirty corporations of which he was president are capitalized at $120,000,000 and employ 50,000 persons. Elected trustee Equitable Life Assurance Society of United States (1905).

WHITNEY, HARRY PAYNE (1872–). Capitalist; born in New York; graduated Yale (1894); married Gertrude, daughter of the late Cornelius Vanderbilt; director Guaranty Trust Company, Guggenheim Exploration Company, National Bank of Commerce, Newport Trust Company, Plaza Bank, Raquette Lake Railway Company, member New York Zoölogical Society.

WILLARD, DANIEL (1861–). Railway president. Born in North Hartland, Vt.; received a high school education, and studied one year at the Massachusetts Agricultural College. In 1879 he entered railway service, and served several roads in many capacities, steadily advancing in rank, until in 1910 he became president of the Baltimore and Ohio, then in a run-down condition. In a magazine article published in 1929, Mr. Edward Filene ranked Mr. Willard among the ten greatest business men of America, and paid this tribute to him: "Mr. Willard has demonstrated his business leadership on every front. Under discouraging conditions, he has transformed the Baltimore and Ohio into a most progressive system, known throughout the country not merely for its excellent schedules, but for fine service of every kind. I doubt that even Mr. Willard could have done this, however, except for his far-sighted coöperation with the rank and file of his employees organized and trained in the school of trade unionism."

WILLYS, JOHN NORTH (1873–1935). Automobile manufacturer. Born in Canandaigua, New York; received a common school education; began in the bicycle business; later became interested in automobiles and started in a small way with $200 capital. In 1907 he bought the plant of the Overland Automobile Company and in 1909 that of the Pope Company in Toledo, combining both into the Willys-Overland Company of Toledo which turns out the Willys-Knight and Whippet cars. In July, 1929, he resigned the presidency of the company, and sold his shares for, it is said, $20,000,000; in 1930 he was appointed ambassador to Poland.

WOODRUFF, ROBERT W. (1889–). President Coca Cola Co. and White Motor Co. Born in Columbus, Ga. Educated at Georgia Military Academy and Emory University. Began as mechanic in a foundry; later became salesman; at 24 he went to the White Motor Co., where he remained ten years, working up to the position of vice-president. He left to become president of the Coca Cola Company. In 1929 was made president of the White Motors and is now president of both corporations.

WOOLWORTH, FRANK WINFIELD (1852–1919). Merchant. Born near Rodman, N. Y. In 1879 he opened in Utica, N. Y., the first "five cent store" but it did not succeed. The next year he opened a "five and ten cent store" at Lancaster, Pa. This was a success and was followed by the establishment of a similar store in Harrisburg, then in other cities. In 1911 the F. W. Woolworth Co. was incorporated and Mr. Woolworth became president. In 1928 there were 1724 stores, located in every state in the Union, in Canada, and in Cuba; the F. W. Woolworth Co. Ltd. of England started in 1910, had 330 stores, and the F. W. Woolworth Co. in Germany started in 1927, had 27 stores. In 1912 the famous Woolworth Building was erected in New York; up to that time the tallest building in the world, with the exception of the Eiffel Tower.

WRIGLEY, WILLIAM, JR. (1861–1932). Chewing gum king. Born in Philadelphia, Pa.; received a common school education. He at first worked for his father, then in 1891 removed to Chicago and began business for himself. Later his company absorbed several other concerns, and was incorporated under the name of the William Wrigley Jr. Company of which he is president. He originated the Spearmint chewing gum—the sign of the arrow, and became the largest manufacturer of chewing gum in the world.

ZUKOR, ADOLPH (1873–). Motion picture producer. Born in Reise, Hungary; came to New York at the age of 15 and attended public school there. After working at various occupations, he became connected with the theater in 1904, and later turned his attention to the motion picture business in which he was a pioneer producer. It was his idea to bring famous names to the screen in famous plays. The success of his exhibition of Sarah Bernhardt in Queen Elizabeth in 1912 indicated the merit of the idea. Mr. Zukor was founder of the Famous Players Film Co., and is now president of the Paramount Famous-Lasky Corporation. His influence has been felt throughout the entire motion picture industry.

EDUCATORS AND SCHOLARS

ABBOTT, EDWIN (1838–1926). A celebrated English Shakespearean scholar and theologian; assistant master in King Edward's School in Birmingham; head master of the City of London School, which he made one of the best day schools in London (1865–1880); his works include the well-known *Shakespearean Grammar*.

ABELARD (*ăb'ĕ-lärd*), **PIERRE** (1079–1142). The boldest thinker of the twelfth century; was born in France. He wandered about, seeking masters and opponents, and by this method of controversy did more than any one else to increase the love of study and intellectual pursuit in Paris. Everything he did then caused adverse criticism, but his example as an independent teacher led to the founding of schools and universities.

ACTON, JOHN EMERICH EDWARD DALBERG (1834–1902). Born in Naples of an English Roman Catholic family; the greater part of his education was obtained at Munich under the celebrated Dr. Döllinger, whose Old Catholic ideas he imbibed; he traveled widely and became master of the chief modern languages; when 25 he settled in England where he succeeded the famous Newman as editor of the Roman Catholic monthly, the *Rambler*, later merged in the *Home and Foreign Review*. Acton's independence of thought and liberality of criticism brought him into conflict with the Roman Catholic heirarchy, and rather than be disloyal either to his own honest opinions or to his church he discontinued the *Review*. In 1870 he zealously opposed the dogma of papal infallibility, but did not, however, join the seceding Old Catholic party. He became recognized as the leader of the Liberal Roman Catholics in England and acquired both at home and abroad a reputation for profound learning. In 1895 he was appointed Regius Professor of Modern History at Cambridge. His inaugural address on *The Study of History*, afterwards published, made a great impression, and is today his most widely known work. The great *Cambridge Modern History*, although he did not live to see it, was planned under his editorship. He was one of the most deeply learned men of his time, and while he himself wrote little, he exercised a far-reaching influence on others.

ADAMS, CHARLES FRANCIS (1835–1915). Educator, financier and historian; born in Boston, Mass., son of Charles Francis Adams (q. v.); educated at the Boston Latin School and at Harvard; served in the Civil War (1861–65) and was mustered out with the rank of brevet brigadier-general. His family letters during this period were published in 1920 under the title *A Cycle of Adams Letters 1861–65*. After the war, Mr. Adams became interested in railroad problems and wrote a number of articles exposing the criminal acts of those who were exploiting the railroads for their own personal gains. These articles attracted great attention; published in a volume entitled *Chapters of Erie and Other Essays*, they have held their place in the literature on railroads. In 1869 Mr. Adams was appointed one of the three members of the newly established Massachusetts Board of Railroad Commissioners; he proved himself most proficient and gained the confidence of both operators and the public. In 1878 he became chairman of the government directors of the Union Pacific Railroad and, in 1884, was made president of that road, but was ousted six years later by Jay Gould and his following. During his administration, from a road on the verge of bankruptcy, the Union Pacific was raised to a solvent and efficient system. Mr. Adams lived for many years in Quincy, Mass., the home of his paternal ancestors. There he took active part in the affairs of the town; he was almost wholly responsible for he introduction into the schools of the famous *Quincy System*, which practically revolutionized the methods of teaching reading and writing. Mr. Adams' book, *The New Departure in the Common Schools of Quincy*, did much to disseminate knowledge of the new methods which were widely studied and imitated throughout the whole country. Outside of the large business enterprises in which he was engaged and his interest in public welfare, Mr. Adams devoted the greater part of his later years to historical study and writing. He was for 24 years a member of the Board of Overseers of Harvard College; his ideas on college education were set forth in *A College Fetich* (1883), a protest against the compulsory study of dead languages; and in *Some Modern College Tendencies* in which he pointed out the complete separation of teacher and student and the lack of personal influence of instructors. Mr. Adams was also the author of many historical essays.

ADAMS, CHARLES KENDALL (1835–1902). Born in Derby, Vt. and attended the district school there. In 1857 with but a very poor preparation, he entered the University of Michigan. There he found an inspiring teacher and helpful friend in Andrew D. White, and by virtue of hard work was able to graduate successfully in the class of 1861. From 1863 to 1867 he was assistant professor of history at the University of Michigan; then, after a year and a half spent in study abroad, he was made full professor. He established an historical seminar which proved of great value in stimulating the study of history and political science. In 1885 Mr. Adams was called to Cornell University to succeed Andrew D. White as president; he occupied this position until 1892 when on the recommendation of Mr. White, he was chosen president of the University of Wisconsin, where his greatest work was done. He built up a strong faculty and was successful in obtaining liberal grants of money for the erection of new buildings. His educational outlook was broad and his leadership inspiring. A favorite saying of his was: "A university is chiefly an inspiration and an opportunity." On account of failing health Mr. Adams was obliged to resign his presidency in 1901.

ADAMS, HENRY CARTER (1852–1921). Born in Iowa; graduated at Iowa College; was lecturer at Cornell, University of Michigan, and Johns Hopkins, and from 1887, professor of political economy and finance at the University of Michigan; was statistican of the Interstate Commerce Commission, and president of the Economic Association.

ADLER, CYRUS (1863–1940). College president. Born in Van Buren, Ark.; at 19 graduated from the University of Pennsylvania; received the Ph. D. degree from Johns Hopkins in 1887, and for about 11 years taught Semitic languages at that institution; later he was connected with the Smithsonian Institution. In 1908 he became president of Dropsie College for Hebrew and Cognate Learning at Philadelphia; was acting president of the Jewish Theological Seminary of America, 1919–24, and in 1924 was made president. Author of many treatises on Semitic philology, Assyriology, Oriental archaeology, and comparative religion; also of the books, *International Catalogue of Scientific Literature*, *The Shofar*, and *Jews in the Diplomatic Correspondence of the United States*.

ADLER, FELIX (1851–1933). German-American educator and reformer; professor of Hebrew at Cornell University (1874), and in 1876 founded Society of Ethical Culture. His principal literary works are *Creed and Deed* and *The Education of Children*.

AGRICOLA (*ă-grĭk'ō-lă*), **RUDOLPH** (1443–1485). A distinguished Dutch humanist; educated at the Universities of Louvain and Paris, and studied in Italy. After 1482 he was very influential in promoting the popularity of Greek and Roman literature. He was a forerunner of Erasmus. His most important work is *De Inventione Dialectica*.

ALBERTUS (*ăl-bĕr'tŭs*), **MAGNUS, COUNT OF BOLLSTADT** (1193–1280). A Dominican friar; was a celebrated teacher of science, theology, and philosophy. He received a bishopric, but retired to a convent in Cologne to devote himself to literary pursuits. He wrote a number of works, principally on *Aristotle*, the best *Summa Theologiae* and *Summa de Creaturis*.

ALCOTT, AMOS BRONSON (1799–1888). An American lecturer. In 1828 he became an educational reformer, establishing a school in Boston which attracted much attention by the novelty of the methods used. His teaching was largely by the conversational method, but he met with so much opposition that he gave up the school and removed to Concord, where he promulgated his views on education, society, civics, and theology, through lectures in Boston and vicinity. He tried to found a community in Harvard, Mass. He published *Concord Days*, *Table Talk*, *Sonnets and Canzonets* and an *Essay on R. W. Emerson*.

ALCUIN (*ăl'kwĭn*) or **FLACCUS ALBINUS** (735–804). The most distinguished scholar of the eighth century, was an Englishman. Charlemagne made his

acquaintance, invited him to his court, himself became his pupil, and established the Palatine School at his court, committing its supervision to Alcuin. Alcuin retired to the abbey of St. Martin in Tours, in 796, teaching clerics and the laity alike, for the love of it. He left many copies of the new books of that time, besides numerous theological writings, works of his own. He was the educational light of the age of Charlemagne.

ALDERMAN, EDWIN ANDERSON (1861–1931). President of the University of Virginia; born in Wilmington, N. C.; superintendent of Goldsboro, N. C., schools; professor of English in the State Normal College; professor of pedagogy in, and later president of, the University of North Carolina; president of Tulane University; author of several historical books.

ALLEN, WILLIAM (1784–1868). An American author; born in Pittsfield, Mass. He prepared the *American Biographical and Historical Dictionary*, the first work of general biography written in the United States. The first edition contained but 700 names; the third, published in 1857, contained over 7,000. He was president of Dartmouth College (1817–1820), and of Bowdoin (1820–1850).

ALZOG (*älʹtsōk*), **JOHANN BAPTIST** (1808–1878). Born at Ohlau in Silesia; studied at Breslau and Bonn; ordained a priest of the Roman Catholic Church in 1834. In 1853 he became professor of church history at the University of Freiburg, a position he held until his death. His fame rests chiefly on his *Handbuch der Universal-Kirchengeschichte*, reprinted under various titles and translated into several languages. There is an English translation entitled *A Manual of Church History*. This work is accepted as the best exposition of Catholic views in opposition to the Protestant manual by Karl August von Hase.

AMES, JOSEPH SWEETMAN (1861–). College president. Born at Manchester, Vt.; received the degree of A. B. from Johns Hopkins University, 1886, and Ph. D., 1890; successively assistant, instructor, professor of physics and head of the department; director of the laboratory of physics 1901–1926; was made provost of the University in 1926, and elected president in 1929,—thus beginning as a student, and finally becoming head of his Alma Mater. Author of numerous works on physics, including *Theory of Physics, The Constitution of Matter, General Physics* and others. Served on various commissions during the World War; member of the Royal Institute, American Physical Society, Franklin Institute, and other societies.

ANDREWS, ELISHA BENJAMIN (1844–1919). A native of Hinsdale, N. H. He was successively pastor of a Baptist Church; president of Denison University; professor of homiletics in Newton, of history and political economy at Brown University and later at Cornell; was president of Brown University (1889–1898); was superintendent of the Chicago schools for two years. After that he was chancellor of Nebraska University until he resigned in 1908. He published several books, among them *Institutes of Constitutional History, An Honest Dollar, Wealth and Moral Law*, and *History of the United States in Our Own Time*.

ANGELL (*ānʹjĕl*), **JAMES BURRILL** (1829–1916). Born in Scituate, R. I.; professor of modern languages at Brown; editor of the Providence *Journal* for several years; president of the University of Vermont (1866–1871); president of Michigan University (1871–1910); twice had leave of absence to accept important diplomatic missions, first to China to procure a revision of treaties between that country and the United States, second to Turkey on a similar mission. He was appointed to help arrange a treaty with Great Britain upon the fisheries questions. Regent of Smithsonian Institution (1887–1912). He wrote *Progress in International Law* and *The Higher Education*.

ANGELL, JAMES ROLAND (1869–). College president. Was graduated from the University of Michigan, of which his father was president for many years, in 1890; became assistant professor, professor, senior dean, and dean of all the university faculties at the University of Chicago, from 1894 to 1919. In 1918–1919 he was acting president of the University, then did important work in connection with The National Research Council, and as president of the Carnegie Corporation, until he was elected president of Yale in 1921. Dr. Angell held various earned and honorary degrees and was the author of several important works on psychology.

ANTHON, CHARLES, LL.D. (1797–1867). Classical scholar and teacher; born in New York City. Served as tutor and professor of Greek and Latin for nearly fifty years in Columbia College. He was chiefly remembered by his annotated editions of numerous classical authors, long used here and in England as school and college text-books. He published also a new edition of Lemprière's *Classical Dictionary* and a dictionary of Greek and Roman antiquities.

APGAR, AUSTIN CRAIG (1838–1908). Born at Peapack, N. J., and was graduated at the New Jersey State Normal School, where he taught. Author of *Geographical Handbook, Geographical Drawing Book, Trees of the Northern United States*, and *Birds of the United States*.

AQUAVIVA (*ä-kwa-vīʹva*), **CLAUDIUS** (1543–1615). An Italian, became the head of the order of Jesuits at the age of 38, and was chiefly responsible for its organization. In 1584 he appointed a commission of six Jesuits to frame rules for regulating the studies of the order. The result, after revision and approval by Aquaviva, was *Ratio Atque Institutio Studiorum Societatis Jesu*, a famous pedagogical book.

ARBER, EDWARD (1836–1918). English scholar and educator. Born in London; largely self-educated; clerk in the admiralty from 1854 to 1878; lecturer on English at University College; professor of English at Mason College, Birmingham; received the honorary degree of D. Litt. at Oxford in 1905. He rendered remarkable service to English literature in a series of reprints of the works of many English authors, formerly only accessible in rare or expensive editions. Among others may be mentioned Ascham's *Toxophilus*; Gosson's *School of Abuse; English Garner*, which includes rare old tracts and poems; the *Works* of Captain John Smith of Virginia; and an invaluable bibliography, *A Transcript of the Registers of the Stationers Company from 1553 to 1640*.

ARNOLD, SARAH LOUISE (1859–). Born in Abington, Mass. She taught in several states, and then became successively principal of the training school in Saratoga, N. Y.; supervisor of schools in Minneapolis and Boston; dean of Simmons College after 1902; author of *Waymarks for Teachers, Stepping Stones to Literature, Reading—How to Teach It*, and *The Mother Tongue*.

ARNOLD, THOMAS (1795–1842). The celebrated head master of Rugby; born on the Isle of Wight. His success was due to his endeavor to apply the principles of Christianity to school life. His literary fame rests upon his *History of Rome*.

ASCHAM (*ās'kăm*), **ROGER** (1515–1568). Born in Yorkshire, Eng. Having pursued the study of the classics, especially Greek, with great ardor, he was appointed by the University to read Greek lectures. In 1548 became the tutor of the Princess Elizabeth in languages; was Queen Mary's Latin secretary, and Elizabeth retained him as tutor and secretary until his death. His treatise on classical education, *The Schoolmaster*, was published in 1570.

AVERY, ELROY McKENDREE (1844–). Educator; born in Michigan; principal of high and normal schools; author of a series of text-books on physics which are used in the public schools throughout the country; also author of *History of the United States and Its People* in 12 volumes.

AYDELOTTE, FRANK (1880–). College president. Born at Sullivan, Indiana; A. B. from Indiana University, and A. M. from Harvard; appointed Rhodes scholar from Indiana to Oxford University in 1905, and received the degree of Bachelor of Literature from Oxford in 1908; teacher of English at various institutions, including Indiana University, Massachusetts Institute of Technology, etc.; elected president of Swarthmore College in 1921. Identified with the movement for raising scholarly standards in American colleges, especially at Swarthmore where honor courses of study were introduced; author of *Elizabethan Rogues and Vagabonds; College English; The Oxford Stamp, Oxford of Today*, and various addresses and magazine articles.

AYRES, LEONARD PORTER (1879–). Born in Niantic, Conn.; a graduate of Boston University in 1902, and received his Ph. D. from the same institution in 1910; was connected with the schools in Porto Rico for six years; in 1908 he became director of the departments of education and statistics of the Russell Sage Foundation, a position he held for 12 years, when he went to the Cleveland Trust Company as vice president. During the World War, he was chief

statistician of the A. E. F.; author of many treatises on educational subjects, among them *Medical Inspection of Schools, Laggards in Our Schools, Open Air Schools, The Measurement of Spelling Ability, School Buildings and Equipment, Child Accounting in the Public Schools,* and *Index Number for State School Systems.*

BACON, BENJAMIN WISNER (1860–1932). Born at Litchfield, Conn.; received his preparatory education in Germany and Switzerland; graduated from Yale in 1881, and from the Yale Divinity School in 1884. That same year was ordained in the Congregational ministry, and was pastor of Congregational churches until 1896. In 1897, became professor of New Testament criticism and exegesis at Yale University. Recipient of honorary degrees from American and foreign universities; author of many standard works on Biblical criticism: *The Genesis of Genesis, Triple Tradition of the Exodus, The Story of St. Paul, Commentary on Galatians, The Fourth Gospel in Research and Debate, Is Mark a Roman Gospel?, Jesus and Paul,* and others.

BACON, FRANCIS (BARON VERULAM) (1561–1626). A celebrated English philosopher. He was the first of his time to make the method of induction the object of investigation, and began the reform of existing sciences and the harmonizing of all knowledge. By his *Essays, Advancement of Learning,* and *Novum Organum,* he directed the attention of learned men to the reform of school methods. He exerted a wonderful influence on the scientific thought and teaching of the European scholars who succeeded him. See INDEX for mention in other departments of this book.

BACON, ROGER. See under SCIENTISTS.

BAEDEKER, (*bē'da-kar*), **KARL** (1801–1859). German publisher of guide-books. Born at Essen. He established a printing business in Coblenz, where in 1839 he published a traveler's handbook for Belgium and Holland. This was succeeded by similar books for Germany and Austria, for Switzerland, and other countries until this famous series now includes guide-books for travel in practically every civilized country in the world. They are issued in German, French, and English. After the death of Karl, the business was carried on by his son, and in 1872, was moved to Leipzig.

BAILEY, HENRY TURNER (1865–). An American art teacher, lecturer, and author; born at Scituate, Mass. After being supervisor of drawing in Lowell, was agent of the Massachusetts State Board of Education, in the interest of Industrial Drawing; official representative for the United States to the International Congress of Public Art at Brussels in 1898. He is the author of *First Year in Drawing, The Blackboard in Sunday School, The Great Painters' Gospel,* and editor of *School Arts Book.*

BAILEY, NATHAN or **NATHANIEL** (? –1742). English educator and lexicographer. Was master of a school at Stepney, near London. His fame rests upon his *English Dictionary,* published about 1721; it was far better than any preceding work of the kind and was the basis of Johnson's famous *Dictionary.*

BAKER, GEORGE PIERCE (1866–1935). Received his A. B. from Harvard in 1887 and a doctorate in literature from Allegheny College in 1915. He was an instructor and after 1905 a professor of English and of Dramatic Literature at Harvard; called to Yale in 1925 to organize a department of dramatics in the School of Fine Arts and establish a university theatre. As a director of the "47 Workshop," a course in playwriting at Harvard, Mr. Baker trained some of the prominent younger dramatists of America; he also assisted in various movements looking toward the dignity and professional honor of dramatic composition. In 1921 he wrote *The Pilgrim Spirit* and directed the production of this pageant for the Tercentenary Celebration at Plymouth, Mass. Previously he had made notable contributions to the literature of argument in his book *The Principles of Argumentation,* for college courses in debating, and in his *Development of Shakespeare as a Dramatist* and *Dramatic Technique,* a discussion of fundamentals in play construction.

BALDWIN, JAMES MARK (1861–1934). Psychologist and author; was born in South Carolina, educated at Princeton, and received several honorary degrees, including the first honorary Sc. D. ever given by Oxford University. He was successively professor of philosophy at Lake Forest College, University of Toronto, Princeton, Johns Hopkins, and the National University of Mexico. From 1913 he devoted himself to lecturing and teaching abroad, being a member of many learned societies and receiving several decorations, including the Cross of the Legion of Honor, bestowed in person by the president of France. Besides being editor of the *Psychological Review* for fifteen years, he and assistants compiled the *Dictionary of Philosophy and Psychology,* completed in 1906. Some of his original works are *Handbook of Psychology, Story of the Mind, Darwin and the Humanities, History of Psychology, American Neutrality.*

BALLIET, THOMAS M. (1852–). Educated at Franklin and Marshall College, and at Yale; taught for several years, and then for a year devoted his time to lecturing on educational subjects in the West; was superintendent of schools in Reading, Pa., for two years, and in Springfield, Mass., for seventeen years. He wrote and lectured much with inspiration and wide influence. The manual training movement found him one of its earliest and most ardent supporters. He became dean of the School of Pedagogy in New York University, and associate editor of the *Pedagogical Seminary.*

BALLOU (*ba-loo*), **WILLIAM HOSEA** (1857–1937). Born in Hannibal, N. Y.; studied at Northwestern University and the University of Pennsylvania; specialized in the natural sciences, and was identified with several government surveys in the Far West; owner and editor of *Science News Service;* advocate of Louis Agassiz' theory of the multiple origin of man, and species of animal and plant life; discoverer of many new species of fungi, and recorded many samples of cancer in reptiles and fish. Ballou was also a leader in the Universalist denomination; pastor of the Second Universalist Church in Boston from 1817 to his death. He initiated and edited two periodicals and in *Examination of the Doctrine of a Future Retribution* did much to establish the tenets of his sect, which he freed from the influence of Calvinism. Member of various learned societies.

BANCROFT, GEORGE (1800–1891). Historian and diplomat. Born in Worcester, Mass.; educated at Phillips Exeter Academy, at Harvard College from which he was graduated at the age of 17, and in Germany where he received the Ph. D. degree from the University of Göttingen at the age of 20; one of the first Americans to obtain that degree from a German University. After a year spent in European travel, he returned to America; then followed ten years of teaching and one of preaching without success in either occupation. When about 30, Mr. Bancroft began the great work of his life, the *History of the United States,* published in 10 volumes, the first in 1834 and the last in 1874 when the author was 74; this work records the history of the United States from its colonization through the adoption of the Constitution; as a whole it has been outmoded, but reflects the spirit of the time and earned for its author the title of "Father of American History." In his early life, Mr. Bancroft was a strong Democrat; he served as Secretary of the Navy under Polk for 78 months, and was then appointed by that president minister to the Court of St. James. Later he became a Republican and a strong supporter of Lincoln. In 1867 he was appointed by President Johnson minister to Berlin and served there seven years with great success. Mr. Bancroft lived to be 91; the last years of his life were spent in Washington where he became a sort of an institution, second only to the President. See under AUTHORS.

BANCROFT, HUBERT HOWE (1832–1918). Historian and publisher. Born in Granville, Ohio; educated in the village school and began a preparatory school course. At 16 he entered business life as assistant to a bookseller. At 20 he went to California and six years later founded, in San Francisco, the publishing and mercantile house of H. H. Bancroft & Company. He became interested in the history of the Pacific Coast, collected from all parts books on that subject, and in 1868 installed as his librarian Mr. Herbert T. Oak, who for 19 years directed the great enterprise of Mr. Bancroft's life, the preparation of an exhaustive history of the Pacific Coast. As a foundation for this work, a library of some 60,000 volumes on the subject was assembled; a large force of assistants was hired to take notes; copyists were employed to search the Spanish archives; and reporters were sent out to receive dictation narratives of prominent pioneers. The first volume of the work appeared in 1875, the last, fifteen years later. The entire work is composed of 5 volumes on *Native Races,* 28 volumes of the history proper, followed by 6 volumes of essays. Mr. Bancroft planned the work and wrote some portions, but the greater part is the work of some 10 or

12 writers who worked in the Bancroft library under the direction of Mr. Oak. Mr. Bancroft, however, brought out the volumes all in his own name.

BARIZZA, GASPARINO (1370–1431). An Italian scholar; professor of Latin at Padua, coming from Milan. With Petrarch, he led in the movement for the revival of classical Latin, the recovery of the Latin text, and for the founding of libraries; he developed boarding schools for boys; wrote a manual of rhetoric for use in schools.

BARKER, GEORGE FREDERICK (1835–1910). Born at Charlestown, Mass.; professor of physiological chemistry and toxicology at Yale; professor of physics at the University of Pennsylvania from 1872 to 1900; became professor emeritus; expert in poisons in criminal cases, and in patent suits; wrote a text-book on chemistry.

BARNARD, FREDERICK AUGUSTUS PORTER (1809–1889). College president. Born in Sheffield, Mass.; was a graduate of Yale in the class of 1828. After more than a quarter of a century's teaching experience, mostly in colleges, he became president of the University of Mississippi, and was connected with this institution until the outbreak of the Civil War. In 1864 he was elected president of Columbia University, a position he held until his death. His administration was a progressive one, and he laid the foundation of collegiate instruction for women which finally resulted in Barnard College.

BARNARD, HENRY (1811–1900). Educator. Born in Hartford, Conn.; graduated from Yale at 19, and spent two years traveling in the United States and Europe. Returning from his travels, he was elected to the General Assembly of Connecticut. He became interested in improving the condition of the public schools of the state, which under the district system had fallen to a very low state; he was influential in the establishment of a state board of school commissioners of which he became the most active member. He visited schools in all the counties, and in a report to the legislature described the conditions he found; he started and edited *The Connecticut Common School Journal;* started teachers' institutes to improve the training of teachers, and succeeded in bringing about some improvement in the school laws. After 4 years of most strenuous work, he was legislated out of office. He was soon called to Rhode Island to improve the school system there and in a short time gained the sympathy and support of the people; was a dominant influence in the establishment of the Rhode Island Institute of Instruction; and put into successful operation a plan which Horace Mann declared would give Rhode Island "one of the best systems of public instruction in the world." His achievements brought him recognition throughout the country. Mr. Barnard received many offers from large cities to become superintendent of the schools, and was offered the presidencies of the state universities in Indiana and Michigan, but he declined them all to return to his native state in the dual position of principal of the newly established Normal School at New Britain and superintendent of the state schools. Later, he became the first United States Commissioner of Education. His monumental work is his *American Journal of Education,* consisting of 32 large volumes, a great encyclopedia of educational literature dealing with every aspect of its subject.

BARNES, MARY DOWNING SHELDON (1850–1898). Born in Oswego, N. Y.; educated in the Oswego Normal School of which her father, Edward A. Sheldon, was principal; was one of the first women to attend the University of Michigan, from which she was graduated in 1874. Two years later, she became professor of history at Wellesley College, a position she relinquished after four years, in order to travel and study in Europe. In 1884 she married Earl Barnes, professor of history at the University of Indiana. The seven years after her marriage were spent in study and writing; in 1891 both she and her husband accepted positions at Leland Stanford University, she to teach history and he to teach educational subjects. She was the first woman to be appointed a member of the faculty of Leland Stanford, and her signal success fully justified the innovation.

BARROWS, DAVID PRESCOTT (1878–). College president. Born in Chicago, Ill.; graduated from Pomona College, and received the Ph. D. degree in anthropology from the University of Chicago. From 1903 to 1909 he was general superintendent of education in the Philippine Islands; he then went to the University of California where, after 10 years as professor and dean, he became president, a position he held until 1923. During the World War Mr. Barrows was a member of the Commission for the Relief of Belgium in charge of food supply in Brussels, 1916; was made lieutenant colonel of the United States cavalry in 1918; saw active service in Siberia and the Philippines. Received decorations for services from Belgium, France, Italy, Poland, Japan, and Czecho-Slovakia.

BARTLETT, SAMUEL COLCORD (1817–1898). Born at Salisbury, N. H.; graduated from Dartmouth College and from Andover Theological Seminary; pastor of a number of important churches; aided in the establishment of the Chicago Theological Seminary, and was, for 19 years, professor of Biblical literature at that institution. In 1877, when Mr. Bartlett was 60 years of age, he became president of Dartmouth College, a position he held for 15 years. During his adminstration the college increased in enrollment, the endowed chairs increased from one to six, new buildings were constructed, and, although before the period of great donations by multimillionaires, $700,000 was added to the endowment. Mr. Bartlett was the author of *Life and Death Eternal, From Egypt to Palestine, Sources of History in the Pentateuch, The Veracity of the Hexateuch,* and other works.

BASCOM, JOHN (1827–1911). Born in Genoa, N. Y.; professsor of rhetoric in Williams, and for thirteen years president of Wisconsin University; returned to Williams to accept the chair of political science, remaining till 1901; he was prominent as a lecturer on sociology and economics, but is most widely known as an efficient teacher and scholarly writer on economics, philosophy, and sociology; author of a *Political Economy, Ethics, Evolution and Religion,* etc.

BASEDOW (*bä'zē-dō*), **JOHANN BERNARD** (1723–1790). Born at Hamburg, came under the influence of Rousseau's *Emile,* and proposed a general reform in education in Germany. His *Elementarwerk* appeared in 1774, combining the principles of Rousseau with the methods of Comenius. The *Philanthropinum* was established as a result, and exerted a wide influence.

BASSETT, JOHN SPENCER (1867–1928). Educator, historian. Born at Tarboro, N. C. Graduated from Trinity College (now Duke University) in 1888; Ph. D., Johns Hopkins University, 1894; was professor of history at Trinity College for 12 years; in 1906 was called to Smith College as professor of history, a position he held until his death. He was instrumental in the establishment of the *South Atlantic Quarterly* 1902) and was the first editor. At Smith College, he instituted the *Smith College Studies in History.* In 1919 he was elected president of the American Historical Society. Mr. Bassett was a voluminous writer on historical subjects; a few of his works are *Life of Andrew Jackson, A Short History of the United States, The Middle Group of American Historians, The Lost Fruits of Waterloo,* and *Makers of a New Nation.*

BAWERK, BOHM VON (1851–). Educator and publicist. Born in Brunn, Moravia; educated at the University of Vienna, and studied at Heidelburg, Jena, and Leipzig under Knies, Roscher, and Hildebrand; lectured on economics at the University of Vienna, and became full professor there; was Minister of Finance for several periods. He was an exponent of the Austrian school of value in economic theory, based upon psychological principles; his two chief works, on *The Positive Theory of Value* and *Capital and Interest,* have been translated and published in English.

BEDE (*bēd*), **THE VENERABLE.** See under AUTHORS.

BELL, ALEXANDER MELVILLE (1819–1905). Scotch-American educator, born in Edinburgh; lecturer and instructor at Edinburgh University, the University of London, and Queen's College, Kingston, Canada, successively; famous as the inventor of "visible speech" a system of phonetic notation, very successfully used in the instruction of deaf mutes. He has written *Visible Speech, Principles of Phonetics,* and *World-English.*

BELL, ANDREW (1753–1832). A Scotch educational reformer; born at St. Andrew's. He went to India as a chaplain, but became the principal of an orphan school at Madras founded by the East India Company. The scarcity of properly qualified assistants forced him to use pupils to instruct one another under his direction, thus beginning the "Monitorial System," sometimes called the "Madras System." In 1797 Bell published *An Experiment in Education Made at the Male Asylum of Madras,* which attracted little atten-

tion until 1803, when Joseph Lancaster in an educational treatise recommended Bell's Monitorial System, the forerunner of the public graded schools.

BENTON, GUY POTTER (1865–1927). College president. Born in Kenton, Ohio; graduated from Baker University, and studied in Germany. He was in succession, president of Upper Iowa University, 1899–1902; president of Miami University, 1902–1911; and president of the University of Vermont, 1911–1919. He rendered signal service during the World War in Y. M. C. A. work, and later was chief educational director of the American Army of Occupation. He was awarded the Distinguished Service Medal for his work with the American Army. From 1921 to 1924, Mr. Benton was educational advisor in the Philippines. He died from sleeping sickness contracted there.

BERGSON (*bĕrg'sôn'*), **HENRI.** See under PHILOSOPHERS.

BINET (*bē'nĕ'*), **ALFRED.** See under SCIENTISTS.

BIRGE, EDWARD ASAHEL (1851–). College president, zoölogist. Born at Troy, N. Y. Received A. B. from Williams, 1873; Ph. D. from Harvard, 1878; was professor of zoölogy at the University of Wisconsin for more than 30 years; dean of the College of Letters and Sciences from 1891 to 1918; acting president from 1900 to 1903; and president from 1918 to 1925, when he became president emeritus. Writer on zoölogical subjects; official of Phi Beta Kappa.

BLACKIE, JOHN STUART (1809–1895). Scottish educator. Born in Glasgow, Scotland; educated at the University of Aberdeen, and at German universities. In 1839 he was appointed to the chair of Humanity in Mareschal College. There his interesting and stimulating lectures gained him a favorable reputation, which was heightened by the publication of his translation of *Aeschylus* in 1850. In 1852 he was appointed professor of Greek at the University of Edinburgh, a position he held for 30 years, retiring in 1882. Besides his work in the classics, he was interested in the history and language of the Scottish Highlanders, and was instrumental in founding a Celtic chair at Edinburgh. Among his writings are a translation of Goethe's *Faust; Lays and Legends of Ancient Greece, Homer and the Iliad, The Wise Men of Greece, Horae Hellenicae,* and *The Language and Literature of the Scottish Highlanders.*

BLAIR, JAMES (1655–1743). Founder and first president of William and Mary College. Born in Scotland; educated at the University of Edinburgh where he received the Masters degree in 1673; was ordained in the Church of England, but finding little chance of advancement in his native country, he went to London; there he attracted the attention of the Bishop of London, who sent him as a missionary to Virginia which was at that time included in the diocese of London. In 1689 Blair was appointed by the Bishop of London his commissary or deputy with power to exercise supervision over the clergy, but without right to ordain or confirm. In the first convention of the clergy, which met in 1690, Blair urged them to take the initiative in the establishment of a college in Virginia. The next year the General Assembly approved the project and sent Blair to England to obtain a charter and funds for the college. There he was signally successful in interesting both William and Mary in the plan. The charter was granted in 1693; in this document Blair is named as the first president "during his natural life;" the funds granted for the support of the college made it the richest college in America before the Revolution. Blair was president for 50 years, until his death in 1743; during his administration, were erected the three substantial buildings which for more than 200 years comprised the entire plant of the college.

BLAISDELL, JAMES ARNOLD (1867–). College president. Born at Beloit, Wis.; a graduate of Beloit, 1889; attended the Hartford Theological Seminary, and was ordained as a Congregational minister in 1892. After 11 years of active ministry, he became professor of Biblical literature and Oriental languages at Beloit College; was president of Pomona College from 1910–1927; he then became president of Claremont Colleges.

BLOW, SUSAN E. (1843–1916). The foremost pioneer of the kindergarten training movement in the United States. With Superintendent William T. Harris, in 1873, she made her first experiment, gladly proffering her own services gratuitously to the St. Louis Board of Public Schools. Sixty children were assigned her, quickly dispelling the Froebelian notion that only 12 or 15 could be successfully taught. Miss Blow's success marked a new epoch in the history of elementary education. Her well-known book, *Symbolic Education,* has already become a classic, and her later book, *Letters to a Mother,* is a further welcome addition to kindergarten literature.

BODLEY, THOMAS (1545–1613). English scholar, founder of the Bodleian Library. Born at Exeter, England. Educated at Oxford, where he received his B. D. in 1563; he remained connected with Oxford as fellow and proctor until 1576. Later, he was sent on several diplomatic missions by Queen Elizabeth, to the courts of Denmark, France, and Holland. Preferring the quiet life of a scholar, in 1596 he gave up his public career and retired to Oxford. In 1598 his offer to restore the old library there was accepted by the university. Bodley spent the greater part of his own fortune in this enterprise, and succeeded in obtaining for it gifts of valuable books from others, thus building up what was practically the earliest public library in Europe.

BOGART, ERNEST LUDLOW (1870–). Educator, economist. Born at Yonkers, N. Y.; received A. B. and A. M. from Princeton; Ph. D. at Halle, Germany, 1897. Was professor of economics at Oberlin from 1900 to 1905; at Princeton from 1905 to 1909; in 1909 he went to the University of Illinois as professor of economics, and in 1920 became head of the department; in 1922–23 was financial adviser to the government of Persia. Author of numerous works on economic subjects: *Economic History of the United States, Direct and Indirect Costs of the Great World War, War Costs and Their Financing, Modern Industry,* and others.

BOWMAN, JOHN GABBART (1877–). College president. Born at Davenport, Ia.; a graduate of the State University of Iowa, and a graduate student at Columbia. In 1907 he became secretary of the Carnegie Foundation for the Advancement of Science; from 1911 to 1914 was president of the State University of Iowa; then for six years the director of the American College of Surgeons; in 1921 he became Chancellor of the University of Pittsburgh. He devoted much time to the raising of funds for a "Cathedral of Learning," a building forty stories high in which to house the university and its activities. The building was designed to typify the industrial spirit of Pittsburgh and was built by funds donated by its citizens. During President Bowman's administration, the university had a great numerical growth.

BOYNTON, FRANK DAVID (1843–1930). Superintendent of schools in Ithaca, N. Y.; born in Potsdam; became principal of the Ithaca High School, and director of the Ithaca Conservatory of Music; was chairman of the commission to revise the regents' academic syllabus in 1900 and 1905, and of the commission appointed by the University of the State of New York to arrange courses of study for the secondary schools of the state, and became a member of the state examining board. He wrote *School Civics, Manuel of Civics,* and *Plane and Solid Geometry.*

BRAILLE, LOUIS (1809–1852). French teacher of the blind. Born at Coupvray; became blind at three years of age; at seven went as a foundling to the Institution of the Blind in Paris. There he became a teacher in 1828, and in 1834 perfected his point system of writing for the blind, considered the greatest advance ever made in the education of the blind.

BRIDGMAN (*brij'man*), **LAURA DEWEY** (1829–1889). Born at Hanover, N. H. At two years of age, a severe attack of scarlet fever destroyed her sight, her hearing, impaired her sense of smell, and left her health completely shattered. When her strength returned she learned to walk, and showed herself to be, in spite of her afflictions, an active, intelligent, affectionate child, imitating her mother in all she did, and thus learning to sew and to knit. Dr. Samuel G. Howe (q. v.) heard of the case, and when Laura was eight years old, persuaded her parents to allow her to enter Perkins Institute, which was her home for the rest of her life. Dr. Howe personally undertook her education and the methods he used have been followed in all similar cases. Laura learned to converse fluently in the manual alphabet, to read easily by the use of raised letters, and to write well. She studied arithmetic, geography, history and elementary physiology. She was an expert needle woman, could sew on the sewing machine, and knit fine lace. As she grew older she became a teacher of sewing in the institution; doing perfect work herself, she required the same from her pupils.

BROCKHAUS (*brŏk'hous*), **FRIEDRICH ARNOLD** (1772–1823). German publisher. Born at Dartmund, Germany; studied two years at the University of Leipzig; in 1805, he began business as a publisher, and three years later purchased the copyright of the *Konversations-Lexikon*, which was started in 1796; in 1811, he completed the first edition of this encyclopedia. (The 17th edition was published just about a century later; and a new impression of that edition, in 1920.) Brockhaus's business increased rapidly; in 1818 he moved to Leipzig, where he established a large printing house. His business was continued for more than a hundred years by his sons and grandsons. His grandson Eduard was acknowledged as a leader in the book trade. After the death of Eduard in 1914, the business was carried on by members of the family.

BROOKS, SAMUEL PALMER (1863–). College president. Born at Milledgeville, Ga.; A. B. from Baylor University; A. B. and A. M. from Yale; did graduate work in history at the University of Chicago. Was elected president of Baylor University in 1902. Author of addresses and books on educational topics; especially identified with the peace movement.

BROWN, ELMER ELLSWORTH (1861–1934). Born at Kiantone, N. Y.; taught in high schools and universities; United States Commissioner of Education (1906–1911); chancellor of New York University; member International Congress of Arts and Sciences at St. Louis in 1904 and president National Council of Education; wrote *The Making of our Middle Schools, The Origin of American State Universities*, and a monograph entitled *Secondary Universities*.

BROWNE, WILLIAM HAND (1828–1912). Educator and author. Born in Baltimore, Md. Educated in private school and the University of Maryland; was engaged in the commission business until the outbreak of the Civil War. After the war, he founded the *Southern Review*, and was editor of the *Southern Magazine*, through these periodicals aiding in the revival of the cultural life of the South. In 1879 he became librarian and associate professor at Johns Hopkins University, and in 1891 was appointed professor of English literature. He was the editor of 32 volumes of the *Archives of Maryland;* editor of *Maryland Historical Magazine* for four years, and author of a number of works on Maryland history, *George Calvert and Cecilius Calvert, Barons Baltimore of Baltimore*, and others.

BRYAN, ELMER BURRITT (1865–1934). College president. Born at Van Wert, Ohio; graduated from Indiana University, and studied at Harvard and Clark universities. After a number of years teaching experience, mostly in secondary schools, he was connected with several colleges as professor of education. In 1905 he was chosen president of Franklin College, where he served four years; was president of Colgate University from 1909 to 1921; then, in 1921, became president of Ohio University. Author of works on educational subjects, among them *The Basis of Practical Teaching* and *Fundamental Facts for the Teacher*.

BRYAN, WILLIAM LOWE (1860–). Born near Bloomington, Indiana; instructor in Greek, professor of philosophy, and vice-president at the University of Indiana from 1885 to 1902, after which he became its president.

BUDDEUS, JOHANN FRANZ (1667–1729). Born at Anklam, in Pomerania; eucated in German universities, where he made a special study of languages, theology, and history. In 1693 he became professor of moral philosophy in the University of Halle; in 1705, was appointed professor of theology at Jena. He was held in high esteem, and became widely known as a profound scholar. He wrote a number of works on theology and philosophy.

BUISSON (*bwē-sôn'*), **FERDINAND** (1841–1932). Born in Paris. In 1867 began his lifetime work for peace at the first congress for peace and liberty, held in Italy, and all his life, tirelessly devoted a large part of his time and energy to the peace movement. He was professor of the Sorbonne from 1896 to 1902, and was for many years connected with the Parisian Educational Department. Writer of thousands of articles in furtherance of peace ideas. In 1927, with Ludwig Quiddle of Germany, he was awarded the Nobel Peace prize.

BURGESS, JOHN WILLIAM (1844–1931). Born at Cornersville, Tennessee; was professor of political science and history at Amherst, but, after 1876, became connected with Columbia University as professor of political science and constitutional law; appointed the first Roosevelt professor of American history and institutions at the University of Berlin; published important works on political science and history.

BURRITT, ELIHU (1810–1879). The Learned Blacksmith. Born at New Britain, Conn.; with but little more than a district school education; at 16, he was apprenticed to a blacksmith, but continued his own education, borrowing books wherever possible, and studying while at work at his forge and in spare hours. He mastered Latin, Greek, French, Spanish, Italian, and German, and at the age of 30 could read 50 languages. His remarkable aptitude for languages and his great learning brought him fame; he became a successful public lecturer. He was one of the few men of his time to think internationally, and became an ardent crusader in the cause of international peace and universal brotherhood. In 1846, with some British friends of peace, he formed The League of Christian Brotherhood, which within four years had 40,000 members pledged to work for peace. In 1848, almost singlehanded, he organized the Brussels Peace Congress, the first of a series of similar conferences held in ensuing years at Paris, Frankfort, London, Manchester, and Edinburgh.

BURTON, ERNEST DEWITT (1856–1925). Theologian and university president; taught in the Newton Theological Institution, but for many years was connected with the University of Chicago as professor in the department of New Testament interpretation and literature; director of the university libraries, and in 1923 became president. He was also notable as an editor, chairman of several religious commissions, and author of many books on biblical criticism. Some of his works are *Harmony of the Gospels* (with W. A. Stevens), *Handbook of the Life of Paul, Studies in the Gospel of Mark, Paul's Epistle to the Galatians*.

BURTON, MARION LEROY (1874–1925). College president. Born in Brooklyn, N. Y.; graduated from Carleton College in 1900. After some years spent in teaching, he went to Yale Divinity School where he received the Ph. D. degree in 1907, and was for a year pastor of an important New York church. In 1910 he was called to the presidency of Smith College; after 7 years in that position, he was for 3 years president of the University of Minnesota; then, from 1920 to 1925, president of the University of Michigan. During his term of administration at these institutions, President Burton not only raised the standards of scholarship, but was remarkably successful in securing money for the enlargement of departments, and for the construction of new buildings. He raised $1,000,000 for Smith $11,000,000 for the University of Minnesota, and $14,000,000 for the University of Michigan.

BURY (*bĕr'ĭ*), **JOHN BAGNELL** (1861–1927). English educator and historian. Educated at Trinity College, Dublin, where he became fellow in 1885; although a fine Greek scholar, he devoted himself chiefly to history. After nine years as professor at Dublin, he was elected regius professor of modern history in the University of Cambridge in 1902. He edited Gibbon's *Decline and Fall of the Roman Empire* (1896–1900), the standard text; was author of *History of Greece to the Death of Alexander the Great, History of the Later Roman Empire, 395–800, Life of St. Patrick and His Place in History*, and other works.

BUSS, FRANCES MARY (1827–1894). A pioneer in the movement for the higher education of women in England, but chiefly in promoting secondary education for girls. A small private school, with the aid of the Brewers' and Clothiers' Companies, developed into the North London Collegiate and Camden Schools, the first school for girls in England offering educational facilities corresponding to the English grammar schools for boys, serving as a model for the many secondary schools founded by the Girls' Public Day School Company, the Church Schools Company, and many others.

BUTLER, NATHANIEL (1853–1927). Born at Eastport, Me.; a graduate of Colby University. Was teacher and professor in high schools and colleges; was president of Colby from 1895 to 1901, and became dean of the College of Education, University of Chicago in 1905; largely identified with the University Extension movement.

BUTLER, NICHOLAS MURRAY (1862–). Born in Elizabeth, N. J. In 1885, he became connected with Columbia College, as tutor, dean, and professor of philosophy and education, and finally president; he was president of Barnard College, Teachers College, and of the College of Pharmacy; trustee of the Carnegie Foundation for the Advancement of Teaching, and

president of the University Settlement Society. In 1893 he founded the *Educational Review;* was editor of the *Great Educators* series; president of the N. E. A. in 1895; served on various boards of education, and was active in civil and political reform; founded the New York College for the Training of Teachers (now Teachers College), and was its first president. Author of *The Meaning of Education,* and of a number of monographs on *Education in the United States.*

BUTTERFIELD, KENYON LEECH (1868–1935). Born at Lapeer, Mich.; a graduate of Michigan Agricultural College, and took graduate work at the University of Michigan; was president and professor of political economy and rural sociology at the Rhode Island College of Agriculture and Mechanical Arts, from 1903 to 1906; president and head of the division of rural social science, at the Massachusetts Agricultural College from 1906 to 1924; then became president of Michigan State College. An authority on rural problems; editor of farm journals; member of various commissions for the consideration of agricultural problems; member of many learned societies. Author: *Chapters in Rural Progress, The Country Church and the Rural Problem, The Farmer and the New Day, A Christian Program for the Rural Community.*

CALKINS, NORMAN A. (1822–1895). Born at Gainesville, N. Y.; successively, teacher, principal, and superintendent of schools; conducted teachers' institutes for many years in New York and adjoining states; assistant-superintendent of schools in New York City and instructor in methods and principles of education in the Saturday Normal School; active in the National Education Association; author of *Primary Lessons* and other books for teachers.

CAMP, WALTER (1859–1925). Called the father of modern American football, received his collegiate training at Yale, where he received the A. B. degree in 1880. He played Rugby ball in his preparatory school, and as an undergraduate at Yale had much influence in starting football with Harvard. In 1883 he suggested the rule of five yards in three downs, changed in 1906 to four. During the World War, Mr. Camp was chairman of the athletic department of the Navy Commission on Training Camp Activities. Out of this position developed the exercises later recorded on phonograph disks and called the Daily Dozen. His selection of a national All-American football team yearly for many seasons was a national feature of the sport. Mr. Camp was also active in business and as an author of books of stories and discussion of sports, including *Book of College Sports, American Football, Keeping Fit All the Way, Jack Hall of Yale,* and *Captain Danny.*

CAMPBELL, WILLIAM WALLACE (1862–1938). College president, astronomer. Born on farm in Hancock County, Ohio; B. S., University of Michigan, 1886. In 1891, became professor of astronomy at the University of California; in 1901, appointed director of Lick Observatory; from 1923 to 1930, was president of the University of California. One of the greatest astronomers of his time; was in charge of numerous expeditions to India, Spain, Russia, Western Australia, and other parts of the world; for his contributions to astronomical knowledge received many prizes and decorations. Author: *The Elements of Practical Astronomy, Stellar Motions,* and various articles on astronomical subjects.

CAPEN, SAMUEL PAUL (1878–). Became professor of modern languages at Clark College in 1902; president of Public Education Association in 1908.

CARLIN, JAMES JOSEPH (1872–1925). College president. Born in Peabody, Mass.; educated at Boston College and Woodstock Seminary, specializing in the classics and philosophy; became a member of the Society of Jesus in 1892; was professor of Latin, Greek, and English at Georgetown University for five years; in 1907, was ordained a priest in the Roman Catholic Church; in 1918, was chosen president of Holy Cross College, Worcester, Mass.

CARPENTER, FRANK GEORGE (1855–1924). Writer of *Geographical Readers.* Born at Mansfield, Ohio. After almost ten years experience as a newspaper correspondent, he started out on a journey around the world, having previously arranged with 15 newspapers to publish his weekly travel letters. This was the beginning of travels which extended over 36 years, took Mr. Carpenter to every part of the world, and resulted in hundreds of syndicate articles and many books. *The Carpenter's Readers* are still widely used in the schools throughout this country; they include readers on *Asia, North America, South America, Europe, Australia, Our Colonies, and Other Islands of the Sea,* and *Africa.* Mr. Carpenter later published another series of readers on commerce and industry, entitled *How the World is Fed, How the World is Clothed,* and *How the World is Housed.* In 1921 he formed a new syndicate and began writing a series of *World Travels;* 20 volumes have been published but he died before the work was completed.

CARR, GENE (1881–). Caricaturist. Born in New York. Educated in the public schools, but never made a special study of art. When but 13 years old, he was employed on the New York *Recorder;* later, went to the New York *Herald,* to the *Philadelphia Times,* and in 1903, to the *New York Journal,* and *New York World.* Creator of many series of comic pictures: *All the Comforts of Home, Phyllis, Romeo, Lady Bountiful, The Jones Boys, Flirting Flora,* and a number of others.

CASAUBON (*ka-sô'ban*), **ISAAC** (1559–1614). French classical scholar. Born in Geneva, the son of a French refugee; when Isaac was three years old the family returned to France, but the father who was a Calvinist was continually obliged to flee from fanatical bands of Catholics. Isaac was instructed by his father until he was 19; it was in a cave in the mountains that he received his first Greek lesson. At 19, Isaac went to the Academy of Geneva; in 1581 became professor of Greek there, and held this post for fifteen years. He made himself an accomplished Greek scholar and a master of ancient learning; for three years he was professor at Montpelier, then relinquished that position to devote himself to the editing and annotating of Greek works. From 1604 to 1610 he was sub-librarian of the Royal Library in Paris; his reputation for learning increased and he was considered, next to Scaliger, the most learned man of his time. The great work of his life was his edition of *Athenaeus* with commentaries. In 1610, he went to England where he became naturalized; he was a great favorite of the pedantic King James, who was continually interrupting Casaubon's work to discuss theological subjects with him. Casaubon's diary, the manuscript of which is preserved at Canterbury, was printed in 1850; it is a valuable historical document, the best record existing of the life of a scholar in the sixteenth century.

CASSIODORUS (*kas"i-o-dō'rus*), **MAGNUS AURELIUS** (about 468 to 568). Roman historian and statesman. The most profound and enlightened scholar of an age of barbarism. He may be regarded the father of the monastic *scriptorium* to which we owe the preservation of most of the classic literature; writer of text-books on rhetoric and grammar which had great vogue in the Middle Ages.

CATTELL (*kă-tĕl'*), **J. McKEEN** (1860–). Educator, psychologist. Born in Easton, Pa., where his father was president of Lafayette College; graduated at Lafayette, studied in Germany and received his Ph. D. from the University of Leipzig in 1886. Was professor of psychology first at the University of Pennsylvania, then from 1891 to 1917, at Columbia University. Editor of *The Psychology Review,* of *Science, School and Society, The Scientific Monthly, The American Naturalist, American Men of Science.* Author of many articles on psychology and education. President for a number of years of the American Association for the Advancement of Science.

CAVANAUGH, JOHN WILLIAM (1870–1935). Roman Catholic clergyman; born at Leetonia, Ohio; was superior of Holy Cross Seminary, Indiana, from 1898 to 1905. He was professor of English literature, and after 1905 president at the University of Notre Dame. Member of the Rhodes scholarship committee for Indiana; author of *Priests of the Holy Cross.*

CHAMBERLAIN, ALEXANDER FRANCIS (1865–1914). A Canadian educationist, born in England; educated in Canada; graduated at Toronto University (B. A., 1886; M. A., 1889); at Clark University (Ph. D., 1892), where he became assistant professor of anthropology; member of several learned societies; made special investigations of the Kootenay (B. C.) Indians; editor of *Journal of American Folk-Lore* in 1900; department editor *American Anthropologist;* author of essays, sonnets, short poems, and hymns.

CHAMBERS, ROBERT (1881–). Educator, biologist. Born in Erzerum, Turkey, son of a missionary; educated at Robert College, Constantinople, Queens University, Canada, in 1908 obtained his Ph.

D. from the University of Munich, Germany, and was a research student at Columbia, 1911–12; was assistant professor of histology at the University of Cincinnati for three years, then went to the Cornell Medical School in New York City, where, in 1923, he became professor of microscopic anatomy. Conducted investigations at the government stations at Woods Hole and Mt. Desert Island. In 1925 was the recipient of two medals, the Trail Medal, for researches on the physical nature of protoplasm, and the John Scott Medal by the City of Philadelphia, "for invention of devices for microdissection of living cells."

CHANCELLOR, WILLIAM ESTABROOK (1867–). Born in Dayton, Ohio; lecturer on sociology, history, and economics, at Brooklyn Institute; superintendent of schools in Bloomfield, and Paterson, N. J., and after 1906 in the District of Columbia; lecturer on school administration at Chicago University, and on education and history at the George Washington University; member of several important scientific associations. His principal important scientific works are *Mathematical Series* in 10 volumes, *American History, Graded City Spellers,* and *A Theory of Education.*

CHANNING, EDWARD (1856–1931). Educator, historian. Born in Dorchester, Mass.; received A. B., A. M., and Ph. D. from Harvard University. Became in succession instructor, assistant professor, and, in 1897, full professor of history at Harvard. Author of numerous works on history: *The Narragansett Planters, The Navigation Laws, The United States of America, 1765–1865* (in Cambridge History Series), *History of the United States,* in six volumes, embracing the period from the coming of the Norsemen to the close of the Civil War. Dr. Channing was awarded the Pulitzer Prize of $2,000 for the best book of 1925 upon the history of the United States. This was the sixth volume of his *History,* bearing the title, *The War for Southern Independence.*

CHEEVER, EZEKIEL (1615–1708). Born in London, but came to New England in 1637. He taught in New Haven, Ipswich, and Charlestown, for thirty-two years. In 1670 he went to Boston, and for thirty-eight years served as head master of the Boston Latin School; the most famous of colonial schoolmasters. He wrote the *Accidence,* which was used as a text-book in Latin for over a century, and *Scripture Prophecies Explained.*

CHILD, FRANCIS JAMES (1825–1896). A distinguished American scholar and teacher; born in Boston, Mass.; professor of English at Harvard (1876–1896); wrote *Observations on the Language of Chaucer* and *Of Gower's Confessio Amantis.* His greatest work is the edition of *English and Scottish Ballads* in eight large volumes.

CHILDS, GEORGE WILLIAM (1829–1894). Born in Baltimore, Md. At 13, he entered the United States Navy, and was 15 months at Annapolis. When not quite 15, he went to work for a bookstore; later he was connected with several publishing firms. The great success of his life and the foundation of his fortune was the building up of the *Public Ledger* of Philadelphia. In company with Anthony J. and Francis A. Drexel, Mr. Childs bought this paper in 1864, when it was in an almost bankrupt condition. Under Childs' management, it soon became a prosperous paper with an enormously increased circulation, which, by 1876, had reached 90,000 copies a day, and the paper was known all over the country for its accuracy and decency. Mr. Childs gave the Shakespeare Memorial Fountain, in Stratford-upon-Avon; a memorial window to the poets Herbert and Cowper in Westminster Abbey, and made other gifts to churches and libraries. To the Drexel Institute were left his valuable collections of manuscripts.

CHITTENDEN, RUSSELL HENRY (1856–). Born in New Haven, Conn.; Ph. B., Sheffield Scientific School, 1875; Ph. D., Yale, 1880; studied abroad. For forty years was professor of physiological chemistry at Yale; in 1922, became professor emeritus; was director of the Sheffield Scientific School from 1898 to 1922. During the World War was United States representative on the Inter-Allied Scientific Food Commission at London, Paris, and Rome. A specialist on nutrition; author of many works on that subject,—*Studies in Physiological Chemistry,* 4 vols., *Physiological Economy in Nutrition, The Nutrition of Man,* and many articles in American and foreign journals.

CHRYSOLORAS (*kris-o-lō'ras*), **MANUEL** (? – 1415). A Byzantine Greek scholar, the first important teacher of Greek of the Renaissance; taught in Constantinople, and, at the invitation of the Florentine Republic, in Florence; later, in other cities of Italy; his most important work was a *Greek Grammar,* published in Venice in 1484.

CLARK, JOHN BATES (1847–1938). Economist, Born in Providence, R. I.; educated at Brown University and at Amherst College; his college education was twice interrupted by the illness of his father, and in the intervals he was engaged in selling plows to farmers in Minnesota, which was then decidedly pioneer ground. He was thus in the latter part of his college course a more mature and experienced person than the ordinary college student, and he acquired the reputation of being a student of exceptional brilliance; on the advice of his professors he went to Europe where he continued his studies for nearly three years at German universities; he was thus the first of that group of American students who repaired to Germany in the early seventies, and later lent distinction to economic studies in this country. He was professor at Carleton College, 1877–1881, where Thorstein B. Veblen (q. v.) was one of his students; professor at Amherst College, 1893–1895; professor at Columbia from 1895 to his retirement in 1923. Author: *The Distribution of Wealth, The Control of Trusts, Essentials of Economic Theory,* etc. Professor Clark achieved an international reputation as a writer and thinker on economic theory. In 1927 a volume of essays by seventeen distinguished associates and former students of John Bates Clark, contributed in honor of his eightieth birthday, was published under the sponsorship of the American Economic Association.

CLARKE, CASPAR PURDON, KT. (1846–1911). Director of the Metropolitan Museum of Art, New York (1905–1910); born in London, England; educated in England and France; for a time he was principal of the School of Arts, Calcutta, India, and was a recognized authority on Indian Art; afterwards, he became director of the Art Museum, South Kensington, London, which contains the finest collection in the British Empire.

CLAXTON, PHILANDER PRIESTLEY (1862–). Educator. Born in Tenneesee; graduated from the University of Tennessee, and studied in Germany; after ten years experience as superintendent of schools in several cities, he became professor of pedagogy at the North Carolina State Normal School and Industrial College; later, was connected with the educational department of the University of Tennessee for nine years; from 1911 to 1921, was United States Commissioner of Education; was two years provost of the University of Alabama; and, in 1923, became superintendent of schools at Tulsa, Oklahoma. Editor of several educational journals, and author of many articles on educational subjects.

CLERC, LAURENT (1785–1869). Educator of the deaf. Born near Lyons, France. When but a year old, he became deaf as a result of a fall in the fire. At the age of twelve, he went to the Institute for the Deaf and Dumb in Paris; there he proved himself a brilliant pupil, and at twenty became a teacher. In 1816 he came to the United States at the request of Dr. Gallaudet (q. v.) and the next year the two opened an institution for the deaf in Hartford, Conn., with Gallaudet as principal and Clerc as a teacher. Here for more than forty years Clerc taught; it was largely through his efforts that the school received from Congress in 1819 a grant of land which later sold for $300,000. Clerc married a deaf-mute, but the several children born of the marriage could all hear and speak.

COCHRAN, DAVID HENRY (1828–1909). Born in Springville, N. Y.; president of the New York State Normal College, and of the Brooklyn Collegiate and Polytechnic Institute; when president of the Brooklyn Y. M. C. A., he organized evening schools and a course of scientific lectures.

COFFMAN, LOTUS DELTA (1875–1938). College president. Born in Salem, Ind. A. B., Indiana State University; Ph. D., Columbia University. After considerable experience in public schools as supervisor and superintendent, became professor of education in the University of Illinois; in 1915 was appointed dean of the college of education at the University of Minnesota, and in 1921 became president of that institution. Author of *The Social Composition of the Teaching Population,* and co-author of many books on educational problems.

COLBURN, DANA POND (1823–1859). Horace Mann's attention being attracted to him by his teaching of arithmetic, he was appointed an institute instructor. In 1852, opened a private normal school in

Providence, which became a state institution and of which he was the first principal. He published *Arithmetic and its Applications* and *Common School Arithmetic.*

COLBURN, WARREN (1793–1833). A distinguished American mathematician and educator; born in Massachusetts; his *First Lessons in Intellectual Arithmetic* was immensely popular in America and England and was widely translated. He wrote a *Sequel* to his arithmetic and an *Algebra.*

COLBY, FRANK MOORE (1865–1925). Born at Washington, D. C.; graduated from Columbia in 1888; from 1891 to 1895, he was lecturer on history at Columbia University and instructor in history and economics at Barnard College; from 1895 to 1900 he was professor of economics at New York University. The remainder of his life was devoted to editorial and literary work. He started his career as an editor when, in 1893, to add to his income, he became editor of the history and political science department of Johnson's Encyclopedia; in 1898 he became editor of the International Year Book, later named the New International Year Book; in 1900–03, with Daniel Coit Gilman and Talcott Williams, he edited the New International Encyclopedia; he also edited two supplementary volumes of 1924, besides his annual work on the Year Book. To his ability in planning and organization is largely due the high character of the New International Encyclopedia. Through his editorial work he exercised a beneficial influence on popular education. He was a frequent contributor to the best magazines; some of the articles he collected in several volumes of essays: *Imaginary Obligations, Constrained Attitudes, The Margin of Hesitation.*

COLE, GEORGE WATSON (1850–1939). Born at Warren, Conn.; educated at Phillips Andover Academy; admitted to the bar in 1876 and practiced nine years; graduated from the Library School, Columbia, in 1888; cataloger and librarian at various libraries until appointed librarian of the Henry E. Huntington (q. v.) Library in 1915; became librarian emeritus in 1924; member of various librarian and antiquarian societies. Author of many books on library work and compiler of numerous catalogs and bibliographies. Author: *American Libraries, Their Past, Present, and Future, Compiling a Bibliography, Book-Collectors as Benefactors of Public Libraries, Bibliographical Ghosts,* and other books. Compiler: *Elizabethan Americana, Check-List of English Literature to 1640 in Library of Henry E. Huntington,* etc.

COMENIUS (*kō-mā'nē-ōōs*), (or **KOMENSKY**), **JOHANN AMOS** (1592–1670). Bishop of the Moravian Church; born in *Moravia;* in 1631, published his *Janua Linguarum Reserata* in which he attempts to systematize the entire field of knowledge, so as to bring it in outline within the grasp of each child; organized the schools in Moravia, Sweden, and Holland. He recommended a system of schools like the American system of kindergarten, elementary and secondary schools, and university. His *Orbis Pictus* was a description, in short and easy sentences, of objects illustrated by rude engravings, and was the most popular text-book in Europe. He was the forerunner of Rousseau, Pestalozzi, and Froebel.

COMMONS, JOHN ROGERS (1862–). Economist, authority on labor organizations, was graduated from Oberlin in 1888, taught political economy at Wesleyan University, sociology at Oberlin, at Syracuse, and in 1904 became a professor at the University of Wisconsin. For some time was Director of the American Bureau of Research. Some of his works on labor problems are *Trade Unionism, Labor and Administration, Legal Foundations of Capitalism,* and (with others) *History of Labor in the United States.* Professor Commons served as member of the Wisconsin Minimum Wage Board, President of the American Economics Association, National Consumers League, and National Monetary Association, and as chairman of the Unemployment Insurance Board.

COMPAYRE, JULES GABRIEL (1843–1913). Born in France; professor of philosophy and the history of education in normal schools, and rector of the Academy at Poitiers and at Lyons; member of the higher council of public instruction, and of the commissions appointed to reorganize primary instruction; was inspector-general of public education in 1905; is considered one of the foremost French writers of this century on pedagogic questions. His principal writings are: *Histoire critique des doctrines de l'education en France,* a brilliant and valuable work, *Etudes sur l'enseignment et l'education, Histoire de la pedagogie,* and *Abelard and the Origin of Universities.*

COOK, ALBERT STANBURROUGH (1853–1927). Born in Montville, N. J.; graduated from Rutgers in 1872; pursued graduate work at Gottingen, Leipzig, London, and Jena, obtaining his Ph. D. from Jena in 1882; was professor of English at the University of California from 1882 to 1889; then for 32 years was professor of English language and literature at Yale, becoming professor emeritus in 1921. Professor Cook was the founder of the annual prizes in poetry at Yale, and at the University of California; was the recipient of many honorary degrees and member of many learned societies. Author: *The Art of Poetry, The Bible and English Prose Style, The Artistic Ordering of Life, The Authorized Version of the Bible and Its Influence, First Book on Old English, The Possible Begetter of the Old English Beowulf and Widsith,* etc. From 1898 until his death, Professor Cook was the editor of Yale Studies in English (70 volumes).

COOLEY (*kū'li*), **EDWIN GILBERT** (1857–1923). Born at Strawberry Point, Iowa; was superintendent of schools, principal of a high school, and elected principal of Chicago Normal School, but before taking the position was elected to the superintendency of the Chicago Schools; was president of the National Education Association for 1907–1908.

CRAIGIE (*krāg'i*), **WILLIAM A.** (1867–). Born at Dundee, Scotland; educated at West End Academy, Dundee; studied at St. Andrews University, 1883–1888, receiving his M. A. with honors in classics and philosophy; was assistant and lecturer in Humanity at St. Andrews, 1893; lecturer in Scandinavian languages at Taylor Institution, Oxford, 1905–1916; Rawlinson and Bosworth professor of Anglo-Saxon at Oriel College, Oxford, 1916–1925; in 1925 he became professor of English language at the University of Chicago, giving courses on *A Dictionary of American English,* and *Studies in Middle and Early Modern English.* He was knighted in 1928. In 1897 he became engaged in work on the Oxford English Dictionary, and in 1901, became joint-editor. Author of various articles on Scottish, Gaelic, and Scandinavian subjects appearing in well-known magazines; also, *Scandinavian Folklore, Religion of Ancient Scandinavia, Icelandic Sagas, The Pronunciation of English, The Asloan Manuscript, Easy Readings in Old Icelandic, English Spelling, The Study of American English.*

CRANE, FRANK (1861–1928). Journalist. Born in Urbana, Illinois; educated in public schools and spent one year at Illinois Wesleyan University; for some 25 years he was a successful pastor of Methodist and Congregational churches in various places, but became dissatisfied with his profession and entered newspaper work. His ability in the new field was such that before long he became firmly established as a writer for magazines and newspaper syndicates. He is the author of a number of books but his renown rests chiefly upon the four hundred word essays which were for many years a daily feature of many American newspapers. His shrewd common sense, his humor, and optimism made Crane popular with plain people by whom he was regarded as a sage. While derided by the wits as a facile optimist, his optimism was apparently profitable as he left a fortune of some $200,000. Among his many books are: *The Religion of Tomorrow, God and Democracy, Lame and Lovely, Just Human, Christmas and the Year Round, 400 Four Minute Essays* (10 vols.), *The Crane Classics* (10 vols.)

DABNEY, CHARLES WILLIAM (1855–). President of the University of Cincinnati 1904–1920, but retired from presidency in 1920; professor of chemistry in the University of North Carolina and state chemist; discovered the phosphate deposits and tin ore in North Carolina, and was largely instrumental in establishing an industrial school at Raleigh; was president of the University of Tennessee and assistant secretary of agriculture at Washington during Cleveland's administration; author of *Old College and New, Washington's Interest in Education,* and *Agriculture and Education.*

DANA (*dā'na*), **EDWARD SALISBURY** (1849–1935). Born in New Haven, Conn.; curator of the mineral collection at Yale, and professor of physics; trustee of Peabody Museum and editor of the *American Journal of Science.* His text-books on mineralogy have been deservedly popular and are in use in many schools.

DASENT (*dā'sent*), **GEORGE WEBBE** (1817–1896). Born in St. Vincent, West Indies, where his father was attorney-general of the island; educated

at Westminster School, King's College and Oxford. In 1853 was appointed professor of English literature and modern history at King's College, London; specialized in Scandinavian literature and mythology; published a version of *The Prose or Younger Edda*, and other translations from the Icelandic. Author of *A Grammar of the Icelandic or Old Norse Tongue.*

DAVENPORT, HOMER CALVIN (1867–1912). Cartoonist. Born at Silverton, Ore.; reared on a farm; had almost no educational advantages, and never attended art school. His early life was a varied and adventurous one; he was at times a jockey, a railroad fireman, and a clown in a circus, but always drawing pictures. In 1892, he was employed on the San Francisco Examiner, and three years later was taken to New York by William R. Hearst, and there began to draw cartoons for the New York Journal, which made him famous. He originated the Mark Hanna $ mark suit of clothes, and the great figure of the trusts. His work caused an attempt to pass an anti-cartoon bill in New York in 1897. Author: *Davenport's Cartoons, The Bell of Silverton and Other Short Stories of Oregon, The Dollar and the Man.*

DAVIDSON, GEORGE (1825–1911). Educator and astronomer. Born in Nottingham, England; when he was seven, his family emigrated to America, and settled in Philadelphia, where George attended the public schools and graduated from the high school. When twenty years of age, he became connected with the United States Coast and Geodetic Survey and served for fifty years. From 1845 to 1850, he was engaged in geodetic and astronomical work in the Eastern States and for the remaining forty-five years in the coast survey of California, Oregon, Washington, and Alaska. He was one of the foremost astronomers of his time; he traveled to many parts of the world to make observations, particularly on the transits of Venus. After serving as honorary professor of geology and astronomy at the University of California for three years, in 1895 he became professor of geography at that institution. Mr. Davidson published 261 papers and volumes on astronomy, navigation, geography, and kindred subjects.

DAVIS, WILLIAM MORRIS (1850–1934). Geographer and geologist; born in Philadelphia; for three years assistant at the Argentine National Observatory; was connected with Harvard after 1878 as professor of physical geography and geology; a member of the Carnegie Institution Expedition to Turkestan in 1903, and traveled in South Africa two years later; author of *Physical Geography* and *Elementary Meteorology*, and associate editor of *Science, American Naturalist*, and *The American Journal of Science.*

DAY, JAMES ROSCOE (1845–1923). Born in Maine; was clergyman in Portland, Boston, and New York Methodist churches; chancellor of Syracuse University after 1894; was elected Bishop of the Methodist Episcopal Church in 1904, but resigned.

DEGARMO (*dĕ-gär'mō*), **CHARLES** (1849–1934). Born in Wisconsin; professor of modern languages, professor of psychology in the University of Illinois, and president of Swathmore College. In 1898 he became professor of the science and art of education at Cornell; author of *Essentials of Method, Herbert and Herbartians, Language Lessons*, and *Principles of Secondary Education.*

DEVINE (*dē-vīn'*), **EDWARD THOMAS.** See under PHILOSOPHERS.

DEWEY (*dūū'i*), **MELVIL** (1851–). Born in New York State; while at Amherst College he was acting librarian; planned and directed three national educational societies—the American Library Association, the Metric Bureau, and the Spelling Reform Association; also the Library Bureau for advancing library interests. From 1883 to 1888, he was chief librarian and professor of library economy at Columbia; founder and director of the Albany Library School; has written *Library School Rules* and *Decimal Classification and Relative Index.*

DIESTERWEG (*dēs'tĕr-vāk*), **FREDRICH ADOLF WILHELM** (1790–1866). German educator. Born at Siegen, Prussia; educated at German universities. After 7 years of teaching experience, he became director of the New Teachers' Seminary at Mors where he put into practice the methods of Pestalozzi; later, he was for 15 years director for the Seminary for City Schools in Berlin; there he was a strong supporter of unsectarian religious teaching. He founded two educational magazines and was a voluminous writer on educational subjects and the author of many text books. He ranks among the most noted of modern educators; by his training of teachers, he rendered a signal service to the schools of his country.

DINWIDDIE (*din-wid'i*), **ALBERT BLEDSOE** (1871–). College president. Born at Lexington, Ky.; received his B. A. and Ph. D. from the University of Virginia, and studied in Germany. In 1906 he became a member of the mathematics department at Tulane University; in 1910 he was appointed Dean of the College of Arts and Sciences, a position he held until 1918, when he was made president.

DRAPER, ANDREW SLOAN (1848–1913). Born in New York State; American lawyer and educator; served on the City Board of Education in Albany; member of the Court of Commissioners on Alabama claims in 1885; state superintendent of public instruction in New York, and he accomplished among other reforms, the adoption of a system of uniform examinations; superintendent of the Cleveland, Ohio, schools for two years, and president of the University of Illinois for ten years; elected first commissioner of education for the state of New York (1904–1913); declined the election to the first superintendency of the schools of Greater New York; member of the Board of United States Indian Commissioners (1902–1913); published *The Rescue of Cuba* and many addresses; received medals for work as educational writer and speaker; editor-in-chief of *Self Culture for Young People.*

DUNSTER (*dun'star*), **HENRY** (1612?–1659). First president of Harvard. Born in Lancashire, England; educated at Magdalen College, Cambridge, where he was associated with John Milton and Jeremy Taylor; emigrated to Massachusetts in 1640, and that same year became president of Harvard College which had been founded four years before, but had been presided over by an incompetent "master." Dunster was a man of profound learning, and one of the best Hebrew scholars of his time. Under him Harvard took a high stand, and received an impulse which influenced its whole future history. The requirements for admission and the course of study which he established remained practically unchanged for nearly a century, and formed a model followed by the other colonial colleges. In the time of its greatest need, President Dunster contributed 100 acres of land to the college; he was the chief influence in securing the charter of 1650, under which with a few amendments, the college continues to be governed. In spite of the invaluable service which Dunster rendered, he was forced to resign the presidency because he publicly expressed his doubts of the efficacy of infant baptism.

DURUY, VICTOR (1811–1894). French educator and historian. Born in Paris of lowly parentage. Was for 25 years professor in the College Henry IV (Paris); an admirable teacher, he spent his spare time writing text books and became widely known as an authority in the field of education. In 1863 he was made Minister of Public Instruction by Napoleon III. To him is in large part due the modern system of education in France.

DUTTON, SAMUEL TRAIN (1849–1919). A teacher, principal and superintendent of schools (1874–1900); professor of school administration and superintendent of Horace Mann Schools, Teachers College, N. Y., in 1900; lecturer in pedagogy at Harvard; author of several valuable text-books.

DWIGHT (*dwait*), **TIMOTHY** (1752–1817). Born in Northhampton, Mass.; his father, also Timothy, was graduated from Yale in 1744; his mother was a daughter of Jonathan Edwards, the great theologian and one of the first graduates of Yale. Timothy entered Yale at thirteen and graduated at seventeen, ranking second in his class. In 1795 he became president of Yale; his claim to distinction rests on his record in this position; when he assumed control, there were but 110 students, the curriculum was narrow, and the methods of discipline harsh. President Dwight broadened the curriculum, promoted better relations between faculty and students, abolished the system of fines for minor offenses, and improved the methods of instruction. At his death the enrollment had increased to 313. Dwight was a voluminous writer. The most important of his works is *Travels in New England and New York*, in four volumes; he wrote many hymns and poems; one of his hymns, *I Love Thy Kingdom Lord, the Place of Thine Abode*, is included in most modern collections.

FAIRBANKS, ARTHUR (1864–). Born at Hanover, N. H. A. B., Dartmouth College, 1886; Ph. D., Freiburg University, Germany, 1890; was professor of Greek literature and archaeology at the

University of Iowa for six years; then professor of Greek and Greek archaeology at the University of Michigan. From 1907 to 1925, was director of the Boston Museum of Fine Arts. During Mr. Fairbank's term as director, the beautiful and spacious new building on the Fenway was completed and occupied. Author: *First Philosophers of Greece, A Study of the Greek Paean, The Mythology of Greece and Rome, Greek Gods, and Heroes.*

FALCONER (*fô'k'n-ẽr*), **ROBERT A.** (1867–). College president. Born at Charlottetown, Prince Edward Island; as a boy spent eight years in Trinidad, B. W.; educated at the Universities of Edinburgh, Leipzig, Berlin, and Marburg; Gilchrist scholar, 1885; received degrees from the University of London and Edinburgh University; was lecturer and professor of New Testament Greek in Pine Hill College, Halifax, N. S. from 1892 to 1907; was elected president of the University of Toronto in 1907. Author: *The German Tragedy and its Meaning for Canada, Idealism in National Character,* and *The United States as a Neighbor,* also author of numerous articles on educational and political questions.

FARRAND, LIVINGSTON (1867–1939). Received his A. B. from Princeton in 1888 and honorary degrees from various colleges. Took an M. D. at the Columbia Medical School, New York, and later studied in Cambridge and Berlin. Instructor of psychology 1893–1901 at Columbia, and from 1901 professor of psychology and later of anthropology till 1914. President of the University of Colorado, 1914 to 1919, and then Chairman Central Committee of the Red Cross till October, 1921, when Dr. Farrand became president of Cornell University. An authority on tuberculosis.

FAUNCE, WILLIAM HERBERT PERRY (1859–1930). Born at Worcester, Mass.; was graduated at Brown; instructor of mathematics at Brown; pastor of Baptist churches at Springfield, Mass., and New York City until his election to the presidency of Brown University in 1899; was lecturer at University of Chicago and at Yale.

FAWCETT, (*fô'sĕt*), **HENRY.** See under AUTHORS.

FELLOWS, GEORGE EMORY (1858–). Born at Beaver Dam, Wis.; taught for ten years in high schools; professor of European history at Indiana University and assistant professor of history at Chicago University. From 1902 to 1911 was president of the University of Maine; president of Decatur College of Milikin University (1913–1915). In 1915 went to the University of Utah as head of the department of history and political science. Author of *Outlines of the Sixteenth Century* and *Recent European History.*

FENOLLOSA, ERNEST FRANCISCO (1853–1908). Born at Salem, Mass.; went to Japan as professor of political economy and philosophy in Tokyo University; was imperial fine arts commissioner to the Japanese government in 1886; professor of aesthetics and manager of the Tokyo Arts Academy; became curator of the oriental art department of the Museum of Fine Arts in Boston; professor of English literature in the Imperial Normal School in Tokyo; lectured on the Orient, and was the author of several books, including two volumes of poems and monographs on oriental art.

FERGUSSON (*fûr'gu-son*), **JAMES** (1808–1886). Scottish writer on architecture. Born at Ayr; educated at the high school in Edinburgh. He went to Calcutta as a partner in a mercantile firm and there became interested in Indian architecture. After making a fortune in the indigo trade he retired from business and devoted himself to the study of architecture. His fame rests upon his monumental work, *The History of Architecture in All Countries from the Earliest Times to the Present Day,* which for its comprehensive plan, grasp of the entire subject, and critical analysis, "stands quite alone in architectural literature."

FERRIS, WOODBRIDGE NATHAN (1853–). Born in Spencer, N. Y.; after a number of years experience as educator in business colleges, founded and became president of Ferris Institute, Big Rapids, Michigan; was governor of Michigan 1913–14 and 1915–16, and United States Senator, 1923–29.

FETTER, FRANK ALBERT (1863–). Economist. Born in Peru, Ind.; educated in the public schools, and entered upon a business career; became interested in social studies, and graduated from Indiana University in 1891; pursued graduate studies at Cornell University, the Sorbonne, and Ecole de Droit, Paris, and the University of Halle, Germany; received the Ph. D. degree from Halle in 1894; taught economics at Indiana, Leland Stanford, Cornell, and in 1911 went to Princeton as professor of political economy; was president of the American Economic Association, 1912. Author: *Principles of Economics, Source Book in Economics; Economic Principles,* and various essays and monographs on economic subjects; an authority on economic theory and welfare economics.

FINEGAN, THOMAS EDWARD (1866–1932). Educator. Born in West Fulton, N. Y.; graduated from the State College for Teachers, Albany, N. Y. in 1889; admitted to the New York bar in 1894; was identified with the public schools of New York as teacher and state official for about 35 years; from 1919 to 1923 was state superintendent of public instruction for Pennsylvania; in 1927 became educational director at the Eastman Kodak Company, directing experimental program in developing motion pictures for regular work of classroom in public schools. Author: *Judicial Decisions in Education, Teacher Training Agencies, Free Schools, the Township System.* In 1927 became editor-in-chief of the *Winston Loose Leaf Encyclopedia.*

FINLEY, JOHN HUSTON (1863–1940). Secretary of the State Charities Aid Association in New York; founder and editor of the *State Charities Record* and *Charities Review* of New York; professor of politics, Princeton; president of New York College (1903–1913); Commissioner of Education, New York state (1913–1921). In 1921 became editor of the New York *Times.*

FINLEY, MARTHA (MARTHA FARQUHARSON) (1828–1909). Born in Chillicothe, Ohio; educated in private schools; taught school and engaged in journalistic work; lived in Philadelphia for many years and became widely known as a writer of Sunday School books. The most famous of these are the "Elsie Books" in 26 volumes, written at intervals during forty years, beginning in 1868; *Elsie Dinsmore, Elsie's Holidays, Elsie's Girlhood,* etc. Less known are the Mildred Books: *Mildred Keith, Mildred at Roselands,* and a number of others; others of Miss Finley's books are: *An Old Fashioned Boy,* and *The Thorn in the Nest.*

FINNEY, CHARLES GRANDISON (1792–1875). Educator and clergyman. Born in Warren, Conn.; for a time studied law, then turned to theology; he became an eloquent preacher of the evangelistic type and was instrumental in the founding of many churches. In 1835 he was called to the chair of theology at the recently founded Oberlin College, and from 1851 to 1866 was president; the influence of his powerful personality was felt for many years.

FISHER, HARRISON (1877–1934). Born in Brooklyn, N. Y.; educated in San Francisco, England, and France; illustrator for many books and for short stories for the *Saturday Evening Post, Ladies' Home Journal,* and other periodicals; portrait painter and etcher; connected with the *Cosmopolitan* as designer of covers and illustrator. Author: *The Harrison Fisher Drawing Book.*

FISHER, HARRY CONWAY (BUD FISHER) (1884–). Cartoonist. Born in Illinois; educated at Hyde Park High School in Chicago; began as cartoonist in San Francisco in 1905. In 1907 he made his first cartoon of "Mutt" (there was then no "Jeff") in the strip; this was the beginning of the famous *Mutt and Jeff* series, and the beginning of the daily comic in the newspapers, the author was then with the *San Francisco Chronicle* at a salary of $22 a week; his yearly income twenty years later was said to exceed $200,000; he was then "the highest paid cartoonist in the world." His comic strips were published in more than 200 newspapers in the United States and Canada; they also appeared in England, Ireland, South America, Japan, and Scandanavia. *Mutt and Jeff* was the first comic strip to appear regularly in the London newspapers.

FISHER, IRVING (1867–). Economist. Born in Saugerties, N. Y.; A. B., Yale, 1888; Ph. D., 1891, also studied at Berlin and Paris; began at Yale as tutor in mathematics, then became successively, instructor, assistant professor, and professor of political economy; member of many learned societies; president of the American Economic Association, 1918. Author of many books on social science topics, including also mathematical studies: *The Nature of Capital and Income, The Rate of Interest, Stabilizing the Dollar, The Making of Index Numbers, The Purchasing Power of Money* are perhaps the most important; identified with movements for the prevention of tuberculosis, the spread of principles of hygiene, the stabilization of the value of money and the abolition of price fluctuations.

and the bringing about the world peace; published many articles on prohibition and the Eighteenth Amendment, and a book in their defense, entitled *Prohibition at Its Worst;* achieved an international reputation as an economist and publicist.

FISK (*fisk*), **EVERETT OLIN** (1850–1934). Born in Marlboro, Mass.; graduated from Wesleyan University; after considerable experience in teaching and ten years as agent for the publishing firm of Ginn & Company, in 1885, he founded, and was for many years president of Fisk Teachers' Agencies, one of the oldest and largest concerns of its kind in the country.

FISKE, HARRISON GREY (1861–). Born in Harrison, N. Y.; student at New York University; active in the theater world, as manager, producer, director, playwright, and dramatic critic. In 1890, he married Minnie Maddern Davey who, as Mrs. Fiske, became a famous actress, her husband being her manager. Author and adapter of numerous plays; writer of articles in magazines.

FITCH, JOSHUA G. (1824–1903). An English educator; vice-principal of the British Normal College, then principal; finally inspector of schools, including the training college for teachers. His books, *Lectures on Teaching, Art of Questioning,* and *Art of Securing Attention,* are well known.

FLEXNER, ABRAHAM (1866–). Educator. Born in Louisville, Ky.; graduated from Johns Hopkins University, and did graduate work at Harvard and the University of Berlin. After many years teaching experience, he was, from 1908 to 1925, connected in various capacities with the Carnegie Foundation for Advancement of Teaching; in 1925, became director of the division of studies and medical education of the General Education Board. An authority on educational problems. Author: *The American College, Medical Education in the United States and Canada, Medical Education in Europe, A Modern School, A Modern College,* also many articles in periodicals.

FRANCKE (*fränk'e*), **AUGUST HERMANN** (1663–1727). A distinguished German educator. In 1695 he became pastor of a small town near Halle, where he started a private school in his house, which at his death had grown to be a large educational and charitable institution with 2,165 students, comprising three departments, the Pedagogium, for the children of the wealthy, the Latin School, and the common schools. The teachers were students at the University of Halle. This institution was the first to combine Christian and practical training with normal school work. Francke's ideas were opposed both to extreme rationalism and the classical school. He advocated the use of the vernacular.

FRANK, GLENN (1887–1940). College president. Born in Queen City, Mo.; graduated from Northwestern University in 1912 and for four years after graduation was assistant to the president there; for three years afterward was associated with Edward Filene, the Boston merchant, in research and organization; in 1919 he became associate editor of the *Century Magazine,* and in 1921, editor-in-chief. In 1925 he was elected president of the University of Wisconsin. Author: *An American Looks at His World, The Politics of Industry,* also of many articles in the *Century.*

FREEMAN, EDWARD AUGUSTUS. See under AUTHORS.

FRIDAY, DAVID (1876–). Economist. Born in Coloma, Mich.; graduated from the University of Michigan in 1908, and continued there as instructor and professor of economics until 1916; at New York University 1916–1919, and then returned to the University of Michigan; elected president of Michigan Agricultural College in 1921 and served two years; in 1923 became lecturer on economics, New School for Social Research; authority on problems of taxation and valuation. Author: *Problems in Accounting, Reading in Economics, Profits, Wages, and Prices.*

FROEBEL (*frö'bĕl*), **FRIEDRICH WILHELM AUGUST** (1782–1852). Famous German educationist and originator of the *Kindergarten,* an institution for simultaneously furthering the physical, moral, and intellectual growth of children between the ages of three and seven; a "garden of children" in which young human plants are nurtured. He held that the essence of education was to be found in wisely directed but spontaneous action, and that play was a child's most natural employment. The master-stroke of Froebel's genius was his organization of children's play. In 1826, he published his great work, *The Education of Man,* and seventeen years later, the *Mutter-und-Kose-lieder* (Songs, Games, and Stories for use of Mothers). Froebel holds that education creates nothing in the children, but merely directs the growth of inborn qualities. To him education meant unity of development in perfect accordance with the laws of being.

FRYE, ALEXIS EVERETT (1859–). Educator and author, teacher of methods and practice, Chicago Normal School; superintendent in California and Cuba; organizer of Cuban school system; educational lecturer; author of many school text-books relating to nature study and geography.

FRYER, JOHN (1839–1909). Educator. Born at Hythe, Kent, England; graduated from Highbury College, London. From 1861 to 1867 he taught in various educational institutions in China; from 1867 to 1896 he was head of the department for translation into Chinese of foreign scientific books at the Imperial Government Arsenal at Shanghai; from 1896 until his death, was Agassiz professor of Oriental languages and literature at the University of California. Author: *Educational Directory for China,* and more than 100 books published at Shanghai in the Chinese language.

GALLAUDET (*găl'ô-dĕt'*), **EDWARD MINER** (1837–1917). Born in Hartford, Conn.; taught in his father's institution for deaf-mutes at Hartford before organizing, in 1857, the institution for Deaf, Dumb, and Blind at Washington; founded in 1864, Gallaudet College for the Deaf, which is the only college of its kind in the world. He was professor of moral and political science there, and president of the convention of American Institutions for the Deaf. He wrote *Popular Manual of International Law,* and the *Life of Thomas Hopkins Gallaudet.*

GALLAUDET, THOMAS HOPKINS (1787–1851). American educator of deaf and dumb; born in Philadelphia, Pa., of French Huguenot ancestry. Familiarizing himself with the system of the Abbé Sicard in Paris, and with that of Braidwood and Watson in London, he founded an institution in Hartford, Conn., for the deaf and dumb.

GARFIELD, HARRY AUGUSTUS (1863–). College president. Born at Hiram, Ohio, son of James A. Garfield, the twentieth president of the United States, who had himself been a college president; like his father before him, Harry Augustus graduated from Williams College; he then studied law for a year at the Columbia Law School, then at Oxford University and the Inns of Court, London; was admitted to practice in 1888; practiced law in Cleveland from 1888 to 1903; was professor of politics at Princeton for five years, and was then elected president of Williams College, the first layman to be president of that institution. His immediate predecessor was Dr. Henry Hopkins, the son of the famous Mark Hopkins.

GASTER, MOSES (1856–1939). Jewish scholar. Born at Bucharest, Rumania; educated at Bucharest University. He became lecturer on Rumanian language and literature at Bucharest University in 1881. On account of his championship of the cause of persecuted Jews, he was expelled from Rumania in 1885 and went to England. From 1886 to 1891, he was lecturer at Oxford on Byzantine and Slavonic languages; from 1890 to 1896 he was principal of Montefiore College at Ramsgate. In 1887 he was appointed chief rabbi of the Sephardic communities of England, author of numerous works and scholarly articles.

GAYLEY, CHARLES MILLS (1858–1932). Educator and author. Born in Shanghai, China; graduated from the University of Michigan in 1878; also studied in England and Germany. After nine years teaching experience at the University of Michigan, went in 1889 to the University of California, where he was professor of English for almost 35 years, becoming professor emeritus in 1923. Author: *Classic Myths in English Literature, Plays of Our Forefathers, Beaumont, the Dramatist, Shakespeare and the Founders of American Liberty, The Gayley Anniversary Papers* (dedicatory volume), etc.; contributor to magazines, and member of the editorial board of *The Golden Book.*

GAZA (*gā'zā*), **THEODORUS** (1400?–1475). Born at Thessalonica; when his native city was captured by the Turks, he fled to Italy and was there one of those Greek scholars who were leaders in the revival of learning in the fifteenth century. In 1447 he became professor of Greek in the newly founded University of Ferrara and there acquired such fame as a teacher that students from all parts of Europe flocked to the new school. He was later employed by Pope Alexander in making translations from Aristotle and other Greek

authors. His *Greek Grammar*, first printed in 1495, was for a long time the leading text-book.

GENUNG (*jē-nung'*), **JOHN FRANKLIN** (1850–1919). An American educator; born in Willseyville, N. Y.; was professor of rhetoric in Amherst College; wrote a number of excellent text-books.

GEORGE, HENRY (1839–1897). Social educator. Born in Philadelphia where his father was a Custom House clerk. He left school when less than 14 years of age to work in a store, but after two years, went to sea as a foremast boy; when 17, returned home and became a printer. He drifted to California, and, being impressed by the contrast between the unemployment about him and the amount of land in private hands, he wrote a pamphlet on *Our Land and Land Policy*, which, however, attracted little notice. He then set to work in 1877 to elaborate his ideas more fully, and having set much of the type himself, in 1879, published his book entitled *Progress and Poverty*. This book attracted a great deal of attention, and brought fame and numerous disciples to its author. It has since been translated into many languages. Whatever its merits or fallacies, it is a book to be reckoned with. George's thesis is that progress and poverty are inevitable so long as land and natural resources are held as private property. His remedy is to have the state take all rent and increase in value by taxes, and abolish all other taxes, especially those on improvements. Mr. George made many lecture tours in America, England, and Australia. His other important books are *Protection and Free Trade*, *Social Problems*, and *A Perplexed Philosophy*. He died suddenly of apoplexy in the midst of a campaign for the mayorship of New York City in 1897.

GIBBS, JOSIAH WILLARD (1839–1903). Mathematical physicist. Born at New Haven, Conn.; graduated from Yale University in 1858; also studied in Paris, Berlin, and Heidelberg. He became professor of mathematical physics at Yale in 1871, which position he held until his death in 1903. In 1873 he published two papers, one on *Graphical Methods in the Thermodynamics of Fluids*, and the other on *Method of Geometrical Representation of the Thermodynamic Properties of Substances by means of Surfaces*. His researches are said to have revolutionized chemical science by the introduction of chemical energetics. Gibbs was the most distinguished American mathematical physicist of his day and enjoyed an international reputation.

GILDERSLEEVE (*gĭl'der-slēv*), **BASIL LANNEAU** (1831–1924). Distinguished classical scholar; born at Charleston, S. C.; professor of Greek in the University of Virginia; appointed to the professorship of Greek at Johns Hopkins University; edited the *American Journal of Philology* which was established in 1880. Among his numerous works are: *A Latin Grammar; Persius; Justin Martyr; Pindar; Essays and Studies; Greek Syntax*.

GILMAN, ARTHUR (1837–1909). Born in Alton, Ill.; planned the Harvard Annex School (1876), which became Radcliffe College (1894), of which Gilman became regent; founded the Cambridge school for girls, since known as the "Gilman School" (1886); wrote *Boston Past and Present*, *Shakespeare's Morals*, *History of the American People*, *The Making of the American Nation*, etc.

GILMAN, CHARLOTTE PERKINS (1860–1935). Born in Hartford, Conn., a great-granddaughter of Lyman Beecher; largely self-educated; in 1890 began writing and lecturing on ethics, economics, sociology, and other educational subjects. Author *Women and Economics*, *Concerning Children*, *The Man-Made World*, *His Religion and Hers*, etc. Her writings have had considerable influence in the advancement of women.

GILMAN, DANIEL COIT (1831–1908). Born at Norwich, Conn.; successively librarian, secretary of the Sheffield Scientific School, and professor of physical and political geography; president of the University of California, first president of Johns Hopkins University, continuing from 1875 to 1901, and then president emeritus; president of the Carnegie Institution at Washington; member of the United States Commission on the boundary line between Venezuela and British Guiana; trustee of the Russell Sage Foundation and of Carnegie Institution. He published *Life of James Monroe*, *University Problems*, and *The Launching of a University*. He was editor-in-chief of the New International Encyclopedia.

GINN (*gĭn*), **EDWIN** (1838–1914). Born at Orland, Me. When a young man, entered the publishing business, and was for many years head of the firm of Ginn and Company, the largest publishers of school and college text-books in the United States. The first book was Allen's *Latin Grammar*, published in 1868; then followed the series of mathematical text-books written by Professor Wentworth which had an immense sales, and laid the foundation for Mr. Ginn's success as a publisher. He was a lifelong advocate of world peace and in his will left $1,000,000 for the establishment of the World Peace Foundation.

GIRARD (*jĭ-rärd'*), **JEAN BAPTISTE** (known as **"LE PERE GIRARD"**) (1765–1850). French-Swiss educationalist. Born at Fribourg; educated for the priesthood at Lucerne. In 1804 began his career as a public teacher at first in the elementary school at Fribourg; later in the gymnasium at Lucerne; after 30 years of teaching, he retired in 1834 to devote himself to writing books on education. In Switzerland, Father Girard was called a second Pestalozzi and his books influenced methods of education in other countries. He tried to stimulate the intelligence of his pupils instead of cramming their heads with facts.

GOLLANCZ, ISRAEL (1864–1930). Born at London; educated at the City of London School, at University College, London, and at Christ's College, Cambridge; he was Quain student and lecturer in English at University College, London; in 1896 he became university lecturer in English, and in 1906 was made university professor of English language and literature at King's College, London; he became secretary of the British Academy on its foundation in 1903, and was knighted in 1919. He edited the texts of several English writers; his published works include: *Cynewulf's Christ; Exeter Book of Anglo-Saxon Poetry;* and *Hamlet in Iceland*. See also under AUTHORS.

GOODWIN, WILLIAM WATSON (1831–1913). Well-known American classical scholar; born at Concord, Mass.; Eliot professor emeritus of Greek at Harvard University; first director of the American School of classical studies at Athens; author of various text-books.

GRADY, HENRY WOODFEN (1851–1889). Born in Athens, Ga.; educated at the University of Georgia; entered journalism and published a series of articles on the resources of the state which attracted much attention. In 1880 he became editor of the *Atlanta Constitution*, and contributed many articles to it and also to various magazines. In 1886 he delivered a most remarkable speech before the New England Society in New York, on *The New South* which was widely copied; another address delivered shortly before his death on *The Future of the Negro*, also was much discussed. Mr. Grady did much to improve relations between the North and the South and was one of the first prominent representatives of the South to show that he was ready to forget sectional prejudices and consider himself a citizen of the whole country.

GRANDGENT, CHARLES HALL (1862–). Born in Dorchester, Mass.; educated at Harvard (A. B., 1883). Taught in public schools of Boston; was tutor, instructor, and in 1896 became full professor of Romance languages at Harvard; from 1899 to 1911 was chairman of the Romance department; Harvard Exchange Professor in Paris, 1915–16; president of the Harvard Alumni Association, 1925. Author *Italian Grammar*, *Introduction to Vulgar Latin*, *The Power of Dante*, *Discourses on Dante*, etc.; a leading authority on Dante and his age; writer of many articles on phonetics and educational subjects.

GREGOROVIUS (*grĕg-ô-rō'vĭ-ŭs*), **FERDINAND** (1821–1891). German historian and poet. Born in East Prussia. When a little over 30 years of age, he began his travels in Italy, and wrote in a unique manner a book about them that was widely read; later he traveled in Greece, Egypt, Syria, and Turkey and wrote books describing his journeys in those countries. He was the author of poems, critical works, and many histories; his international fame rests upon his great work, *Geschichte der Stradt Rom in Mittelalter*, which was translated into Latin, and into English under the title *History of Rome in the Middle Ages;* it ranks as one of the greatest histories of the nineteenth century.

GRIGGS, EDWARD HOWARD (1868–). Widely-known lecturer; born in Minnesota. Instructor in English literature and professor of literature at Indiana University; professor of ethics, and of ethics and education at Leland Stanford Junior University. He lectured on ethics and literature to cultured

audiences in the larger cities. His writings include *The New Humanism, A Book of Seventy Meditations,* and *Moral Education.*

GROSVENOR (*grō'vĕ-nēr*), **EDWIN AUGUSTUS** (1845–1936). American historian; born in Newburyport, Mass.; professor of European history at Amherst from 1892–1899; author of various historical works including; *Constantinople, Contemporary History of the World,* also a translation from the French of Duruy's *History of Modern Times,* etc.

GULICK, LUTHER HALSEY (1865–1918). Born in the Hawaiian Islands; secretary of the physical training department of the International Committee of the Y. M. C. A.; one of the faculty of the International Y. M. C. A Training School of Springfield, Mass.; principal of Pratt Institute High School; director of physical training in the public schools of Greater New York until 1908, when he began to serve on the Russell Sage Foundation for playgrounds. His writings are *Physical Measurements,* and *Physical Education by Muscular Exercise,* and *Mind and Work.*

GUYOT (*gē'yô*), **ARNOLD** (1807–1884). Educator, geographer. Born near Neuchâtel, Switzerland; educated at the College of Neuchâtel and the University of Berlin, where he received the Ph. D. degree; for nine years he was a colleague of Agassiz as professor of history and physical geography in the College of Neuchâtel. In 1848 he came to America and settled at Cambridge, Mass. That same year he delivered a series of lectures at the Lowell Institute which were translated into English under the title *Earth and Man,* and attracted wide attention. For six years after, Guyot was a lecturer at normal schools and teachers' institutes in the service of the Massachusetts State Board of Education; then for nearly thirty years was professor of physical geography and geology at Princeton. There he founded the Museum which has since developed into one of the finest in the country. He made an international reputation by his studies of glaciers; he perfected plans for a national system of meteorological observations which developed into the Weather Bureau. He did much to improve the methods of teaching geography through the preparation of a series of text-books and wall maps, for which he obtained a medal of progress from the Vienna Exhibition in 1873.

HADLEY, ARTHUR TWINING (1856–1930). Born in New Haven, Conn.; professor of political science and political economy until 1899, when he became president of Yale; lectured on railroad administration, and commissioner of labor statistics. Published *Railroad Transportation—Its History and its Laws, The Education of the American Citizen, Freedom and Responsibility,* and *Standards of Public Morality.* His writings give him first rank among American economists. President of Yale 1899–1921, when he became president emeritus.

HAILMANN, WILLIAM NICHOLAS (1836–). Born in Switzerland; after teaching several years, was elected superintendent of the public schools of La Porte, Indiana; became national superintendent of Indian schools and later superintendent of schools at Dayton, Ohio. Head of the department of psychology at the Chicago Normal School. His writings include a large number of educational works, among which are *History of Pedagogy, Early Education, Kindergarten Culture, The English Language,* and *The Laurel Primer.*

HALL, GRANVILLE STANLEY (1846–1924). Born in Ashfield, Mass.; professor of psychology at Antioch College; lecturer on psychology at Harvard and at Williams, and professor of psychology at Johns Hopkins, becoming then (1888) president and professor of psychology at Clark University. He made child-study a specialty, and was a well-known lecturer and writer in various publications on that subject. His books include *Aspects of German Culture, Adolescence,* and *Youth—Its Education, Regimen and Hygiene.* He was the founder and editor of *The American Journal of Psychology* and the *Pedagogical Seminary.*

HANUS, PAUL HENRY (1855–). Born in Germany; brought to the United States by his widowed mother when four years of age; graduated from the University of Michigan in 1878; after a number of years' experience in teaching, he became, first associate professor (1891–1901), then full professor of the history and art of teaching at Harvard University; in 1921 he retired as professor emeritus; served on various educational commissions and surveys; author of *Educational Aims and Educational Values, A Modern School, School Efficiency, School Administration and School Reports,* etc.; editor *School Efficiency Series;* contributor to various educational journals. Professor Hanus was one of the principal influences in making education a field for graduate instruction and in raising teaching to the level of a profession.

HARKER, JOSEPH RALPH (1853–). Born in County of Durham, England; at ten years of age began work in the coal mines of Durham; emigrated to Illinois in 1871, and worked as a coal miner for three years, giving his leisure time to study; became a public school teacher in 1874, and taught in various places; became principal of Whipple Academy at Jacksonville, Ill., holding this position until 1893, and pursuing at the same time a college course and graduate studies, receiving from Illinois College his A. B. in 1888, A. M. in 1891, and his Ph. D. in 1893. He was elected president of the Illinois Woman's College, Jacksonville, Ill. in 1893 and served until his retirement as president emeritus in 1925. Was ordained minister in the Methodist Episcopal Church in 1891.

HARPER, WILLIAM RAINEY (1856–1906). An American educator; born at New Concord, Ohio; professor of Hebrew at the Baptist Seminary, Chicago (1879), where he perfected a method of teaching Hebrew by correspondence; professor of Semitic languages and Biblical literature at Yale (1886–1889); president of the University of Chicago (1891–1906); wrote *Elements of Hebrew, Hebrew Vocabularies, Hebrew Method and Manual, Elements of Hebrew Syntax,* and *Prospects of the Small College.*

HARRIS, ABRAM WINEGARDNER (1858–1935). Born in Philadelphia; taught mathematics at Wesleyan and elsewhere; director of the Office of Experiment Stations, United States Department of Agriculture; from 1893 to 1901 president of the University of Maine; president of Northwestern University 1906–16; corresponding secretary Board of Education of the M. E. Church 1916–24; became secretary in 1924.

HARRIS, GEORGE (1844–1922). President of Amherst College (1899–1912); born in Maine; professor of Christian theology in Andover Theological Seminary; one of the editors of the *Andover Review;* author of *Moral Evolution,* and *Inequality and Progress.*

HARRIS, WILLIAM TORREY (1835–1909). One of the most eminent American educators; was United States Commissioner of Education from 1889 to 1906; superintendent of St. Louis public schools (1867–1888); lecturer at the Concord School of Philosophy; represented the U. S. Bureau of Education at the Brussels Educational Congress and the Paris Exposition in 1889; established the *Journal of Speculative Philosophy,* and was regarded as the best exponent in this country of the philosophy of Hegel. He helped edit Appleton's School Readers, edited Appleton's educational series, department of philosophy in Johnson's Cyclopædia, and was editor-in-chief of Webster's International Dictionary. He was the author of *Introduction to the Study of Philosophy, Hegel's Logic,* and *Psychologic Foundations of Education,* besides many other works.

HAZARD (*haz'ard*), **CAROLINE** (1856–). Born in Rhode Island; member of the Massachusetts State Board of Education; president of Wellesley (1899–1910). Author of *Some Ideals in the Education of Women.*

HECKER, JOHANN JULIUS (1707–1768). A German educator. Pupil of Francke. By command of Frederick II. of Prussia he formulated a system for the government of common schools, which is now partly in force, and established the first permanent real-schule.

HEGIUS, ALEXANDER (1420–1495). A German humanist. He was a pupil of Thomas à Kempis, and in his turn instructed Erasmus, Pope Adrian VI., and Conrad Goclenius. He used no mediæval text-books, but made Latin his standard. His works include treatises on pedagogy, psychology, and morals.

HERBART (*her'bart*), **JOHANN FRIEDRICH** (1776–1841). A German philosopher and eminent educationist. Following at first in his teaching the methods of Pestalozzi and Fichte, after more reflection he formed one of his own, now familiarly called the *Herbartian System.* The theory of "Apperception" was fully set forth by him as well as the problem of how to realize the ideas of freedom, perfection, right, equity, and benevolence within the sphere of education. Many training schools have been established on his methods. His writings fully explain his position and theories, among them *Herbart's A B C of Sense-Per-*

ception, Application of Psychology to the Science of Education, and *Outlines of Educational Doctrine.*

HIBBEN, JOHN GRIER (1861–1933). President of Princeton University, received his education at Princeton and the University of Berlin. For a number of years he held pastorates and from 1891 taught logic at Princeton until 1912, when he was elected president in succession to Woodrow Wilson. Among his philosophical works are *Inductive Logic, Problems of Philosophy, The Philosophy of Enlightenment, A Defense of Prejudice and other Essays,* and *The Higher Patriotism.*

HICKS, FREDERICK C. (1863–). College president. Born in Capac, Mich.; graduated from the University of Michigan in 1886, and four years later, received his Ph.D. from the same institution; taught in public schools; was assistant at the University of Michigan, then professor of history and economics at the University of Missouri from 1892 to 1900; professor of economics and commerce at the University of Cincinnati for twenty years, and was then elected president of that institution. Author: *Lectures on the Theory of Economics, Competitive and Monopoly Price,* etc.; contributor to educational and economic journals.

HICKS, FREDERICK CHARLES (1875–). Librarian and professor. Born at Auburn, N. Y.; graduated from Colgate University in 1898, and from the Georgetown (D. C.) Law School in 1901; he was in the map division of the Library of Congress for six years while taking his law course; afterwards practiced law for two years in Auburn, N. Y.; became librarian of the United States War College in 1905; went to the Brooklyn Library in 1908; and in 1915 became law librarian and associate professor (1921) of legal bibliography at Columbia University. Author: *Biography of Thomas Hutchinson, Men and Books Famous in the Law, The New World Order,* etc.

HIRSCH (*hûrsh*), **EMIL G.** (1851–1922). He became a rabbi in 1877, and in 1892 was appointed professor of rabbinical literature and philosophy at Chicago University; for several years editor of the *Zeitgeist,* and now edits the *Reform Advocate,* Chicago.

HOFFMAN, JOHN WASHINGTON (1867–). College president; born at Noblestown, Pa.; educated at Washington and Jefferson College (A. B. 1892; A. M. 1895), with graduate work at Yale and Princeton; was ordained a minister of the Methodist Episcopal Church in 1897 and served various churches of that communion. In 1916 he was elected president of Ohio Wesleyan University.

HOLDEN, PERRY GREELEY (1865–). Agricultural educator. Born in Dodge County, Minn.; educated at Michigan Agricultural College (B. S. 1889; M. S. 1895), and also at the Michigan State Normal School; was teacher and superintendent of schools for several years; professor of agronomy at the University of Illinois from 1896 to 1900; in 1902 he was appointed professor of agronomy and vice-dean of Iowa State College, and in 1912 became also director of the agricultural extension department of the International Harvester Company for the extension of agricultural education. Author of monographs on corn, potato, and sugar beet culture.

HOLLANDER (*hol'and-ar*), **JACOB H.** (1871–1940). Economist. Born in Baltimore; educated at Johns Hopkins University (A. B. 1891; Ph. D. 1894); was successively assistant, associate, associate professor, and in 1904 became full professor of political economy at Johns Hopkins; was special commissioner and treasurer of Porto Rico (1900–1901); during his term of service, he devised and introduced the present revenue system of the island; was commissioner to Santo Domingo, and financial adviser of Dominican Republic from 1905 to 1910, and was largely instrumental in adjusting the debt of the Republic; president of the American Economic Association 1921. Author: *The Cincinnati Southern Railway, The Financial History of Baltimore, David Ricardo, A Centenary Estimate, The Abolition of Poverty, War Borrowing,* etc.; editor of *Letters of Ricardo,* and *Economic Tracts.*

HOLT (*hōlt*), **HAMILTON** (1872–). Editor and educator. Born in Brooklyn, N. Y.; graduated from Yale in 1894; pursued graduate work in economics and sociology for three years; was editor, manager, and owner of the *Independent* for nearly twenty-five years; was for many years identified with the movement for world peace; member of numerous peace societies; served on various commissions during and after the Great War: elected president of Rollins College, Florida, in 1925, and there introduced various changes in methods and subjects, in order to arouse intellectual interest and accomplishment on the part of the students. Author of *Commercialism and Journalism,* and various addresses on world peace and education.

HOLT (*hōlt*), **HENRY** (1840–1926). Born in Baltimore; graduated from Yale in 1862, and from the Columbia Law School in 1864; never practiced; was with the publishing house of G. P. Putnam from 1863 to 1873; entered the business for himself, and was president of Henry Holt and Company from 1873 to 1926; published many outstanding books in the educational field; was lecturer on books at Yale University, the University of Vermont, and Columbia University; editor and publisher of *The Unpopular Review* from 1914 to 1921; author of *On Civic Relations, The Cosmic Relations and Immortality, Garrulities of an Octogenarian Editor,* etc.

HOPKINS (*hop'kinz*), **ERNEST MARTIN** (1877–). College president. Born in Dunbarton, N. H.; educated at Worcester Academy, Dartmouth College (A. B. 1901; A. M. 1908); from 1901 to 1905 he was secretary to the president of Dartmouth, and from 1905 to 1910, was secretary of Dartmouth College; later was engaged in industrial organization work with concerns in Boston, Chicago, and Philadelphia; was elected president of Dartmouth College in 1916. During the Great War, served on various industrial commissions; recipient of numerous honorary degrees; author of various papers and addresses on educational topics.

HOPKINS (*hop'kinz*), **MARK** (1802–1887). Professor of moral philosophy and rhetoric at Williams in 1830; elected to the presidency of Williams in 1836, which office he held for thirty-six years, retaining the professorship of mental and moral philosophy after resigning the office of president. As a teacher he made a wonderful impression upon his classes, and his administration of the college was remarkably successful. Among his published works are *The Law of Love, Love as a Law,* and *Teachings and Counsels.*

HOWARD, OLIVER OTIS (1830–1909). From 1865 to 1874, he was commissioner of the Freedmen's Bureau, establishing within three years 1,400 schools and 700 Sabbath schools; he was largely instrumental in establishing Howard University, Washington, and was its president from 1869 to 1873; superintendent at West Point for a year; founded Lincoln Memorial University in 1895. He wrote *Donald's School Days, Nez Perces Joseph,* and *Our Wild Indians.*

HOWE (*hou*), **SAMUEL GRIDLEY** (1801–1876). An American educational reformer and philanthropist. His name will long be remembered for his work among the blind. In 1832 he established the famous Perkins Institution for the Blind, and later was the means of a number of similar institutions being founded throughout the country. He introduced many improvements in the printing and preparation of books for the blind.

HOWISON (*hou'i-son*), **GEORGE HOLMES** (1834–1917). Born in Maryland; graduated from Marietta College in 1852, and from the Lane Theological Seminary three years later; also studied a year at the University of Berlin. He was professor of logic and the philosophy of science at the Massachusetts Institute of Technology for some eight years; then went as professor of philosophy to the University of California, serving for twenty-five years and retiring as professor emeritus in 1909. Author: *Limits of Evolution and Other Essays, Philosophy—Its Fundamental Conceptions and Its Methods.* Also, contributor to the leading philosophical journals.

HUDSON (*hud'son*), **HENRY NORMAN** (1814–1886). Born at Cornwall, Vt.; in early life he was a baker and a wheelright; he graduated from Middlebury in 1840, then taught school in Kentucky and Alabama. When about thirty years of age, he began an intense study of Shakespeare, and after a number of years acquired a wide reputation and was accepted as an authority on the life and works of the great poet. He was appointed professor at Boston University; he delivered numerous lectures in different parts of the country, and wrote many books. Having entered the priesthood of the Protestant Episcopal Church, he was, for several years, editor of the *Churchman;* he served as a chaplain in the Union Army during the Civil War. Author of *Lectures on Shakespeare, Shakespeare, His Life, Art, and Characters* (2 vols.), a valuable annotated edition of Shakespeare's Works in eleven volumes; also, *Studies in Wordsworth, Essays in Education,* etc.

HUGHES (*hūz*), **RAYMOND M.** (1873–). Born in Atlanta, Ga.; educated at Miami University (A. B. 1893), and pursued graduate work at Ohio State University and the Massachusetts Institute of Technology; after some secondary school teaching, became in 1898 professor of physics and chemistry at Miami University, then dean, and president from 1913 to 1927; in the latter year he was elected president of Iowa State College. Author of various papers on scientific and educational subjects, particularly successful in administration.

HUNTINGTON (*hunt'in-ton*), **EMILY** (1841–1909). A writer as well as educator. In 1872 she became the head of the Wilson Industrial School for Girls in New York, the first school of its kind in America, laboring for twenty years; started the first boys' club and the first kitchen garden; author of many books on gardening.

HUTCHINS, HARRY BURNS (1847–1930). Instructor and assistant professor of history and rhetoric in the University of Michigan, 1872–1876; of law, 1884–1887, in the same university; professor of law in Cornell, 1887–1894; professor and dean in law department, 1895–1910; acting president in 1897–1898, and again from October 1909, to June, 1910, then president of the University of Michigan from 1910 to 1920, when he became president emeritus.

HUTCHINS, ROBERT MAYNARD (1899–). College president. Son of William J. Hutchins (q. v.), president of Berea College, Ky.; born at Brooklyn, N. Y.; student at Oberlin College, 1915 to 1917; in ambulance service in the United States army from 1917 to 1919; with the Italian army part of the time, and decorated with the Cross of War by the Italian government; student at Yale from 1919 to 1921, graduating with the A. B. degree in 1921: graduate of Yale Law School in 1925; secretary of Yale University from 1923 to 1927; lecturer at Yale Law School from 1925 to 1927; acting dean for the year 1927–28, and professor of law from 1927 to 1929. He was elected president of the University of Chicago in 1929, at thirty years of age, thus becoming one of the youngest college presidents in the country.

HUTCHINS, WILLIAM JAMES (1871–). College president. Born at Brooklyn, N. Y.; educated at Oberlin College from 1888 to 1890, and received his A. B. degree from Yale in 1892; graduated from Union Theological Seminary in 1896; pastor of Bedford Church, Brooklyn, from 1896 to 1907; professor of homiletics at Oberlin Graduate School of Theology from 1907 to 1920; elected president of Berea College, Ky. in 1920. Author: *The Preacher's Inspiration and Ideals, The Religious Experience of Israel,* etc. Berea College holds a unique place in the educational field in giving regular college and vocational courses and by being devoted chiefly to the uplift of the mountain whites of the Appalachian region.

HUTTON (*hut'n*), **MAURICE** (1856–). Born in Manchester, Eng.; educated at Magdalen College School and at Worcester College, London; he was fellow of Merton College from 1879 to 1886. In 1887, was appointed professor of Greek at the University College, Toronto, and in 1901 became principal. Author: *The Greek Point of View, Wit, Humor and Satire,* etc.

HYDE (*haid*), **DOUGLAS** (1860–). Irish scholar and writer. Born at Frenchpark; educated at Trinity College, Dublin. In 1893 he formed the Gaelic League for the preservation and extension of the Gaelic language, and was president until 1915. He was instrumental in saving the Irish language from being excluded from the Irish schools, and later aroused such enthusiasm for the native language that its teaching was finally made compulsory in the schools of Ireland. In 1905 he toured America and raised $55,000 for the Gaelic League; on his return, he was appointed a member of the royal commission of Irish University Education. In 1909, he was made professor of modern Irish at the University College, Dublin.

HYDE (*haid*), **WILLIAM DEWITT** (1858–1917). Pastor of a church in Paterson, N. J.; called to be the seventh president of Bowdoin College in 1885. Wrote and spoke on educational topics. Some of his published works are *Practical Ethics, Social Theology, The Evolution of a College Student, The Art of Optimism,* and *From Epicurus to Christ.*

ISIDORE (*iz'i-dōr*), **ARCHBISHOP OF SEVILLE** (?570–636). Most famous ecclesiastic of the seventh century, and most learned man of his time. We are indebted to him for many fragments of Greek and Latin authors. His *Etymologies,* in twenty books (edited by Otto Leipsig, 1833), formed the great mediaeval encyclopedia.

ISOCRATES (*ai-sok'ra-tiz*) (436–338 B. C.). The most celebrated teacher of his age, was educated at Athens, being taught by Socrates. In 392 B. C. he opened a school at Athens, where he taught the art of rhetoric. Cicero gained much from him, and said that in his school the eloquence of Greece was developed and perfected. His writings include orations and letters. See also under AUTHORS.

JACKSON, A. V. WILLIAMS (1862–). Born in New York; graduated from Columbia at the head of his class in 1883; received the Ph. D. degree in 1886, also from Columbia; studied for two years at the University of Halle, Germany; specialized in the languages of India and Persia, and in 1895 became professor of Indo-Iranian languages at Columbia University. Between 1901 and 1918, he made many trips for research through India, Persia, and Central Asia. Author: *A Hymn of Zoraster, Yasna XXXI, An Avestan Reader, Zoroaster, the Prophet of Ancient Iran, Persia, Past and Present, From Constantinople to the Home of Omar Khayyam, Early Persian Poetry.* Editor: *A History of India* in 9 volumes, *Columbia University Indo-Iranian Series* (10 vols.)

JAMES, EDMUND JANES (1855–1925). Political economist; born in Jacksonville Ill.; professor of public finance and administration, Wharton School of Finance and Economy, University of Pennsylvania (1883–1895); professor of political and social science in the same university (1884–1895); professor of public administration, University of Chicago (1896–1901); president of the Northwestern University from 1902 to 1904; president of the University of Illinois (1904–1920), when he became president emeritus; editor and author of a number of works on political economy and social science and public law.

JAMES, WILLIAM (1842–1910). American psychologist and philosopher; born in New York; filled the following offices at Harvard: Assistant professor of comparative anatomy and physiology; assistant professor of philosophy; professor of psychology and philosophy; besides being Gifford lecturer on natural religion at Edinburgh. He contributed much to analytical psychology and to metaphysical analysis in philosophy. Some of his works are: *Principles of Psychology, The Will to Believe, Talks to Teachers on Psychology, Human Immortality, Pragmatism.*

JAMESON, J. FRANKLIN (1859–1937). Born in Boston; graduated from Amherst College in 1879; received his Ph. D. from Johns Hopkins in 1882; assistant and associate in history at Hopkins from 1882 to 1888; professor of history at Brown University from 1888 to 1901; professor and head of the department of history at the University of Chicago from 1901 to 1905; director of the department of historical research at Carnegie Institute, Washington, D. C. from 1905 to 1929; elected director of Research, Congressional Library, in 1929. Managing editor of the *American Historical Review* from 1895 to 1901, and from 1905 to 1929. Author of *Willem Usselinx, The American Revolution.* Editor of *Correspondence of John C. Calhoun,* and *Original Narratives of American History.*

JASTROW (*yās'tro*), **JOSEPH** (1863–). Psychologist. Born in Warsaw, Poland; educated at the University of Pennsylvania (A. B. 1882; A. M., 1885), graduate student in psychology at Johns Hopkins University and received Ph. D. degree in 1886; was professor of psychology at the University of Wisconsin for nearly forty years, retiring in 1927; was president of the American Psychological Association in 1900. Author of *Time Relations of Mental Phenomena, The Subconscious, The Psychology of Conviction,* etc.; also contributor to scientific journals.

JENKS, JEREMIAH WHIPPLE (1856–1929). Economic expert, became professor of political economy at Cornell in 1891 and at New York University in 1912. Acted as expert agent of the United States Industrial Commission from 1899 to 1901; U. S. Immigration Commission from 1907 to 1910; founder and director of the Far East Bureau, 1913–1921; chairman of the board of Alexander Hamilton Institute; director American Motion Picture Corporation, and many other honors and offices of trust. Author of *Citizenship and the Schools, Great Fortune, The Political and Social Significance of the Life and Teachings of Jesus, Life Questions of High School Boys, Business and the Government,* and many others.

JESPERSEN, JENS OTTO HARRY (1860–). Danish philologist. Born at Randers, Denmark; in 1893 was appointed professor of the University of Copenhagen; in 1909–10 he lectured at Columbia University; his theory of the development of language was influenced by the ideas of Herbert Spencer and Wilhelm Ostwald; he wrote many books on philological subjects: *Progress in Language, Phonetics, Growth and Structure of the English Language, Language, Its Nature, Development and Origin,* and *The Philosophy of Grammar.*

JESSE (*jes'i*), **RICHARD HENRY** (1853–). Born in Virginia; instructor in the universities of Louisiana and Tulane until called to the presidency of the University of Missouri in 1891; prominent in the National Education Association, being one of the Committee of Ten on the course of study for secondary schools (1892–1893). President of Southern Association of Colleges and Secondary Schools; author of many pamphlets and addresses.

JOHNSON, EMORY RICHARD (1864–). American educator; professor of commerce and transportation, University of Pennsylvania, in 1896; expert on transportation and railway property for U. S. government (1899–1905); author of works on transportation. Became dean of the Wharton School of Finance and Commerce.

JOHNSON (*jon'son*), **SAMUEL** (1696–1772). Born at Guilford, Conn.; graduated from Yale in 1714, when the college was still located at Saybrook; was for several years tutor in the college; was ordained a Congregational minister in 1720, but coming to believe that "the Church of England came the nearest to the purity and perfection" of the primitive church, he went to England and was ordained a minister of Episcopal Church. For more than twenty-five years he was rector of the Episcopal Church at Stratford, Conn.; in 1754 he became the first president of Kings College, founded that year in New York, and served until 1763. Kings College, after the Revolution, was renamed Columbia. Johnson was a friend of Franklin; a man of broad and tolerant views, and one of the best scholars of his time in America.

JONES, CECIL CHARLES (1872–). College president. Born at Monckton, New Brunswick; educated at the University of New Brunswick, Harvard University, and the University of Chicago; was professor of mathematics and physics at various Canadian universities, and in 1906 became chancellor of the University of New Brunswick; author of articles and pamphlets on educational and mathematical subjects.

JORDON (*jôr'dan*), **DAVID S.** See under SCIENTISTS.

JOWETT (*jō'et*), **BENJAMIN** (1817–1893). A distinguished English scholar and educationist. A brilliant university career was followed by a fellowship and tutorship at Balliol, of which college he was master from 1870 until the time of his death. Jowett exercised a marked personal influence over his pupils, and did more perhaps than any of his contemporaries toward shaping the life and thought of his generation. He was the foremost Greek scholar of his day.

JUDD (*jud*), **CHARLES HUBBARD** (1873–). Psychologist. Born in Bareilly, British India; came to the United States in 1879; graduated from Wesleyan University in 1894 and received his Ph. D. degree from the University of Leipzig in 1896. After teaching psychology at various American colleges, became professor and head of the department of education at the University of Chicago in 1909; director of various educational surveys, and author of numerous monographs and articles on educational subjects; his principal books are the following: *Introduction to the Scientific Study of Education, Psychology Laboratory Course, Silent Reading, Evolution of a Democratic School System.*

JUDSON (*jud'son*), **HARRY PRATT** (1849–1927). Born at Jamestown, N. Y. Teacher and principal of the high school at Troy, N. Y.; professor of history in the University of Minnesota; head professor of political science, and dean of the faculties of art, literature, and science, at the University of Chicago. In 1907 he became president of the University of Chicago; author of a number of books on historical and educational subjects.

KEYNES (*kānz*), **JAHN MAYNARD** (1883–). British economist. Born in Cambridge, England; educated at Eton and King's College, Cambridge; in 1915, he joined the Treasury, where during the World War, he did important work in connection with loans to the Allies; at the Paris Peace Conference, he was the chief representative of the Treasury. Writer of a number of books on economic subjects: *The Economic Consequences of Peace, Indian Currency and Finance, A Treatise on Probability, A Short View of Russia, The End of Laissez-faire.* Was made fellow and later bursar of King's College, Cambridge; in 1912 became editor of the *Economic Journal.*

KEYSERLING (*kī'zēr-lĭng*), **HERMANN, COUNT** (1880–). German philosopher and scholar. Born at Konno, in Livonia, of a noble family. Traveled in Russia, Switzerland, and Germany; lived for some time in Paris; in all the lands he visited, he made a special study of the natural sciences. When in Paris, he began to publish essays on the criticism of art and on philosophy; the years 1907–11, he spent in traveling all over Europe, and the next year took a trip around the world; he then acquired an appreciation of oriental philosophy which, together with his scientific and political studies, influenced the development of his own philosophy. In 1919 he married the granddaughter of Prince Bismarck. Among his books are: *The Travel Diary of a Philosopher, Die Philosophy als Kunst, Europe,* etc.

KING (*kin*), **HENRY CHURCHILL** (1858–1934). Born at Hillsdale, Mich.; was associate professor, professor and dean of Oberlin College from 1884 to 1902; President of Oberlin College 1902–1927; then became president emeritus; was a member of the Committee of Ten in the National Education Association to report on secondary school studies; author of *The Appeal of the Child, Personal and Ideal Elements in Education,* and *Letters to Sunday School Teachers.*

KINGLAKE (*kin'lāk*), **ALEXANDER WILLIAM** (1809–1891). English historian and traveler. Born at Taunton, England; educated at Eton, and Trinity College, Cambridge, where he was a friend of Tennyson and Thackeray. He studied law, and was admitted to the bar in 1837. In 1835 he traveled in the East, and recorded his impressions in a book entitled, *Eothen,* published in 1844, and still ranking as a classic. In 1854 Kinglake went to the Crimea and was present at the battle of Alma. Lord Raglan suggested to him a plan for an elaborate history of the war and placed at the writer's disposal his own private papers. The remainder of Kinglake's life was devoted to the writing of his great work, *The History of the Crimean War,* comprised in eight volumes which appeared at intervals from 1863 to 1887. See also under AUTHORS.

KINLEY, DAVID (1861–). College president. Born in Dundee, Scotland; came to the United States at eleven years of age; graduated from Yale University in 1884; studied at Johns Hopkins for two years; received his Ph. D. from the University of Wisconsin in 1893. In 1894, became professor of economics and dean of the College of Literature and Art at the University of Illinois; in 1906 was made dean of the Graduate School, and in 1920 became president of the University. From 1913 to 1922, was a member of the commission on research of the Division of Economics and History, Carnegie Endowment for International Peace. Author: *The Independent Treasury of the United States, Monograph on Trusts, Money,* and contributions to magazines.

KIRKLAND (*kûrk'land*), **JAMES HAMPTON** (1850–1939). University chancellor. Born in Spartanburg, S. C.; graduated from Wofford College in 1877; received the Ph. D. degree from the University of Leipzig in 1885; in 1886, became professor of Latin at Vanderbilt University, a position he held until 1903, when he was elected chancellor of the University. Recipient of many honorary degrees; author of numerous monographs, and editor of *Satires and Epistles of Horace.*

LADD, GEORGE TRUMBULL (1842–1921). American psychologist and philosopher; born at Painesville, Ohio; became professor of philosophy at Yale in 1881. He has written numerous works on psychology and philosophy, including *Philosophy of Religion, Outlines of Physiological Psychology, Philosophy of Mind, Philosophy of Conduct.*

LANCASTER, JOSEPH (1778–1838). English educator; born in London. He made use of, and improved, Bell's Monitorial System; established the Royal Lancastrian Society from which grew the British and Foreign School Society.

LA SALLE (*là sàl*), **JEAN BAPTISTE DE** (1651–1719). A French priest; born at Rheims; founder of

the order commonly called the "Christian Brothers," having for its object the providing of schools for the poor. After establishing schools in various parts of France, he went to England and James II. intrusted to him the educating of fifty Irish boys of good family. In 1699 he established the first technical school. At his death the order comprised 274 Brothers and 10,000 pupils. Some of his books have been translated into English: *The Rules of Christian Politeness* and *Management of Christian Schools*. La Salle was canonized by Pope Leo XIII.

LEA (*lē*), **HENRY CHARLES** (1825–1909). Born in Philadelphia; at eighteen joined his father in the publishing business and retained his connection with the company until 1880. He was never of robust health, and devoted much of his time to research on church history in the middle ages, becoming a leading authority on the Inquisition. Among his works may be mentioned *Superstition and Force, History of the Inquisition of the Middle Ages, History of Auricular Confession and Indulgences in the Latin Church*, and *History of the Inquisition of Spain*. He was a recipient of honorary degrees from the universities of Princeton, Harvard, Pennsylvania, Giessen, and Moscow.

LEVERMORE, CHARLES HERBERT (1856–1927). Educator and authority on peace, won the Bok Peace Prize of $50,000 for the plan judged to be best for maintaining peace among the nations. Mr. Levermore received his A. B. from Yale, and after a number of years engaged in teaching, was awarded a Ph. D. at Johns Hopkins. He was professor at the University of California and Massachusetts Institute of Technology, principal of Adelphi Academy and then president of Adelphi College in Brooklyn. After 1913 he gave his attention mainly to peace societies, and became secretary of the New York Peace Society in 1917. He was also author of several pamphlets on peace and edited the first three series of the *Year Books of the League of Nations*.

LILY, or **LILLY WILLIAM** (about 1468–1522). A celebrated English grammarian. He was graduated from Oxford, traveled to the Orient, lived at Rhodes and Rome to perfect his knowledge of Greek and Latin. He opened the first private or aristocratic school in London for training gentlemen's sons for Oxford and Cambridge in the dead languages. He was the first headmaster in Colet's School, in St. Paul's Churchyard, the first public school in England. He was probably the first teacher of Greek in England and was one of the chief exponents of the "new learning" in that country. He edited and published a work known as *Lilly's Grammar*.

LORIMER, GEORGE HORACE (1868–1937). Born in Louisville, Ky.; educated at Mosely High School, Chicago, and at Colby College and Yale University. In 1899 he became editor-in-chief of the *Saturday Evening Post, Chevalier de la Legion d'Honneur*. Author: *Letters from a Self-Made Merchant to His Son, Old Gorgon Graham, The False Gods, Jack Spurlock—Prodigal*.

LOW, SETH (1850–1916). An American administrator; born in Brooklyn, N. Y.; graduated at Columbia University (1870); president Columbia University (1890–1901); united its several departments, expanded its scope, promoted removal to its present commanding site, and gave to it the great library building completed at a cost of over $1,000,000 to his private fortune; mayor New York City (1902–1903).

LOWELL, ABBOTT LAWRENCE (1856–). Was graduated from Harvard (1877); and from Harvard Law School (1880); legal practitioner (1880–1897); lecturer on government at Harvard (1897–1899); professor of the science of government (1900–1909); president of Harvard University (1909); trustee of the Lowell Institute of Boston; author of *Essays on Government, Governments and Parties in Continental Europe*, a widely used treatise; and *The Government of England*.

LOYOLA (*lō-yō'lä*), **IGNATIUS DE** (?1491–1556). Founder of the Jesuits; born in Spain. At the age of thirty-three he began to teach the rudiments of grammar in a public school to little boys; continued his studies in Paris, where Francis Xavier was one of his chosen companions; became a priest and founded the Order of the Jesuits in 1534, establishing a number of orphan asylums for boys and girls. At his death no fewer than 130 colleges had been established by the Jesuits. Loyola was canonized in 1622.

LYON (*lāi'an*), **MARY** (1797–1849). Pioneer in the movement for the higher education of women; taught at Derry, N. H., and from 1828 to 1834 was principal of Ipswich Seminary; founded in 1837 Mt. Holyoke Seminary, where women could fit themselves for teaching. For the sake of economy and to give the young women exercise and practice in household tasks, she arranged the course so that each student should perform some household labor each day.

McCARTHY, CHARLES HALLAN (1860–). American educator; became professor of American history, Catholic University of America in 1904; author of *Lincoln's Plan of Reconstruction*.

McCOSH (*mä-kŏsh'*), **JAMES** (1811–1894). Educator. Born in Ayrshire, Scotland; educated at the universities of Glasgow and Edinburgh. For many years he was a minister in the Church of Scotland, and was an influence in establishing the Free Church of Scotland as a protest against the receiving of State aid by the Established Church. In 1850, he published *The Method of Divine Government, Physical and Moral*, which not only brought him fame, but the following year, led to his appointment as professor of logics and physics in the college at Belfast of the newly founded Queen's University. Professor McCosh remained there nearly eighteen years; then, in 1868 accepted the position of president of Princeton College, a post he held for twenty years, retiring then because of advancing years, but still continuing his connection with the college as professor of philosophy. Under his administration the standards of the institution were raised, and the number both of professors and students was more than doubled. President McCosh was one of the first of orthodox clergymen to accept and defend the theory of evolution in biology. He was a voluminous writer. Among his books may be noted *Typical Forms and Special Ends in Creation, The Supernatural and the Natural, The Emotions, Psychology of the Motive Powers*.

McGUFFEY, WILLIAM H. (1800–1873). Author and teacher, born near Claysville, Pa. After some training at Greensburg, Pa., he entered Washington College and graduated in 1836 with high honors. He was successively president or teacher in Cincinnati College, Miami University, and Woodworth College, Cincinnati, and in 1845 was called to the chair of mental and moral philosophy at the University of Virginia, where he was always a notable figure. Though he had a gift for preaching, which he often exercised, he never was an ordained minister. With a memory that was truly prodigious, he is said by his admirers to have composed and long remembered the chief parts of about 3,000 addresses and sermons without ever writing down one of them. No textbooks were ever more popular nor had more copies sold than the famous readers of McGuffey, with an estimated distribution of over 122,000,000. They are still used in at least a few localities. The series began in 1836 with the *First* and *Second Readers*, ran through the *Primer, Third* and *Fourth*, and the *Speller* in the next two years, and then the *Fifth* in 1844 and the last, or *Sixth*, in 1857. All these went through many editions with numerous changes and revisions. Museums for relics and the readers are now at Miami University and at Dearborn, Mich., where Henry Ford has reconstructed the school where McGuffey first taught. He also erected a memorial on the grounds of the original school, located south of West Alexander, Pa., just off U. S. Route 40 or the National Highway, which is visited each year by thousands of tourists. Perhaps no books in our early common schools exerted a more profound or more wholesome influence than did the readers and spellers of McGuffey.

MacCRACKEN (*mä-krak'en*), **HENRY MITCHELL** (1840–1916). Born at Oxford, Ohio. He was teacher of classics, school superintendent, chancellor of Western University, then went to New York University as vice-chancellor and professor of philosophy; chancellor of New York University (1891–1911); author of *Kant and Lotze*, and *A Metropolitan University*.

MacCRACKEN, HENRY NOBLE (1880–). College president. Born at Toledo, Ohio; graduated from New York University in 1900 and received his Ph. D. from Harvard in 1907; from 1907 to 1913 was connected with the Sheffield Scientific School at Yale, then for two years professor of English at Smith College. In 1915, was elected president of Vassar College. Author, *John the Common Weal* (Well lectures on American Citizenship). Co-author: *Introduction to Shakespeare, Manual of Good English*, etc.; editor of works of Chaucer, Lydgate, and Shakespeare.

McLAUGHLIN (*măk-lôk'lin*), **ANDREW CUNNINGHAM** (1861–). Born at Beardstown, Ohio; graduated from the University of Michigan in 1882, and from the Law School in 1885; was professor of

American history at the University of Michigan for fifteen years, then in 1906 went to the University of Chicago as professor of history and head of the department. Author of many authoritative works on history and government: *Lewis Cass* (in the American Statesmen series), *A History of the American Nation, The Confederation and the Constitution, The Courts, the Constitution, and Parties, Steps in the Development of Democracy;* editor with Prof. A. B. Hart of the *Cyclopedia of American Government.*

MacLEAN (*măk-lān'*), **JAMES ALEXANDER** (1868–). College president. Born at Mayfair, Ont.; graduated from the University of Toronto in 1892; received the Ph. D. degree from Columbia in 1894; was professor of political science at the University of Colorado for six years, then in 1900 became president of the University of Idaho; in 1913, went to the University of Manitoba as president.

McMURRY, CHARLES ALEXANDER (1857–1929). Educator. Born in Crawfordsville, Ind.; educated at the University of Michigan, and obtained his Ph. D. degree from the University of Halle, Ger. After many years experience in teaching, in the supervision of schools, and in normal school work, in 1915 he became professor of elementary education at the George Peabody College for Teachers, Nashville, Tenn. Author of many books on educational subjects: *Special Method in Reading, Special Method in Literature and History, Special Method in Geography, Course of Study in the Eight Grades, Special Method in Arithmetic, Special Method in Grammar, Teaching by Projects;* editor *Yearbooks of the National Herbart Society.*

McMURRY, FRANK MORTON (1862–1936). Educator. Born in Crawfordsville, Ind.; educated at the universities of Michigan, Halle, and Jena; received his Ph. D. from Jena; also studied in Geneva and Paris. Entered public school work, and was principal of various schools; for three years was professor of pedagogics and dean of the Teachers College, University of Buffalo; for nearly twenty years was professor of elementary education at the Teachers College of Columbia University, becoming professor emeritus in 1926. Author of *Tarr and McMurry Common School Geographies* (with Ralph S. Tarr), 1900, *How to Study and Teaching How to Study, Elementary School Standards, McMurry and Parkins Common School Geographies* (with A. E. Parkins), 1921. Editor, *McMurry and Benson Social Arithmetics.*

MACY, JESSE (1842–1919). American educator and political economist; became professor constitutional history and political science, Grinnell, after 1885; author of the *British Constitution,* texts on civics, and other works on political science.

MAHAFFY (*ma-haf'ĭ*), **JOHN PENTLAND** (1839–1919). Irish classical scholar. Born in Switzerland, and privately educated there; he entered Trinity College, Dublin, in 1856 and three years later graduated with high honors. In 1871 he was appointed professor in the University of Dublin, and held that chair for 28 years; in 1914 he became provost of Trinity College; in 1916 during the Irish rebellion, he directed the defense of the college, and prevented great destruction of property; for his aid, he was decorated by the government. For more than thirty years he was the foremost figure at Trinity College. He was one of the greatest classical scholars of his time. His *Classical Greek Literature* is everywhere regarded as a standard work. *The Silver Age of Greece* which was first published in 1890 under the title, *The Greek World under Roman Sway,* is also an authoritative work. Other books of his are *Greek Social Life from Homer to Menander, Greek Pictures, What Have the Greeks Done for Modern Civilization?* (Lowell Lectures). Mahaffy possessed remarkable ability in deciphering texts and his work along this line led to the writing of *The Empire of the Ptolemies.*

MAIN, JOHN HANSON THOMAS (1859–1931). Born at Toledo, Ohio; professor of ancient languages at Moore's Hill College; professor, acting president, dean, and, later, president of Grinnell College.

MANN (*man*), **HORACE** (1796–1859). President of Antioch College (1852–1859). As secretary of the board of education appointed by the state legislature of Massachusetts (1837) to revise the school laws and to reorganize the school system, Mann wrote 12 volumes of annual *Reports* (1837–1848) which are educational classics; wrote *Lectures on Education, On the Study of Physiology in Schools, Slavery Letters and Speeches.*

MARCH (*märch*), **FRANCIS ANDREW** (1825–1911). Educator and philologist. Born at Milbury, Mass.; graduated from Amherst in 1845; while there, his attention was turned to the study of Anglo-Saxon by Noah Webster; he studied law, was admitted to the bar, and built up an excellent practice which he was forced to relinquish on account of ill health. Mr. March then devoted himself to the pursuit of his favorite studies—philosophy, language, and literature. In 1857 he was appointed professor of English language and comparativo philology at Lafayette College, a position he held for fifty years, retiring as professor emeritus in 1907. He was a pioneer in the philological study of English classics; he was president of the Spelling Reform Association from 1876 to 1905; from 1879 to 1882, he was director of the American Readers of the famous Oxford Dictionary; he served as consulting editor on the Standard Dictionary. His great work, however, was the editing, with his son, F. A. March (q. v.) of *March's Thesaurus-Dictionary,* "A Treasure House of Words and Knowledge." He was regarded as the first authority of his day on derivation, spelling, definition, and grammar.

MARCH, FRANCIS ANDREW, JR. (1863–1928). Educator. Born at Easton, Pa., son of Professor Francis Andrew March (q. v.); was graduated from Lafayette College in 1881; from 1882 until his death, he was connected with the English department at Lafayette, first as tutor, then adjunct professor, as professor of English literature from 1891 to 1905, and as professor of English language from 1905 to 1928. After his father's death, he was editor-in-chief of *March's Thesaurus-Dictionary;* was assistant in the etymology department of the *Century Dictionary,* and editor in charge of the etymology department of the *Standard Dictionary;* also author of *History of the World War, America in the World War* (with R. J. Beamish), etc.

MARTIN (*mär'tin*), **GEORGE H.** (1841–1917). Born at Lynn, Mass. He was a teacher at Bridgewater Normal School for 18 years; agent of the Massachusetts State Board of Education for two years; supervisor of the Boston schools from 1892–1904, became secretary of the State Board of Education. His works include *Civil Government,* a text-book for schools, and *Hints on Teaching Civics.*

MARX (*märks*), **KARL.** See under PHILOSOPHERS, THEOLOGIANS, AND REFORMERS.

MASSON (*ma"sēn'*), **DAVID ORME** (1858–1937). Educator. Born in London, England; educated at the University of Edinburgh; after graduation he was assistant to Prof. Ramsey in chemistry at the University College, Bristol; he held a research fellowship in Edinburgh University from 1882 to 1885. From 1886 to 1923 he was professor of chemistry at Melbourne University, Australia; was president of the Australian Association for the Advancement of Science 1911–13; was knighted in 1918; writer of many articles on chemistry and chemical physics for English and Australian scientific journals.

MAXWELL (*maks'wel*), **WILLIAM HENRY** (1852–1920). Born in Ireland. He came to the United States, became superintendent of schools in Brooklyn, and finally since 1898 superintendent of the Greater New York City schools. He is author of two school grammars.

MEIKLEJOHN, ALEXANDER (1872–). Educator. Born at Rochdale, England; came to America at the age of eight; graduated from Brown University in 1893 and received the Ph. D. degree from Cornell in 1897; returned to Brown, where he was for fifteen years, a member of the philosophy department, and from 1901 to 1912, was dean. In 1912 he became president of Amherst College, a position he held until 1924. In 1926 he went to the University of Wisconsin as professor of philosophy, where he established later the "Experimental College," an interesting venture in the field of education.

MILL (*mil*), **JAMES** (1773–1836). Economist and publicist. Born at Northwater Bridge, Scotland; educated at the University of Edinburgh, and designed for the ministry; but giving up this career on account of intellectual doubts, he went to London in 1802, and supported himself by literary efforts. In 1818, after some years of labor, he published a *History of India,* which was the means of his appointment to a lucrative position in the East India Company. Meantime, he had become a friend and ardent disciple of Jeremy Bentham, whose opinions and philosophy he did much to propagate. He also became acquainted with David Ricardo, and induced him to publish his economic

opinions. Mill, himself, wrote an interesting and valuable work on *Elements of Political Economy*. His chief claim to fame is, perhaps, that he was the father and teacher of John Stuart Mill, the most eminent English thinker of the nineteenth century.

MONROE, PAUL (1869–). Became professor of history of education in 1902, in Teachers College, Columbia University; author of several books, including *Text-book in the History of Education*, and a brief course in the same subject.

MONTESSORI (*mŏn-tes-sō'rē*), **MARIA** (1872–). Was the first woman graduate in medicine at the University of Rome in 1894. After making some preliminary studies in medicine and psychology, she became associated for six years with a hospital for defective children. When an association in Rome was building a series of better houses for the poor, Miss Montessori took advantage of the opportunity to instruct the tenants. Here she taught from 1907 to 1911. Out of her experiences and her theories that children should be selected with a view to their inclinations, and drawn in the direction of their main talents, grew her theories of education. She developed her ideas in several treatises, one of which, *The Montessori Method*, was translated into English in 1912, and another, *Pedagogic Anthropology*, was translated in 1913.

MORGENSTERN, JULIAN (1881–). Educator, rabbi. Born in St. Francisville, Ill.; graduated at the University of Cincinnati in 1901; received his theological training at Hebrew Union College; studied at the universities of Berlin and Heidelberg, and received his Ph. D. from Heidelberg in 1904. In 1907, became professor of Biblical and Semitic languages at Hebrew Union College; director of the American School for Oriental Research at Jerusalem and Bagdad; member of the World Union for Progressive Judaism. Author of *The Doctrine of Sin in the Babylon Religion, A Jewish Interpretation of the Book of Genesis*, etc.

MUIR, ALEXANDER (1834–1906). Scotch birth; B. A. at Queen's University, Kingston (1851); taught at Scarboro, Newmarket, Beaverton, Toronto (1880); principal Gladstone avenue public school, Toronto (1897). Well known national poet; author of *The Maple Leaf Forever*, the national song of Canada (1856); also *Canada, The Old Union Jack*, and *Canada Forever*. Member Orange Order; president Army and Navy Veterans' Association, Toronto (1892); bard to Militia Veterans '66 (1894).

MULCASTER, RICHARD (1548–1611). An English schoolmaster of wide repute; first head master of the Merchant Taylors' School (1561–1586); subsequently high master of St. Paul's School, London, (1596–1608). His best known books are: *Positions, wherein those primitive circumstances be examined, which are necessarie for the training up of children, either for skill in their book or health in their bodie* (1581); and the *Elementarie, which entreateth Chefelie of the right writing of our English tung* (1582). He strenuously advocated physical training as well as music for boys.

MULLANY, PATRICK FRANCIS (BROTHER AZARIAS) (1847–1893). Born in Ireland. President of Rock Hill College for seven years; teacher of literature at De La Salle Institute, New York; author of *Philosophy of Literature* and *Phases of Thought and Criticism*.

MUNRO, DANA CARLETON (1866–). American educator; instructor and professor of history at University of Pennsylvania (1893–1902); in 1902 became professor of European history, University of Wisconsin; author of *Mediaeval History, Source Book of Roman History*, and *Mediaeval Civilization*.

MURLIN, LEMUEL HERBERT (1861–). College president. Born in Mercer County, Ohio; A. B., DePauw University, 1891; S. T. B., 1892; taught for a number of years before completing his college course; was in the active ministry for some six years. In 1894, became president of Baker University at Baldwin, Kansas; in 1911, was called as president to Boston University and served for fourteen years, then returned to the Middle West and was for three years president of DePauw University; was a member of the General Convention of the Methodist Episcopal church five times between 1900 and 1924; also, member of various commissions, and recipient of many honorary degrees.

MURPHY (*mer'fi*), **THOMAS EDWARD** (1856–). Born in New York; professor of Latin and Greek at Georgetown University, as well as vice-president; president of the College of St. Francis Xavier, and (1906–1910) of Holy Cross College, Worcester.

MURRAY (*mur'i*), **JAMES AUGUSTUS HENRY** (1837–1915). British lexicographer. Born at Denholm, Eng.; attended the University of Edinburgh and was graduated from the University of London in 1873; was engaged in teaching for 30 years, chiefly at Harwick and Mill Hill. He acquired a great reputation as a philologist, and in 1878 wrote a masterly article on the English language for the Encyclopedia Britannica. The great work of his life was the editing of the *New English Dictionary*. This monumental work originated in 1857, when Richard C. Trent (q. v.) suggested that an attempt should be made under the auspices of the London Philological Society to compile a new dictionary with a larger vocabulary and fuller historical material than any then existing. This suggestion was adopted, some material gathered, and Mr. Herbert Coleridge appointed editor; he died a few years later, and was succeeded by F. J. Furnival (q. v.). About two million quotations were collected, but, aside from that, little was done until 1878, when the expense of printing and publishing the proposed work was assumed by delegates of the Oxford University Press, and Mr. Murray was made editor. Dr. Furnival turned over to the new editor not far from two tons of material which had accumulated. In 1879, Murray began the examination and arrangement of this vast mass, and the creation of an organization to carry out the undertaking. While he did not live to see the completion of the work, he planned it, and was the inspiration of his colleagues and his successors. The first volume was printed in 1884; the entire dictionary, in ten volumes, was completed in 1928. For his services in the management of this scholarly work, Murray was knighted in 1908.

MURRAY, JOHN (1745–1793). Founder of the great publishing house of London, bought out a thriving book business in Fleet Street in 1768. His name had been McMurray, but with the new venture he dropped the Scottish prefix, and became the English Murray. The business flourished. When he died his son, John Murray (1778–1843), was but fifteen, and for a year the business was managed by another, but on attaining his majority, the second John assumed control. He founded the *Quarterly Review* (1809) with Scott, Southey, Canning and other famous men as early contributors. He bought out another large firm, moved to Albemarle Street, and became the best known publisher in the world, the close friend and publisher of Byron, who called him "the Anak of publishers." John Murray (1808–1892) began the famous series of *Murray's Handbooks for Travellers*, and published works by Hallam, Gladstone, Dean Stanley, Darwin and other great writers. He was at his death succeeded by his sons, John Murray (1851–1928) and Alexander Henry Hallam Murray (1854–).

MURRAY, WALTER CHARLES (1866–). College president. Born in Canada; educated at the University of New Brunswick; at the University of Edinburgh, where he received the M. A. degree with honors in philosophy; and at the University of Berlin, where he was a Canadian Gilchrist Scholar (1887–90). He was Munro professor of philosophy at Dalhousie University from 1892 to 1908, and in 1908 was elected president of the University of Saskatchewan.

MYRICK, HERBERT (1860–1927). Editor and publisher. Born at Arlington, Mass.; educated at the Massachusetts Agricultural College and Boston University. Mr. Myrick was president for many years of the Phelps Publishing Company, and editor of its weekly, *The New England Homestead*; he was also identified with *Current Events, Good Housekeeping, Farm and Home*, and other publications; he lectured and wrote articles on public questions, such as farming, banking, and coöperation. Author: *Coöperative Finance, The Federal Farm Loan System, Rural Credits*, and *Financing Second Mortgages*.

NEEDHAM (*ned'am*), **CHARLES WILLIS** (1848–1912). Born in Castile, N. Y.; elected dean of the Schools of Law of Columbian University, Washington, D. C., and later appointed professor of law. He organized the School of Comparative Jurisprudence and Diplomacy at Washington, and was elected its dean (1898); professor of transportation and interstate commerce. President of George Washington University 1902–1910.

NEILSON (*nel'son*), **WILLIAM ALLAN** (1869–). College president. Born in Doune, Scotland; A. M., Edinburgh, 1891; Ph. D., Harvard, 1898; was a teacher in Scotland and Toronto, Canada, for several years, and later connected with the English department at Bryn Mawr and at Columbia; from 1906 to 1917 was professor of English at Harvard. In 1917, became president of Smith College. Author of *Origins and Sources of the Court of Love, Essentials of Poetry, The Facts about Shakespeare, Burns, How to Know Him, A History of English Literature.*

NICHOLS (*nik'olz*), **ERNEST FOX** (1869–1924). Born in Leavenworth, Kan.; professor of physics at Cornell, Colgate, and Dartmouth successively; professor of experimental physics, Columbia (1903–1909); president of Dartmouth College (1909); writer on radiation.

NIEBUHR (*nī'bŭr*), **BARTHOLD GEORG** (1776–1831). Historian. Born in Copenhagen; educated chiefly by his father under whose tutelage he became an excellent classical scholar and acquainted with several modern languages. Later he attended the universities of Kiel and Edinburgh. For a number of years he was in the service of his native state, then entered the Prussian civil service. In 1810, on the opening of the University of Berlin, Niebuhr resigned his government position to give a course of lectures on Roman history. These remarkable lectures brought about an important change in historical method, and made Niebuhr an acknowledged leader in the scientific study of history. Later as Ambassador to the Papal Court, Niebuhr continued his historical studies, and also discovered and published fragments of the work of Cicero and Livy. His *Roman History* ranks among epoch-making histories, not only as a study of the era of which it treats, but for its great influence on the general conception of history; the stress is laid, not so much on persons as on institutions, tendencies, and social characteristics.

NOLLEN, JOHN SCHOLTE (1869–). American educator; professor modern languages, Grinnell (1893–1903); became dean of Grinnell College; president Lake Forest University (1907–1918); author *Outline History Modern German Literature;* editor, Schiller's *Maria Stuart,* and other poems.

NORTHROP (*nōr'throp*), **CYRUS** (1834–1922). Born in Connecticut; professor of rhetoric and English literature at Yale from 1863 to 1884, when he was elected president of the University of Minnesota.

O'CONNELL, DENNIS J. Born at Charleston, S. C.; secretary to Cardinal Gibbons; head of the American College in Rome for several years; rector of the Catholic University of America, and president of the Catholic Educational Association. Appointed Bishop of Richmond in 1912.

O'SHEA, MICHAEL VINCENT (1866–1932). Educator. Born in LeRoy, N. Y.; graduated from Cornell in 1892; after some years teaching experience in normal schools, became in 1897, professor of education at the University of Wisconsin; a lecturer on educational subjects throughout the United States, and in England and Scotland; director of many educational surveys; author of numerous valuable books on education: *Suggestions for the Observation and Study of Children, Aspects of Mental Economy, Education as Adjustment, Dynamic Factors in Education, The Trend of the Teens, Every-day Problems in Teaching, The Child: His Nature and His Needs, Tobacco and Mental Efficiency.*

PAGE (*paj*), **DAVID PERKINS** (1810–1848). Born at Epping, N. H. Principal of the State Normal School at Albany. His *Theory and Practice of Teaching,* the most popular of American pedagogical books, has given him a high place among nineteenth century educators.

PAGE, WALTER HINES (1855–1918). Born at Cary, N. C.; graduated at Randolph-Macon in 1876 and afterwards studied at Johns Hopkins where he won his fellowship in Greek under Dr. Gildersleeve. In 1880 he became editor of the *Daily Gazette* in St. Joseph, Mo.; he wrote a series of articles on *Social Conditions in the Southern States* which were widely read. Later, Mr. Page was connected with a paper in Raleigh and also with the *New York Evening Post.* From 1890 to 1895, he was manager and editor of the *Forum;* was editor of the *Atlantic* for several years, and in 1899 became a member of the publishing firm of Doubleday, Page and Co., and was editor of the *World's Work,* the magazine issued by that firm. In 1913 he was appointed by President Wilson Ambassador to Great Britain, and in that position acquired international fame, and won great praise for his tact and skill in handling delicate situations.

PAINTER (*pānt'er*), **FRANKLIN VERZELIUS NEWTON** (1852–). An American educator and author. From 1878 to 1882 he was instructor in, and from 1882 till 1906, professor of modern languages at Roanoke College, Va., his alma mater; after which he became professor of pedagogy there. His educational writings, many and of unusual merit, include *A History of Education, Luther on Education, Introduction to American Literature, A History of English Literature, Lyrical Vignettes, Poets of the South, Great Pedagogical Essays from Plato to Spencer, An Ancient History,* and *Poets of Virginia.*

PALMER (*päm'ar*), **ALICE FREEMAN** (1855–1902). Born in Colesville, N. Y.; elected to the chair of history at Wellesley in 1879; acting-president the next year, and in 1882 appointed president; appointed non-resident dean of the women's department of the University of Chicago.

PALMER, GEORGE HERBERT (1842–1933). An American educator. Born in Boston; educated at Harvard and in Germany; Oxford professor of natural religion, moral philosophy, and civil polity at Harvard 1889–1913, retiring as professor emeritus; a writer on classical and pedagogical subjects, his chief works being: *New Education, Self Cultivation in English, The Glory of the Imperfect.*

PARKER (*pär'ker*), **FRANCIS WAYLAND** (1837–1902). An American educator; born in Bedford, N. H.; principal of schools in Manchester, N. H., and Dayton, Ohio; superintendent at Quincy, Mass., and supervisor in Boston, Mass. In 1883 he was made principal of the Cook County Normal School, and in 1896 of the Chicago Normal School. He was appointed president of the Chicago Institute in 1899. His publications include: *Talks on Teaching, Course in Arithmetic,* and *How to Study Geography.*

PARKIN, (*pär'kin*), **GEORGE ROBERT** (1846–1922). Principal of the Upper Canada College, Toronto (1895–1902). Author and lecturer on Imperial Federation, organizing representative of the Rhodes Scholarship Trust 1902. Publications include *Reorganization of the British Empire, Imperial Federation, Geographical Unity of the Empire, The Great Dominion,* and *The Life of Dr. Edward Thring.*

PARSONS (*pär'sanz*) **FRANK** (1854–1908). American educator. Born in New Jersey; professor of political science and economics, dean of College of Liberal Arts, Ruskin University, Mo.; director of history, Bureau of Economic Research, Washington; authority on railroads; noted lecturer on economics and sociology; wrote *Our Country's Need, The Drift of Our Time, The New Political Economy, Direct Legislation,* and other works.

PATTEN (*pat'n*), **SIMON NELSON** (1852–1922). Economist. Born at Sandwich, Ill.; educated at Northwestern University and the University of Halle, from which he received the degree of Ph. D. in 1878. He farmed, and taught in public schools for ten years; then in 1888, was appointed professor of economics at the University of Pennsylvania, where he taught for almost 30 years, retiring in 1917. Among his many writings are *The Consumption of Wealth, The Theory of Dynamic Economics, The Theory of Prosperity;* and *Heredity and Social Progress.* He was a stimulating lecturer and teacher, and did much pioneer work in the advancement of social studies.

PAYNE (*pān*), **WILLIAM HAROLD** (1836–1907). Born in New York State. Superintendent of schools for several years; professor of the art and science of teaching in the University of Michigan; chancellor of the University of Nashville and president of the Peabody Normal College; returned to the University of Michigan. His works include *School Supervision, Contributions to the Science of Education, The Education of Teachers,* and translations of several of Compayre's pedagogical books.

PEABODY (*pē'bod-i*), **ELIZABETH PALMER** (1804–1894). Born in Billerica, Mass. She became an ardent disciple of Froebel, and was one of the most active in introducing the kindergarten system into the United States. She published *Kindergarten Culture* and *Letters to Kindergartners.*

PEARSON (*pēr'son*), **RAYMOND ALLEN** (1873–1939). College president. Born at Evansville, Ind.; graduated from Cornell University in 1894; pursued special studies in agricultural science, and obtained

the Master's degree from Cornell in 1899; was assistant chief of the dairy division, United States Department of Agriculture, for seven years, professor of dairy industry at the College of Agriculture, Cornell University, from 1903 to 1908; Commissioner of Agriculture for New York State for four years; then became president of Iowa State College of Agriculture and Mechanical Arts for fourteen years; in 1926 was elected president of the University of Maryland; author of numerous articles on agricultural subjects.

PEIRCE (*pûrs*), **BENJAMIN** (1809–1880). Mathematician and astronomer. Born at Salem, Mass.; graduated from Harvard in 1829; became professor of mathematics at Harvard in 1833, and also of astronomy in 1842. After the death of Nathaniel Bowditch in 1838, Peirce ranked first among American mathematicians; his fame was increased by his researches into the perturbations of Uranus and Neptune, and his work in connection with the rings of Saturn and Neptune, he was appointed consulting astronomer for the American Nautical Almanac, and for this work prepared new tables of the moon. His best known works are *The System of Analytical Mechanics* and *Linear Associative Algebra.*

PEIRCE, BENJAMIN OSGOOD (1854–1914). Educator and physicist. Born in Beverly, Mass.; graduated from Harvard in 1876, and for several years studied at Leipzig and Berlin; in 1881 he went to Harvard as instructor, and seven years later became professor of mathematics and physics; in 1888 he was appointed Hollis professor of mathematics and philosophy, holding that chair until his death. He achieved an international reputation as one of the greatest physicists of his time. He wrote *Theory of the Newtonian Potential Functions, Table of Integrals, Experiments in Magnetism,* and numerous monographs, mostly on magnetism, for scientific journals.

PENNIMAN, JOSIAH HARMAR (1868–). College president. Born in Concord, Mass. Received his A. B. degree from the University of Pennsylvania in 1890, and his Ph. D. in 1895. The next year was appointed professor of English literature at the University of Pennsylvania, was dean of the faculty from 1897 to 1909, and in 1923 became president and provost. President Penniman was the writer of *The War of the Theatres, A Book about the English Bible,* and many articles for various magazines.

PESTALOZZI, JOHANN HEINRICH (1746–1827). A Swiss educational reformer, and the chief founder of modern pedagogy. He was, with the exception of Froebel, the greatest educational reformer since the time of the Revival of Learning. Realizing that social reform must come through education, he early allied himself with the reformers of the day. His principles were elaborated and carried out, and formed the basis of the Educational Movement of the nineteenth century. The modern enthusiasm for technical education is, for example, largely due to his teachings. In 1801 he gave a summary of his ideas on education in the book *Wie Gertrud Ihre Kinder Lehrt* ("How Gertrude teaches her children"). His great idea was to "psychologize education" (his own expression). Pestalozzi's method is to proceed from the easier to the more difficult; to begin with observation and then pass to consciousness, and from consciousness to speech. Instead of the "three R's" he would substitute language, number, and form, as the elements of education. In his masterpiece, *Leonard and Gertrude,* he centers the education in the home itself, and seeks to reform the child's first teacher—the mother. What he strove for was not the mere enlightenment of the mind, but the regeneration of the race through sounder methods of education.

PETERSON, WILLIAM (1856–1921). Born in Edinburgh, Scotland; educated at the University of Edinburgh, the University of Gottingen, and at Corpus Christi College, Oxford; was assistant professor of Humanity at the University of Edinburgh for three years; then for thirteen years, principal of University College, Dundee; from 1895 until his death, was principal of McGill University, Montreal. Under his administration the endowment was increased and the curriculum broadened; the medical department was raised to a high level, making it rank in Canada with the medical schools of Harvard and Johns Hopkins in the United States.

PHELPS (*felps*), **WILLIAM LYON** (1865–). Writer on literature; a teacher of English at Yale in 1892; and Lampson Professor of English Literature in 1901. As a lecturer and college preacher he was well known. Besides editing many books and complete novels of Jane Austen and Samuel Richardson, he wrote a score of books of criticism, some of which are *The Beginnings of the English Romantic Movements, Essays on Modern Novelists, Teaching in School and College, Browning, Reading the Bible, Human Nature in the Bible, The Twentieth Century Theatre.*

PITMAN (*pit'man*), **ISAAC** (1813–1897). Born in Trowbridge, England; attended a training school for teachers; taught for eleven years in public schools, and then opened a private school in Bath. He became interested in improving the existing systems of shorthand; the result was the invention of a system of his own which marked a new era in the development of stenography. Though afterward superseded, for the most part, by other systems, the Pitman system of shorthand was, for many years, the one most widely used.

PLATTER, THOMAS (1499–1582). Swiss educator. For thirty-seven years professor of Hebrew at Basel. His autobiography is one of the best pictures extant of the school life of that time.

PRITCHETT, HENRY SMITH (1857–1939). Was assistant astronomer at U. S. N. Observatory, and later at Morrison Observatory; professor of astronomy at Washington University, St. Louis; superintendent of the United States Coast and Geodetic Survey; elected president of the Mass. Institute of Technology in 1900 and resigned in 1906 to accept the presidency of the Carnegie Foundation for the Advancement of Teaching.

PUPIN (*pû-pēn'*), **MICHAEL IDVORSKY.** See under INVENTORS.

QUICK (*kwik*), **ROBERT HERBERT** (1831–1891). An English educator; the first to lecture at Cambridge University on the history of education; wrote *Essays on Educational Reformers,* and other educational articles. The former is still a leading text-book in the study of education.

QUINTILIAN (*kwin-til'i-an*), **(MARCUS FABIUS QUINTILIANUS)** (about 35–about 97 A. D.). A Roman rhetorician, born in Spain. Educated in Rome, he revisited Spain to teach oratory, but returned with Galba to Rome in 68. As a teacher of elocution he won great fame. Among his pupils were Pliny the Younger and the two grand-nephews of Domitian. His modern reputation is based on his great work *De Institutione Oratoria,* a complete system of rhetoric in twelve books.

RAND (*rand*), **THEODORE HARDING** (1835–1900). Canadian educationist; born in Nova Scotia. Became superintendent of education for Nova Scotia, and later was appointed to a similar post in New Brunswick; professor of history and didactics in Acadia College; professor of education and English history in the University of New Brunswick.

RAYLEIGH (*rā'li*), **BARON** (J. W. Strutt) (1842–1919). Eminent English physicist, professor at Cambridge and Royal Institute. He evaluated electric units, made many discoveries about gases at low pressures, and discovered with Ramsey the element argon. Wrote 250 learned papers. Awarded the Nobel and other prizes.

REINHARDT, AURELIA HENRY (MRS. GEORGE FREDERICK REINHARDT) (1877–). College president. Born in San Francisco, California. Miss Henry graduated from the University of California in 1898; from 1898 to 1901, was instructor in English at the University of Idaho; obtained her Ph. D. degree from Yale University in 1905. In 1909, she married Dr. George Frederick Reinhardt, and in 1914 was left a widow with two boys. From 1914 to 1916, was lecturer in English at the University of California and in 1916 became president of Mills College, Oakland, California, a leading woman's college on the Pacific coast.

RHEES (*rēs*), **RUSH** (1860–1939). College president. Born in Chicago, Ill.; graduated from Amherst College in 1883, and from the Hartford Theological Seminary in 1888; ordained a Baptist minister, and was for three years pastor of Middle St. Church, Portsmouth, N. H. In 1892 he became assistant professor, and two years later full professor at Newton Theological Institution, serving until 1900, when he was called as president to the University of Rochester. Author: *Life of Jesus of Nazareth, A Study, St. Paul's Experience as a Factor in His Theology,* and many contributions to periodicals.

RICHARDS (*rich'ardz*), **CHARLES RUSSELL** (1865–1936). American educator; director of science and technology at Pratt Institute (1888–1898); director of manual training at Teachers College, Columbia University (1898–1908); director of Cooper Union,

New York (1908–1923). In 1923 was appointed director of the American Association of Museums.

RICHARDSON (*rich'ard-son*), **CHARLES FRANCIS** (1851–1913). An American author and educator; born at Hallowell, Maine. Professor of Anglo-Saxon and English language and literature in Dartmouth College (1882–1911). Author of *A Primer of American Literature, The Choice of Books, American Literature* (2 vols.), *The End of the Beginning*, and *Daniel Webster for Young Americans.*

RIGHTMIRE, GEORGE WASHINGTON (1868–). University president. Born at Center Furnace, Ohio; graduated from Ohio State University in 1895, and afterwards was a part time student in law until 1902, being at the same time a teacher in the North High School of Columbus; he was a teacher of law in the Ohio State University from 1902 to 1925, also practicing law for much of this period. After a year as acting president, he was elected president of Ohio State University in 1926.

ROGERS (*roj'arz*), **WILLIAM BANKS** (1857–1937). Born in Cincinnati, Ohio; taught English and the classics at St. Ignatius and St. Xavier's; president of Marquette College for two years, and president of St. Louis University from 1900 to 1908 when he resigned on account of ill health.

ROLFE (*rolf*), **WILLIAM JAMES** (1827–1910). Born in Newburyport, Mass.; graduated from Amherst in 1849; for more than fifteen years was head master of high schools in the vicinity of Boston. In 1868 he gave up teaching and became editor of the *Popular Science News* and afterwards of the Shakespearean Department of the *Literary World* and the *Critic.* He wrote and compiled a dozen books on Shakespeare and by his lectures and writings did more than any other American scholar to popularize Shakespeare. He edited with notes the entire works of Shakespeare in 40 small volumes; first published in 1870–73, and revised in 1903–07. In the latter part of his life he brought out scholarly editions of Milton, Goldsmith, Scott, Wordsworth, Tennyson, Browning, and other great writers. Also wrote *Tales from English History, Tales from Scottish History, Shakespeare as a Boy, Life of Shakespeare*, and *Shakespeare's Proverbs.*

ROSS, HON. GEORGE WILLIAM (1841–1914). Canadian statesman and educator. Born in Ontario, of Scotch parentage; appointed inspector of public schools for the county of Lambton, and towns of Petrolea and Strathroy; leader in promotion of normal schools, serving as inspector of them; author of *The History of the School System of Ontario.*

ROUSSEAU (*rōō-sō'*), **JEAN JACQUES** (1712–1778). A distinguished French writer of the eighteenth century; born at Geneva. In 1762 he published *Emile*, which had a marvelous effect throughout Europe, continuing in influence upon the whole educational world to the present time. In the opening sentence of his book he sounds the keynote of all his teachings: "All is good as it comes from the hand of the Creator; all degenerates in the hands of man." The burden of his message was nature, the nature of an idealist, perhaps, but still worthy of our efforts. Rousseau presented a negative idea of moral education. "The first education consists not in teaching the principles of virtue or truth, but in guarding the heart against vice and the mind against error." With him, all education was to come by development from within, an expansion of natural powers and not an acquisition of knowledge.

RUOFF, HENRY WOLDMAR (1867–1935). Editor and author, born in Germantown, Pa., graduated from Indiana University 1890. Studied at Harvard and Columbian (now George Washington University), and later in several foreign universities. Traveled extensively in Europe, Asia, Africa. For a time he was instructor in psychology and philosophy at Pennsylvania State College. Acted as editor of *Ridgway's American Spectator* and *Nashville Tennessean* (1904–7). Member of American Academy of Political and Social Science, National Geographic Society. Through his efforts the single volume reference work has become a valuable adjunct to the school. He is either the main author or editor of *Home and State, Women in the Middle Ages, Century Book of Facts, Capitals of the World, Universal Cyclopedic Handbook, The Standard Dictionary of Facts, Masters of Achievement, The Volume Library*, and *The Circle of Knowledge.*

RUSSELL (*rus'el*), **JAMES EARL** (1864–). Born at Hamden, N. Y.; graduated from Cornell University in 1887, pursued graduate work at several German universities, and received the degree of Ph. D. from the University of Leipzig in 1894, taught in various American colleges and then was for thirty years professor of education at Teachers College, Columbia University, retiring in 1927. Author of *The Extension of University Education in England and America, German High Schools, Trend of American Education;* editor of the *American Teachers' Series*, and contributor of numerous articles to educational journals.

SCHURMAN (*shur'man*), **JACOB GOULD** (1854–). Born on Prince Edward Island, Canada, and won the Canadian Gilchrist scholarship to the University of London, from which he was graduated in 1877, with further studies in Germany and Italy. He was professor of philosophy at Acadia College, and Dalhousie College, Nova Scotia, for six years and then went to Cornell, where he was Sage Professor of Philosophy from 1886 to 1892, and president from 1892 to 1920. Dr. Schurman spent much of 1899 in the Philippines as president of the U. S. Commission; from 1912 to 1913, he was minister to Greece and Montenegro; and from 1921 envoy to China. In 1925 he was appointed ambassador to Germany.

SCOTT (*scŏt*), **WALTER DILL** (1869–). College president. Born at Cooksville, Ill.; graduated from Northwestern University in 1895, and from McCormick Theological Seminary in 1898; continued his studies in Germany and received the Ph. D. degree from the University of Leipzig in 1900; for nineteen years, from 1901 to 1920, he was professor of psychology and education at Northwestern University, and was then elected president. Author of *Theory of Advertising, Influencing Men in Business, Personnel Management;* authority on the application of psychology to business and business affairs.

SEAVER, EDWIN PLINY (1838–1917). American educator, born in Northborough, Mass. He taught in the Boston schools and was superintendent of the same schools for fourteen years; was a member of the American Academy of Arts and Sciences, and the Massachusetts Historical Society. Author of the *Franklin Arithmetic, Algebra*, and *Trigonometry*, and the *Mathematical Handbook.*

SEELYE (*sē'lĭ*), **JULIUS HAWLEY** (1824–1895). President of Amherst College (1879–1890) and inaugurated the "Amherst system" of self-government; wrote a translation of Schwegler's *History of Philosophy; The Way, the Truth, the Life*, etc.

SEELYE, LAURENUS CLARK (1837–1924). Born in Connecticut. Pastor of North Congregational Church at Springfield, Mass.; later professor of rhetoric and English literature at Amherst College; first president of Smith College (1873–1909).

SEERLEY, HOMER HORATIO (1848–). Became president of Iowa State Normal School in 1886. Received degrees from Iowa State University and Penn College. Superintendent of schools, (1875–1886), Oskaloosa, Ia.; president Iowa State Teachers' Association (1884), and the department of Normal Schools in N. E. A. (1898); member of many educational societies.

SHAHAN (*shā'ăn*), **THOMAS JOSEPH** (1857–1932). University rector. Born at Manchester, N. H.; educated at Montreal College and the American College at Rome; ordained to the Roman Catholic priesthood in 1882, and later, continued his studies in Paris and Berlin. He was, from 1891 to 1909, professor of church history and petrology at the Catholic University of America, and in 1909, was chosen president. Author of various books and addresses on religious and historical subjects.

SHANKLIN (*shank'lĭn*), **WILLIAM ARNOLD** (1862–1924). College president. Born in Carrollton, Mo.; educated at Hamilton College and the Garrett Biblical Institute at Evanston, Ill.; entered the Methodist Episcopal ministry, and served in various pastorates. In 1905, became president of Upper Iowa University; four years later, he became president of Wesleyan University and after fourteen years of service retired in 1923 as president emeritus. He was a member of the Connecticut State Board of Education, of various commissions, and the recipient of many honorary degrees.

SHOREY, PAUL (1857–1934). University professor. Born at Davenport, Ia.; graduated from Harvard in 1878; studied at various German universities, at the American School of Classical Studies at Athens, and in 1884 received the degree of Ph. D. from the University of Munich; was professor of Greek at Bryn Mawr College from 1885 to 1892. In 1892 he became professor of Greek at the University of Chicago, and in 1896 was made head of the depart-

ment; recipient of numerous honorary degrees; a leading authority on Greek language and literature; Turnbull lecturer on poetry at Johns Hopkins University in 1912, and Roosevelt professor at the University of Berlin, 1913–1914, president of the American Philological Association in 1910. Author of *The Idea of Good in Plato's Republic, The Odes and Epodes of Horace, The Assault on Humanism,* and others.

SLOCUM (*slō'kum*), **WILLIAM F.** (1851–). Born at Grafton, Mass.; president of Colorado College from 1888 to 1917, retiring a president emeritus; extensive writer on sociology.

SMITH (*smith*), **ADAM** (1723–1790). Economist. Born at Kirkcaldy, Scotland, and attended the grammar school there; spent three years at the University of Glasgow; in 1740 received a Snell Exhibition at Balliol College, Oxford, where he was a student until 1746. Returning to Scotland, he gave courses of lectures on economics and literature; in 1751 he became professor at Glasgow, and continued there until 1763; in 1759 he published his celebrated book on the *Moral Sentiments,* in which he elaborated a theory of ethics based on sympathy. In 1763, Charles Townsend prevailed on him to resign his chair at the University of Glasgow, and he became tutor to the young Duke of Buccleugh during a three years' trip in Europe; during these three years, Smith stayed longest at Paris and Toulouse, and met many eminent scholars; returning home in 1766, he continued work on his book, *The Wealth of Nations,* begun previously in France; and finally published in 1776. This book widely extended his fame and soon became a classic. Smith may be said to be the founder of economics as a science; the influence of *The Wealth of Nations* is without parallel in economic literature; the 150th anniversary of its publication was celebrated by the University of Chicago in 1926.—See also under AUTHORS.

SMITH, NORA ARCHIBALD, American author of kindergarten and children's books, born at Philadelphia. She taught in Mexico and Arizona and in 1880 entered kindergarten work in San Francisco, part of the time as superintendent; author of *Children of the Future, Kindergarten in a Nutshell, The Message of Froebel, Kindergarten Principles and Practice, Golden Numbers, The Posy Ring, The Fairy Ring,* and many others.

SPENER (*spē'nar*), **PHILIPP JAKOB** (1635–1705). Founder of the German Pietists; born in Alsace; in 1670 held meetings at his house to cultivate greater evangelical piety; reformed the methods of catechising and religious instruction for children; his ideas were practiced later by Francke.

STEINER (*shtai'nar*), **EDWARD ALFRED** (1866–). Sociologist. Born in Czechoslovakia, educated in public schools, in the gymnasium of Pilsen, Bohemia, and the universities of Heidelberg, Göttingen, and Berlin; was minister of various Congregational churches from 1891 to 1903; became professor of Applied Christianity at Grinnell College in 1903. Author of *Tolstoy, the Man, On the Trail of the Immigrant, From Alien to Citizen, The Eternal Hunger,* and other sociological works. The keynote of his work is the application of the principles of Christianity to life.

STONE (*stōn*), **MELVILLE ELIJAH** (1848–1929). Journalist. Born at Hudson, Ill.; graduated from the Chicago High School in 1867; later, was the recipient of honorary degrees from five colleges. He became a reporter on the *Chicago Tribune* in 1864; ran a machine shop from 1869 to 1871, but was burned out in the Chicago fire of 1871; established the *Daily News* in 1875 and in 1881, *The Chicago Morning News;* sold his interest and that of his partners in both these papers to Victor F. Lawson, under whose management these combined papers became one of the most successful and prosperous newspaper properties in the whole world. Mr. Stone then spent three years in travel in Europe; on his return, he became identified with the banking business for several years. In 1893 he became general manager of the *Associated Press,* holding this position until 1921, when he retired from office but continued his connection as an adviser. Mr. Stone was one of the best known and liked newspaper men in the world.

STRONG, FRANK (1859–1934). Born in Venice, N. Y. Principal of the High School, St. Joseph, Mo.; superintendent of schools at Lincoln, Neb.; lecturer on history at Yale; president of the University of Oregon (1899–1902); chancellor of the University of Kansas from 1902 to 1920, then became professor of constitutional law; author of *Life of Benjamin Franklin, A Forgotten Danger to the New England Colonies, Causes of Cromwell's West Indian Expedition,* and *Government of the American People.*

STRAYER, GEORGE DRAYTON (1876–). Born at Wayne, Pa.; graduated at Johns Hopkins University in 1903, received the Ph. D. degree from Columbia University in 1905; taught in the public schools before completing his college course; in 1905 became instructor, and in 1910 professor of educational administration in the Teachers College of Columbia University; director of numerous educational surveys and member of various educational associations. Author of *The Teacher Process, Retardation and Elimination in Schools and Colleges,* editor of the *American Educational Series* and of the *Journal of Educational Research.*

STURM (*stürm*), **JOHANN** (1507–1589). The most renowned teacher of his age, who has left his mark on the secondary school system of all northern Europe; born in Germany; reorganized the educational system of Strassburg. His plan aimed at an extended, systematic, and well-balanced course of study. His method of teaching Greek and Latin was by double translation. The important pedagogic ideas in his method were: Subjects to be kept within range of pupils' ability; all teaching to be clear and definite; little at a time; all instruction should have an ethical and a spiritual side. The instruction in our classical preparatory schools of the United States still shows Sturm's influence in a marked degree, possibly tracing its origin through English public schools like Eton, Rugby, and Harrow.

SUZZALO (*sū'zä-lō*), **HENRY** (1875–1933). Born at San Jose, Calif.; graduated from Leland Stanford University in 1899, and received his Ph. D. from Columbia in 1905; was a member of the department of education at Leland Stanford from 1902 to 1907; then went to Columbia, where in 1909 he was appointed professor of the philosophy of education. He was elected president of the University of Washington in 1915 and retired in 1926. Afterward indentified in various official capacities with the Carnegie Foundation for the Advancement of Teaching; editor of the *Riverside Educational Monographs;* lecturer on educational topics.

SWEET (*swēt*), **HENRY** (1845–1912). English philologist; foremost British authority on phonetics as well as a distinguished Anglo-Saxon scholar. He has contributed largely to both subjects; in particular, his works on phonetics have done much to foster more scientific methods in the study and teaching of modern languages.

TARR, RALPH STOCKMAN (1864–1912). Born at Gloucester, Mass.; at 18 he became connected with the United States Fish Commission and the Smithsonian Institute; later, he attended the Lawrence Scientific School (Harvard) and graduated in 1891. For the remaining twenty years of his life he was a member of the geology department at Cornell University, first as assistant professor of geology, then professor of dynamic geology and physical geography and after 1906, professor of physical geography. He was special field assistant, United States Geological Survey from 1903 to 1912. He wrote several standard textbooks widely used in schools and colleges—*Economic Geology of the United States, Elementary Physical Geography, Elementary Physical Geology, Tarr and McMurry Geographies* (with F. M. McMurry).

TAUSSIG, FRANK WILLIAM (1859–1940). Political economist, received his A. B., A. M., LL. B., and Ph. D. at Harvard, where he became professor of political economy in 1892, having served as instructor and assistant professor from 1882. Being a recognized authority on the tariff, he was appointed Chairman of the U. S. Tariff Commission in 1917 and served till 1919. He is the editor of the *Quarterly Journal of Economics.* Some of his publications are *Tariff History of the United States, Wages and Capital, Some Phases of the Tariff Question, Free Trade, the Tariff and Reciprocity.*

TERTULLIAN (*tar-tul'i-an*), **(QUINTUS SEPTIMIUS FLORENS TERTULLIANUS)** (about 160–about 230). An early Father of the Church; born in Carthage, son of a Roman centurion; converted to Christianity; he was a man of great originality and genius, and his writings display great wit, keen imagination, and profound learning. His chief work is the *Apologeticus,* a weighty defense of Christianity.

THOMAS (*tom'as*), **JOHN MARTIN** (1869–). College president. Born at Point Covington, N. Y.; graduated from Middlebury College, Vt., in 1890, from

the Union Theological Seminary in 1893, and later pursued graduate study at the University of Marburg. He was pastor at East Orange, N. J., from 1893 to 1908; was president of Middlebury College from 1908 to 1921; president of Pennsylvania State College 1921 to 1925, and in 1925 was elected president of Rutgers University. Author of *The Christian and the Old Testament*, and of various addresses on educational topics.

THOMAS, M. CAREY (1857–1935). Born at Baltimore, Md.; the first woman to receive the Doctorate of Arts at an European university; in 1885 appointed professor of English, and president of Bryn Mawr College 1894 to 1922, then retired as president emeritus.

THRING (*thrin*), **EDWARD** (1821–1887). A famous schoolmaster, head of Uppingham School, England, from 1853 until his death; pioneer of many important reforms in secondary education and public school life; first head master in England to evince sympathy with the liberal education of girls. To English composition, pursued *pari passu* with composition in foreign languages, he assigned a foremost place, while he held the opinion that English grammar, taught inductively and analytically, provided the very best basis for language training. His writings include *Education and School*, which sets forth his matured opinions on educational methods. Other books are: *The Theory and Practice of Teaching, Exercises in Grammatical Analysis*, also *School Sermons and Songs*.

THWING (*twing*), **CHARLES FRANKLIN** (1853–1937). Born in Maine; president of Adelbert College and Western Reserve University from 1890 to 1921. His publications include: *American Colleges, The Reading of Books, Within College Walls, The American College in American Life*.

TRENT (*trent*), **WILLIAM PETERFIELD** (1862–1939). Born at Richmond, Va.; educated at the University of Virginia, (A. M. 1894) and at Johns Hopkins University; was professor of English at the University of the South from 1888 to 1900, then went as professor of English to Columbia University. He was the editor of the *Swanee Review* from 1892 to 1900; also, editor of numerous editions of the works of the best English and American writers. Author of *English Culture in Virginia, Authority of Criticism* and others; a leading authority on the life and works of Defoe.

TRUMBULL (*trum'bul*), **HENRY CLAY** (1830–1903). Religious educator. Born in Stonington, Conn.; educated at Stonington Academy and Williston Seminary; was engaged in railroad business until nearly thirty, then became a missionary of the Connecticut State Sunday School Society; was ordained a Congregational minister, and served as Chaplain of the Tenth Connecticut Regiment from 1862 to 1865. Afterwards, he was for more than twenty-five years (1875–1903), editor of the *Sunday School Times*. He wrote numerous books on Sunday School work and for Sunday School libraries: *A Model Superintendent, Teaching and Teachers, Hints in Child Training, Teachers' Meetings*.

TUCKER (*tuk'ar*), **WILLIAM JEWETT** (1839–1926). Born at Griswold, Conn.; professor at Andover, and founder of Andover House, a social settlement, in Boston; president of Dartmouth College from 1893 to 1909; author of *From Liberty to Unity* and *The Making and the Unmaking of the Preacher*.

TYLER (*tai'lar*), **MOSES COIT** (1835–1900). Educator. Born at Griswold, Conn.; graduated from Yale in 1857; studied theology, and was for some years in the active ministry; in 1867 he became professor of English at the University of Michigan, and from 1881 until his death, was professor of American history at Cornell. In 1878 he published *History of American Literature during the Colonial Time*, in two volumes, which won for him a wide reputation; this was followed by *A Literary History of the American Revolution*, and *Three Men of Letters* (Bishop Berkley, President Dwight, and Joel Morley); these three works carry the story of American literature to about the beginning of the nineteenth century, and form so complete a study of early American literature that they are not likely to be superseded. Professor Tyler also wrote a biography of *Patrick Henry* for the American Statesmen series.

UPSON (*up'san*), **ANSON JUDD** (1823–1902). Born in Philadelphia, Pa.; professor of logic and rhetoric from 1853 to 1870; in 1890 became chancellor of the University of the State of New York.

VAN DYKE, JOHN CHARLES (1856–1932). Authority on art, became librarian of Rutgers College in 1878 and professor of the history of art in 1888. Studied art extensively in European galleries. Author of *How to Judge of a Picture, Art for Art's Sake*, a discussion of the province of painting, *The Desert* and *The Opal Sea*, descriptions of the beauties of nature, *The Grand Canyon of the Colorado, Rembrandt and His School*, a discussion partly of the genuineness of certain pictures attributed to Rembrandt, *History of Painting*.

VAN HISE (*văn hīs'*), **CHARLES RICHARD** (1857–1918). Educator and geologist; born at Fulton, Wis. Held the following appointments in the University of Wisconsin; instructor of chemistry and metallurgy, assistant professor of metallurgy, of mineralogy, and of archean and applied geology; professor of geology; elected president of the University (1903). He is the author of a number of books and papers on geological subjects: *Archean and Algonkian, Principles of North American Pre-Cambrian Geology, Some Principles Controlling the Deposition of Ores*.

VEBLEN (*vĕb'lĕn*), **THORSTEIN B.** (1857–1929). Born on a farm in Minnesota, was brought up under pioneer conditions; educated at Carleton College, Minn., where he was a student of John Bates Clark, and received his A. B. in 1880, after taking the examinations of Junior and Senior years together; was a graduate student at Johns Hopkins University, and at Yale University; from Yale, he received the Ph. D. degree in 1884, and was awarded a university prize for an essay on the panic of 1837; studied at Cornell University during the year 1891–92, and then accompanied Professor Laughlin of that institution to the University of Chicago, where he was successively fellow, instructor, and professor in political economy from 1892 to 1906; he taught at Leland Stanford University for three years, at the University of Missouri for seven years, and at the New School for Social Research, from 1918 to 1926. Dr. Veblen was one of the most brilliant and interesting American economists of his day; besides teaching, he wrote many books, among them, *The Theory of the Leisure Class, The Instinct of Workmanship, The Theory of Business Enterprise, The Vested Interests, The Place of Science in Modern Civilization and Other Papers*.

VEGA (*vā'gä*), **GARCILASO DE LA,** called **"INCA"** (1535?–1616). Early Peruvian historian. Born in Cuzso; his father was a Spaniard, his mother of the Peruvian blood-royal; Vega was very proud of his descent and claimed the right to the title of Inca. In 1560 he moved to Spain, hoping to obtain a lucrative office; in this he was disappointed, and turned to writing the history of his native land. His history of Peru is the first contribution of a South American to Spanish literature; it is in two parts, and the second, *Cordova*, was translated into English, French, German, and Italian; written before the days of scientific history, much romance is mingled with fact.

VIETOR (*fī'ē-tōr*), **WILHELM** (1850–). German professor of philosophy in Marburg; one of the pioneers of modern language teaching by the "New Method" (*die neuere Richtung*); the author of many recognized works in modern language teaching, one of the best-known being *Elements of Phonetics* in German, English, and French.

VINSON, ROBERT ERNEST (1876–). University president. Born at White Oak, S. C.; educated at Austin College and at Virginia Union Theological Seminary; preached in various Presbyterian churches; was professor at Austin College from 1902 to 1916; served as president of the University of Texas from 1916 to 1923, and in 1923 was elected president of Western Reserve University; the recipient of many honorary degrees.

VIVES (*vī'vēs*), **GIOVANNI LUDOVICO** (1492–1540). Born in Spain; considered the most learned man of his time. After being tutor to the children of Ferdinand and Isabella he lectured at Paris and at Oxford, and taught Latin to Mary, future queen of England. He wrote several pedagogical books, *The Instruction of a Christian Woman* being the most popular book of the age.

WASHBURN (*wŏsh-bûrn*), **GEORGE** (1833–1915). American clergyman and educator; missionary in Turkey under the American Board of Commissioners for Foreign Missions (1858–1868); professor of philosophy and acting president of Robert College, Constantinople (1870–1877); president of Robert College from 1877 until his return to the United States in 1903.

WASHINGTON (*wash'in-tan*), **BOOKER TALIAFERRO** (1859–1915). American negro educator; born a slave in Virginia. In 1879 was appointed instructor in Hampton Institute, and introduced the night school, of which he took charge. In 1881 was appointed by the state to establish a colored industrial and normal school at Tuskegee, Ala., of which he became the successful principal. He was known as an interesting and effective speaker, and for his work in uplifting his race. He wrote *Up from Slavery* and *Character Building*.

WAYLAND (*wē'land*), **FRANCIS** (1796–1865). An American educator and author; was graduated at Union College in 1813; assumed the presidency of Brown University in 1827, retiring after 28 years of service. He published several books regarding education, political economy, and religion.

WELLS (*welz*), **BENJAMIN WILLIS** (1856–1923). American educator and editor; professor of modern languages at the University of the South (1891–1898). Besides numerous French and German text-books, he published *Modern German Literature*, *Modern French Literature*, and *A Century of French Fiction* (1898).

WELLS (*welz*), **WEBSTER** (1851–1916). Mathematician and educator; born in Boston, Mass.; was graduated at the Massachusetts Institute of Technology in 1873, became associated with the department of mathematics in that institution, and was made full professor of that subject in 1893. His publications include *Logarithms* (1878), *University Algebra* (1878), *Plane and Spherical Trigonometry* (1884), *College Algebra* (1890), *Essentials of Algebra* (1890), *Complete Trigonometry* (1900), and numerous other educational books.

WENDELL (*wen'del*), **BARRETT** (1855–1921). Born in Boston, Mass.; graduated from Harvard in 1877; in 1880 he began teaching at Harvard, commencing as instructor, and in 1898 attaining the rank of professor of English, retiring in 1917, after nearly forty years of service. He lectured in France and England, and ranked among the foremost teachers of English literature of his day. Among his many books are *William Shakespeare, a Study in Elizabethan Literature*, *A Literary History of America*, *The Temper of the Seventeenth Century in English Literature* (Lectures given at Trinity College, Cambridge in 1902, '03, '04); *The France of Today*, *The Privileged Classes*, *The Mystery of Education*.

WEST (*wĕst*), **ANDREW FLEMING** (1853–). Born at Alleghany, Pa.; graduated from Princeton University in 1874; in 1883 became professor of Latin at Princeton, and in 1901 was appointed dean of the graduate school. Professor West was the founder and protagonist of the Princeton graduate school, and its high rank is largely due to his policies. Author of *Alcuin and the Rise of the Christian Schools*, *American Liberal Education*, *The Proposed Graduate College of Princeton University*; also, contributor to scientific publications.

WHEELER (*hwēl'ar*), **BENJAMIN IDE** (1854–1927). Born at Randolph, Mass.; instructor at Brown and Harvard; professor of comparative philology and of Greek at Cornell and at Athens, Greece; president of University of California since 1899; wrote *The Greek Noun-Accent* and *Organization of Higher Education in the United States*.

WHEELOCK, ELEAZER (1711–1779). American educator; graduate of Yale College (1833); pastor (1735); 1754, opened a school to Christianize the Indians, with two Indian boys; 1764, increased to 30 pupils, mostly white youths; 1770, located the school at Dartmouth, N. H.; a charter from George III. gave it the title of college; in recognition of Lord Dartmouth's aid, called Dartmouth College.

WILLARD (*wil'ard*), **EMMA** (1787–1876). Educator. Born at Berlin, Conn.; began teaching at the age of sixteen; when only twenty, she became principal of a girls' school in Middlebury, Vt., and later opened a boarding school of her own. In 1819 she published *A Plan for Improving Female Education*, which so impressed Governor Clinton that he invited her to establish a school in New York State. The result was the founding at Troy in 1821 of the Troy Female Seminary, of which Miss Willard was for many years principal. After 1858, she spent most of her time lecturing on educational subjects throughout the country, and she aroused an interest in providing better education for women. Several of the textbooks she wrote were widely used in the schools up to the time of her death; among them were *Ancient Geography*, *Morals for the Young*, *Astronomy*; she also wrote a book of poems, the best known being, *Rocked in the Cradle of the Deep*.

WILSON (*wil'san*), **WOODROW.** See under RULERS AND STATESMEN.

WIRT (*wûrt*), **WILLIAM A.** (1874–1938). Since 1907 has been superintendent of schools at Gary, Ind., where he has perfected a system of education by which classes alternate between a regular and special teacher. This has been tried in New York and many other places under various names, such as the Duplicate System, Gary System, Study Play School. It adds 40 per cent to the use of school rooms and 20 to the school time, without increase of teachers.

WITHERSPOON (*with'ar-spūn*), **JOHN** (1723–1794). College president. Born at Gifford, Scotland; educated at the University of Edinburgh (M. A., 1739), and completed his theological studies there in 1743. For twenty-three years he was pastor of Presbyterian churches in Scotland, becoming renowned as a theologian and publishing many essays and sermons. In 1868 he accepted a second call to become president of Princeton, then the College of New Jersey. Under his administration the young college advanced greatly in standing. He broadened the curriculum, provided scientific equipment, and obtained an increased endowment. He was enthusiastic in his support of the colonial cause when the troubles with England began; he was a member of both the First and the Second Continental Congress and was the only clergyman to sign the Declaration of Independence.

WOOLLEY (*wul'i*), **MARY EMMA** (1863–). College president. Born at Norwalk, Conn.; graduated from Brown University, A. B., 1894 and A. M., 1895; taught at Wellesley College from 1895 to 1900; was elected president of Mount Holyoke College in 1900. Author of *Early History of the Colonial Post Office*, *Development of Love of Romantic Scenery in America*, etc.; contributor of articles on educational subjects to various magazines, and member of numerous learned societies.

WRIGHT, CARROLL DAVIDSON (1840–1909). An American economist, statistician, and educator; born in Dunbarton, N. H.; United States commissioner of labor (1885–1902); member of the anthracite coal strike commission (1902); one of the original trustees of the Carnegie Institution; president of the College Department of Clark University, Worcester, Mass.; wrote *The Industrial Evolution of the United States*, *Outline of Practical Sociology*, and numerous essays.

WRONG (*rông*), **GEORGE MACKINNON** (1860–). Born in Canada; educated at University and Wycliffe Colleges, Toronto, and in Germany. In 1894 he became professor of history in the University of Toronto, and served for more than thirty years, retiring as professor emeritus in 1927. Among his books are *The British Nation: A History*, *The Earl of Elgin*, *The Fall of Canada*, *The Conquest of New France*, *Washington and His Comrades in Arms*, *The Rise and Fall of New France*.

WYSS (*vis*), **JOHANN** (1781–1830). Born at Bern, Switzerland; became professor and chief librarian of the university of his native town. He was a collector of Swiss fairy tales and folklore, wrote *Idyllen und Erzahlungen aus der Schweiz* (Idyls and Tales of the Swiss), and edited the fifteen volume collection *Alpenrose*. He is best remembered, however, as the author of *Der Schweizerische Robinson*, first translated into English as *The Swiss Family Robinson* in 1820, and since appearing in many editions; he also wrote the Swiss national hymn, *Rufst du, mein Vaterland?*

YOUNG (*yun*), **ELLA FLAGG** (1845–1918). Superintendent of Chicago schools (1909); a teacher 47 years; district superintendent (1887–1899); professor of education, University of Chicago (1899–1905); principal of Chicago Normal School (1905–1909); member of Illinois State Board of Education since 1888; president of Illinois State Teacher's Association (1910); editor and author; president of N. E. A. (1910–1914).

ADDINGTON, HENRY, FIRST VISCOUNT SIDMOUTH (1757–1844). English chancellor of the exchequer; born at Reading; graduated at Brasenose, Oxford, and was admitted to the bar (1784). Speaker of the House of Commons (1789–1801); premier and chancellor of the exchequer (1801–1804); was raised to the peerage and served as president of the council (1805, 1806, 1807). He subsequently filled the office of home secretary, and was a member of the cabinet from 1822 to 1824.

ALDRICH (*ôl'drich*), **WINTHROP W.** (1885–). Financier. Born at Providence, R. I.; son of Nelson W. Aldrich, United States senator from Rhode Island for many years, who served as chairman of the National Monetary Commission and was recognized as a financial authority. Winthrop Aldrich is a brother-in-law of John D. Rockefeller, Jr. He is a graduate of Harvard College and Harvard Law School and was admitted to the New York bar in 1912. Became identified with numerous corporations as adviser and director. He is now president of the Chase National Bank, the largest bank in the world, formed in 1930 by the merging of the Chase National Bank, the Equitable Trust Company, and the Interstate Trust Company.

ASTOR, JOHN JACOB. See under CAPTAINS OF INDUSTRY.

ASTOR, JOHN JACOB (1864–1912). Capitalist. Born at Rhinebeck, N. Y., the fourth of the name in America. He was a graduate of Harvard and spent two years in foreign travel. In 1897 he built the Astoria section of the famous Waldorf-Astoria Hotel. During the Spanish American War, he rendered signal services to the Government and at its close, the rank of brevet colonel was conferred for "faithful and meritorious services." Mr. Astor was fond of experimenting in mechanics and invented among other things a bicycle brake and an improved turbine engine. Much of his time was given to the management of the enormous fortune, founded by the first John Jacob Astor. He was director of many corporations. Returning from a trip to Europe, he was lost on the ill-fated *Titanic;* many survivors testified that in the catastrophe he displayed great coolness and courage.

ASTOR, WILLIAM WALDORF (1848–1919). Capitalist; born in New York; great grandson of John Jacob, who laid the foundation of the Astor fortune. At his father's death (1890) William inherited his personal fortune estimated at about $100-000,000; United States minister to Italy (1882–1885); settled in England (1890), became sole owner of the *Pall Mall Gazette* (1893), and *Pall Mall Magazine;* built the Waldorf hotel in New York, which with the Astoria built by his cousin, John Jacob Astor, forms one of the most costly hotels in the world.

BABSON, ROGER W. (1875–). Financier and statistician. Born at Gloucester, Mass.; educated at the Massachusetts Institute of Technology. He was the originator of the theories of action and reaction, of the long pull and the short pull and the use of statistics in the buying and selling of stocks. He was founder of the Babson Statistical Organization at Wellesley Hills, Mass., with branch offices in 25 American cities; also, of the Babson Institute for the training of young men in business administration. He is director in half a dozen different corporations; writer and lecturer on financial and economic subjects. His theories are worked out in his books on *Business Barometers* and *Selected Investments.*

BACHE (*bäch*), **JULIUS SEMON** (1861–). Financier. Born in New York City. At 19 he began as cashier with Leopold Kahn & Co., bankers. In 12 years he had become head of the firm, the name of which was then changed to J. S. Bache & Co. This firm became one of the largest stock brokerages in the world.

BAKER, GEORGE FISHER (1840–1937). Capitalist and philanthropist. Born in Troy, N. Y. Later the family moved to Williamsburg, L. I., where he attended school. At 18, he became clerk in the State Banking Department where he worked seven years, becoming known as the best informed clerk in the department. When the First National Bank of New York was organized, shortly after the passage of the National Banking Act, Mr. Baker used his savings to buy 30 shares of its stock, and in 1868 became active head of the institution, a position he retained for many years. In 1882 he began his railroad career—buying a road when it was in a run-down condition and building it up until it was prosperous and a paying property. He had large interests in many big corporations; in 1929 he was listed as the second largest stockholder of the American Telephone and Telegraph Company. Of the great wealth he accumulated, Mr. Baker gave generously $2,000,000 to the Memorial Library at Dartmouth, $5,000,000 to the Graduate School of Business Administration at Harvard, a student dormitory and a chemical laboratory at Cornell, and many other donations.

BALFOUR (*bäl'fo͝or*), **ARTHUR JAMES.** See under RULERS AND SATESMEN.

BANNARD, OTTO TREMONT (1854–1929). Financier. Born in Brooklyn; graduated from Yale in 1876 and from the Columbia Law School in 1878; practiced law in New York for eleven years. Director of many corporations and president of the New York Trust Company.

BARUCH (*bă'rŭk*), **BERNARD M.** (1870–). Financier. Graduated from the College of the City of New York in 1889 and was a member of the New York Stock Exchange for many years, where he amassed a large fortune. During the World War, served as an economic and financial expert on many commissions and attended as a delegate on the American Peace Commission which took part in drawing up the Versailles Peace Treaty at Paris in 1919. Gave the funds for the International Institute of Politics at Williams College.

BELMONT, AUGUST (1853–1924). Banker; born in New York; head of August Belmont & Company, the American representatives of the European banking firm of Rothchilds; chairman board of directors of several construction companies; president Cape Cod Construction Company; trustee of savings banks and insurance companies; director of a number of railroads, steamship lines, real estate companies, and other corporations.

BELMONT, OLIVER HAZARD PERRY (1858–1908). Capitalist; born in New York; educated at United States Naval Academy, and served two years in the navy. Was member August Belmont & Company; published *The Verdict;* delegate Democratic National Convention (1900); member Congress (1901–1903), 13th New York district.

BISMARCK. See under RULERS AND STATESMEN.

BLAND. See under RULERS AND STATESMEN.

BOUTWELL. See under RULERS AND STATESMEN.

BRISTOW, BENJAMIN HELM (1832–1896). A United States secretary of the treasury; born in Elkton, Ky.; practised law until the outbreak of the Civil War, when he entered the service of the Union army; was made United States solicitor general (1870), and was secretary of the treasury (1874–1876); was defeated for the Republican presidential nomination (1876), and spent the remainder of his life in the practice of law; as secretary of the treasury his part in the prosecution of the "Whiskey Ring" made him well known as a reformer.

BROWN, ALEXANDER (1764–1834). Merchant and banker. Born in Ballymena, Ireland; in 1800 he came to America, bringing with him the oldest of his four sons, and settled in Baltimore; two years later he sent for the rest of the family. Starting in a small way as an importer of Irish linen, his business rapidly expanded and, from a mercantile house, developed into a merchant banking house. Mr. Brown's extensive importations and exportations made it profitable for him to buy and build ships; thus he became a large ship owner. He soon acquired great wealth and from his home in Baltimore directed his banking, trading, and importing operations, the movement of his ships, and his world wide commercial activities. One after another he took his sons into partnership. William, the oldest, went to Liverpool and started the firm later known as Brown, Shipley and Company; John A. went to Philadelphia and organized the firm which later became Brown Bros. & Co.; while James (q. v.) went to New York and founded there the present firm of Brown Bros. and Company; George remained in Baltimore, and, after his father's death, became head of the parent firm. Alexander Brown was

active in whatever concerned the welfare of his adopted city; he helped to incorporate the Maryland Institute of Art and to erect the first monument in the country to George Washington; he was also one of the founders of the Baltimore and Ohio Railroad. He was one of the first of America's millionaires, leaving an estate estimated at $2,000,000, a great sum in those days. The firm he established, Alexander Brown & Sons, now the oldest private banking house in the United States, still exists in Baltimore as one of the most substantial institutions. The branches founded by his sons in London, Philadelphia, and New York are today directed by his descendants and known throughout the world.

BROWN, JAMES (1791–1877). Banker. Born in Scotland; the youngest of the four sons of Alexander Brown (q. v.). He came to America in 1802 with his brothers, George and John. Like his brothers he became a member of his father's firm, Alexander Brown & Sons. In 1825, the year in which the Erie Canal was opened, James was sent to New York to do business under the firm name of Brown Bros. & Co.; he made this house one of the most influential in the country, his business growing to such immense proportions that eventually his firm broke with the parent company. He guided the New York house successfully through several periods of business depression, and during the critical period of the Civil War he was the most influential member of the family. He was interested in local philanthropies; was one of the founders of the Association for the Improvement of the Poor and of the Presbyterian Hospital, and from its beginning was a trustee of Union Theological Seminary.

CAMPHAUSEN, OTTO VON (1812–1896). Great German financier; born at Hünshoven; was educated at the universities of Munich, Berlin, Heidelberg, and Bonn, giving special attention to law and political economy; from 1834 to 1845 he held several government positions of minor importance, but in the latter year he was made privy councilor of finance; from 1849 to 1852 was a member of the second Prussian Chamber, and now began to use his large fortune for the encouragement of literature and art, and for the support of charitable institutions; the resignation of Baron von der Heydt (1869) led Bismarck to name him as chancellor of the exchequer; the position was accepted, and Camphausen's administration (1869–1878) brought the finances of the country to a prosperous condition, an act which showed ability of the highest order; but the opposition of the Liberals and the continued conflict with Bismarck, caused by his free trade principles, finally resulted in Camphausen's resignation.

CHASE, SALMON. See DICTIONARY OF LEADING JURISTS.

CHILDERS, HUGH CULLING EARDLEY (1827–1896). English chancellor of the exchequer; born in London; was graduated at Cambridge (1850), and was commissioner of trade and customs in Victoria, Australia, until 1857; returning to England he was first lord of the Admiralty under Gladstone (1868–1871), secretary of war (1880–1882), and chancellor of the exchequer (1882–1885); was home secretary in the Gladstone ministry of 1886.

CLARENDON, EDWARD HYDE, EARL OF (1609–1674). An English chancellor of the exchequer; born at Dinton, Wiltshire; prepared for the church at Magdalen College, Oxford, graduating in 1626; leaning toward letters rather than his chosen profession, he became acquainted with the literary men of the period; sat in both the Long and Short Parliaments, and in 1643 he was made privy councilor, chancellor of the exchequer, and knighted; was active in opposing the execution of Charles I., and became lord chancellor (1658), the appointment being confirmed at the time of the Restoration; was made chancellor of Oxford University (1660), and the following year received the titles of viscount Cornbury and earl of Clarendon; his administration witnessed the settlement of many important questions, but the ill success of some of his projects, together with court intrigue, led to his complete downfall (1667); the remainder of his life was spent in exile.

CLEWS, HENRY (1830–1923). Banker; born at Staffordshire, England; entered mercantile life in New York at 15; member firm Stout, Clews & Mason (1858); later Livermore, Clews & Company; organized firm Henry Clews & Company (1877); was connected with many city institutions and financial corporations.

COLGATE, JAMES BOORMAN (1818–1904). Financier. Born in New York City, son of William, the pioneer soap manufacturer. At 16 he went to work in the commission house of Boorman, Johnson & Co. In 1852 formed a stock brokerage partnership with John B. Trevor under the name of Trevor and Colgate; the name was changed in 1873 to James B. Colgate, which is still retained. During the early stages of the resumption of specie payment after the Civil War, the firm conducted the largest specie and bullion business of any house in the United States. Having, at an early age, acquired wealth, he followed his father's example in giving liberally to religious and educational institutions. He made many gifts to Madison University at Hamilton, N. Y. With the assistance of his brother, Samuel, he built and endowed in the same town, Colgate Academy. In 1890 when the two institutions were combined, the resulting institution was named Colgate University in honor of his father. To this Mr. Colgate made generous gifts each year.

CORTELYOU, GEORGE B. See under RULERS AND STATESMEN.

CORWIN, THOMAS. See under RULERS AND STATESMEN.

CRANFIELD, LIONEL, EARL OF MIDDLESEX (1575–1645). Sometimes called the first of English financiers; early became a merchant, and attracted the attention of the nobles when representing his company before the privy council; was appointed receiver of customs for Dorset and Somerset (1605); became master of the great wardrobe (1618); chief commissioner of the navy (1619), and master of the court of wards in the same year; in each of these offices he wrought great reforms, and prevented much financial waste; was created baron and earl of Middlesex (1622), but, on being charged with corruption in regard to the court of wards, was deprived of all his offices, fined, and sentenced to the Tower during the king's pleasure; Cranfield was released (1625) and pardoned the following year.

DALLAS, ALEXANDER JAMES. See under RULERS AND STATESMEN.

DAWES, CHARLES G. See under RULERS AND STATESMEN.

DAVISON, HENRY POMEROY (1867–1922). Banker. Born in Troy, Pa.; attended the schools in Troy until 15; at 16 became a teacher, achieving such success that his grandmother decided to send him to Greylock Institute (Mass.). When 19 he went to work in his uncle's bank at Troy. In 1891 he went to New York as teller in the Astor Place National Bank; three years later became connected with Liberty Bank, first as assistant cashier, then cashier, vice president, and at the age of 32, president, one of the youngest bank presidents in the world. In 1908, he became a partner in the firm of J. P. Morgan & Co. where he took active part in the consummation of several important bank mergers. During the World War, J. P. Morgan & Co. became fiscal agents for the Allies, and Mr. Davison was active in negotiating loans. On the entrance of the United States into the war, Mr. Davison was made head of the Red Cross War Council with the rank of major general. Under his administration the Red Cross was welded into an efficient organization, and nearly $300,000,000 raised for war relief work. For his war work, he received honors from all nations; he was made a Commander of the Legion of Honor, the first American to receive this honor from France; Albert of Belgium conferred upon him the Order of Leopold; the King of Italy made him a Grand Officer of the Crown of Italy.

DILLON, CLARENCE (1882–). Banker. Born in San Antonio, Texas; educated at Worcester Academy in Massachusetts and at Harvard, from which he was graduated in 1905. He was identified with mining and coal companies until 1908 when he went abroad and studied art for two years. Returning home, he became president of the Milwaukee Tool Company; then more by accident than conscious choice, he entered Wall Street and in 1916 became a member of William A. Read & Company, bankers; he became its head in 1921 and the firm name was changed to Dillon, Read & Co. This firm has financed the issuance of stocks and bonds on a large scale. It engineered the $100,000,000 Steel and Tube Company merger involving 6 large steel companies in or near Chicago and Milwaukee. In 1921 it underwrote a $50,000,000 loan for the United States of Brazil, and more recently has floated a $40,000,000 loan to the Royal Dutch Company.

DREXEL, ANTHONY JOSEPH (1826–1893). Banker. Born in Philadelphia, Pa. His father, an emigrant from the Austrian Tirol, was founder of the bank of Drexel & Co. At 16, Anthony entered his father's counting room and finally with his brothers succeeded to the control of the business and organized the firm of Drexel, Morgan & Co. In 1864, with George W. Childs, Mr. Drexel bought the *Philadelphia Public Ledger*. In 1891, he founded and endowed with $2,000,000 the Drexel Institute which provides technical instruction for both day and night classes.

EATON (*ē'tan*), **CYRUS S.** (1883–). Capitalist. Born in Nova Scotia; graduated from McMaster University, Toronto, in 1905. He began life as a Baptist minister but was persuaded by one of his parishioners to help in the formation of a gas company, and from this start, Mr. Eaton went on to the formation and consolidation of various electric light and power companies in the Middle West until now he is the guiding director of some 15 large corporations. The gross earnings of these companies have increased from $52,000 in 1912 to nearly $100,000,000 per annum in 1929. Mr. Eaton has been a member of the banking firm of Otis & Company since 1915; recently with associates he gained control of the Goodyear Tire and Rubber Company; more recently, he has been identified with such companies in the iron and steel industry as the Trumbull Steel Company, the Republican Iron and Steel Co., the Central Alloy Steel Co., and others now merged in the Republic Steel Company. Recently he has been a strong opponent of the merging of the Youngstown Sheet and Tube Company with the Bethlehem Steel Company. He is a trustee of Denison University, of the Cleveland Y. M. C. A., of the Cleveland Museum of Natural History, and other organizations to all of which he has given freely.

ECKELS, JAMES HERRON (1858–1907). American financier; born at Princeton, Ill.; graduated at Albany Law School (1880); practised law at Ottawa, Ill. (1881–1893); was comptroller of the currency (United States) from 1893 to 1898; figured as a gold standard Democrat in the presidential campaign of 1896; president of the Commercial National Bank, Chicago (1898).

EPSTEIN, MAX (1875–). Capitalist. Born at Cincinnati, Ohio; graduated from the College of the City of New York in 1891; moved to Chicago that same year where he became a member of the Chicago Board of Trade on which he made a large fortune. Later he became president of the General American Tank Company and a director in numerous corporations. He was chairman of the Draft Board during the World War. He is actively interested in educational and philanthropic work and is the donor of the Max Epstein Loan Fund at the Harvard Law School and of the Max Epstein Dispensary and Social Hall at the University of Chicago, and in 1929 to the same university, he gave $1,000,000 for the development of an Art Center.

EWING (*ū'ng*), **THOMAS.** See under RULERS AND STATESMEN.

FESSENDEN (*fĕs'ĕn-dĕn*), **W. P.** See under RULERS AND STATESMEN.

FISH, STUYVESANT. See under CAPTAINS OF INDUSTRY.

FLAGLER (*flăg'lĕr*), **HENRY.** See under CAPTAINS OF INDUSTRY.

FORGAN, JAMES BERWICK (1852–1924). Banker. Born in St. Andrews, Scotland; at 17 he entered the employ of the Royal Bank of Scotland at its St. Andrews Branch; after three years training he entered the employ of the Bank of British North America, first in London, then crossed the ocean to Montreal, New York, and Halifax. Later, he went to the Bank of Nova Scotia and when only 30 was made inspector of branches; he was sent out to establish a bank in Minneapolis and made such an impression that after three years, he was called as cashier to the Northwestern National Bank of Minneapolis. In 1892, at the request of Lyman P. Gage, then president of the First National Bank of Chicago, he was elected vice president of that bank and became president in 1900 when Gage was made Secretary of the Treasury. Under his administration the business of the bank experienced a great expansion, the assets increasing from about $49,000,000 to something over $258,000,000. In 1916, Mr. Forgan resigned the presidency and became chairman of the board.

GAGE, LYMAN J. (1836–1927). Financier. Born in De Ruyter, N. Y.; attended Rome academy. At 17 he became office boy in a bank; two years later, he went to Chicago where in 1868 he became connected with the First National Bank, one of the city's biggest banks, of which, after twenty-three years' service, he was elected president. He was the first president of the Board of Directors of the Columbian Exposition and it was largely due to his efforts that the exposition was held in Chicago. In 1897 Mr. Gage was appointed Secretary of the Treasury by President McKinley and continued in this position until 1902, a period of unusual activity because of the necessity of financing the Spanish-American War. After leaving the Cabinet, Mr. Gage went to New York as president of the United States Trust Company, a position he retained until his retirement from business. He died at the age of ninety.

GIANNINI, AMADEO P. (1870–). Banker. Born at San Jose, Calif.; received a public school education and attended a business college; began work in the fruit commission business with his stepfather, L. Scatena, and at 19 was admitted to the firm. In 1904 he established the Bank of Italy which today with its numerous branches is one of the largest banks in the world. In 1919, he formed the Bancitaly Corporation in New York, an investment and controlling company, which is interested in numerous banks and corporations through mergers and stock control. He has given a great deal of money to educational and charitable institutions, including a gift in 1928 of a million and a half dollars to the University of California. In 1924 he turned over to his successor the presidency of the Bank of Italy. Later he organized the Transamerica Corporation, the world's largest bank holding company. Turning to the East, he secured control of the Bank of America, New York City, and Blair & Co., a private banking house. In 1930, at the age of 60, he retired as an active officer from all his companies for a year's absence abroad.

GIRARD (*jĭ-rärd'*), **STEPHEN** (1750–1831). Merchant and financier. Born at Bordeaux, France, son of a sea captain. At 14 he went to sea and at 24 was captain and part owner in a vessel engaged in the West Indian and American coasting trade. In 1776 he settled in Philadelphia where he gave sympathetic support to the patriot cause. After the Revolution, he amassed a considerable fortune in West Indian trade. In 1812, when the charter of the First United States Bank lapsed, Mr. Girard bought the building and most of the stock of the bank. He renamed it the Bank of Stephen Girard and made it one of the soundest and most substantial financial institutions in America. During the War of 1812, he was the chief financial supporter of the Government, taking up, in 1814, almost the entire loan of five million for which no subscribers could be found. On the chartering of the Second United States Bank, he became one of the chief stockholders and for many years a dominating influence in determining its policies. Mr. Girard left practically all his entire fortune of seven and a half million to benefactions, the greater part to Girard College.

GLADSTONE (*glăd'stŭn*), **Wm. E.** See under RULERS AND STATESMEN.

GOSCHEN (*gō-shen*), **GEORGE JOACHIM** (1831–1907). English financier and statesman; educated at Rugby and at Oriel College; early entered upon a financial career, and became director of the Bank of England (1856); was elected to Parliament for London (1863); took an active part in bringing about the abolition of religious tests; was made vice-president of the Board of Trade and privy council (1865), and chancellor of the duchy of Lancaster (1866); became president of the Poor Law Board (1868); first lord of the Admiralty (1871), retiring with his party in 1874; Goschen served as special ambassador to the Porte (1880–1881), and in the Salisbury government (1886–1892) was chancellor of the exchequer; in this office he won much praise for his scheme for reducing the national debt; resumed his old position as first lord of the Admiralty (1895), continuing in that office until 1900; on the question of tariff reform brought up in the ranks of the Unionist party (1903–1905). Goshen became well known as an obstinate supporter of free trade.

GOULD (*gūld*), **FRANK J.** See under CAPTAINS OF INDUSTRY.

GOULD, GEORGE J. See under CAPTAINS OF INDUSTRY.

GOULD, HOWARD (1871–). Capitalist; born in New York; director Missouri Pacific Railway Company, Western Union Telegraph Company, International & Great Northern Railway Company, New York Mail & Newspaper Transportation Company, and numerous other corporations; member of the New York Stock Exchange.

GOULD, JAY (1836–1892). Capitalist. Born in Roxbury, N. Y.; studied at Hobart Academy. After some experience in surveying and banking, he went to New York City and became a stock broker, dealing at first in Erie Railroad bonds; he soon gained control of the road and for four years was its president. His manipulation of the Erie was the beginning of a long series of speculations by which he was able to dominate some of the most important railroads in the country. His method of procedure was to depress the stock he wished to control and then acquire it during the period of depression. In this way he gained control of the Union Pacific which he held for ten years during which time the stock rose from 15 to 75. He could then sell at an immense profit. In 1880 he controlled fully 10,000 miles of railroad, more than one-ninth of the entire mileage of the country. Perhaps his most reprehensible action was the entering into a scheme to corner the gold market, which resulted in the disastrous "Black Friday" (page 1176).

GREEN, HETTY ROWLAND ROBINSON (1835–1916). Financier. Born in New Bedford, Mass.; educated at private school in Boston. Her father, Edward Mott Robinson, died in 1865, leaving her a large fortune which she managed herself, acquiring an interest in almost every large corporation in the world. She was probably the richest woman in America and the greatest woman financier in the world.

GRESHAM (*grĕsh'ăm*), **SIR THOMAS** (1519–1579). Financier. Born in London; educated at Gonville College, Cambridge and was early apprenticed to his uncle, a mercer or merchant; was admitted a member of the Mercers Company in 1543; in 1551 or 1552 he became king's agent or factor at Antwerp and retained this lucrative post with three sovereigns down to 1574; he negotiated loans, bought arms and military stores, and sent bullion to England; his endeavors raised the rate of exchange and greatly benefited English trade; besides these services he was accounted "the greatest merchant in London," and amassed great wealth. He founded the Royal Exchange, Gresham College, eight almshouses, and one of the earliest English paper mills. He is chiefly known as the enunciator of Gresham's Law which is —"bad money drives out good money" or, perhaps better, "where two media come into circulation together, the more valuable will tend to disappear."

HALIFAX, CHARLES MONTAGUE, EARL OF (1661–1715). Financier. Born at Horton, England; educated at Westminster School and at Trinity College, Cambridge, where he formed a lifelong friendship with Isaac Newton. He entered political life and joined the movement calling William and Mary to the throne; he became one of the commissioners of the treasury and brought to pass a loan bill which was the beginning of the English national debt. More money being required, he pushed through in 1694 a plan for a national bank which had been proposed by William Paterson some three years before. The condition was that a loan should be made to the Government—some six million dollars at eight per cent:—the subscribers to this loan were to be incorporated under the name of the Governor and Company of the Bank of England and authorized to do a general banking business without any special privilege, and with power to lend to the crown without consent of Parliament. Later, Montague became chancellor of the exchequer, reformed the currency, introduced bills of exchange and other financial reforms.

HAMILTON, ALEXANDER. See under RULERS AND STATESMEN.

HAMMOND, JOHN HAYS. See CAPTAIN OF INDUSTRY.

HARCOURT (*ar'kŭr*), **SIR Wm. V.** See under RULERS AND STATESMEN.

HARDWICKE (*hărd'wik*), **PHILIP YORKE, FIRST EARL OF** (1690–1764). English lord chancellor; born at Dover; was admitted to the bar (1715); elected a member of Parliament for Lewes (1719); appointed solicitor general (1720); lord chief justice of the King's Bench (1733); lord chancellor (1737); was created earl of Hardwicke in 1754.

HARRIMAN, EDWARD HENRY (1848–1909). Capitalist; born at Hempstead, Long Island; at 14 entered a broker's office in Wall Street, as clerk; became stockbroker for himself; member New York Stock Exchange since 1870; president and director of Portland and Asiatic Steamship Company, Oregon Railroad & Navigation Company, and of many other railroads; director Erie Railroad Company, Western Union Telegraph Company, and numerous other corporations; trustee Equitable Trust Company.

HARRIS, NORMAN WAIT (1846–1916). Capitalist. Born in Becket, Mass.; received a common school education. His father's character resembled the granite of the New England hills among which he lived, and the boy, receiving what he esteemed an undeserved punishment, ran away from home. After some adventures he reached Cincinnati, and by the time he was 21, was getting a salary of $5,000 with a life insurance company. In 1882 he went to Chicago and opened an office for the sale of bonds; he sent his salesmen out to sell bonds, then considered an undignified procedure; he and his men were called "door-bell ringers." The business grew and expanded, until before his death, the firm which Mr. Harris had founded became the Harris Trust and Savings Bank in Chicago, with a bond department; Harris, Forbes & Co. in New York, and Harris & Company in Boston, the three forming one of the largest financial and bond houses in the country.

HEPBURN (*hep'bŭrn*), **A. BARTON** (1846–1922). Banker. Born on a farm at Colton, N. Y.; attended St. Lawrence Academy; graduated from Middlebury College. After graduation he taught for some years, first at St. Lawrence Academy, then at Ogdensburg Educational Institute, at the same time studying law. His attention being called to the opportunities open in the lumber business, he bought large tracts of forest lands and started in that industry. He achieved great success and acquired considerable wealth. He then received the appointment of Superintendent of the State Banking Department, and showed much ability in that line of work. He soon sold his lumber business for $200,000 and turned to banking as his life work. He was appointed national bank examiner in New York City; then was called to Washington as Controller of the Currency. In 1893 he accepted an offer to become president of the Third National Bank and from that time until his death, nearly thirty years, he was continuously in banking business in New York City. He left the Third National in 1897, was two years with the National City Bank, then became president of the Chase National Bank. Under his leadership this bank developed and expanded its activities in a remarkable degree. In 1911 he resigned the presidency and became Chairman of the Board; when, in 1917, he wished to resign that position, the directors insisted upon his remaining as Chairman of an Advisory Board, an innovation in banking. Mr. Hepburn died as the result of injuries and shock suffered when he was knocked down by a motor bus. He left about $3,000,000 in benefactions; two-thirds of this sum being for educational institutions.

HEYDT, AUGUST, FREIHERR VON DER (1801–1874). Great German financier; born at Elberfeld: early showed great aptitude for business, and, after completing his education in Germany, worked as clerk in several financial houses of France and England; in company with his two brothers he now carried on a banking business in Elberfeld; from this time on his reputation steadily increased; accepted the office of president of the Board of Trade and Public Works in the Brandenburg-Manteuffel cabinet (1848); became chairman of the bank of Prussia (1851), and minister of finance in the Hohenlohe-Itzenplitz cabinet (1862); resigned the same year, but, in 1866, when it was found that money was lacking to defray the expenses of the war with Austria, Bismarck prevailed with the king to reappoint Heydt; this was done, and the finances were skillfully managed until 1869, when Heydt, failing in health and discouraged with the condition of the country, tendered his resignation.

HICKS-BEACH, SIR MICHAEL EDWARD (1837–1916). English chancellor of the exchequer; born in London; educated at Eton and at Christ Church, and entered Parliament (1864); was chief secretary for Ireland (1874–1878); secretary of state for the colonies (1878–1880); chancellor of the exchequer and leader of the House of Commons (1885); served as president of the Board of Trade (1888–1892); again chancellor of the exchequer from 1895 to 1902;

greatly disconcerted the Balfour government by his acute attack on the methods of the war office.

HIGGINSON, MAJOR HENRY LEE (1834–1919). Banker. Born in New York City. After spending two years at Harvard, he entered the counting house of S. & E. Austin where, with the exception of a year's study of music in Vienna, he remained until the Civil War; he entered the Union army as second lieutenant in 1861, and four years later was honorably discharged, having reached the rank of major. He became a member of the firm of Lee, Higginson and Company, bankers, and after Mr. Lee's retirement was virtually the head of the firm. For fifty years this firm financed some of the most important undertakings in the business world. He was a loyal alumnus of Harvard, presenting to that institution the great athletic ground known as Soldiers' Field, a memorial to those students who gave their lives in the Civil War; he also gave $150,000 for the building of Harvard Union. He was perhaps most widely known as the founder of the Boston Symphony Orchestra, which gave its first concert in 1881, and which led to the founding of similar organizations in various other cities of the country.

HUSKISSON (*hus'ki-san*), **WILLIAM** (1770–1830). English statesman and financier; born in Worcestershire; went to Paris to study medicine; became a member of the Club of 1789; delivered before its members a speech on currency; on his return to England (1792) he received a minor government appointment; became intimate with such men as Canning and Pitt; was under secretary of war (1795–1801); from 1796 until the time of his death was almost continuously a member of Parliament; was appointed secretary of the treasury (1804); lost his position (1806), but regained it in 1807; became chief commissioner of woods and forests (1814); president of the Board of Trade (1823); secretary of state for the colonies (1827); his term of service in this last position witnessed the removal of the restrictions on the foreign trade of the colonies, and a reduction of many import duties.

HUNTINGTON, COLLIS P. See under CAPTAINS OF INDUSTRY.

HUNTINGTON, HENRY EDWARDS (1850–1927). Financier. Born at Oneonta, N. Y., a nephew of Collis P. Huntington, who in the early 90's made him his general representative in the management of the Central Pacific and Southern Pacific Railroads. After his uncle's death, Henry Huntington became particularly interested in the development of Los Angeles and its vicinity; he built street railways into the outlying sections, bought the adjoining territory, and built power houses. So extensive were his interests that the section became known as "Huntington's Interurban Empire." In later years his fame rested chiefly upon his preëminence as a collector of books and paintings; his collection at San Marino, Cal. was generally conceded to be the finest private collection in the world. Among the paintings are many by Reynolds, Romney, and Gainsborough, including the famous *Blue Boy*. At his death this collection became public property. He also left $8,000,000 to create fellowships for research work.

ISELIN (*iz-lan'*), **ADRIAN, JR.** Banker; director of Southern Railway Company, Lackawanna Steel Company, National Bank of Commerce, City & Suburban Homes Company, New British & Mercantile Insurance Company of London and Edinburgh; vice-president and director Buffalo, Rochester & Pittsburg Railway Company, and many other corporations. Died 1935.

JAMES, ARTHUR CURTISS (1867–). Capitalist. Born in New York; received both the A. B. and A. M. degrees from Amherst in 1889. Vice-president and director of the Phelps Dodge Corporation and its subsidiaries. Chairman of the board of directors of the Western Pacific and director of many other roads, he is supposed to own more railroad stock than anyone else in the country.

JESUP (*jes'up*), **MORRIS KETCHUM** (1830–1908). New York banker, born at Westport, Ct.; began business career as a clerk for a New York manufacturing firm; became an active banker (1852–1854); gave his aid in a financial way to many educational and religious institutions; president New York City Mission and Tract Society (1881–1903); one of founders (president, 1872) Y. M. C. A. of New York; president Chamber of Commerce of New York since 1899; Audubon Society, state of New York, after 1896; American Sunday School Union since 1896; Peary Arctic Club and Sailors' Snug Harbor after 1899; director and trustee of Atlantic Mutual Insurance Company, Western Union Telegraph Company, and of other corporations.

KAHN (*kän*), **OTTO H.** (1867–1934). Banker. Born at Mannheim, Germany; his father came to America with numerous other Germans after the unsuccessful German revolution of 1848, became a naturalized American citizen, but later returned to Germany; the son was educated in Germany. After a thorough apprenticeship in the banking business, he was with the branch of the Deutsche Bank in London for five years. He came to America in 1893 where for several years he was with Speyer & Co., then, in 1897, he became a member of the banking firm of Kuhn, Loeb & Co. He was a directing force in the expansion of that firm's financing of numerous railroads and corporations and made it one of the leading investment banks of the country.

KEMMERER, EDWIN W. (1875–). Money doctor. Born at Scranton, Pa.; graduated from Wesleyan University in 1899; received the degree of Ph. D. from Cornell in 1903. He then became financial adviser to the Philippine Commission and began the work which later gained him the title of "Money Doctor;" returning to this country, he was professor of economics and finance at Cornell from 1906 to 1912; in the latter year he went to Princeton where he has since remained. He was called upon to put the finances of Mexico in order in 1917; those of Guatemala in 1919; of Colombia in 1923; Chile, 1925; Poland, 1926; Ecuador, 1927; Bolivia, 1927; and China, 1929. He also served on the Gold Standard Inquiry Committee for the Union of South Africa, 1924–25; and as an expert on currency and banking to the Dawes Committee in 1925. The recently endowed Bureau of International Finance at Princeton is under the direction of Dr. Kemmerer. Among his books may be mentioned the *A. B. C. of the Federal Reserve System, Modern Currency Reforms, The United States Postal Savings System,* and *High Prices and Deflation.*

KNOX, JOHN JAY (1828–1892). American financier; born in Knoxboro, N. Y.; graduated from Hamilton College (1849); entered the banking business; his sympathy with the National Banking plan of Secretary Chase led to his appointment to a position in the treasury department (1866); was deputy comptroller of the treasury (1867–1872); comptroller (1872–1884); president of the National Bank of the Republic in the city of New York (1884–1892); prepared the original draft of the Coinage Act of 1873, which stopped the coinage of the silver dollar; was an authority on all matters relating to currency.

LAW, JOHN (1671–1729). A Scotch financier; founder of the first banking institution in France, the Banque Générale, established in Paris in May, 1716; in conformity with his views he issued paper currency which was accepted in payment of taxes, soon being at a premium; was given control of Louisiana by the French government in 1717; trade and colonization were the objects in view, to promote which was formed the "Compagnie d' Occident," usually called the "Mississippi Company," but later known as the "Mississippi Scheme" or "Bubble"; the company became of great importance in foreign as well as home commercial and financial affairs by absorbing the Africa, China, and East India companies and taking over the powers of receivers general and the control of the mint; in 1718 the Banque Générale was changed to Banque Royale; two years later the bank and the company became one, when Law became controller general of finance; but there was an overissue of paper money, the government opposed Law's scheme, and he left the country in May, 1720, after there had been a tremendous speculative craze, followed by a complete collapse.

McCAIN, CHARLES S. (1884–). Financier. Born at Pine Bluff, Ark. Was a Phi Beta Kappa graduate of Yale in 1904. Helped to organize several banks in Arkansas, the largest being the Bankers Trust Company of Little Rock in 1913 of which he was successively vice-president and president. He went to New York and became identified with the National Park Bank of which he was made president in 1927. Two years later when the Park Bank merged with the Chase National Bank he went to the latter institution. In 1930 on the merger of the Chase National, the Equitable Trust, and the Interstate Trust, forming the largest bank in the world, he became chairman of the board of directors of the Chase National, the continuing bank. He is described as a man with an innate appreciation of personality and a great capacity for work.

McGARRAH, GATES W. (1863–1940). Banker. Born at Monroe, N. Y.; has been identified as cashier and president with several of the larger New York banks. Served as president of the New York Clearing House Association (1917–1919); was chairman of the board and federal reserve agent of the Federal Reserve Bank of New York; is director in many corporations. In 1930 he was elected one of the American directors of the Bank for International Settlements which is designed to bring about a settlement of reparations and act as an international clearing house. The three objects of the bank are to promote the cooperation of central banks, to provide additional facilities for international financial operations, and to act as trustee or agent in connection with international financial settlements entrusted to it under agreements with the parties concerned.

McHUGH, JOHN (1865–). Financier. Born at Belleville, Ontario, Canada; came to the United States in 1891; received a public school education and acquired his early banking training in the Middle West. He directed a substantial merger of four banks into the First National Bank of Iowa and increased the business of this bank from $357,000, to $7,500,000. He went to New York at the invitation of Gates W. McGarrah to become vice president of the Mechanics and Metals National Bank and, in 1926, on its consolidation with the Chase National Bank, became president of the united banks. He is one of the few men who can exhibit notes of four different banks to which his signature was attached as president. He is now chairman of the executive committee of the Chase National Bank, the world's largest bank, formed in 1930 by the merging of the Chase National Bank, the Equitable Trust Company, and the Interstate Trust Company.

MACKAY, JOHN WILLIAM (1831–1902). Capitalist. Born in Dublin, Ireland; came as a boy to New York City. In 1852 he went to Nevada; there he obtained a two-fifths share in the Bonanza mine of the Comstock Lode. After many bitter disappointments, in 1873, a rich vein was discovered which yielded a hundred million. Mr. Mackay became very wealthy. For many years he was president of the Nevada Bank. In 1884 with James Gordon Bennett, he formed the Commercial Cable Co., and the Postal Telegraph Co. to fight the Western Union. The cable was laid in spite of many difficulties and the monopoly of the existing company was broken. In 1908 a school of mines was presented to the University of Nevada by his widow and his son, Clarence H. Mackay.

McROBERTS, SAMUEL (1868–). Financier. Born in Malta Bend, Mo.; a graduate of Baker University and of the University of Michigan Law School; practised law in Chicago a number of years and served as attorney, then as treasurer and financial director, for Armour & Co.; moved to New York and became identified with several banks; an official of the National City Bank, Metropolitan Trust Co., and chairman of the board of the Chatham Phenix National Bank and Trust Co.; served with distinction in the ordinance department during the World War; a director in various manufacturing, financial, and insurance corporations; interested in many philanthropic and educational institutions.

McVEAGH, FRANKLIN. See under CAPTAINS OF INDUSTRY.

MELLEN, CHARLES S. See under CAPTAINS OF INDUSTRY.

MELLON, ANDREW (1854–1937). Banker and secretary of the treasury, for many years was identified with the commercial and manufacturing life of the Pittsburgh district. He was an associate in the enterprises of the late Henry C. Frick and founded the town of Donora, Pa., where extensive mills were established. Resigning from the presidency of the Mellon National Bank, Pittsburgh, on March 1, 1921, he entered the cabinet of President Harding and continued as secretary of the treasury in the Coolidge and Hoover administrations.

MERRILL, EDWIN G. (1873–). Financier. Born in Bangor, Maine; a graduate with honors of Harvard University. After a number of years of banking experience in Bangor and New York, and official connection with several banks, he became president of the Bank of New York and Trust Company, which had absorbed several other banks. He is a director in many corporations.

MILLS, DARIUS OGDEN (1825–1910). Banker, financier; born at North Salem, Westchester County, New York; was a clerk in New York; went to California (1849) and became merchant and dealer in exchange in Sacramento; founded bank in that city; regent and treasurer University of California (1868–1880); one of first trustees of Lick estate and Observatory, California; returned to New York (1880); built Mills Building, a system of hotels, and Nurses' Training School in New York; president New York Botanical Garden; director and trustee of several railroads and other corporations.

MITCHELL, CHARLES EDWIN (1877–). Financier. Born in Chelsea, Mass.; a graduate of Amherst in 1899. That same year he began with the Western Electric Co., Chicago, within 5 years becoming assistant manager; he then became connected with several banking and investment companies. Since 1916 he has been president of the National City Company and since 1921 has also been president of the National City Bank of New York.

MORGAN, JOHN PIERPONT (1837–1913). Banker, financier; born at Hartford, Ct.; entered bank of Duncan, Sherman & Company (1857); in 1860 became agent and attorney in United States, for George Peabody & Company, bankers of London; became member of firm of Drexel, Morgan & Company (1871), which is now J. P. Morgan & Company, leading private banking house in the country, with important branch house in London; floated United States bond issue of $62,000,000 during Cleveland's administration; secured American subscriptions of $50,000,000 to British war loan of April (1901); controlled over 50,000 miles of railways in the United States and England; president Metropolitan Museum of Art (1905–1913); donated largely to educational and religious institutions as well as to art.

MORGAN, JOHN PIERPONT 2nd (1867–). Financier. Son of John Pierpont Morgan. Born at Irvington, N. Y.; educated at St. Paul's School and Harvard University. In 1891 he became a member of his father's firm; later, spent 8 years with the London house of J. P. Morgan & Co. On his father's death in 1913, he became head of the firm of J. P. Morgan & Co. Sixteen months later, the World War broke out. The British, and later the French, government made the firm purchasing agents for their supplies of foodstuffs and munitions, purchases aggregating several billion dollars. The work accomplished in organizing the industrial supply was of great service to the United States government when we entered the war in 1917. Mr. Morgan's firm was also active in financing loans for the allies, not only during the war but during the period of world reconstruction which followed it. Their loans to Great Britain, France, Belgium, Italy and other countries aggregated between 1917–1926 about $1,700,000,000. For 5 years Mr. Morgan was a member of the advisory council of the Federal Reserve Board. In 1920 Mr. Morgan presented his residence at Prince's Gate in London to the United States government for an embassy. In 1923, by public charter, he dedicated his father's library, augmented by his own additions, as an institution of research for scholars, at the same time providing a liberal endowment for it. In 1929 he served as an unofficial delegate at the conference in Paris for the fixation of German reparations.

MORRIS, GOUVERNEUR. See under RULERS AND STATESMEN.

MORRIS, ROBERT (1734–1806). Financier. Born in Liverpool, Eng.; came to America in 1747 where he found employment with a prosperous mercantile firm of which, seven years later, he became a partner. In the Revolution, he supported the colonial cause, was a member of the Continental Congress and a signer of the Declaration of Independence. He rendered invaluable service to his adopted country by financing the War of Independence; he practically controlled the financial affairs of Congress from 1776 to 1778; in 1781 he was made superintendent of finance; by requisitions from the various states, by giving of his own means or borrowing on his own credit he financed the transferring of Washington's army from Dobbs Ferry to Yorktown, and thus made possible the great victory which insured the success of the American cause.

MORTON, LEVI PARSONS. See under RULERS AND STATESMEN.

NECKER, JACQUES. See under RULERS AND STATESMEN.

NORMAN, MONTAGUE C. (1871–). Governor of the Bank of England and eminent financier. Born

at Much Hadham, Herts, England; educated at Eton and Kings College, Cambridge. He obtained his banking training with Brown, Shipley, & Company and has been identified with international banking transactions for many years. In 1930 he was elected for the eleventh consecutive year as governor of the Bank of England, a notable departure from the tradition of that institution. In 1930 he was also elected one of the directors of the newly established Bank for International Settlements. It is said that from the start of his career he was a breaker of precedents and showed great capacity for understanding American finance and for coöperating with American bankers in their international policies.

NORTH, FREDERICK. See under RULERS AND STATESMEN.

NORTHCOTE, STAFFORD. See under RULERS AND STATESMEN.

OSGOOD, JOHN CLEVELAND (1851–1926). Capitalist; born in Brooklyn. Began his business career as office boy in Providence, and later went to New York as clerk for a commission firm; from 1874–1877 he was cashier for the First National Bank of Burlington, and during the next five years engaged in coal mining. In 1892 he organized the Colorado Fuel and Iron Company, of which he was either president or chairman of board of directors until his resignation in 1903. Acted as president of Crystal River Railroad, and Colorado & Wyoming Railroad, built in the interest of the Fuel and Iron Company.

OVERSTONE, SAMUEL JONES LLOYD, BARON (1796–1883). Welsh banker and authority on finance; educated at Eton and Cambridge, entering the banking and mercantile business after graduation; from 1816 to 1823 sat in Parliament for Hythe; became a great student of banking questions, subsequently publishing two or three works on the subject; his influence over the chancellors of the exchequer was great, and in the bank charter act (1844) his ideas in the main were carried out; raised to the peerage (1860).

PATERSON, WILLIAM (1658–1719). British financier; born in Dumfriesshire, Scotland; removed to England when a young man, and, engaging in trade in London, acquired quite a fortune; first proposed to the government his plan for the establishment of the bank in 1691, but it was not until 1694 that Parliament passed an act adopting his ideas; although an original stockholder in the bank, he soon resigned and removed to Scotland, where he prevailed on the Scottish Parliament to pass the act founding the "Company of Scotland trading in Africa and India," under which name the Darien colonization scheme was carried out; in this Paterson was not wholly successful, and in 1715, in recognition of his public services, the government voted him about $90,000 to compensate his losses in the Darien scheme; Paterson was active in securing the union of England and Scotland.

PAYNE, OLIVER HAZARD (1841–1917). Capitalist; born at Cleveland, Ohio; graduated at Yale in 1863, and was a Union officer in the Civil War. Director in Standard Oil Company, American Tobacco Company, Chase National Bank, Manhattan Trust Company, Havana Tobacco Company, International Railway Company, Virginia & Southeastern Railway Company, New York Loan and Improvement Company, etc. Gave $500,000 to aid in establishing and maintaining medical department of Cornell University in New York.

PERKINS, GEORGE W. (1862–1920). Financier and organizer. Born in Chicago. With only a public school education, he began his career as an office boy in the Chicago office of the New York Life Insurance Co., and remained with that company until 1900, when he had advanced to the position of the chairman of the finance committee. He displayed great ability as an organizer, introducing improved methods which revolutionized the insurance business. In 1900 he became a partner in the firm of J. P. Morgan and Co. There his work was largely concerned with organization; he organized the International Harvester Co., and was, to a great extent, instrumental in organizing the United States Steel Corporation. His pleasing personality was a great asset and attracted the attention of Andrew Carnegie who is reported to have remarked: "This young man actually sweetens sordid business dealings by the amiability of his manner." Mr. Perkins was a pioneer in the profit-sharing plan; he actively sought to create a better understanding between capital and labor. He was a directing influence in the organization of the Progressive party, and the direction of the campaign for Roosevelt as a presidential candidate of that party was largely in his hands. During the World War, Mr. Perkins was chairman of the War Work Council of the Y. M. C. A.

PITT, WILLIAM. See under RULERS AND STATESMEN.

QUESNAY (*kĕ-nĕ'*), **FRANCOIS** (1694–1774). French economist; born at Méré; early practised as a surgeon and physician; devoted much time to the study of economics; was the author of several works and had several stanch disciples, who did much to popularize his views, and who afterwards formed the sect known as the Physiocrats.

RASKOB, JOHN J. (1879–). Financier. Born at Lockport, N. Y.; received a common school and business college education. He has been connected with the E. I. DuPont de Nemours Company of Delaware in various official positions; he is identified with General Motors and other corporations. He was formerly a Republican but was financial manager of Governor Smith's campaign for the presidency in 1928. He is a director of the Bankers Trust Company, the American Surety Co., and the County Trust Company.

REVELSTOKE, JOHN BARING, LORD (1863–1929). Banker. Born in England; educated at Eton and Trinity College. After his graduation he became director in his father's bank, Baring Brothers & Co., Ltd.; when his father died in 1897, he assumed control. The bank, a few years before, had been on the verge of collapse, but under his guidance was restored to complete prosperity and was at the time of his death one of the two greatest of English banks. He occupied in the British financial world a position comparable to that held by J. P. Morgan in the United States. During the World War he rendered invaluable service to his government; he died suddenly while serving as a member of the experts commission for the fixation of German reparations.

REYNOLDS, JACKSON E. (1873–). Banker. Born at Woodstock, Ill.; graduated from Leland Stanford University in 1896 and the Columbia Law School in 1899. He practised law in New York City and also taught law at Columbia University; while attorney for the Central Railroad of New Jersey he attracted the attention of George F. Baker, one of the directors, and was invited to join the staff of the First National Bank of New York; he became actively interested in the affairs of Mr. Baker and his associates. On Mr. Baker's becoming chairman of the board, he was elected president of the bank. Besides being identified with the Federal Reserve Bank of New York, he is a director in various railroads and corporations; he has been a prominent figure in the various German Reparations commissions and in bringing about the organization of the Bank for International Settlements.

RICARDO (*rĭ-kär'dō*), **DAVID** (1772–1823). English political economist; born in London; at the age of 14 entered his father's stock exchange business, and about five years later established himself as a broker; soon became wealthy; report of the bullion committee (1811) was drafted under Ricardo's influence, and, from the time he entered Parliament (1819), his influence in financial matters was very great; noted also for his writings, which probably exerted more influence upon economic thought than those of any other writer, Adam Smith excepted.

RICHELIEU (*rē'shĕ-lyû'*), **ARMAND.** See under RULERS AND STATESMEN.

ROGERS, HENRY H. (1840–1909). Capitalist; born at Fairhaven, Mass.; vice-president and director Standard Oil Company, Brooklyn Union Gas Company, United Metals Selling Company; president and director Amalgamated Copper Company, National Transit Company, National Fuel Gas Company, New York Transit Company, Richmond Light and Railroad Company; and as trustee or director was also connected with many other corporations; has given liberally to his native town.

ROTHSCHILD (*rŏths'chīld*). A family of European financiers, of which the following two may be mentioned: **MAYER ANSELM** (1743–1812). Founder of the family; born at Frankfort-on-the-Main; entered the counting house at Hanover, opened a money exchange business at Frankfort, and was intrusted with the private fortune of the elector of Hesse-Cassel (1806) when the latter fled; the money was ably handled, and in 1815 was returned to the elector with interest; his five sons became known throughout Europe as eminent financiers, and few international transactions were undertaken without their aid.

LIONEL (1808–1879). Eldest son of Nathan, son of Mayer Anselm Rothschild; born in London; received his education at Göttingen; continued his father's business in London; was elected to Parliament for London (1847, 1849, 1852, 1857); noted for his success in obtaining Jewish emancipation in Great Britain; taking his seat in the Commons (1858) he served until 1868, and again from 1869 to 1874.

RYAN, THOMAS FORTUNE (1851–1928). Financier; born in Nelson County, Virginia; in 1868 entered a Baltimore dry goods house; entered Wall Street (1870); member New York Stock Exchange (1874); vice-president Morton Trust Company; member Chamber of Commerce; reorganized various railroads; director of many financial enterprises; in 1905 purchased controlling interest of the stock of Equitable Life Assurance Society of the United States.

SAGE, RUSSELL (1816–1906). Born in Oneida County, N. Y.; educated in the public schools. He began as a clerk in a grocery store; within a few years he had established himself in the wholesale grocery business. In 1868 he removed to New York where he bought a seat on the Stock Exchange; besides speculating in railway stock, he became a money lender, a dealer in "puts" and "calls" and "privileges." He became associated with Jay Gould in control of the Wabash, the St. Louis and Pacific, and other western roads. He left almost his entire estate, consevatively estimated at $60,000,000, to his wife, Margaret O. S. Sage. She began a series of benefactions to many worthy causes: $1,000,000 to Rensselaer Polytechnic Institute at Troy; $1,000,000 to the Troy Female Seminary where she was educated; and in 1907 she gave $10,000,000 to establish the Russell Sage Foundation for the betterment of social conditions in the United States.

SCHIFF, JOCOB H. (1847–1920). Banker. Born in Frankfort-on-the-Main, Germany, and educated in the schools there; came to the United States at 18, where after considerable experience in banking and brokering, he became a member of Kuhn, Loeb & Co. He displayed such outstanding ability that, when Mr. Loeb retired, he was made head of the firm. Under his leadership the company not only held its place as one of the largest banking houses in the United States, but so expanded that it acquired an international reputation. The firm financed Harriman in the reorganization of the Union Pacific; it acted as bankers for the Pennsylvania Railroad, and is said to have floated for this company loans to the amount of $100,000,000 at one time; it financed the building of the Pennsylvania Railroad Station; floated a $200,000,000 bond issue for the Japanese government. In the later years of his life, Mr. Schiff became known especially as a philanthropist. He was donor of the Semitic Museum at Harvard; his benefactions amounted each year to several million dollars.

SHERMAN, JOHN. See RULERS AND STATESMEN.

STEFANI, ALBERTO DE (1879–). Italian financier, elected in 1921 as an independent from Verona in parliament, after being a lecturer in economics in Padua. Mussolini appointed him minister of finance in 1922, and two months later as minister of the treasury in addition. He stabilized finances, balanced the budget, and reduced the national debt before he retired in 1925.

TOWER, CHARLEMAGNE (1854–1923). Financier and diplomat. Born in Philadelphia; educated at Phillips Exeter, and Harvard; spent four years in travel and study in Europe; then studied law and in 1882 was admitted to the bar. For many years he devoted himself to his steadily growing law practice and to the various business enterprises with which he became connected. In 1897, he was appointed by President McKinley minister to Austria, later was Ambassador to Russia, and in 1902 was sent by President Roosevelt to Berlin where in his six years' stay he made a brilliant record, becoming a prime favorite to the former Kaiser, William II. In the later years of his life, Mr. Tower resumed the direction of his large business interests. He was a director in a number of important corporations, the New York, New Haven, and Hartford Railroad, the Philadelphia and Reading Coal and Iron Company, and others. He was also the author of a number of essays and one book, *The Marquis de Lafayette in the American Revolution.*

TRAYLOR, MELVIN A. (1878–1934). Banker. Born at Breeding, Ky.; educated in the common schools; he moved to Texas and was a cowboy on the plains, a school teacher, and a clerk in a country grocery store; while clerking in the store, he studied law nights, and was admitted to the Texas bar. After filling several minor political offices, he entered the banking field at Malone, Texas, in 1905, then became connected with county banks, with banks in St. Louis and Chicago, and in 1925 was elected to the presidency of the First National Bank of Chicago. It is reported in financial circles that Mr. Traylor is the only man to refuse a partnership in J. P. Morgan & Company. Besides his banking interests he is a director in numerous corporations and has acted on government credit and reparations commissions.

TUPPER, CHARLES. See under RULERS AND STATESMEN.

TURGOT, ANNE ROBERT JACQUES, BARON DE L'AULNE (1727–1781). French economist and statesman; born in Paris; was educated for the church, but turned his attention to the study of political economy, allying himself with the liberal views of the time; was intendant of Limoges (1761–1774), where he inaugurated many beneficial reforms, and after the death of Louis XV. was called to the ministry; the disordered condition of the finances gave him a chance to show his ability as a financier; was first minister of marine and later comptroller general; greatly reduced expenditures, required of the nobles the same tax asked of others, and aimed to establish free trade throughout France; among his important measures were the abolition of the *Corvée* (January 6, 1776), and the *jurandes* (March 12, 1776); the first of these related to the forced labor of the peasants upon the making of high roads; the second to the government of privileged corporations; his reforms, especially those directed against the nobility, soon won him the hostility of that class, and he retired in May, 1776, after 20 months of service; spent the greater part of the remainder of his life in writing.

VANDERBILT, ALFRED GWYNNE (1877–1915) Capitalist; born in New York; was graduated from Yale (1899); director Hanover National Bank, Plaza Bank, Conried Metropolitan Opera Company, American Horse Exchange, and various other banks and railways. Died in the sinking of the *Lusitania.*

VANDERBILT, CORNELIUS (1794–1877). Capitalist; born near Stapleton, Staten Island, N. Y. Without education or capital, he started a ferry between New York and Staten Island at the age of 16. In two years he owned and controlled three boats and at 30 years of age he held controlling interest in a company owning a large number of river and harbor vessels. Later he controlled fleets of steamboats on the Hudson, the Sound, and the Delaware; ran lines to Boston and other coast cities, to California via Lake Nicaragua, and to Havre, France. He gradually transferred his capital from steamers to railroads, and by 1864 he had control of the Hudson River Railroad. He secured the New York Central three years later, and soon united the two roads into one system, which he finally extended into a through route from New York to Chicago. Fortune estimated at $100,000,000.

VANDERBILT, CORNELIUS II. (1843–1899). Financier and capitalist, born at New Dorp, Staten Island, N. Y., son of William H. and grandson of Cornelius. After acting as banking clerk in New York, he entered the brokerage house of Kissam Brothers. Since 1867, he has been an official in railroad management, chairman of governing boards of New York Central & Hudson River Railroad, and Michigan Central, and director in 34 different railways. He was head of Vanderbilt railroads interests until ill health compelled him to retire.

VANDERBILT, CORNELIUS III. Capitalist; born in New York; graduated at Yale (1895); director of New York Life Insurance and Trust Company, Mutual Life Insurance Company, Allis-Chalmers Company, Lackawanna Steel Company, Marine National Bank of Buffalo, Illinois Central Railway Company, Hudson Companies, Mexican Telegraph Company, Philippine Railway Company, and of numerous other financial enterprises.

VANDERBILT, FREDERICK WILLIAM (1856–1938). Capitalist; graduated from Yale Sheffield Scientific School (1876); received a business training in office of his father's railroad system; director New York Central Railroad, Chicago & St. Louis Railroad, Canadian Southern Railway Company, The Pullman Company, and numerous other financial and railway corporations.

VANDERBILT, GEORGE WASHINGTON (1862–1914). Capitalist; born at New Dorp, Staten Island, New York; gave largely to educational institutions; presented American Fine Arts Society of New York the room in their building known as the Vanderbilt Gallery; purchased 100,000 acres of mountain land near Asheville, N. C., which he developed and on which he erected a mansion.

VANDERBILT, WM. HENRY. See under CAPTAINS OF INDUSTRY.

VANDERBILT, WM. KISSAM. See under CAPTAINS OF INDUSTRY.

VANDERLIP, FRANK A. (1864–1937). Banker. Born at Aurora, Ill.; he was a special student of economics at the University of Chicago and Illinois. He entered newspaper work and became the financial editor of the Chicago *Tribune* and then associated with the Chicago *Economist;* became private secretary to Lyman P. Gage, Secretary of the Treasury, and later was appointed assistant secretary of the treasury. In 1901 he went to the National City Bank of New York and became president in 1909. He assisted in governmental financial operations during the World War. Since 1919 he has devoted himself to his private business interests. He is a director in numerous corporations.

VAN SWERINGEN, MANTIS J. (1881–1935). Capitalist. Born at Wooster, Ohio; educated in the public schools; moved to Cleveland and became a partner with his brother in the real estate business, the development of Shaker Heights, of transit lines in Cleveland, and was instrumental in various railroad mergers; director in many corporations and a member of the firm of O. P. & M. J. Van Sweringen.

VAN SWERINGEN, ORIS P. (1879–1936). Capitalist. Born at Wooster, Ohio; educated in the public schools; went to Cleveland where he sold newspapers and worked as an office boy; with his brother, he entered the real estate business and became the active head of the firm of O. P. & M. J. Van Sweringen; he planned and developed the suburb of Shaker Heights, Cleveland, one of the largest undertakings of its kind up to 1921. He helped to finance and build the Cleveland Terminal, a union depot for various railroads entering Cleveland. In recent years he has been identified with railroad consolidation and control of railroads; he has a controlling interest in the Erie, Nickel Plate, Hocking Valley, and other railroads and is working out a consolidation of various railroads into a unified system.

WARBURG, FELIX M. (1871–1937). Banker. Born at Hamburg, Germany and educated in the public schools of that city. He came to the United States in 1894 and became a naturalized citizen in 1900. He entered banking business, becoming a partner of Kuhn, Loeb & Co. in 1896. The preceding year he had married the daughter of Jacob H. Schiff, the managing partner of this banking house. Mr. Warburg is a director in a number of banks and corporations; he has given freely of time and money to numerous philanthropic undertakings. The firm of Kuhn, Loeb & Co. stands out in the financial world as one of the leading private banking houses of this country.

WHITNEY, WILLIAM COLLINS (1841–1904). Financier and political leader. Born at Conway, Mass.; graduated from Yale and studied law at Harvard. He began practice in New York, displaying such obvious talent that his progress was rapid. He acquired a reputation as an expert corporation lawyer and became connected professionally with many large corporations. He was an agressive opponent of the "Tweed Ring," and an active worker in anti-Tammany organizations. For ten years he was corporation counsel of New York; he showed remarkable power in this position, saving the city some $12,000,000. He was Secretary of the Navy during President Cleveland's first administration and did much toward reorganizing and developing the Navy. He was an active supporter of Cleveland in 1892, but not believing in "free silver," refused to support William J. Bryan. Mr. Whitney devoted the remainder of his life to his many business interests; he was one of the organizers of the Metropolitan Street Railway Co. and one of his last pieces of work was the organization of the New York Electric Light, Heat and Power Co. He was interested in horse racing and in 1901 won the English Derby.

WHITTINGTON, RICHARD (about 1359–1423). English merchant; nothing definite is known of his early life; in 1397, 1398, 1406, and 1419 he was mayor of London; is said to have loaned large sums of money to the king, and at his death left the greater part of his fortune for charitable purposes.

WIGGIN (*wig'in*), **ALBERT H.** (1868–). Financier. Born at Medfield, Mass.; at 17, after a high school education, he began as a bank clerk and was later identified in various capacities with several Boston banks until 1899 when he removed to New York. In 1904 he became vice-president of the Chase National Bank, later president, and then chairman of the board. He was a fuel administrator during the World War, chairman of the Clearing House in the adjustment period of 1918–19, and in 1920–21 president of the Clearing House Association. He is a director in many corporations and has been the driving force in the growth of the Chase National Bank. Mr. Wiggin has been described as "a tower of strength in the banking world." He is now chairman of the governing board of the Chase National Bank, the World's largest bank, formed in 1930, by the consolidation, largely under his influence, of the Chase National Bank, the Equitable Trust Company, and the Interstate Trust Company.

YERKES (*yĕr'kēz*), **CHARLES TYSON** (1837–1905). Financier. Born in Philadelphia; received a high school education. He began as clerk in a grain commission house, then became a broker and banker, making a specialty of dealing in bonds. In 1871 he failed; and was in debt to the city of Philadelphia for bonds sold on its account; he refused to give the city preference over other creditors; was convicted of misappropriation of funds and imprisoned, but afterward pardoned and the conviction decided to be illegal. He recuperated his fortune in the early seventies. He became interested in street railways in Chicago and gained control of the greater part of the car lines of that city. Later he went to London, and became identified with what is known as the underground tubes. Mr. Yerkes gave to the University of Chicago a telescope costing about $400,000, one of the finest and largest in the world. It is located in the Yerkes Observatory on Lake Geneva in Wisconsin.

ABBATO or **ABATI** (*ab-bah'te*), **NICCOLO DELL'** (1512–1571). An Italian painter and fresco artist, follower of Raphael and Correggio. His *Adoration of the Shepherds* at Bologna is considered his finest; best known by his frescoes in the palace of Fontainebleau. His *Martyrdom of St. Peter and St. Paul* is in Dresden.

ABBEY, EDWIN AUSTIN (1852–1911). An American figure painter and illustrator, among the strongest colorists and most intellectual painters. His most important works are *Search for the Holy Grail*, Boston Public Library (1891–1901); *Coronation of King Edward* (1901); three mural paintings, Capitol at Harrisburg, Pa. (1902–1911); *A May-Day Morning, Fiammetta's Song, Crusaders Sighting Jerusalem*, and *Columbus in the New World*. He was a member of the Legion of Honor, the Royal Academy, the National Academy, the Royal Bavarian Academy, and many art societies.

ABBOTT, EMMA (1849–1891). An American soprano; born in Chicago, Ill.; studied in Milan and Paris; made her début in Covent Garden, London, as Maria in *La fille du régiment;* sang in America in *Martha, Faust, Les Huguenots*, and *Chimes of Normandy;* most widely known American singer of her time, except, perhaps Clara Louise Kellogg. She married E. J. Wetherell in 1873.

ABINGTON, FRANCES (1737–1815). A famous English actress who was a flower-girl at the theaters but made her first appearance as Miranda in the *Busybody* at the Haymarket, in London (1765). After an absence of 10 years she returned to England at the invitation of Garrick and played for 18 years in Drury Lane, and, later, at Covent Garden. She was the original Lady Teazle (1777), and played many Shakespearean rôles. She became the leading actress of her time; her last appearance was on April 12, 1799.

ABT (*abpt*), **FRANZ** (1819–1885). A German song writer and musical conductor; kapellmeister at the court theater in Bernberg in 1841, at Zürich (1842–1852); a prolific composer; published about 600 books of music. Some of these contain from 20 to 30 numbers. His songs are remarkable for simplicity and clearness of melody; visited the United States in 1872. Among his best known songs are "Wenn die Schwalben heimwärts zieh'n" (When the Swallows Homeward Fly); "Gute Nacht, du mein herziges Kind;" "Schlaf' wohl, du süsser Engel;" and "Leuchtendes Augen."

ACHENBACH, ANDREAS (1815–1910). A German marine and landscape painter; born at Cassel; one of the most famous of the Düsseldorf School. His works are chiefly scenes on the Rhine, in Holland, and Norway. Many of his works are owned by private collectors in the United States.

ACHENBACH, OSWALD (1827–1905). A German landscape painter; born in Düsseldorf; brother and pupil of Andreas Achenbach. His works are scenes in the Bavarian Alps, Switzerland and Italy. Many of his works are owned in the United States.

ACHURCH, JANET (1864–1917). An English actress, born in Lancashire, appeared in London at the Olympic Theatre (January 1, 1883); with Beerbohm Tree (1887); created the part of Nora Helmer in *A Doll's House* at the Novelty Theatre (June 7, 1889) on the occasion of the first presentation in England of an Ibsen play; appeared in the United States with Richard Mansfield (1895); acted Cleopatra to Louis Calvert's Antony, at the Olympic (1897). She married Charles Charrington.

ACKERMANN, KONRAD ERNST (1712–1771). A German actor and one of the founders of dramatic art in Germany; with the famous Schönemann company at Lünenburg (1740). His theater at Hamburg (1765) set the standard of dramatic art for his country.

ADAM, ADOLPHE CHARLES (1803–1856). A French composer of light operas which had a great vogue; he was a pupil of the great master of opera, Boieldieu. Of his 53 pieces *Pierre et Catherine, Le Postillion de Longjumeau, Cantique de Noël*, and the ballets *Faust* and *Giselle* were the most popular.

ADAM, ROBERT (1728–1792). English architect, who studied for three years in Italy, and produced a restoration of the palace of Diocletian at Spalato, Dalmatia. He acted as royal architect to the king (1762–68), built the Adelphi Terrace, London, many private houses, and greatly influenced style in architecture for many years. Numerous interiors and no little furniture were designed by him.

ADAMS, EDWIN (1834–1877). An American actor; born in Massachusetts; first appearance at the Boston National Theatre (August 29, 1853) as Stephen in *The Hunchback;* played Hamlet with Kate Bateman and J. W. Wallack in New York at the Winter Garden (1861); Robert Landry in *The Dead Heart* (1866); at the opening of Booth's Theatre (February 3, 1867), and played there Mercutio, Iago, and Enoch Arden.

ADAMS, MAUDE (1872–). An American actress whose family name was Kiskadden, but she adopted the maiden name of her mother. She was born in Salt Lake City; appeared in children's parts in the West; joined E. H. Sothern's company in New York, playing in *The Midnight Bell* (1888); member of Charles Frohman's stock company; played with John Drew in *The Masked Ball* (1892); Lady Babbie in *The Little Minister* (1898); Juliet to William Faversham's Romeo (1899); The Duc de Reichstadt in *L'Aiglon* (1900); Miss Phoebe in Barrie's *Quality Street* (1902), and in *Peter Pan* (1906). Some of her other dramas were Rostand's *Chantecler* and Shakespeare's *Romeo and Juliet* and *As You Like It*.

ADAMS, SUZANNE (1873–). An American soprano; born in Cambridge, Mass.; studied with Marchesi in Paris; made her début (1894) at the Paris Opéra as Juliette in Gounod's *Romeo et Juliette;* appeared at Covent Garden, London (1898); at the Metropolitan Opera House in New York (1898 and 1899); married Leo Stern, the violoncellist (1898); she also appeared in other popular rôles.

AETION (c. 350 B. C.). A Greek painter praised by Cicero, Pliny, and other Latin authors, especially for his picture of the marriage of Alexander and Roxana. No work of his survives.

AGATHARCHUS (*ăg-ă-thär'kŭs*) (about 480 B. C.). A Greek painter; noted as the first scene painter; employed perspective in opposition to the school of Polygnotus.

AGESANDER (*ăj-ĭsăn'dĕr*) (about beginning of first century B. C.). A Greek sculptor of the school of Rhodes. Pliny says he was one of the executors, with Athenodorus and Polydorus, of the celebrated group of *Laocoön* discovered near the baths of Titus in the sixteenth century.

AGORACRITUS (*ag"o-rak'ri-tus*) (fifth cent. B. C.). Greek sculptor, born at Paros, and became a favorite pupil of Pheidias, some of whose work he rivaled, including the great statue of Nemesis. Part of the hand of this is now in the British Museum.

AGOSTINO DI DUCCIO (1418–1498). An Italian sculptor and architectural decorator; born at Florence; one of the greatest of the middle early Renaissance. His work includes a series of reliefs in the cathedral at Modena; the tomb of Sigismundo Malatesta and other decorations in the interior of San Francesco at Ramini; the façade of San Bernardino at Perugia, one of the finest examples of Renaissance sculpture decoration; and the *Madonna* in the Opera del Duomo.

AGRICOLA, CHRISTOPH LUDWIG (1667–1719). A Bavarian landscape painter; born at Ratisbon. His works are to be seen in Dresden, Vienna, Florence, and Naples. He excelled in producing effects of climate and color and light.

AHL (*āl*), **HENRY HAMMOND** (1869–). An American painter who studied in Munich and Paris. Paintings of his are in the galleries of the Worcester Art Museum, Boston Art Museum, Corcoran Art Gallery, Hartford Athenaeum, and other places, and murals in several churches. Painted portraits of Justice Moody, David B. Henderson, and Senator Hoar.

AIKMAN, WILLIAM (1682–1731). A Scottish portrait painter; noted for portraits of Allen Ramsay, Gay, Thomson, and John, duke of Argyll.

AINMULLER, MAX EMANUEL (1807–1870). A German painter; born in Munich; director of the royal

manufactory of stained glass at Munich (1844), where he directed the making of much stained glass for the cathedrals of Cologne, Ratisbon, Speier, St. Paul's at London, and St. Peter's College at Cambridge. Views of the interior of Westminster Abbey and others by him are in the Munich Gallery, the National Gallery at Berlin, and elsewhere.

AKERS (*ākarz*), **BENJAMIN PAUL** (1825–1861). An American sculptor; born in Westbrook, Me. It is said that the character of Kenyon in Hawthorne's *Marble Faun* is drawn after Akers. Among his noted works are *Una and the Lion, Milton, The Dead Pearl Diver, Isaiah,* and bust and medallions of Longfellow, Edward Everett, and Sam Houston.

ALARD, JEAN DELPHIN (1815–1888). A French violinist; born in Bayonne. He was a pupil of Habeneck and Fétis; succeeded Baillot as first violinist to the king (1840); professor of the violin at the Paris Conservatory (1843–1875); Sarasate was one of his pupils; represented the modern French school of violin playing; wrote several compositions and an *École du violon* used in the Conservatory.

ALAUX, JEAN, or **LE ROMAIN** (1786–1864). A French historical painter; born at Bordeaux; a pupil of Vincent and Guérin; won the Grand Prix de Rome (1815); director of the French Academy at Rome (1847–1850); a member of the Institute (1851). His chief works include *Pandora brought from Heaven by Mercury* in the Palace of St. Cloud until destroyed in 1870. *Burial of Our Lord* at Notre Dame de Loretto at Paris, and 29 paintings in the museum of Versailles.

ALBANI (*äl-bä'nē*), **EMMA** (1852–1930). Her original name was Emma Lajeunesse, and she was born in Quebec. At 7 she first sang at Montreal, then studied under Duprez in Paris and Lamperti in Milan, who advised her to adopt the stage name of Albani. She made her début as Amina in *La sonnambula* at Messina (1870); has sung in opera in the principal cities of Europe and America as Senta in the *Flying Dutchman,* Elisabeth in *Tannhäuser,* Elsa in *Lohengrin,* Marguerite, Lucia, Mignon, Ophelia, and Isolde; also in oratorio; married Ernest Gye, the singer, who died in 1925. In the same year she was made a Dame of the British Empire.

ALBANI (*äl-bä'nē*), **FRANCESCO** (1578–1660). An Italian painter of the Carracci school; born at Bologna; follower of Guido Reni, sometimes styled "the Anacreon of painting" on account of his leaning to the classical; opened an academy in Rome, where much of his best work is to be seen. This includes frescoes of scenes from Ovid in the Torlonia Palace; *Four Seasons* in the Borghese Gallery at Rome; *Cupids Dancing* and 10 others in Dresden; *Cupid Disarmed, The Toilet of Venus,* and 13 others in the Louvre.

ALBERTI (*äl-bâr'tē*), **DOMENICO** (c. 1710–1740). An Italian composer who wrote many sonatas characterized by what is now called the Alberti bass, once extremely popular.

ALBERTI, LEON BATTISTA (1404–1472). An Italian architect and writer; born in Venice; leader of the second phase of early Italian Renaissance architecture both in theory and practice; engaged in rebuilding St. Peter's and the Vatican. Among his works is the façade of St. Francis at Rimini. He wrote *De Re Aedificatoria,* the first great work on architecture.

ALBERTINELLI, MARIOTTO (1474–1515). An Italian painter; born in Florence; friend and colleague of Fra Bartolommeo, with whom he studied under Cosimo Roselli. His works are a splendid *Visitation* at Uffizi, a *Holy Family* at Pitti, and an *Annunciation* at the Academy in Florence; with Fra Bartolommeo he produced an *Assumption* at Berlin and a *Last Judgment* in Florence.

ALBONI (*äl-bō'nē*), **MARIETTA** (1823–1894). An Italian contralto; born at Cesena; next to Malibran the greatest contralto of the nineteenth century; sang in all of the principal cities of Europe (1846–1847); in rivalry with Jenny Lind at Covent Garden, in London. Her voice had a compass of two and one half octaves, ranging as high as mezzosoprano, possessing power, sweetness, fullness, and flexibility. Her last appearance in opera was at Munich (1872). After 1866 she lived mainly in Paris.

ALBRECHTSBURGER, JOHANN GEORG (1736–1809). An Austrian musician; one of the most learned contrapuntists of his age; court organist (1772); kapellmeister at St. Stephen's Cathedral (1792); taught Beethoven, Hummel, Moscheles, Seyfried, and Weigl. Three volumes of his discourses on harmony were published in 1826, and translated into English in 1855.

ALCAMENES (*al-kam'i-nēz*) (c. 425 B. C.). Evidently a pupil of Pheidias, he is remembered chiefly for his Hephaestos, Aphrodite, a head of Hermes, of which a copy was dug up in 1903, and probably some of the decorations of the Parthenon.

ALDA, FRANCES (1883–). Operatic soprano, born in Christchurch, New Zealand; studied under Mme. Marchesi; married Guilio Gatti-Casazza, general director of the Metropolitan Opera House, New York, for many years. She made her début at the Opéra-Comique, Paris, 1904, and in New York in 1908 when she appeared as Gilda in *Rigoletto.* In Brussels she created leading part in opera drawn from the *Sleeping Beauty,* and other rôles are Marguerite in *Faust,* Countess in *Figaro.* Took many leading parts at the Metropolitan and made many operatic tours in America.

ALDRICH, RICHARD (1863–). American musical critic, connected with the N. Y. *Tribune* (1891–1902), and chief critic of the *Times* till 1924. He wrote on Schubert, many musical biographies, and with Krehbiel a *History of the Philharmonic Society;* also translated Lilli Lehman's *How to Sing.*

ALDRIDGE, IRA FREDERICK (about 1810–1867) "The African Roscius"; a colored tragedian, said to have been born a slave at Belair, Md. Others said he was the son of a native of Senegal; made his début at the Royalty Theatre, London, as Othello; also played Aaron in *Titus Andronicus,* Zanga, Orozembo, Rolla, and others; played Othello to Edmund Kean's Iago in Belfast; won great success and many decorations from royalty in Europe.

ALEXANDER, JOHN WHITE (1856–1915). An American portrait and figure painter; born in Allegheny City, Pa.; studied at the Royal Academy at Munich and under Frank Duveneck; has attained the highest rank in America. His works include numerous portraits in private European and American collections; portrait of Walt Whitman in the Metropolitan Museum at New York; *The Pot of Basil* in the Boston Museum; *In the Café* in the Philadelphia Academy; *La femme rose* in the Carnegie Gallery at Pittsburgh; *The Green Bow* in the Luxembourg at Paris; and six mural decorations in the Congressional Library at Washington.

ALGARDI (*äl-gär'dē*), **ALESSANDRO** (1598–1654). An Italian sculptor and architect; born at Bologna; studied painting under Carracci and sculpture with Conventui. Next to Bernini he was the most prominent representative of the Baroque school. His chief works are Saint Philip Neri at Bologna; the tomb of Leo XI. at Saint Peter's; the largest alto-rilievo in the world in Saint Peter's, representing Attila's retreat from Rome.

ALLAN, DAVID (1744–1796). A Scottish painter; born at Alloa; went to Rome (1764–1777); gained the gold medal at the Academy of St. Luke for the best historical composition (1773), *Origin of Painting;* returned to London and painted portraits (1777); removed to Edinburgh (1780); succeeded Runciman as head of the Trustees' Academy (1786); illustrated Allan Ramsay's *Gentle Shepherd.* He excelled in humorous domestic subjects.

ALLAN, SIR WILLIAM (1782–1850). A Scotch painter; born in Edinburgh; studied there and in London; went to St. Petersburg (1805) and traveled in Russia and Turkey; returned to Scotland (1814) and took up historical subjects, such as *John Knox Admonishing Queen Mary, Queen Mary Signing Her Abdication, Death of Regent Murray,* which gained him an A. R. A., *Polish Exiles on Their Way to Siberia, The Moorish Love-Letter,* which gained him a seat in the Royal Academy, *A Slave-Market in Constantinople, The Battle of Prestonpans, Waterloo,* bought by the duke of Wellington, and many others.

ALLEGRI, GREGORIO (about 1586–1652). An Italian composer; born in Rome; studied under Nanini and was a friend of Palestrina; in the choir of the Sistine Chapel at Rome; one of the earliest composers for stringed instruments; wrote the *Miserere* for two choirs. It is rendered annually on Good Friday at the Sistine Chapel. This is the work which Mozart at 14 wrote from memory after hearing it twice. Allegri is a link between the Roman and Neapolitan periods of Italian music.

ALLEN, FRED HOVEY. See under INVENTORS.

ALLEN, VIOLA (1867–). An American actress; daughter of the actor C. Leslie Allen. When 15,

she appeared in *Esmeralda* at the Madison Square Garden, New York (1882); played later with John McCullough, Tommaso Salvini, Lawrence Barrett, Joseph Jefferson, and W. J. Florence; was at the Empire Theatre, New York (1893–1897) in *The Masqueraders* and *Under the Red Robe*. In 1898 she made a great success as Glory Quayle in Hall Caine's *The Christian*, and in 1900 also *In the Palace of the King* by F. Marion Crawford and Lorimer Stoddard. Married Peter Duryea in 1906.

ALLEYN, EDWARD (1566–1626). An English actor, manager, and founder of Dulwich College; born in St. Botolph, just out of London; went on the stage shortly before Shakespeare came from Stratford. His greatest successes were as the Jew in Marlowe's *Jew of Malta*, Tamburlane, and Faustus. He owned several playhouses; was an associate of Philip Henslowe, a friend of Shakespeare and Ben Jonson, and a patron of Dekker.

ALLONGE (*a-lunj'*), **AUGUSTE** (1833–1898). A French landscape artist; born in Paris; studied under Léon Cogniet; strong in charcoal landscapes and in oil. His best charcoal is *Moulin de Givry* and his oils are views on the Somme.

ALLSTON, WASHINGTON (1779–1843). An American painter; born in Waccamaw, S. C.; was graduated from Harvard (1800); earliest art influences from Pine, the portrait artist, and Malbone, the miniature painter; studied at the Royal Academy, London, where Benjamin West was president; then at the Louvre and in Italy; was associated with Vanderlyn, Thorwaldsen, and Coleridge; spent four years in Rome and returned to America (1809); soon went to London, where he painted and exhibited with success. Among his important works are *The Dead Man Revived* in the Pennsylvania Academy of Fine Arts; *St. Peter Liberated by the Angels, Uriel in the Sun*, and *The Prophet Jeremiah* in Yale College; his unfinished *Belshazzar's Feast* in Boston; and many smaller works.

ALMA-TADEMA (*ahl'ma tah'de-ma*), **SIR LAWRENCE** (1836–1912). An eminent painter; Dutch by birth, Belgian by training, and English by adoption; born in West Friesland; studied under Wappers and Leys at Antwerp. His work depicts life and manners of the ancient Greeks and Romans. *Roman Amateur, Pyrrhic Dance, The Roses of Heliogabalus, Spring, The Conversion of Paula*, and *Thermae Antoninianae* are among his most important; member of the Royal Academy (1879) and knighted in 1899.

ALTDORFER (*ahlt'dor-fer*), **ALBRECHT** (1488–1538). A Bavarian painter and engraver; celebrated pictures are *The Victory of Alexander at Arbela, Adoration of the Shepherds*, and *Susanna at the Bath*, besides over 100 works on copper. He was also a practical architect.

ALVAREZ (*ăl'va-res*), **JOSE** (1768–1827). A Spanish sculptor; born at Priego, Cordova; was a stone mason with his father; studied at the Academy of Granada; gained the highest prize at the Academy of San Fernando (1799); studied in Paris; removed to Rome, where he gained the friendship of Canova and Thorwaldsen. His chief works are a *Ganymede*, bas-reliefs on the Quirinal in Rome, and his colossal group *The Defense of Saragossa* in the Museum of Madrid.

AMATI (*a-mä'tī*) (1520–about 1700). An eminent Italian family of violin makers who lived at Cremona. It consisted of **ANDREA**, the founder of the Cremona school of violin makers; **NICOLA**, his younger brother, made basses; **ANTONIO** and **GERONIMO** were sons of Andrea; **NICOLA** (1596–1684), Geronimo's son, was the most eminent of the family and taught Antonio Stradivari and Guarneri. The family ended with Geronimo, the son of Nicola.

AMATO, PASQUALE (1879–). Italian baritone, who was born in Naples, educated in civil engineering, but later studied in the Naples Conservatory for three years. He appeared first on the stage at Naples as Germont in 1900, toured several lands, and made his American début at the Metropolitan, New York, 1908. Created several parts, including Jack Rance in *The Girl of the Golden West*, and has appeared in many rôles.

AMERLING, FRIEDRICH (1803–1887). An Austrian painter; born at Vienna; studied at Vienna, London, Paris, and Munich; went to Rome in 1831; most important Austrian portrait painter, his portraits numbering more than 1,000.

AMES, JOSEPH (1816–1872). An American portrait painter; born in Roxbury, N. H.; studied at Rome, where he painted a portrait of Pope Pius IX.; worked at Boston, Baltimore, and New York; elected a member of the National Academy of Design (1870). Among his best portraits are those of Emerson, Rachel, Ristori, Clarence H. Seward, Webster, Choate, and President Felton of Harvard. His *Death of Webster* is one of his best ideal subjects.

AMMANATI, BARTOLOMEO (1511–1592). Celebrated Florentine architect and painter, designer of numerous buildings in Rome and Florence, such as the addition to the Pitti Palace, the bridge over the Arno, which has curved arches that have withstood the floods while more modern structures have been swept away. He married the poet Laura Battiferri (1550).

AMSLER, SAMUEL (1791–1849). A Swiss engraver, who from 1816 to 1829 studied and executed various works in Italy, and then succeeded his old master, Hess, as professor of copper engraving at the University of Munich. Some of his great works are a full length *Christ, The Triumphal March of Alexander the Great*, suggested by sculptured works of Thorwaldsen and Dannecker, and *The Union between Religion and the Arts*, on the last of which he spent six years.

ANDERSON, ALEXANDER (1775–1870). Early American engraver on wood, who at 12 made some first designs without previous training except his own observation of others. By rolling copper pennies out thin he obtained plates on which he made many engravings for medical works. In 1796 he took his M. D. at Columbia University, but practiced only a short time. After the death of all his family in the yellow fever scourge in 1798, he turned to illustrating such works as Shakespeare's plays, Holbein's *Dance of Death*, Webster's *Elementary Spelling Book*, and made 300 cuts for Bewick's *Quadrupeds*. He has been justly called the father of wood engraving in America. At the age of 93 he cut a series of illustrations for Barker's *Historical Collection of New Jersey*.

ANDERSON, MARY (1859–1940). An American actress, whose father was an officer in the Confederate Army until his death in 1863. Acting on advice of Charlotte Cushman, she studied for the stage and appeared first when 16 as Juliet at Louisville, Ky. For several seasons in London and America, she developed Shakespeare parts, including Rosalind, Hermione, Perdita, and Lady Macbeth. She also appeared as Galatea in Gilbert's play and as Ion in Talfourd's. In 1890 she married Antonio de Navarro and lived afterward in Europe.

ANDREA DEL SARTO (1486–1531). Celebrated Italian painter, son of Andrea called Del Sarto, that is, the tailor, and noted for his frescoes and his portraits. Some of his contemporaries called him "the faultless painter" because of his skill, but his works lacked elevation or soul. Among his frescoes are one representing the *Nativity, Baptist Preaching in the Desert, Beheading of the Baptist, Madonna del Sacco*, and the *Last Supper*. Among his portrait figures, many of which appear in the frescoes, are several of his wife, some madonnas, a Charity, a Piéta, and two or three of himself. He married Lucrezia, wife of a hatter, but she made his life unhappy by her ways and unfaithfulness. In Browning's poem *Andrea del Sarto*, we have a fairly authentic interpretation of the spirit of Andrea, though the poem is not true to fact at every point.

ANDREINI, GIOVANNI BATTISTA (1578–1650). A Florentine actor and playwright whose *L'Adamo* has been thought the work which suggested to Milton the topic of *Paradise Lost*. He was the son of actor parents, and his mother Isabella was a celebrated poet. During the reign of Louis XIII. at Paris he played in many actor rôles. Among his mother's works, *Mirtilla*, is a pastoral drama of some merit.

ANGELICO (*ăn-jĕl'ĕ-kō*), **FRA** (1387–1455). A gifted Italian painter who passed his life in a convent. His paintings of religious subjects are of a high order, and show great beauty and skill. Among the best of these is his *Last Judgment* in the Florentine Academy; the *Coronation of the Virgin;* frescoes at the Convent of San Marco, where there is also a large *Crucifixion;* the celebrated *Madonna*, surrounded by saints and angels, in the Uffizi; and several decorations in the Vatican. He is the last and greatest of the painters in the transition from the Middle Ages to the Renaissance.

ANGLIN (*ăng'lĭn*), **MARGARET** (1876–). A Canadian actress; born at Ottawa, Canada; daughter

of the Hon. T. W. Anglin, then speaker of the House of Commons; studied at the Empire Dramatic School of Acting in New York City; made her début in *Shenandoah* in New York in 1894; played Roxane with Richard Mansfield in *Cyrano de Bergerac*. Mimi in *The Only Way*, Mrs. Dane in *Mrs. Dane's Defence*, Mabel Vaughn in *The Wilderness*, and in 1907 in *The Great Divide;* in 1908 she went to Australia, meeting with signal success; in 1909 and 1910 playing the title rôle in *The Awakening of Helena Ritchie*, in which she was highly praised. Later she played in Greek tragedies, notably in *Antigone* and *Electra*, and in 1916 led 1,200 players in a revival of *As You Like It* at the Shakespeare celebration in St. Louis.

ANIMUCCIA, GIOVANNI (c. 1490–1571). Florentine composer of music and master of the St. Peter's choir, Rome, from 1555 to his death. His *Laudi*, or hymns of praise, gave rise to some of the early forms of the oratorio. Palestrina, his friend and possibly a pupil, succeeded him at St. Peter's.

ANTHEMIUS (d. c. 538). A Greek mathematician and architect, who planned the great church of St. Sophia at Constantinople, finished in 537. Though this had to be restored 18 years later owing to the collapse of the dome, it set the style for Byzantine architecture for a long time. The emperor Justinian encouraged his work.

ANTOINE, ANDRE (1858–). A French actor who founded the Théâtre Libre of Paris to secure a medium for newer types of plays, those of somewhat realistic and unusual subject and manner. Encouraged by Zola and others, he produced dramas by Brieux, Curel, and others of the modern school. Later (1894) he connected himself with the Gymnase and two years later with the Odéon, where he remained till 1914. His playhouse had an immense effect on the drama of all nations.

ANTOKOLSKY (*an-to-kel'skĭ*), **MARK MATVEYEVITCH** (1842–1902). A Russian sculptor; born at Vilna of poor Jewish parents; studied at the Academy of Fine Arts at St. Petersburg, where he won prizes. His famous statue, *Ivan the Terrible* won for him fame, a seat in the Academy, and the favor of the czar Alexander II.; settled in Paris and became a chevalier of the Legion of Honor.

ANTONELLO DA MESSINA (about 1447–1493). An Italian painter of the Renaissance; born at Messina. He is said to have been the introducer of oil painting into Italy, the secret of which he learned in Flanders. His chief works are a *Salvator Mundi* in the National Gallery in London, a *Crucifixion* in the Antwerp Gallery, and numerous portraits, some of which are on wood.

APELLES (*a-pel'lees*) (fourth century B. C.). The most celebrated painter of ancient times; probably a native of Asia Minor; studied at Ephesus; went to Macedonia, where he painted the portraits of Philip, and of Alexander the Great, whom he frequently painted, as Alexander would sit to no other artist. His most famous portrait represented Alexander wielding the thunderbolt. His other noted works were either mythological or allegorical, including *Anadyomene, Artemis Surrounded by Maidens*, and *Slander;* of the latter Lucian gives a description said to have inspired Botticelli, Dürer, and others. He returned to Asia, where most of his celebrated works were found. His accurate drawing and fine coloring are described as remarkable. His daily practice in drawing was so intense it gave rise to the Latin proverb, *Nulla dies sine linea.*

APOLLODORUS (*ă-pŏl-ŏ-dō'rŭs*). (fifth century B. C.). An Athenian painter; said to have introduced the effects of light and shade in place of flat color used by his predecessors.

APOLLODORUS (second cent. A. D.). A Greek architect, who built for the emperor Trajan a stone bridge over the Danube, the forum of Trajan at Rome, the Odeum, public baths, and some triumphal arches. After Hadrian came into power, Apollodorus was banished and not long afterward killed. He dedicated a work on *Siege Engines* to Hadrian.

ARDITI (*ar-dē'tĭ*), **LUIGI** (1822–1903). An Italian composer and musical conductor; conducted opera many seasons in New York and London; was Patti's favorite conductor; wrote famous waltz songs sung by Patti and other prima donnas, and composed the operas *The Spy, The Brigands*, and *The Corsair.*

ARENZKY (*ă-rĕn'skē*), **ANTON STEPANOVITCH** (1861–1906). Russian composer who was born at Novgorod; for a time was professor of harmony at Moscow, and from 1895 to 1901 conducted the Imperial Court Choir. Some of his many works are the *Dream on the Volga* and *Raphael*, operas; *Nuit d'Egypte*, a ballet; *March solennelle* for the orchestra, and numerous small pieces.

ARISTIDES OF THEBES (*ăr-ĭs-tī'dēz*) (fourth century B. C.). A Greek painter; son and pupil of Nicomachus and contemporary of Apelles; the most famous ancient painter of the expressions of the mind and of the passions of men.

ARISTOXENUS (*ăr-ĭs-tŏks'ĭ-nŭs*) (fourth century B. C.). The greatest student in Greek antiquity of the science of music and rhythm; born at Tarentum; wrote 453 treatises, several of which were on music. Part of his *Elements of Harmony* have been preserved. He declared that the notes of the scale should be studied, not as Pythagoras said according to mathematical ratio, but according to ear.

ARMITAGE, EDWARD (1817–1896). An English painter; born in London; studied in Germany and France; a pupil of Delaroche, whom he assisted on the famous *Hémicycle;* chief works are *Caesar's First Invasion of Britain*, a prize painting, and some frescoes in St. John's (Roman Catholic) Church in London and in the House of Parliament; professor of painting in (1875) and member of (1878) the Royal Academy.

ARMSTEAD, HENRY HUGH (1828–1905). An English sculptor; famous for his groups on the Albert Memorial at London; history of King Arthur and Sir Galahad in carved panels in the New Palace at Westminster; and effigies of Bishop Wilberforce at Winchester, Lord Thynne at Westminster Abbey, and a large fountain at King's College, Cambridge.

ARNE (*ärn*), **THOMAS AUGUSTINE** (1710–1778). An eminent English composer; born in London; studied the violin; wrote an opera, *Rosamond;* a comic operetta, *Tom Thumb or the Opera of Operas; Comus; Rule Britannia*, the national air, first given in the masque of *Alfred;* two oratorios, *Judith* and *Abel;* a number of operas, including *Artaxerxes;* and many glees, songs, catches, and canons, as well as the music for Garrick's *Ode to Shakespeare.* In the rendering of *Judith* at Covent Garden (1773), he first introduced feminine voices into the oratorio chorus.

ARNOLFO DI CAMBIO (c. 1232–1302). An Italian architect; born at Colle, Tuscany; the most eminent Florentine architect of the Gothic style; a pupil of Niccola Pisano. His masterpiece is the Church of Santa Croce at Florence.

ARNOULD, SOPHIE (1744–1803). A famous French actress and singer; born in Paris in the room in which Admiral Coligny was murdered. For 21 years (1757–1778) she was the most popular singer in Paris, especially in Gluck's *Iphigenia in Aulis.*

ARTHUR, JULIA (1869–). An actress born in Hamilton, Ontario, her real name being Ida Lewis, but she took her mother's name; married Benjamin P. Cheney, Jr. At early age took part in home theatricals, acting as Gamora in *The Honeymoon* and Portia in *The Merchant of Venice*, and at 15 appeared in *Richard III.* Her first New York success was in *The Black Mask*, and then in the A. M. Palmer Company, mainly as Mercedes (1893); in London in the Irving cast she played next to Ellen Terry (1895), and especially as Rosamund in Tennyson's *Becket* in New York (1896), and as Rosalind at Wallack's (1898), and in *More than Queen*, Broadway (1899).

ARUNDEL (*ar'un-del*), **THOMAS HOWARD, EARL OF** (1592–1664). Born in Essex; held several court offices. First English art collector; his valuable books, works of fine arts, including busts, statues, gems, and inscribed marbles were unrivaled. The most widely known were the ARUNDEL MARBLES, these being a collection of ancient sculptures consisting of 37 statues, 128 busts, and 250 inscribed stones, which were found on the island of Paros about 1610. They were collected by Mr. W. Petty, purchased by Lord Arundel, and given (1664–1667) by his grandson, Henry Howard—afterward Duke of Norfolk—to the University of Oxford.

ASHMOLE (*ash'mōl*), **ELIAS** (1617–1692). English collector of old objects which he gave (1677) to Oxford University where they were installed six years later in a special building. This museum was the first open to the public in Great Britain.

ATTAVANTE (c. 1455–c. 1520). A Florentine artist and probably the greatest miniature painter of the Italian Renaissance. His best work was done under the patronage of Matthias Corvinus, king of Hungary.

AUBER (*ō-bair'*), **DANIEL FRANCOIS ESPRIT** (1782–1871). Celebrated French composer who collaborated often with A. E. Scribe (q. v.), and wrote music to many great successes in light or sentimental opera. His *Masaniello* (1828) attained great fame all over Europe for the songs, choruses, and overture; the duet *Amour sacré de la patrie* had something to do with the revolution of 1830. Some other operas were *Le Maçon* (1825); *L'Ambassatrice* (1836), *Les Diamants de la Couronne* (1841), *Manon Lescaut* (1856), and a version of Scott's *Kenilworth* (1823).

BACH (*bäk*), **JOHANN SEBASTIAN** (1685–1750). A celebrated German musician; born at Eisenach. At the age of 15 he entered the Michaelis School at Lüneburg; filled successively the following positions: Violinist in the court at Weimar; organist at Arnstadt; organist at Mühlhausen; court organist at Weimar; Kapellmeister at Köthen; cantor at the Thomas-Schule; organist and musical director in two churches at Leipzig; honorary court composer to the elector of Saxony; honorary kapellmeister to the duke of Weissenfels. The author of much magnificent church music, but best known by his *Preludes* and *Fugues*. Among his works are 190 church cantatas, about 25 secular musical vocal selections, as many pieces for the orchestra, some chamber music, two books for the clavichord and four for the harpsichord, a considerable collection of organ music, and a series of arrangements of music by other composers. His influence on classical music has been far-reaching and highly beneficial.

BACH, KARL PHILIPP EMANUEL (1714–1788). Third son of Johann Sebastian Bach (q. v.); four others also attained fame in music. Indeed the Bach family was celebrated for more than 200 years. From 1625 to 1775, there was usually a Johann Christian Bach among the well-known German musicians, six different men in all. K. P. E. Bach was born at Weimer and died at Hamburg. Among his great compositions are the *Magnificat* (1749), over 175 sonatas and other solos, *Der Israeliten in der Wuste* (1779), *Sonaten fur Kenner unde Liebhaber*, and the concertos in G major and D major, most of which are availabe at present to music lovers.

BACHE (*bāch*), **WALTER** (1842–1888). English pianist who studied for three years (1862–65) under Liszt at Rome, and did much to introduce the latter's works into England, also founding the Liszt scholarships. Professor at the Royal Academy of Music. His older brother, Francis Edward (1833–58) composed a trio for piano and strings which was very famous.

BAILLOT, PIERRE MARIE FRANCOIS DE SALES (1771–1842). One of the great school of eminent French violinists, and author of a valuable treatise, the *Art du Violon*, still much used by musicians. For his skilful technique in chamber music and the old classics he for years was popular as a concert artist in most European centers.

BAILY, EDWARD HODGES (1788–1867). A notable British sculptor, who began by making wax figures and busts of his associates, and who later studied under Flaxman and in the regular schools. His chief works are some bas reliefs on the Marble Arch in Hyde Park, London, and several statues, including that of Nelson in Trafalgar Square. He was made an R. A. in 1821.

BALAKIREV (*bä-lä-kē'rĕf*), **MILY ALEXIEVITCH** (1837–1910). Founder of the new Russian school of music; self taught as a musician. Made début as a pianist in 1855. For many years taught in a "Free Music School"; conducted concerts at Leningrad (1867–70); and introduced Liszt and other German music into Russia. His own compositions include two symphonic poems, music to *King Lear*, *Islamei*, an oriental phantasy, and many pieces for the pianoforte. His collection of folk-songs of Russia (1866) had a great influence on later musicians.

BALFE (*bälf*), **MICHAEL WILLIAM** (1808–1870). British musician of Irish descent, who began as a violonist at the age of seven, and later sang at Norwich in *Der Freischutz*, but afterward gave his life to musical composition of popular operas. With Malibran at the Scala of Milan and in his own *Siege of Rhodes* and *The Maid of Artois* in London he attained a great vogue. Of his many works, some still well known are *Joan of Arc* (1837), *The Bohemian Girl* (1843), *The Bondman* (1846), *Sicilian Bride* (1852), and an adaptation from Scott called *Richard en Palestine*, later renamed *Il Talismano* (1874). Two immensely popular songs *When other Lips* and *I Dreamt I Lived in Marble Halls* were composed by Balfe.

BALL, THOMAS (1819–1911). American sculptor, singer, and in early life a portrait painter, who was born in Charlestown, Mass., studied alone and later in Florence, Italy, where he remained from 1854 to 1857, and again from 1865 to 1897, when he returned and established a studio in New York City. His first sculptured bust was that of Jenny Lind, followed by many others of great singers, with whom he had much in common, since he was the first of all artists to sing the *Elijah* in America. He made an equestrian statue of Washington, now in the Boston Public Gardens; a statue of Josiah Quincy, in City Hall Square, Boston; Daniel Webster in Central Park, New York; the Lincoln Emancipation Group, Washington, and many others. Ball profoundly influenced American sculpture.

BALTARD (*bal-tär'*), **LOUIS PIERRE** (1764–1846). A French architect who designed several of the largest public buildings in Paris, but attained greater fame as an engraver, some of his best work being in *Paris and its Monuments* (1803), and a work called *The Grand Prize of Architecture*. His son, Victor, attained some note in the same field.

BALTAZARINI or **BALTAGERINI** (about the middle of the sixteenth century). An Italian musician; first violinist of his time and founder of the modern ballet.

BANCO (*ban'ko*), **NANI D'ANTONIO** (c. 1374–c. 1420). A Florentine sculptor; pupil of Donatello. *The Porto della Mandola*, on the south side of the Duomo, commenced by Niccola d'Arezzo, was completed by Banco (1408). Many of his works are about Or San Michele.

BANTOCK, GRANVILLE (1868–). An English composer of great originality and vividness; principal of the school of music of the Midland Institute at Birmingham, and later professor at the University of Birmingham. His chief works are an elaborate musical setting for *Omar Khayyam*, *The Great God Pan*, and *Atalanta in Calydon*.

BARNARD, GEORGE GREY (1863–1938). American sculptor, who studied in the Art Institute of Chicago, and under Cavelier of Paris, where he lived for 12 years, and then began to exhibit in America. Some of his greatest works are *Two Friends* (1887), *Great God Pan* in Central Park of New York; 31 statues for the Pennsylvania Capitol at Harrisburg; a statue of Lincoln in bronze at Cincinnati, severely condemned by prominent critics; and a *Monument to Democracy*, containing 400 plaster figures (1920).

BARNBY, JOSEPH (1838–1896). An English organist, composer, and conductor; appointed instructor of music at Eton College (1875) and conductor at the Royal Academy of Music (1886). Among his many other rôles were Richard III, Wolsey, David Garrick, Benedick, and Hernani. He wrote a life of Edwin Forrest (1881) and a fine sketch of Edwin Booth (1886).

BARRETT, WILSON (1846–1904). An English actor, manager, and playwright; born in Essex; manager of the Amphitheatre in Leeds; of the Court Theatre at London, securing Madame Modjeska for her first English appearance; of the Princess Theatre, where he presented the *Lights of London* for 286 nights; the *Silver King*, in which he played Wilfred Denver; played Hamlet (1884) and Othello (1897); wrote *Clito*, a tragedy; *Nowadays*, a drama; *The Sign of the Cross; Daughters of Babylon; Ben My Chree*, an adaptation of Hall Caine's *Deemster;* also adapted Hall Caine's *Bondman* and *Manxman*, and *Quo Vadis* of Sienkiewiez.

BARRY, ANN STREET (1734–1801). English actress, second wife of Spranger Barry (1719–1777), himself a favorite on the stage, especially as Romeo, in which part some preferred him to Garrick. Mrs. Barry, then Mrs. Dancer, in 1758 appeared as Cordelia in *King Lear* at Bath. Her great fame rests on a long popularity at Covent Garden in London, where some said she excelled the great Sarah Siddons in certain parts like Lady Randolph in *Douglas* and Desdemona in *Othello*.

BARRY, CHARLES (1795–1860). English architect, who studied in London, went on a long tour of Italy, Egypt and Palestine for study, and in 1831 introduced the Italian style for the Travellers' Club in Pall Mall and later for the Reform Club. He designed many private mansions; built the King Edward School in the Tudor style; two public buildings for Manchester; and his great work, the Houses of Parliament at Westminster.

BARRY, ELIZABETH (1658–1713). English actress who for many years was a chief favorite of both the court and the playhouse. In over 100 parts she continued to delight audiences for a generation, drawing forth praise from persons like Betterton, the great actor, Dryden, and Colley Cibber, the dramatist. The latter declared that the custom of giving benefit performance to prominent actors arose out of a command by James II that Elizabeth Barry should be so favored.

BARRY, JAMES (1741–1806). An Irish painter; born at Cork. Under the patronage of Burke he studied at London, Paris, and Rome. His masterpiece is a series of six panels representing *Human Culture* painted on the walls of the Great Room in Adelphi; elected to the Royal Academy (1773), but he was expelled in 1799 for critical attacks on fellow artists. His decorations at the Adelphi occupied his time for seven years. Burke remained his friend, as did also Sir Joshua Reynolds, whom Barry had attacked by his caustic criticisms.

BARRYMORE, ETHEL (1879–). American actress, who was born in Philadelphia, where she was educated in the convent of Notre Dame. She first appeared in the company of John Drew, her uncle (1896), and in the next year toured England in *Secret Service*, followed by an engagement (1898) in the Irving Company, and then two years later in *Captain Jinks* with Charles Frohman. Later she added to her fame in *A Doll's House, Mid-Channel, Hamlet, The Merchant of Venice*, and *The Second Mrs. Tanqueray*.

BARRYMORE, JOHN (1882–), and **LIONEL** (1878–). Brothers of Ethel Barrymore, continued the traditions of the family of actors. John played in Shakespeare parts and attained eminence in the motion pictures. Lionel played in *The Rivals* for the screen.

BARRYMORE, MAURICE, or **HERBERT BLYTHE** (1847–1906). An actor and playwright; born in India; educated in England and lived in America after 1875; first appearance here was in *The Shaughraun* at the Boston Theatre; leading man for Madame Modjeska (1882); for Mrs. Langtry (1887); for Mrs. Bernard Beere (1893); and for Olga Nethersole (1894).

BARTHOLDI (*bär-tôl-dē'*), **FREDERIC AUGUSTE** (1834–1904). A French sculptor; born in Colmar, Alsace; principal works: the *Lion of Belfort;* statue of Lafayette in Union Square, New York; bronze group of Lafayette and Washington in Paris; and the colossal figure in New York harbor, *Liberty Enlightening the World*.

BARTHOLOME, ALBERT (1848–). French painter and sculptor, born at Thiverval, and educated at the Lycée of Versailles. Was elected a commander of the Legion of Honor, decorated by various governments, and acted as president of the Society of Beaux Arts. His sculptures and paintings are in the galleries of the Luxembourg at Paris, Dresden, Budapest, Rome, and Copenhagen, and his monuments to Père-Lechaise, Meilhac, Rousseau, Sardou, and others are in Paris mainly.

BARTLETT, PAUL WAYLAND (1865–1925). An American sculptor; born at New Haven, Conn.; studied with Frémiet in Boston; with Cavelier in Paris; member of the Legion of Honor (1895). Among his works are an equestrian statue of General McClellan in Philadelphia; statue of General Joseph Warren in Boston; of Lafayette, presented by the school children of the United States to France, now in the Louvre, Paris; Columbus and Michelangelo in the Congressional Library at Washington; and others in the Luxembourg Museum at Paris and elsewhere. Some of his last work also takes high rank, including a group on the House wing of the Capitol at Washington and six statues in front of the New York Public Library.

BARTOK, BELA (1881–). Hungarian composer of national poems, chamber music, and numerous folk-tunes, who was born in Transylvania, at 9 became interested in music, and at 22 produced at Manchester, England a symphonic poem, *Kossuth*. Later he gave his attention to the study of national music, folk-lore, and ballads, and composed his *Bluebeard* and the pantomime, *The Wonderful Mandarin*.

BARTOLOMMEO (*bär-tô-lŏm-mē ô*), **FRA** (1469–1517). A celebrated Florentine painter of sacred subjects; born at Florence. *St. Mark* and *St. Paul* are among his best productions. He was one of the principal painters of the Florentine Renaissance. He is said to have invented the use of the lay figure.

BARYE (*ba-ree'*), **ANTOINE LOUIS** (1795–1875). A French sculptor; born in Paris; studied under Bosio and Gros. Among his works are *Tiger Tearing a Crocodile*. Some of his bronzes may be seen in Mount Vernon Place, Baltimore. Few modern artists have excelled him in animal figures.

BASTIEN-LEPAGE (*bas-tĭ-ăn-la-pāj'*), **JULES** (1848–1884). A French painter; born at Damvilliers. He died at the height of his fame; studied in Paris with Cabanel under severe privations. Among his works are *The Song of Spring, Portrait of My Grandfather, The Haymakers, The Potato Gatherers*, and *Joan of Arc Listening to the Voices* in the Metropolitan Museum at New York, *The Beggar, Love in a Village*, and *The Forge;* also portraits of Sarah Bernhardt, Albert Wolff, Edward VII., and Gambetta on his deathbed.

BATES, BLANCHE (1873–). American actress, who was born at Portland, Ore., first appeared on the stage at San Francisco (1894), in a play by Brander Matthews, acted in several comedies, in Shakespeare rôles, and then in *The Green Ruby, The Musketeers, Madame Butterfly, The Darling of the Gods*, and *The Girl of the Golden West*. Married George Creel.

BEACH, AMY MARCY CHENEY (1867–). An American pianist and composer; born at Henniker, N. H.; chief works are the *Gaelic Symphony* for full orchestra; the *Jubilate*, composed for the opening of the Woman's Building at the Columbian Exposition; *Mass in E flat;* several compositions for voice and piano; and some successful cantatas. Married (1882) Henry H. A. Beach (d. 1910).

BEARD, WILLIAM HOLBROOK (1825–1900). An American artist; born in Ohio; brother of James Henry Beard; traveled and studied in Europe; after living some time in Buffalo, removed to New York (1860); member of the National Academy (1862); noted animal painter; chief works are *Bears on a Bender, Dance of Silenus, Flaw in the Title, Darwin Expounding His Theories*, and *Bulls and Bears in Wall Street;* published *Humor in Animals* and *Action in Art*. His brother, James Henry (1814–1893), painted some historical scenes and portraits of various statesmen.

BEARDSLEY, AUBREY VINCENT (1872–1898). English artist of odd and original technique, who specialized in black and white, and in earlier days in single lines with masses of black. Though his work for years was criticised because it deliberately ignored conventions of perspective and proportion, it came to be regarded at last as the best of its type. Certain posters attracted much attention, but his masterpiece was the frontispiece to *Volpone*, often called a wonderful pen-drawing.

BEAUX (*bow*), **CECILIA** (1863–). An American artist; born in Philadelphia; studied under Sartain, and after 1899 with Bouguereau, Constant, Courtois, and Dagnan-Bouveret in Paris; member of several societies and winner of important prizes; chief works are *Last Days of Infancy, Sita and Sarita, Cynthia, The Dreamer, Mother and Daughter, A New England Woman, Dorothea and Francesca*. Her portraits of children are highly regarded for technique and interpretation of character.

BECKER, AUGUST (1821–1887). A German landscape painter; born at Darmstadt; traveled extensively; taught the English royal princesses at Balmoral; chief works are *Evening in the Bernese Oberland, Norwegian Tableland*, and *The Kaisergebirge in the Tyrol*.

BECKWITH, JAMES CARROLL (1852–1917). An American portrait painter; born at Hannibal, Mo.; studied with Carolus-Duran at Paris; elected to the Society of American Artists and the National Academy of Design (1894). His best known portraits are those of General Schofield, Judge Palmer, Colonel Appleton, Mark Twain, and of the Ogden and Parish families; exhibited *The Nautilus* at the St. Louis Exposition. The New York Public Library and Yale and Johns Hopkins Universities have some of his works.

BEETHOVEN (*bāy'tō-vĕn*), **LUDWIG VAN** (1770–1827). One of the greatest musical composers; born in Bonn, of Dutch extraction; the author of symphonies and sonatas that are known over all the world; showed early a most precocious genius for music; commenced his education as a musician at four; trained at length under the tuition of his illustrious predecessor, Haydn; revealed the most wonderful musical talent; quitted Bonn and settled in Vienna; attracted the

attention of Mozart; about the age of 30 was attacked with deafness that became total and lasted for life; continued to compose all the same, to the admiration of thousands; during his last days was a prey to melancholy. His chief works are the three trios, the first set of pianoforte sonatas, the *Sonata Pathétique*, the *First Symphony*, the ballet music to *Prometheus*, the pianoforte sonata with the favorite funeral march, the *Moonlight Sonata*, the *Kreutzer Sonata*, the *Third* or *Eroica Symphony*, the *Waldstein* and *Apassionata Sonatas*, the opera *Fidelio*, the *Fourth Symphony*, the violin concerto, the *Coriolanus Overture*, the *Mass in C*, the *Fifth* and *Sixth* or *Pastoral Symphonies*, the *Seventh* and *Eighth Symphonies*, the *Battle Symphony*, the *Glorious Moment*, the *Ninth Symphony*, the *B flat Sonata, Opus 106*, *The Mass in D*, the *Last Quartets*, and the *Last Sonatas*.

BELASCO (*bĕ-lăs'kō*), **DAVID** (1862–1931). An American playwright; born in San Francisco; in 1874 became an actor in the Metropolitan Theatre; adapted plays for the stage, such as *Hearts of Oak;* stage manager in the Madison Square Theatre, New York, and, later, in the Lyceum; wrote, with Henry C. DeMille, *The Wife* and *The Charity Ball*, also for E. H. Sothern, *Lord Chumley*, and, with Franklin Fyles, *The Girl I Left Behind Me*. Among his others are *The Heart of Maryland, Zaza, May Blossom, Men and Women, La belle Russe, Valerie, Du Barry, Naughty Anthony*, and *Madame Butterfly*.

BELLEW, HAROLD KYRLE (1857–1911). An English actor and playwright; cadet in the British navy; actor, newspaper man, and lecturer in Australia; actor in London; appeared in America in *In His Power* at Wallack's (1885); played throughout English-speaking countries with Mrs. James Brown Potter (1887); was Leander to Mrs. Potter's Hero in his own play, *Hero and Leander;* Marat in *Charlotte Corday;* Romeo to Mrs. Potter's Juliet; wrote *Yvonne* and *Iolande*.

BELLINI (*bĕl-lē'nē*), **GENTILE** (1428–1507). The son of Jacopo Bellini; was distinguished as a Venetian portrait painter; decorated, with his brother, the council chamber of the ducal palace; one of his finest pictures was the *Preaching of St. Mark*.

BELLINI, GIOVANNI (1430–1516). Brother of Gentile Bellini; produced a great many works; the subjects religious, all notably treated; had Giorgione and Titian for pupils. Among his best works are *The Transfiguration, Feast of the Gods, Blood of the Redeemer, Pietà*, a *Virgin and Child* in the Academy at Venice and another in the National Gallery at London, and *The Virgin and Child with Saints* in the Benson Collection, London.

BELLINI, JACOPO (about 1400-about 1464). The founder of a celebrated Venetian family of painters of the Renaissance; father of Gentile and Giovanni Bellini.

BELLINI, VINCENZO (1801–1835). Celebrated Italian composer of operas which for many years were immensely popular. He was born at Catania, educated at Naples, and produced his operas at Naples and Milan. *Bianca e Fernando, Il Pirata* (1827), *I Montecchi e Capuleti* (1830), in which many great contraltos have sung, *La Sonnambula* (1831), *Norma* (1831), perhaps his best, and *I Puritani* (1835) are his chief works. The last was written for the Paris theatre.

BENNETT, WILLIAM STERNDALE (1816–1875). English composer, influenced by Schumann, and Mendelssohn during study in Leipzig (1837), and became a conductor, pianist, and composer of great note. He held the chair of music at Cambridge. Some of his works are *Parisina* and *The Wood-nymphs*, overtures, *The Woman of Samaria*, an oratorio, and *Paradise and Peri*, a fantasy for the orchestra.

BENSON, FRANCIS ROBERT (1858–1939). An English actor and manager, whose first appearance was at the Lyceum with Irving in 1882, in *Romeo and Juliet*. Later he organized his own company, founded a school of acting (1901), and appeared regularly in various Shakespeare parts, the best of which were Hamlet, Lear, Coriolanus, and Petruchio. He was in charge of many of the annual Festivals at Stratford.

BENSON, FRANK WESTON (1862–). An American painter, who was born in Boston, taught in the Museum School of Fine Arts (1889–1912), and won a score of medals in various exhibitions. Besides in painting he won renown as an etcher and maker of wash drawings of wild fowl. His best works are the four decorations in the National Library at Washington.

BENOIT (*ba-nwä'*), **PIERRE LEONARD LEOPOLD** (1834–1901). A Belgian composer educated at Brussels and later conducted at the Flemish Theatre. In 1857 he won a government prize for his *Murder of Abel*, after which he traveled in Germany, and later went to Paris; and ten years later he founded the Flemish School of Music. In all his own work, which consists chiefly of songs, choruses, and small cantatas, with a few longer works, he sought to create a Flemish manner in music.

BENZIGER, AUGUST (1867–). Swiss portrait painter of celebrated personages on both continents, such as the Lord Mayor of London, Leon Bourgeois, Presidents McKinley, Roosevelt, and Taft, three popes, four presidents of Switzerland, and many others. He built the Grand Hotel, Brunnen, Switzerland, and there entertained various celebrated men and women.

BERLIOZ (*ber-le-oze'*), **HECTOR** (1803–1869). A French composer; born in La Côte St. André. He forsook medicine to study music at the Paris Conservatoire, where he gained the first prize in 1830 with his cantata, *Sardanapale*. His *Damnation de Faust*, with its famous "Rakoczy March"; *Benvenuto Cellini; Roméo et Juliette*, with its "Queen Mab Scherzo"; and the *Danse des sylphes* stamp him as the father of orchestration.

BERNARD, OLIVER PERRY (1881–). Consultant designer and technical director to the Royal Opera, Covent Garden, Boston Opera Company, British National Opera Company, and Drury Lane. Engaged in designing modern theatres, stages, and costumes for further development of dramatic productions.

BERNHARDT, SARAH (ROSINE BERNARD) (1845–1923). A French actress; born in Paris. At an early age her Jewish parents placed her in a convent at Versailles. When 14 years old she left the convent and entered the Paris Conservatoire, and there studied tragedy and comedy. Her first great success was as Marie de Neuberg, in Victor Hugo's *Ruy Blas*. Becoming very popular by her representations, notably in *Andromaque* and *Le sphinx*, she was soon recognized as the foremost actress in French tragedy; made successful appearances in the United States, and visited Switzerland, Holland, South America, Italy, Algeria, Australia, etc. In 1899 she appeared in a new rendering of *Hamlet* in Paris, and scored a most flattering triumph, and since then she appeared successfully in *L'Aiglon*, and a number of other dramas specially adapted to her genius. During the World War she played for the soldiers in France, and later made a final tour of the United States and England, after she could no longer get about unaided owing to an accident.

BERNINI (*ber-nī'nē*), **GIOVANNI LORENZO** (1598–1680). An Italian painter, sculptor, and architect; born at Naples; produced his *Apollo and Daphne* at 18, his masterpiece; designed the colonnade of St. Peter's; the most celebrated Italian sculptor of the Baroque period. He was considered the dominant power in European sculpture for over 100 years.

BERVIC, CHARLES CLEMENT BALVAY (1756–1822). A French engraver; born in Paris; achieved early fame by an engraving of Louis XVI. after Collet one of the finest works of its kind. Among others are *Laocoön, Education of Achilles* after Regnault, and *Rape of Deianira* after Guido. His works are regarded as among the choicest of the French school.

BEST, WILLIAM THOMAS (1826–1897). Celebrated English organist, from 1855 to 1894 at St. George's Hall, Liverpool, and solo player at most of the Handel festivals at Crystal Palace. He inaugurated the great organ at Albert Hall (1871), gave much attention to the works of Bach, and composed some fine *Organ Pieces for Church Use*, which are original and delicate in theme and technique.

BETTERTON, THOMAS (1635–1710). An English actor; born in Westminster; famous for his Hamlet; was buried in the cloister of Westminster Abbey. After a visit to French playhouses, at the suggestion of Charles II., he is said to have introduced innovations in the manner of making scenery for the English stage.

BETTY, WILLIAM HENRY WEST (1791–1874). An English boy actor, the talk of the town for several years, while he played in heavy parts at Drury Lane, and for a time at a salary of 75 guineas a night. Before he was 12 he acted in Voltaire's *Zaire*, and in

1804 on his first appearance at Covent Garden, troops had to be called to handle the crowds which rushed to see him. Pitt once adjourned parliament early so that the members could be on time at one of his performances. He retired in 1808 to enter Cambridge, and tried vainly after four years to restore his fame.

BEWICK (*bu'ik*), **THOMAS** (1753–1828). An English engraver, born near Newcastle-upon-Tyne. He was the founder of modern wood engraving. His greatest work is the *History of British Birds*. He cut in the end of the block instead of in the side, which was the prevailing method, and invented the use of the white line. Some of his other engravings were made for *Quadrupeds* (1790), Goldsmith's poems, and a collection of *Fables* from Aesop.

BIANCHI (*bē-än'kē*), **FRANCESCO** or **IL FRARI** (1447–1510). An Italian painter of the Ferrara school; born in Modena; seems to have been a teacher of Correggio. His *Madonna with Saints* in the Louvre is a beautiful example.

BIARD (*bē-är'*), **AUGUSTE FRANCOIS** (1798–1882). A French painter; born in Lyons; traveled extensively, even to Greenland and Spitzbergen. From the recollections of this trip he painted his remarkable *Battle of the Polar Bears*. Among his works are *Babes in the Wood, Beggar's Family, Strolling Comedians* in the Luxembourg, and others which are highly valued.

BIERSTADT (*bēr'stät*), **ALBERT** (1830–1902). An American painter; born near Düsseldorf, Germany; removed with his parents to New Bedford Mass., in 1831; began to paint in oils in 1851, and in 1853 returned to Düsseldorf to study his art, spending a winter in Rome, traveling in Italy and Switzerland, and returning to the United States in 1857. In 1861 he finished his painting, *Laramie Peak*, and in 1863 *View of the Rocky Mountains—Lander's Peak*. These at once gave him a high reputation. His *Discovery of the Hudson River* and *Settlement of California* are in the National Capitol at Washington.

BISHOP, HENRY ROWLEY (1786–1855). An English composer; born in London; composer and director of music in Covent Garden Theatre for 14 years; produced 60 pieces, of which *Guy Mannering* and *The Miller and His Men* were most popular; was for a brief space professor of music in Edinburgh University, and eventually held a similar chair in Oxford; composed the familiar music for John Howard Payne's *Home, Sweet Home*. His own song *My Pretty Jane* was long famous, and he was the first musician to be given knighthood (1842).

BISPHAM (*bĭs'făm*), **DAVID** (1857–1921). An American baritone singer, who was born in Philadelphia and was educated at Haverford College, with a thorough musical training in England and Italy. He made his first appearance on the opera stage in 1891, and for years was one of the leading singers at Covent Garden, London, and the Metropolitan Opera House in New York. Later he attained unusual fame as a concert singer, teacher and critic of music. An ardent advocate of the use of English in opera and concert, Bispham was greatly applauded in his renderings of translation of German and other foreign songs. In opera Wagner rôles were among his favorites.

BIZET (*bē-zāy'*), **GEORGE** (1838–1875). A French operatic composer; born at Paris; his greatest work, *Carmen*, is one of the half-dozen most popular lyric operas of the present day. Among the other compositions long celebrated were *La Jolie Fille de Perth*,—founded on Sir Walter Scott's novel,—*Les Pecheurs de Perles*, and *Djamileh*, in which he used an oriental subject.

BLAKE, WILLIAM. See in DICTIONARY OF AUTHORS.

BLAKELOCK, RALPH ALBERT (1847–1919). One of the great artists of his age in America, Blakelock educated himself to be a painter, after he completed a course at the College of the City of New York. From the first crude beginnings he rose rapidly to the heights of his art, using evening and moonlight subjects and Indian life and color as his chief themes. Some of his best works are *Indian Girl, Autumn, Pipe Dance*, now in the Metropolitan Museum, New York, and *Moonlight*, for which the Toledo Museum paid twenty thousand dollars. During the latter part of his life, except for two or three years, he was confined in the state hospital for the insane at Binghamton, New York, but he died at the camp of a friend in the Adirondacks.

BLASHFIELD, EDWIN HOWLAND (1848–1936). An American artist; born in New York City; studied in Paris under Léon Bonnat, and began exhibiting in the Paris Salon in 1874. He returned to the United States in 1881, and afterward distinguished himself by the execution of large decorative works, such as *Christmas Bells, The Angel with Flaming Sword*, the central dome of the Congressional Library at Washington, and the Waldorf-Astoria ball-room ceiling.

BLOOMFIELD-ZEISLER, FANNY. See under ZEISLER.

BLUMENTHAL, JACOB VON (1829–1908). A German pianist and composer; born in Hamburg; went to London (1849); appointed pianist to Queen Victoria, taught music; composed brilliant pieces for the pianoforte and popular sons, such as *My Queen, The Bend in the River, The Broken Flower*, and *The Venetian Boat-Song*.

BOEHM (*bûm*), **SIR JOSEPH EDGAR** (1834–1890). An English sculptor; born in Vienna; lived in England from 1862; member of the Royal Academy (1882); chief works are a colossal statue of Queen Victoria at Windsor and statues of Bunyan, Lord John Russell, Duke of Wellington, and Carlyle.

BOGGS, FRANK M. (1855–1926). An American artist; born at Springfield, Ohio; studied at the Ecole des Beaux-Arts, Paris, and under Gérôme; won a $2,500 cash prize in New York with his *Rough Day at Honfleur* (1885), bought by the Boston Museum; won a silver medal at the Paris Exposition (1900); has a fine *La Place de la Bastille* in the Luxembourg Museum, bought by the French government (1882).

BOIELDIEU (*bō-yĕl-dĭyŭ'*), **FRANCOIS ADRIEN** (1775–1834). French composer of light opera, who was born at Rouen, began to write songs at an early age, and produced a number of operas that enjoyed a great vogue. From 1802 to 1811 he lived in St. Petersburg, now Leningrad. *Le Calife de Bagdad* (1800), is an early piece of merit, *Le Petit Chaperon rouge* is the great success of his middle age, and *La Dame Blanche* (1825), his masterpiece. The last of these was founded largely on the works of Scott, notably *The Monastery*.

BOLOGNA (*bo-lō'nya*), **GIOVANNI DI,** or **JEAN DE BOULOGNE** (1524 or 1530–1608). A Flemish sculptor of the Italian Renaissance; born at Douai; went to Rome; influenced by Michelangelo; settled in Florence. His chief works are *Rape of the Sabines, Hercules and Nessus, Flying Mercury*, and the statue of the duke of Ferdinand in Florence, which inspired Browning's *The Statue and the Bust*.

BOND, CARRIE JACOBS (1862–). American composer, who was born in Wisconsin, and married Dr. Frank L. Bond of Iron River, Mich., who died in 1895. Among her best known songs are *A Perfect Day, God Remembers While the World Forgets*, and *Do You Remember*, which were published by her in various collections. She also wrote stories and poems for children.

BONHEUR (*bo-nur'*), **ROSA** or **MARIE ROSALIE** (1822–1899). A French painter of animals; born at Bordeaux; brought up in poverty from ill fortune; taught by her father; exhibited when she was 19. Her best known works are the *Horse Fair*, which was bought by Cornelius Vanderbilt for $55,500 for the Metropolitan Museum of Art in New York City, *Hay Harvest in Auvergne, On the Alert, Weaning the Calves*, and *Deer Drinking*.

BONNAT (*bo-nà*), **LEON JOSEPH FLORENTIN** (1833–1922). A French portrait painter; born in Bayonne; studied in Madrid. His work is greatly influenced by Velasquez and Ribera. His reputation rests on his portraits, chief of which are of Thiers, Victor Hugo, Don Carlos, Léon Cogniet, Jules Grévy, and Ernst Renan.

BOOTH, EDWIN THOMAS (1833–1893). An American actor; born near Belair, Md.; the fourth son of Junius Brutus Booth. When 16 years of age he made his first appearance on the stage, in the part of Tressel, his father acting as Richard III. He visited England (1861–1862), and in 1864 produced *Hamlet* at New York for 100 nights consecutively. In 1869 he opened a splendid theater in New York, whose building cost over $1,000,000, but which involved him in pecuniary ruin. He revisited California in 1876, and in the spring of 1877 was able to settle with his creditors, having earned during the season over

$600,000. Booth visited Great Britain and Germany in 1880 and 1882, and was everywhere received with enthusiasm.

BOOTH, JUNIUS BRUTUS (1796–1852). An Anglo-American tragedian; born in the parish of St. Pancras, London. He received a classical education, but early manifested a predilection for the stage, and when 17 years of age appeared in some unimportant parts. Subsequently he played Richard III. at Covent Garden, a part in which he suddenly became famous. In 1821 he came to the United States, where for the ensuing 30 years he followed his profession with much success.

BORDONE (*bōr-dō'nē*), **PARIS** (about 1495–1571). A Venetian Renaissance painter; born at Treviso; studied at Venice under Titian; painted King Francis I. and court by invitation in 1538. His portraits are most famous. His historical work *A Fisherman Presenting the Ring of St. Mark to the Doge* in the Venice Academy is one of the greatest of Venetian masterpieces. The English National Gallery has a *Daphnis and Chloe* and a portrait of a lady by Bordone, Boston in the Gardner collection has *Christ among the Doctors*, and Philadelphia has a *Baptism of Christ*. They are also found in a dozen European galleries and in private collections in England.

BORGLUM (*bôr'glŭm*), **GUTZON** (1867–1941). An American sculptor, mainly of colossal figures quite unusual in modern art. He was educated in San Francisco and Paris, came under the influence of Rodin, had a studio in London for a time, and established himself in New York in 1902. Among his great figures are the *Twelve Apostles*, in the Cathedral of St. John the Divine, New York, *Ruskin* in the Metropolitan Museum, *Henry Ward Beecher* in Brooklyn, and *Lincoln* at Newark, N. J. In 1927 he executed on Mount Rushmore, South Dakota, some figures of Washington, Jefferson, Lincoln, and Roosevelt, dedicated by President Coolidge on Aug. 10. Earlier he was commissioned to carve some portraits of famous men of the South on Stone Mountain, Georgia, a work interrupted for a time, but again continued in 1929.

BORGLUM, SOLON HANNIBAL (1868–1922). Brother of Gutzon Borglum; he was educated in Cincinnati and Paris, and devoted himself largely to scenes and persons of the western plains. Among his celebrated sculptures are *Last Round-up, Burial on the Plains, Little Lady of the Dew, Inspiration, Aspiration*, and *God's Command to Retreat*, the last a bronze of Napoleon in a snowdrift. As Y. M. C. A. secretary in France in 1918, he was awarded the Croix de Guerre.

BORI, LUCREZIA (1888–). A lyric soprano, born of Italian parentage in Spain, the real name being Borgia or Borja, and made her début in Rome, after training in Milan, as Micaela in *Carmen*. After singing in various cities of Europe, she came to America in 1912, joining the Metropolitan Opera Company, where she sustained rôles in *Pagliacci, Traviata, Romeo and Juliette, Falstaffe, Rigoletto, Faust*, and *Madame Butterfly*.

BOTTICELLI (*bot-te-chel'lee*), **SANDRO** or **ALESSANDRO FILIPEPI** (1447–1510). A celebrated painter of the Florentine school of the early Renaissance; began as a goldsmith's apprentice; a pupil of Fra Lippo Lippi. The best known examples of his art are on religious subjects, though he was no less fascinated with classical-mythological conceptions; is distinguished for his attention to details and for delicacy, particularly in the drawing of flowers. Among his best works are *Spring* at Florence; *Madonna and Angels* at Milan; *Birth of Venus* in the Uffizi; *Pallas Taming a Centaur* in the Pitti; *Mars and Venus* in London; *The Adoration of the Magi*, where the faces are those of the Medici and other Florentine nobles, in the Uffizi; two circular Madonnas in the Uffizi; and the *Assumption of the Virgin* in London.

BOUCICAULT (*bū-sī-kō'*), **DION** (1822–1890). Irish-American playwright and actor, whose *London Assurance* (1841) before he was 20 had a great run in England and America. *Old Heads and Young Hearts, Louis XI., The Colleen Bawn*, an immense success, and *The Octaroon* were his best of scores of dramatic works from his pen. As an actor of character parts he was long a favorite; immense sums made from his dramas were dissipated in theatrical ventures in England and America. For many years, including his last 15, he lived in New York. His first wife, Agnes Robertson, an adopted daughter of Charles Kean, was an actress of unusual finish and charm, especially in parts of her husband's dramas.

BOUGUEREAU (*boog-ro'*), **ADOLPHE** (1825–1905). A distinguished French painter; born at Rochelle. His subjects are both classical and religious, as well as portraits; studied under Picot; took the Prix de Rome (1850) and medals of honor (1878 and 1885); member of the Institute (1876); grand officer of the Legion of Honor (1905). Of his many paintings which are in the museums of Europe and the United States the most important are *The Body of Saint Cecilia Borne to the Catacombs, The Birth of Venus*, and *La vierge consolatrice*.

BOUTS, DIERICK (?1400–1475). A Dutch painter; born at Haarlem; one of the leading members of the Flemish school. His leading works are *Martyrdom of Saint Erasmus, The Last Supper, Martyrdom of Saint Hippolytus*, and *Torture of Saint Sebastian*. Bouts is highly praised for coloring, perspective, and realism as a portraitist.

BRAHMS (*bräms*), **JOHANNES** (1833–1897). A distinguished German composer; born at Hamburg; settled in Vienna. The appearance of his compositions were an event in the musical world; approaches Beethoven as no other does. Among his works are *German Requiem, Funeral Hymn*, four symphonies, and a series of songs upon which alone his fame might rest. Brahms began as a Romantic composer, but gradually turned to the past and classic manners, succeeding where others failed. One of his great ideals was to improve and perfect the sonata. Some of the compositions published first after his death are among his most delicate and imaginative.

BRETON, JULES ADOLPHE (1827–1906). A French painter of peasant life; born at Corrières; studied at Ghent, Antwerp, and Paris. Among his works are *Blessing the Grain, Return of the Gleaners, Planting a Calvary, Women Weeding, Song of the Lark* (Art Institute at Chicago), and *Twilight Glory*.

BRIGGS, CLARE A. (1875–1929). American cartoonist, who was born in Wisconsin, educated at the University of Nebraska, and at various times was an artist on the St. Louis *Chronicle*, New York *World, Journal*, Chicago *American, Tribune* and New York *Tribune Syndicate*. Among the series that he created were *Skin-nay, When a Fellow Needs a Friend, Ain't it a Grand and Glorious Feeling, How to Start the Day Wrong* and other well known comic strips, noted for human interest and kindly views of life.

BRIGNOLI (*brī-nyō'lī*), **PASQUALE** (1824–1884). An Italian tenor; born in Naples. After a most successful European tour he came to America in 1855 and for a quarter of a century was most popular; sang with Patti, Parepa-Rosa, La Grange, Tietjens, and Nilsson.

BROCK, THOMAS (1847–1922). English sculptor, the pupil of J. H. Foley, but later turned to romantic portraiture. Some of his best works are statues of Lord Leighton, Queen Victoria, Captain Cook, and Lord Suydenham, a colossal figure of Edward the Black Prince at Leeds and busts of King Edward VII., Lord Lister, and Edwin A. Abbey. The bust of Longfellow in Westminster Abbey is by Brock. In 1911 he was knighted.

BROCKWELL, MAURICE WALTER (1869–). Writer and lecturer on art, educated mainly at St. Paul's Cathedral Choir School. He assisted in revising the catalogs of the National Gallery, acted as director or secretary of various special exhibitions, and wrote numerous works on artists and art history. Some of his literary works are *Leonardo da Vinci, Erasmus, The National Gallery*, with 100 color plates, *The Louvre* with 50 color plates, *The Van Eycks and their Art, Frans Hals*, and numerous contributions to papers and journals on art.

BRONZINO, AGNOLO or **ANGIOLO** (1502–1572). An Italian painter; born at Monticelli; pupil of Jacopo da Pontormo. Among his works are *Descent of Christ into Hell, Young Sculptor, The Dead Christ* and a portrait of Duke Cosimo I. He painted many portraits of men of his day like Dante, Petrarch, and Boccaccio. Next to Andrea del Sarto he was the greatest portraitist of his age.

BROWN, FORD MADOX (1821–1893). An English painter; born in Calais, France; supported Rossetti in the Pre-Raphaelite Brotherhood movement. Among his works are *Wikliff Reading His Translation of the Scriptures, King Lear, Chaucer at the Court of Edward III., Christ Washing Peter's Feet, Work*, and *Don Juan*.

BROWN, GEORGE LORING (1814–1889). An American painter; born in Boston, Mass.; studied un-

der Hartwell two years abroad, and, on his return, with Washington Allston. Then, in 1840, he entered the studio of Isabey in Paris. Among his works are *Doge's Palace and Grand Canal, Bay of Naples,* and *A Moonlight Scene.* His *Bay of New York* and *Crown of New England* were owned by King Edward VII.

BROWN, JOHN GEORGE (1831–1913). An American sculptor in bronze; born in Leyden, Mass.; studied in Boston and several years in Italy; settled in Brooklyn, N. Y. He made the first bronze statue ever cast in America. Among his works are statues of DeWitt Clinton in Greenwood, of Nathanael Greene and General Scott in Washington, and of Lincoln in Union Square, New York City.

BROWN, JOHN GEORGE (1831–1913). An American painter; born in Durham, England; came to America in 1853; president of the Water Color Society (1901). His works are very popular, especially his portrayals of New York bootblacks and street children. They include *His First Cigar, The Passing Show, A Merry Air and a Sad Heart, Street Boy, The Gang,* and *Street Boys at Play.*

BRUCKNER, ANTON (1824–1896). Austrian organist and composer, who won the appointment as cathedral organist at Linz among many notable competitors. Later he became court organist, professor in the conservatory at Vienna, and concert organist in France and England. His works include symphonies, masses, choruses, and notable *Te Deum.*

BRUNELLESCHI (*brōō-nĕl-lĕs'kē*), **FILIPPO** (1379–1446). An Italian architect; born in Florence. He was the founder of Renaissance architecture. He raised the dome of the Cathedral of Florence to a height of 300 feet—the problem of the century—and began the Pitti Palace, his masterpiece.

BRUSH, GEORGE DE FOREST (1855–). An American painter, who studied under Gérôme of Paris, and began to attract notice first (1883) by his paintings of American Indians and later turned his attention to portraiture. Some of his best works are *Moose Hunt, Aztec King, Mourning her Brave, In a Garden,* the last now in the Metropolitan of New York, *Mothers and Children,* in the Pennsylvania Academy, and *Mother and Child,* in the Corcoran Art Gallery of Washington.

BUCK, DUDLEY (1839–1909). An American organist at the Church of the Holy Trinity, Brooklyn (1877–1903), and composer of sacred cantatas like *The Golden Legand* and *The Light of Asia,* a comic opera called *Deseret,* a symphonic overture *Marmion,* a symphony in E flat, and many organ selections. He was born in Hartford, Conn., and studied abroad under Richter, Hauptmann, and Rietz.

BULL, JOHN (c. 1562–1628). An English composer and organist; one of the most honored musicians of his age in England and on the continent. He was professor of music at Gresham College, London, (1596–1607), the rule that lectures must be given in Latin having been waived because he spoke only English. At two different periods he acted as organist in churches on the continent, especially at Notre Dame at Antwerp. He seems to have done much to develop harpsichord music in England. Several authorities credit him with the original form of the music of the National Air, *God Save the King,* a version of which was introduced about 1745 as the work of Henry Carey.

BULL, OLE BORNEMANN (1810–1880). A Norwegian violinist; born in Bergen. He secured great triumphs both throughout Europe and in the United States by his wonderful playing. He lost all his money in a scheme to found a colony of his countrymen in Pennsylvania, and had to take again to his violin to repair his broken fortunes. He afterwards settled in Cambridge, Mass., and had also a summer residence in his native city, where he died.

BULOW, HANS GUIDO VON (1830–1894). A German pianist and conductor; born in Dresden; studied under Wieck, Eberwein, and Hauptmann; conductor of the royal opera at Munich (1864), where he conducted the first performances of Wagner's *Tristan und Isolde* and *Die Meistersinger;* visited the United States (1875–1876 and 1889–1890); one of the greatest pianists of the century and a famous conductor; the greatest authority on Beethoven.

BURNE-JONES, EDWARD (1833–1898). An English painter; born at Birmingham, of Welsh descent. He was one of the foremost, if not the foremost, of the artists of his day; imbued with ideas that were specially capable of art-treatment; designed several stained-glass windows, notably the Saint Cecilia window at Christ Church College, Oxford. He was the "greenery-yallery, Grosvenor-gallery" young man of *Patience.* He overcame the ridicule which greeted his earlier efforts. Among his works are *Venus's Mirror, Chant d'amour, The Golden Stair, The Wheel of Fortune, Cophetua and the Beggar Maid,* and numerous water colors.

BUTLER, HOWARD RUSSELL (1856–1934). An American artist, who was largely responsible for founding the American Fine Arts Society, of which he was president (1889–1906). He specialized in oil paintings of landscapes, and also of three solar eclipses, at Baker Ore., in 1918, the canvas now being owned by the American Museum of National History; at Lompoc, Calif., in 1923; and at Middletown, Conn., in 1925. He was also president of Carnegie Music Hall, New York (1896–1905).

BUTT, DAME CLARA (1873–1936). British contralto, who was born in Sussex, educated at the Royal College of Music, and sang first in *Orfeo* at the Lyceum in 1892. In 1900 she married Kennerley Rumford, the singer, with whom she appeared in concerts in Great Britain and the colonies. Her voice was of great range and power, she being celebrated for oratorio and ballad singing.

CABANEL (*kȧ-bȧ-nal'*), **ALEXANDRE** (1823–1889). A French portrait and historical painter; born at Montpellier; studied with Picot; won the Prix de Rome (1843); elected to the Academy (1863); professor in the Acadêmie des Beaux-Arts. Among his portraits are those of Napoleon III. and his ministers. One of *Miss Catherine Wolfe* is in the Metropolitan Art Museum at New York. His *Death of Moses* is in the Corcoran Gallery at Washington. *Birth of Venus,* his masterpiece, is in the Louvre and a replica of it in the Metropolitan Museum. His *Expulsion from Paradise* and *Death of Francesca and Paolo* are among his best works.

CADMAN, CHARLES WAKEFIELD (1881–). American composer, known for making use of Indian melodies, such as *From the Land the Skyblue Water.* One of his operas *Shanewis or The Robin Woman* attained a great hearing at the Metropolitan, New York, in 1918 and 1919, the only American opera at the time which had succeeded more than one season in this country. His *Witch of Salem* was produced in Chicago in 1926. He is also known for *The Vision of Sir Launfal,* a cantata, some piano music, and many songs.

CALLOT (*kȧ-lō'*), **JACQUES** (1592–1635). A French designer, engraver and etcher; born in Nancy. He was a pitiless realist, noted for painstaking effort, originality, life, and humor. He left over 1,500 prints of genre pictures, and no etcher has succeeded better than he by simple lines in representing the form, features, or action of a character or a group.

CALVART, DENIS (1540–1619). A painter born in Flanders, but educated at Bologna under Fantana so thoroughly that he took on the style of Italian art, and later became the founder of a new school. He assisted Sebbatini in the decorations of the palace of the pope at Rome, and carefully studied the works of Raphael, some of which he reproduced.

CALVE (*kȧl-vȧ'*), **EMMA** (1864–). A French dramatic soprano; born in France; studied under Rosine Laborde; made her début in *Faust* in Brussels (1882); made her début in New York (1893); has sung in *Lalla Rookh, Nozze di Figaro, Magic Flute, Carmen, Hamlet, Cavalleria Rusticana, Mefistofele, Pagliacci.* Perhaps she will be longest remembered for her inimitable Carmen in Bizet's opera. In 1927 she appeared in lectures on music in America.

CAMP, JOHN SPENSER (1858–). American composer, born in Middletown, Conn., and educated there and studied with Parsons, Shelley, Dudley Buck, and Dvořák. For many years he was choirmaster of Hartford, Conn., and composer of several cantatas, including *The Prince of Peace, The Morning Star,* and *The Prince of Life,* and of various anthems, songs, orchestra suites, and overtures.

CAMPANINI (*kām-pa-nī'nī*), **ITALO** (1846–1896). An Italian tenor; born in Parma; studied in Milan under Francesco Lamperti; made his début in Faust there; sang in New York with Christine Nilsson (1873) and became the most popular operatic tenor of his day. He was a notable Lohengrin, and scored successes in *Aïda, Carmen, The Huguenots,* and *Faust.*

CAMPBELL, MRS. PATRICK (1865–1940). An English actress named Beatrice Stella Tanner, who married Capt. Patrick Campbell, and in 1893 rose to

fame immediately in the chief rôle of Pinero's *Second Mrs. Tanqueray* at the St. James Theatre of London. She played in Shaw's *Pygmalion*, in Ibsen's *Little Eyof*, in Pinero's *Notorious Mrs. Ebbsmith*, and with Forbes-Robertson as Lady Macbeth, Ophelia, and Juliet.

CANO (*kä'no*), **ALONZO** (1601–1667). A Spanish painter, sculptor, and architect; born in Granada. He has been called the Michelangelo of Spain. There are many fine examples of his work in the Cathedral of Granada, six in the Prado, and several throughout Europe. Philip IV. appointed him royal architect and painter, rewarding him with the office of a canon in the church.

CANOVA (*ka-nō've*), **ANTONIO** (1757–1822). A great Italian sculptor; born in Treviso. His first great work, which established his fame, was the group of *Theseus and the Minotaur*, which was succeeded by his *Cupid and Psyche*, distinguished by a tenderness and grace quite peculiar to him, and erelong by *Perseus*, perhaps the triumph of his art. His works were numerous and brought him a large fortune.

CARAVAGGIO (*kä-ra-vä'jo*), **MICHELANGELO AMERIGHI** (1569–1609). An Italian painter, founder of the Naturalistic school; born in Caravaggio. Among his best works are *The Entombment of Christ* in the Vatican, *Death of Mary* in the Louvre, *Saint Matthew Writing the Gospel, Christ and the Apostles at Emmaus, Love as a Ruler, Love Conquered, Gypsy Fortune-Teller, Card-Players, Portraits of Himself*, and *Grand Master of the Knights of Malta*.

CARISSIMI (*ka-rēs'sē-mē*), **GIACOMO** (c. 1604–1674). Chapel master of Assisi for four years and at Rome for the rest of his life (1628–1674). He did important work in developing the recitative in music, in improving the chamber cantata, and in perfecting a form of oratorio. Little else is known of his life.

CARPACCIO (*kär-pät'chō*), **VITTORE** (c. 1460–c. 1520). An Italian painter, whose biography is obscure, but who lived mainly in Venice and painted between 1490 and 1520. Apparently he was a pupil of Bastiani, and perhaps of the great Bellini. Besides nine pictures on the life of St. Ursula, now at Venice, and some scenes in the life of the Virgin, his chief works are *Life of St. Stephen, Presentation in the Temple*, and a *Dead Christ*, now in Berlin.

CARRACCI (*kär-rät'chē*), **AGOSTINO** (1557–1602). Celebrated painter of Bologna, who, with his brother Annibale, and his uncle, Lodovico, established an eclectic school of art. He studied under Fantana, and went to Rome in 1600 with his brother to paint the palace of a cardinal, and then he went to Parma where he finished his great picture *Celestial, Terrestrial, and Venal Love*, just before he died. Agostino was also a proficient engraver.

CARRACCI, ANNIBALE (1560–1609). After he assisted his brother (noted just above) in finishing the decoration of the cardinal's palace of Rome, he went to Naples, where he died. Of his many pictures, some of the best known are the *Dead Christ, Infant and St. John, St. Catherine, St. Roch*, and *Saviour Bewailed by the Maries*. He is now represented in the Dresden, Dublin, and National Gallery of London.

CARRACCI, LODOVICO (1555–1619). Eminent Bolognese painter, who founded an eclectic school of art, and set up an academy which was long popular. In his teaching he was assisted also by his two nephews, who are noted just above. Some of his great works are *John the Baptist, St. Jerome, St. Benedict, St. Cecilia*, and *Limbo of the Fathers*.

CARRIERE, EUGENE (1849–1906). French painter noted for various pictures of family groups, for which his wife sat often as a model. His *Maternity* and *The Sick Child* are in Luxembourg. Celebrated persons who were his friends appear in his portraits, like those of Alphonse Daudet, Anatole France, Louis Henry, and Paul Verlaine.

CARSTENS, ARMUS JACOB (1754–1798). A leader of the modern school of historical painters in Germany, especially celebrated for his *Plato's Symposium* and the *Battle of Rossbach*. He was born in Schleswig, studied in Copenhagen and in Italy, and lived at Lübeck. For a time he was a professor at Berlin. His Argonaut pictures were engraved in 24 plates.

CARUSO (*kä-rōō'zō*), **ENRICO** (1873–1921). One of the greatest operatic tenors of all time, who was born in Italy, began to sing in a choir in Naples when 11, and made his début in 1894. For four years he was at St. Petersburg (1899–1903) in the winter and in Buenos Aires in summer, appearing also at times in various European capitals. From 1903 to his death he was leading tenor at the Metropolitan Opera House in New York. Of his extensive repertoire, some of the operas were *Carmen, Les Huguenots, Pagliacci, Rigoletto, Samson and Delilah*, and *La Bohème*. His voice was of great richness, power, and artistic finish.

CARY, ANNIE LOUISE (1842–1921). An American contralto; born at Wayne, Me.; studied in Milan under Giovanni Corsi; made her début in Copenhagen in Italian opera. For over 12 years she was the favorite of the American public. She created the part of Amneris in *Aïda;* married Charles Monson Raymond of Brooklyn (1882).

CAZIN (*ka-zăn'*), **JEAN CHARLES** (1841–1901). A French painter; born at Samer; originated the French landscape in religious subjects as in *Hagar and Ishmael, Dusk, A Dead City*, and *The Flight into Egypt*.

CELLINI (*chĕl-lē'nē*), **BENVENUTO** (1500–1571). The greatest of the Italian Renaissance goldsmiths; born in Florence. His works comprise elaborate silver vases, statuettes, silver-gilt repoussé, bronze statues, and bronze portraits. Among his best known is his *Victorious Perseus* with the Gorgon's head. Many of Cellini's works have disappeared, but among those remaining are a salt-cellar made for Francis I. at Vienna, a medallion of Clement VII., a medal of Francis I., a medal of Cardinal Bembo, and some dies for coins and medals cast at the papal mint. He lived at Florence, Rome, and Venice; at times for various scrapes he was banished from his native city, but in time was recalled and rose more in favor. In addition to works in silver and gold, he executed a number of sculptures, notably the *Perseus Holding the Head of Medusa*, now at Florence. His *Autobiography*, though full of self-assertion and exaggeration, throws important light on the age in which Cellini lived.

CESNOLA (*chĕs'nō-lä*), **LUIGI PALMA DI** (1832–1904). An American archaeologist; born in Piedmont, Italy. He served in the Italian War with Austria and came to the United States in 1860, serving in the Civil War. He was United States Consul at Cyprus, where he made extensive archaeological discoveries. In 1879 he became a trustee and director of the Metropolitan Museum of Art, in New York City.

CESPEDES, (*thes'pē-dēs*), **PABLO DE** (1538–1608). Spanish painter, sculptor, architect, and poet, who spent some time in Rome studying the works of Rephael and Michelangelo. On his return to Spain, he was made a prebend at Cordova, where his best picture, *The Last Supper*, is at present, while others are at Madrid and Seville. He wrote a didactic poem on *The Art of Painting*, which has been pronounced the finest work of its kind in Spain.

CEZANNE, PAUL (1839–1906). A French painter, who in the beginning of his artistic career painted highly fanciful pictures, and was a leader in the revolt against older methods and leaders. After 1873 he turned his attention more to nature, came under the influence of Poussin, out of which grew several fine landscape scenes. Some of his portraits were also highly praised, especially that of Geffroy, which is a masterpiece for artistic finish and harmony.

CHALIAPIN (*shal'yah-pēn*), **FYODOR IVANOVICH** (1873–1938). A Russian bass singer, born at Kazan; for a number of years worked at various things; made his début at Tiflis in 1892 in *A Life for the Tsar*. From then till 1913 he appeared often in Russia and gained a notable success at London in the latter year in *Prince Igor*. In 1921 he again appeared in England, and in 1922–23 in the United States, where he had also been in 1908. Some of his great parts are those of Ivan in *The Maid of Peskof*, Salieri in *Mozart and Salieri*, Leporello in *Don Giovanni*, Don Basilio in *The Barber of Seville*, and Don Quichotte in *Don Quichotte*.

CHAMINADE (*shä-mē-nàd'*), **CECILE LOUISE STEPHANIE** (1861–). A French pianist and composer; born in Paris; noted throughout Europe as a pianist and as an orchestra conductor. She wrote *Callirrhoë*, a ballet symphony; *Les Amazones; Ménétriers; La Lisonjera;* and a number of songs.

CHAMPAIGNE (*shan-pē'nya*), **PHILIPPE DE** (1602–1674). A Flemish painter; born in Brussels; went to Paris and was one of the few distinguished painters there before the accession of Louis XIV. Most of his works are in the Louvre and include *The Dead Christ* and *Portrait of Cardinal Richelieu*. His *Triple Portrait of Cardinal Richelieu, Portrait of Fénelon*, and three religious subjects are in London.

CHAMPNEY, BENJAMIN (1817–1907). An American painter; born in New Ipswich, N. H.; spent several years in Europe painting at the Louvre (1841–1848); painted White Mountain landscapes and New England flower groups; ex-president of the Boston Art Club; published *Sixty Years' Memories of Art and Artists* (1900).

CHANTREY, SIR FRANCIS LEGATT (1781–1842). An English sculptor; born at Norton, Derbyshire; member of the Royal Academy (1818); made the statue of Washington in the State House at Boston, Mass.; also Pitt, Watt in Westminister Abbey, Canning, and Wellington. Greatly admired are his busts of children, particularly the figures of two asleep in each other's arms at Litchfield Cathedral. He left the bulk of his estate to the Royal Academy for the purchase of works of art.

CHARDIN, JEAN SIMEON (1699–1779). French painter of small objects, famous for his still-life pictures and for domestic scenes; also a great colorist. He was a pupil of Cazes and Coypel, was made a member of the Royal Academy in 1728, and in 1759 became connected with the Louvre, where several of his best pictures are now, besides others at the University of Glasgow and in the English National Gallery.

CHASE, WILLIAM MERRITT (1849–1916). An American painter; born in Franklin, Ind.; studied under B. F. Hayes in Indianapolis and at New York; settled in St. Louis; thence at Munich under Wagner and Piloty for six years; one year at Venice on Tintoretto's works; returned to New York (1878) and was president of the Society of American Artists for 10 years; taught in the Art Students' League and in his own schools; he received many medals and was a National Academician. His best work is in still life.

CHAVANNES. See under PUVIS DE CHAVANNES.

CHERUBINI, MARIA LUIGI CARLO ZENOBIO SALVATORE (1760–1842). An Italian musical composer; born in Florence; director in the French Conservatory and instructor of hundreds of eminent musicians. In the interval from 1780 to 1788 he composed 11 Italian operas, including *Ifigenia in Aulide*—the most successful of the series. His operatic masterpiece is *Les Deux Journées*. His greatest work is the *Requiem in C minor*. Other great compositions are *Lodoiska, Médée*, the ballad *Anacreon, Les Deux Journées*.

CHIPPENDALE, THOMAS (c. 1718–1779). An English cabinet and furniture maker, who from about 1749 conducted a shop in London. Though it is now difficult to identify much of the furniture that resembles his undoubted pieces, because of later imitation, it is evident that some English houses have genuine examples. His work was characterized by solidity without apparent heaviness. At different times he imitated Gothic, French, and Chinese objects. Among the places where the furniture still exists are Notell Priory, and Harewood House, both in Yorkshire, Stourhead in Wiltshire, and Rowton Castle in Shropshire.

CHOPIN (*shō'pàn*), **FREDERIC FRANCOIS** (1810–1849). An eminent Polish musical composer and pianist; born near Warsaw; settled in Paris (1831). As a pianist Chopin was second to Liszt only. He was born near Warsaw, where he was educated under Joseph Elsner, director of the conservatory there. His début as a pianist occurred at Vienna in 1829, and he resided there until two years later. He left intending to go to England, but he remained at Paris the rest of his life. Some of his works are 42 mazurkas, 24 preludes, 18 nocturnes, 4 ballades, 8 waltzes, and various small compositions, all of which are of exquisite workmanship.

CHRISTY, HOWARD CHANDLER (1873–). An American illustrator; born in Morgan County, Ohio; studied in New York; began to illustrate in 1895; war artist in the Spanish War for *Scribner's* and *Leslie's*; instructor in the Cooper Institute, New York.

CHURCH, FREDERIC EDWIN (1826–1900). An American landscape painter of fine technique, who specialized in the wonders of nature, such as scenes at Niagara Falls, the Andes, and many variations of light and color. His paintings sold for extravagant sums. Among his characteristic works are *The Great Fall of Niagara*, which is now in the Corcoran Art Gallery, Washington, *Twilight* in the Waters Gallery, Baltimore, *Heart of the Andes, Cotopaxi*, and *Morning in the Tropics*.

CIMABUE (*chĭ-mä-bū'ē*), **GIOVANNI** (1240–1302). A Florentine painter and founder of the Florentine school, which ranked among its members such artists as Michelangelo, Raphael, and Leonardo da Vinci; was the first to leave the stiff traditional Byzantine forms of art and copy from nature and the living model, though it was only with the advent of his great disciple, Giotto, that art found beauty in reality. His *Madonna* in the Church of Santa Maria has been long regarded as a marvel of art, and of all the *Mater Dolorosas* of Christianity, Ruskin does not hesitate to pronounce his at Assisi the noblest.

CLAUDE LORRAIN (1600–1682). A great French landscape painter; born at Chamagne, of poor parents; went to Rome; became servant and color-grinder to Tassi, who instructed him in his art; by assiduous study of nature in all her aspects attained to fame; was eminent in his treatment of aërial perspective, and an artist whom it was Turner's ambition to rival.

CLAXTON, KATE (1848–1924). An American actress; born in New York City; made her début with Lotta in Chicago in 1870; with Augustin Daly's stock company in New York; and with A. M. Palmer's Union Square company in 1872. Her greatest success was as Louise in *The Two Orphans;* married Charles A. Stevenson, her second husband (1878).

CLAYS, PAUL JEAN (1819–1900). A Belgian painter of marine subjects. Some of his notable pictures are *The Port of Antwerp, Coast near Ostend, Calm on the Scheldt*, and *Festival of the Freedom of the Scheldt*, the last now in the Metropolitan Museum at New York.

CLINEDINST, BENJAMIN WEST (1860–1931). An American artist; born at Woodstock, Va.; studied in Paris under Cabanel and Bonnat; settled in New York; chiefly engaged as illustrator in black and white for books and magazines. He specialized on genre and portraits; illustrated books by Hawthorne, Stevenson, Parkman, Cable, Bret Harte, and Mark Twain; and painted portraits of Roosevelt, Admiral Peary, General E. W. Nichols, and many others.

CLOUET, FRANCOIS (d. 1572). French miniature painter of great delicacy and elaboration. He was a son of Jean Clouet who was also a distinguished artist. Among his reputed works are the portrait of Francis I. in the Uffizi, Florence; Catherine de' Medici at Versailles; a picture of Henry II. now in the Morgan collection in New York; a portrait of the duc d'Alencon now at South Kensington, England. Both he and his father passed under the name of Janet.

COLE, BELLE (1845–1904). An American contralto singer; born in Chautauqua, N. Y.; church soloist in New York; leading contralto with Theodore Thomas's Festival tour (1883); sang in *Elijah* in London under Sir Joseph Barnby (1888); made a tour around the world in 1901; lived in London after 1888.

COLE, THOMAS (1801–1848). American landscape painter, who came to America from England when he was 18, went about for a time as a wandering portraitist, removed to New York (1825), and was encouraged by the great artist Trumbull, who secured him patrons. He was a leader in the Hudson River school of artists. Some of his typical canvases are the series of four, *The Voyage of Life*, and another of five pictures, called *The Course of Empire*, the second set being in the New York Historical collection. The *Expulsion from Eden* is in the Metropolitan Museum, New York. Cole was one of the leaders in the American school of nature painters.

COLE, TIMOTHY (1852–1931). An American wood engraver; born in London, England; emigrated with his parents to Chicago (1857); removed to New York (1871); noted for his series of engravings of the paintings of the old masters of Europe, which appeared in the *Century Magazine*. Thus his reproductions of the old Italian, Dutch, Flemish, and other masters, especially as painted by him with his own notes in book form, were justly famous. Cole received various medals, and, at a time when wood engraving was almost obsolete, succeeded in attracting marked interest.

COLE, VICAT (1833–1893). English painter of scenes in Surrey and Sussex, including the pictures of landscapes along the Thames. The trustees of the Chantrey Fund bought a large canvas by him, entitled *The Pool of London*, for the Tate Gallery.

COLERIDGE-TAYLOR, SAMUEL (1875–1912). An Anglo-African musical composer; born in London; studied at the Royal College of Music. His choral-orchestral work, *Scenes from the Song of Hiawatha, Blind Girl of Castèl Cuillè*, and a cantata, *The Atonement*, are best known; conducted *Hiawatha* in Washington in 1904. Some incidental music for plays by Stephen Phillips and for *Othello* was highly admired.

COLLINS, WILLIAM (1788–1847). An English landscape and figure painter; born in London; father of Wilkie Collins, the novelist; studied at the Royal Academy; chief works are *Young Fifer, The Sale of the Pet Lamb, As Happy as a King,* and *Early Morning;* elected to the Royal Academy in 1820.

COLMAN, SAMUEL (1832–1920). An American painter; born in Portland, Me.; studied under Durand and abroad; member of the National Academy (1860); a founder and the first president of the American Society of Painters in Water Colors (1866–1871); chief works are foreign and American landscapes in oil and water colors and some etchings, *Moonrise in Venice, Sunny Afternoon in Harbor of Algiers, The Ships of the Western Plains,* now in the Union League Club, New York, and *The Spanish Peaks, Colorado,* now in the Metropolitan Museum.

COLONNE (*kō-lon'nä*), **EDOUARD (JULES JUNE)** (1838–1910). French violinist and conductor of Italian birth, who was first violin at the Opéra from 1858 to 1867, and then helped found a series of artist performances, later called the Concerts Colonne. He popularized the works of men like Berlioz, Franck, Dubois, Grieg, Raff, Tschaikowsky, and Wagner, some of whom were first introduced to English audiences through his subscription concerts. Colonne also conducted at the Opéra, on the continent, and for the Philharmonic Society of New York (1906).

CONNICK, CHARLES JAY (1875–). American artist in stained glass, who was born in Pennsylvania, studied in Pittsburgh and Boston, and did research work at various times in England and France. From 1895 to 1911 he acted as a designer for several firms, after which he set up private business. Some of his windows are in the Cathedral of St. John the Divine, New York, Princeton University Graduate College, St. Paul's Cathedral, Detroit, Boston University, Fourth Presbyterian Church, Chicago, and in various other churches.

CONSTABLE, JOHN (1776–1837). An eminent English landscape painter; born in Suffolk, England. His works were more generously appreciated in France than in his own country, where they had to stand comparison with those of Turner. Enormous prices have been given of late for his best pictures. Some of his best works adorn the walls of the National Gallery. Among these are *The White Horse, Cornfield, Hampstead Heath, The Valley Farm, The Hay Wain,* and many others. Constable was a leader of modern art.

CONSTANT, JEAN JOSEPH BENJAMIN (1845–1902). A highly popular French painter of the Realistic school; born at Paris. His first picture was *Hamlet and the King.* Afterwards he took chiefly to Oriental subjects, which afforded the best scope for his talent; occupies a high place in the modern French school. His *Justinian in Council* is in the Metropolitan Museum of Art in New York. Some of his portraits of celebrated persons were justly famous, including his *Queen Victoria* (1900).

CONVERSE, FREDERICK SHEPHERD (1871–1940). An American composer, professor of theory and composition at the New England Conservatory of Music; author of various musical works, including *Sonata in A, The Mystic Trumpeter,* a fantasy; *The Pipe of Desire,* opera; *Job,* oratorio; *Ormazd,* a symphonic poem; a symphony in E minor; and *The Peace Pipe,* cantata.

COPLEY (*kop'li*), **JOHN SINGLETON** (1737–1815). An American portrait and historical painter; born in Boston. Benjamin West was his patron; went to England in 1775; painted portraits of the king and the queen; began the historical works on which his fame chiefly rests, perhaps the most widely known of which is the *Death of Chatham,* now in the National Gallery, London. The Boston Museum now contains his portraits of John Quincy Adams, Samuel Adams, General Warren, and others.

COQUELIN (*kōk-lăn'*), **BENOIT CONSTANT** (1841–1909). A French actor; born in Boulogne; made his début at the Théâtre Français (December 7, 1860). For over a quarter of a century he played there with unbroken success. He appeared in 1887 in London, in 1888 in South America and the United States. He played Flambeau in *L'Aiglon* to the Duc de Reichstadt of Sarah Bernhardt.

CORELLI (*kō-rĕl'i*), **ARCANGELO** (1653–1713). Italian violinist and composer, trained by G. Benvenuti of Bologna, and attached to the court of Cardinal Ottoboni. He was one of the most popular teachers of the age, especially in the manner of holding the bow and in chord-playing. Numerous compositions are still played and highly praised, among them being the *Concerti grossi,* his last work, and various arrangements of "Suonate" for strings.

CORLETTE, HUBERT CHRISTIAN (1869–). British architect, who was born and educated at Sydney, Australia, with further study at University College, London, and in France and Italy. Taking up the profession of architecture, he designed many important buildings, such as those at New College, Oxford; Clifton College and Winchester College; Burton Manor, Cheshire; the Kensington War Memorial; various buildings, including the New Post Office, Treasury Buildings, and Government House at Jamaica; Imperial College of Tropical Agriculture at Trinidad; and many others. Some of his publications are *Chichester Cathedral, Use of Colour in Architecture,* and *Education and Tradition in Architecture.*

CORNELIUS (*kor-nā'lē-ŏs*), **PETER VON** (1783–1867). A German painter; born in Düsseldorf. He studied the great masters, especially Raphael. In 1811 he went to Rome, where, in conjunction with Overbeck, Veit, and other associates, he may be said to have founded a new school of German art, and revived fresco painting in imitation of Michelangelo and Raphael. In 1841 he was invited to Berlin by Frederick William IV., who intrusted him with the painting of the royal mausoleum or Campo Santo. His *Last Judgment* in the Ludwig church is the most colossal fresco ever painted.

COROT (*ko-rō'*), **JEAN BAPTISTE CAMILLE** (1796–1875). A celebrated French landscape painter; born in Paris. His landscape work is a new interpretation, marked by the freshness of the morning and the silvery mists of evening. He is a worshiper of nature in her quieter moods. His *Ville d'Avray* is in the Metropolitan Museum of Art in New York, *Dante and Vergil* in the Boston Museum of Fine Arts, and many fine examples are in private collections. Others in public collections are *Une Matinée* in the Louvre, Paris; *Macbeth* in the Wallace collection, London; *Pastorale-Souvenir d'Italie* in Glasgow.

CORREGGIO (*kor-red'jō*), **ANTONIO ALLEGRI DA** (1494–1534). An Italian painter; known as "the divine." His work excels in harmony, grace, and sweetness of color and form. He is one of the greatest Italian painters of the Renaissance. His fine *St. Francis Madonna* in Dresden, *The Ascension of Christ* in the cupola at Parma, *The Assumption of the Virgin* at Parma, *The Marriage of St. Catherine* in the Louvre, *The Madonna della Scodella* in Parma, *The Holy Night* in Dresden, and his *Ecce Homo* in London are among his most famous works.

COSIMO, PIERO DI (1462–1521). An Italian painter; born in Florence; pupil of Cosimo Roselli and master of Andrea del Sarto. His chief works are a *Conception* in the Uffizi at Florence, a *Madonna* and *Death of Procris* in London, a *Coronation of the Virgin* in the Louvre, and *Christ and John the Baptist* in Berlin.

COSTA, LORENZO (1460–1535). Italian painter, who was born in Ferrara, but lived mainly in Bologna, where his main works are now found. Other pictures of note are the *Madonna and Child* now in London and the celebrated fresco in one of the chapels of San Giacomo Maggiore at Bologna.

COUPERIN (*kŭ-pär-ăn'*), **FRANCOIS** (1668–1733). The most celebrated member of a family of French musicians, between 1626 and 1850. He attained great perfection of art and melody in his various works for the clavecin or harpsichord. Bach greatly admired his work, and used some of Couperin's cross-rime and other arrangements for his own musical compositions. *Pièces de Clavecin,* an elaborate work in four books, is his chief collection; for the proof-reading of the first book alone he took a whole year.

COURBET (*kö-bā'*), **GUSTAVE** (1819–1877). A French painter, of peasant birth; studied in Paris; joined the Commune and led in the overthrow of the Vendôme Column to distract the maddened populace from the collections of Thiers and of the Luxembourg. Courbet was essentially a realist and naturalist. His *Winnowers* in Nantes, *Burial at Ornans* in the Louvre, *Combat of the Stags,* and *The Wave* are among his best.

COUSIN (*kö-zăn'*), **JEAN** (1500–1590). A French painter, artist in stained glass, sculptor, and author. Of his pictures, which turned away from the old style of portraiture, the *Last Judgment* is in the Louvre; his glass in the windows of the Sainte Chapelle at Vincennes is highly admired; and his chief literary works are books on perspective and on portraiture.

COWEN, FREDERICK HYMEN (1852–1935). A composer born in Jamaica; from the age of four lived mainly in England, but spent some time in Berlin; and after 1869 was well known in Europe. Some of his chief works are *The Rose Maiden*, a cantata, which was immensely famous; two symphonies; *The Corsair*, a festival work; and an opera, *Pauline*, used by the Rosa Company. Some of his compositions were first produced by the Philharmonic Society, of which he became conductor (1888–92), after the death of Sir Arthur Sullivan. In 1911 he was knighted.

COX, KENYON (1856–1919). An American painter; born in Warren, Ohio. He studied in Paris under Carolus-Duran and Gérôme, settling in New York in 1882 as a portrait and figure artist. He did two decorations in the Library of Congress, Bowdoin College, Capitol at St. Paul, Minn. He was awarded a medal by the Architectural League for his murals. Cox also wrote extensively on art, some of his books being *Old Masters and New*, *The Classic Point of View*, *Artist and Public*, and *Concerning Painting*.

COX, PALMER. See page 891.

CRAIG, EDWARD GORDON (1872–). Beginning his professional career on the stage, Craig developed original ideas of production and stagecraft. In 1913 he founded a school of theatrical art at Florence, Italy, the outgrowth of his book on *The Art of the Theatre* (1911). Both in his theory of staging and in his literary art, Craig profoundly influenced all of Europe. He staged a Purcell opera, a nativity play by Housman, an Ibsen drama, a drama for Duse at Florence, and productions at Moscow and Copenhagen.

CRAM, RALPH ADAMS (1863–). An authority on architecture of the middle ages, especially on Gothic building, he held important commissions as consulting architect for the cathedrals at San Francisco and Washington, supervised the Cathedral of St. John in New York, and, after the death of Bernard Goodhue (q. v.), took charge of the building of the Capitol at Lincoln, Neb. Some of his numerous writings are *Church Building*, *The Ministry of Art*, *The Substance of Gothic*.

CRANACH (*kran'ak*), **LUCUS** (1472–1553). A German painter; born at Kronach; second to Dürer among his contemporaries. The finest collection of his works is in Berlin. It includes *Hercules and Omphale* and *The Fountain of Youth*. London has a *Portrait of a Young Girl*. Dublin has a *Judith* and a *Christ on the Cross*. New York has a portrait of *John Frederick the Magnanimous*, a *Portrait*, and a *Venus and Cupid*. Brussels has a *Charity* and a *Portrait of an Old Man*. His son, Lucas, assisted the father in many works, and painted several religious pictures of his own. His *Portrait of a German Lady* is in the Metropolitan at New York.

CRANE, WALTER (1845–1915). An English artist and illustrator, influenced by Ruskin and the Pre-Raphaelites, Japanese art, and as a decorator by William Morris. Many of his drawings and pictures were made for children's books, nursery rimes, and famous English poems. Some of these are *The Lady of Shalott* (1862), *The Baby's Opera*, *Stories from Grimm*, Hawthorne's *Wonder Book*, Mrs. Deland's *Old Garden*, and Spenser's *Faerie Queene*. Along with Morris and others he did much to bring art within the reach of ordinary persons. He executed some notable wood engravings.

CRANE, WILLIAM HENRY (1845–1928). An American actor; born in Leicester, Mass.; leading comedian in Hooley's Theatre, Chicago (1874); in partnership with Stuart Robson (1877–1889). His later rôles were in *The Senator*, *David Harum*, *Business is Business*, and *The American Lord*.

CRAWFORD, THOMAS (1814–1857). An American sculptor; born in New York; died in London. Among his works are the bronze statue of Beethoven in Boston Music Hall, an equestrian statue of General Washington at the Capitol, Richmond, Va., and a number of marble and bronze pieces in the Capitol, Washington, D. C., including the *Liberty* surmounting the dome, the bronze doors, and the relief *Progress of American Civilization*.

CRIVELLI, CARLO (c. 1435–c. 1500). Viennese painter of great force, somewhat crude in technique, but fine in coloring; probably of the school of Murano. Some remaining works are the *Madonna* at Verona; the *Dead Christ* in the Vatican; *Madonna and Saints* in Berlin; and *The Coronation of the Virgin* at Milan.

CROSMAN, HENRIETTA (1870–). An American actress; born at Wheeling, W. Va.; made her début in *The White Slave* (1889); played with Daly's and Frohman's companies; married Maurice Campbell (1897); appeared as a star (1898) in the rôle of *Mistress Nell* and of Rosalind in *As You Like It*.

CRUIKSHANK (*krōōk'shănk*), **GEORGE** (1792–1878). An English pictorial satirist; born in London. His illustrations for Home's political squibs and pamphlets, and especially those dealing with the Queen Caroline trial, attracted much attention. He illustrated a number of Dickens's works. In his late years he devoted himself to oil painting.

CUSHMAN (*kōōsh'măn*), **CHARLOTTE SAUNDERS** (1816–1876). An American actress; born in Boston; appeared first in opera and as Lady Macbeth in New Orleans in 1835. In 1844 she accompanied Macready on a tour throughout the Northern states and afterward appeared in London. Miss Cushman retired from the stage in 1875. Of her many parts in a great variety of dramatic compositions, her best were Rosalind, Romeo, Cardinal Wolsey, Portia, Lady Macbeth, her most artistic rôle, and Meg Merillies, in a dramatization of Scott's *Guy Mannering*, her most popular.

CUYP (*koip*), **ALBERT** (1606–1672). A Dutch painter; born at Dordrecht; son of the painter, Jakob Gerritsz Cuyp (1575–1649); one of the greatest of the masters in animal painting. Ruskin says that "for expression of effects of yellow sunlight, parts might be chosen out of the good pictures of Cuyp which have never been equaled in art."

CZERNY (*zäir'nē*), **KARL** (1791–1857). An Austrian pianist and musical composer; born in Vienna; pupil of Beethoven. Among his puipls were Liszt, Thalberg, and other distinguished musicians; best known by his *Theoretical and Practical School*.

DAGNAN-BOUVERT (*dăn-yon-bōr-vā'*), **PASCAL ADOLPHE JEAN** (1852–1929). A French painter; born in Paris; a painter of Breton life and a follower of Holbein. Among his famous works are *A Wedding Party at the Photographer's*, *Vaccination*, and *Le pain bénit* in the Luxembourg; the *Breton Pardon*, a *Virgin* in sunlight and shadow, the *Last Supper*, and *The Supper at Emmaus*. A *Breton Peasant* is in Chicago, *A Pardon in Brittany* is in New York, and the fine *Village Musician* is in the Walters collection in Baltimore.

DAGUERRE (*dă-gār'*), **LOUIS JACQUES MANDE.** French painter and inventor of a photographic process. See under INVENTORS.

DAINGERFIELD, ELLIOTT (1859–1932). An American painter, who first exhibited at the National Academy of Design in New York (1880), studied in Europe, and was commissioned to decorate the Lady Chapel of the Church of St. Mary in New York. Some of his later paintings are *Child of Mary*, *The Story of the Madonna*, and *Slumbering Fog*, the last now in the Metropolitan Museum, New York.

DALOU (*dă-lōō*), **JULES** (1838–1902). A French sculptor; born in Paris; pupil of Carpeaux; fled to London during the Commune and was prominent in the English renascence. The *Triumph of Silenus* in the Luxembourg, *The States-General* in the Chamber of Deputies in Paris, the colossal *Triumph of the Republic* in the Place de la Nation, the bronze statue of Eugène Delacroix, and numerous busts are among his more celebrated works.

DALY, AUGUSTIN (1838–1899). An American theatrical manager and dramatist; born at Plymouth, N. C. His plays and adaptations number 75. He was associated with the best and most popular actors and actresses of the times; managed theaters in New York and in London that made his name celebrated.

DAMROSCH (*dăm'rosh*), **LEOPOLD** (1832–1885). A German-American musician and composer; born in Posen; took an M. D. at Berlin (1854); studied the violin under Ries, Dehn, and Böhmer. Through Liszt he became solo violinist at Weimar, where he made the acquaintance of Wagner; conductor of the Breslau Philharmonic concerts (1859–1860); came to America in 1871 as conductor of the Arion Society, and until his death was the leading musical figure in New York; founded the Oratorio Society (1873) and the Symphony Society (1877); and gave a season of German opera in 1884.

DAMROSCH, WALTER JOHANNES (1862–). An American musician; son of Leopold Damrosch; born at Breslau; studied with his father, Rischbieter, Draeseke, von Inten, Max Pinner, and von Bülow; conductor of the Newark, N. J., Harmonic Society; took up his father's work on his death in 1885 and carried it through; conductor of the New York Oratorio

and Symphony societies; rendered *Parsifal* for the first time in America (1886); organized the Damrosch Opera Company (1894); composed *The Scarlet Letter*, an opera, and a *Te Deum* in honor of Dewey's victory at Manila. Director N. Y. Symphony Orchestra (1903–07). Composed an opera *Cyrano*, incidental music to several Greek plays, and many other works. For General Pershing organized a school for bandmasters at American headquarters at Chaumont, France, 1918.

DANNAT (*dan'at*), **WILLIAM T.** (1853–1929). An American artist and figure painter; born in New York City; studied in Munich and in Paris under Munkácsy; teacher in the École des Beaux-Arts; chief works are *Belle Otero, Spanish Women, A Sacristy in Aragon, A Lady in Red, A Lady in White*, and *The Quartette*, the last now in the Metropolitan Museum, New York.

DANNECKER (*dän'nek-er*), **JOHANN HEINRICH VON** (1758–1841). A German sculptor; born near Stuttgart; studied in Paris and in Rome with Canova; professor of sculpture at Stuttgart (1790); chief works are *Sappho, Psyche, Ariadne on the Panther, Christ, John the Baptist*, and busts of Schiller, Gluck, Lavater, and others.

DAUBIGNY (*dō-bēn-yī'*), **CHARLES FRANCOIS** (1817–1878). A French landscape painter and etcher; born in Paris; member of the Barbizon school; studied with Paul Delaroche. Of his many works in the United States, *On the River Oise* in New York, a *Town and River Scene* in Philadelphia, are well known.

DAUMIER (*dō-myā'*), **HONORE** (1808–1879). Beginning as an artist for music publishers and magazines, he joined the staff of a comic magazine as a caricaturist during the reign of Louis Philippe. Certain pictures representing the Emperor as Gargantua led to six months in prison in 1832. Later for *Charivari* Daumier produced pictures ridiculing bourgeois life, others the pseudo-classic in art and on the stage. Besides nearly 4,000 of such pictures, he found some time for naturalistic painting of very serious pictures, some of which are *Christ and his Apostles, The Good Samaritan, Don Quixote and Sancho Panza*, and *Christ Mocked*.

DAVENPORT, EDWARD LOOMIS (1816–1877). An American actor; born in Boston. His first appearance was with the elder Booth in *Sir Giles Overreach*. He progressed rapidly and became a leading artist in tragedy, comedy, and melodrama. His impersonations of *Brutus, Hamlet, Sir Giles*, and *Bill Sykes* were notable.

DAVENPORT (*dav'en-pōrt*), **FANNY LILY GIPSY** (1850–1898). An American actress; born in London, England; daughter of Edward Loomis Davenport; first appeared as a child in the Chambers Street Theatre in New York (1857); most successful in Daly's company in leading parts (1869–1873), and later in her own company till 1898.

DAVID d'ANGERS. See DAVID, PIERRE JEAN.

DAVID (*dä-vēd'*), **FELICIEN CESAR** (1810–1876). A French composer; born at Vaucluse; wrote *The Desert*, a symphonic ode which achieved an instant and complete triumph; an oratorio, *Moses on Sinai;* a symphony, *Christopher Columbus;* and several operas.

DAVID (*dä-vēd'*), **JACQUES LOUIS** (1748–1825). Regenerator of the modern French school of painting; born in Paris. In the Revolution he was a violent Jacobin and wholly devoted to Robespierre. Several of the scenes of the Revolution supplied subjects for his brush. He was appointed first painter to Napoleon about 1804; and after the second restoration of Louis XVIII. he was included in the decree which banished all regicides from France, when he retired to Brussels, where he died; painted *The Dead Marat*, the emperor, the pope, the famous *Mme. Récamier* in the Louvre, *The Three Fates, The Death of Socrates, The Oath on the Tennis Court*, and *Rape of the Sabines*. Many of his pictures are grand in style and composition, his portraits having remarkable insight into character.

DAVID, PIERRE JEAN (1788–1856). A French sculptor; born in Angers (hence commonly called David d'Angers. He executed a great number of medallions, busts, and statues of celebrated persons of all countries, including those of Washington, Lafayette, and Jefferson.

DAVIES, ARTHUR B. (1862–1928). An American painter, the pupil of Dwight Williams at Utica, N. Y., and a student in New York and Chicago. Some of his best pictures are *Dream* and *The Girdle of Ares* in the Metropolitan Museum, New York, *Maya, Mirror of Illusions* in the Art Institute, Chicago, *The Place of the Mother* and *Children of Yesterday* in Minneapolis, and *After-Thoughts of Earth*, for which he was awarded a medal and $1,500 by the Carnegie Trust.

DAVIES, HENRY WALFORD (1869–). An English organist, knighted in 1922, and performer at Temple Church from 1898 to 1923; conductor of the London Bach Choir; and professor of music (1919–26) at University College of Aberystwith, Wales. In 1927 he became organist at St. George's Chapel, Windsor. Apart from his influence as an organist and teacher, his notable work lies mainly in his church music; a chorus and orchestra setting for the morality play, *Everyman; The Sayings of Jesus;* and *Heaven's Gate*.

DEARMER, REV. PERCY (1867–1936). An English clergyman and professor of Ecclesiastical Art, King's College, London, who, besides many books on religious and social questions, wrote or edited the *Oxford Cathedral, Wells Cathedral, Fifty Pictures of Gothic Altars, English Carol Book, The Necessity of Art, Art and Religion, Songs of Praise* and other collections; editor of the *English Hymnal* (1906).

DEBUSSY (*dŭ-büs-sē'*), **CLAUDE** (1862–1918). French composer, a pupil of Chopin, and educated at the Paris Conservatory where he thrice won the medal of the solfeggio class. From the time that a jury of the Academy refused to place some of his music on a program, he became an independent and capable composer. Some of his notable works are *Pelléas and Mélisande, Trois Nocturnes, Rhapsodie*, some *Masques*, many songs, and numerous piano pieces.

DECAMPS (*de-kon'*), **ALEXANDRE GABRIEL** (1803–1860). French painter of original genius, who offended the critics by departing from most of the acknowledged methods in art, and in reprisal he painted *The Monkey Connoisseurs*, a brilliant satire on the jury of award. He was a leader in the school which reproduced scenes with fidelity of color, such as *Joseph Sold by His Brethren, Moses Taken from the Nile*, and a series of scenes in the life of Samson. The Metropolitan Museum of New York has his *Midnight Watch at Smyrna*.

DEGAS (*dē-gä*), **HILAIRE-GERMAINE EDGARD** (1834–1917). A French impressionist artist; born in Paris; a pupil of Ingres; chief works are the *Absinthe Drinkers*, the *Danseuse assise*, and the *Danseuse* in the Luxembourg; *The Ballet in Robert le Diable* in London.

DE GOGORZA (*dē gŏ-gŏrtz'ä*), **EMILIO** (1874–). Spanish-American baritone singer, born in Brooklyn, educated in Spain, England, New York, and Paris; married Emma Eames (q. v.). Except for occasional tours abroad, he sang mainly in the United States, having made many transcontinental tours, after his début in New York with Mercella Sembrich in 1897. Because of his Spanish parentage, his French training, and mastery of languages, he sang almost equally well in Spanish, French, Italian, and English. His repertoire was very extensive.

DEJAZET (*dä-zhä-zä'*), **PAULINE VIRGINIE** (1798–1875). French player of youthful parts of great popularity from 1820 to 1868, when she retired. For many years she managed the Théatre Déjazet, formerly the Folies, where she continued even in old age to be immensely praised for her children's rôles.

DE KOVEN (*dē kō'ven*), **REGINALD** (1861–1920). At the age of 20 he was granted the degree of doctor of music at Oxford University, after which he studied in several European cities. In the United States he was musical critic for a number of publications, such as *Harper's Weekly* and the New York *World;* founded and conducted the Washington Symphony Orchestra (1902–05); and wrote 300 compositions, including music for light operas, songs, and orchestra pieces. Some of his operas are *Don Quixote, The Fencing Master, Rob Roy, The Golden Butterfly*, and *Robin Hood*, the last of which continues to be sung. Harry B. Smith wrote the librettos for most of his operas. *Oh, Promise Me* and *The Armorer's Song* have been popular lyrics. De Koven was born in Middletown, Conn.

DELACROIX (*d'-lah-krwäw*), **FERDINAND VICTOR EUGENE** (1798–1865). A French painter; chief of the Romantic school; born near Paris. In 1857 he was chosen by the Insitute to fill the place of Delaroche. He was an artist of great versatility. Among his works are *Lady Macbeth, The Massacre of*

Scio, Dante's Boat, and *Milton Dictating Paradise Lost.*

DELAROCHE (*d'-läh-rōsh'*), **HIPPOLYTE** (familiarly styled **PAUL**) (1797–1856). A French painter; born in Paris. His signal merits consist in correct drawing, brilliant and harmonious color, and great distinctness and perspicuity in treatment, rendering the story of his pictures at once intelligible. Among them are *The Princes in the Tower, Stafford Blessed by Archbishop Laud, Mazarin Playing Cards, Execution of Lady Jane Grey, Murder of the Duke of Guise, Joan of Arc in Prison,* and numerous portraits.

DELIUS (*dā'lē-ōs*), **FREDERICK** (1863–1934). A composer born in England of German parentage, and educated at Bradford and the International College, Isleworth. For several years he was an orange grower in Florida, then went to Leipzig for further musical study, and afterward lived in Paris. His compositions have been highly appreciated by musicians, including the operas *The Magic Fountain, Fennimore and Gerda,* and *A Village Romeo and Juliet;* choral works like *A Song of the High Hills, Sea Drift* and *Songs of Sunset;* and various shorter pieces for stringed instruments.

DELLA ROBBIA, ANDREA. See under ROBBIA.

DELLA ROBBIA, LUCA. See under ROBBIA.

DE LUCA, GIUSEPPE (1876–). Italian baritone singer, born in Rome, made his début as Valentin in *Faust* at Piacenza in 1897, spent eight seasons at the La Scala Theatre at Milan, and toured the chief European capitals. Appearing as Figaro in *The Barber of Seville* at the Metropolitan in New York in 1915, his fame was instantaneous. Among his important rôles are in *Rigoletto, Don Giovanni, Otello, Don Pasquale, Parsifal, Pagliacci,* and *Favorita.*

DERAIN, ANDRE (1880–). A French painter, friend of Picasso, Braque and other Cubist artists, but not greatly affected in his work by them. In both his landscapes and in his figure painting he shows more of the influence of the classics.

DESTINN (*des'tin*), **EMMY** (1878–1930). Born in Prague as Emmy Kittel, she took the name of her music teacher, Mme. Loewe Destinn. Her musical career began as a violinist, until remarkable voice and dramatic talent were revealed. She appeared at Berlin in 1898, next in London, and finally at the Metropolitan, New York. She won fame in *Cavalleria Rusticana, Salome, The Flying Dutchman, Madame Butterfly, Don Giovanni,* and *Aïda.*

DETAILLE (*de-täy'*), **JEAN BAPTISTE EDOUARD** (1848–1912). A French historical and military painter; born in Paris; a pupil of Meissonier. His works include *Conquerors,* which won him the Legion of Honor (1872); *In Retreat, Charge of the Cuirassiers at Morsbronn,* and the *Passing Regiment* in the Corcoran Gallery at Washington; *Skirmishing near Paris* and three others in New York; and equestrian portraits of Edward VII. and the duke of Connaught.

DICKINSON, CLARENCE (1873–). American organist and composer, born in Lafayette, Ind., educated in Chicago, and for years directed the choir of the Brick Presbyterian Church and Temple Bethel of New York; professor of ecclesiastical music at Union Theological Seminary from 1912. Some of his notable compositions are *The Medicine Man* (1895), about 150 sacred choruses, and many solos. With Mrs. Dickinson (Helene Adelle Snyder, Ph. D.) he wrote *Excursions in Musical History, Songs of the Troubadours, Technique and Art of Organ Playing,* and *Choirmaster's Guide.*

DOMENICHINI (*dō-men-ē-kē'nē*), **DOMENICO ZAMPIERI** (1581–1641). A distinguished Italian painter of the Bolognese school. His *Communion of St. Jerome* in the Vatican is considered among the finest works of the masters. He assisted Annibale Carracci on his Farnese frescoes at Rome.

DONATELLO (*don-ä-tel'lō*), **(DONATO BARDI)** (c. 1386–1466). One of the revivers of the art of sculpture in Italy; born and died in Florence; patronized by Cosimo de' Medici and pupil of Brunelleschi and Squarcione. His masterpiece is *St. George,* for San Michele in Florence. Other works are the bronze *David,* the *St. John,* the bust of Niccolo da Uzzano, and *Angel with the Tambourine.*

DONIZETTI (*dō-nē-dzet'te*), **GAETANO** (1798–1848). An Italian composer, many of whose sixty odd operas were immensely famous in his period. His first great success was *Anna Bolena* at Milan, but the *Marino Faliero* at Paris (1835) found the contemporary success of Bellini's *Puritani* too great a competition. Donizetti then went to Naples, where the same year his *Lucia di Lammermoor* became a wonderful favorite. Next again in Paris his most popular work, *La Fille du régiment* was produced at the Opéra Comique. Other great operas are *Lucrezia Borgia, Linda di Chamounix, La Favorite,* considered the most artistic opera, and *Don Pasquale.* Though many of his compositions show evidence of haste and lack of revision, his facility in music was very remarkable.

DONOGHUE, JOHN (1853–1903). An American sculptor; born in Chicago; studied there and at the Ecole des Beaux-Arts under Jouffroy. The *Young Sophocles Leading the Chorus after the Battle of Salamis* is considered one of the masterpieces of American sculpture. It is in the Chicago Art Institute. The *St. Paul* in the rotunda of the Congressional Library, the *Seraphim,* and the *Hunting Nymph* are among his best works.

DORE (*dō-rāy'*), **PAUL GUSTAVE** (1832–1883). French illustrator, painter, and sculptor, who for many years was in high regard in England and America. Some of the books he illustrated are Dante's *Inferno, Don Quixote, The Bible, Paradise Lost,* and *Fables of La Fontaine.* His statue of Dumas, and his paintings *Tobit and the Angel* and *Christ Leaving the Prætorium* are other well-known examples of his art.

DOUW (or **DOW**), **GERARD** (1613–1675). Dutch master of color and light effects in painting, who studied under Dolendo and Rembrandt. The skill of the latter is shown in Douw's portrait of himself, now in London, and also one of *Blind Tobit.* In the painting of portraits he took exact and elaborate pains, and eventually sitters could not wait the required time for him. Certain effects of artificial light in his work have hardly been excelled. For many of his pictures, he received large sums.

DREW, JOHN (1853–1927). An American actor; born in Philadephia; first appeared as Plumper in *Cool as a Cucumber* at the Arch Street Theatre (1874), then joined Daly's company in 1875 and became leading man in it (1879); played with Ada Rehan in Shakespearean plays, and after 1892 played under Charles Frohman.

DUBOIS (*dü-bwä'*), **PAUL** (1829–1905). A French sculptor and painter; born at Nogent-sur-Seine. His *Florentine Singer* in the Luxembourg, his equestrian statue of *Jeanne d'Arc* at Rheims, and his *Le connétable de Montmorency* at Chantilly are his chief works.

DUCCIO DI BUONINSEGNA (*dö'chō dē bwōn-ēn-sen'yä*) (c. 1255–1319). An Italian painter; founder of the Sienese school; born in Siena; learned his art at the hands of the best Byzantine masters. He became a master of composition, perspective, grouping, and light. His altarpiece, *Virgin and Child Enthroned,* and *Life of Christ* in 27 scenes, in Siena; the *Transfiguration, Annunciation, Healing the Blind,* and *A Madonna and Child* in London are his chief works. He was the first Italian painter of genius.

DUGMORE, ARTHUR RADCLIFFE (1870–). British photographer, who lived mainly in America after 1889, where he studied natural history under W. E. D. Scott, and in 1898 devised a method of taking photographs of wild life. On extensive world travels took pictures of animals and birds, and painted many of them. Wounded in the World War. Some of his numerous books are *Nature and the Camera, Camera Adventures in the African Wilds,* and various stories of nature study and animals for boys.

DUPRE (*dōō-prāy'*), **JULES** (1811–1889). A French painter; born in Nantes. He is one of the most original and powerful of the French school. His landscapes are very popular in this country. He was the most prominent of the Fontainebleau artists of 1830, known as the Romantic or Natural school, which included Rousseau, Corot, Delacroix, Millet, and others.

DURAND (*dū-rand'*), **ASHER BROWN** (1796–1886). An American painter; born at Jefferson, N. J.; an engraver until 1835; painted a series of heads of the presidents; took up landscape work and with Colo was the earliest of the first American school of landscape artists; founder of the National Academy and its president (1845–1861); chief works, *The Catskills from Hülsdale, Harvey Birch and Washington, A Mountain Forest,* and *Kaaterskill Clove.*

DURER (*dü'rer*), **ALBRECHT** (1471–1528). A German engraver and painter; born at Nuremberg. He is considered one of the earliest etchers. Among his more important copperplates (1494–1504) are *Adam and Eve, The Nativity, The Great Horse,* and

The Little Horse. His magnificent woodcuts of the *Apocalypse* and the *Prodigal Son* were made about 1500. His paintings, *The Adoration of the Magi* in the Uffizi, the portrait of himself in Munich, the *Crucifixion* at Dresden, and *The Feast of the Rosary,* and his portraits, including that of *Jerome Holzschuher* and *The Four Evangelists,* are a few of the works of a man who ranks in the history of art with Leonardo da Vinci and Michelangelo.

DUSE (*dōō-sāy'*), **ELEANORA** (1859–1924). An Italian actress; born in Vigevano. She played in all the principal countries of Europe and then visited the United States. She has played Juliet, Frou-frou, La Femme de Claude, Magda in *Heimat,* Santuzza in *Cavalleria Rusticana,* Mirandolina in *La locandiera,* Marguerite Gautier in *La dame aux camélias, Gioconda,* and *Francesca da Rimini.*

DUVENECK (*dū-ven-ek*), **FRANK** (1848–1919). An American artist; born in Covington, Ky.; studied in Munich under Dietz. He has exercised a great influence on American art as an instructor. In 1875 his group of portraits was exhibited at the Boston Art Club. His *Turkish Page, Circassian, Italian Girl, The Professor,* and many etchings of Venetian subjects are among his best works. He gave many of his works (1915) to the art gallery of Cincinnati, Ohio.

DVORAK (*dvōr'zhäk*), **ANTONIN** (1841–1904). A Bohemian composer; born near Kralup. Attention was first called to him by what remains his best work, a *Stabat Mater,* the most modern and one of the finest settings of this hymn. He came to the United States in 1892, and became director of the National Academy of Music in New York City until 1899; director of the Prague Conservatory (1901). His symphony *From the New World* was produced in New York in 1893. He has utilized the Hungarian music with all of its rhythms, intervals, sudden transitions, and wealth of harmony in his chamber music and songs.

EAMES (*āmz*), **EMMA** (1867–). A talented and popular American soprano; born in Shanghai, China; studied in Boston, Mass., under Miss Munger, in Paris under Mme. Marchesi, and in Brussels under Gevaert; made her début in Paris in *Romeo and Juliet,* having been rehearsed by Gounod himself (1889); became a prima donna at the Metropolitan Opera House in New York in the grand operas, especially in Wagnerian rôles, in which she has achieved great success.

ELGAR (*ĕl'gar*), **SIR EDWARD** (1857–1934). An eminent English music composer; born and educated at Worcester; son of W. H. Elgar, organist for many years of St. George's Roman Catholic Church there; attended Worcester Glee Club from boyhood; learned the violin and occasionally led the orchestra; bandmaster of the county lunatic asylum; began to compose in 1883. Among his more than 50 works is the setting of Cardinal Newman's hymn, *The Dream of Gerontius.* A three-day Elgar festival was held at Covent Garden, London, in 1904, in which year he was knighted. *The Apostles* was produced at Birmingham Festival in 1903, and at Cologne in 1904; oratorio, *The Kingdom,* in 1906, and a symphony in 1908.

EL GRECO (THEOTOCOPULI, DOMENICO) (c. 1542–1614). Spanish painter, called El Greco because he was of Greek parentage and was born in Grete. Much of his work is now at Toledo, where he lived most of his adult life. Of his early period, some of the great pictures are *The Healing of the Blind,* of which one version is now at Parma and a second at Dresden; *Christ Driving the Traders from the Temple,* of which one copy is now at Minneapolis; *The Assumption of the Virgin,* now in the Chicago Art Institute; *The Dead Christ,* now at the Prado; and *Stripping of Christ Before the Crucifixion,* in the cathedral at Toledo, Spain. Of the works of his middle and later periods, certain well-known pictures are *Burial of Count Orgaz,* at St. Tomé at Toledo; *St. Martin* and *The Virgin with Saints,* both in the Widener collection in Philadelphia; *St. Peter,* now in Washington; *The Lady with the Mantilla,* in the Johnson collection, Philadelphia; and the portrait of an old man, said to be the artist's self portrait, now in the Metropolitan Museum, New York. El Greco was a pupil of Titian, and in turn was greatly admired by Velasquez. His son and heir finished many of his incomplete pictures. In showing facial expression he was original and most effective. El Greco is said to have made small pictures in oil of his works before trying a large canvas and there are several versions of some of his pictures.

ELMAN, MISCHA (1891–). Having heard him play the violin while on a tour, Leopold Auer invited Elman to Leningrad for further study. For purity and distinction of tone he at once gained great renown in Russia, England, and after 1908 in the United States. Toured the United States several times, and in 1925 became a permanent resident in New York.

ELSHEIMER, ADAM (1579–1620). A German painter of Frankfort, who went to Munich in 1598, and shortly afterward to Italy, where he remained. At first influenced by painters of Flanders, he became a classic adherent in Rome, and later showed some influence of Caravaggio. Many of his pictures, which are small, were painted on copper. His influence on modern landscape art was great. *St. Paul at Lystra, Fall of Troy, Ceres,* and *Philemon and Baucis* are important pictures.

EMMETT, DANIEL DECATUR (1815–1904). An American negro minstrel and song composer; born at Mt. Vernon, Ohio; organized the *Virginia Minstrels* with Frank Brown, Whitlock, and Phelam (1842), opening at the Chatham Square Theatre in New York; wrote *Dixie* (1859), *Old Dan Tucker, The Road to Richmond, Boatman's Dance,* and *Walk Along, John.*

ENNIS, GEORGE PEARCE (1884–1936). American artist, educated at St. Louis and Chicago. Some of his chief works are the stained glass windows of the New York Athletic Club, Church of all Nations, New York, victory windows at U. S. Military Academy, West Point, and windows in many churches. Exhibited at New York, Philadelphia, Chicago, Buffalo; winner of several art prizes.

ETTY (*et'i*), **WILLIAM** (1787–1849). An English painter; born in York; studied under Lawrence and in Venice; R. A. in 1828. Among his works, which are marked by beauty and brilliance of color, are *Cleopatra* and *Youth on the Prow and Folly at the Helm,* three pictures of Judith, *Combat*—said to be his best—and a fine picture of *Joan of Arc.*

EVES, REGINALD GRENVILLE (1876–). English painter of portraits of celebrated persons, including Stanley Baldwin, Thomas Hardy, the Queen of Spain, Viscountess Churchill, Lady Diana Manners, Lord Sherborne, Viscountess Kurzon, and many others. He was born in London and received his art education at the Slade School, Oxford; won silver and gold medals for his paintings (1924–1926).

EYCK (*īk*), **HUBERT** (c. 1366–1426), **JAN VAN EYCK** (c. 1385–1441), and **MARGARET VAN EYCK** (c. 1377–1430). Eminent Flemish artists; founders of the early Flemish school; born at Maaseyck on the Maas. They were two brothers and sister. Tradition says they discovered the art of oil painting, but the art was known in the twelfth century. They discovered drying mediums and brilliant coloring. Their works include *The Adoration of the Lamb* at Ghent by Hubert; two said to have been painted by Jan are in the Metropolitan Museum in New York; Margaret, a member of the order of Our Lady of Ghent, led a retired life. She is believed to have painted a series of miniatures for the missal of the duke of Bedford.

EZEKIEL (*e-zē'ki-el*), **MOSES (JACOB)** (1844–1917). An American sculptor; born in Richmond, Va.; served in the Confederate army; studied sculpture at Berlin; won admission to the Society of Artists by his colossal bust of Washington; took the Michel Beer prize—the first foreigner to win it; settled in Rome. His *Religious Liberty* in Fairmount Park at Philadelphia, *Apollo and Mercury* in Berlin, *Judith* in Cincinnati, and the Jefferson monument at Louisville, Ky., are the best examples of his work.

FABRIANO (*fä-brē-ä'nō*), **GENTILE DA.** See GENTILE DA FABRIANO.

FAED (*fād*), **JOHN** (1819–1902). A Scottish painter; born at Burley Mill; a miniature painter in Edinburgh (1841–1849); settled in London; chief works are *The Cottar's Saturday Night, Shakespeare and his Contemporaries, The Soldier's Return, The Morning after Flodden,* and *An Incident of Scottish Justice.*

FAED, THOMAS (1826–1900). Brother of John Faed; born at Burley Mill; distinguished himself in his art studies at Edinburgh; went to London (1852), where his pictures of Scottish life won him a foremost place among those of his contemporaries. Among his works are *The Mitherless Bairn, The First Break in the Family, Faults on Both Sides, In Time of War,* and *Annie's Tryst.*

FALGUIÈRE (*fäl-gyar'*), **JEAN ALEXANDRE** (1831–1900). A French sculptor; pupil of Jouffroy; born at Toulouse. His chief works are *The Winner of the Cockfight, The Young Martyr Tarcisius, St. Vincent de Paul, Lamartine, Eve, Progress Abasing Error,* and *Poet Holding a Lyre.*

FANTIN-LATOUR (*fon-tan'lä-tör'*), **IGNACE HENRI JEAN THEODORE** (1836–1904). A French painter; born at Grenoble; friend of Ingres, Delacriox, Corot, Millet, Courbet, Leighton, and Millais; excelled as a portrait painter and in the delicate drawing of flowers. His works include *Hommage à Delacroix, Manet's Study at Batignolles, Coin de table, Autour du piano, Scene from Tannhäuser, Temptation of Saint Anthony,* and *Prelude to Lohengrin.*

FARINELLI (*fä-rē-nel'lē*) (1705–1782). A Neopolitan opera singer of most remarkable power and range of voice; his real name was Carlo Breschi, but he adopted that of his uncle Christiano Farinelli. All over Europe he sang before monarchs and people alike. He remained three years in England, went to Spain for a visit (1738), and stayed there at court for 25 years. Employed by the queen to charm Philip V. when he was melancholy, Farinelli sang the same four songs to him almost every night for nearly ten years. Under Frederick VI. he continued in favor, was decorated, and inspired the king to establish an Italian opera. Charles III. asked him to leave Spain, but paid his salary on condition that he would live at Bologna instead of at Naples.

FARRAR (*făr'ăr*), **GERALDINE** (1882–). American singer, born in New Haven, Conn., educated in Paris under Trabedello and in Berlin under Lilli Lehmann. At 19 she made her first appearance on the operatic stage in Berlin as Marguerite in *Faust.* From 1906 to her retirement in 1922 she sang at the Metropolitan, New York; in 1927 she reappeared with her own company on tour. Some of her famous parts are Mme. Butterfly, Manon, Mignon, Elizabeth, Tosca, and Violetta.

FARWELL, ARTHUR (1872–). He was born at Minneapolis, educated in Berlin under Humperdinck and in Paris under Guilmant; he returned to the United States, and directed various musical projects, lectured, and taught at Cornell, University of California, and elsewhere. He composed *American Indian Melodies, Folk Songs of the South and West,* incidental music for *Joseph and his Brethren, The Garden of Paradise,* the mask *Caliban,* and a *Pilgrimage Play* at Hollywood, Calif.

FECHTER (*fech'ter*), **CHARLES ALBERT** (1824–1879). An Anglo-French actor; born at Paris. He excelled in *Ruy Blas, The Corsican Brothers, Hamlet, Othello, Duke's Motto,* and *No Thoroughfare;* came to the United States in 1870, where his acting was most popular, but his attempts at management were unsuccessful. He was forced to retire from the stage because of an accident, which left him permanently lame, and died in Pennsylvania.

FERRIS, JEAN LEON GEROME (1863–1930). For many years he devoted his attention to a series of paintings representing American history in 1865; and in 1917 the city of Philadelphia, his home, built a special gallery in Congress Hall to accommodate his series of seventy pictures. He also made a special study of early vehicles, ships, and ordnance, the models of which are also in Philadelphia. Ferris studied under S. J. Ferris, in Paris under Bouguereau and was a private pupil of J. L. Gérôme.

FEUERBACK (*foi'er-bäćh*), **ANSELM** (1829–1880). Inspired by the ideals of French art, this German painter also studied at Munich, Vienna, and Rome. He sought to revive old classic methods, and to excell in large pictures, but he is now highest in favor for portraits and landscapes. In 1873 he accepted a position as teacher at the Vienna Academy, and a commission to decorate the ceiling of the building with the *Wars of the Titans,* a work never completed. Some of his best pictures are entitled *Dante Walking with the Noble Ladies of Ravenna* (1857), *Dante's Death* (1858), the coloring of which is admirable; *Plato's Symposium* and *Iphigenia,* which are more in the old classic style; *Hafiz at the Well* and *Death of Aretino* (1854), two earlier works more in the French tradition.

FIELD, JOHN (1782–1837). A British composer; born in Dublin; remembered for his "nocturnes," which greatly influenced Chopin. Except for four years (1831–1835), after 1820 he lived in Moscow. Though his more ambitious work is now forgotten, some of the nocturnes for the piano are still highly admired by musicians.

FILDES (*fīldz*), **LUKE** (1844–1927). An English artist; born at Liverpool; contributed to various magazines and illustrated books, notably Dickens's *Edwin Drood.* His most noted pictures are *The Poor of London, The Widower,* and *The Doctor,* and coronation portraits of Edward VII and Queen Alexandria and of George V. He was knighted in 1906.

FINBERG, ALEXANDER JOSEPH (1866–). After studying art at Lambeth and Paris, he exhibited some works in black and white, and wrote criticism for many journals, such as the *London Graphic* and *Illustrated London News.* In 1905 the trustees of the National Gallery invited him to complete the arrangement of drawings made by J. M. W. Turner and partly collected by Ruskin, and Sir Joseph Duveen built a special gallery to house them. He also wrote *The English Water Colour Painters, The Drawings of David Cox, Ingres,* and several books on the art of Turner.

FISKE, MINNIE MADDERN (1865–1932). An American actress; born at New Orleans, La.; played Françoise in *Richelieu* when only 12 years old; at 16 appeared as a star in *Fogg's Ferry;* married Harrison Grey Fiske, editor of the New York *Dramatic Mirror* (1890); played the title rôles in *Tess of the d'Urbervilles, Becky Sharp, Leah Kleschna,* and *Roshmerholm.* With Henrietta Crosman, Otis Skinner, and other favorite stars, she made a notable tour of the country in 1927–28 with a revival of *The Merry Wives of Windsor.*

FLAGG, ERNEST (1857–). American designer and architect of the Singer Building, New York, the highest tower in New York at the time (612 feet, 1908), St. Luke's Hospital, the Corcoran Art Gallery at Washington, and some buildings of the Naval Academy at Annapolis. Later he used some new methods in designing and constructing small but strong houses, described in his book *Small Houses—Their Economic Design and Construction.*

FLAGG, JAMES MONTGOMERY (1877–). Artist and author, born near New York, and studied there and in England. For years he acted as illustrator for *St. Nicholas* and other magazines, produced a series of popular cartoons for the newspapers, and painted various portraits in Paris, New York, and St. Louis. Appointed military artist of New York by Governor Whitman, he designed a set of 45 posters for the World War.

FLANDRIN (*flŏn-drin'*), **JEAN HIPPOLYTE** (1809–1864). A French painter; born in Lyons, France. Among his chief works are the fine series of frescoes in the churches of St. Germain-des-Près and St. Vincent de Paul, Paris, which are reckoned among the masterpieces of modern painting. He was the favorite pupil of Ingres, and his works show a mystic tendency. *Christ Going up to Jerusalem, Christ Going to Calvary,* and *Recognition of Theseus* are among his best works.

FLAXMAN (*flaks'măn*), **JOHN** (1755–1826). An English sculptor and draughtsman; born in York. The monuments to Nelson and Howe in St. Paul's are by his hand. One of his finest productions is the *Shield of Achilles;* elected R. A. (1800); and became professor of art in a special chair created by the National Academy (1810). Some of his greatest works are monuments of Sir Joshua Reynolds, Captain Webbe, Lord Cornwallis, and Sir John Moore. He also made a series of designs to illustrate the classics, and they were executed by others.

FLEMING, BRYANT (1877–). Landscape architect, educated at Cornell, where he acted as professor (1904–15); planned the restoration of Watkins Glen, N. Y., certain historic monuments, improvements at San Juan, Porto Rico, and changes in many private estates, including those of V. Everitt Macy and Andrew Carnegie.

FLOTOW (*flō'tō*), **FREDERICK FERDINAND ADOLPHUS VON** (1812–1883). A German composer of operas; born at Teutendorf. His best known work is *Martha.* The best among his later operas are *Indra, La veuve Grapin,* and *L'ombre.*

FOLEY (*fō'li*), **JOHN HENRY** (1818–1874). Sculptor born in Dublin, where he studied and then exhibited at the Royal Academy, London, after further study there. Among his notable works are *John Hampden* and *Selden* in the Houses of Parliament, *Sir James Outram* at Calcutta, *Prince Albert* in Hyde Park, London, *Stonewall Jackson* at Richmond, Va., *Goldsmith, Edmund Burke,* and in more fanciful style, *Ino and Bacchus, Asia, Innocence,* and *Death of Abel*

FONTANA (*fon-tä'nä*), **DOMENICO** (1543–1607). An Italian architect. Under Pope Sixtus V. he erected the Egyptian obelisk in front of St. Peter's, Rome (1586), and later built the Lateran Palace, the Vatican Library, and the Royal Palace at Naples.

FONTANA, PROSPERO (1512–1597). An Italian painter who was the pupil of Vasari and adopted his master's style. Much of his work still remains at Bologna, including an *Entombment* and *St. Alessis Distributing Alms*. As a portrait artist he was greatly excelled by his daughter, Lavinia (1552–1614), who painted a large number of the ladies of Bologna and Rome. Both she and her husband, Paola Giovanni, who helped her in some of her portrait work, studied under her father.

FOOTE, ARTHUR (1853–1937). An American musician and composer; born at Salem, Mass.; studied under Paine; settled in Boston and studied under Lang; organist of the First Unitarian Church at Boston (1878–1910). Among his work are chorus and orchestra accompaniment of Longfellow's *Farewell of Hiawatha, Wreck of the Hesperus*, and *Skeleton in Armor;* overtures; piano music; and vocal works.

FORBES-ROBERTSON, JOHNSTONE (1853–1937). From his first appearance in *Mary, Queen of Scots* (1874) to his retirement in 1915, he played in many important rôles. He studied under Samuel Phelps, appeared with Irving at various times, with the Bancrofts, John Hare, Mrs. Patrick Campbell, Helen Modjeska, and after 1900 with Gertrude Elliott whom he married in that year. Important engagements were those of Pinero's *The Profligate, Romeo and Juliet, Hamlet, Macbeth, The Light that Failed, Caesar* and *Cleopatra*, and *The Passing of the Third Floor Back*. He appeared in the United States and Canada in 1910 and on his farewell tour in 1915. In 1913 he was knighted.

FORD, GEORGE BURDETT (1879–1930). American expert in city planning and art; consultant in rebuilding of French cities after the World War, and received the honor of a Chevalier; and lectured on town planning at Columbia (1914–16). He acted as adviser for 70 cities, including New Haven, Conn., Omaha, Nebr., Louisville and Lexington, Ky., Cincinnati and Dayton, O., Richmond and Norfolk, Va., and Wilmington, Del.

FORREST, EDWIN (1806–1872). An American actor; born in Philadelphia, Pa. He played with remarkable success in Europe and the United States; in 1871 retired from the stage. His first appearance was at the Walnut Street Theatre in Philadelphia as young Norval in Home's *Douglas* (1820). He played Shakespearean rôles in New York with great success. In 1849 the jealousy between him and Macready culminated in the Astor Place riots, which caused the 7th Regiment to be called out, and resulted in the death of a score of people and the wounding of many more.

FORTUNY (*fôr-tö'nē*), **MARIANO JOSE MARIA BERNARDO** (1838–1874). A Spanish painter; born at Réus, Catalonia; studied at Rome. His *Mendicant, Don Quixote, The Hindu Snake Charmer*, and *An Ecclesiastic* are in Baltimore. His *Camels at Rest, The Serpent Charmer*, and a *Lady in Black* are at the Metropolitan Museum in New York.

FOSTER, BENJAMIN (1852–1926). An American landscape and animal painter; born at North Anson, Me.; studied under Thayer in New York and with Merson and Corot in Paris; is especially strong in his hazy moonlit scenes and in seascapes; member of the National Academy (1904) and of its Council (1905).

FOSTER, STEPHEN COLLINS (1826–1864). Probably the greatest composer of American negro melodies and folk songs that America has produced. He was born in Pittsburgh, Pa., studied at Athens Academy, and for some months at Jefferson College, Canonsburg, Pa. By 1852 he had decided to give much of his time to what he called Ethiopian music. For four years (1846–50) he worked as a bookkeeper in Cincinnati, and in 1860 went to New York, where his death four years later was accidental. Of his 175 compositions, for which he usually wrote both words and music, some of the most popular sentimental pieces were *Open Thy Lattice, Love, Come Where My Love Lies Dreaming;* his best humorous song *De Camptown Races*, once immensely popular; and his folk-ballads *Uncle Ned* (1848), *Nelly Bly* (1849), *Swanee River* (Old Folks at Home) (1851), *Massa's in the Cold, Cold Ground* (1852), *Old Kentucky Home* (1853), and *Old Black Joe* (1860).

FOUCQUET (*fö-kā'*), **JEAN** (c. 1415–1485). A French painter; born at Tours; studied in Italy; court painter to Louis XI. Among his works are a miniature *Adoration of the Magi* at Chantilly, portraits at Paris and Berlin, and a series of 40 miniatures for Etienne Chevalier's *Book of Hours*. He was notable for the minute rendering of details and also for some fine altarpieces.

FOWLER, FRANK (1852–1910). An American painter; born in Brooklyn, N. Y.; studied with Edward White at Florence, with Carolus-Duran and at the École des Beaux-Arts in Paris; assisted Carolus-Duran on a ceiling for the palace of the Luxembourg, now in Louvre; settled in New York (1879); member of the National Academy (1899); noted for his portraits of celebrities and a decorative ceiling in the ball room of the Waldorf-Astoria.

FRAGONARD, (*frà'gô-nàr'*), **JEAN-HONORE** (1732–1806). French painter, noted for his facility with the brush and in coloring; in recent years has become increasingly popular. Living at the court of Louis XV., he took on much of the life of that brilliant company, until the Revolution drove him to Grasse in 1793. Some of his works now greatly admired are *Serment d'amour, Le Verrou*, decorations for the homes of Maubert, his friend, at Grasse and Mme. du Barry in Paris. Some of the panels at Grasse are now in the Frick Collection, New York. Most European galleries have some of his canvases.

FRANCESCHINI (*frän-ches-kē'nē*), **MARCO ANTONIO** (1648–1729). Painter born at Bologna, Italy, who was called to Rome, Genoa, Parma, and other cities to execute art commissions. Pope Clement XI. made him a knight for painting certain mosaics in St. Peter's. Some of his best work is in the church of Corpus Domini at Bologna, where he attained a great reputation for coloring and for originality of design in his groups.

FRANCIA (*frän chä*), (**FRANCESCO RAIBOLINI**) (c. 1450–1517). Eminent painter of the early Bolognese group, represented in the National Gallery of England by *Virgin and Child of St. Anna and Pieta;* in Munich by *The Madonna within the Rose Garden;* in Rome by *St. Stephen* in the Borghese Gallery; and in Bologna by some frescoes in the church of St. Cecilia. He faithfully studied the old masters, was an enthusiastic friend of Raphael, who pronounced Francia's Madonnas unexcelled by few great artists, and he in turn trained a host of pupils, including two of his own sons.

FRANCK, CESAR (1822–1890). Composer of Belgian-German birth, who lived in Paris after 1837, and became a naturalized subject in 1873, the year after he was appointed professor of organ at the Paris Conservatory, where he had been a student in 1837. Many of the greatest organists of recent times were his pupils, and as a finished and conscientious composer his influence was far reaching. A few of his many notable works are *Ruth* (1846), a biblical cantata; *Rebecca* (1881), an arrangement for solo, chorus, and orchestra; *Psyche* (1888), for orchestra and chorus; and many smaller pieces for violin, piano, and orchestra.

FRANZ (*fräntz*), **ROBERT** (1815–1892). A German musician; born in Halle, Prussia. He was famous for his songs, which were of a peculiar lyric beauty and number about 250. His first published composition appeared in 1843. His later years were spent in editing the works of Bach, Handel, and others.

FREMIET (*frā-myā*), **EMMANUEL** (1824–1910). A French sculptor; born in Paris; nephew and pupil of Rude. Among his best works are *Joan of Arc* at Paris, *Joan of Arc* and *Condé* at Nancy, *Velasquez* at Paris, *Lesseps* at the entrance of the Suez Canal, *Ourang-Outang and Borneo Savage*, and his earlier *Wounded Bear* and *Wounded Dog*, both of which are in the Luxembourg Museum.

FRENCH, DANIEL CHESTER (1850–1931). An American sculptor; born at Exeter, N. H.; studied with J. Q. A. Ward and in Florence and Paris. Among his works are *Minute Man;* busts of Emerson, Alcott, Hunt, and John Boyle O'Reilly; groups on the St. Louis Customhouse, the Philadelphia Courthouse, the Boston Post Office, and the New York Customhouse; *The Angel of Death and the Young Sculptor, The Republic*, and *Alma Mater* at Columbia University; statues of John Harvard, Rufus Choate, Thomas Starr King, and General Cass. His *Washington* in collaboration with Potter was presented to France by the Daughters of the Revolution. His group of *Doctor Gallaudet and his First Deaf Mute Pupil* is in Wash-

ington. He finished his statue of Lincoln for the Memorial at Washington in 1920 and that of Lafayette in 1922.

FREMSTAD, OLIVE (1870–). Dramatic soprano, born in Sweden, educated at Oslo, and at 12 came to America, beginning her musical education in New York in 1890, and later studied under Lilli Lehmann in Berlin. Making her début in *Il Trovatore* at Cologne (1895), she soon sang in various cities of Europe, being engaged at Munich for three years (1900–03), and singing at Covent Garden, London. After 1903, when she made her New York appearance in *Die Walküre*, she appeared in many Wagnerian and other rôles.

FRITH, WILLIAM POWELL (1819–1909). An English painter; born at Aldfield, Yorkshire; elected A. R. A. (1845) and R. A. (1853). Among his best works are *Ramsgate Sands, The Derby Day, The Railway Station, The Marriage of the Prince of Wales*, and *The Road to Ruin*.

FROHMAN, CHARLES (1858–1915). An American theatrical manager; born in Sandusky, Ohio; began at 18 as manager of one of Haverly's minstrel troupes; leased Madison Square Theatre (1890); opened the Empire with Belasco's *The Girl I Left Behind Me* (1893); manager, lessee, or owner of several theaters in New York and London; perished on the *Lusitania*.

FROHAWK, FREDERICK WILLIAM (1861–). British artist and zoölogist, who was reproduced many birds and animals in oils, watercolors, lithography, and black and white; illustrator on ornithology and reptiles for *Britannica, The Field*, and various journals. Some of his works are *Birds of the Sandwich Islands, Birds with their Nests and Eggs, Geese of Europe and Asia*, and *Natural History of Butterflies*.

FROMENTIN (*frō-mon-tan'*), **EUGENE** (1820–1876). A French painter and writer; born in La Rochelle. His *Crossing the Ford* and *Arabs Watering Horses* are in New York, and his *Encampment in the Atlas Mountains* is in Baltimore. His *Les maîtres d'autrefois* is the sole masterpiece of art criticism published in France in the nineteenth century.

FULLER, GEORGE (1822–1884). An American painter; born at Deerfield, Mass.; studied under Henry Kirke Brown at Albany, N. Y., and abroad; noted for his portraits. Among his other works are *A Turkey Pasture in Kentucky, And She Was a Witch*, and *Winifred Dysart;* member of the National Academy (1857).

FURSCH-MADI (*försh'-mä-dē*), **EMMA** (1847–1894). A French soprano singer; born at Bayonne; sang the leading soprano parts in *Aïda, Don Giovanni, Huguenots, Trovatore*, and others in France, England, and in the United States from 1884 till 1894.

GADE (*gä'de*), **NIELS WILHELM** (1817–1890). A Danish musical composer; born at Copenhagen; studied at Leipzig and formed a friendship with Mendelssohn; with Hartmann founded the conservatory at Copenhagen (1865). His best works include *Michael Angelo*, an overture; eight symphonies; several compositions for piano and for strings; and cantatas, such as *Spring Message, Spring Fantasy, Psyche*, and *The Erlking's Daughter*.

GADSKI (*gät'skĭ*), **JOHANNA** (1872–1932). A German soprano singer; born at Anclam; sang Brunhilde in the Metropolitan Opera House at New York (1896) and for several years sang leading parts there; a popular singer of German *Lieder*. She is greatest in Brunhilde in the *Ring*, Eva in *Die Meistersinger*, and Senta in *The Flying Dutchman*. She married Hans Tauscher of Berlin in 1892. After her retirement from the stage (1917) she acted as teacher and adviser to young artists.

GAINSBOROUGH (*gainz'bro*), **THOMAS** (1727–1788). An eminent English landscape and portrait painter; born at Sudbury; became a fashionable portrait painter at Bath (1760); one of the 36 original members of the Royal Academy; settled in London (1774). He painted more than 300 canvases, of which 220 were portraits. The portrait of the *Duchess of Devonshire* was bought for £10,065. It was cut from the frame in the galleries of Thomas Agnew and Sons by a thief (1876) and recovered in the United States (1901). It is now in the collection of Mr. J. Pierpont Morgan of New York. *A Landscape with Figures* is in the Chicago Art Institute; and two "Landscapes," *Mr. Borroughs*, and *A Child with Cat* are in the Metropolitan Museum at New York.

GALLI-CURCI (*gäl-lee-koor'-chee*), **AMELITA** (1889–). Italian-American coloratura soprano of great smoothness, range, and sweetness of voice, who was born in Milan, Italy, of Italian and Spanish parentage. In the Royal Conservatory, she studied piano and harmony; but for her singing she had no definite teacher. She made her début at Rome in 1909 in *Rigoletto*, toured Europe and South America, and in 1916 was engaged by the Chicago Opera Company, with which she appeared for four seasons. In 1919 she joined the Metropolitan Opera Company. Some of her chief parts are Juliette in *Romeo and Juliette*, Lucia in *Lucia di Lammermoor*, Mimi in *La Bohème*, and Leila in the *Pearl Fishers*.

GARCIA (*gär-thē'ä*), **MANOEL (DEL POPOLO VINCENTE)** (1775–1832). Spanish composer, singer, and teacher, already known as a composer of light operas, appeared at Paris in 1808 in *Griselda*. At Naples, again at Paris, and later in London he acquired great fame, producing many operas of his own. Yet his ability as a teacher in London overshadows his work as a performer. His eldest daughter was the celebrated Madame Malibran (q. v.), and his son, also a great teacher, died in London in 1906 at the age of 101. The son was the inventor of the laryngoscope.

GARDEN, MARY (1877–). General director of the Chicago Opera Company (1921–22), and member of the company from 1910, Mary Garden achieved a notable following in parts like Thaïs, Salomé, Mélisande, and Louise. She was born in Aberdeen, Scotland, came to America with her parents at six, and lived in Chicago. After study under Trabadello, Chevalier, and Fougère in Paris, she made her first appearance at the Opéra Comique in 1900 as Louise.

GARRICK (*gar'ik*), **DAVID** (1717–1779). English actor and manager, regarded as the greatest tragedian of his age, from youth had a passion for acting. Born in Litchfield, he became a pupil of Samuel Johnson, and went with him to seek fortune in London in 1737. Garrick appeared *incognito* in 1741 at a London theatre, having already written a dramatic piece, *Æsop in the Shades*. His first great success was in *Richard III*. Later he acted in London, Dublin, and the provinces, remaining at Drury Lane for 30 years, but acted only little after 1766. During much of the time he managed the playhouse. He produced 24 Shakespeare plays, in 17 of which he took star parts, made four volumes of adaptations or original plays, revised Shakespeare to suit the taste of the age; as manager he missed few notable hits, unless it be Goldsmith's *Good Natured Man*, which he refused to stage.

GATTI-CASAZZA (*gät-ty-kä'säz-zä*), **GIULIO** (1869–1940). Operatic director, who was educated in Italy, where he was born at Udine, being trained as an engineer, but took up music and literature privately. For five years he directed the municipal theater and music of Ferrara, and for ten following (1898–1908) the Scala at Milan. Caruso and Chaliapin appeared under his management. In 1908 he began to direct the Metropolitan Opera of New York.

GAUGUIN, PAUL (1848–1903). A French painter, who departed from the Impressionism of his time, and developed what was often called Synthesism, which greatly influenced some of his friends. He spent some years in a banking firm of Paris, married a Danish lady, lived for two years in Martinique, and after 1891 mainly at Tahiti and the Marquesas in the South Pacific, where he died. He was an exponent of the use of brilliant colors. Among his best works are *Le Christe, Jeune, Seule, Devant le Case*, and a huge canvas which was designed to be his great masterpiece completed just before his sad death.

GAY, EDWARD (1837–1928). For his *Broad Acres* the Metropolitan prize of $2,000 was awarded to him in 1887. It is now in New York. Among his other large canvases are *Washed by the Sea, Atlantis, Where Sea and Meadow Meet*, now in the Governor's Mansion at Albany, and *Waving Grain*, now at Minneapolis.

GAY, WALTER (1856–1937). An American artist; born at Hingham, Mass.; studied with Bonnat in Paris. His *Fencing Lesson* was exhibited at the Salon (1879); his *Bénédicité* was purchased by the French Government and given to the Amiens museum; his *Las Cigarreras* is in the Luxembourg; his *Spinners* is in the Metropolitan Museum at New York; and there are some highly representative pieces in the Tate collection in London and in the Boston Museum of Fine Arts.

GEIBEL (*gī bel*), **ADAM** (1855–1933). Celebrated blind composer of sacred music, who was born in Germany, was blinded at the age of 9 days, studied under David D. Wood in Philadelphia, and became a church organist and teacher of music. Some of his compositions are a collection of songs for men, a similar one for

ladies. *The Nativity, Light out of Darkness, The Lord of Glory, Heavenly Glory,* all sacred cantatas, the *Philadelphia Sesquicentennial Ode,* and several noted hymns.

GERARD, FRANCOIS, BARON (1770–1837). A French painter; born at Rome, of French and Italian parentage. In 1795 his *Blind Belisarius* brought him to the front, while subsequent work as a portrait painter raised him above all his contemporaries. His masterpiece, *Entry of Henry IV. into Paris,* brought him a barony at the hands of Louis XVIII. His historical paintings characterized by minute accuracy of detail, include *Napoleon in his Coronation Robes* and *Battle of Austerlitz.*

GENTILE DA FABRIANO (c. 1370–1427). Italian painter, the first great Umbrian master, who painted for Venice a series of frescoes dealing with the life of Barbarossa. For these he was allowed to wear the dress of a noble of Venice and awarded a life pension. In Florence he painted the *Adoration of the Magi,* now in the Uffizi, a *Madonna,* now in Berlin; a *Madonna with Angels,* now owned by the king of England and lent to the National Gallery of London. The freshness and refinement of his paintings greatly influenced the history of Venetian art.

GERMAN, EDWARD (1862–1936). English composer, whose music to *King Richard III.* pleased Sir Henry Irving so much that he asked for music for *Henry VIII.* Afterward (1892) German gave all his time to writing, and among his numerous works are the *Gypsy Suite,* the symphonic poem, *Hamlet, Welsh Rhapsody, Coronation March and Hymn, Moon Fairies,* and *Just So Song Book.*

GEROME (*zhȳ-rōmé*), **JEAN LEON** (1824–1904). A celebrated French painter and sculptor; born at Vesoul. He studied at Paris under Paul Delaroche, with whom he subsequently traveled in Italy. Among his most famous pictures, all characterized by vivid coloring and strong dramatic effect, are *The Age of Augustus and the Birth of Christ, Roman Gladiators before Cæsar,* and *Cleopatra and Cæsar. His Abyssinian Chief* and *Sheik at Devotions* are at the Metropolitan Museum; *Louis XIV. and the Grand Condé* is also in New York; *The Duel after the Masquerade* is in the Walters collection at Baltimore; and his *Cæsar Dead* is in the Corcoran Art Gallery in Washington.

GERSTER, ETELKA (1857–1920). Celebrated Hungarian contralto singer, a pupil of Mme. Marchesi. She made her début in Venice in 1876, and in the following year married Carlo Gardini. For high and flexible voice, dramatic qualities, and pleasing stage presence, she was a great favorite until her retirement in 1890. After 1896 she maintained a school for singers in Berlin.

GHIBERTI (*gē-bâr'tē*), **LORENZO** (1378–1455). An Italian sculptor and designer; born at Florence. His most famous achievement, which immortalized his name, was the execution of two doors with bas-relief designs in the baptistry at Florence. He spent 21 years at this work, and so noble were the designs and so perfect the execution that Michelangelo declared them fit to be the gates of Paradise.

GHIRLANDAJO (*gēr-län-dä'yō*), **DOMENICO (BIGORDI)** (1449–1494). An Italian painter; born at Florence. He was a painter of amazing facility, as shown by his *Visitation* in the Louvre; his *Adoration of the Magi* in the Church of the Innocents at Florence; his *Birth of John the Baptist* in the Church of Santa Maria Novella at Florence; and his fresco, *The Last Supper,* in the Church of the Ognisanti at Florence. His son Ridolfo (1483–1561) became a celebrated painter of large canvases, of which *The Procession to Calvary* is in the National Gallery of London; a *Coronation of the Virgin* is in the Louvre, Paris; and a *Nativity* is in the Hermitage, Leningrad.

GIBSON, CHARLES DANA (1867–). An American illustrator and artist, who created a series of pictures of the American girl, which attained an enormous vogue. Later he drew pictures for an edition of *The Prisoner of Zenda,* and 52 drawings for *Collier's Weekly* for $50,000, said to have been a record price at the time. For several years after 1905 he dropped illustration for painting in oils, later coming back to his first style. In 1920 he acquired a large interest in *Life,* for which he had made some of his earlier drawings.

GIBSON, JOHN (1790–1866). Sculptor born in Wales, encouraged by the great Canova, but began work without definite technical training. Yet his first figure, *Sleeping Shepherd,* in its way is a masterpiece. Some of his great works are *Hunter and Dog, Theseus Cana, Lucia, Lucrezia Borgia, Francesca da Rimini, Queen Victoria,* and *George Stephenson.* He was the first Englishman to tint sculptures, his *Venus* and *Cupid Tormenting the Soul* being examples of this type. Harriet Hosmer, the American sculptor, was the only pupil he ever trained.

GIFFORD, SANFORD ROBINSON (1823–1880). An American artist; born in Greenfield, N. Y.; traveled and studied abroad. His works include *San Giorgio, Venice, Ruins of the Parthenon, Tivoli, The Golden Horn, Morning on the Adirondacks, Sunset on the Hudson,* and *Mount Rainier.*

GIGLI, BENIAMINO (1890–). Tenor, born in Italy and studied in Rome under Enrico Rosati. Made his appearance on the stage at Rovigo, Italy, 1915, and afterwards sang in Europe, South and Central America, and came to the Metropolitan, New York, in 1920. Some of his parts are in *Cavalleria Rusticana, Lucia, Lucrezia Borgia, Francesca da Rimini, Lohengrin, Madame Butterfly, Pagliacci* and others.

GILBERT, CASS (1859–1934). Among the many notable public structures designed by this American architect are the Minnesota State Capitol; Custom House and Union Club, New York; Central Public Library, St. Louis; Ives Library of New Haven, Conn.; Universities of Minnesota and Texas. In 1926 he was appointed to design the proposed bridge over the Hudson at New York, being that year elected president of the National Academy of Design. He was also the architect of the Woolworth Building, 760 feet high, New York. Gilbert was born in Zanesville, Ohio, trained at the Massachusetts Institute of Technology, and began practice at St. Paul, Minn.

GILLETTE (*ji-let'*), **WILLIAM HOOKER** (1855–1937). An American actor and playwright; born at Hartford, Conn.; played *The Private Secretary, The Professor, Esmeralda, A Legal Wreck, Held by the Enemy, Too Much Johnson, Mr. Wilkinson's Widows, All the Comforts of Home, Because She Loved Him So, Clarice Morland, Secret Service,* and *Sherlock Holmes,* all his own plays in which he took the leading part. Gillette was best in comedies featuring a calm, resourceful man of affairs.

GIORDANO (*jōr-dä'no*), **LUCA** (1632–1705). Italian painter, born in Naples, spent much time copying the old masters, making 20 versions of the great Battle of Constantine by Romano and nearly as many of some pictures of Raphael and Michelangelo. For eight years he lived by invitation at the court of Charles II. of Spain. In fresco he was a leader of his age, perhaps his best known design being that of the ceiling of the Medici Palace. As a painter on glass and the borders of cabinets, he achieved great fame. Other well known works are the early *Slaughter of the Priests of Baal, Moses and the Brazen Serpent,* a fresco, *Triumphs of the Church,* a fresco at Madrid, and *Celebrated Women of the Scriptures,* all of them being large and impressive designs.

GIORGIONE (*jor-jō'ne*) (c. 1478–1510). A Venetian painter born at Castelfranco. He was one of the seven supreme colorists of Renaissance; studied with Giovanni Bellini. His authentic works are *The Madonna with Saints Francis and Liberale* at Castelfranco, *The Sleeping Venus* at Dresden, *Fête Champêtre* in the Louvre, *The Family of Giorgione, The Three Philosophers* and *The Concert.*

GIOTTO (*jot'tō*), **DI BONDONE** (1266–1337). A great Italian painter; born at a village near Florence; was a shepherd's boy. While tending his flock and drawing pictures of his sheep, it is said he was discovered by Cimabue, who took him home and made a pupil of him. That he was a pupil of Cimabue is now discredited. Ruskin says of him: "His special character among the great painters of Italy was that he was a practical person; what others dreamed of he did; he could work in mosaic, he could work in marble, and paint; could build . . . built the Campanile of the Duomo, because he was then the best master of sculpture, painting, and architecture in Florence, and supposed in such business to be without a superior in the world."

GIULIO ROMANO (*jö'lē-ō rō-mä'nō*) (1499–1546). He was also called Giulio Pippi, his name in full being Giulio di Pietro di Filippo de' Giannuzzi. Raphael made him a chief pupil, gave him work to finish from the master's designs and left to him and Penni his painting implements and art works. Giulio finished the frescoing of the *Hall of Constantine* in the Vatican, containing four major pictures. About 1525 he went to Mantua and there executed many commis-

sions for the duke in painting, architecture, and sanitation. He was called "the prince of decorators." Of his works in oil, the *Martyrdom of Stephen, Holy Family*, and *St. Margaret* have been highly praised. His self-portrait is in the Uffizi, Florence.

GLUCK (*glŏŏk*), **ALMA** (1884–1938). An opera singer, who was brought to America when six from Roumania, her birthplace; maiden name was Reba Fiersohn; married Efrem Zimbalist, the violinist (q. v.). Studied at the Normal College, N. Y., and Union College, Schenectady. Début in 1909 in Werther, and sang 11 rôles in the first season, and has often sung since at the Metropolitan Opera House, and on the concert stage.

GLUCK (*glŏk*), **CHRISTOPH WILLIBALD** (1714–1787). A German composer. He conjoined with himself in his labors the poet Ranieri di Calzabigi, and his opera, *Orpheus and Eurydice*, was received with tumults of applause. In 1774 he went to Paris and presented there successively several masterpieces, including *Alcestis, Paris and Helen, Iphigenia in Aulis, Armida, Bauci e Filemone*, and *Echo and Narcissus*.

GODARD (*goh dahr*), **BENJAMIN** (1849–1895). French composer educated at Paris and in Germany. Early works for the violin won a prize from the Institut de France. Later he turned to operas, among which were *Jeanne d'Arc, La Vivandière, Les Guelphes*, and other compositions like the *Symphonie-ballet* and the lyrical *et Actéon*.

GODOWSKY (*gō-dŏv'skĕ*), **LEOPOLD** (1870–1938). Composer and pianist, born in Russia, studied in Berlin and in Paris. Appeared first in America in 1884; directed piano department, Chicago Conservatory of Music, 1895–1900. Composed 53 studies based on Chopin, 12 compositions for the violin, 30 for the piano, and many others.

GOLDMARK, KARL (1830–1915). An Austrian composer; born at Keszthely, Hungary. Among his works are *The Queen of Sheba*; his symphony, *The Country Wedding; The Cricket on the Hearth*; and *Merlin*.

GOODHUE, BERTRAM GROSVENOR (1869–1924). Having studied architecture in New York, Goodhue established an office in Boston, becoming a partner of R. A. Cram (q. v.). From 1903 to 1914, when he began to practice alone, he was in charge of the New York office of Cram and Goodhue. Some of the important structures designed by him are St. Thomas Church, New York, the Cathedral of Maryland at Baltimore, National Academy of Sciences and National Research Council, Washington, D. C., the Exposition Buildings of San Diego (1915), and the Capitol at Lincoln, Nebr. Though he specialized in Gothic churches of modern design he also favored large office buildings.

GOOSENS, EUGENE (1893–). Conductor and composer of English birth, who led the London Symphony Orchestra, the Russian Ballet, the Carl Rosa companies, and the Orchestra at Rochester, N. Y. He was born in Bordeaux, was educated at Bruges, Liverpool, and the London College of Music. Some typical works are *Five Impressions of a Holiday* for piano, flute, and violin, chamber music for flute, violin, and harp, and several folk-songs.

GOTTSCHALK (*got'shălk*), **LOUIS MOREAU** (1829–1869). An American pianist and composer; born at New Orleans, La.; studied at Paris under Hallé, Stamaty, and Maleden; played with phenomenal success all over the United States after 1853. Among his 100 compositions are *Bananier, Cradle Song, Last Hope*, and a *Tarantella* for piano and orchestra.

GOUJON (*gōō-zhŏn'*), **JEAN** (c. 1520–1566). A French sculptor and architect; born in Paris. He was the author of what is considered the masterpiece of French sculpture, the *Huntress Diana*, now in the Louvre collection, and the *Fontaine des Innocents*. He executed some commissions for Henry II., helped ornament the Louvre of Paris, and assisted in many buildings not now extant.

GOUNOD (*gōō-nō'*), **CHARLES FRANCOIS** (1818–1893). A French composer; born in Paris. In 1859 he produced *Faust*, his chief work, which attained European popularity, and raised its composer to the foremost rank of contemporary musicians. From 1870 to 1875 he resided in England. His other works include *Sapho, Messe solennelle, Philemon and Baucis, Mireille, Romeo and Juliet, Cinq Mars, Polyeucte, La rédemption*, and *Mors et vita*.

GOYA Y LUCIENTES (*gō'yä ē lō-thē-en'tes*), **FRANCISCO** (1746–1828). A Spanish painter; born near Saragossa; friend of Louis David at Rome; painted the portrait of the Duke of Wellington. His etchings and aquatints are much finer than his sacred subjects. His three best styles are adequately shown by *The Picnic, The Bewitched*, and *A Portrait* in the National Gallery at London.

GOYEN (*goi'en*), **JAN JOSEPHSZOON VAN** (1596–1656). Dutch painter who broke away from tradition, influenced the art of his age, and left many pictures of sea, ice, and shore effects. His earliest works were characterized by minute details, but after 1625 he selected only the most striking features. Some of his work remains in the Louvre, Berlin, Vienna, and Munich, the National Gallery of London, and the city of The Hague, the last a large canvas. More than 1,000 pictures of his have been listed.

GOZZOLI (*got'sō-lē*), **BENOZZO (BENOZZO SANDRO)** (1420–1498). An Italian painter; born at Florence; pupil of Fra Angelico; assisted Ghiberti in bronze work; painted the immense frescoes in the Church of Saint Agostino at San Gemignano, and the vast series of frescoes in the Campo Santo at Pisa.

GRAINGER, PERCY ALDRIDGE (1882–). Pianist and composer, who was born in Australia, where he studied under Pabst at Melbourne. Later he went to Frankfort, Germany, lived in England, made many concert tours, from 1900 to 1914, and then settled in the United States. He played in many lands, made several hundred records for the phonograph, and composed 50 works for various instruments. Some important pieces are *Molly on the Shore* for orchestra, *Irish Tune from County Derry, The Sussex Mummers' Christmas Carol, Marching Song of Democracy, Green Bushes* (for 21 instruments), and *Scotch Strathspey and Reel* (4 male voices and 15 instruments).

GRAU (*grou*), **MAURICE** (1849–1907). A German-American opera manager; born at Brünn in Moravia; brought to the United States in 1854; brought Aimée to America in 1872; formed the Clara Louise Kellogg Opera Company (1873); managed the tours of Salvini, Rubinstein, Patti, Bernhardt, Irving, Jane Hading, Mounet-Sully, and Mme. Réjane; manager of the Metropolitan Opera House at New York (1897–1903).

GRAUN (*groun*), **KARL HEINRICH** (1701–1759). A German composer, who studied under Schmidt, became interested in Italian operas, and was engaged by Frederick the Great for his private chapel and later to go to Italy to secure singers for an opera (1740). As conductor of the royal orchestra he wrote 28 operas, of which *Merope* (1756) was long famous. His oratorio *Der Tod Jesu* (1755) is now considered his greatest composition, and it was sung yearly during Holy Week down to the present century.

GREENAUGH (*grēn'ō*), **HORATIO** (1805–1852). An American sculptor; born in Boston, Mass.; studied four years at Harvard; from 1825 spent the greater part of his life in Italy. His *Venus Victrix* is in the Boston Athenæum, and his colossal statue of Washington, his principal work, in front of the National Capitol.

GREET, BEN (–1936). English actor especially in the revival of Shakespeare's plays according to the old manner of production. He appeared at Southampton in 1879, turned to the acting of pastoral drama in 1886, began to produce *Everyman* in 1902, played this and Shakespeare in America till 1914, and then led in a movement to produce various Shakespeare plays for London children in all schools. Some of his own parts were Benedick, Hamlet, Touchstone, Malvolio, and Dogberry in Shakespeare; Sir Peter Teazel in Sheridan's *School for Scandal*, Tony Lumpkin in Goldsmith's *She Stoops to Conquer*, the Cardinal in Marshall's *A Royal Family*, and scores of others.

GREUZE (*grèz*), **JEAN BAPTISTE** (1725–1805). A French painter; born at Tournus, near Mâcon; elected to the Academy (1769). His portraits and heads are the more esteemed of his works. The Wallace collection at London has the greatest number of his works; several are in the Louvre; and some in the Metropolitan Museum at New York. Hoping to be admitted an Academician on the strength of historical paintings, as well as on genre, he exhibited his *Sévere et Caracalla* (now in the Louvre) in 1769, but his colleagues more highly praised his genre pictures. He became incensed, refused to exhibit till a year before his death, and died in great poverty.

GRIEG (*grēg*), **EDVARD HAGERUP** (1843–1907). A Norwegian composer and pianist; born at Bergen, of

Scottish ancestors. His works include orchestra suites, cantatas, quartets, trios, sonatas for violin and for violoncello, songs and compositions for the piano. At first a romantic, Grieg turned about 1863 to highly nationalistic style and themes for his music. On these his fame now essentially rests. Some of his chief pieces are the notes for Ibsen's *Peer Gynt* and the songs *Ich liebe dich*, *Solvejg's Lied* and *Ein Schwann*.

GROVE, GEORGE (1820–1900). English writer on music, after acting as an engineer for several years, took up the work of promoting musical concerts at Sydenham, and inspired many young composers and artists of Great Britain. While editing *Macmillan's Magazine* (1868–1883), he initiated the *Dictionary of Music and Musicians*, finished in 1889. Others edited his monumental work after his death for subsequent printings, the third edition appearing in 1927. In 1882 he was knighted and appointed first director of the Royal College of Music.

GUIDO RENI (*rā'ne*) (1575–1642). An Italian painter of the school of Bologna; best known by his masterpiece *Aurora and the Hours* at Rome, painted on a ceiling; his unfinished *Nativity* at Naples; the *Crucifixion of St. Peter* in the Vatican; the *Madonna della Pietà*, the *Crucifixion*, and the *Massacre of the Innocents* at Bologna; and *St. Paul the Hermit* and *St. Anthony in the Wilderness*, in Berlin. Two hundred of his works adorn the art galleries of Europe. One of his chief traits is a lightness of color in his pictures.

GUTHRIE (*guth'ri*), **JAMES** (1859–1930). Scotch painter, born in Greenock, who is well known for his scenes like *The Gypsy Fires are Burning* (1882), *Funeral Service in the Highlands*, and *Schoolmates*. Later he painted many portraits of celebrities. He was knighted in 1903.

HABERMANN, HUGO (1849–1929). German painter, influenced at first by his master, Piloty, under whom he studied at the Munich Academy, where he also became a professor in 1905. In both the use of color and in craftsmanship he attained great favor, especially for his *Monk* (1875), in a realistic manner, his *Child of Sorrow*, and various portraits.

HACKETT (*hăk'et*), **JAMES HENRY** (1800–1871). An American actor; born in New York City. He was particularly successful in impersonating Yankees and Westerners, but was best known by his Falstaff, which he played first about 1832. He wrote *Notes and Comments on Shakespeare*.

HACKETT, JAMES KETELAS (1869–1926). An American actor, son of the foregoing, in 1892 became leading man at New York Lyceum (youngest to that time in American stage history). First star to appear in *The Prisoner of Zenda* for Famous Players (1912). With Mr. and Mrs. H. G. Fiske, Henrietta Crosman, and others organized the independent theatrical agency in opposition to older agencies. He produced *Macbeth* in New York (1916), and later went to England (1920) taking entire production, and later appeared in Paris with English and French actors in a notable series of performances. In 1918 he played in a cast for *Out There*, which netted $700,000 for the Red Cross. Again, in 1922, he played in France and at Stratford-on-Avon, England, in connection with the Shakespeare tercentenary.

HADING (*ä-dan'*), **JANE** (1859–). Her real name was Jeanne Alfrédine Tréfouret. For a number of years she sang in Algiers, Cairo, and finally in Paris, at first in *La Chaste Suzanne*, and in 1883 at the Gymnase in *Le Maître de forges*, which was highly successful. In 1888 and 1894 she toured America with Coquelin (q. v.), and later acted in plays by Capus, Donnay, Dumas fils, and Bergerat.

HADLEY (*had'li*), **HENRY KIMBALL** (1871–1937). Beginning in 1904, as choirmaster at Mainz, this American composer, who was born at Somerville, Mass., later toured Europe (1908), presenting his own tone poem founded on Wilde's *Salome*. He next conducted the Seattle and San Francisco Symphony Orchestras in turn (1909–15); in 1921 became associate conductor of the Philharmonic Orchestra of New York; in 1923 his own *Resurgam* in London; and in 1927 on invitation conducted his own works in Buenos Aires. Other works of his are *Safie*, his first opera (1909), *Bianca*, *Cleopatra*, and *The Ocean*, which he produced in 1923 at Stockholm and elsewhere.

HADOW, WILLIAM HENRY (1859–). An Oxford man and teacher, he became principal of Armstrong College, Newcastle (1909–19), and then vice chancellor of Sheffield University. In 1918 he was knighted. Having studied music for many years, he wrote volumes of appreciation of Schumann, Wagner, Chopin, Brahms and others, which were highly praised and very popular. Other criticisms are *Sonata Form*, *A Croatian Composer*, four *Albums of Songs*, and *Church Music*. As a composer he prepared incidental music for Robert Bridges' *Demeter* and wrote some songs. Hadow combined both a technical knowledge of music with a layman's enthusiasm and appreciation of the best the art affords.

HALE, GARDNER (1894–). An American fresco painter, who was one of the leaders in the revival of the older methods of the art. He was born in Chicago, where he began to study, and later went to Italy, Paris, and New York for further work. Some of his frescoes are those of the Illinois Merchants Trust Building, Chicago; residences of Mrs. Walter Lewisohn in Paris; Edward Shearer at Palm Beach, Fla.; J. Walter Spalding, Florence, Italy; Bishop Herbert Shipman, New York.

HALLE (*häl lā'*), **CHARLES** (1819–1895). Having been forced out of Paris in 1848 by the revolution, he settled in London; since he emigrated from his native land, Germany, in 1836 he had been influenced by the greatest French musicians. For years his vogue in England remained unabated, and the concerts he founded at Manchester (1857) continue to this day. In London his home was the center of musical interest, and he frequently performed in public. In 1888 he was knighted and married the talented violinist, Norman Neruda (1839–1911), with whom in 1890 and 1891 he toured Australia and other countries. Lady Hallé ranked with the best masculine performers of her age.

HALS (*häls*), **FRANZ, THE ELDER** (1584–1666). A Dutch portrait and genre painter; born in Mechlin. He is usually regarded as the founder of the Dutch school of genre painting and the greatest portrait painter of Holland excepting Rembrandt. He died in Haarlem, Netherlands. His brother, **DIRK HALS** (1589–1656), a pupil of Abraham Bloemaert, was also an excellent genre painter. Several of Franz's sons were artists, the most celebrated being **FRANZ HALS, THE YOUNGER,** who flourished from about 1637 to 1669.

HAMILTON, JOHN McLURE (1853–1936). An American portrait painter, but lived in London after 1878; born in Philadelphia, educated there, with Van Lerius at Antwerp, and Gérôme at Paris. He devoted himself mainly to pastels and portraits, some of the principal ones being Gladstone, Cardinal Manning, George Meredith, in the Philadelphia Academy; Prof. Tyndall and others at London; Prof. Lewis Campbell at the University of St. Andrews; and portraits of General Booth, Dr. A. Geikie, Col. Edward M. House, and Joseph Pennell.

HAMMERSTEIN, OSCAR (1847–1919). Beginning in New York at 16, on his arrival from Germany, Hammerstein became an inventor and maker of plays, turning to theatrical ventures in 1870. He built the Harlem Opera House (1888), and in 1905 established the Manhattan Opera, where he introduced the best French talent, and gathered a large following. He built opera houses in Philadelphia (1908), in London (1911), but this failed to succeed, and in New York (1914) opened the Lexington Theatre.

HANDEL (*hän'del*), **GEORGE FREDERICK** (1685–1759). A German composer; born at Halle-an-der-Saale, in Lower Saxony; settled in England in 1712. *The Messiah*, the greatest of oratorios, was produced in 1741. His other important oratorios are *Esther*, *Saul*, *Israel in Egypt*, *Samson*, *Judas Maccabaeus*, and 17 others. He wrote more than 40 operas, the cantatas *Acis and Galatea* and *Alexander's Feast*, and much church and chamber music, also many odes and songs. Handel was stricken with blindness (1752), but continued to conduct his oratorios until his death.

HARDING (*här'ding*), **CHESTER** (1792–1866). An American portrait painter; born in Conway, Mass.; settled in Boston (1823); went to London (1832) and painted portraits of many noblemen. Among his portraits of Americans are those of Webster, Washington Allston, John Randolph, Clay, Calhoun, Chief Justice Marshall, Presidents Madison, Monroe, and John Quincy Adams, and General Sherman. Harding was a drummer in the New York State militia in 1813, afterwards acted as chairmaker, peddler, and house-painter, and as an artist was self-taught. A man without education or early advantages, he moved at ease among royalty at the height of his career.

HARPIGNIES (*är-pēn-yē'*), **HENRI JOSEPH** (1819–1906). A French landscape painter; born at Valenciennes; visited Italy with Corot (1860). Among

his works are *Lisière de bois de l'allier*, *Le saut de loup* (his masterpiece in the Louvre), *Evening*, *Rising of the Moon*, and a water color, *Garden of the Villa Medici*.

HARTLEY (*hart'li*), **JONATHAN SCOTT** (1845–1912). An American sculptor; born at Albany, N. Y.; studied with E. D. Palmer; three years at the Royal Academy at London and one year at Berlin; professor of anatomy for the Art Students' League at New York (1878–1884); member of the National Academy of Design (1891); married the daughter of George Inness, the painter. Among his works are *The Whirlwind*, *Miles Morgan*, *Ericsson*, *Alfred the Great*, *Thomas K. Beecher* at Elmira, N. Y., and *Young Hopi Stick Thrower*, and many portrait busts.

HASSAM (*has'am*), **CHILDE** (1859–1935). An American etcher and painter, born in Boston and educated at the Museum of Fine Arts in that city. In the manner of the European impressionist school, he painted a series of brilliant pictures, notable for rich and fine coloring and good form. He won numerous medals, including a gold award at the Sesquicentennial at Philadelphia in 1926, and other medals at the Pennsylvania Academy of Fine Arts, and Pan-American and Paris Expositions, and the World's Fair, Chicago.

HAYDN (*hā'dn*), **JOSEPH** (1732–1809). A German musical composer. His masterpiece, the oratorio of *The Creation*, was produced in 1798; composed 125 symphonies, including *Farewell* and *Joy*; the "Emperor's Hymn," *Gott erhalte Franz den Kaiser*; the *Seasons*, an oratorio; and 83 string quartets. Haydn is regarded as the creator of the symphony. With the exception of his *Creation*, *a Stabat Mater*, and some of the songs in which he used folk material, the work of Haydn is now known only to professional musicians and students.

HAYDON (*hā'don*), **BENJAMIN ROBERT** (1786–1846). An English painter of historical scenes, who was born in Plymouth and educated at the National Academy. Some of his best paintings are *Dentatus* (1809), *The Judgment of Solomon* (1814), *Punch*, *Christ's Entry into Jerusalem*, which formed the basis of a collection made by his cousin, John Haviland, of Philadelphia. Twice he was imprisoned for debt, and his *Mock Election* (founded on a happening of the prison) was purchased by George IV. Lack of appreciation by the critics, however, made him melancholy, and he ended his own life by shooting, before he had fully completed his *Alfred and the Trial by Jury*.

HEALEY, GEORGE PETER ALEXANDER (1808–1894). An American portrait painter; born in Boston, Mass.; studied in Paris; painted *Webster's Reply to Hayne*, containing 130 portraits, now in Faneuil Hall, Boston; *Franklin Presenting Claims of the American Colonists to Louis XVI.*; and portraits of several of the presidents, now in the Corcoran Art Gallery in Washington.

HEIFETZ (*hī'fets*), **JASCHA** (1901–). Violinist of Russian birth, noted for precocity and finish of this art; he was graduated from the Royal School at Vilna at 8, and at once became the pupil of Leopold Auer at Leningrad. At 9 he appeared in his first public recital, later touring the leading cities of the world, and arriving in America from the Orient in 1917. In 1925 he gave money for building a concert hall at Jerusalem.

HELLER, STEPHEN (1814–1888). A distinguished pianist and composer; born at Budapest. In 1838 he settled in Paris and gave himself to teaching and composition. He ranks beside Chopin as a master of technique. His *Etudes*, *Preludes*, *morceaux* under quaint titles, and *Pensées fugitives* are his best familiar works. Though he outlived his early fame, he was for years a brilliant member of the group that included Berlioz, Chopin, Liszt, and Hallé, who greatly admired his compositions.

HELST (*vän dêr helst*), **BARTHOLOMAEUS VAN DER** (1613–1670). Celebrated Dutch portrait painter, whose *Banquet of the Civic Guard* was pronounced by Sir Joshua Reynolds "the first picture of portraits in the world." Of his 100 paintings of persons the *Dutch Burgomaster*, now in the New York Metropolitan Museum, the *Peace of Munster*, in Amsterdam, a work almost equal to Rembrandt in coloring, and the *Four Syndics* shown in the gallery and also in the town hall are among his best.

HEMPEL, FRIEDA (1885–). Operatic coloratura soprano of the Royal Opera, Berlin (1907–12), and of the Metropolitan Opera, after 1912. Married William B. Kahn, New York, 1918. After a course of training under Mme. Nicklass Kemper of Berlin, she sang at Bayreuth in 1907, made her first appearance the same year in London, and her formal début at the Royal Opera, Berlin, where she had appeared first two years earlier in *Merry Wives of Windsor*. Later she sang in important centers of Europe and before royalty. Some of her many rôles were Violetta in *Traviata*, Gilda in *Rigoletto*, Rosina in *The Barber of Seville*, Marie in *The Daughter of the Regiment*, and Marguerite in *Faust*.

HENNER, JEAN JACQUES (1832–1905). A French painter; born in Bernwiller, in Alsace; pupil of Drölling and Picot; one of the most poetic and realistic of the French school. Among his works are *St. John the Baptist*, *The Evening*, *The Dead Christ*, *The Chaste Susanna*, *An Idyl*, *The Good Samaritan*, *Naiad*, *Magdalene*, and *St. Sebastian*.

HENRI (*hen'rī*), **ROBERT** (1865–1929). American artist, teacher, and author, educated at the Philadelphia Academy of Fine Arts and in France, Spain, and Italy; from 1915 to 1923 taught in the Art Students' League of New York City, having earlier been an instructor in Philadelphia. His *La Neige* was purchased by the government for the Luxembourg of Paris (1899). His work is found in many galleries, such as the Metropolitan, Carnegie Institute, Pittsburgh, and Corcoran of Washington, D. C. All his work is characterized by energetic treatment and independence of set standards of portraiture.

HENRY, EDWARD LAMPSON (1841–1919). An American painter; born in Charleston, S. C.; studied at Philadelphia and in Paris; member of the National Academy (1869). Among his works are *Initial Excursion of the First Railway Ever Constructed in New York*, containing about 50 figures, in the Corcoran Art Gallery; *Old Cock on the Stairs*, and *A Morning Call in 1800*.

HENSCHEL (*hen'shel*) **ISIDOR GEORG** (1850–1934). A German baritone singer, composer, and conductor; born at Breslau; achieved great successes at Brussels, Cologne, and London; conducted the Boston Symphony Orchestra for its first three seasons (1881–1884); succeeded Jenny Lind as professor of singing at the Royal College of Music (1886–1888). He composed songs, vocal studies, a *Requiem Mass*, *Stabat Mater*, *Te Deum*, an opera, *Nubia*, and an operetta, *A Sea Change* or *Love's Stowaway*, to words by W. D. Howells.

HENSELT, ADOLF VON (1814–1889). Bavarian pianist, who made his début in 1836, and two years later went to Russia, where he became court pianist. Among other tours he visited England in 1852 and 1867. His playing was remarkable for sonority and effect of great volumes, and he devised a method of stretching the hands by exercise. He edited the piano compositions of Weber.

HERBERT, VICTOR (1859–1924). An American violoncellist, conductor, and composer; born in Dublin. His mother was a daughter of Samuel Lover, the novelist; studied in Germany; came to the United States in 1886; violoncellist in the Metropolitan Opera House and appeared as soloist under Anton Seidl and Theodore Thomas; bandmaster of the 22d Regiment Band (1894); conductor of the Pittsburgh Orchestra (1898–1904); formed his own orchestra in New York (1904); composed *The Captive* for the Worcester, Mass., Festival in 1891; the comic operas, *Prince Ananias*, *The Wizard of the Nile*, *The Serenade*, *The Idol's Eye*, *Happy Land*, *It Happened in Nordland*, and *Babes in Toyland*, besides several suites. Besides *Natoma*, a grand opera, he composed the music for the photodrama, *The Birth of a Nation*.

HERNE, JAMES A. (1840–1901). An American actor and dramatist; born at Troy, N. Y. In the latter part of his life he appeared only in his own plays, such as *Hearts of Oak*, *Margaret Fleming*, *Shore Acres*, *Rev. Griffith Davenport*, and *Sag Harbor*. His Uncle Nat Berry in *Shore Acres* was a notable creation in American comedy.

HERRERA (*er-rā'rä*), **FRANCISCO DE** (1576–1656). A distinguished Spanish painter; founder of the Seville or new Spanish school; born at Seville. His finest paintings include the famous *St. Hermenegild in Glory* in the Seville Museum and *The Last Judgment* and a *Saint Peter*, both in churches at Seville. Others are in the Louvre, Paris. They exhibit boldness of execution with faultless technique.

HILLER, FERDINAND (1811–1885). A German composer, conductor, and pianist; born at Frankfort-

on-the-Main; studied and toured with Hummel; went to Paris (1829); popularized the works of Bach and Beethoven; musical director at Düsseldorf (1847–1850); founded the Conservatorium at Cologne (1850); composed chamber music; *The Destruction of Jerusalem*, which is the finer of his two oratorios, and six operas.

HOBBEMA (*hob'e-mä*), **MEINDERT** (1638–1709). A famous Dutch landscape painter; born at Amsterdam. His fine, subdued pictures of woodland life and scenery are ranked among the masterpieces of Dutch landscape painting, along with those of Cuyp and Ruysdael. Among his best works are *The Avenue of Middelharnis*, *Showery Weather*, *Watermills and Bleacheries*, *Ruins of Brederode Castle*, and *The Mill*.

HOFFMAN, MALVINA (1887–). American sculptor, educated in New York under Herbert Adams and Gutzon Borglum and in Paris under Rodin. Her *Russian Dancers* won first prize (1911) at the Paris salon. Other works now on exhibit are *John Muir* in the American Museum of Natural History, New York; *Modern Crusader* in Metropolitan; *Sacrifice*, a memorial group for Harvard University, but deposited temporarily in the Cathedral of St. John, New York; *Paderewski the Artist*, Rome; *Paderewski the Statesman*, and *Bill*, now in the Luxembourg.

HOFMANN, JOSEF (1876–). A pianist born at Cracow, Poland; studied under his father, who was a composer and kapellmeister; at age of 7 attracted notice of Rubinstein. When he was 11 he made a tour of the United States, until stopped by authorities representing the Society for Prevention of Cruelty to Children. On his return to Europe, he studied under Urban and Rubinstein. In 1924 he became head of piano at the Curtis Institute of Music of Philadelphia, and director in 1927. Now an American citizen. Besides composing a symphony, orchestra suite, sonatas for piano, and other music, he wrote works on *Piano Playing* and *Piano Questions*.

HOGARTH (*hō'gärth*), **WILLIAM** (1697–1764). English satirist and humorist painter, whose work is noted for perfection of technique, ease of execution, and harmonious coloring. He leads the school of realistic painters who criticise human life in their art, without undue cynicism or bitterness. The son of a London schoolmaster and hack author, Hogarth early began to draw, and when he was about 20 made some engravings for sale. In 1724 his *Masquerades and Operas* (the first plate published under his name), satirized the fashion of following the unusual in opera. His series of pictures entitled *The Harlot's Progress*, completed in 1731 and engraved by him, shows his moral satire at its best. Some of his later works are *Sleeping Congregation* (1736), *Scholars at a Lecture* (1737), *Strolling Actresses, Dressing in a Barn* (1738), *Stage Coach* (1747), *Four Stages of Cruelty* (1751), and some historical works like *Paul before Felix*, *Moses Brought to Pharaoh's Daughter*, and a fine picture of himself and his dog. As an engraver of his own works he is almost unrivaled.

HOLBEIN (*hōl'bīne*), **HANS** (*c.* 1460–1524). Celebrated member of a great family of painters, including also his sons, Ambrose and Hans the Younger (q. v.). Of his many works in churches and museums, some of the best are three pictures commemorating the birth and early life of Christ, now at the Augsburg Cathedral; a Passion series now at Donaueschingen; a *Martyrdom of St. Sebastian* at Munich; a picture of himself at Chantilly; *The Well of Life* now at Lisbon, and a Passion in 11 parts now at Augsburg. For gradation of color, delicacy in the shadowing, and reality in portraiture he was one of the great artists of his age.

HOLBEIN (*hōl'bīne*), **HANS** (1497–1543). A German painter; son of Hans Holbein the Elder; born at Augsburg; attracted the attention of Erasmus, who took a great interest in him, and persuaded him to go to England, and introduced him to Sir Thomas More, who in turn introduced him to Henry VIII. Here under Henry's patronage he remained, executing numerous portraits of his courtiers, till his death of the plague. His *Last Supper* and *Dance of Death* are well known. His *Virgin and Child with the Family of the Burgomaster Meyer* is at Darmstadt; his *Portrait of Erasmus* is in the Louvre; and his masterpiece in portraiture, *The Ambassadors*, is in the National Gallery in London.

HOLL, FRANK (1845–1898). An English artist of subject paintings and portraits, member of a family of artists, was born in London and trained mainly at the Royal Academy, where he exhibited *A Portrait* and *Turned out of Church* in 1864. Some of h other works are *A Fern Gatherer*, *The Ordeal*, *Co valescent*, *The Gifts of the Fairies*, a notable portra of Samuel Cousins, now in the National Gallery, ar others of Millais, Lord Roberts, John Bright, Gla stone, and many more.

HOLLAND, EDMUND MILTON (1849–1913). A American actor; born in New York City; played i Wallack's company (1867–1879), Pittacus Green i *Hazel Kirke*, Old Rogers in *Esmeralda*, Capt, Redwoo in *Jim, the Penman*, Jenkins Hanby in *A Social Hig wayman*, Leopold Kolditz in *Hearts are Trumps*, an Eben Holden.

HOLMES, AUGUSTA MARY ANNE (1849–1903) An Irish-French composer who lived mainly in Pari Besides 100 songs, some of great delicacy and beauty she wrote numerous operas, cantatas, and symphoni poems,—including *La Montagne Noire*, *Astarte*, *L Vision de la Reine*, *Ode Triomphale*, *Roland*, *Le Argonautes*.

HOMER, LOUISE (1871–). American con tralto singer, the daughter of a clergyman, W. T Beatty of Pittsburgh; married Sidney Homer, the com poser (q. v.), 1895. Having studied in Pittsburgh New York, and for two years in Paris, she made he first appearance in Paris in 1898, the next year a London, and then at Brussels. Her New York débu was in 1900, since when she has appeared in mos years at the Metropolitan Opera, and also with the Chicago, Los Angeles, and San Francisco Opera Com panies. Important rôles were Amneris in *Aïda*; Azucena in *Il Trovatore*; Ottrud in *Lohengrin*; and Dalila in *Samson and Dalila*. Her daughter, Louise Homer (Mrs. Ernest V. Stires), is an accomplished soprano singer.

HOMER, SIDNEY (1864–). Composer of songs and teacher of harmony and counterpoint, born in Boston, educated at Phillips Academy at Andover, Mass., and studied music in Germany and Austria. He taught music in Boston for eight years and then located in New York. Some of his compositions are *Sweet and Low* and *Thy Voice is Heard* from Tennyson's *Princess*; *A Woman's Last Word* from Browning; *Requiem* and two other songs from Stevenson; *Bandanna Songs*; *General William Booth Enters into Heaven* from Vachel Lindsay; 17 songs from Christina Rossetti's *Sing Song*, and other music.

HOMER, WINSLOW (1836–1910). As a painter of scenes in the South, the fishermen of the north Atlantic, and views along the shore of New England, Homer was influenced only slightly by the traditions of old masters. Yet much of his work has a striking beauty, a ruggedness of plan, and no little originality. After studying in Boston and New York, he sent a series of drawings to *Harper's Weekly* during the Civil War, and these established his fame. *Prisoners from the Front* is perhaps his best war picture; *Cotton Pickers* and *Visit of the Old Mistress* are characteristic Southern subjects; and *The Life Line*, *Coming of the Gale*, *Wrecking of a Vessel*, and *Lost on the Grand Banks* are among his best seascapes. Some of his water-colors painted at Gloucester, Mass., are admirable.

HOPPNER (*hop'nĕr*), **JOHN** (1758–1810). Having received the favor of George III., this English artist turned from landscapes, which he preferred, to the painting of portraits, and counted among his sitters some great men and women of his period. Besides various members of the Royal family, some of his subjects were Lord Nelson, Lord Rodney, Wellington, Sir George Beaumont, and Sir Walter Scott.

HOSMER (*hoz'mĕr*), **HARRIET GOODHUE** (1830–1908). Sculptor, born in Boston, and showed early love for modeling and the study of anatomy which she furthered under the direction of her father, a physician, and in the St. Louis Medical College. From 1853 to 1860 she studied under the English artist, John Gibson, she being the only pupil he ever trained. Most of her life she lived in Rome where she knew Hawthorne, Thackeray, George Eliot, and Mr. and Mrs. Robert Browning. In portraiture in marble she excelled. Among her characteristic works may be named *Daphne*, *Medusa*, *Oenone*, *Beatrice Cenci*, now in St. Louis, and *Zenobia, Queen of Palmyra, in Chains*, now in the Metropolitan of New York.

HOUDON (*ö-dôn*), **JEAN ANTOINE** (1741–1828). A French sculptor; born in Versailles. After studying in Italy he returned to Paris and executed the busts of Voltaire, Rousseau, Molière, Franklin, Buffon, Catherine II., and others. He was invited to the United States and carved the statue of Washington now at the

Virginia State Capitol in Richmond, which is considered the most authentic likeness of "the father of his country."

HOVENDEN (*hō'ven-den*), **THOMAS** (1840–1895). Born in Ireland and a pupil of the South Kensington Art School, Hovenden came to America in 1863 and studied at the National Academy of Design, New York. Later he went to Paris, worked under Cabanel, and painted many peasant scenes in Brittany. He was fatally injured while trying to save a child from a railway train at Germantown, Pa. His *Last Moments of John Brown*, now in the Metropolitan of New York, and his sentimental picture *Breaking Home Ties*, long a favorite in engravings, represent his mature art. *A Breton Interior*, *Jerusalem the Golden*, and *Loyalist Peasant Soldier* are among his best pictures.

HUBBELL, HENRY SALEM (1870–). Beginning as an illustrator for the *Woman's Home Companion* and other periodicals, Hubbell turned to painting and exhibited a large picture, *The Bargain*, at Paris in 1901. Some of his subsequent canvases are *Child and Cat* and *Larkspurs*, bought by the French government, *The Poet*, *The Caress*, *By the Fireside*, *The Brasses*, now in Memorial Hall, Philadelphia, and *Black and White*, now in city collection of Grand Rapids, Mich. He also painted numerous portraits.

HUBER, HANS (1852–1921). Swiss composer of individuality and talent. From 1874 to 1918 he taught successively at Wesserling, Thann, and Basle. He wrote notable symphonies, chamber works, piano pieces, operas, and cantatas.

HUMMELL, JOHANN NEPOMUK (1778–1837). Beginning to compose music when he was 11, he completed his studies in Vienna, learned to write songs, and from 1804 to 1811 was kapellmeister to Prince Esterhazy. Then he toured Europe as pianist and conductor, attaining a tremendous vogue. Some of his compositions for the piano were long played, and he explained his method as a teacher in the *Great Pianoforte School*. In his youth Mozart instructed him for two years, and Hummel became the master's most proficient student.

HUMPERDINCK (*hum'pĕr-dinyk*), **ENGELBERT** (1854–1921). German composer, born at Sieburg; studied in Cologne and Munich. He went to Italy in 1879 on a Mendelssohn scholarship, and was invited by Wagner to help produce *Parsifal* at Bayreuth. For years, till 1900 when he removed to Berlin, he lived at Frankfurt, taught composition in the conservatory, and wrote criticism for the *Zeitung* of the town. He specialized in folk-tunes in his later works. Some of his compositions that were famous are *Humoreske* (1880), *Die Wallfahrt nach Kevlaar* (1887), and *Hansel und Gretel*.

HUNT, WILLIAM HOLMAN (1827–1910). An English religious painter; born in London. Among his works are *Hireling Shepherd*, *Awakened Conscience*, *Light of the World*, *The Scapegoat*, *Christ Discovered in the Temple*, and *The Triumph of the Innocents*. Hunt was a potent force in the pre-Raphaelite movement, to which he was drawn by his mystical and symbolical turn of mind.

HUNT, WILLIAM MORRIS (1824-1879). An American painter, who was born in Vermont, studied at Harvard, and then went to France to complete his art education under Couture. Influenced early by J. F. Millet, he introduced the French painters of the group of this artist to America. After 1855 he lived in Boston, but continued to be influenced by his training in France, especially in pictures like *The Belated Kid*, *Girl at the Fountain*, *Hurdy-Gurdy Boy*. Several of his best pictures, and five by Millet owned by Hunt, perished in the Boston fire of 1872. His *Bathers*, *Prodigal Son*, *The Drummer Boy*, *Charles River*, and portraits of W. M. Evarts, Rev. J. F. Clarke, Charles Sumner, and Judge Horace Gray were highly appreciated.

ICTINUS (*ik-ti'nus*) (fifth century B. C.). A famous architect of Greece; employed at Athens during the administration of Pericles. He designed the Parthenon, completed about 438 B. C., and, in collaboration with Carpion, it is said, wrote an architectural treatise thereon. He designed also the Temple of Apollo Epicurius at Bassae, and is mentioned by Vitruvius and Strabo as one of the architects of the Temple of Demeter and Persephone Eleusis.

IDRAC, ANTOINE (1849–1884). A French sculptor; born at Toulouse. Among his important works are *Cupid Stung by a Bee*, bought by the French government, and *Mercury Discovering the Caduceus*, now in the Luxembourg Museum. One of his later works, a *Salambo*, received a first prize at the Munich Exposition, and secured for him the French Legion of Honor.

IFFLAND, AUGUST WILHELM (1759–1814). A noted German actor, dramatist, and director. He studied at Gotha; became director of the Berlin National Theatre in 1796; 15 years later was appointed manager of all the royal theatres. He was a fine comedian. His plays met with great success, notably *Die Jaeger*, *Dienstpflicht*, *Der Spieler*, and *Die Mündel*.

INDY, PAUL VINCENT D' (1851–1931). French composer and leader in music for many years. In 1871 he helped form the Société Nationale de Musique, of which he was secretary, and after 1891 the president. From 1911 he was director of the Sholia Cantorum, a school for training singers; and from 1899 he was inspector of musical instruction in the schools of Paris. His compositions are orchestral, choral, and piano works.

INGHAM (*ing'am*), **CHARLES CROMWELL** (1796–1863). A British-American painter; born in Dublin; came to America in 1817 and became active in helping to promote an interest in art. He was successful as a painter of portraits and miniatures, and numbered many prominent men among his subjects. His best known figure paintings are *Death of Cleopatra*, *Day Dream*, and *White Plume*. Among his portraits are those of De Witt Clinton and Lafayette. He was one of the original members of the National Academy of Design.

INGRES (*ang'r*), **JEAN AUGUSTE DOMINIQUE** (1780–1867). French painter, at first designed by his father for a musical career, became an artist through the influence of Raphael's works. He became a pupil of David in Paris in 1796, won the Prix de Rome five years later, for his *Ambassadors of Agamemnon*, and during the following years he painted a series of portrait scenes and allegories, but gained little fame. The tide turned with his *Entry of Charles V. into Paris* (1824), and he suddenly became immensely popular, his *Grand Odalisque* attracting notice which was denied by all in former years. His studio was filled with pupils and admirers. Some of his chief works of this period were *Martyrdom of St. Symphorien*, and various portraits. Again his fame ebbed and then once more reached a higher flood. Later works were *Apotheosis of Napoleon*, *Joan of Arc*, *Christ and the Doctors*.

INMAN, HENRY (1801–1846). An eminent American artist; born in New York; died while at work on a commission from Congress for the historical embellishment of the Capitol. While in England he painted portraits of Wordsworth, Macaulay, Dr. Thomas Chalmers, and others. His American portraits are in the Boston Athenaeum, New York City Hall, and elsewhere. His other work includes *Rydal Water*, *The Newsboy*, and *Rip Van Winkle Awakening*.

INNESS (*in'es*), **GEORGE** (1825–1894). An American painter; born in Paris, France; resided in Italy from 1871 to 1875. His pictures are noted for the accuracy with which they represent the American climate and the aspects of American scenery. He was elected to the National Academy in 1868. Some of his works are *Delaware Valley*, *American Sunset*, *Pontine Marshes*, *Niagara Falls*, *Sunset—Montclair*, and *Autumn Oaks*.

INNESS, GEORGE, JR. (1854–1926). American painter, son of George Innes (q. v.), under whom he studied in Rome (1870–74), and with Bonnat in Paris. Later occupied a studio with his father in Boston and New York; lived in Montclair after 1880, except 1895–99, when he was in Paris; won gold medal of Paris Salon in 1900. He wrote a life of his father. Some of his great paintings are *The Ford*, *Pasture at Watchung*, *Monarch of the Herd*, and *After the Combat*.

IRVING, HENRY (1838–1905). His name was changed by royal enactment from John Brodribb after his first stage success in *Richelieu* (1856). Continuing in various stock companies till 1866, he obtained an engagement in London in *The Belle's Stratagem*. *The Two Roses*, his first immense success (1870) ran for 300 nights, and a year later he saved the fortunes of the Lyceum with *The Bells*, which ran for 150 nights. In 1874 he began to play in *Hamlet* and later added various Shakespeare rôles. With Ellen Terry, and now as manager of the Lyceum, he revived *Hamlet* (1878), acted in *The Merchant of Venice*, Tennyson's *Cup*, *Othello*, and *Romeo and Juliet* in successive years. Besides in other classical English

dramas, he later appeared in Merivale's *The Bride of Lammermoor*, based on Scott, in *King Arthur, Peter the Great*, Conan Doyle's *Waterloo*, and finally a magnificent presentation of Sardou's *Dante*. In 1895 he was created a knight, the first actor to receive this honor in England. Irving had a high conception of acting, much artistic finish, in spite of some mannerisms which tended to make him unpopular with audiences.

IRVING, HENRY BRODRIBB (1870–1919). The elder son of Sir Henry Irving (q. v.), he played during his Oxford course the leads in Browning's *Strafford* and Shakespeare's *King John*. From the time of his first appearance in London in 1891, he continued to revive many of the parts his father had played, but added a number of great creations of his own, in plays like *The Admirable Crichton* (1903), *Dr. Jekyll and Mr. Hyde*, and plays by Stephen Phillips. He wrote a life of Judge Jeffreys, and two works on criminals.

IRVING, LAURENCE SYDNEY BRODRIBB (1871–1914). Younger son of Henry Irving (q. v.) for whom he wrote *Peter the Great*. As an actor his main successes were in *The Three Daughters of M. Dupont, The Unwritten Law, Bonnie Dundee*, and *Richard Lovelace*, the last three being his own. Both he and his wife (Mabel Hackney, the actress) were drowned when the *Empress of Ireland* sank in the St. Lawrence River on May 29, 1914.

ISRAELS (*īz-rä-ăls'*), **JOSEF** (1824–1911). A Dutch painter of Hebrew parentage, intended by his father for the priesthood. Coming under the influence of two painters of Groningen, he showed such talent that he was sent to study in Amsterdam, where, except for two years of study in Paris, he remained till 1870. Like Millet in France, he devoted his life to humble themes, mainly life of the peasantry. As an artist of deep feeling, as a painter in water-color, and as an interpreter of life, he holds a high place in his generation. Some of his best canvases are *The Zandvoort Fishermen, The Silent House, Village Poor, A Frugal Meal, Toilers of the Sea*, and *David Singing before Saul*.

ITTENBACH, FRANZ (1813–1879). A German painter; born at Düsseldorf; royal professor and member of the Academy at Vienna. His *Holy Family in Egypt* in the National Gallery at Berlin and *Christ and the Doctors* at Remagen are among his best works.

JACKSON, JOHN ADAMS (1825–1879). An American sculptor; born in Bath, Me.; studied in Paris under Suisse; lived in New York (1858–1860); then removed to Italy; chief works are a bust portrait of Wendell Phillips in the Boston Museum; one of Lyman Beecher owned by Henry Ward Beecher; *Eve and the Dead Abel; Cupid Stringing the Bow; The Culprit Fay;* a group at the southern gatehouse of Central Park in New York; and the *Soldiers' Monument* at Lynn, Mass.

JANACEK, LEOS (1854–1928). Czech composer, who was professor of composition in the State Conservatory, and wrote many songs and other works showing a deep knowledge of the human mind. Besides an opera that pictures village life most accurately, and his modification of Ostrovsky's *The Storm*, he wrote an operatic satire, a dramatic song cycle, a symphonic poem, and many smaller pieces of great merit.

JANAUSCHEK (*yä'now-shek*), **FRANCESCA ROMANA MAGDALENA** (1830–1904). A German and American actress; born in Prague, Bohemia; leading actress at Frankfort (1848–1860); came to New York (1867), playing in German; studied English and presented Medea, Lady Macbeth, Meg Merrilies, and *The Great Diamond Robbery*.

JANSSENS VAN NUYSSEN, ABRAHAM (c. 1575–1632). A Flemish painter; born at Antwerp; ranks next to Rubens among the Flemish masters of the seventeenth century. Among his best works are a *Madonna;* an *Adoration of the Magi; Scaldis*, a representation of the river god of the Scheldt; an *Entombment* and *Madonna with Saints* at Antwerp; and an *Ecce Homo* and *Descent from the Cross* at Ghent. He was especially strong in torch-light effects.

JAQUES-DALCROZE, EMILE (1865–). Swiss composer and music teacher, the author of many famous songs of life and sentiment; educated at Geneva, Vienna, and Paris. As a teacher of rhythm his influence has been far-reaching, his theories being expressed in *Rhythmic Movements, Rhythm, Music and Education* (1921), and similar works. Some of his longer compositions are *Le Festival Vaudois, Le violon Maudit, Janie, Les premiers souvenirs*.

JARVIS, JOHN WESLEY (1780–1840). An American artist; born in South Shields, England; nephew of John Wesley; came to Philadelphia at five years of age; encouraged in art by Malbone. His portraits of statesmen, divines, and naval heroes are in the City Hall at New York and in the New York Historical Society rooms; the pioneer of the study of anatomy in art in America.

JEANRON, PHILIPPE AUGUSTE (1809–1877). A French historical and genre painter; born at Boulogne-sur-Mer; director of the Louvre and National museums (1848), where he classified and arranged the art treasures of the Louvre; founded the Luxembourg Museum; chief works are *Little Patriots, The Abandoned Port of Ambleteuse, The Flight*, and *The Repose in Egypt*.

JEFFERSON, JOSEPH (1829–1905). An American comedian; born in Philadelphia, Pa. Jefferson was on the stage from his very infancy, appearing as Cora's child in *Pizarro* when only three years of age. In 1865 he visited London, and at the Adelphi Theatre played for the first time his world famous part of Rip Van Winkle, September 4, 1865. With this character his name is identified, and though he has shown himself an admirable comedian in many characters, to the English speaking world he will always be Rip Van Winkle.

JEHIN-PRUME, FRANTZ (1839–1899). A Belgian Canadian violinist; born at Spa; pupil of Servais, François Prume, De Bériot, Léonard, Fétis, Vieuxtemps, and Wieniawski; toured Europe with the Rubinsteins, Jenny Lind, and Essipoff; and America with Carlotta, Patti, and Theodor Ritter (1869–1871); settled in Montreal, Canada, in 1887 and became professor at the Trafalgar Institute there.

JERICHAU, JENS ADOLF (1816–1883). A Danish sculptor; born at Assens, in Fünen; studied at home and with Thorwaldsen in Rome; professor at the Academy in Copenhagen (1849); chief works are *Hercules and Hebe, Penelope, The Panther Hunt, Adam and Eve after the Fall, Christ, David*, and the much admired monuments to Oersted and Anderson in Copenhagen.

JERITZA (*ye'rit-sä*), **MARIA** (1891–). Soprano, born in Austria, began to sing in 1909 in Olmütz, then went to Vienna, 1913, and to the Metropolitan, New York, 1921. Some of her chief rôles were Elsa in *Lohengrin*, Marietta in *Die tote Stadt* and in *La Tosca, Tannhäuser, Der Rosenkavalier*, and *Thaïs*. Popular as a concert singer.

JOACHIM (*yō'ä-chim*), **JOSEPH** (1831–1907). A German violinist; born near Pressburg; regarded as the greatest performer of his time, his success extending over a period of more than 60 years. His greatest composition is his *Hungarian Concerto, Opus* 11. His other works follow Schumann's models and are grave and melancholic, but of earnest purpose and high ideal. He founded the Joachim Quartet in 1869 and it occupied a supreme position in the world of chamber music.

JOANES, VINCENTE (1506–1579). A Spanish painter of portraits and religious subjects; founder of the school of Valencia. His *Baptism of Christ, Conversion of Paul*, and a *Holy Family* in the Cathedral of Valencia; a *Last Supper* in the Church of St. Nicholas there; and a series of six pictures of the *Life of St. Stephen* in the Prado Museum are among his best works.

JOHNSON, EASTMAN (1824–1906). An American painter; born in Lovell, Maine; studied at Düsseldorf, Italy, Paris, Holland, and at The Hague; member of the National Academy (1860); especially successful in pictures of American domestic and negro life. Many of his works have been reproduced. His *Card Players* and *The Savoyard* were done at The Hague; his *Old Kentucky Home* first gave him reputation; his *Old Stage Coach* and the *Wanderer's Fiddler*, which sold for $2,375, are among his many notable works. Also gifted as a portrait painter, he had among his sitters men like Emerson, Hawthorne, Webster, Evarts, and Presidents Hayes, Arthur, Cleveland, and Harrison.

JOHNSON, EDWARD (–). A Canadian tenor, born at Guelph, educated at the University of Toronto; became an American citizen in 1920. Beginning as a church soloist in New York, he went into light opera, and then studied in Italy under Lombardi. In 1911 he made his operatic début in *André Chenier* at Padua, after which for five seasons he sang at the Scala of Milan. Some of his creations were *Parsifal* in Italian, *El Tobarro* and *Gianni Schicchi*

7 Franz Schubert
8 John Sebastian Bach
9 Claude Debussy
10 Dr. Richard Strauss

he introduced certain Wagner rôles into Italy. After appearing in other cities of Italy, in London, and in South America, he joined the Chicago Opera Company in 1920, and the Metropolitan of New York, two years afterward.

JOMMELLI (*yom-mel'lē*), **NICCOLO** (1714–1774). An Italian composer; born at Aversa, near Naples; the most conspicuous among the many eminent composers of the eighteenth century. Among his available music is a *Miserere, Victimae paschali, Lux eterna, Hosanna filio, Mulieres bonae, In Monte Oliveto, Requiem,* and some scattered works in collections. For fifteen years from 1753 he acted as kapellmeister at Stuttgart, and so thoroughly changed his style of composition that his countrymen, after he returned to Italy, refused to hear his newer works on the stage.

JONCIERES, VICTORIN (1839–1903). A French composer; born in Paris; studied with Elwart, Leborne, and at the Conservatoire; wrote the music for the *Hamlet* of Dumas and Paul Meurice; the grand operas *Sardanapale, Le dernier jour de Pompéi,* and *Dimitri, A Symphonie Romantique; Sérénade Hongroise; La Mer;* and other instrumental music.

JONES, INIGO (1573–1652). An English architect; born in London; studied in Italy, and, returning to England, obtained the patronage of James I., and became chief architect in the country. The banqueting hall at Whitehall is reckoned his masterpiece. The portico of the Church of St. Paul, London, destroyed in the fire of 1666, was from his design. His style follows Palladio of Venice. He was the principal representative of Renaissance architecture in England. After the Civil War, he was forced to pay fines as a royalist, and eventually died in poverty.

JORDAENS (*yor'däns*), **JAKOB** (1593–1678). A Flemish painter and engraver; born at Antwerp; was a friend of Rubens, and ranks next to him among the Flemings. Reinach calls him a "brilliant but vulgar painter, sometimes caricatures Rubens and at other times appears as his compeer in boisterous good humor." Among his works are *Christ Chasing the Money Lenders from the Temple, The Four Evangelists, The Entombment of Christ, The Last Supper, Diogenes Seeking an Honest Man,* and a *Holy Family* which is in New York.

JORDON, DOROTHEA (1762–1816). An Irish actress, known for many years as a great favorite at Drury Lane, England, where she first appeared in 1785 as Peggy in *A Country Girl.* Eight years before she had acted first in Dublin as Phoebe in *As You Like It.* Parts like Rosalind, Imogen, Lady Teazel, and men's rôles were her favorites.

JOSEFFY (*yō-sef'i*), **RAFAEL** (1852–1915). An Hungarian-American pianist, teacher, and composer; born at Miskolez; studied under Brauer, Wenzel, Moscheles, and Carl Tausig. After a successful career in Europe he came to America in 1879; played with the Philharmonic Orchestra and with Theodore Thomas and his orchestra; revealed Brahms' pianoforte beauties; composed the important *School of Advanced Piano Playing.*

JOUVENET (*zhöv-nā'*), **JEAN** (1644–1717). A French painter; born at Rouen; assisted Le Brun on the decorations of Versailles and succeeded him as the head of the French school; one of the best French religious painters. His *Descent from the Cross* in the Louvre is his great work.

JUCH (*yūh*), **EMMA** (1863–1939). An American dramatic soprano singer; born of American parents in Vienna, Austria; studied under Madame Murio-Celli; made her début in London (1881); prima donna with Theodore Thomas (1884); sang Marguerite in *Faust,* Elsa in *Lohengrin,* Senta in *The Flying Dutchman,* Crysa in *Nero,* and Eurydice in *Orfeo et Eurydice;* prima donna of American Opera Company, three seasons, and then in her own English Opera Company.

KAUFFMANN (*kouf'män*), **ANGELICA** (1741–1807). A Swiss painter; born at Coire; studied in Italy; passed some years in England; married Zucchi, the Italian painter (1781), and spent the rest of her life in Rome; one of the first members of the Royal Academy. Joshua Reynolds painted her portrait, and she complimented him in turn with her *Sir Joshua Reynolds.* Some other pictures are *Leonardo Expiring in the Arms of Francis I., Interview of Hector and Andromache,* and several more in various European galleries.

KAULBACH (*koul'bäch*), **WILHELM VON** (1805–1874). A German painter; born at Arolsen; studied with Cornelius; painted *The Battle of the Huns, The Destruction of Jerusalem,* and several frescoes into which he introduced the free use of profane subjects. He spent more than ten years painting the grand staircase of the Berlin Museum, more than a score of compositions, some of them as large as 30 feet long. At the height of his career he was in great demand as an illustrator of German classics, notably Goethe.

KEAN (*kēn*), **CHARLES JOHN** (1811–1868). More competent as an actor in melodrama than in heavy tragedy, Charles J. Kean followed the choice of the family, his father being Edmund Kean, noted just below. Beginning at Drury Lane (1827) as Norval in Home's *Douglas,* he acted next at Glasgow in Payne's *Brutus* with his father, then in America, and finally found himself famous at Drury Lane in *Hamlet.* Later he and his wife, Ellen Tree, visited America and then enjoyed much success in various London playhouses.

KEAN, EDMUND (1787–1833). Celebrated English actor in Shakespeare dramas, who was born in London, appeared in a ballet on the stage at four, acted with Mrs. Siddons at Belfast in 1808, and became famous in *The Merchant of Venice* in 1814. His Shylock was followed by a Richard III., Hamlet, Othello, and Macbeth. In 1820 he appeared in New York as Richard III. amid great applause. While playing Othello to his son's Iago at Covent Garden in March 1833, he suddenly exclaimed, "I am dying; tell them, Charles," and fell insensible in the arms of his son. He died less than two months later. For the portrayal of strong action and character, Kean was one of our greatest actors. Irregular and violent habits hastened his end.

KEENE (*kēn*), **CHARLES SAMUEL** (1823–1891). Black-and-white artist, who was born in Hornsey, England, and made his advent as an artist in *Punch* in 1851. For the periodical *Once a Week* (1859), he drew a masterly series of illustrations for Reade's *The Cloister and the Hearth* and Meredith's *Evan Harrington.* For almost 20 years dating from 1872 he made a remarkable series of more than 2,000 pictures for *Punch.*

KELLER, ALBERT VON (1844–1920). Born in Switzerland, he studied under various masters, and developed a rather remarkable sense of color. A notable example of his art is entitled *Dinner.* Keller also excelled in painting various kinds of cloth materials.

KELLOGG, CLARA LOUISE (1842–1916). An American soprano; born at Sumterville, S. C.; educated in New York; sang in the United States (1868–1872), in London, and in Italian opera in the United States; organized her own company (1874), for which she made her own translations, libretti, and was stage and chorus manager; married Carl Strakosch in 1887, retiring from the stage. *Memoirs of an American Prima Donna* appeared in 1913.

KELLY, JAMES EDWARD (1855–1933). An American sculptor; born in New York City; studied at the National Academy; at first a wood engraver, then an illustrator, and since 1881 a sculptor. From his well executed historical subjects he has been called "the sculptor of American history." His bronze *Sheridan's Ride; General Buford;* the 6th New York Cavalry Monument on the field of Gettysburg; and *The Call to Arms,* a 17-foot figure of Columbia on the Soldiers' Monument at Troy, N. Y., are among his best works. Recent works are a bronze group of *Leather Stocking* and *The Last of the Mohicans* (1926), and a bust of Thomas A. Edison (1927).

KELLY, MICHAEL (1762–1826). A composer born in Dublin; lived in Italy from 1782 to 1786, and in London from 1786 to 1811,—employed first at Drury Lane till 1793 and then at the King's Theatre. He is remembered chiefly for the music for many dramas.

KEMBLE, CHARLES (1775–1854). One of the members of the celebrated Kemble family of actors, a younger brother of Sarah (Mrs. Siddons), and of John Philip Kemble, and father of Frances or Fanny Kemble,—all noted below. As Orlando in *As You Like It* he first appeared at Sheffied in 1792; and as Malcolm in *Macbeth* at London two years later. He excelled in lighter parts, and in *Laertes* and *Macduff* he was famous. With his daughter Fanny, he made a tour of America (1832–34), when he was inordinately popular. In later years he was involved in monetary troubles owing to unsuccessful theatrical ventures, but was justly celebrated for his dramatic readings in public. Macready once called Kemble "a first-rate actor in second-rate parts."

KEMBLE, FANNY (FRANCES ANNE) (1809–1893). English actress and author, the daughter of Charles Kemble, noted above. From 1829, when she first acted at Drury Lane, her fame was universal among English-speaking folks. She played most of the notable women's parts, not only in Shakespeare, but in plays like *The Hunchback*, and in dramas of her own writing like *Francis the First* and *The Star of Seville*. Between 1879 and 1891, she published five volumes of reminiscences, parts of which make a valuable stage record of the period. In 1834 she married a Southern planter, Pierce Butler, from whom she was divorced in 1849, two years after she returned to the stage. She was in great demand as a Shakespearean reader.

KEMBLE, JOHN PHILIP (1757–1823). An elder brother of Charles and Sarah Kemble (Mrs. Siddons). After an education at Douay, France, he joined a troupe, appeared in Dublin in 1871, and two years later with his sister in Shakespeare and other dramas at Drury Lane in London. Their performance of *Macbeth* (1785) gave them no little reputation, which he retained throughout his life. In 1788 he began to manage Drury Lane, and there introduced many reforms in costuming and staging old plays. In 1803 he transferred to Covent Garden, but in the end the venture proved unprofitable. Kemble probably excelled in the Roman characters of Shakespeare.

KEMBLE, SARAH. See SIDDONS, MRS. SARAH. Several other members of the Kembles were fair actors.

KEMEYS, EDWARD (1843–1907). An American sculptor; born at Savannah, Georgia; removed early to New York; served in the Civil War; did his first work in sculpture as a member of the civil engineering corps of Central Park; made a specialty of Indians and wild animals. His *Bison and Wolves*, *The Still Hunt* in Central Park, *Wolves* in Fairmount Park at Philadelphia, *Panther and Deer*, *Raven and Coyote*, and *Panther and Cubs* are among his chief works.

KENDALL (*ken'dal*), **WILLIAM HUNTER** (1843–1917). His real name was William Hunter Grimston. In 1862 he first appeared in Glasgow, and in 1866 at the Haymarket in London in a variety of parts. With his wife, Madge S. Robertson, he revived many old plays, including Shakespeare and the great comedies of the eighteenth century. For nine years (1879–88) with John Hare he managed St. James Theatre, after which the Kendalls acted chiefly in America and the provinces. Mrs. Kendall created the part of Galatea in *Pygmalion and Galatea* by Gilbert (1871), and both made hits in *The Squire*, *Impulse*, *A Scrap of Paper*, and *The Second Mrs. Tanqueray*.

KENDALL, SERGEANT (1869–1938). An American artist, who won many medals at various exhibitions, including a silver medal for painting, a bronze for drawing, and honorable mention for sculpture at the Buffalo Exposition, 1901; gold medal for painting and bronze for sculpture at San Francisco, 1915; and Potter Palmer gold medal for painting, Art Institute of Chicago, 1910. His pictures hang in the Metropolitan Museum of New York, Corcoran Art Gallery of Washington, D. C., Pennsylvania Academy of Fine Arts, and others.

KENDALL, WILLIAM MITCHELL (1856–). A member of the firm of McKim, Mead, and White of New York, Mr. Kendall had much to do with various structures designed by the firm. Some of these are the McKinley Monument at Canton, O., Plymouth Rock Portico, Arlington Memorial Bridge, additions to the Metropolitan Museum, the New Post Office of New York City, and buildings of the Harvard Business School.

KENT, ROCKWELL (1882–). An American artist, who turned from architecture to painting, and became the pupil of Chase, Henri, Miller, and other American masters. From various travels about the world, especially in a small boat, he gathered impressions for many pictures. The Metropolitan of New York, Art Institute of Chicago, Brooklyn Museum are some of the notable galleries in which pictures of his are hung. *Deer Season* at Chicago, *Annie McGinley* at Pittsburgh, and *Lone Woman* at Brooklyn are some of his best pictures.

KENT, WILLIAM (1685–1748). Though he is represented in Westminster Abbey by his Shakespeare statue, he was not a great sculptor; nor was he a great architect, though Holkham Palace is a fair representative of the art. Walpole called him the "father of modern gardening," and it must be as a landscape architect that his fame will be secured. He got rid of symmetrical forms, artificial restraint of nature, uniformity, and many other conventions in gardening By imitating the variety of nature he indeed became the origin of a new school.

KEYSER, EPHRAIM (1850–1937). Born in Baltimore, and educated in Munich and Berlin; maintained studio in Rome (1880–86), in New York (1887–93), and since in Baltimore. He executed the statue of Baron De Kalb now at Annapolis for the U. S. Government, the memorial for President Chester A. Arthur at Albany, busts of Sidney Lanier, President D. C. Gilman of Johns Hopkins, and others. Among his ideal sculptures are *The Page* at Munich and *Psyche* at Rome.

KING, JULIE RIVE. See under RIVE-KING.

KJERULF (*kyâ'rōölf*), **HALFDAN** (1815–1868). A Norwegian composer, educated for the law, but in 1840 turned to music, and after 1850 taught in Christiania. He became intimately associated with both Grieg and the poet Björnson, from whom he derived no little inspiration. In all he composed the music to over a hundred beautiful songs, noted for poetic and delicate sentiment.

KNEISEL (*k'nā'zel*), **FRANZ** (1865–1926). An violinist and conductor, after a musical education in Europe and a number of years at Vienna and Berlin, became concert master of the Boston Symphony Orchestra (1885–1903). Later he appeared as a soloist and conductor of his own Quartet, and as leader of the Worcester Orchestra, and in 1905 head of violin at the New York Institute of Musical Art.

KNELLER (*nel'ĕr*), **GODFREY** (1648–1723). Painter of historical scenes and portraits, who was born at Lubeck, Germany, studied under Rembrandt and Bol at Amsterdam, acquireda reputation in Italy, and settled in England in 1674. He made many portraits of Charles II., went to Paris to paint Louis XIV., and there became court painter. William III. made him a knight, and George I. a baronet. In coloring he is brilliant, in drawing rather free from conventions, but rather monotonous. In all he painted 10 sovereigns. At Hampton Court are his *Forty-three Celebrities of the Kit-Kat Club* and *Ten Beauties of the Court of William III.*

KREISLER (*krīce'lĕr*), **FRITZ** (1875–). Austrian violinist, a pupil at 7, and winner of the Grand Prize at the Paris Conservatory when he was graduated at 12. After making a tour of the United States in 1889, he studied medicine and served in the Austrian army, as he did also in the World War in his old regiment, being wounded and invalided from service. He had reappeared in 1889 as a concert artist, made a profound impression in the United States the following year, and from then on visited most parts of the world. Besides being one of the great violinists of all time, he composed a number of delightful pieces and wrote *Four Weeks in the Trenches* (1915), an account of his war experience.

KUBELIK (*kö'be-lik*), **JAN** (1880–). A violinist born near Prague, becoming a naturalized Hungarian subject in 1903, on his marriage to Countess Szell. At the age of 8 he appeared in a recital at Prague, and later developed a wonderful technique in all his playing. He was honored by many societies of artists. His début in London occurred in 1901 and in America two years later.

KUPKA, FRANTISEK (1871–). Czech satirical painter, who lived mainly at Prague and Paris, and made a series of drawings showing a keen insight into life and human nature. Much of his work appeared in Paris journals. Later in life he took a pronounced interest in color effects.

KYOSI, SHO-FU (1831–1889). Japanese political caricaturist and painter, independent in his ideas of art and of contemporary events. Several times he ran afoul of the authorities and suffered imprisonment. The folk-lore of Japan attracted him in subjects for various pictures. Besides illustrating many books, he wrote two accounts of his life and art ideals. Examples of his work are found in various museums of the world, notably in the British and in the National Art Gallery of England.

LABLACHE (*lä-bäsh'*), **LUIGI** (1794–1858). An Italian operatic basso; born at Naples. He had a voice of extraordinary volume and quality, compassing two octaves from E below the bass staff to E above. He created the part of Dr. Bartolo in *Il barbiere*. Bellini wrote *I Puritani* for him; Mercadante, *Elisa e Claudio;* and Donizetti, *Don Pasquale*.

LA FARGE (*lä färj*), **JOHN** (1835–1910). An American painter, born of French parentage in New

York; studied drawing under his grandfather, read law, and then went to Paris for study under Couture. He was influenced also by William M. Hunt in America. After 1866 he devoted much time to mural painting and stained glass work, making important contributions to the latter. Some of his work is found in Trinity Church, Boston, the churches of St. Thomas, the Paulist, and the Brick Presbyterian in New York, and the *Battle Window* in Memorial Hall, Harvard University. Some of his work in both oil and water-color was highly admired.

LANCRET, NICHOLAS (1660–1743). French painter of over 700 different works under the influence of his first master Pierre d'Ulin, but more especially under that of Watteau. Many of his pictures have been engraved. His *Four Ages of Man* is in the English National Gallery.

LANDOVSKA, WANDA (1877–). A Polish musical artist, who interpreted the old masters on instruments like the harpsichord. After studying in Berlin, she went to Paris, and became a musician of much charm in bringing out the coloring of older music. From 1913 to 1919 she taught in the Hochschule of Berlin. Some of her writings like *Bach, Music of Former Days*, and various criticisms of single authors take high rank.

LANDSEER, SIR EDWIN HENRY (1802–1873). An English painter; born in London. He began to draw animals when a mere child; exhibited regularly at the Academy; took the very highest rank among animal painters, and, though he was criticised for introducing too human a sentiment and expression into some of his animals, the humor and pathos of animal nature has had no finer exponent. Among his works are the famous bronze lions on Trafalgar Square, *The Shepherd's Chief Mourner, The Return from Deer Stalking, Dignity and Impudence, Piper and Pair of Nutcrackers*, and *Oxen at the Tank*.

LARGILLIERE (*lar-zĭ-lyār'*), **NICOLAS** (1656–1746). French painter who studied at Antwerp, but lived in Paris much of his life. His best work is in portraits, but some of his historical subjects are worth while, like the *Crucifixion*. He was made a member of the Academy in 1686, and later held various offices, ending with the chancellorship. Versailles has some of his works, and a large canvas in Paris contains portraits of most of the city officials of the day (1694).

LASSO (*lăs'sō*), **ORLANDO** (c. 1530–1594). Belgian musical composer, who for many years lived at the court of Albrecht IV., duke of Bavaria, where he composed and played the best music for the court. He represents the highest ideals of music of the generation in which he lived. Some of his works are four volumes of madrigals, three of French songs, two of German three or four parts songs, three of church music, and eleven volumes of his more important compositions.

LE BRUN (*lĭ-brun'*), **CHARLES** (1619–1690). A celebrated French painter; born in Paris; studied in Rome; settled in Paris. He exercised for about 40 years a great influence on the art of the period. He decorated Versailles, and has many works in the Louvre. His reputation was greater in his own day than now. His influence on the industrial arts was widespread in his age. For the king of France he executed a magnificent series bearing on the life of Alexander the Great.

LE BRUN, MARIE LOUISE. See under VIGÉE-LE BRUN.

LE CORBUSIER, M. (JEANNERET) (1887–). A Swiss architect, who for many years lived in Paris, and with a cousin, Pierre Jeanneret, produced a remarkable series of buildings from concrete molds, using the same designs, with ingenious variations. For a time after 1916 he was a painter. Besides working in concrete in the type buildings, he designed several single structures of great beauty, such as the Maison Laroche at Auteuil, the Pavilion de l'Esprit Nouveau at Paris (1925), and a design for the Palace of Nations at Geneva. He also gave attention to planning large towns to secure a maximum of space, air, and light for every inhabitant.

LEECH, JOHN (1817–1864). An English artist and humorist; born in London. His political cartoons in *Punch*, his illustrations of Gilbert A'Becket's *Comic Histories*, of Hood's *Comic Annual*, and of Dickens's works are the basis of his great reputation. Some of his particular illustrations are in the *Comic History of England* (1848), *Comic History of Rome* (1852), *Hints on Life, Portraits of the Children of the Mobility*, showing how poor little folks live, and *Comic English* and *Latin Grammars*. His connection with *Punch* lasted from 1841 to 1864, but meanwhile he drew for several other publications. J. E. Millais helped him color a series of mechanical enlargements of his sketches for an exhibition in London (1862).

LEGROS (*le-grō'*), **ALPHONSE** (1837–1911). A painter and etcher, who settled in England in 1863, taught etching in the South Kensington School of Art, and acted as Slade professor at University College, London, from 1876 to 1892. He was born at Dijon, France, where a number of his works are now exhibited, including the *Ex Voto*. As a teacher he developed great originality, power, and certainty of technique in his classes. Some of his other works are the *Dead Christ, The Triumph of Death, The Tinker, Jacob's Dream, Saint Jerome*, an *Angelus*, and portraits of Browning, Burne-Jones, and Huxley.

LEIBL, WILHELM (1844–1900). German painter who lived for years among peasants, shared their life, and represented them in unfailing and beautiful realism. His pictures are noted for coloring, fidelity to artistic ideals, and firmness of execution. In his earlier life he was influenced by Courbet and by the Dutch masters. He studied at two different times in Paris. Some of his best subject pictures are *The Village Politicians, In Church, Frau Gentz, The Artist Sattler and his Dog*, and many notable peasant scenes.

LEIGHTON (*lāy-tŏn*), **FREDERICK, BARON** (1830–1896). English painter and sculptor, who exhibited a picture in 1855 entitled *Cimabue's Madonna Carried in Procession through the Streets of Florence;* this was purchased by Queen Victoria and gave him a great reputation. From his early youth till 1860 he lived on the continent, mainly in Italy, where he knew many celebrated English authors and artists. In Florence he painted *Tybalt and Romeo, The Reconciliation of the Montagues and the Capulets*, and *The Death of Brunelleschi*. He became one of the firmest and best draftsmen of his age. Of his many pictures, some of the most interesting are: *Electra at the Tomb of Agamemnon, Helios and Rhodos, Nausicaa, Last Watch of Hero, St. Jerome, David Musing on the Housetop, The Summer Moon, and Clytie* — his last unfinished work.

LELY (*lē-lī*), **PETER** (1618–1680). English painter, born in Westphalia, whose real name was Van der Faes. Lely adopted his father's nickname, removed to England in 1641, and for years was known as a painter of landscape, a few historical scenes, and portraits. He painted Charles I, Cromwell, Charles II and his court (including "the Beauties"), and *Susannah and the Elders*.

LENBACH (*len'băch*), **FRANZ** (1836–1904). A German portrait painter; born in Munich; studied there under Piloty. Among his portraits are those of Bismarck, Gladstone, Wagner, and Heyse, in which the character and personality of the subject are magnificently brought out Other important works are *Shepherd Boy* and *Peasants Taking Refuge from the Weather*.

LEO, LEONARDO (1694–1744). An Italian composer; born near Brindisi; studied at Naples and Rome; choirmaster and director of the school of San Onofrio in Naples (1717); wrote the oratorios *Santa Elena* and *La morte d'Abele;* the operas *Sofonisbe, Olimpiade, La clemenza di Tito*, and *Achille in Sciro;* and church music, including masses, the well-known *Miserere*, introits for Lent, and sacred solos.

LEONARDO DA VINCI (*dā vēn'chē*) (1452–1519). An Italian painter, sculptor, and architect; born at Vinci, between Pisa and Florence; studied with Andrea del Verrocchio and Ludovico Sforza. He holds a supreme place as an artist; but few of his paintings have endured. His *Last Supper*, painted on the wall of the refectory of the Convent of Santa Maria delle Grazie at Milan, has been frequently "restored" because of the injury from the dampness of the wall; yet it remains one of the world's masterpieces. His *Mona Lisa*, a half-length portrait of a woman with a mysterious smile, in his most celebrated easel picture. It with *The Virgin of the Rocks* and *The Virgin and Child with Saint Anne*, is in the Louvre. Da Vinci and Michelangelo are the giants of the Florentine Renaissance. He was also one of the greatest scientists of his age, known for his studies in anatomy, mathematics, physics, and mechanics, being one of the first to consider the problems of mechanical flight.

LEONCAVALLO (*lā-ōn-kā-văl'lō*), **RUGGIERO** (1858–1919). An Italian composer, who was born at Naples, and studied there under Cesi, Ruta, and Rossi. After several unsuccessful attempts, he finally

secured the production of his *Pagliacci* at Milan in 1892. *La Bohème* also gained some favor, though not so much as Puccini's operas of the same title. His *Medici* and *Chatterton* gained little applause, but *Zaza* and *Der Roland* in 1900 and in 1904 were fairly well received. He was his own librettist.

LESCHETIZSKY (*lesh-e-tit'skē*), **THEODOR** (1830–1915). One of the most famous teachers of piano in modern times, who was born in Poland, studied under Czerny, won great fame as a pianist, and trained a number of artists who attained considerable note. For 14 years he taught in the Conservatorium at St. Petersburg (1864–78), and then established his own school at Vienna. Some of his pupils were Paderewski, Mark Hambourg, and Annette Essipoff, whom he married.

LESLIE (*les'li*), **CHARLES ROBERT** (1794–1859). Painter, born in America and educated in Philadelphia, but after 1811 lived mainly in England, save for six months as a teacher of drawings at the United States Military Academy at West Point. He early won two silver medals at English Royal Academy. Much of his work treats of subjects drawn from celebrated authors like Shakespeare, Cervantes, Swift, Sterne, Fielding, and Smollett. Besides his *Life* of the painter Constable and an *Autobiography*, he compiled a *Handbook for Young Painters*.

LEUTZE (*loit'se*), **EMANUEL** (1816–1868). An American artist of German parentage and born in Württemberg; brought by his parents to Philadelphia in infancy. Returned to Düsseldorf for his art education. He is known principally for his large historical paintings, which include scenes in the life of Columbus, a decoration in the Capitol at Washington, entitled *Westward the Star of Empire Takes Its Way*.

LIEBERMANN (*lē'bĕr-măn*), **MAX** (1847–1935). A German painter and etcher, who has been called the Millet of his country. Like J. F. Millet in France he broke with traditions in art and turned toward the peasants, whom he portrayed in remarkable vitality and realism. After his first great picture, *Woman Plucking Geese*, was exhibited he went to Paris in 1872 and to Barbizon the next year, where he came to know Millet, Corot, and their school of art. His painting *Christ in the Temple* was condemned as sacrilegious because of its utter realism. After 1884 he lived in Berlin, where a section of the National Gallery contains specimens of his best work. Some earlier works are *An Asylum for Old Men, The Flax Spinners*, and *The Cobbler's Shop;* some others are *The Woman with Goats, The Seamstress*, and *Beercellar at Brandenburg*.

LIND, JENNY (1820–1887). One of the most artistic and accomplished singers of the nineteenth century, a great public favorite for many years, was born at Stockholm, Sweden. She passed through a period of training for several years, first sang in 1836, and was definitely engaged in 1837. Within four years she attained the height of fame at Paris, particularly in *Der Freischütz*. She was a fine actress in all her operatic parts. Appearing in England first as Alice in Meyerbeer's *Robert le Diable*, her reputation increased with almost every performance. Some of her other parts were in *Figaro, I Puritani, Il Flauto magico*, and in the *Messiah* (1850), just before she left for America. For two years she sang in many cities of the United States, for the most part under the management of P. T. Barnum. In Boston she married Otto Goldschmidt (1852). For some years in England she appeared in oratorios and concerts, fostered the Bach choir of which her husband was conductor, helped many young singers, and for a time was professor of music at the Royal College of Music. She last appeared in 1870 in *Ruth*, an opera composed by her husband. Her hold on the public for a generation was due to her talent, the superb perfection of her voice and in a large measure to the naturalness, simplicity, and sincerity of her life and manner.

LIPPI (*lēp'pē*), **FILIPPINO** (1457–1504). An Italian artist; born at Florence; son of Fra Filippo Lippi and pupil of Boticelli; noted for his frescoes in churches in Florence and Rome and for *The Virgin and Saints, The Adoration of the Magi* in the Uffizi at Florence, *The Virgin Appearing to St. Bernard* in the Church of the Badia at Florence, and *The Vision of St. Francis*.

LIPPI (*lēp'pē*), **FRA FILIPPO** or **LIPPO LIPPI** (1406–1469). One of the great painters of Florence in a magnificent age of art. He was attached to the Carmelite monastery from 1521 to 1532, and afterwards seemed to be bound by some religious vows. One of the best colorists, draftsmen, and interpreters, he painted people more nearly as they were than most artists of the time. Little is known of his life, save that Vasari claims he was at Ancona and Naples and was captured by Barbary pirates. in 1456 he began to execute a commission at Prato. Some of his best frescoes are found in Florence, in the cathedral at Prato, and the cathedral of Spoleto. An altarpiece for S. Ambrogio at Florence, mentioned by Browning in his poem, the *Virgin Adoring the Infant Christ*, and *Annunciation* and *Seven Saints* in the National Gallery of London, and a *Madonna and Angels* in the Louvre are notable works.

LISZT (*list*), **FRANZ** (1811–1886). An eminent Hungarian pianist and musician; born at Raiding, near Oedenburg; studied at Vienna and Paris; brought out Wagner's *Lohengrin* and Berlioz's *Benvenuto Cellini* at Weimar, which became the musical center of Germany; took minor orders in the Catholic Church (1865) and was consequently known as Abbé. He was unapproachable as a pianist, both by reason of his supreme command of technique and the poetic quality of his playing. His compositions for the pianoforte are enormous in number. His 12 symphonic poems, one or two masses, and the *Legend of St. Elizabeth* form the body of his religious and other works.

LOEFFLER (*lēf'lĕr*), **CHARLES MARTIN TORNOV** (1861–1935). A composer, who played with the Boston Symphony Orchestra from 1881 to 1903, when he gave all his time to writing music. He was born in Alsace, lived for a time in Russia, and was educated finally in Switzerland and in music in France. Of his many excellent works, one might mention *A Pagan Poem*, for orchestra and piano; *Memories of my Childhood*, a symphonic poem; *Canticle of the Sun*, which was used for the opening of the Chamber Music Room, Library of Congress; a *Quartet in A Minor; For One Who Fell in Battle*, an eight-part chorus.

LORENZO, MONACO (c. 1370–c. 1425). Called also Don Lorenzo. Born in Siena, he became attached to the monastery of Santa Maria, and left many examples of his art in Florence. Some of his works that remain are a *Coronation of the Virgin*, a smaller painting on the same theme in the National Gallery of London, some frescoes depicting *The Life of the Virgin, Life of a Hermit* and the *Journey of the Three Kings*.

LOTTO, LORENZO (c. 1480–1556). A Venetian painter, who left some notable works at Bergamo, especially a *Madonna, Christ Taking Leave of his Mother* (which is now at Berlin), a *Bride and Bridegroom*, now at Madrid, and a fine series of frescoes. Returning to Venice, he painted *Christ and the Adulteress, Crucifixion*, and *Madonna and Saints*. For the last four years of his life, having completely lost his voice, he lived in a monastery.

LOW, WILL HICOCK (1853–1932). An American artist and illustrator; born at Albany, N. Y.; studied in Paris with Gérôme and Carolus-Duran; joined the Barbizon school; painted *Day of the Dead;* returned to New York (1877); taught the life class at Cooper Union (1882–1885); at the National Academy (1889–1892); elected N. A. (1890); did much mural decoration; painted the portrait of Mme. Albani, *Lady of the Empire, Telling the Bees, Aurora*, and *Spring*. Low also did much work in stained glass for churches and made a number of mural decorations, the chief ones being for the U. S. Federal Building of Cleveland, *Victory* in Earl Hall, Columbia University, and decorations in the State Capitol of Albany, N. Y., and 32 pictures in the Education Building of the same city.

LUCAS, JOHN SEYMOUR (1849–1923). An English painter; born in London; elected R. A. (1898). Among his important works are *The Armada in Sight, After Culloden, Flirtation*, and an excellent fresco in the Royal Exchange at London.

LUINI (*lō-ē'nī*) (c. 1475–c. 1532). An Italian painter; supposed to have been born in the village of Luino, near Lake Maggiore, but it is only known for certain that his works were mostly executed between 1520 and 1530. He is one of the five painters of whose supremacy Ruskin was most certain. He was the most popular of the disciples of Leonardo da Vinci at Milan. Among his works are *The Marriage of the Virgin* and *The Nativity*, two frescoes in the Church of Saronno.

MacCHESNEY, CLARA TAGGART (1861–1928). An American painter; born at Brownsville, Cal.; studied in Paris under Courtois and Girardot and at New York under Mowbray and Beckwith. She ex-

celled in the drawing of children and in water-color work; received many medals and much public recognition.

McCORMACK (*mà-kôr'mäk*), **JOHN** (1884–). Tenor singer, born at Athlone, Ireland; studied voice under Signor Sabatini of Milan. First appeared in London in *Cavalleria Rusticana*, and in the same season (1907) sang in *Rigoletto* with Tetrazzini. After 1909 sang with Chicago Grand Opera and several other companies. In 1919 became a naturalized United States citizen. Of his many rôles some of the chief are Ridolfo, Pinkerton, Faust, Don Ottavio. He was given the title of Count by the Pope in 1928. Appeared frequently in concert in many lands.

MacDOWELL (*mak-dou'el*), **EDWARD ALEXANDER** (1861–1908). An American composer and pianist; born in New York City; studied in Paris and Germany from 1876 until 1887. He returned to America, established himself in Boston, and engaged in teaching and concert work; appointed to the chair of music in Columbia University, New York City, in 1896; resigned in 1904. His musical career was terminated by ill health in 1905. Among his works are a number of beautiful compositions for the pianoforte, songs, choruses, and orchestral works. For romantic atmosphere, delicacy, and use of snatches of folk-music, Indian tunes, and artistic technique and finish, he stands in the front rank of American musical composers.

MACKENZIE, ALEXANDER CAMPBELL (1847–1935). Scotch violinist, educated in London and Edinburgh, and lived in Florence for six years (1879–85). In 1885 he was chosen principal of the Royal Academy in London, and won also many honors. Among his compositions are *Colomba*, *The Troubadour*, operas; incidental music to *Marmion*; *The Little Minister* and *Ravenswood*, oratorios; the *Rose of Sharon* and *Bethlehem*, cantatas; and incidental music for *The Cotter's Saturday Night*.

McKIM (*ma-kim'*), **CHARLES FOLLEN** (1847–1909). An American architect; born in Chester County, Pa.; studied at Harvard and at L'Ecole des Beaux-Arts in Paris; settled in New York (1872) and formed a partnership with William R. Mead (1877) and with Stanford White (1879). The work of this firm produced a renaissance in American architecture. Buildings with which they are associated are Boston Public Library, Columbia Library, Century Club in New York, J. Pierpont Morgan's Library, War College at Washington, the new Pennsylvania depot in New York, Bellevue Hospital, and the Madison Square Presbyterian Church.

MacMONNIES (*mak-mun'iz*), **FREDERICK** (1863–1937). An American sculptor; born in Brooklyn, N. Y.; studied with St. Gaudens and with Falguière in Paris. Among his important works are *Diana*, *Nathan Hale* in the City Hall Park in New York, the huge fountain at the Columbian Exposition in Chicago, *Bacchante* and *Sir Henry Vane* in the Boston Public Library, *Victory* at West Point, *Shakespeare* and the bronze doors in the Congressional Library, and groups on the Memorial Arch in Prospect Park in Brooklyn.

MacNEILL (*mak-nēl*), **HERMON ATKINS** (1866–). An American sculptor; born at Chelsea, Mass.; studied in Paris under Falguière and Chapu; for three years instructor at the Chicago Art Institute; assisted Martiny in his work for the Columbian Exposition; studied in Rome for four years. His notable works include *The Moqui Runner*, *A Primitive Chant*, *The Sun Vow*, *The Fountain of Liberty* at the St. Louis Exposition, *Coming of the White Man* in Portland, Ore., and the *McKinley Memorial* at Canton, Ohio.

MACREADY (*mak-rē'di*), **WILLIAM CHARLES** (1793–1873). An English tragedian; born in London. In 1826 he made his first visit to America, and in 1828 played in Paris, with great success in both countries. He did much to reform the stage and cultivate the public taste for Shakespearean drama; revisited the United States in 1849; returned to England; gave a series of farewell performances and finally retired from the stage in 1851. The Astor Place Riot (May 10, 1849) was caused by the rivalry and ill feeling between Macready and Forrest.

MacWHIRTER, JOHN (1839–1911). A Scottish painter; born at Slateford, near Edinburgh; elected R. A. in 1894. Among his notable works are *Nature's Archway*, *June in the Austrian Tyrol*, *The Lord of the Glen*, *The Track of the Hurricane*, *The Silver Strand*, and *Loch Katrine*.

MAKART, HANS (1840–1884). An Austrian painter; born at Salzburg; studied with Piloty at Munich (1861–1865); settled in Vienna (1869); professor of the Art Academy (1879); chief works are *Amorettes*, *The Seven Deadly Sins*, *The Homage of Venice to Catherine Cornaro*, *Cleopatra on the Nile*, *Entrance of Charles V. into Antwerp*, *Death of Cleopatra*, *The Spring* and *Diana's Hunting Party*, which is in the Metropolitan Museum at New York.

MALIBRAN, MARIE FELICITE (1808–1836). A French mezzo-soprano and actress; born at Paris; daughter of Manuel Garcia; made her début in London in 1825, and soon her reputation extended over Europe. She married M. Malibran, a French merchant, who soon became bankrupt. She then returned to the stage, and was received with great enthusiasm in France, England, Germany, and Italy. Her first marriage having been dissolved, she married M. de Bériot, a famous violinist, in 1836. She was one of the greatest of operatic singers.

MANET (*mànāy'*), **EDOUARD** (1832–1883). French painter, an early student of Couture, who influenced him greatly at first, before the Spanish claimed his marked attention. For a long time his independence and modern tendencies excluded him from exhibitions and favor of the elect. In turn he greatly inspired a small group of younger men. Some of his earlier works are *Spaniard Playing the Guitar*, *Breakfast on the Grass*, *The Angelus at the Tomb*, and *A Bullfight*. In 1867, rejected from the exhibition, he and Couture set up their works in a private gallery. Later pictures, more under the influence of the open air, called forth some interest; but in 1887 he again held a private exhibition. *The Garden*, *Hamlet*, *In the Conservatory*, and some portraits later were highly appreciated. He was admitted to the Legion of Honor in 1881. His *Boy with a Sword* is in the Metropolitan Museum of New York. Like all other innovators, Manet was long misunderstood and censured.

MANSARD (*män-sär*), **JULES-HARDOUIN** (1646?–1708). Eminent French architect, who was liberally patronized by Louis XIV., and designed many fine buildings in or near Paris. A few of these are the Palace of Versailles, the foundations of the Pont-Royal, Trianon, part of the cathedral at Orleans, and the dome of the Invalides. Not only skill and rapidity of execution, but great originality and freedom from convention mark his work.

MANSFIELD (*mans'field*), **RICHARD** (1857–1907). An American actor; born in the island of Heligoland, Germany; in business in Boston, Mass. for some years; went to England and played small parts in comic opera; came to the Standard Theatre in New York (1882); made a great success as Baron Chevrial in the *Parisian Romance* (1883); played in American cities in a number of rôles, from Ko-Ko in *The Mikado* to Richard III. and Shylock (1883–1890). He played Dr. Jekyll and Mr. Hyde, Prince Karl, Richard III., Beau Brummel, Dimmesdale in his own *Scarlet Letter*, Shylock, Bluntschli in *Arms and the Man*, Dick Dudgeon in *The Devil's Disciple*, Cyrano de Bergerac, and numerous other parts.

MANSHIP, PAUL (1885–). American sculptor, born in St. Paul, Minn., educated there, at Philadelphia, and New York, and Rome, where he went on a fellowship of the American Academy. Returning in three years, he almost instantly won high praise, and in time was awarded many medals, including a gold award by the Philadelphia Academy and the San Francisco Exposition. Some of his best portrait statues are *John D. Rockefeller*, *Miss Manship* (his daughter aged three days), now in the Metropolitan Museum, New York, *Dancing Girl and Fauns*, *Little Brother*, *Playfulness*, and *Dancer and Gazelles*.

MANTEGNA (*man-tane'yah*), **ANDREA** (1431–1506). An Italian painter; born in Vicenza, Italy; pupil and adopted son of Squarcione. Mantegna excelled in perspective, which was then a rare merit. He introduced the art of engraving on copper into Upper Italy; painted nine tempera pictures representing the *Triumph of Cæsar*, now in Hampton Court. Among his frescoes are *The Martyrdom of St. James* in the Eremitani at Padua and *Barbara of Brandenburg*, *Marchesa di Genzaga*, *and her Court* in the Palace at Mantua. It is probable that the highest qualities of the great Venetian art of the fifteenth century were derived from Mantegna.

MARCELLO (*mär-chel'lō*), **BENEDETTO** (1686–1739). An eminent Venetian composer. He was also a student of law, and in his early life held several important government posts. His great work, *Estro poetico-armonico*, *Parafrasi sopra i primi*, 50 *psalmi*,

Poesia di Girolamo Giustiniani, appeared in two parts (1724–1727). They are composed for one, two, three, and four voices, and for expression, it is said, far surpass any other work of the kind. Among his other compositions are instrumental concertos; an opera, *La Fede riconosciuta;* and an oratorio, *Giuditta.* Marcello was also a poet of much distinction.

MARCHESI (*mär-kā'zē*), **MATHILDE GRAUMANN** (1826–1913). German singer and teacher of distinguished artists like Calvé, Emma Eames, Emma Nevada, and Etelka Gerster. She married Salvatore Marchesi in 1852. From 1844 to 1849 she spent most of her time in singing, afterward a large part at various conservatories. Besides a number of books on her art, she wrote *Marchesi and Music*, a book of personal history.

MARTINI, GIAMBATTISTA (1706–1784). Learned Italian composer, who specialized in history and theory of music, accumulating a remarkable private library of over 17,000 volumes. His own writings were confined to masses and other sacred compositions for the most part. His *Storia della Musica* (1757) was long a favorite.

MASCAGNI (*mäs-kän'yē*), **PIETRO** (1863–). An Italian composer; born in Leghorn, Tuscany. He produced a one-act opera, *Cavalleria Rusticana*, in competition for a prize; also *L'amico Fritz*, *I Rantzau*, *Nerone*, *William Ratcliff*, and *Zanetto;* director of the Conservatorium at Pesaro in 1896.

MATISSE (*mät-tēs*), **HENRI** (1869–). French painter, one of the most eminent of the "independent" modern artists. His specialty was large masses of light, instead of many contrasts of color; many of his pictures have a statuesque effect, due to his treatment of form and color. He painted scenes in Morocco, Southern France, and Italy.

MATTESON, TOMPKINS HARRISON (1813–1884). An American painter; born at Peterborough, N. Y.; best known by his *Spirit of '76*, often reproduced; elected N. A. in 1874.

MAY, PHIL (1864–1903). English caricaturist, born near Leeds, but went to London at 17 to earn his living as an illustrator. For a time he fared very poorly, but obtained some work for the *St. Stephens Review*, after two years going to Australia. For three years he made some of his best drawings for the Sydney *Bulletin*, and in 1892 was back in London with the *St. Stephens Review*. Seven years before his death he obtained a permanent place on *Punch*. Knowing the London types well, he succeeded admirably in showing their human and odd qualities.

MATZENAUER (*mät'sĕn-ou-ĕr*), **MARGARETE** (1881–). An operatic mezzo-soprano, who was born in Hungary; became an American citizen in 1918. She received much of her early training from her musical parents. Her début as Puck in *Oberon* occurred at Strassburg, Germany, in 1901, where she continued for three years, and then from 1904 to 1911 at Munich, appearing at Bayreuth. In 1911 she joined the Metropolitan Opera Company, New York. Some of her parts were Herodias, Brünnhilde, Carmen, Isolde, and Donna Elvira.

MAYNARD, GEORGE WILLOUGHBY (1843–1923). An American painter; born in Washington, D. C.; studied under Edwin White in Italy, at the Antwerp Academy, and in Paris; painted portraits of Kate Field and of Frank D. Millet; settled in New York (1885). One of the earliest of American mural decorators, his work on the Agricultural Building at Chicago (1893), on the Congressional Library, the Waldorf-Astoria, and other buildings is of a high order. His *In Strange Seas* is in the Metropolitan Museum in New York.

MAYO, FRANK (1839–1896). An American actor; born in Boston, Mass.; first appeared in San Francisco; played frequently with Edwin Booth; appeared in Boston (1865) as Othello, Hamlet, Macbeth, and D'Artagnan. He is remembered for his Davy Crockett and Pudd'n-Head Wilson.

MEAD, LARKIN GOLDSMITH (1835–1910). An American sculptor; born in Chesterfield, N. H.; studied under Henry K. Brown. His colossal *Vermont* for the dome of the State Capitol at Montpelier; his *Ethan Allen;* the National Lincoln Monument at Springfield, Ill.; the Soldiers' Monument at St. Johnsbury, Vt.; the pediment, *Return of Proserpine*, over the Agricultural Building at Chicago in 1893; the colossal *Mississippi River;* the marble group of the Stanford family at Stanford University in California (injured by the earthquake) are among his best works.

MEAD, WILLIAM RUTHERFORD (1846–1928). An American architect, member of the New York firm of McKim, Mead, and White. He was graduated from Amherst, studied under Russell Sturgis, also in Europe, and entered the firm in 1879. The National Institute of Arts and Letters awarded him a gold medal, and the king of Italy made him a Knight Commander of the Crown. Some important buildings designed by his firm are the Boston Public Library, the New York *Herald* Building, New York Post Office, Brooklyn Institute of Arts and Sciences, the Tiffany Building, and National City Bank of New York.

MEHUL, ETIENNE HENRI (1763–1817). Also known as **ETIENNE NICOLAS.** A French musical composer; born in Ardennes; settled in Paris in 1778; composed 24 operas, including *Euphrosine et Coradin*, *L'irato*, *Joseph*, and *La journée aux aventures;* several symphonies; and numerous songs, including "Chant du départ," "Chant de victoire," and "Chant du retour," popular with French Revolutionary soldiers.

MEISSONIER (*māy-sō-nē-ā'*), **JEAN LOUIS ERNEST** (1815–1891). A French painter; born in Lyons. All his works were painted with Flemish care and finish, but were thoroughly original in their treatment. His pictures, though of small size, sold for large sums, especially his *Napoleon I. and Friedland, or 1807;* illustrated *Paul and Virginia* and the *Chaumière Indienne.*

MELBA, NELLIE (1865–1931). An Australian soprano operatic singer; born near Melbourne; performed publicly at six; appeared in London (1886); took Brussels and Paris by storm (1887 and 1889); sang in *Lucia di Lammermoor* at Covent Garden in London (1888); most successful in *Romeo and Juliet;* first appeared in New York in 1893 in *Lucia di Lammermoor*, where she has appeared every season since; sang at the World's Fair in Chicago (1893); one of the most celebrated *prime donne* of our time. Her stage name "Melba" is taken from the city of Melbourne. Her maiden name was Nellie Porter, and she married Captain Charles Armstrong in 1882.

MELCHERS (*mel'chērz*), **GARI** (1860–1932). An American artist, born in Detroit, educated in Düsseldorf and Paris, especially under Lefebvre and Boulanger. Some of his notable pictures are *Maternité*, in the Luxembourg, Paris; *The Family*, National Gallery, Berlin; decoration of the Congressional Library, entitled *Peace and War;* portrait of President Roosevelt, Smithsonian Institution of Washington; portrait of Charles Hutchinson, Art Institute, Chicago.

MEMLING or **MEMLINE, HANS** (about 1430–1495). A Flemish painter; born at Mainz on the Rhine; settled in Bruges. He was the Raphael of Flemish art. Reinach asks, "Is there a more fascinating achievement in all the domain of painting than the *Shrine of St. Ursula* at Bruges? If we except those of Van Eyck, what portraits are superior to Memling's?"

MENDELSSOHN-BARTHOLDY (*men'dels-sōn-bär-tol'dē*), **JACOB LUDWIG FELIX** (1809–1847). A German composer, who at 9 played before friends and at 11 had done some composing. Two sisters and a brother were also fine musicians. Some of his early works are a violin piece (1820), now called opus 4; an octet, now opus 20; a quartet for the pianoforte, an overture to *Midsummer Night's Dream* (1826), and an opera founded on *Don Quixote* (1827). In 1825 he visited Paris, where he knew the chief musicians and artists; in 1829 he made his first visit to England, and left a profound impression. After a tour of Scotland he produced his *The Hebrides*, better known now as *Fingal's Cave.* In 1832 he became conductor at Düsseldorf, and in 1841 kapellmeister to the King of Prussia. His *St. Paul* and *Elijah*, the latter of which he conducted at Birmingham in 1846, gave him tremendous fame in England. These are still among our greatest oratorios. From 1835 he conducted the famous Gewandhaus orchestra at Leipzig. Other notable compositions are the music to the 42d *Psalm*, the *Lobgesang*, and some extraordinary chamber music, which should be better known.

MENZEL (*men'tsel*), **ADOLF** (1815–1905). A German painter; born at Breslau; best known for his historical pictures and drawings illustrating the times of Frederick the Great and William I. Some of his best pictures are *The Forge* and *The Coronation of William I.*, the latter of which is independent and wonderfully life-like.

MERCIE (*mer-syā'*), **ANTONIN** (1845–1916). A French sculptor; born at Toulouse; won the Prix de Rome (1868). Among his best works are the famous

statue of Napoleon on the Vendôme Column; his *Gloria Victis*, bought by the French government; *William Tell* at Lausanne; monument of Thiers in Père Lachaise; and *Jules Ferry* at St. Dié.

MESDAG (*mes'dăch*), **HENDRIK WILLEM** (1831–1915). A Dutch painter of scenes of the sea, who was born at Groningen and lived mainly at The Hague, where his collection of paintings, given by him to the nation, is now housed in a special museum. He won a gold medal in the Paris salon, having been influenced by Israëls to abandon banking for art. *Après l'Orage* and *Une Soirée sur le plage de Scheveningen* are two of his greatest works.

METSU (*met'sü*), **GABRIEL** (1630–1667). A Dutch painter, influenced by his master, Gerard Dow, by Jan Steen, Rembrandt, and Franz Hals. Some of the early religious pictures are *Lazarus*, *Departure of Hagar*, and *Widow's Mite;* some of the realistic views are *Women at the Fishmonger's Shop* and *Market Place in Amsterdam*, which was his home for many years; and more sentimental pictures are *Music Lovers*, *Mother Nursing her Sick Child*, and *The Repast*. Metsu is noted for his varied interests.

MEUNIER (*mė-nyā'*), **CONSTANTIN** (1831–1905). Belgian sculptor and painter, who exhibited a cast called *The Garland* in 1851, but fell under the influence of Millet and others, turning to the life of workers. Some of his paintings were *The Tobacco Factory at Seville* and illustrations for a book on Belgium. After 1885 he gave all his attention to sculpture, some of his best pieces being *Puddler at the Furnace*, *The Smith*, *The Miner*, *An Old Colliery Horse*, *Fire Damp*, and *Maternity*.

MEYERBEER, GIACOMO (1791–1863). His original name was Jakob Meyer Beer. Having been noted as a pianist since he was nine years old, and a composer of two operas that failed to succeed, Meyerbeer turned in disappointment to Rossini and Italy, and produced a series of Italian operas that won an immense popularity. Later at Paris (1831) his *Robert le Diable* established the vogue of the florid, romantic musical piece for which he is best known. Next *L'Africaine* and *Le Prophète*, for which Scribe wrote librettos, added much to his fame. *Les Huguenots* and *L'Etoile du Nord* also for years attracted large audiences. Meyerbeer introduced Jenny Lind to Prussian audiences; he also did much to keep the music of Wagner before the public when the master himself was in exile.

MICHAELANGELO (*mī-kel-an'je-lō*) **(MICHELAGNIOLO BUONARROTI)** (1475–1564). An Italian painter, sculptor, architect, and poet, born of an old Florentine family, and at 13 overcame his father's opposition to becoming an artist. He studied with the Ghirlandaio brothers and learned much from earlier masters as well. Some of his first paintings are religious in subject. For about three years (1489–1492) he painted for Lorenzo dei Medici, and then spent a year at Bologna, and from 1496 to 1501 he was at Rome. Early statues are the magnificent *David*, a smaller one of the same subject, *St. Matthew*, *Madonna and Child*. In painting his greatest work is the decoration of the Sistine Chapel with a series of nine biblical scenes, unrivaled in their conception, daring and strength of execution. These and other works, some uncompleted, were made for Pope Julius II. Some of his great statues of a later day are the *Moses*, *Slaves*, *Christ*, *Victory*, a *Madonna and Child*, executed for the Medici family, *Evening* and *Morning*. Some of his later paintings are *The Entombment of Christ*, *The Last Judgment*, and the *Fall of Phaeton*. In poetry he wrote some noble sonnets, and in architecture he planned some of the buildings on the Capitol at Rome, the dome of St. Peter's, and numerous others, only a few of which were carried forth according to his designs.

MIGNARD, PIERRE (1610–1695). French painter, who lived for 22 years in Italy, but returned to Paris in 1652. Because of his opposition to Le Brun, Mignard had to confine himself to portraiture, since the great public works went to members of the Academy, of which his rival was the guiding genius. He painted Bossuet, Molière, Sévigné, Descartes, and many other celebrities. When Le Brun died Mignard succeeded to his honors and commissions, but enjoyed his change of fortune only five years before his death.

MILLAIS (*mil'ā*), **JOHN EVERETT** (1829–1896). English painter, who with W. Holman Hunt in 1848 founded the Pre-Raphaelite Brotherhood, in which they were soon joined by Dante G. Rossetti and others. Millais painted *Christ in the House of his Parents* as his first contribution, his object being to paint nature as they saw it. More imitative still is his *Isabella*, suggested by the poem of Keats. Some of the early pictures are *The Return of the Dove to the Ark*, *Mariana*, and *The Huguenot*. Millais illustrated works by Trollope, Tennyson, and Scott. Between 1871 and 1876 he painted a series of landscapes, some of which are *Scotch Firs*, *Fringe of the Moor*, and *The Sound of Many Waters*. He also painted a number of eminent persons.

MILLET (*mil-lay'*), **AIME** (1819–1891). A French sculptor; born in Paris. His *Ariadne* (1857) was bought for the Luxembourg. His masterpiece is the colossal *Vercingétorix* at Alise-Ste-Reine in Côte d'Or. *Apollo* at the Grand Opera and *Mercury* at the Louvre are well known.

MILLET (*mil'et*), **FRANCIS DAVIS** (1846–1912). An American artist and author; born at Mattapoisett, Mass.; studied at Harvard; studied art at Antwerp; war correspondent in the Russo-Turkish War (1877–1878) for the New York *Herald*, London *Daily News*, and *Graphic*, and for London and New York papers at Manila (1898); director of decorations at the World's Fair (1893); studied mural work under La Farge; helped to decorate Trinity Church, Boston; best work is *Between Two Fires* in the National Gallery, London. Millet also wrote some excellent stories and essays. He was drowned in the sinking of the *Titanic*.

MILLET (*mil-lay'*), **JEAN FRANCOIS** (1814–1875). A French painter. In 1849 he settled among the peasants of Barbizon, on the edge of Fontainebleau forest, and devoted himself to transferring their simple everyday life to his canvases, which he did with great truth of sentiment and subdued poetic charm. Of his paintings *The Angelus* was sold by auction in Paris, in 1889, for about $115,000. His *Sower*, *Peasants Grafting*, *The Gleaners*, *Waiting*, *The Sheep Shearers*, *The Man with the Hoe*, *Women Carding*, and *The Shepherdess and Flock* are his chief productions.

MILMORE, MARTIN (1845–1883). An American sculptor; born at Sligo, Ireland; studied sculpture with Thomas Ball in 1860; made several statues for Boston Horticultural Hall; modeled the Soldiers' Monument for Roxbury, Mass. (1867); the Soldiers' and Sailors' Monument for Boston Common (1877); busts of Pope Pius IX., Wendell Philips, Emerson, Sumner (in the Metropolitan Museum at New York), Grant, Lincoln, and Webster; and, with his brother, the granite sphinx in Mount Auburn Cemetery, Cambridge, Mass.

MILLS, CLARK (1815–1883). An American sculptor, born near Syracuse, N. Y.; specialized in colossal statues, such as the equestrian figure of Washington, for which the government paid $50,000, and Crawford's immense statue called *Liberty*, which he cast for the Capitol at Washington. His bust of Calhoun was purchased for the City Hall of Charleston, S. C., and his General Jackson for the Lafayette Square at Washington.

MITCHELL, MAGGIE (MARGARET JULIA) (1832–1918). An American actress; born in New York City; began acting at five; appeared as Julia in *The Soldier's Daughter* (1851). Her best rôles were Jane Eyre, Mignon, and Fanchon in *Fanchon the Cricket*, which last she played more than 2,000 times.

MODJESKA (*mō-jes'kä*), **HELENA** (1844–1909). A Polish actress; born in Cracow. She began to act in a traveling company in 1861. Four years later she made a great name at Cracow. She settled with her second husband near Los Angeles, Cal., to try farming, but the enterprise not succeeding she returned to the stage and won a complete triumph at San Francisco in 1877 as Adrienne Lecouvreur in English. Among her most successful rôles were Juliet, Rosalind, Beatrice, and the leading part in the *Dame aux camélias*. She returned to farming in California in 1895.

MONET (*mo-nā'*), **CLAUDE** (1840–1926). A French painter, one of the founders of the Impressionist School, turned from a military career to study under Gleyre. In 1870 he spent some time in England, after which he frequently illustrated new tendencies. Changes of light, influences of air, delicacy of color were his main motives, while he carried on the traditions of Turner, Corot, Degas, and Manet. Views of cathedrals, of the banks of the Seine, of London, of Pourville and neighborhood, and of Argenteuil are among his notable canvases.

MOORE, ALBERT JOSEPH (1841–1893). English painter, who has been called "the poet of drapery." Many of his pictures have strong men and women figures with luxurious backgrounds of colored dra-

peries and of flowers. He was the son of William Moore and brother of John C. and Henry Moore, all gifted artists. Some of his best works are the decorations of Coombe Abbey, pictures of *The Last Supper* and *The Feeding of the Five Thousand* at St. Alban's, Rochdale, and a representation of a Greek play at the Queen's Theatre at Long Acre. Some scriptural and nature studies were also well received.

MOORE, HARRY HUMPHREY (1844–1926). An American painter; born in New York City; studied with Gérôme in Paris and with Fortuny. Among his gorgeously colored pictures of oriental life are *The Gypsy Encampment, Granada, Moorish Water Carriers,* and *A Moorish Bazaar.*

MOORE, HENRY (1831–1895). English painter, born in New York, the brother of A. J. Moore, noted above. Like his brother he received preliminary training under his father, a portrait artist. For the first part of his life, under the influence of the impressionists, he made a series of landscapes and animals. Later he painted many fine scenes along the shore, such as *The Newhaven Packet, Catspaw off the Land,* and *Mount's Bay.*

MORAN (*mō-ran'*), **EDWARD** (1829–1901). An American painter; born at Bolton, England; came to America in 1844 and settled finally in Philadelphia; studied under James Hamilton and Paul Weber, then in London; noted for his marine work; elected A. N. A. (1873). Among his works are *Launching of the Lifeboat, Relief Ship Entering Havre, On the Narrows, Nations Paying Tribute to Liberty,* and 13 marine historical paintings, designed to illustrate the marine history of America from the beginning to the victory of Dewey at Manila Bay in 1898.

MORAN, PETER (1842–1914). An American etcher and painter; born at Bolton, England; brother of Edward Moran; studied with his brothers and in London; one of the founders of the New York Etching Club (1877); president of the Society of Etchers in Philadelphia. His works include *The Return of the Herd, Going to the Hunt, The Challenge, Wolves on the Buffalo Trail,* and *The Stable Door.*

MORAN, THOMAS (1837–1926). An American artist, the brother of Edward and Peter Moran, noted just above; studied with Hamilton, worked also in France and Italy, and was greatly influenced by Turner. In 1871 he accompanied the Hayden expedition to the Yellowstone and two years later went with Major Powell and party to the region along the Colorado. Some of his paintings, inspired by these trips, were *The Grand Cañon of the Yellowstone, Chasm of the Colorado,* both of which were bought for the Capitol by the government; and *The Mount of the Holy Cross. A Storm on the Coast of Easthampton* is a famous picture of an eastern scene.

MOREL-LADEUIL, LEONARDO (1820–1888). A French sculptor and goldsmith, who for many years was engaged by a firm of Birmingham, after he became unpopular among his fellows in France because he obtained direct from the government a commission to design the *Empire Shield.* Two of his great works, the *Milton Shield* and *Helicon Vase,* were highly prized, the first being bought by the English government, and the latter by persons of the court as a present for Queen Victoria.

MORETTO, IL (1494–1554). Italian painter, who was born and lived in Brescia, with brief intervals at Milan and Verona. For delicacy of light and shade and the ability to bring out the inner meaning of both scenes and portraits he is especially famed. Of his work still at Brescia are the *Christ Bearing the Cross, Vision of Moses,* and *Christ in the Home of Levi.* In the Johnson Collection of Philadelphia is the *Madonna and Donors;* in the Metropolitan, New York, are two of his pictures, a *Christ in the Desert* and an *Entombment.* His real name was Alessandro Bonvicino.

MORLAND, GEORGE (1763–1804). An English painter; born in London. Among his noted works are *The Gypsies, The Tea Garden, Inside of a Stable, Old Sportsman,* and *Dogs Fighting,* owned by the New York Historical Society; *Midday Meal* and *Weary Wayfarers* in the Metropolitan Museum of New York. Though Morland was always in debt, and frequently imprisoned, he found time to paint several hundred pictures, the best of which have to do with animals and rural views.

MORRIS, CLARA (1849–1925). Her real name was Morrison; in 1874 she married F. C. Harriott. She was born in Toronto, but at 17 entered a stock company at Cleveland, Ohio, and appeared first in New York under Augustin Daly (1870) in a version of Wilkie Collins's *Man and Wife.* During the next few years she gained immense fame as an actress of sentimental parts. After her marriage she turned to writing. *Life on the Stage* and *Life of a Star* throw no little light on the stage of the period.

MORRIS, WILLIAM (1861–1936). An American actor; born in Boston, Mass.; played (1875) with the Boston Museum stock company; acted with Augustin Daly, Madame Modjeska, and as Lieutenant Hawksworth in *The Girl I Left Behind Me;* in *The Lost Paradise* and *Under the Red Roe;* in partnership with Edward E. Rice (1901) in *When We were Twenty-one,* by H. V. Esmond.

MOSLER, HENRY (1841–1920). From the age of ten he lived in Cincinnati, where he studied illustrating by himself, and then acted as illustrator for *Harper's Weekly* at the front in the Civil War. Later he studied in Europe, and his *Le Retour,* exhibited at the Paris salon in 1879, was the first picture by an American to be bought for the Luxembourg gallery. He is represented in several American collections.

MOUNT, WILLIAM SYDNEY (1807–1868). An American genre painter; born in Long Island, N. Y.; successful in delineation of farm life and of negro character. Among his works are *Dance of the Haymakers, Music Hath Charms, Farmer's Nooning, Turning the Grindstone,* and *War News,* the last now being in the Metropolitan, New York.

MOWBRAY (*mō'brā*), **HARRY SIDDONS** (1858–1928). Born of English parents at Alexandria, Egypt, he was brought as an orphan by relatives to America, studied at West Point, and then went to Paris for training in art under Bonnat. His notable pictures are *Aladdin, The Last Favorite, Le Destin,* and *Evening Breeze.* Even better known was he as a mural decorator of the homes of J. Pierpont Morgan, Larz Anderson, and F. W. Vanderbilt, and of the Appellate Court House and University Club Library of New York; Federal Court, Cleveland; and Library at Washington, Conn.

MOZART (*mō-zärt'* or in German *mō'tzärt*), **WOLFGANG AMADEUS** (1756–1791). A German composer; composed short pieces at the age of six, and at seven gave concerts in Paris and London; distinguished for the universality of his genius. He gave artistic form to opera. His *Marriage of Figaro, Don Giovanni, The Magic Flute,* and *The Requiem Mass* are among the most successful of his 624 compositions. His C major or *Jupiter,* G minor, and E flat symphonies are the best of his 41 symphonies.

MULREADY (*mul'red-i*), **WILLIAM** (1786–1863). An Irish painter; born in Ennis, County Clare. Among his works are *Old Kaspar, The Rattle, The Carpenter's Shop and Kitchen, Idle Boys, Fight Interrupted, The Sonnet, Choosing the Wedding Gown,* and *The Seven Ages;* elected R. A. in 1816. Some later works are *Wolf and the Lamb, Dogs of Two Minds, Sonnet* and *First Love.*

MUNKACSY (*mōn'kä-chē*), **MICHAEL VON** (1844–1900). His real name was Michael Leo Lieb, but he took the name of his birthplace, Munkacs in Hungary. After some study at Arad, he settled in Düsseldorf in 1867 and in Paris five years later. His best-know works are *Milton Dictating Paradise Lost to his Daughters, The Death of Mozart,* and *Last Day of a Condemned Man.*

MURILLO (*mū-ril'ō*), **BARTOLOME ESTEBAN** (1617–1682). A Spanish painter of Seville, who began under Castillo, but later had to earn his bread by hasty works which gave him some facility. Coming under the influence of the great Velasquez, by 1644 he was able to interest the king in his progress, and four years later he married a wealthy lady. Freed from worry, he began a brilliant series of warm-toned paintings, such as the *Flight into Egypt,* probably his best-known work now, the *Nativity of the Virgin, Allegory of Faith, Return of the Prodigal,* and St. Elizabeth. Much of his work was executed for the Franciscan monks, including 18 paintings for the Convent de los Capuchinos. *The Young St. Thomas* is now in Cincinnati, *The Rose of St. Francis* is in Cologne, and the *Holy Family* is in the National Gallery of England. Besides his numerous religious pictures, he left some interesting studies of children.

MURPHY, JOHN FRANCIS (1853–1921). An American painter; born in Oswego, N. Y.; elected N. A. in 1887; won the second Hallgarten Academy prize with his *Tints of a Vanished Past* in 1885, and the Webb prize for the best landscape at the Society of American Artists in 1887. His *Autumn* in

the Metropolitan Museum is considered his best. His *Uplands—Morning* is noted for its color.

NASH, PAUL (1889–). British painter, whose pictures of scenes at the front in France during the World War won great admiration. He first exhibited in 1911, was an official artist during the foreign campaign, and later produced some interesting landscapes. Besides acting as teacher of design in the Royal College of Art, he also executed a number of able engravings and book illustrations.

NASMYTH (*nā'smith*), **ALEXANDER** (1758–1840). Scotch portrait and landscape artist, who at 16 began to illustrate the poetry of Allen Ramsey in London. After 1778 he was in great demand as a painter of portraits at Edinburgh, his native town. One of his best pictures is that of Burns. Later he devoted himself mainly to landscapes and to improving the estates of wealthy patrons.

NAST, THOMAS (1840–1902). An American artist; born in Landau, Bavaria. He is best known for his political cartoons, which were of great influence in the various political campaigns, and were effective in the exposure of the "Tweed ring." In 1902 he was appointed United States consul at Guayaquil, where he died of yellow fever. Nast first used the elephant, donkey, and tiger in political cartoons to signify the parties.

NEAGLE, JOHN (1799–1865). An American painter; born in Boston, Mass.; married the daughter of Thomas Sully, painter. His *Patrick Lyon at the Forge* in the Pennsylvania Academy is his best known. Among his portraits are those of Henry Clay, Dr. Thomas Parke, George Washington, and Gilbert Stuart.

NEAL, DAVID DAHLHOFF (1837–1915). An American painter; born at Lowell, Mass.; studied in Munich under Ainmüller (his father-in-law) and with Piloty and Wagner. Among his works are *The First Meeting of Mary Stuart and Rizzio, Cromwell Visits Milton* (in the Public Library at Cleveland), *Nuns at Prayer*, and portraits of Adolph Sutro, Rev. Mark Hopkins (at Williams College), and Whitelaw Reid.

NEILSON, LILIAN ADELAIDE (1848–1880). English actress, whose real name was Elizabeth Ann Brown, and who became famous for her emotional parts. Appearing first at Margate in 1865, by 1870 she was known in the English-speaking world, especially for her Juliet, and for Rebecca and Amy Robsart in adaptations of Scott's novels. She appeared at Booth's Theater, New York, in 1872 and four times afterward.

NETHERSOLE, OLGA (1870–). English emotional actress, who appeared first at Brighton (1887), acted as manager of different London theatres in turn, and of the Théâtre Bernhardt in Paris, playing in both cities some leading rôles. Important parts were Sapho in Fitch's play of that name, Paula in *The Second Mrs. Tanqueray*, and the heroine in *La Tosca*. Her first American appearance was in 1894.

NETTLETON, WALTER (1861–1936). An American painter; born in New Haven, Conn.; was graduated at Yale; studied in Paris under Lefebvre, Duran, Boulanger, and Harrison; settled in Stockbridge, Mass.; noted for his Breton landscapes and for his New England snow scenes.

NEUVILLE (*nē'vēl*), **ALPHONSE MARIE DE** (1836–1885). A French painter, mainly of battle scenes of the Franco-Prussian and Zulu Wars. Some of his best works are *The Fifth Battalion of Chasseurs, The Last Cartridges, Surprise at Daybreak*, and the *Despatch-Bearer*.

NEVADA, EMMA (1861–1940). An American soprano singer, born Emma Wixon at Austin, Nevada; hence her adopted name. After studying under Mme. Marchesi at Paris, she made her début at Her Majesty's Theatre, London, in 1880 as Amina in *La Sonnambula*. Some of her other operas were *Lucia di Lammermoor, Mignon, Martha*, and *Rigoletto*. In 1885 she made a tour of the United States, and in the same year married Dr. Raymond Palmer, an English surgeon, after which she lived in Europe, mainly in London and Paris.

NEVIN, ETHELBERT (1862–1901). An American composer; born in Vineacre, near Pittsburgh, Pa.; studied in Dresden under Von Böhme; returned and taught in Pittsburgh; studied in Berlin under Klindworth and with Bülow; taught in the music department of Yale University (1900). His *Water Scenes*, including the universally popular *Narcissus;* the suite *En Passant;* the *Tuscan suite;* and his songs *Lehn' deine Wang' an meine Wang', Rosemary, I' the Wondrous Month of May, 'T was April, Boris*, and *In Winter I Get up at Night*.

NEWELL, PETER, or **"SHEAF HERSEY"** (1862–1924). An American illustrator; born near Bushnell, Ill.; studied at the Art Students' League in New York; noted for his humorous drawings collected in *Topsys and Turvys, A Shadow Show*, and *Peter Newell's Pictures and Rhymes*. He illustrated Stockton's *The Great Stone of Sardis*, Twain's *Innocents Abroad*, and Bangs's *House-Boat on the Styx*.

NICOL (*nīk-ol*), **ERSKINE** (1825–1904). A Scottish painter of Irish life and character; born in Leith; lived in Dublin (1845–1849); settled in London (1862). Among his popular works are *Among the Old Masters, Both Puzzled, Paying the Rent* in the Vanderbilt collection in New York, *The Trio, Paddy's Mark* in the Corcoran Gallery, and *Interviewing their Member*.

NICOLL, JAMES CRAIG (1847–1918). An American marine painter; born in New York City; studied with M. F. H. de Haas and Kruseman van Elten; one of the jury at the St. Louis Exposition (1904); elected N. A. in 1885; noted for his surf pictures. Among his best are *Squally Weather, On the Newport Rocks, Sunlight on the Sea*, and *A Summer Surf*.

NIEHAUS (*nē'hous*), **CHARLES HENRY** (1855–1935). An American sculptor; born in Cincinnati, Ohio; studied at the McMicken School of Design there and at Munich, where he won a first prize with his *Fleeting Time*. Among his works are a statue of Washington on Race Street, Cincinnati, and another in the rotunda of the National Capitol; lived in Rome for a few years, where he did *The Scraper, or Greek Athlete Using a Strigil, Caestus*, and *Silenus;* lived in New York after 1885, where he executed a statue of William Allen for the National Capitol. Among his other notable works are the Garfield Statue in Cincinnati, *Mineral Wealth* and Lincoln in Buffalo, N. Y., Benjamin Harrison at Indianapolis, McKinley for the tomb at Canton, O., Francis Scott Key for Baltimore, and the Astor Memorial Doors for Trinity Church, New York.

NIELSEN (*nēl-sen*), **ALICE** (1876–1925). An American singer, who turned from light to grand opera, and won a distinguished position in both forms. She was born in Nashville, Tenn., educated in San Francisco, and first sang as Yum Yum in the *Mikado*, which was followed with parts in *Robin Hood, The Serenade*, and *The Singing Girl*. After study in Rome, she made her début in grand opera at Naples as Marguerite in *Faust*, appeared at Covent Garden, London, and throughout the United States, in various rôles, including *Figaro, Don Giovanni*, and *La Bohème*.

NIKISCH (*nīk'ish*), **ARTHUR** (1855–1922). Hungarian conductor, who made his appearance as a pianist when he was very young, after which he studied at the Vienna Conservatory (1866–1873). In 1877 he became assistant conductor, and two years later conductor of the opera at Leipzig. Then he led the Boston Symphony Orchestra (1889–1893). Directed at Budapest, Berlin, and finally at the celebrated Gewandhaus at Leipzig. He composed a symphony and much chamber music.

NILSSON (*nīl'sŭn*), **CHRISTINE** (1843–1921). A Swedish soprano singer; born at Wexiö; studied at Stockholm and Paris; made her début in Paris (1864) as Violetta in *La Traviata*, and became one of the foremost soprano singers; frequently visited the United States. Ophélie, Violetta, Elsa, Margaret, Mignon, Donna Elvira, and the Countess were her most famous rôles. In 1887 she married Count A. de Casa Miranda and retired from the stage.

NOLLEKENS (*nol'e-kenz*), **JOSEPH** (1737–1823). An English sculptor; born in London; lived for many years at Rome, where he executed his *Timocles before Alexander* and *Mercury and Venus Chiding Cupid*, and the busts of Garrick and Sterne; elected R. A. in 1772. Among his other works are Mrs. Howard's monument statue of Venus, and the monuments of Captains Manners, Bayne, and Blair in Westminster Abbey.

NORDICA (*nôr'di-kä*), **LILLIAN** (1859–1914). Born Lillian Norton at Farmington, Me.; married G. W. Young. She received her musical education in Boston, and under Sangiovanni in Italy. After singing at Crystal Palace in London and the Trocadero in Paris, she appeared in *La Traviata* at Brescia (1880). Some of her rôles in Europe were in *Faust, Rigoletto, Lucia di Lammermoor, Aïda, Les Huguenots, Don Giovanni*, and in Wagner parts. At the

Metropolitan Opera in New York, some of her appearances were as Elizabeth, Elsa, Brünnhilde, and Isolde. On the concert stage she was immensely popular for years. Nordica died in Java while on a world tour.

NOVELLO (*nō-vel'lō*), **VINCENT** (1781–1861). An English musician and publisher of music, of Italian and English parentage, who was born in London. After acting as organist in the Portuguese and the Spanish chapels, and at St. Mary's, Moorfields, he went to live at Nice in 1849. Though his musical compositions are numerous, particularly the sacred pieces, his main service was in introducing various great musicians to English audiences.

OCHTMAN, LEONARD (1854–1934). An American landscape painter; born in Zeeland, Holland; came to America in 1866; studied at the Art Students' League; won the landscape prize at the Brooklyn Art Club (1892), a medal at the World's Fair (1893), silver medals at the Pan-American (1901) and Charleston (1902), the Shaw prize at the Society of American Artists (1902), the Inness gold medal (1903), the Webb prize (1904), two gold medals at St. Louis (1904), and second prize at the Corcoran Gallery (1905); elected N. A. in 1904.

OFFENBACH (*of'en-bäk*), **JACQUES** (1819–1880). A musical composer, born at Cologne of Jewish parents. Conducted the Théâtre Français orchestra at Paris (1848–1855), and the Théâtre Comique in 1855. Wrote *Orphée aux enfers, La belle Hélène, Madam Favart,* and *Les contes d'Hoffmann,* which was produced in New York in 1908 by Hammerstein.

OLMSTEAD, FREDERICK LAW (1822–1903). American landscape architect, who with Calvert Vaux designed the plan chosen for Central Park of New York among 30 competitors, and he was invited to supervise the making of the park. Last he designed or improved many public grounds, such as Prospect Park of Brooklyn, Fairmount Park of Philadelphia, Mount Royal of Montreal, the Capitol grounds at Washington, and the grounds for the Word's Fair at Chicago. Many cities and several universities engaged his services; for Boston he planned an extensive series of parks. For California he directed the work of laying out Yosemite Park.

O'NEIL, JAMES (1849–1920). An American actor; born in Kilkenny, Ireland; brought to Buffalo (1850); studied acting in Cincinnati; appeared there and in St. Louis; noted for his presentations of Othello and other Shakespearean rôles. Later he excelled as Edmond Dantes in *Monte Cristo,* Virginius, Hamlet, and D'Artagnan in *The Three Musketeers.*

OPPER, FREDERICK BURR (1857–1937). An American illustrator, who was connected with *Leslie's* for three years and with *Puck* for 18, and then with the *New York Journal.* He was born in Ohio and gained first notice by his drawings for *Wild Oats,* afterward illustrating the works of Bill Nye, Mark Twain, and F. P. Dunne (Mr. Dooley). Some of his own books are *Our Antediluvian Ancestors, Happy Hooligan,* and *Alphonse and Gaston.*

ORCAGNA (*or-kä'nyä*), (c. 1310–c. 1368). An Italian artist who succeeded Giotto as the leading painter of Florence. Some of his best frescos are in the church of Ste. Maria Novella, representing scenes in the life of Mary, a conception of Paradise, and one of Christ, St. Peter and St. Thomas Aquinas, with attendant musicians. As a sculptor and architect he made a large marble tabernacle for the church of Or San Michele, which remains one of the noblest works of Italy. Using the methods of sculpture in painting, he raised his figures so that they stand out like statuary. His real name was Andrea di Cione, and he was also called Arcagnuola.

ORCHARDSON, WILLIAM QUILLER (1835–1910). A British painter; born in Edinburgh. Among his works are *The Challenge, The Duke's Antechamber, The Protector, The Bill of Sale, Queen of the Swords, Hard Hit, On Board H. M. S. Beerophon, Mariage de Convenance, After, Salon of Madame Récamier, The First Cloud, Her Mother's Voice, The Young Duke,* and *Reflections.* He was a most refined painter of genre and history.

OSTADE (*os-tä'dē*), **ADRIAEN VAN** (1610–1685). A Dutch painter who was born and died in Haarlem; his canvases are in almost every European collection, numbering several hundred. They are noted for fidelity in detail and grayness of tone, while most of his subjects show the simple life of the humble peasant. Besides a father sitting in state among his large family, a fine picture now in the Louvre, some notable paintings by Ostade are *Countryman Having his Tooth Drawn, Bagpiper, Nativity,* and a portrait of a painter.

OUTCAULT, RICHARD FELTON (1863–1928). An artist, creator of the Buster Brown series of illustrations. He was born in Lancaster, Ohio, educated in Cincinnati, joined the staff of the *New York Journal* in 1905, and later formed his own company in Chicago. Some of his creations were Hogan's Alley, the Yellow Kid, besides the various cartoons of Buster Brown, his dog Tige, and the only Mary Jane.

OVERBECK (*ō'ver-bek*), **JOHANN FRIEDRICH** (1789–1869). A German painter, at first under the influence of classical tradition at Vienna, but later with others the founder of a pre-Raphaelite group of artists who lived in austere simplicity in a Franciscan monastery at Rome. Most of his works show deep feeling. Besides frescoes of Joseph and his Brethren and decorations in several villas and pavilions, his chief works are *Christ's Entry into Jerusalem, Lubeck, Triumph of Religion in the Arts,* and *Incredulity of St. Thomas,* now in London.

PACHMANN (*päch'män*), **VLADIMIR DE** (1848–1933). Concert pianist, the son of a Russian professor at Odessa, who began to study the violin at six and the piano at ten, the latter under Dachs of Vienna. Though he first played for audiences in 1869, he continued study for several years; and by 1878, when he appeared in the Leipzig Gewandhaus Concerts, he was known as an exact and favorite performer. In 1882 he played in Vienna, Paris, and London, after which he toured the world at various times. As an interpreter of Chopin and as an informal artist, noted for his comments to the audience, he won distinguished attention.

PADEREWSKI (*pä-de-ref'skē*), **IGNAZ JAN** (1859–). Polish pianist, composer, and political leader, born in Podolia, then a province of Russian Poland. After study under Leschetizky, he played first in Vienna in 1887, in Paris two years later, and in London in 1890. In 1891 and at different times later he played in America to immense audiences. From 1920 to 1923 he played in both hemispheres. For originality of interpretation, keen insight, and great enthusiasm, together with technical mastery, he won unbounded fame. As a composer he was known especially for his concerto in A minor, a symphony in B minor, and other works for the pianoforte and orchestra. During the World War he gave all his energies toward assisting Poland. He helped raise a Polish legion, trained in Canada, went to Poland with a British Mission in 1918, and for a time acted as premier, independent of parties. At the Peace Conference and later he did valuable service in helping secure recognition for Poland.

PAGANINI (*pä-gä-nē'nē*), **NICOLO** (1784–1840). A phenomenal Italian violinist; born at Genoa; gave his first concert in 1793; began his professional tours in 1805. His success was unbounded in Austria, Germany, London, and Paris.

PAGE, WILLIAM (1811–1885). An American artist, who studied for the ministry, and then turned attention to painting, becoming a pupil of Herring and S. F. B. Morse. While residing in Rome (1849–1860) he painted portraits of his friends, the Brownings, and of other distinguished persons. Returning to New York in 1860, he had many prominent sitters, including J. R. Lowell, Charles Sumner, H. W. Beecher, President Grant, and Charlotte Cushman.

PAINE, JOHN KNOWLES (1839–1906). An American composer, for many years a professor at Harvard, where he acted as orchestra conductor and composer of fine music. Theodore Thomas played his first symphony in 1876. Paine wrote music for many public occasions, such as for the Centennial of 1876, using Whittier's poem, for the Columbian Exposition in 1893 the *Columbus March,* and for the St. Louis Exposition the *Hymn of the West.* Some of his other compositions are the *Oedipus Tyrannus;* overtures for *The Tempest* and *As You Like It;* an opera, *Azara;* an oratorio, *St. Peter,* many smaller pieces of chamber music, cantatas, and works for the piano.

PALESTRINA (*pä-les-trē'nä*), **GIOVANNI PIERLUIGI DA** (1526–1594). Italian composer of sacred music, born in Palestrina; hence his name. After study in Rome, he became composer to Julius III. about 1550, a singer in the Sistine chapel (1555), a choir master at St. John Lateran, and later a choirmaster at St. Peter's. Some of his greatest works are the music to *Lamentations, Missa Pro Defunctis,* and three other books of masses, *Song of Solomon,* several

volumes of motets, litanies, madrigals, and magnificats. His influence on various forms of music has been profound and wide-spread.

PALLADIO (*päl-lä'dē-ō*), **ANDREA** (1518–1580). An Italian architect, designer of many fine churches, palaces, and country estates. A great student of ancient art and literature, he wrote a work on architecture which was a classic in Europe for many years. Some of his buildings are the villa of Capra, the Capuchin church and several palaces on the Grand Canal in Venice, the Porti Palace and Theater at Vicenza, where much of his life was spent.

PALMA, JACOPO, or PALMA VECCHIO (about 1480–1528). An Italian painter; born in Venice; the foremost of the second class of great Venetian artists. His *Adoration of the Shepherds* in the Louvre is one of the most charming idyls of Venetian art.

PALMER, ERASTUS DOW (1817–1904). An American sculptor; born at Pompey, N. Y.; began to cut cameos in Albany, N. Y. (1846); exhibited his marble bust, *Infant Ceres* (1851), followed by *Faith*, *Mercy*, portrait busts of Alexander Hamilton and Washington Irving, and statues of the *Sleeping Peri*, *The White Captive*, and *The Angel of the Sepulchre* in the Rural Cemetery at Albany.

PALMER, WALTER LAUNT (1854–). Son of the preceding and born at Albany, N. Y.; studied in Paris and elsewhere. He won many medals and prizes, including awards at the World's Fair (1893) and Paris Exposition (1900), and became noted for snow scenes. Two of his best canvases are *Across the Fields* and *Lake George*.

PARKER, HORATIO WILLIAM (1863–1919). An American composer and musician, born in Boston, educated in Munich, and elected Battell Professor of Music at Yale in 1894. *Hora Novissima*, an oratorio, was frequently performed in the United States and in England at Worcester, the first American piece so honored. His *Mona*, an opera, won the $10,000 prize offered by the Metropolitan Opera Company (1911), and another called *Fairyland*, the Women's Clubs Federation prize of a like amount (1914). The *Wanderer's Psalm* was sung at the Herford festival in England in 1900, and a cantata, *Morven and the Graal*, at the centennial of the Handel and Haydn Society at Boston in 1915.

PARMIGIANO (*pär-mē-jä'nō*), **FRANCESCO MAZZUOLI** (1504–1540). An Italian painter; born at Parma; studied in Rome; lived for a time in Bologna, then returned to Parma. Among his works are *Baptism of Christ*, *St. Margaret*, *Cupid Fashioning his Bow*, and *Vision of St. Jerome*.

PARRATT, WALTER (1841–1924). An English organist and interpreter of the compositions of Bach, a large number of which he is said to have learned before he was ten. He was an organist at Magdalen College, Oxford, at St. George's Chapel, Windsor, for ten years professor of music at Oxford (1908–18), and dean of the faculty of music at London University (1916–20). In 1892 he was created a knight.

PARRHASIUS (*pär-ā'shus*) (flourished 400 B. C.). A gifted painter of ancient Greece; born at Ephesus; went to Athens and became the rival of Zeuxis. He was the contemporary of Socrates.

PARRISH, MAXFIELD (1870–). An American artist and illustrator of magazines, who was born in Philadelphia, studied there at the Academy of Arts and under Howard Pyle. Some of his awards were honorable mention at Paris in 1900, Silver Medal at Buffalo in 1901, and gold medal of the Architectural League of New York in 1917.

PARRY, CHARLES HUBERT HASTINGS (1848–1918). English composer, professor at Oxford (1899–1908), and successor to Sir George Grove as director of the Royal College, London (1894). He specialized in fine choral works and in writing music for poems by Milton, Tennyson, Pope, and other English authors. Among his notable books on music are *The Art of Music*, *Style in Musical Art*, and many important articles in Grove's *Dictionary of Music and Musicians*.

PARSONS, ALBERT ROSS (1847–1933). An American musician and archaeologist; born at Sandusky, Ohio; studied at the Leipzig Conservatory and with Kullak, Moscheles, and Tausig. His songs *Night has a Thousand Eyes* and *Three Fishers* have been very popular. His contributions to musical literature include a translation of Wagner's *Beethoven*, *The Science of Pianoforte Practice*, *The Secret of Wagner's Genius*, and an essay on *Parsifal*.

PARSONS, ALFRED (1847–1920). English painter, noted for his beautiful views of flowers and gardens, besides many interesting landscapes. *When Nature Painted all Things Gay* was bought by the Chantry Bequest (1887) for the Tate Gallery. He made illustrations for Wordsworth's *Sonnets*, *The Warwickshire Avon*, and with F. D. Millet (q. v.) for *The Danube from the Black Forest to the Black Sea*.

PARTRIDGE, BERNARD (1861–). British artist, knighted in 1925, who spent some time at the University of London, joined a firm of architects and then turned to stained-glass designing. In later years he gained a notable following for his illustrations in *Punch*, having connected himself with that journal in 1891.

PARTRIDGE, WILLIAM ORDWAY (1861–1930). An American sculptor, who lectured on fine arts at George Washington University, Washington, D. C. (1897–1903), and before other bodies. Some of his statues are Samuel J. Tilden, Riverside Drive, New York; Thomas Jefferson, Columbia University; Pietà, St. Patrick's Cathedral, New York; Pocahontas, Jamestown, Va.; Shakespeare, Lincoln Park, Chicago; and a series of busts of poets for the Boston Public Library. Besides two or three novels, he wrote *Art for America*, *Technique of Sculpture*, and *The Song Life of a Sculptor*.

PASCAL (*pas'kal*), **JEAN LOUIS** (1837–1920). A French architect, pupil of Gilbert, Questel, and the École des Beaux-Arts. Having won the Grand Prize of Rome (1866), in 1870 he became inspector of works at the Louvre, and later a member of art committees. In some respects his best work was as a teacher of artists from all over Europe and America. Yet he designed some noble monuments, including those to Henri Regnault and President Carnot, and the imposing National Library at Paris.

PAS'TA, JUDITH (1798–1865). A famous Italian operatic singer; born near Milan, of Jewish birth. Her celebrity lasted from 1821 to 1832, after which she retired into private life. She had a voice of great compass.

PATINIR, JOACHIM DE (c. 1475–1524). Flemish painter, who specialized in landscapes containing small figures of persons. Some of his pictures were from a point of view taken from a hill, with a mass of foliage in the foreground, rocks in the middle distance, and plenty of details. Only a few of his works are extant, including two of the *Flight into Egypt*, one at Antwerp and another at Madrid; the *Baptism of Christ* at Vienna; and *Temptation of St. Anthony* at Madrid.

PATTI (*păt'ē*), **ADELINA** (1843–1919). Eminent singer, born in Spain, of Italian parentage; brought early to America by her parents, who were both operatic performers. Possessed of a wonderful soprano voice, which was trained by Strakosch, who married an older sister, she first appeared in *Lucia di Lammermoor* in New York in 1859. In London she appeared in *La Sonnambula* in 1861, and then in all the music centers of the world, in one unbroken succession of artistic triumphs. Having divorced her first husband, the marquis de Caux, to whom she was married in 1868, she married the tenor Nicolini (q. v.) in 1885, and after his death in 1898 the Baron Cederström, a naturalized Englishman of Swedish birth. For the last 30 years of her life she appeared little in public, but loved to entertain her friends at her home in Wales. On behalf of the Red Cross, she made a final public appearance in 1914.

PAUR, EMIL (1855–1932). American conductor of Austrian birth and musical education, who came to this country as conductor of the Boston Symphony Orchestra in 1893, after holding similiar positions at Cassel, Mannheim, and Leipzig. He conducted the New York Philharmonic Society (1898–1900), German works at the Metropolitan (1900–1902), in Europe again for two years, and then at Pittsburgh, Pa., where he directed the Symphony Orchestra. He composed a number of songs, sonatas, and concertos.

PAVLOVA, ANNA (1885–1931). A Russian dancer, at an early age the first dancer at the imperial ballet school of Leningrad, and in 1910 a great favorite in London. In London she was seen in *Le Cygne* at the Palace Theatre; in Paris in *Les Sylphides* and *La Nuit Egyptienne*; and in New York in *Coppelia*, when she achieved an immense vogue.

PAYNE, JOHN HOWARD (1791–1852). An American actor, dramatic author, and writer of *Home Sweet Home*, who had his first play performed in New York when he was 15, and in 1809 he first appeared at the same theatre (the Park) as Norval in *Douglas*. After

various successes in his own land, he was engaged for Drury Lane of London, and for a time lived in Paris as a translator for the same playhouse. In all he adapted more than 50 dramas for the English stage. His *Brutus,* with Kean in the title rôle, ran at Drury Lane for 50 nights in 1818. *Clari; or the Maid of Milan,* an opera, first sung in May 1823, contained his celebrated song, which was first rendered by Ann Maria Tree. He died in Tunis, Africa, while serving a second time as American consul.

PEALE, CHARLES WILSON (1741–1826). American portrait artist, known mainly for his portraits of Washington; born in Maryland, studied at Annapolis, under Copley in Boston, and West in London. His portrait done in 1772 is the earliest known picture of Washington, and this was followed by the celebrated one of 1778 which Peale copied a number of times. Several portraits of famous men are now in Independence Hall, Philadelphia. *Christ Healing the Sick at Bethesda* is one of his best subject pictures.

PEALE, REMBRANDT (1778–1860). Son of the preceding, after study under his father, West in London, and others in Paris, began with a portrait of Washington, a copy of which (made in 1823) is now in the Capitol at Washington. For this picture Washington gave him three sittings. Some of his portraits are those of Jefferson, Mrs. Madison, Commodore Perry, the sculptor Houdon, and an equestrian of Washington, which is now in Philadelphia. In 1825 he became president of the American Academy of Fine Arts, succeeding John Trumbull.

PEEL, PAUL (1860–1892). A Canadian figure painter; born in London, Ontario; studied at the Pennsylvania Academy and in Paris under Gérôme and Constant. His gold medal picture *After the Bath* was bought by Hungary for the gallery at Budapest. His *Two Friends* is in Buckingham Palace, London.

PENNELL (*pen'el*), **JOSEPH** (1860–1926). An American illustrator, etcher, and author; born in Philadelphia; studied there; illustrator on the *Century* magazine for many years since 1881; visited Italy in 1883 to make illustrations for Mr. Howell's *Tuscan Cities;* married Elizabeth Robbins (1884), who later collaborated with him in a number of books, such as *A Canterbury Pilgrimage, Our Sentimental Journey through France and Italy, Two Pilgrims' Progress, Our Journey to the Hebrides,* and a *Life of James McNeill Whistler* at his own request.

PERUGINO (*pā-rō-jē'nō*), **PIETRO,** or **PIETRO VANNUCCI** (1446–1524). An Italian painter; born in Città della Pieve. He was employed for 10 years in the Sistine Chapel and the Stanze of the Vatican, and on his return to Perugia opened a school and had Raphael among his pupils. His best works are the *Pietà* in the Pitti Palace and *Christ Giving the Keys to Peter* in the Sistine Chapel (the rest of his frescoes there being destroyed to make way for Michelangelo's *Last Judgment*). His fresco in the Stanz of the Vatican, *Stanza del Incendio,* was the only one spared by Raphael when he repainted the walls.

PERUZZI (*pā-röt'sē*), **BALDASSARE** (1481–1536). Italian architect and painter, educated at Rome through the help of a Sienese banker, for whom he designed on the banks of the Tiber the Farnesina, a fine villa, which was decorated by Raphael. Some of his other works are the designs for St. Peter's, not executed, frescoes in the Capella Pozzetti, and the Palazzo Massimi; and at Siena the city fortifications, fresco in the Castel Belcaro, and in the church of Fonte Giusta. After 1535 he lived again in Rome.

PHIDIAS (*fid'i-as*) (490–432 B. C.). The greatest of Greek sculptors and architect of the Parthenon. He was never excelled in expressing the ideal majesty of the human form, and his *Zeus* at Olympia is counted among the wonders of the world.

PHELPS, SAMUEL (1804–1878). English actor, who for more than 20 years at Sadler's Wells Theatre in London produced many notable plays, including a score of Shakespeare revivals. He made his first London appearance as Shylock at the Haymarket in 1837, later supported Macready at Covent Garden, and acted at other playhouses.

PICASSO (*pē-käs'sō*), **PABLO** (1881–). Cubist painter in Spain, the son of an artist of Barcelona; settled in Paris in 1903. He became a leader among the impressionists, and then developed work combining both painting and sculptural ideas, along with those of Georges Braque. Orginality, cleverness of execution, and feeling are his chief characteristics, apart from the form of his paintings.

PICKNELL, WILLIAM LAMB (1852–1897). An American painter; born at Hinesburg, Vt.; studied at Rome, Paris and in Brittany under Inness, Gérôme, and Wylie; came back in 1882. His works include *Route de Concarneau, Coast of Ipswich, Bleak December, Among the Olives,* and *Route de Nice.*

PINSUTI (*pēn-sū'ti*), **CIRO** (1829–1888). An Italian composer; born near Siena; taught singing in England (1848); at the Royal Academy of Music at London (1858–1885); wrote the operas *Il mercante di Venezia* and *Mattia Corvino,* a *Te Deum,* nearly 300 songs, and numerous pianoforte compositions.

PINTURICCIO (*pēn-tū-rēk'kē-ō*) (1454–1513). Italian painter, whose real name seems to have been Bernardino Di Biagio. Celebrated for his fine work in fresco. Some of his chief works are *Adoration of the Shepherds,* Rome; *The Dispute of St. Catherine,* in one of five rooms of the Vatican built by Pope Alexander VI; decorations for the cathedral library at Siena, in a remarkable state of preservation, and several notable commissions for Cardinal Piccolomini, afterward Pope Pius III.

PISANO (*pē-zä'nō*), **NICCOLA** (c. 1220–c. 1278). Italian sculptor and architect of Pisa, of whom little is known apart from his works. He designed the pulpit for the baptistry at Pisa, in which both Gothic and classic ideas enter, illustrating scenes in the life of Christ. Other works are the great pulpit at Siena, a relief over the door at San Martino at Lucca, and a fountain in the piazza near the cathedral at Perugia. Giovanni, his son, became a celebrated architect and sculptor, collaborating with his father in his later works, and executing alone the Campo Santo Cemetery at Pisa, the ivory madonna in the cathedral at Pisa, and churches in Florence and Arezzo.

PISANO, VITTORE (1397–1455). He was familiarly known as Pisanello. Little is known of his early life or education in art. He worked with Fabriano on the doge's palace at Venice, made various designs for many noble patrons, including costumes, houses, harness for their horses, and portraits. Of his paintings that now remain, the National Gallery of London has the *Miraculous Stag Appearing to St. Eustace;* the Louvre has a portrait of a noble lady; and the Pellgrini Chapel in Verona has a fresco of *St. George Mounting His Horse.*

PLANQUETTE (*plän'ket*), **ROBERT** (1850–1903). A French composer; born in Paris; wrote the popular operas *Cloches de Corneville* or *Bells of Corneville, Le chevalier Gaston, Rip Van Winkle, The Old Guard, Paul Jones, Le Talisman,* and *Man'zelle Quat'sous.*

PLATTE, CHARLES ADAMS (1861–1933). American painter and architect, educated at the National Academy of Design and in Paris under Boulanger and Lefebre. Some of his paintings include *Early Spring, Snow, The Market Ship at Low Tide,* and *On the Connecticut River.* Turning to architecture, he designed the Freer Art Gallery of Washington, D. C.; the library for the Connecticut College for Women at New London; and the Lowell Memorial Fountain in New York City. In *Italian Gardens* (1892) he explains the results of study in Italy.

POLLAIUOLO (*pol-lä-yō-ō'lō*), **ANTONIO** (1429–1498). Italian painter, one of two gifted brothers, and uncle of Simone, all artists of Florence. Antonio became a sculptor, painter, and worker in metals, noted for his service in enamelling. Some of his noted pictures are *Martyrdom of St. Sebastian* in the National Gallery, London; *Labors of Hercules* in the Uffizi of Florence; and *The Young Warrior* in the Florence Museum. Tradition says he was perhaps the first to use dissection in his study of the human form.

POLYCLITUS (*pol-i-klī'tus*) (fifth cent. B. C.). A Greek sculptor; born at Sicyon and lived in Argos; studied along with Myron and Phidias. Among his chief works is the *Doryphorus* or spear bearer, known as the *Canon* or chief type of a perfect male figure. A copy of it found in Pompeii is now in Naples. His *Diadumenos,* an athlete binding a fillet around his head, is revealed to us by a copy now in the British Museum. His gold and ivory statue of Hera was made for the Heraeum at Argos. He designed the theater at Epidaurus. Recent excavations have discovered fragments of his work at Olympia.

POORE, HENRY RANKIN (1859–1940). An American painter; born in Newark, N. J.; studied in New York, Philadelphia, and at Paris under Lumenais and Bouguereau; instructor in the Pennsylvania Academy. Among his works are *Close of a City Day, Fox Hounds, Hounds in Winter* and *Clearing Land.* Poore also wrote books on art criticism, including *Pictorial Com-*

position and the Judgment of Pictures, The Conception of Art, and *New Tendencies in Art.*

POTTER, PAUL (1625–1654). Dutch animal painter, who in his short life produced 175 pictures, most of which are true to life. *Young Bull,* a life-sized picture, is a celebrated work of his early days. Of his later works, most of them being small, are his *Orpheus* and some fine animal figures.

POUSSIN (*pö-san'*), **NICHOLAS** (1594–1665). French painter, born in Normandy, who studied the works of Raphael at Rome, and was long called "the Raphael of France." In landscape and historical figures he specially excelled. Some of his greatest works are *Triumphs of Flora, Massacre of the Innocents, Labors of Hercules, Triumph of Truth, Triumph of Pan,* and *Vision of St. Paul.*

POWELL, MAUD (1868–1920). American violinist, born in Illinois, educated in Chicago and European centers, making her first public performance in Berlin in 1885. In the United States she acted as soloist in several orchestras and won a great host of admirers in various concert tours. No violinist did more to educate the public in appreciation of the best in music. In 1904 she married H. Godfrey Powell of London. She died in Pennsylvania while on a concert tour.

POWERS, HIRAM (1805–1873). An American sculptor; born in Woodstock, Vt. In 1835 he went to Washington. Two years later he was enabled to go to Italy to study his art, and he resided in Florence till his death. There he produced his statue of *Eve,* which excited the admiration of Thorwaldsen, and in 1843 the still more popular *Greek Slave,* of which six copies in marble, with cast copies innumerable, were produced. Among the other works, the chief were *Proserpine, Il Penseroso, A Californian, An American,* and a bust of Washington for the state of Louisiana, of Calhoun for South Carolina, and of Daniel Webster for Boston, as well as of John Q. Adams, Andrew Jackson, Marshall, Van Buren, and other distinguished Americans.

POYNTER (*poin'tar*), **EDWARD JOHN** (1836–1919). British painter, who first exhibited in 1861, and was elected an N. A. in 1876. Among his own works are *Atalanta's Race* and *Visit to Aesculapius.* He is best known, however, as the director of the Art School which is now the Royal College of Art at South Kensington, and as director of the National Gallery of British Art (Tate Gallery), which was united with the National Gallery. In his edition of the *Illustrated Catalogue of the National Gallery,* completed in 1900, every picture is reproduced, and his *Lectures on Art* were famous. On becoming successor to Sir John Millais as president of the Royal Academy, he was knighted (1896), and six years later was created a baronet.

PRADILLA (*prä-thēl'yä*), **FRANCISCO** (1847–1921). A Spanish painter; born at Villanueva de Gallego. Among his best works are *The Rape of the Sabines, Mad Johanna Following the Coffin of Philip the Fair,* and *The Surrender of Granada to Ferdinand and Isabella*—a magnificent canvas.

PRATT, SILAS GAMALIEL (1846–1916). An American composer, who organized the Apollo Club in Chicago (1872), and conducted a season of opera there. In 1884 he made a tour of Europe, using his own compositions for his programs; in 1895 he established a school in New York City. Some of his works are the operas *Zenobia,* and *Triumph of Columbus,* and *Lucille,* besides several symphonies, cantatas, and songs.

PRAXITELES (*prak-sit'e-lez*), (360–280 B. C.). A celebrated Greek sculptor; executed several fine statues, in bronze and marble, of Bacchus, a satyr, Venus, and Apollo. Of his work the *Hermes of Olympia* is the only original example extant. He excelled by the grace, tenderness, and finish of his works. He was esteemed as second to Phidias only.

PROCTOR, ALEXANDER PHIMISTER (1862–). American sculptor and painter of animals; born in Ontario, Canada, but lived mainly in the United States, except for five years in Paris for study. In early life he saw much of the animals of the Rocky Mountains; in 1893 attracted attention by his statues at the Columbian Exposition in Chicago. Received various medals. He is represented by *Panthers* in Prospect Park, Brooklyn; by lions for the McKinley Monument, Buffalo; heroic bison and tigers, Washington; Princeton tigers; Princeton University; equestrian statue of the circuit rider at Salem, Ore.; *Col. Roosevelt as Rough Rider* at Portland, Ore. and Minot, N. D.; and by *Pioneer Mother,* an equestrian group at Kansas City, Mo. Paintings of his are in the Corcoran Art Gallery, St. Louis Gallery, and Metropolitan Museum.

PRUD'HON (*prü-dôn'*), **PIERRE** (1758–1823). French painter, educated by the monks of Cluny, and after 1778 in the studio of Wille, the engraver, in Paris. Having won a prize, he studied in Rome, and came to be regarded as the French Correggio. Notable works are *Truth and Wisdom* at the Louvre, *Diana and Jupiter, Crime Pursued by Vengeance and Justice,* all in the Louvre at present.

PUCCINI (*pöt-chē'nē*), **GIACOMO** (1858–1924). Italian composer of operas, born of a family noted for generations as professional musicians. After a course at the Milan Conservatry, he produced *Edgar* at La Scala in 1889. This was followed by *Manon Lescaut,* a real hit, *La Bohème,* perhaps his most successful opera, *La Tosca, Madame Butterfly,* and *Fanciulla del West,* produced in New York as *The Girl of the Golden West.*

PURCELL (*pûr'sel*), **HENRY** (1659–1695). Eminent English composer, trained in singing and music under Henry Cooke, Pelham Humphrey, and John Blow, whom he succeeded as organist at Westminster in 1680. In addition two years later he became organist at the Chapel Royal. Some of his first compositions are *12 Sonatas, Swifter, Isis,* the *St. Cecilia* odes, *Te Deum,* and *Jubilante.* An opera, *Dido and Aeneas,* is one of the best compositions of the age, classical in manner, and some of Purcell's music is beyond any reproach. Some of his other work was the music to Betterton's *Diocletian,* and incidental music for several of Dryden's plays, and songs and music for *The Fairy Queen,* which was adapted from Shakespeare's *Tempest.*

PUVIS (*pü-vē'*) **DE CHAVANNES, PIERRE** (1824–1898). A French painter; born at Lyons; studied under Henri Scheffer. Among his works are *Peace, War, Labor, Repose, Ave Picardia Nutrix, Ludas pro Patria,* five panels from the *Life of St. Geneviève* at the Pantheon in Paris, and nine fine panels in the Boston, Mass., Library, including *The Muses Saluting the Spirit of Enlightenment* and the *Arts* and *Sciences.*

PYLE, HOWARD (1853–1911) An American illustrator and writer who established a school of art at Wilmington, Del., his birthplace, where instruction was free. In 1907 he became a member of the National Academy of Design. Besides many paintings of great merit showing colonial and pioneer life, he wrote several books of fiction, and painted *The Battle of Nashville* in the Capitol at St. Paul, Minn., and *The Landing of Carteret* for the court house at Newark, N. J.

QUERCIA (*kwär'chä*), **JACOPO DELLA** (c. 1374–1438). An Italian sculptor; born at Quercia, near Siena; first to use a wooden framework covered with plaster in making large statues; best work is seen in a door of San Petronia at Bologna, decorations in Santa Maria del Fiore, and the marble fountain in the market place at Siena.

RACHEL (*rā'shel*), **ELISA** (1821–1858). A great French tragédienne; born in Switzerland, of Jewish parents; made her début in Paris in 1837, and soon became famous as the interpreter of the principal characters in the masterpieces of Racine and Corneille, her crowning triumph being the representation, in 1843, of Phèdre in the tragedy of Racine. Some of her other parts were those in Duport's *La Vendéenne,* based in part on Scott, and on *Adrienne Lecouvreur.*

RACHMANINOFF (*räch-mä'nyē-nof*), **SERGEI VASSILIEVITCH** (1873–). Russian composer and pianist, educated at the conservatories of St. Petersburg and Moscow. His opera, *Aleko,* in 1892 won a gold medal at Moscow, where it was successfully produced the following year. Beginning in 1899 he won immense applause at London, Vienna, and other capitals, but in 1903 returned to Moscow as a professor of piano. Next he lived in Dresden, visited the United States first in 1909, and settled there permanently in 1918. Of his numerous compositions, a few of the most celebrated are the C sharp minor prelude; the operas, *The Avaricious Knight* and *Francesca da Rimini;* the symphonic poem, *The Isle of Death;* and various works for the piano and for the chorus.

RACKHAM (*rak'am*), **ARTHUR** (1867–1939). English illustrator, who in 1919 was elected master of the Art Workers' Guild, having been made an associate of the Society of Beaux-Arts in 1912. Some

of his book illustrations, now well known, are for *Rip Van Winkle, Alice in Wonderland,* Dickens's *Christmas Carol,* Grimm's *Fairy Tales,* Hawthorne's *Wonder Book, Midsummer Night's Dream,* and *Mother Goose.* His wife, Edythe Starkie, also attained fame as a painter.

RAEBURN (*rā'burn*), **HENRY** (1756–1823). Celebrated Scotch portrait painter, who began life as an apprentice to a goldsmith, by whom he was introduced to David Martin, the great portraitist of Edinburgh. In his 22d year he painted the picture of the widow of Count Leslie, who soon became Raeburn's wife. After study at Rome, he began to paint in Edinburgh (1787). Some of his famous sitters were Lord President Dundas, Dr. James Hutton, Hugh Blair, and Sir Walter Scott. By 1800 he was the leader of the Scotch school of artists; and in 1815 he was made a member of the Royal Academy, and a knight in 1822. Three hundred of his paintings were exhibited in 1876 by the Royal Scottish Academy.

RAEMAEKERS (*rā'mä-kėrs*), **LOUIS** (1869–). A Dutch cartoonist, who early engaged in painting landscapes and portraits, and then turned to posters and cartoons. From 1908 he made a series of important political cartoons, which rose to a climax of fury during the World War, when he published in the *Amsterdam Telegraf* a series against the German Allies. He held successful exhibitions in various cities of Holland. His *Cartoon History of the War* (1919) shows the nature and extent of his drawings.

RAFF, JOSEPH JOACHIM (1822–1882). Swiss composer, who lived for nine years near Liszt at Weimar (1850–1859). He married the actress Doris Genost, and taught music for years at Wiesbaden. Some important works are the symphonies *In der Alpen* and *Zur Herbstzeit;* overtures, *Jubel* and *Macbeth;* operas, *King Alfred* and *Dame Kobold.*

RAMEAU (*rà-mō'*), **JEAN PHILIPPE** (1683–1764). A French composer; born at Dijon; wrote on harmony and, settling in Paris, composed operas, his first successful one, *Hippolyte et Aricie,* and his best, *Castor et Pollux.* His work laid the foundation for a rational science of harmony. He is now especially noted for his discoveries of inverted chords and his perfection of a natural harmony upon a fundamental bass. Of his critical works, *Traité de l'harmonie* and *Nouveau système* best set forth his theories.

RAPHAEL (*raf'ā-el*), **SANZIO** (1483–1520). The greatest of modern painters; born in Urbino, Italy. He received his earliest instructions from his father, Giovanni Santi, after whose death, in 1494, he probably became the pupil of Timoteo Viti. In 1504 he visited Florence and lived there till 1508, when he was called to Rome by Pope Julius II. and employed to paint the chambers of the Vatican. Raphael spent the rest of his short life at Rome. In the numerous works, frescoes, and oil paintings of the unrivaled master, three styles are distinctly recognizable. The first is the "Umbrian," the second "Florentine," and the third style "Roman," and is peculiarly Raphael's own—that which constitutes him the greatest of painters. Its supreme excellence is the equable development of all the essential qualities of art, composition, expression, design, coloring. Among Raphael's oil paintings are the *St. Cecilia* at Bologna; the famous *Madonna di San Sisto,* now in the Dresden Gallery; the *Spasimo di Sicilia,* now at Madrid; and the *Transfiguration,* his last work. His drawings are very numerous, and are to be found in most of the public and private museums of America and Europe. Raphael, who had occupied himself with architecture as well as painting, was charged, on the death of his friend, Bramante, in 1514, with the direction of the building of St. Peter's. Raphael died at Rome, in the height of his fame, on his thirty-seventh birthday.

RAUCH (*rôch*), **CHRISTIAN DANIEL** (1777–1857). An eminent Prussian sculptor; born in Waldeck; patronized by royalty; influenced at Rome by Thorwaldsen and Canova; resided chiefly in Berlin; executed statues of Blücher, Dürer, Schiller, and others, as well as busts. His masterpiece is a colossal monument in Berlin of Frederick the Great.

RAVEL, MAURICE (1875–1937). French composer, who from the time he won the second Grand Prix de Rome in 1901 rose steadily until he stood at or near the top of his profession. Some of his greatest works are the string quartet in F, *Introduction and Allegro* for four instruments, *Spanish Rhapsody* for the orchestra, *Miroirs, Sonatine, Valses nobles, La Valse,* and a ballet *Daphnis and Chloe,* besides many pieces for the pianoforte.

REDFIELD, EDWARD WILLIS (1869–). American painter, who was born in Delaware, and educated in Philadelphia and in Paris under Bougureau and Fleury. Numerous prizes and medals were awarded him, and he is represented in many galleries, including the Art Institute of Chicago, Carnegie Institute of Pittsburgh, Academy of Fine Arts of Philadelphia, the Luxembourg of Paris, Corcoran of Washington, Peabody Museum of Baltimore, and Metropolitan of New York. For his winter scenes he became celebrated, notable illustrations being the *Brook in Winter, The Old Bridge,* and *February,* the best of which was placed in the Luxembourg by the French government.

REGNAULT (*rēh-no'*), **HENRI** (1843–1871). Son of a celebrated French chemist, he exhibited two portraits in the Salon of 1864, gained the grand prize two years later with his *Thetis,* and in Rome came under Spanish art influences. He was killed while serving in the Franco-German War of 1870. Other notable pictures are *Judith, Salome, Execution without Hearing under the Moorish Kings,* all of which show a developed sense of colors, indicating that Regnault might have become one of the greatest artists of his age.

REHAN (*rē'an*), **ADA** (1860–1916). Her real name was Crehan. Being brought from Ireland by her parents, she appeared first on the stage in 1874 at Newark, later acted in several minor troups, and in 1879 joined the Augustin Daly players in New York. In this company she became the star in many adaptations from the German, and in various old plays like the *Country Girl, Hunchback,* and most celebrated in Shakespeare revivals, such as *The Taming of the Shrew* and *As You Like It.*

REID, GEORGE AGNEW (1861–). A Canadian artist; born near Wingham, Ontario; studied under Harris at Toronto and Thomas Eakins at Philadelphia; worked under Constant, Lefèbvre, and others in Paris. His *Foreclosure of the Mortgage,* a medal winner at the World's Fair (1893), and his panels in the City Hall of Toronto are among his chief works.

REID, ROBERT (1863–1929). An American figure and mural painter; born at Stockbridge, Mass.; a pupil of William M. Chase and of Boulanger and Lefèbvre in Paris. His designs in the Congressional Library, the Appellate Court House, the Paulist Fathers' Church in New York, and in the State House of Massachusetts, where he painted three large panels representing *James Otis Delivering his Speech against the Writs of Assistance, Paul Revere's Ride,* and *The Boston Tea Party.*

REMBRANDT VAN RIJN (*rem'brant vän rīn*) (1606–1669). Celebrated Dutch painter, born in Leyden where he lived till 1631, after which he moved to Amsterdam, and one of the greatest colorists of all time in his later period. He was eminent in subject pictures and especially in portraiture. Though he was a prolific artist, no doubt, the exact number of his paintings varies from 988 listed by Groot (1916) to 48 claimed by John C. Van Dyke (in *Rembrandt and his School*) as by the master himself alone. In his early manner light tints of gray and green predominate; in the last dark browns, blacks, and deep reds. Several of his best portrait scenes contain his wife, Saskia, who inspired him until her death in 1642. Great works of the earlier group are *St. Paul in Prison, Samson in Prison* (one of several based on the life of this hero), *Simeon in the Temple, Flight of the Angel,* and *Christ as the Gardner.* Some of the best of his later manner are the wonderful self-portrait (1640), now in the English National Gallery, *Christ Healing the Sick,* the *Night Watch* (containing 29 life-sized figures), *Slaughtered Ox,* now in the Louvre, *The Anatomy Lesson,* now at the Hague, *Landscape with Ruins, Windmill, John the Baptist Preaching,* and *Adoration of the Magi,* now in Buckingham Palace.

REMENYI (*ray-mānē'yeh*), **EDOUARD** (1830–1898). An Hungarian violinist; born in Heves, Hungary. In 1854 he visited London, where he was appointed solo violinist to Queen Victoria; in 1860 returned to Hungary, where he attained great distinction. In 1878 he came to the United States, where he spent much of his time and gave many concerts.

REMINGTON, FREDERIC (1861–1909). An American artist and author; born in Canton, N. Y. He was one of the most conspicuous of American artists in "black and white." His *Broncho Buster, The Wounded Bunkie,* and his stories illustrated by his own drawings, *Pony Tracks, Crooked Trails, Frontier Sketches, Sundown Leflare,* and *John Ermine of the*

Yellowstone, are among the more notable of his many fine works.

RENOIR, FIRMIN AUGUSTE (1841–1919). French painter of varied abilities, influenced at first by the Impressionists, and later sought to secure great freedom in form, even by the aid of the study of architecture. Monet, Courbet, Corot, and others influenced his sense of color. Some of his subjects are *The Box, The Terrace, Rowers' Luncheon*, and the *Bathers*.

RENWICK, JAMES (1818–1895). An American architect; born in New York City; constructed the Croton Reservoir; studied under Upjohn; designed St. Patrick's Cathedral in New York (1858–1883), Vassar College, Grace and Calvary churches in New York, and the Smithsonian Institution and the Corcoran Gallery in Washington.

RESZKE (*dĕ resh'ke*), **EDOUARD DE** (1855–1917). Operatic bass singer of Polish birth and training; brother of Jean De Reszke, noted below. In 1876 he first appeared in Paris, where he was soon acclaimed one of the greatest singers of the day in range and power of voice. Several tours of the United States met with considerable success.

RESZKE, JEAN (1850–1925). Operatic singer, born in Warsaw, Poland; educated in Italy. His first appearance in Venice, London, and Paris in 1874 was not an unqualified success. Later he reappeared, after further training and study, this time as a tenor instead of a baritone, and at once attained a wide reputation at Madrid in *Robert le Diable*. In Wagnerian parts, such as Siegfried, Tristan, and Lohengrin, in *Le Cid* and other rôles, he was long famous. From 1904 to his death he engaged in teaching.

REYNOLDS, JOSHUA (1723–1792). Great English portrait painter, who "filled England with the ghosts of her noble squires and dames." He was born in Devon, received some education from his father, studied under Hudson of London for two years, and later went to Italy. While in Rome he caught a cold, which left him permanently deaf. After 1752 he lived in London, where he established a club with Johnson, Burke, Garrick, Sterne, and Bishop Percy, most of whom he painted. In portraits of single persons he stands with Gainsborough. In the United States, the Metropolitan, New York, possesses 14 of his pictures; the New York Public Library has *Mrs. Billington as St. Cecilia;* the Huntington Library, San Marino, Calif., has *Mrs. Siddons as the Tragic Muse;* the Boston Museum has *Kitty Fisher* and *Sir Thomas Mills;* and private collectors have a score of others. Following Reynolds' election as president of the new Royal Academy, the king knighted Reynolds in 1769. Sir Joshua delivered many lectures on art, included now in his *Discourses*.

RIBE'RA, JESEPE DE (1588–1656). A Spanish painter; born near Valencia; indulged in a realism of a gruesome type; had Salvator Rosa and Giordano for pupils.

RICHARDS, WILLIAM TROST (1833–1905). An American marine painter; born in Philadelphia; a pupil of Paul Weber; studied also in Florence, Rome, and Paris; noted for his painting of surf scenes. Many notable examples of his work are in the several galleries of the United States.

RICHARDSON, HENRY HOBSON (1838–1886). American architect, born in Louisiana, educated at Harvard, studied and practiced for a time in Paris (1860–65), his family having lost their all in the Civil War. Then he settled in New York, moved to Boston in 1878, and there designed the buildings which made him a leader in his generation and after. Some of them are Trinity Church, Boston; Sever and Austin Halls, Harvard University, Cambridge; changes in the Capitol at Albany, N. Y.; the county buildings of Pittsburgh; the Chamber of Commerce of Cincinnati; and the Field Building of Chicago.

RICHTER (*rish'tĕr*), **HANS** (1843–1916). Hungarian musical conductor, interpreter of Wagner and of other great composers, and a leader in popularization of German opera. He was born of musical parents at Raab, studied five years at Vienna, conducted the National Opera at Budapest, and then for 25 years at Vienna. In 1885 he began to direct the festival held every three years at Birmingham, and in 1900 began to conduct the Hallé orchestra at Manchester. One of his most celebrated accomplishments was a series of Wagner performances at Drury Lane, London, in 1892. Richter was noted for his intimate knowledge of each instrument in the orchestra and for his prodigious memory.

RICKETTS, CHARLES (1866–). English artist and designer of fine books; in 1889 he became joint editor of the *Dial;* and in 1896 founded the Vale Press, the publications of which he designed until 1904. He is represented by *The Plague* in the Luxembourg and by *Don Juan* in the National Gallery. Among his writings are *The Prado and its Masterpieces* and *Titian*.

RINEHART, WILLIAM HENRY (1825–1874). An American sculptor; born in Carroll County, Md.; studied in Italy and eventually settled in Rome. His *Chief Justice Taney* at Annapolis: *Atalanta, Latona and her Children, Diana, Endymion*, and *Rebecca* in the Corcoran Gallery; and his masterpiece, *Clytie Forsaken by Apollo* in Baltimore, are his chief works; left his property to assist young sculptors. The fund amounts to $100,000.

RISTORI (*rĭst'ŏ-rē*), **ADELAIDE** (1822–1906). Italian actress of great ability and fame. She appeared on the stage at 14 as Francesca in Pellico's tragedy, at 18 played as Mary Stuart in Schiller's famous version, and became a member of the Sardinian and of the ducal company of Parma. In 1846 she married the marchese del Grillo, who died in 1861. France gave her a wonderful ovation in 1855, despite partisanship in favor of the great Rachel at the time. Before her retirement in 1885 Ristori had made four tours of the United States. Combined with theatrical genius, she made a profound study of historical characters like Mary of Scotland and Queen Elizabeth. Her *Studies and Memories* (1888) throw valuable light on her art and the stage of her period.

RITTER, FREDERIC LOUIS (1834–1891). An American composer; born in Strassburg; pupil of Hause in Strassburg and of Kastner in Paris; settled in Cincinnati, Ohio, in 1856; organized the Cecilia Society and the Philharmonic Society; conductor of the Arion Society in New York (1861); professor of music at Vassar College (1874); wrote five symphonies and more than 100 songs.

RIVE-KING, JULIE (1859–). An American pianist; born in Cincinnati, Ohio; studied with William Mason in New York and with Reinecke and Liszt in Germany. For 20 years she played with the leading orchestras; composed some piano pieces that have been popular.

RIVIERE (*rē-vy-ar'*), **BRITON** (1840–1920). An English painter; born in London; noted as a faithful painter of animals. His *Sympathy* in Holloway College and six pictures in the Tate Gallery are among his best works. Besides exhibiting at the Royal Academy each year after 1863, he drew many illustrations for *Punch* and similar periodicals, becoming a member of the Academy in 1881 and ten years later a D. C. L. at Oxford.

ROBBIA (*rob'bē-ä*), **ANDREA DELLA** (1437–1528). Nephew and pupil of Luca della Robbia and noted for his sculptures in terra cotta and for his medallion of infants for the foundling hospital at Florence. He is represented in the Metropolitan Museum of New York by a fine retable of the *Assumption*. Many reliefs of the Madonna and Child were finished by him, each one having something original. Five of his sons worked for him in his numerous reliefs, retables, medallions, and similar works at Florence and Pistoia.

ROBBIA (*rob'bēä*), **LUCA DELLA** (1399–1482). Florentine decorative artist, uncle of Andrea della Robbia just noted. In early life he completed many important works in bronze, marble, and other materials, including the singing gallery in the cathedral at Florence. Other important works are five reliefs for the campanile, ten panels for the cathedral, a bronze door of wonderful beauty and skill, a marble tomb for the bishop of Fiesole, and medallions of the Four Evangelists in a chapel in S. Croce. Though he was not the first to ornament terra cotta in sculpturing, he greatly extended and perfected the process, especially in polychrome, and this is now called Della Robbia ware. Many of his medallions in this style are now in the South Kensington Museum, London.

ROBERTS, HOWARD (1843–1900). An American sculptor; born in Philadelphia; studied under Joseph A. Bailly and with Dumont in Paris. His *Fulton* in the National Capitol, *Lot's Wife, Hypatia*, and other statuettes are among his best known works.

ROBESON, PAUL (1898–). Negro actor and singer, who was born in New Jersey, was graduated at Rutgers College with highest average scholarship, besides being a great athlete,—all-American end for two

years. He completed a law course at Columbia University (1923), but turned to the stage in *Taboo* (1922), *All God's Chillun's Got Wings, Emperor Jones,* and *The Black Boy.* In 1925 he played in London, the season following again in New York, and in 1928 returned to Europe. His singing of the negro spirituals in London and Paris aroused a great deal of enthusiasm.

ROBINSON, THEODORE (1852–1896). An American artist; born at Irasburg, Vt.; studied with Gérôme and Duran in Paris and with Monet; one of his best pictures—*Hudson River Canal*—was rejected when offered as a gift to the Metropolitan Museum in New York. A storm of protest followed. His *Winter Landscape* was accepted. His work was too impressionistic for the academic standard which obtained at the time.

ROBSON, STUART (1836–1903). An American actor; born at Annapolis, Md.; appeared first in Baltimore; played Captain Crabtree in *Black-eyed Susan* and in *Our Boarding-House,* Bronson Howard's *The Henrietta, She Stoops to Conquer, Oliver Goldsmith,* and others. He was associated with William H. Crane (1877–1889).

RODIN (*rô-dăn'*), **AUGUSTE** (1840–1917). French sculptor, employed for six years in a Paris studio, and then acted as assistant to Van Rasbourg in Brussels, after which he launched out for himself in a series of original works, greatly praised by some, greatly condemned by other critics. His *Man with a Broken Nose* (1864) first gained attention, followed by *The Bronze Age, Victor Hugo,* and *Portrait of Garnier.* For twenty years he worked at intervals on his gigantic *Portal of Hell,* suggested by a scene in Dante. Some of his other works are *Bastien-Lepage, The Burgesses of Calais, Contemplation,* and *Le Penseur,* presented in 1904 by Ernest Beckett to the British Nation. In 1900 his *Statue of Balzac,* in its preliminary plaster form, was rejected by the commission of the Society of Men of Letters, which had ordered it. Yet in the same year the city of Paris erected a building to house his principal works. Rodin gave several of his statues to the museum at South Kensington, England, including his *John the Baptist, Age of Bronze,* and *Fallen Angel.*

ROGERS, RANDOLPH (1825–1892). An American sculptor; born in Waterloo, N. Y.; studied with Bartolini in Rome, where he spent much of his life. His most remarkable works include the bronze doors in the National Capitol with the eight panels of scenes from the life of Columbus; *The Angel of the Resurrection* for the tomb of Colonel Colt at Hartford; figures of Marshall, Nelson, and Mason on the Washington Monument at Richmond, Va.; the bronze statue of Lincoln in Philadelphia; *The Genius of Connecticut* for the Capitol at Hartford; and *Seward* in Central Park, New York.

ROMNEY, GEORGE (1734–1802). An English portrait painter; born at Dalton, Lancashire; settled in London and became a rival of Reynolds in popularity. He painted men and women of the day, especially Emma, Lady Hamilton, whom he depicted in a long series of portraits. He was never admitted to the Royal Academy. Some of his pictures are *Death of General Wolfe, Mrs. Yates as the Tragic Muse, Infant Shakespeare Attended by the Passions, Milton and his Daughters,* and *Newton Making Experiments with the Prism.* His fame rests, however, on his portraits.

ROOT, GEORGE FREDERICK (1820–1895). An American musical composer and organist, born in Massachusetts. He attained a great vogue as the author of music, and sometimes the words, of sentimental and patriotic songs, like *The Battle Cry of Freedom, Tramp, Tramp, Tramp, Just before the Battle, Mother,* and *There's Music in the Air.* More ambitious works are the cantatas *Daniel, Pilgrim Fathers, The Haymakers,* and *The Flower Queen,* for which Fanny J. Crosby, the blind poet, wrote the words, as she did also for *There's Music in the Air.*

ROPS (*rō*), **FELICIEN** (1833–1898). Belgian painter and engraver, born at Namur, and began as a humorous illustrator while still in the Universtiy of Brussels. In all he executed about 600 engravings, a number of fine water colors like *Le Scandale, Une Attrapade,* and *Tentation de St. Antoine,* and illustrated many literary works. Preëminent in engraving, Rops is fine in technique and thought, and nearly perfect in the use of dry-point.

ROSA (*rō'zä*), **SALVATOR** (1615–1673). Italian painter of Naples, who also attained some fame as an actor and poet. For a time he executed many battle scenes, then turned to rough and wild landscapes peopled by strange beings, and finally turned to more romantic works still. He lived at Rome, then at Florence, and again at Rome in his last years. Among his characteristic works are the *Battlepiece,* now in the Louvre; *Saul and the Witch of Endor,* also in the Louvre; *Oath of Catiline,* now in the Pitti Gallery; and *Mercury and the Dishonest Woodman.*

ROSA, CARL AUGUST NICHOLAS (1842–1889). English musical manager and violinist, born in Germany, his original name being Rose. In 1867 he married the celebrated soprano, Madame Parepa, who died in 1874. Then Rosa organized a company to make popular in English various operas of different languages. During his life and even afterwards the Rosa Opera Company did much to encourage and train young artists.

ROSENTHAL (*rō'zen-tăl*), **MORITZ** (1862–). An Austrian pianist, student of Mikuli at Lemberg, which was his birthplace, of Joseffy at Vienna, and of Liszt at Weimar and Rome. He made public appearances at European capitals at 13, finally acted as court pianist in Austria and Roumania, and made six tours of the United States, the last being in 1906. Some compositions for the piano are *Romanza, Papillons, Carneval de Vienne.*

ROSENTHAL, TOBY EDWARD (1848–1917). An American painter; born in New Haven, Conn.; studied in San Francisco under Henri Bacon and Arriola, and under Piloty in Munich, where he afterward lived. Among his works are *Morning Prayers in the Bach Family, Elaine, The Trial of Constance Beverly,* and *A Dancing Lesson during the Empire.*

ROSSETTI, DANTE GABRIEL (1828–1882). English painter and poet, of a distinguished family of poets and artists. With Millais, Holman Hunt, and others Rossetti belonged to the Pre-Raphaelite Brotherhood, a group of English painters who looked for inspiration to the age before Dante. Some of his best pictures are *The Girlhood of Mary, Virgin* (1849), *Dr. Johnson at the Mitre, Beata Beatrix* (an idealized portrait of his wife), *Dante's Dream,* and the Celebrated *Blessed Damozel* (1877). Much of his painting is mystical, dreamy, and ethereal. Rossetti's tall ladies in unusual attitudes aroused both inordinate admiration and mirthful disdain. For other details of his life and poetry, see the DICTIONARY OF AUTHORS.

ROSSINI (*ros-sē'nē*), **GIOACHINO** (1792–1868). A celebrated Italian composer of operatic music; born at Pesaro. His operas were numerous, of a high order, and received with unbounded applause, beginning with *Tancred,* followed by *Barber of Seville, La gazza ladra, Semiramis, William Tell,* etc. He composed a *Stabat Mater,* and a *Mass* which was given at his grave.

ROUSSEAU (*rō-sō'*), **PIERRE ETIENNE THEODORE** (1812–1867). Gifted painter of the Barbizon group, friend of J. F. Millet for many years. Some of his smaller early works were received by the Paris exhibition, but most were rejected, because of their romantic and unusual type. Many of these are now highly regarded,—such as *La Descente des vaches, The Chestnut Avenue, The Marsh in the Landes,* and *The Edge of the Forest.*

ROUSSEAU, VICTOR (1865–). Belgian sculptor, a director of the Brussels City Academy, and a resident in England during the World War, where he designed the monument expressing the gratitude of Belgium to England. Some of his earlier works are *Les Soeurs de l'Illusion, Démeter,* and *Maturité.*

RUBENS (*rōō'benz*), **PETER PAUL** (1577–1640). The greatest of the Flemish painters; born at Siegen, in Westphalia; went with his widowed mother in 1587 to Antwerp, where he sedulously cultivated the painter's art and early revealed his masterly gift of coloring; went to Italy, and for a number of years was in the service of the duke of Mantua, who encouraged him in his art and employed him on a diplomatic mission to Philip II. of Spain; executed at Madrid some of his finest portraits; returned to Antwerp in 1609; completed in 1612 his masterpiece, *The Descent from the Cross* in Antwerp Cathedral. With the aid of assistants he painted the series of 24 pictures now in the Louvre, illustrating the principal events in the life of Marie de' Medici during 1628–1629. Diplomatic missions engaged him in Spain and at the English courts, where his superabundant energy enabled him to execute many paintings for Charles I.

RUBINSTEIN (*rö'ben-stīn*), **ANTON GREGOR** (1830–1894). A Russian musician; born at Wechwotyneez, Kherson; in 1848 settled in St. Petersburg as teacher of music, where he succeeded in getting a musical conservatory founded and became its director. In 1872 he came to the United States and had an enthusiastic reception. He ended his concert tours in 1886. As a pianist he held the highest rank, being usually reckoned the greatest since Liszt. He ceased playing in public some time before his death, which occurred in St. Petersburg, Russia.

RUCKSTUHL, FREDERICK WELLINGTON (1853–). An American sculptor; born at Breitenbach, Alsace. His parents brought him to St. Louis, Mo. (1854); studied in Paris. His works include *Evening* in the Metropolitan Museum in New York; *Mercury Leading the Eagle of Jupiter* in St. Louis; *Solon* in the Congressional Library; statue of General Hartranft in Harrisburg; *Victory* on the Soldiers and Sailors' Monument at Jamaica, N. Y.; heads of Franklin, Goethe, and Macaulay on the façade of the Congressional Library; *Wisdom* and *Force* on the Appellate Court of New York; and *Gloria Victis* on the Confederate Monument at Baltimore. He wrote *Great Works of Art and What Makes them Great.*

RUDE, FRANCOIS (1784–1855). A French sculptor; born at Dijon; gained the Grand Prix (1812). His *Mercury, Young Neapolitan Fisherman,* and the trophy on the Arc de Triomphe de l'Etoile are among his best known works.

RUFFO (*rōōf'fō*), **TITTA** (1877–). Baritone singer, born at Pisa, and educated at the Conservatory of St. Cecilia, Rome, and under Cassini of Milan, after the Conservatory advised him to think of some other profession. Persisting, he went to South America, where he gained some success, and was met by a triumph on his return to Italy. In 1912–13 he sang in the United States; during the World War he served by choice in the Italian ranks; and afterward returned to America, where he was engaged by the Chicago Opera Company and the Metropolitan of New York.

RUSSELL, ANNIE (1869–1936). An American actress; born in Liverpool, England; appeared when a child on the stage at Montreal, Canada; played in *Pinafore;* joined the Madison Square company and played in *Esmeralda, Elaine,* and *May Blossom;* played *The Royal Family, Miss Hobbs,* and *The Girl and the Judge* (1898); played Puck in *A Midsummer Night's Dream* at the Astor Theatre (1906). Later in various revivals of Shakespeare, Sheridan, Goldsmith, and others she won a notable hearing.

RUSSELL, HENRY (1812–1900). English author of music to more than 800 songs, including the very popular *Cheer, Boys, Cheer* and *A Life on the Ocean Wave.* Appearing on the concert stage as a mere child, he completed his education finally at Bologna and Naples. For a number of years he toured the Canadian provinces and the United States (1833–41), and was inordinately celebrated. One of his entertainments, called *The Far West,* greatly increased immigration to the western states and provinces.

RUSSELL, SOL SMITH (1848–1902). An American actor; born in Brunswick, Me.; a drummer boy in the Union army; joined Daly's company (1874); starred in *Edgewood Folks, Peaceful Valley, A Poor Relation, A Bachelor's Romance,* and *The Hon. John Grigsby.*

RUYSDAEL (*rois'dayhl*), **JACOB VAN** (1628–1682). A Dutch painter of landscapes, who lived most of his life in Haarlem. Little is known of his early life or training, but in 1659 he was given the freedom of Amsterdam, where he died in an almshouse. He is one of the greatest painters of foliage, effects of clouds, and forests. Among his fine pictures are *The Pool in the Wood,* now at Leningrad; the *Castle of Bentheim,* the *Cornfield* and the *Travellers,* the last two of which are etchings.

RYDER, ALBERT PINKHAM (1847–1917). A gifted American painter, whose works were placed on special exhibition by the Metropolitan Museum, New York, in 1918. Some of his great canvases are *Jonah and the Whale, Forest of Arden, The Flying Dutchman, Tempest, Macbeth,* and *Lowlands near Highbridge.*

SAINT-GAUDENS (*sant-gâ'denz*), **AUGUSTUS** (1848–1907). An American sculptor, the son of a French father and Irish mother, and born in Dublin. He was early apprenticed to a cameo cutter in New York and studied at Cooper Union and the Academy of Design. Shortly before he left for study in France, he completed a bust of his father; he remained abroad for five years, the last three in Italy. After 1873 he lived mainly in New York. In statuary *Silence* and *Hiawatha* were executed in Rome; *Lincoln* stands in Lincoln Park, Chicago, one of the nation's noblest monuments; the Adams Memorial (1891), often called the finest work in art that America has produced, stands in Rock Creek Cemetery, Washington, D. C.; *Deacon Chapin* or *The Puritan* is in Springfield, Mass.; the Shaw Memorial is on state-house hill in Boston, showing Robert G. Shaw as a colonel of colored troops in the Civil War; and *General Sherman* led by a winged *Victory* stands at the entrance to Central Park, New York City. His *Amor Caritas* was purchased by the French government. St. Gaudens made many interesting low reliefs of friends, including Bastien-Lepage, the artist, Robert Louis Stevenson, William M. Chase, Jacob H. Schiff, and Kenyon Cox. By many he is considered the greatest sculptor of America. His son, Homer St. Gaudens, became director of art at the Carnegie Institute, Pittsburgh, where he built up a great collection of noble art objects.

SAINT SAENS (*sän sön'*), **CHARLES CAMILLE** (1835–1921). Eminent French composer and musician, more successful in symphonic poems and smaller pieces than in his operas, though his *Samson et Dalila* has been justly popular. He was a pupil of Halévy in Paris, organist at the Madeleine for 16 years (1861–77), and won a prize for his first opera *La Princess jeune.* Some later operas are *Henry VIII., Proserpine,* and *Las Barbares.* Two of his other operatic compositions are the *Oratorio de Noël* and *Le Lyre et la Harpe.*

SALOMON, JOHANN PETER (1745–1815). A German violinist and composer, who was born in Bonn, and is chiefly remembered for his interpretation of Haydn, whose *Twelve Grand Symphonies* he produced in London at his Philharmonic Concerts. He made his first English appearance at Covent Garden in 1781; known as a fine solo and quartet player. Buried in Westminster Abbey.

SALVINI (*säl-vē'nē*), **TOMMASO** (1829–1915). An Italian tragedian; born in Milan. In 1849 he won great distinction in the revolutionary war. He scored success in Brussels and Madrid; visited the United States in 1873 and England in 1875. After another visit to the United States in 1880, and to Great Britain in 1884, he retired from the stage to enjoy a life of leisure in his villa near Florence (1890). Among his rôles were Romeo, Hamlet, Othello, the leading parts in Racine's and Corneille's plays, of Voltaire's *Zaïre,* and Alfieri's *Merope* and *Saul.*

SANDHAM, HENRY (1842–1910). A Canadian painter; born in Montreal; studied under J. A. Fraser and in Paris; lived for a time in Boston, Mass., then settled in Toronto (1890). His *Battle of Lexington, Founding of Maryland,* and portrait of Sir John A. McDonald are his chief works.

SANSOVINO (*sän-sō-vē'nō*), **JACOPO** (1486–1570). Italian sculptor and architect, whose family name was Tatti, but he took the name of his art teacher. For a time he remained in Florence, after a period in Rome, then returned to the latter, and finally fled to Venice during the wars. Some of his statues are a marble *Madonna and Child,* a colossal *Neptune* and *Mars,* both now in the ducal palace of Venice, and the bronze doors of the sacristy of St. Mark's. Yet he is best known for his many beautiful buildings at Venice, such as the public library, the mint, Palazzo Manin, and the church of S. Martino.

SARASATE Y NAVASCUES (*dā sä-rä-sä'tā ē nä väs-kö-äs'*), **PABLO MARTIN MELITON DE** (1844–1908). Celebrated Spanish violinist, a student of Alard at Paris, and a concert violinist when he was 16. The next year he first played in London; later he visited many lands, including the United States in 1889. For purity of tone and skill of execution he was one of the great artists of modern times.

SARGENT, JOHN SINGER (1856–1925). A painter of American parentage, born in Florence, and lived in Paris and London most of his life, with occasional visits in the United States. At 18, after much travel with his parents, he entered the studio of Carolus-Duran, gaining an honorable mention (1878) for his first picture. After a visit in Spain, he began as a portrait painter of independent and exact methods. Some of his early works, notably *Madame Gautreau,* now in the Metropolitan at New York, aroused a great storm; but Sargent was always impervious to blame or praise, refusing to read any criticism of his paint-

ing. Some of his distinguished patrons were the Duke of Connaught, the Duke of Portland, Duchess of Sutherland, several crowned heads, Coventry Patmore, Henry James, and Ellen Terry as Lady Macbeth. The Metropolitan Museum, New York, and the Boston Fine Arts Museum contain several of his finest works. From 1890 to 1916 he worked at intervals on the magnificent *History of Religion* of the Boston Public Library, a task involving much research and historical study. Decorations for the Boston Museum and the Memorial Chapel at Harvard University also occupied much of his late years. As a portrait painter of insight, clever interpretation, and fine technique he stands with the best of modern times in England and America.

SARTAIN (*sär-tān'*), **JOHN** (1808–1897). An American artist; born in London, England; came to the United States in 1830 and was one of the first to introduce mezzotint engraving. He was the author of a large number of engravings for book illustration, and engraved many historical paintings; designed the monument to Washington and Lafayette in Monument Cemetery, Philadelphia, and published interesting personal reminiscences.

SARTAIN, WILLIAM (1843–1924). Born in Philadelphia, Pa.; son of John Sartain; studied under Bonnat in Paris; first picture exhibited at Royal Academy in London (1875). His *Lucia, An Arab Café, Narcissus* in Smith College, *In the Hackensack Valley, The End of Day,* and *The Sudden Shower* are notable.

SARTO, ANDREA DEL. See under ANDREA DEL SARTO.

SCHONBERG, ARNOLD (1874–). Austrian composer, at first a romantic in compositions for stringed instruments, but later he turned to Bach and the early classic authors. Notable works are *Verklärte Nacht* (in its final form for string orchestra and six soloists), a chamber symphony (the second), and a quartet, opus 11 (for piano), and *Pierrot Lunaire, Gurrelieder,* and *Pelléas et Mélisande,* a symphonic poem.

SCHUBERT (*shö'bērt*), **FRANZ PETER** (1797–1828). A composer who lived most of his life at Vienna, Austria, where he was the son of a poor teacher and musician. After some desultory education, he was a pupil for five years under Salieri, and in 1810 completed his first piece of music, a pianoforte composition. Next followed three vocal works, many smaller pieces, and in 1814 his first opera, *Des Teufels Lustschloss,* and within two years a great number of various compositions. Later and better works are a symphony called *Tragic, Rosamunde,* an opera, *Mullerlieder,* a group of songs, settings for three Shakespeare lyrics, and some for poems by Heine, and many incidental works. Schubert is best known now for his songs, over 500 in number.

SCHUMANN (*shö'män*), **ROBERT** (1810–1856). A German musical composer; born in Zwichau, Saxony. In the year following his marriage he published nearly 140 songs, many on Heine's words. He then commenced his great series of orchestral works, his symphony in B flat being first performed at the close of 1841. Under stress of work, however, his reason failed him, and after an attempt to drown himself in 1854 he was confined in a lunatic asylum, where he died.

SCHWABE, RANDOLPH (1885–). English draughtsmen, educated at the Slade School and in Paris, and known principally for his beautiful book illustrations. He worked for the Ministry of Education in the World War, designed for the theater, and helped write an interesting book on *Historic Costume.* Various museums contain his prints, drawings, and etchings.

SCHUMANN-HEINK (*shö-män-hingk'*), **ERNESTINE** (1861–1936). Celebrated contralto of German birth, but long a resident of the United States. She made her début at the Court Theater, Dresden, went to Hamburg, Berlin, and in 1896 sang at Bayreuth. Her first American appearance at Chicago in 1898 was in *Lohengrin,* and at London in *Das Rheingold.* In both opera and concert singing she was famous for many years. In 1926 she deeded her magnificent estate in California for a hospital for veterans of the World War.

SCOTT, CYRIL MEIR (1879–). English composer, poet, and writer, educated in music in Germany, and produced his first symphony at Darmstadt when he was 20. Some of his various orchestral and chamber works have been performed in most European capitals and in New York, including *The Alchemist,* an opera; *The Incomplete Apothecary,* a ballet; a *Nativity Hymn.* Of his poetry, *The Celestial Aftermath* and *The Voice of the Ancient* may be mentioned, and also his discussion, *The Influence of Music on History and Morals.*

SCOTT, GILES GILBERT (1880–). British architect, in practice at London since 1902. His designs for the new Liverpool Cathedral were accepted in 1903, and the building was consecrated in 1924. This is the first English cathedral to be erected in modern times, and it will be the largest when completed. He was knighted in 1924. Besides several other churches and war memorials, he designed buildings for Clare College at Cambridge University.

SCOTT, JULIAN (1846–1901). An American battle painter; born in Johnson, Vt.; studied in New York and with Leutze. His works are chiefly scenes from the Civil War and include *Rear Guard at White Oak Swamp* (in the Union League Club at New York), *Capture of André,* and *In the Cornfield at Antietam.*

SCOTTI, ANTONIO (1868–1936). Baritone singer, born in Naples, showed his talent as a mere child, and studied under Mme. Trifari-Paganini, his only teacher of singing. He appeared first at Malta, 1889, at many places in Italy, South America, Madrid, Moscow, and St. Petersburg, in London in 1889, and in the same year at the Metropolitan in New York, for the first of many seasons. Some of his numerous parts are Don Giovanni, Tonio, Falstaffe, Iago, and Amonsaro.

SCRIABIN (*skryä'bēn*), **ALEXANDER NICHOLAEVICH** (1871–1915). Russian composer, educated at the Moscow Conservatory, where he also taught for a number of years. For a time he lived in Brussels, and he made a number of tours, including one to the United States. Many of his compositions express his mystic ideals or some certain spiritual conception. He was influenced by Chopin, Mozart, Wagner, and Liszt. Some of his chief works are the *Poem of Fire, Reverie, Divine Poem* (third symphony), and many works for the piano.

SEIDL (*zī'dl*), **ANTON** (1850–1898). An Hungarian conductor, who was born at Budapest, assisted Wagner in producing the *Niebelung* trilogy at Bayreuth (1876), and succeeded Leopold Damrosch as conductor at the Metropolitan Opera House, New York (1885–91). Conducted at Covent Garden in 1887 and Bayreuth in 1886 and 1897. In New York he produced a number of operas for the first time in America, such as *Tristan und Isolde, Siegfried,* and *Die Meistersinger.*

SEMBRICH (*zĕm'brĭk*), **MARCELLA** (1858–1935). Operatic singer, born near Lemberg, Austria, as Praxede Marcelline Kochanska, but took her mother's maiden name for her public career. As Elvira in *I Puritani* she appeared at Athens in 1877, the next year at Dresden in the title rôle of *Lucia di Lammermoor,* and also at London in 1880 and New York, 1883. After five seasons at Covent Garden, she came back to America, where she sang at the Metropolitan till 1909. She married Wilhelm Stengel, under whom she had studied. Among other celebrated parts are Rosina in the *Barber of Seville,* Norina in *Don Pasquale,* and Leonora in *Il Trovatore.* Retiring from the opera in 1916, she trained or encouraged many artists that attained fame in music.

SHERWOOD, WILLIAM HALL (1854–1911). An American teacher, composer, and pianist; born in Lyons, N. Y.; studied under William Mason in New York and in Europe under Kullak, Deppe, and Liszt; did concert work in Germany (1882–1884); taught in the New England Conservatory (1885); head of the piano department of the Chicago Conservatory (1889–1899); established the Sherwood Piano School; wrote a *Scherzo-Caprice,* a *Gypsy Dance,* and many other pieces.

SHANNON, CHARLES HAZELWOOD (1865–). An English artist, noted for his sense of color similar to that of some of the old Italian masters and for his etchings and lithographs. In the Dublin Gallery is his *Bunch of Grapes;* in Munich is his *Study in Gray;* in the collection owned by Northcliffe is *The Bath of Venus;* and a collection of his etchings in the British and other museums.

SHIRLAW, WALTER (1838–1909). An American painter; born in Paisley, Scotland; came with his parents to Chicago in 1840; went to Munich (1870); teacher in the Art Students' League in New York (1876); first president of the Society of American

Artists (1878); elected N. A. in 1888. His notable works include *Tuning the Bell, Sheep Shearing in the Bavarian Mountains, The Goose Girl, The Marble Quarry, A Street Scene in Brittany, Rolling Steel Plates, Emptying the Crucible,* many designs for stained glass, and some mural decorations.

SHORT, FRANCIS JOB (1857–). An English painter and engraver, who turned to engraving after several years as a sanitary engineer in London. Among his early works were some remarkable etchings from the pictures of J. M. W. Turner; and some fine mezzotints of the pictures of G. F. Watts. Short is noted for engravings of the effects of water, and for his influence upon young artists as head of the school of engraving of the Royal College of Art at South Kensington.

SIBELIUS (*si-bā'li-ös*), **JEAN JULIUS CHRISTIAN** (1865–). Finnish composer educated at Helsingfors, Berlin, and Vienna, attaining remarkable skill. Awarded various honors, including a doctorate in music by Yale in 1917. Important compositions are music to the tragedies of *Kaolema* and *King Christian II., Dance Intermezzo, Finlandia, In Memoriam,* seven symphonies, and considerable piano music.

SICKERT (*zik'ert*), **WALTER RICHARD** (1860–). British painter and etcher, who studied under Whistler, and then under Degas. Some of his chief pictures are *Noctes Ambrosianæ, Army and Navy, Sinn Fein, Supper at the Casino,* and *Lansdowne Crescent.*

SIDDONS, SARAH (1755–1831). Distinguished member of the Kemble family, noted in the annals of the English playhouse. She was born at Brecon, Wales; married William Siddons in 1877. At Cheltenham she acted in *Venice Preserved* in 1774, and later went to Drury Lane at £5 a week. After five years at Bath, she appeared once more at Drury Lane, where her reception was most hearty. For a generation she was hailed as the greatest English actress, her only rival for fame in Europe being the great French player, Rachel, who was more intense but less finished. Mrs. Siddons long excelled in Shakespeare parts, her best being Lady Macbeth, Desdemona, Volumnia, and Rosalind. Her last appearance was for the benefit to Mr. and Mrs. Charles Kemble in Home's *Douglas* in 1819.

SIGNORELLI (*sē-nyo-rel'lē*), **LUCA** (1441–1523). An Italian painter; born at Cortona; taught Michelangelo; worked on the frescoes of San Francisco at Arezzo, in Perugia Cathedral, at Volterra, at Monte Oliveto, and at the Orvieto Cathedral. His paintings in the Vatican were destroyed to make way for those of Raphael.

SIMMONS, EDWARD EMERSON (1852–1931). An American painter, who was born at Concord, Mass., and studied under Lefèbvre and Boulanger in Paris, after completing his course at Harvard. Among his numerous mural decorations are those for the Criminal Courts Building and Waldorf-Astoria Hotel in New York, Massachusetts State House, Minnesota Capitol, South Dakota Capitol, Panama-Pacific Exposition at San Francisco, and the home of John D. Rockefeller at Tarrytown, N. Y.

SKINNER, OTIS (1858–). American actor, who began his career as a reader at Hartford, Conn., and made his first stage appearance in Philadelphia, Pa., in 1877. Later he played in *Enchantment* at Niblo's, New York, at Booth's with Barrett and with Augustin Daly in New York, London, Paris, and Berlin for five years. He was leading man with Modjeska (1892–95), and then starred in various plays, including *Kismet, A Celebrated Case, The Honor of the Family, Blood and Sand,* and *Sancho Panza.*

SMETANA (*smet'ä-nä*), **FRIEDRICH** (1824–1884). Czech composer and pianist, who became Konzertmeister to Emperor Ferdinand at Prague, and who was greatly influenced by Liszt while staying at Weimar. In 1856 he went to Gothenburg, but after 1866 lived again at Prague. Some of his compositions are *Hakon Jarl, Die Brandenburger in Böhmen,* the celebrated opera *Die verkaufte Braut,* and *Libuse,* which was written for the opening of the National Theater at Prague. Smetana trained a number of young musicians, of whom possibly Dvořák, the pianist, was the most famous.

SMILLIE, GEORGE HENRY (1840–1920). An American painter; born in New York; studied under James Hart and in Europe. Among his works are *The Merrimac River* in the Boston Art Club, *Light and Shadow Along the Shore* in the Union League Club at Philadelphia, *Boats of Venice, Gloucester Harbor, A Grey Day, Vineyard Sound,* and *At Narragansett;* elected N. A. in 1882.

SMILLIE, JAMES DAVID (1833–1909). American painter, born in New York, the son of a Scotch engraver, who attained fame as a landscape artist and engraver of bank notes. The son followed in the latter type of art, and made a series of notable engravings of Darley's pictures from Cooper's novels.

SMITH, FRANCIS HOPKINSON (1838–1915). Self-taught in art, Smith developed a pleasing and picturesque style in illustrating his own stories, like *Colonel Carter of Cartersville,* perhaps his most famous. His paintings are in public galleries at Washington, D. C., Buffalo, and Baltimore. He also wrote *Outdoor Sketching* (1915), an exposition of his work as an illustrator. See DICTIONARY OF AUTHORS for an account of his books.

SOROLLA Y BASTIDA (*so-rōl-yä ē bäs-tē-thä*), **JOAQUIN** (1863–1923). A Spanish painter, born in Valencia, educated there and in Paris. For years he was considered a leader in art of his country. Celebrated canvases are *Another Margaret, Fisherman's Return,* which was bought for the Luxembourg, and, for the Hispanic Society of America, a series of 49 compositions representing the provinces of Spain.

SOTHERN (*sŭth'ĕrn*), **EDWARD ASKEW** (1826–1881). English actor, who emigrated to America in 1852. He attained a great success in Taylor's *Our American Cousin,* created the main rôle in Robertson's *David Garrick,* and played as Sam Slingsby in Oxenford's *Brother Sam.* For years he was a popular comedian.

SOTHERN, EDWARD HUGH (1859–1933). American actor, son of the preceding, who made his first appearance in his father's company in 1879. After engagements in England and at the Lyceum Theatre, New York, he played a number of parts that brought him great distinction, such as Hamlet, Lovelace, and Villon. Though he took a great variety of rôles, Sothern is now best remembered in Shakespeare plays, supported by Julia Marlowe, first in 1904 and almost continuously until both retired. They were married in 1911. Other dramas in which they appeared are *Jeanne d'Arc, John the Baptist, When Knighthood was in Flower,* and *Lord Dundreary.*

SOUSA (*sō'zä*), **JOHN PHILIP** (1854–1932). American composer and leader of bands, born of Portuguese parentage in Washington, D. C. From an early age he was proficient in music. In 1880 he became leader of the United States Marine Band and in 1892 he organized his own band, but continued his connection with the former. Sousa is noted for his many stirring marches, such as *The Washington Post, High School Cadets,* and *Stars and Stripes Forever.* Besides he composed several comic operas, many songs, and a number of suites. *El Capital,* an opera, attained no little success.

SQUARCIONE, FRANCESCO (1394–1474). An Italian painter; born at Padua; founded one of the first Italian academies of art, and known as the "father of Italian painting"; taught Mantegna; best known by his altarpiece at Padua.

STAINER, JOHN (1840–1901)). An English composer and organist; born in London; organist of St. Paul's (1872–1888); professor of music at Oxford (1889); wrote two cantatas, *The Daughter of Jairus* and *Mary Magdalen;* an oratorio, *The Crucifixion;* and a *Treatise on Harmony.*

STANFORD, CHARLES VILLIERS (1852–1924). Irish composer, born in Dublin, educated in London under Paur, and then on a scholarship at Cambridge University. From 1873 to 1892 he was organist at Trinity College, and acted as conductor of the Musical Society at Cambridge. Some outstanding compositions are the incidental music to *Queen Mary,* an opera the *Veiled Prophet,* and a later one, *Shamus O'Brien,* which became rather famous, chamber music, songs, and symphonies. He acted as professor of composition at the Royal College of Music (1883), conducted various musical organizations, and succeeded Macfarren as professor of music at Cambridge in 1887. In 1902 he was knighted.

STEELL, SIR JOHN (1804–1891). A Scottish sculptor; born at Aberdeen; studied in Rome; modeled *Alexander Taming Bucephalus,* the statue of Scott on Scott's Monument, statue of Queen Victoria, statue of Wellington, and the Albert Memorial, all in Edinburgh. His *Sir Walter Scott* and *Robert Burns* are in Central Park, New York.

STEEN, JAN HAVICKSZ (1626–1679). Dutch painter, noted for his good draftsmanship, the distinction of his coloring, and the range of his subjects, —everything from religious scenes to tavern brawls. In the London National Gallery are three of his pictures, the *Music Master* being notable. Much of his best work is in private galleries, and his paintings are not very numerous.

STILLMAN, WILLIAM JAMES (1828–1901). An American painter and author; born in Schenectady, N. Y.; studied under Church and in London, where he was influenced by Turner and Ruskin; painted in New York until 1861, when he was made consul at Rome, and at Crete in 1865; a friend of Lowell, Longfellow, Holmes, and Agassiz; wrote *The Acropolis of Athens, The Cretan Insurrection, The Old Rome and the New, Francesco Crispi,* and *Autobiography of a Journalist.*

STOESSEL, ALBERT FREDERIC (1894–). American musician, since 1921 conductor of the New York Oratorio Society, and since 1923 professor of music at New York University. Some of his compositions are *Sonata in G,* suite for 2 pianos and orchestra, *Hispania* (for piano), *Antique* (suit for orchestra), and many smaller pieces. He wrote *Technique of the Baton* (1919). Stoessel was born in St. Louis and educated in Berlin, where he made his début.

STORY, WILLIAM WETMORE (1819–1895). An American sculptor and poet; born in Salem, Mass.; was graduated at Harvard (1838) and at the Law School in 1840; practised until 1845; went to Rome and opened a studio (1848), where he completed the statue of his father, which is in the Mount Auburn at Cambridge, Mass. Among his sculptures are *Cleopatra, Libyan, Sibyl, Delilah, Jerusalem in her Desolation, Semiramis;* statues of George Peabody in London, Edward Everett in Boston Public Garden, Professor Henry in the Smithsonian Institution, and the Francis Scott Key Monument in Golden Gate Park at San Francisco. Taft says that "Story's art came at the right time and had its very powerful influence in interesting a large public."

STRADIVARI (*strä-dē-vä'rē*), **ANTONIO** (1644–1737). Italian violin maker, who lived all his life at Cremona, and was a pupil and fellow-workman of the great Amati. He set the standard for size and technical excellence for all time. The secret of the varnish he used has not yet been discovered. Though his violins sold for less than $50, many of them now are worth thousands. For a time he specialized in long models, but later returned to an earlier form of short and broad instruments. Some of his violoncellos, notably the Piatti (1720), have been almost as famous as the violins.

STRANG, WILLIAM (1859–1921). Scottish painter and engraver, born in Canada, educated at the Slade School in London, and later taught etching. Kipling, Thomas Hardy, and other celebrated men sat for his etchings, which introduced new methods. Some of his engravings illustrate *The Pilgrim's Progress, Ancient Mariner, Allegory of Death,* and some scenes from the *Arabian Nights.*

STRAUSS, (*strous*), **JOHANN** (1804–1849). Austrian composer of dances and leader of orchestras, who began as a violinist, organized a band, and became Kappelmeister to the first Bürger Regiment. Of his many compositions, the *Täuberl Walzer* is still most famous. After 1833 he frequently toured Europe, visiting England in 1838 and during his last year, when he was the center of a great ovation.

STRAUSS, JOHANN (1825–1899). An eminent Austrian composer son of the preceding. After composing dance music for many years he undertook an operetta, *Indigo,* which was produced in 1871 and met with instantaneous success. Subsequently he produced *The Forty Thieves, Cagliostro, The Gypsy Baron,* etc., and numerous waltzes, the best known being *The Beautiful Blue Danube.*

STRAUSS, RICHARD (1864–). A German composer and conductor; born at Munich; director at Meiningen; second conductor at Munich (1894); first conductor at Berlin (1898); visited the United States and conducted several of his own compositions (1905). Since the death of Brahms he is the most noted of living German musicians; wrote *Symphonia Domestica,* several symphonic poems, over 50 extremely popular songs, and the operas *Guntram, Feuersnot, Salome* (to Oscar Wilde's text), and *Elektra.*

STRAVINSKY (*strä-vin'skē*), **IGOR FEDOROVICH** (1882–). Russian composer, at first a law student, who turned to the writing of light music, especially dances. *The Firebird, Petruska,* and his first opera followed between 1910 and 1914, after which he again returned to the ballet. *Oedipus Rex,* having features of both the oratorio and the opera, attracted considerable attention in 1928.

STUART, GILBERT (1755–1828). An American painter; born in Narragansett, R. I. In 1775 he made his way to London, where he led for two years a Bohemian life. Upon his talent being recognized he became a fashionable portrait painter. In 1792 he returned to the United States and painted portraits of Washington, Jefferson, Madison, John Adams, and many of the distinguished men of the period.

STURGIS, RUSSELL (1836–1909). American architect and critic, who was born in Baltimore, and studied art in New York and for two years in Munich. Some of the structures he designed are the Battel Chapel at Yale, together with two dormitories, the Flower Hospital of New York, and several bank buildings. From 1880 he gave much attention to writing on architecture and painting. He edited the *Dictionary of Architecture and Building* (1902), brought out the English translation of Luebke's *Outlines of the History of Art,* and wrote books on how to judge architecture, painting, and sculpture. The *History of Architecture* was uncompleted because of failing eyesight.

SUK (*sūk*), **JOSEF** (1874–). Czech violinist, a student of Dvořák, whose daughter he married, and one of the famous Bohemian Quartet. In 1924 he began to direct the Prague Conservatory. Some important works are the *Prague* and *Summer Tale,* symphonic romances, *Legend of Dead Victors,* inspired by the War, and a number of pieces for the piano.

SULLIVAN, ARTHUR SEYMOUR (1842–1900). An English composer, the son of a celebrated band master at the Royal Military College. He learned to play every wind instrument in the band, and studied in England and Germany under several masters. Some of his early compositions were the music for a *Tempest, Kenilworth* in operatic form, with four or five songs that were the vogue, and two light operas written in collaboration with F. C. Burnand. With W. S. Gilbert he produced the popular *Thespis* (1872), *The Sorcerer,* and finally *H. M. S. Pinafore,* a tremendous success (1878). These were followed by *The Pirates of Penzance, The Mikado,* and *The Gondolier,* among others, all of which continued the vogue of light opera. Some of his later works are the *Te Deum* (1872), *The Golden Legend* (1886), *Ivanhoe* (1891), an attempt at grand opera, the hymn tune *Onward Christian Soldiers,* and music to Tennyson's *Foresters.*

SULLY, THOMAS (1783–1872). An American portrait painter; born in Lincolnshire, England; brought by his parents to Charleston, S. C., in 1792; studied in London under Benjamin West; settled in Philadelphia in 1812. Stephen Girard built a home for him in 1825; visited London in 1837 and painted a portrait of Queen Victoria. His portraits include those of George Frederick Cooke as Richard III., Dr. Rush and Dr. Coates, Commodore Decatur, Thomas Jefferson, Charles Kemble, Rembrandt Peale, Andrew Jackson, William Gynn, and the portrait of himself which is in the Metropolitan Museum at New York.

SUPPE (*zu-pā'*), **FRANZ VON** (1820–1895). An Austrian composer; born at Spalato, in Dalmatia; musical director at Vienna. Among his operas are *Fatinitza, Boccaccio,* and the overture to *Poet and Peasant* (*Dichter und Bauer*).

TAFT, LORADO (1860–1936). American sculptor, a graduate of the University of Illinois, and a student at the École des Beaux Arts of Paris. For many years he was a well-known teacher and lecturer in art, at the Chicago Institute, University of Chicago, and elsewhere. Besides some portrait sculptures, some of his works are *Sleep of the Flowers, Solitude of the Soul, Black Hawk,* an Indian figure at Oregon, Ill., and the *Fountain of Time* at Chicago. He wrote *Modern Tendencies in Sculpture* and edited a new edition of *History of American Sculpture* (1924).

TALMA, FRANCOIS JOSEPH (1763–1826). A famous French tragedian; born in Paris. During the Revolution he was the foremost actor at the Théâtre de la République, and subsequently enjoyed the favor of Napoleon. His notable carriage and matchless elocution enabled him to play with great dignity such characters as Othello, Nero, Orestes, and Leicester.

TANNER, HENRY OSSAWA (1859–1937). American painter, of Negro parentage, born in Pittsburgh.

Pa., the son of a bishop of the African M. E. Church. His art education was received under Thomas Eakins of Philadelphia and J. P. Laurens of Paris, where he first exhibited in 1895. *The Destruction of Sodom and Gomorrah* (1925) is in the Metropolitan Museum of New York, and other pictures are in the Luxembourg and various European galleries.

TARBELL, EDMUND C. (1862–1938). American artist who studied and later taught for some years in the school of the Boston Museum of Fine Arts. He won numerous medals and prizes, including the gold medal of the National Academy of Design and of the International Exhibition of the Carnegie Institute of Pittsburgh. Pictures of his are in several American museums of fine arts. His specialty was outdoor scenes, portraits, and effects of sunlight.

TAUT (*tōt*), **BRUNO** (1880–). German architect, who studied under Theodor Fischer, acted as city architect at Magdeburg, and then moved to Paris. Among his buildings are one of glass and iron at Leipzig, one of glass at the Werkbund Exhibition at Cologne, a municipal building at Magdeburg, and other modern designs. He wrote several books on the art of building.

TAYLOR, DEEMS (1885–). American composer, born in New York, and educated at New York University. He acted as director of the theory department of the Lichtmann Piano Institute, and acted as musical editor for *Collier's*. Besides *A Cycle of Joy, Siren Song,* and other notable songs, he wrote *Chambered Nautilus* and *The Highwayman.*

TAYLOR, WILLIAM LADD (1854–1926). An American illustrator; born at Grafton, Mass.; studied in Boston, New York, and at Paris under Boulanger and Lefèbvre; illustrated *Selections from Longfellow, The Century in New England,* and *The Pioneer West.*

TENIERS (*ten'yerz*), **DAVID** (1582–1649). A Flemish artist, known now for his landscapes, humorous pictures of peasants on holiday, and a few good religious paintings. His *Works of Charity* is in St. Paul Church at Antwerp, *Playing at Bowls* is in the English National Gallery, and others at Vienna, Dresden, and Berlin.

TENIERS, DAVID, the Younger **(1610–1690).** Flemish painter, the son of the preceding, whom he greatly excelled as an artist in form and color. Two early pictures, the *Prodigal Son* and a group called the *Five Senses,* are fine in conception and execution. His *Marriage Festival* and *Judith* are in the Metropolitan Museum of New York, and several others are in the rooms of the Historical Society, including *Parable of the Laborer and Village Fête.*

TENNIEL (*ten'yel*), **JOHN** (1820–1914). English artist, who for many years drew humorous pictures for *Punch;* he was knighted in 1893. Some of his pictures did much to fix political opinions of his generation. All his work is accurate, detailed, and free from pronounced mannerisms often found in work of this type. Of his illustrations for books, perhaps the best were in *Alice in Wonderland.* Besides minor works, his cartoons and illustrations number over 2,500.

TERRY, ELLEN ALICIA (1848–1928). English actress of a celebrated family of stagefolk, who first appeared in London as the boy in *The Winter's Tale* in 1856. Though her greatest fame arose from her very finished acting in *The Taming of the Shrew, The Merchant of Venice, Coriolanus,* and other Shakespeare dramas, she also gained tremendous applause in Will's *The Vicar of Wakefield,* and two other plays, in Tennyson's *Becket,* and in *Robespierre.* For years she acted with Henry Irving. In 1907 Miss Terry married James Carew, who was an American actor. She was one of the great idols of the stage. *The Story of my Life* was published in 1908.

TETRAZZINI (*tet-rrah-tzee'nee*), **LUISA** (1874–1940). A singer born in Florence; married Signor Bazelli. She made her début as Inez in Mayerbeer's *L'Africaine* at the Verdi Opera House, Florence. She later sang in Rome, South America, again in Italy, and in Mexico, coming to San Francisco. She made her first New York appearance in 1908 in *La Traviata.* Among her numerous and varied operatic parts were those in *La Sonnambula, The Cobbler and the Fairy,* and *Lucia di Lammermoor.* In 1913–14 she sang with the Chicago Grand Opera Company.

THALBERG (*tahl'burg*), **SIGISMUND** (1812–1871). A celebrated German pianist; born at Geneva; took rank as one of the most brilliant pianists of the age. He was in the United States (1856–1858) and made tours of the principal cities.

THAYER, ABBOTT HENDERSON (1849–1921). An American painter; born in Boston, Mass.; studied in Paris under Gérôme. Among his best known works are *Corps Aîlé, The Virgin, The Virgin Enthroned,* and *Caritas* in the Boston Museum; elected N. A. in 1901. During the World War he was engaged on camouflage work in England, having become noted for his theory of coloring of animals.

THOMAS, ARTHUR GORING (1801–1892). An English composer, some of whose works are *The Light of the Harem, Esmeralda, The Golden Web,* and the choral works *The Swan and the Skylark* and *Hero* and *Leander.*

THOMAS, THEODORE (1835–1905). A German-American conductor; born in Esens, East Friesland; settled in New York in 1845; first violin at the Jenny Lind concerts (1851); traveled for several years as violinist with Jenny Lind, Grisi, Sontag, Mario, and others; formed an orchestra (1864); president of the new College of Music in Cincinnati (1878); conductor of the Philharmonic Society of New York (1885); leader of the Chicago Orchestra (1888). America learned through his efforts to know the works of Wagner, Berlioz, Rubinstein, and Liszt; and the Wagner festival which he conducted in New York in 1881 made the establishment of a German opera in that city possible a few years later.

THOMPSON, DENMAN (1833–1911). An American actor; born near Girard, Pa.; appeared first at Lowell, Mass., in 1852; went into business, but resumed the stage in 1871; wrote *Joshua Whitcomb* and acted in it until 1886, when *The Old Homestead,* with Joshua Whitcomb as the chief character, was presented at the Boston Theater; he acted in this part countless times.

THOMPSON, LAUNT (1833–1894). An American sculptor; born at Abbeyleix, in Ireland; brought to Albany, N. Y., in 1847; elected N. A. in 1862. His colossal *Napoleon* in the Metropolitan Museum in New York, his bust of *Edwin Booth,* the statue of John Sedgwick at West Point, and of President Pierson at Yale College are his chief works.

THORNYCROFT, W. HAMO (1850–1925). An English sculptor; born in London; elected R. A. in 1888. His chief works are his statue of *General Gordon, Cromwell, The Stanley Memorial, King Alfred, The Mower,* and *Gladstone.* In 1917 he was made a knight.

THORWALDSEN (*tôr'vâl-sĕn*), **BERTEL** (1770–1844). An eminent Danish sculptor; born near Copenhagen; the son of a poor Icelander; studied in Rome, where Canova encouraged him, and a fine statue of Jason established his reputation; executed a colossal group of *Christ the Consoler, The Twelve Apostles, St. John Preaching in the Wilderness,* and other religious subjects, besides statues of Copernicus and Galileo and the celebrated reliefs *Night* and *Morning;* bequeathed to his country his large fortune and nearly 300 of his works, now in the Thorwaldsen Museum, Copenhagen, where he now lies in the courtyard under a rose-bed as he requested.

TIFFANY, LOUIS COMFORT (1848–1933). An American artist and art manufacturer; born in New York; studied under George Inness, Samuel Coleman, and with Léon Bailly in Paris; devoted himself to decorative glass, known as the Tiffany "Favrile" glass; chevalier of honor in 1900 and N. A. in the same year. In 1918 he deeded his home, art collection, and $1,000,000, for maintenance at Oyster Bay, N. Y., for a foundation for art students.

TINTORETTO (*tēn-to-ret'to*), **GIACOMO ROBUSTI, IL** (1512–1594). An Italian painter; born at Venice. Save for a few lessons under Titian he seems to have been self-taught; took for his models Titian and Michelangelo, and came specially to excel in grandeur of conception and in strong chiaroscuro effects. Among his most notable pictures are *Belshazzar's Feast, The Last Supper, The Crucifixion, The Last Judgment, The Resurrection,* etc.

TISSOT (*tē-sō'*), **JAMES JOSEPH** (1836–1902). A French painter, who fought in the Franco-Prussian War, lived in England for a number of years, and learned etching under Sir Seymour Hadden. Some of his early pictures are *Faust and Marguerite,* now in the Luxembourg, and *La Femme à Paris.* In middle life he turned to the painting of scenes in the life of Christ—400 water colors in all—about half of which

were exhibited in Paris in 1895, in London the next season, and in the United States later. They were brought out in print form by Lemercier of Paris. He also painted 365 scenes from the Old Testament.

TITIAN (*tish'an*), **VECELLIO** (1477–1576). A great Italian painter; born at Pieve di Cadore; the prince of colorists and head of the Venetian school. He was a master of his art from the very first, and his fame led to employment in all directions over Italy, Germany, and Spain. His works were numerous and rich in variety. He ranks with Michelangelo and Raphael as the head of the Italian Renaissance. His list of works is long and contains many masterpieces. Some of his pictures are *Christ Carrying the Cross, Man of Sorrows, Sacred and Profane Love, Three Ages, Flora, Worship of Venus, St. John the Almsgiver, Twelve Caesars, Sacrifice of Abraham, Ecce Homo, The Last Supper, St. Jerome, Christ Crowned with Thorns, and Pietà.*

TOMMASINI, VINCENZO (1880–). Italian composer, who in 1917 won considerable fame by his *The Good-humoured Ladies*, a ballet, based on a comedy by Goldoni, and this was later played in most of the capitals of Europe. He was born and educated in Rome, where he became assistant director of the Academy of Saint Cecilia. Among other works are a comic opera, a symphonic poem, and a string quartet.

TOSTI (*tos'tē*), **FRANCESCO PAOLO** (1846–1916). An Italian composer; born in the Abruzzi; singing master to the queen of Italy (1870); teacher to the English royal family (1880); best known as a song writer. Among his more popular works are *Come to My Heart, Good-bye, That Day, Mother* and *For Ever and For Ever.*

TOVEY, DONALD FRANCIS (1875–1940). English pianist and composer, the son of the master of Eton College; elected professor of music at Edinburgh University in 1914. Among his varied compositions are an opera, *The Bridge of Dionysus*, two sonatas for violin and one for two 'cellos, and various other pieces.

TREE, HERBERT BEERBOHM (1853–1917). English actor and theatrical manager, whose name was originally Beerbohm, to which he added Tree. First appearing in 1876, he attained a great success in *The Private Secretary* (1884), next played in some humor parts while acting as manager of the Haymarket Theater, and finally in various revivals of Shakespeare. He inaugurated improvements in staging. Later he produced some of Stephen Phillips's poetic dramas, started a school for acting, and carried on quite successfully the management of Her Majesty's Theater. He received knighthood in 1909.

TROYON (*trwo-yôn'*), **CONSTANT** (1810–1865). A French landscape and animal painter; born in Sevres; *Return from the Farm, Oxen Going to Work in the Fields*, and *Sheep after a Storm* are his most noted pictures. The Metropolitan Museum contains several fine examples of his art.

TRUMBULL, JOHN (1756–1843). An American artist; born in Lebanon, Conn.; served on the staffs of Generals Washington and Gates; a pupil of Benjamin West; produced his first historical picture, *The Battle of Bunker Hill* (1786); employed by Congress (1817) to paint four pictures for the rotunda of the Capitol at Washington,—*The Signing of the Declaration of Independence, The Surrender of Burgoyne, The Surrender of Cornwallis*, and *The Resignation of Washington at Annapolis.* His *Alexander Hamilton* is in the Metropolitan Museum of New York, Washington in full military dress, now at Yale, and President and Mrs. Washington, now in the National Gallery of Washington.

TRYON, DWIGHT WILLIAM (1849–1925). An American painter; born at Hartford, Conn.; studied in Paris under Daubigny, Guillemet, and Harpignies; art professor at Smith College, Northampton, Mass.; settled in New York (1890); elected N. A. (1901). His works rank among the first American landscapes, and include *First Leaves, Rising Moon, Evening in Early Spring*, and *Autumn.*

TSCHAIKOVSKY (*chī-kof'skē*), **PETER ILYITCH** (1840–1893). A Russian composer; born at Votkinsk; studied under Rubinstein; professor of harmony at Moscow (1866–1878). His *Fifth* and the *Sixth* (*Pathétique*) symphonies rank among the world's best; visited the United States (1891) and conducted several of his own compositions at the dedication of Carnegie Hall. His operas include *Eugene Onegin, The Maid of Orleans, Mazeppa, The Enchantress*, and *Iolanthe.*

TURNER, JOSEPH MALLORD WILLIAM (1775–1851). An English landscape painter. His *Slave Ship* is in the Boston Museum; the *Grand Canal* in the Metropolitan Museum at New York; his *Norham Castle* and the *Fountain of Indolence* in private collections there; and his *Scene on the French Coast* and *Staffa* are in the Lenox Library in New York. He gave the bulk of his work—262 paintings and 9,000 drawings—to the nation, and left £140,000 to endow an institution for poor artists. Ruskin in 1843 started to defend Turner against unjust and false criticism, and his work grew into five volumes now called *The Modern Painters.*

UCCELLO (*öt-chel'lo*), **PAOLO** (1397–1475). Florentine painter, whose real name was Dono, but he was called Uccello because of his facility in painting birds. From the few works of his that now survive, he is seen to be a fine colorist, excellent in drawing all manner of animals, and in painting armor and clothing. Some of his frescoes in Florence, three battle pieces now in different galleries—Florence, Paris, and London—and portraits of his friends are about all that now survive.

UHDE (*ö'dē*), **FEITZ VON** (1848–1911). A German painter; born in Wolkenburg, Saxony; studied in Paris under Munkácsy. Among his best works are *Suffer Little Children to Come Unto Me, The Last Supper, The Nativity*, and *The Walk to Bethlehem.*

ULRICH (*öl'rich*), **CHARLES FREDERIC** (1858–1908). An American painter; born in New York; studied there and in Munich under Loefftz and Lindenschmidt. His *Glass Blowers of Murano* in the Metropolitan Museum and *Promised Land* are among his best; elected N. A. in 1883; lived in Venice after 1886.

UPDIKE, DANIEL BERKELEY (1866–). American printer, who revised several old types, such as that used by Wilson in the early part of the last century. Goodhue and Horne designed artistic fonts for him. He lectured at Harvard and elsewhere, and wrote *Printing Types—Their History, Forms, and Use*, (1921).

VAN BRUNT, HENRY (1832–1903). An American architect; born in Boston, Mass.; was graduated at Harvard (1854); designed Memorial Hall at Harvard, library of the University of Michigan, First Church in Boston, and the Electricity Building at the World's Fair at Chicago (1893).

VANDERLYN, JOHN (1776–1852). An American painter; born at Kingston, N. Y.; studied with Gilbert Stuart and later in Paris; returned in 1801 and lived with Aaron Burr, vice-president, and painted the famous picture of Burr and his daughter finished in Rome (1803), his two chief works, *Marius among the Ruins of Carthage* and *Ariadne of Naxos*, which latter was reproduced by the engraver Durand; painted portraits of Washington, Monroe, Madison, Calhoun, and Zachary Taylor. The *Landing of Columbus* on the $5 notes was designed by him.

VAN DYCK (*vän dīk*), **ANTHONY** (1599–1641). Flemish painter, born in Antwerp, and from early life painted portraits. With Rubens he was designated as a court painter, and after about 1832 he lived in England, enjoying a pension, title of painter in ordinary to the king, and knighthood. Some of his greatest works are *Martyrdom of St. Peter, Betrayal of Christ, St. Martin, Crucifixion, St. Augustine in Ecstasy*, and *Adoration of the Shepherds.*

VAUX, CALVERT (1824–1895). An American architect and landscape gardener; born in London, England; came to America in 1850; associated with Frederick Law Olmsted; made the plans for Central, Morningside, and Riverside parks in New York; Prospect Park in Brooklyn; State Reservation at Niagara Falls; and parks at Bridgeport, Conn., Chicago, and elsewhere; also designed the Metropolitan Museum of Art and the Museum of Natural History in New York.

VEDDER (*ved'er*), **ELIHU** (1836–1923). An American painter and illustrator; born in New York; studied with Picot in Paris; went to Rome (1857); illustrated the *Rubaiyát of Omar Khayyám* and the *Arabian Nights.* Among his paintings are *Lair of the Sea Serpent, Cumaean Sibyl, Questioning the Sphinx, The Crucifixion, The Last Sun Worshipper*, and the *African Sentinel.* His mural work in the Congressional Library is notable.

VELASQUEZ (*vā-läs'käth*), **DIEGO RODRIGUEZ DE SILVA Y** (1599–1660). The greatest of Spanish painters; born at Seville, of Portuguese family. Portrait painting was his forte, one of his earliest

works being a portrait of Olivarez, succeeded by those of Philip IV., Juan Pareja, and Innocent X. Specimens of his work are found in different countries, but the best are in Madrid, Spain. They include sacred subjects, genre, landscape, and animal paintings, as well as portraits. His *Venus with a Mirror* was bought for the National Collection at London for £45,000 in 1906.

VELDE, WILLEM VAN DE, THE ELDER (1611–1693). A Dutch marine painter; born at Leyden; painter of sea fights to Charles II. of England and later, to James II.

VERBOECKHOVEN (*ver-bŏk'hō-ven*), **EUGEN JOSEPH** (1799–1881). A Flemish painter; born at Warneton, in West Flanders; noted for his pictures of peasant and animal life, such as *Sheep Surprised by a Storm, Horses Attacked by Wolves, Sheep in the Campagna, Souvenirs of Scotland,* and *Ewe and Lambs, or the Good Mother.* Some of his works are in the Metropolitan Museum at New York.

VERDI, GIUSEPPE (1813–1901). Italian composer, who was born and received his early musical education in Busseto, Italy. Four years after a symphony had been performed, he went to Milan to finish his musical studies (1832). For ten years little success came, until his *Nabucodonosor* made him famous. By 1844 with his *Ernani* his repute had spread through Europe. Other great operatic compositions are *Rigoletto, Il Trovatore, Les Vêpres Siciliennes,* written for opera in France, *Aïda, Otello,* and *Falstaff.* Three of these operas at least have proved perennial favorites.

VERESHCHAGIN (*ver-es-chā'gin*), **VASSILI VASSILIEVICH** (1842–1904). Russian artist, educated for a naval career, abandoned at once for travel and painting. He studied under Gérôme. For many years he followed the armies in the field, and finally in the far east in the Chino-Japan War, the war in Philippines, and the Russo-Japanese War. Some of his pictures are *Doukhobors Chanting their Psalms, The Apotheosis of War, Left Behind,* and a series of pictures showing a crucifixion. Most of these aroused violent controversy, because of their anti-war propaganda. He perished in the sinking of the flagship *Petropavlovsk* in 1904 at Port Arthur.

VERMEER (*ver-mār'*), **JAN VAN DELFT** (1632–1675). Dutch artist, for a time forgottn, but since 1860 highly appreciated through the efforts of the artist Thore, who lived in Holland for a time. He is fine in both style and coloring. Some of his great pictures are *Woman and Soldier, Reading Girl, View of Delft, Woman Reading, Lady at a Casement,* now in the Metropolitan of New York, and *Lace Maker,* now in the Louvre.

VERNET (*ver-nā'*), **HORACE** (1789–1863). French artist, the greatest of a family of noted painters, including both his father and grandfather. When he was under 21 he finished the *Taking of an Entrenched Camp,* a canvas that attracted much attention, while his *Defense of the Barrier at Clichy* won immense fame. Among his interesting works is an interior of his own studio, representing himself calmly working in the midst of all sorts of confusion, occasioned by both animals and men. Some of his battle scenes are nobly conceived and strongly executed.

VERONESE (*vā-rō-nā'zā*), **PAOLO,** or **PAOLO CAGLIARI** (1528–1588). A painter of the Venetian school; born at Verona; painted his *Temptation of St. Anthony* for Mantua Cathedral and settled in Venice in 1555, where he soon earned distinction and formed one of a trio along with Titian and Tintoretto. The subjects he treated were mostly Scriptural, the most celebrated being the *Marriage Feast at Cana of Galilee.*

VIBERT (*vē-bār'*), **JEHAN GEORGES** (1840–1902). A French painter and dramatist; born in Paris. Among his works are *L'appel après le pillage, La tentation, Le barbier ambulant, Un couvent sous les armes, Le départ des mariés, Le premier né, L'apothéose de Thiers, Bailli de Suffren, Presentation, Assumption, Annunciation, Mater Dolorosa, Committee on Moral Books,* and *The Missionary's Story.*

VIERGE (*vī-er'hē*), **DANIEL URRIBJETA** (1848–1904). A Spanish artist; born at Madrid; went to Paris (1870) and worked in the art department of *Le Monde Illustré* and *La Vie Moderne;* illustrated Hugo's *L'année terrible, Les Travailleurs de la mer, L'homme qui rit, Quatre-vingt-treize,* and *Notre Dame de Paris,* and many other works; one of the foremost artists in black and white.

VIGEE-LEBRUN (*vē-zhā' le-brun'*), **MARIE-ANNE ELIZABETH** (1755–1842). French painter who (1776) married the art-writer J. B. P. Lebrun. She received her first instruction from her father, at 20 painted notable persons, and in 1783 won membership in the Academy by her *Peace Bringing back Abundance.* During the French Revolution and after she lived in Rome, but traveled about, and left paintings in many prominent galleries. Some of her later works are *Lady Hamilton as a Bacchante, Lord Byron,* the *Prince of Wales,* and many pictures of Marie Antoinette. Several pictures by her are in the Louvre of Paris, including two of Mme. Lebrun and her daughter.

VOGLER (*fō'gler*), **GEORG JOSEPH** (1749–1814). Often called Abt (Abbé) Vogler; A German organist and composer, now best known through Browning's poem *Abt Vogler.* At an early age he became proficient on several instruments, having been encouraged by his father, who was a violin maker. In 1755 he was made court chaplain and second choir master at Mannheim, and in 1778 he moved to Munich with the elector, and there attracted wide attention by his organ recitals. In 1786 he was appointed chief musician to the king of Sweden. His operatic *La Patriotism* was long popular, and some themes in fugue form from Handel were highly appreciated. He invented a form of organ called the orchestrion, on which he played in London (1790) with great finish and charm.

VOLK, DOUGLAS (1856–1935). American artist, born in Pittsfield, Mass., and educated at Rome and under Gérôme in Paris; first exhibited in Paris Salon, 1875. Taught at Cooper Institute (1879–84; 1908–12), and in Art Students' League, both of New York; organized Minneapolis School of Fine Arts (1886–93). Awarded various medals at exhibitions, and represented in Carnegie Gallery, Pittsburgh; Corcoran and National Museum, Washington; Metropolitan, New York; and others. His war portraits of King Albert, Lloyd George, and General Pershing are in the National Gallery, Washington, and his Lincoln in the Albright Gallery, Buffalo, N. Y.

VONNOH (*von'o*), **ROBERT** (1858–1933). American painter, born at Hartford, Conn., educated in Boston, where he taught in the Museum of Fine Arts (1885–87), and also in the Pennsylvania Academy (1891–96). He lived abroad for a number of years. Represented in the White House, Washington; Metropolitan, New York; Brooklyn Institute. He was elected to the National Academy in 1906. His wife, Bessie Potter, took many prizes and has pictures in different prominent galleries.

WAGNER (*väg'ner*), **WILHELM RICHARD** (1813–1883). A great musical composer; born at Leipzig. His principal works were *Rienzi, The Flying Dutchman, Tannhäuser, Lohengrin, Tristan und Isolde, The Meistersingers of Nurnberg,* and the *Ring of the Nibelungen,* the composition of which occupied 25 years. This last was performed in 1876, at Bayreuth in presence of the emperor of Germany and the principal musical artists of the world. *Parsifal* was his last work. Wagner broke away from traditions in music, made his art a medium for the expression of ideas as well as emotions, and thus aroused a great controversy. He combined some of the zeal of a reformer with technical mastery and originality of art.

WALKER, HORATIO (1858–1938). A painter, born in Canada and self-taught, but became a great artist, specializing in animal scenes, figures, and landscapes. His *Ice Cutters* and *A Mükyard,* representing his knowledge of farmer life in Canada, attained considerable note. The Philadelphia Academy awarded him a gold medal in 1906. He was made a N. A. in 1891.

WALLACE, WILLIAM VINCENT (1814–1865). An Irish composer; born at Waterford; leader of an orchestra in Dublin; went to Australia; brought out his successful opera, *Maritana,* on his return in 1845; wrote also *Matilda of Hungary, Lurline, The Amber Witch,* and *The Desert Flower.*

WALLACK, JAMES WILLIAM (1795–1864). An Anglo-American actor; born in London; acted in Drury Lane and supported Edmund Kean; appeared as Macbeth in New York (1818) and settled there about 1850; opened Wallack's Theatre at Broadway and Broome Street (1852) and the theater at Broadway and Thirteenth Street in 1861; noted for such parts as Don César de Bazan.

WALLACK, JOHN JOHNSTONE, or **"LESTER" WALLACK** (1819–1888). An American actor; born in New York; son of James William Wallack; educated in England and became a lieutenant in the British

army in 1842; resigned in 1844 and became an actor; appeared in New York as Sir Charles Coldstream in *Used Up* in 1847; acted leading parts in his father's theater (1852–1864) and assumed proprietorship of it on his father's death; opened the present "Wallack's" at Thirtieth street and Broadway.

WALTER, THOMAS USTICK (1804–1887). An American architect; born in Philadelphia, designed Girard College, St. George's Hall, Philadelphia Savings Bank, Chester County Bank, the Biddle and Cowperthwaite residences in Philadelphia and vicinity; superintended the enlargement of the Capitol at Washington and completed the Post Office and Treasury building; president of the American Institute of Architects (1876).

WAPPERS, EGIDE CHARLES GUSTAVE (1803–1874). A Belgian painter; born at Antwerp; professor at the Academy (1832) and director (1840–1853); president of the Belgian National Museum (1846–1853). Among his works are *Dévouement du Bourgmestre de Leyde Le Christ au tombeau, Scène des journées de septembre, L'adieu de Charles I. à ses enfants, La tentation de Saint Antoine, Geneviève de Brabant,* and *Christophe Colomb.*

WARD, EDWARD MATTHEW (1816–1879). An English painter; born in London; studied there, in Rome, and under Cornelius at Munich; painted *Cimabue and Giotto, Doctor Johnson in Lord Chesterfield's Ante-Room, South Sea Bubble, Marie Antoinette Parting with the Dauphin,* and *Marie Antoinette Listening to the Act of Accusation;* elected R. A. in 1855.

WARD, GENEVIEVE (1837–1928). English singer and actress, born in New York. After marrying Count Constantine de Guerbel, she made her début under the stage name of Ginevra Buerrabella at Bergamo, Italy, in the operatic *Stella di Napoli* (1855). In 1862 she lost her singing voice, after which she taught in New York for some years, then went to England, and achieved a great vogue as an actress in Shakespeare and other rôles.

WARD, JOHN QUINCY ADAMS (1830–1910). An American sculptor; born at Urbana, Ohio; studied under Browne in Brooklyn, whom he assisted with his equestrian statue of Washington in Union Square in New York. His *Indian Hunter* was the first statue placed in Central Park. His *Seventh Regiment Citizen-Soldier, Shakespeare,* and *The Pilgrim* are also in Central Park. *The Freedman* and *The Good Samaritan* are in Boston. His *Washington* on the Subtreasury in Wall Street, *Henry Ward Beecher* in City Hall Park in Brooklyn, *Commodore Perry* in Newport, R. I., and *Horace Greeley* in front of the Tribune Building are noted examples of his work; elected N. A. in 1863.

WARFIELD, DAVID (1866–). American actor, who was born in San Francisco, acted at the Wigwam there in 1889, then after 1890 in New York. He became celebrated as a creator of Jewish parts, such as Solomon Levi in Belasco's *Auctioneer,* and of Von Barwig in Klein's *Music Master* (1903–07), revived, 1917–18), and the chief rôles in *A Grand Army Man* (1907), and in Shakespeare, especially in Shylock.

WARNER, OLIN LEVY (1844–1896). An American sculptor; born at West Suffield, Conn.; studied in Paris. Among his works are a high relief portrait of Edwin Forrest; colossal heads of Michelangelo, Rembrandt, Raphael, Titian, and Velasquez on the Art Building at the World's Fair of 1893; his nude figure *Diana;* head of Daniel Cottier; *William Lloyd Garrison* at Boston; and a fountain in Portland, Ore.

WARREN, WHITNEY (1864–). American architect, member of the New York firm of Warren and Wetmore, who specialized in railway structures, hotels, and other large buildings. Some of their commissions were stations for the New York Central, Michigan Central, and Canadian Northern Railways, the Chelsea Docks and Grand Central Terminal in New York City, and the hotels Biltmore and Commodore. They had charge of the plans for the new Library of Louvain.

WATTEAU (*wä-tō'*), **ANTOINE** (1684–1721). An distinguished French painter; born at Valenciennes. His *Fêtes Galantes* and *Fêtes Champêtres,* decorations on the Louvre; and his fine collections in the Louvre, Sans Souci, in Berlin, and in London are noted for the sunlit colors and great purity of tone.

WATTS, GEORGE FREDERICK (1820–1904). An eminent English painter; born in London; is distinguished as a painter at once of historical subjects, idea subjects, and portraits; did one of the frescoes in the Poets' Hall of the Houses of Parliament and the cartoon of *Caractacus Led in Triumph Through the Streets of Rome;* has, as a "poet painter," by his *Love and Death, Hope* and *Orpheus and Eurydice* achieved a world-wide fame. He was twice offered a baronetcy, but on both occasions he declined.

WEBB, PHILIP SPEAKMAN (1831–1915). English architect, associated with William Morris, with whom he made designs for a great variety of artistic objects. Besides a house built for Morris, additions to Berkeley Castle and to Pusey house, he strengthened many old buildings by an original method of filling the walls with new material.

WEBER, KARL MARIA FRIEDRICH ERNST VON, BARON (1786–1826). A German musical composer; born at Eutin, near Lübeck. He was the founder of German romantic opera and one of the most brilliant pianists of his day. His best known works are *Der Freischütz, Euryanthe, Oberon, Preciosa* and masses, cantatas, songs, symphonies, overtures, concertos and sonatas.

WEIR, JOHN FERGUSON (1841–1926). An American sculptor, painter and author; born at West Point, N. Y.; director of the School of Fine Arts at Yale University (1869). Among his works are statues of President Woolsey and Professor Silliman. His chief paintings are *The Gun Foundry, Forging the Shaft, Tapping the Furnace* and *An Artist's Studio.* His books include *The Way, the Nature, and the Means of Revelation; John Trumbull and His Works;* and *Human Destiny in the Light of Revelation.*

WEIR, ROBERT WALTER (1803–1889). An American painter; born in New Rochelle, N. Y.; studied under Jarvis in New York and with Benvenuti in Florence; professor of drawing at West Point for over 40 years. His works include *The Embarkment of the Pilgrims* in Washington at the Capitol, *Columbus before the Council of Salamanca, Taking the Veil,* several portraits, and the allegory *Peace and War;* elected N. A. in 1829; father of the painters John Ferguson Weir and Julian Alden Weir.

WERRENRATH, REINALD (1883–). Baritone singer, born in Brooklyn, N. Y., and educated under his father and others. Made his début at the Metropolitan, New York, in *Pagliacci* in 1919, and then appeared in various cities in concert performances.

WEST, BENJAMIN (1738–1820). An American painter; born in Springfield, Pa., of Quaker parents. He went to Rome in 1760, and proceeded to England in 1763, where he made his permanent residence. His *Death of General Wolfe* was among the first of his productions that attracted public notice; president of the Royal Academy (1792) to succeed Reynolds. His *Christ Healing the Sick* and *Penn's Treaty with the Indians* are in Philadelphia; *Kingdom* is in the Boston Museum; and *Triumph of Love* and *Hagar and Ishmael* are in the Metropolitan in New York.

WHISTLER (*hwis'lēr*), **JAMES ABBOTT McNEILL** (1834–1903). An American painter; born in Lowell, Mass.; studied for a time at the United States Military Academy; went to Paris and afterward settled in London. The finest of his oil pictures are *The Artist's Mother—an Arrangement in Black and Gray,* the *Portrait of Thomas Carlyle,* and the *Portrait of Miss Alexander—Harmony in Gray and Green.* Whistler's art is original and individual.

WEYR (*vair*), **RUDOLF VON** (1847–1914). Austrian sculptor, born in Vienna, and educated there. He revived some older methods, especially of rococo in several notable works. He specialized in friezes in public buildings and theaters.

WILLETE, LEON ADOLPHE (1857–). French painter, illustrator, and lithographer, who studied under Cabanel in Paris. He achieved a notable place among illustrators by his contributions to many periodicals. For emotion and humor his work excelled.

WOLF, HUGO (1860–1903). Great writer of songs, who spent much of his life in Vienna, where in early life he taught and wrote some musical criticism. Later he devoted all his time to composing works noted for their range and intensity of expression. Among many compositions his *Gedichte vom Goethe, Christnacht, Dem Vaterland, Der Corregidor,* and *Italian Serenade* are the best.

WREN, SIR CHRISTOPHER (1632–1723). The greatest of English architects; born in East Knoyle,

Wiltshire. He began to rebuild St. Paul's in 1675, and saw the last stone laid by his son 35 years afterward. He designed the modern part of the palace of Hampton Court, the library of Trinity College, Cambridge, and the hospitals of Chelsea and Greenwich, the churches of St. Stephen's, Walbrook; St. Mary-le-bow, Cheapside; St. Michael, Cornhill; and St. Bride, Fleet street; as also the campanile of Christ Church, Oxford, and Marlborough House, Pall Mall; sat in Parliament (1685–1700).

WYANT, ALEXANDER H. (1836–1892). An American painter; born at Port Washington, Ohio; studied with George Inness in Paris, where he was influenced by Corot and Dupré, and in Düsseldorf under Hans Gude; settled in New York in 1864; elected N. A. in 1869. His works in the Metropolitan Museum in New York include *Looking toward the Sea, Broad, Silent Valley,* and *A View in County Kerry.*

YSAYE (*ē-zā'yē*), **EUGENE** (1858–1931). Belgian violinist, born in Liége and educated under his father and at the local conservatory. He appeared first in Germany in 1879, in Paris in 1883, and in London in 1889. For a number of years, beginning in 1900, he acted as a conductor. As a violinist he was preëminent in interpretation and in technique. During the World War he led the Cincinnati Orchestra.

ZEISLER (*zīs'lĕr*), **FANNIE BLOOMFIELD** (1863–1927). A pianist, born in Poland, but was brought by her parents in early infancy to America. Married Sigmund Zeisler of Chicago in 1885. For many years she appeared in the chief cities of America, Germany, England, Austria, and France, her last tour abroad being in 1912. She founded a fund for the relief of musicians (1925).

ZIMBALIST (*zĭm'bà-lĭst*), **EFREM** (1889–). Distinguished Russian violinist, began to study under his father when he was seven, and later made great progress under Leopold Auer at St. Petersburg. Toured through Germany and came to the United States in 1911. In 1914 he married the celebrated singer, Alma Gluck. He composed songs, suites for the piano, and other instruments.

ZULOAGA (*thö-lō-ä'gä*), **IGNACIO** (1870–). Spanish painter, sent to Rome to become an architect, but turned to painting after six months of study. Returning to Spain, he carefully studied the old masters, and developed a new style and manner, quite different from the current art. Paris hailed him as a new influence, and eventually all the great galleries of Europe admitted his pictures. *The Poet Don Miguel* is in Vienna; *Amies* in Barcelona; *Madame Louise* in Venice; and *The Topers* in Berlin.

LEADING INVENTORS OF THE WORLD

ACHESON, EDWARD GOODRICH (1856–1931). Inventor of carborundum, was born in Washington, Pa., and turned to earning his own living and invention at an early age. Becoming associated with the Edison interests, he installed the first electric lights in Italy, Belgium, and Holland. Other inventions are a synthetic graphite, much used in commerce, metallic silicon by a cheap process, a way of making clay more plastic, and certain abrasives.

ALBERT, JOSEPH (1825–1886). German photographer, born at Munich; established a studio at Augsburg (1840); removed to Munich (1858); his invention of the "Albertype" process of photo-mechanical printing was of the utmost importance, and was generally adopted. By finding that gelatin plates could be hardened so that many impressions could be made from a single unit, Albert thus greatly improved over the old metal process.

ALLEN, FRED HOVEY (1845–1926). A Congregational clergyman, inventor of the first photographic plates in America for reproduction of works of art. Born and educated in New Hampshire, he also studied abroad, held pastorates at Boston, Rockland, Me., and other cities, founded the Lawrence, Mass., *Eagle*, and wrote several books on art including *Masterpieces of Modern German Art* and *Grand Modern Paintings*.

ALLEN, HORATIO (1802–1889). Born in Schenectady, N. Y., the son of a professor at Union College, Allen was a member of the class of 1823. He went to England, formed a friendship with George Stephenson, and brought back to America the "Stourbridge Lion," the first locomotive to be run on this continent. In 1829 he alone ran this on a track at Honesdale, Pa. He invented the swivel truck for cars for the South Carolina Railway, then the largest line in the United States. Allen also first suggested that the weight of an engine should be evenly distributed among several wheels.

AMSTUTZ, NOAH STEINER (1864–). American engineer of Swiss-French descent, who for several years was a commercial artist and later became a patent attorney. His inventions include a photo-telegraph system and the arkograph, the first automatic engraving machine. Models of these machines were given to the Smithsonian Institution, Washington, in 1916–17.

APPERT, FRANCOIS (d. 1840). French confectioner who won the government prize of 12,000 francs (1810) for a method of preserving fruit in glass and china containers. He studied the subject several years, and tried many plans, succeeding at last as the modern housewife does by driving out the air from the product by boiling it to a certain temperature. Appert thought it was the air which destroyed the food, for the theory of bacteria of Louis Pasteur did not come till many years later.

APPLEBY, JOHN FRANCIS (1840–). Inventor of the first device to tie a knot in a twine for binding grain; born in New York, but went to Wisconsin after the Civil War, during which he invented a repeating fire-arm. His twine-knotter, first demonstrated in 1858, was developed in 1867, and after a time superseded the wire tie invented in the meantime. In 1879 Appleby patented an improved knotter, which was used by the Deering harvesters.

ARCHIMEDES (c. 287–212 B. C.). A Greek inventor and mathematician who was born in Sicily near Syracuse. Some of his ingenious devices seem to have been certain engines of war used against the Romans, a screw type of hydraulic machine and others for irrigation purposes, and some claimed a mirror which set the Roman ships on fire when they approached. He was killed at the siege of Syracuse by the Romans. In mathematics he discovered the ratio of the sphere to the cylinder, certain principles of what we now call integration, and the principle of physics known as specific gravity.

ARKWRIGHT, SIR RICHARD (1732–1792). Noted English inventor of cotton-spinning machinery; in 1767 his whole attention was given to the improvement of the spinning frame; his first mill driven by horses was set up in 1768, and he took out a patent for his invention; one of the first to introduce the steam engine into mills.

ARMSTRONG, WILLIAM GEORGE (1810–1900). British inventor of an improved rotary water motor, an hydraulic crane, and a type of breech loading gu adopted by the navy in 1859, used for 17 years, a then displaced until adopted again in 1880. Arm strong founded the Elswick Manufacturing Compan merged with the Elswick Ordnance Company, und his supervision in 1863. He introduced the idea winding a metal core of a gun with steel wire. Arm strong was made a peer in 1887.

ARNOLD, BION JOSEPH (1861–). An ele trical engineer, born near Detroit, Mich., and educate at Hillsdale College, Cornell University, and the Un versity of Nebraska. Inventor of combined direc current machines, a magnetic clutch, improvements design of storage batteries, and devices used in ele trie railway construction. Supervised the constructio of many electric lines, including the rebuilding of t Chicago Traction System; consulted by numerou municipalities and by the government during and aft the World War in the construction of aircraft.

ATWOOD, GEORGE (1746–1807). An English i ventor and mathematician, who designed Atwood machine, a device for measuring the relations amon space, time, and velocity of a falling body. Thus th machine is used to confirm the laws of accelerate motion under the influence of gravity in the case falling bodies. Among his works are a *Treatise the Rectilinear Motion and Rotation of Bodies* an *Dissertation on the Construction and Properties Arches*.

AUER, KARL. See under WELLSBACH.

BABBITT, ISAAC (1799–1862). American gol smith, who became interested in alloys of metals, an finally devised (1839) the formula for one of th type known now as Babbitt metal. This is a com pound of about 25 parts of tin, 2 of antimony, an half a part of copper, though the proportions var slightly in different foundries. It is used as an ant friction compound. Congress awarded Babbitt $20,00 for his invention. Babbitt also made britannia war (first in this country) and certain brands of soap.

BAEKELAND (*bâ'kĕ-lănd*), **LEO HENDRI** (1863–). The inventor of bakelite, who w born in Belgium, but settled in the United State in 1889, and at first devoted himself to research i photographic materials. Velox paper for printin films was the result. He next devised a method producing caustic soda and chlorine through the us of an electric current passed through a brine. Pe haps his most interesting invention is bakelite, synthetic combination of carbolic acid and formald hyde to make an insulating substance to be use instead of hard rubber. Bakelite has very man other uses in electric devices, the arts, and com merce generally. It also replaces natural ambe He has done much other work in synthetic resi and has written numerous scientific papers.

BALDWIN, MATTHIAS WILLIAM. See unde CAPTAINS OF INDUSTRY.

BALES, PETER (1547–1610?). An Englishma who perfected a system of shorthand writing whic he called brachygraphie. He was head of a school i London and wrote two books on his discoveries of system of writing. Though not perfect in any sens his scheme was long used in taking notes.

BASKERVILLE, CHARLES (1870–1922). A American chemist, who was born in North Carolin studied at the University of Virginia and abroad, an taught at North Carolina and the College of the Ci of New York. His important inventions were in th refining of vegetable oils and in other substances nee ing great purity.

BAYNES, JOHN (1842–1903). Inventor of a ce luloid photographic film process (1884), and a go electro-photographic process (1885). He was born i Westmoreland, England, and came to the United Stat in 1875.

BEACH, ALFRED ELY (1826–1896). Invent of the hydraulic tunneling shield and of numerou other devices. He was born in Springfield, Mass became part owner and editor of the *Scientific Ame ican*, and a patent attorney. In 1865 he devised system of pneumatic mailing tubes, and three yea later came his great invention. He demonstrated h shield by boring underground a tunnel from Warre to Murray Street under Broadway, New York, throug

which he propelled a small car by means of suction. His shield was used in London, Liverpool, New York, many times, and in other cities for underground construction. It consists of a metal ring devised so that one end is driven into the earth, and the end toward the rear is used for taking out the earth and for building the permanent tunnel of brick, concrete, or other material.

BECQUEREL (*běk-rĕl'*), **A. C.** See under SCIENTISTS.

BEHREND, BERNARD ARTHUR (1875–). American engineer, who was born in Switzerland, but came to America to engage in practice as a consulting electrician. Becoming connected with the Allis-Chambers-Bullock and other companies, he invented numerous devices used in connection with dynamos and motors, and designed some of the largest types of motors. Among his numerous articles and works are *The Induction Motor* and *Engineering Education*.

BELL, ALEXANDER GRAHAM (1847–1922). Inventor of the telephone, the photophone (for transmitting sound by vibrations in a beam of light), and several pieces of photographic apparatus. Later he contributed to the theory of mechanical flight. Bell was born in Edinburgh, Scotland, educated there at the University and at the University of London, moved to Canada for the benefit of his health in 1870, and the next year became professor of vocal physiology at Boston University. His original model of the telephone was exhibited in 1876. His father Alexander Melville Bell (1819–1903), also an inventor, devised a system of "visible speech" for deaf mutes by making an alphabet according to the various positions of the vocal apparatus in speaking.

BENZ, CARL. See under DAIMLER.

BERLINER (*bûr'lĭn-ĕr*), **EMILE** (1851–1929). A German-American inventor, who was born at Hanover, came to the United States in 1870, and in 1878 began to investigate improvements in apparatus for transmitting sound. In 1877 he invented a loose contact transmitter now known as the Berliner microphone, and the next year he adapted the induction coil for use in transmitters. He also perfected the gramophone, devised a method of making disk records, and a revolving cylinder engine much used in aircraft. One of his latest inventions was the acoustic tile for aiding in sound transmission within walls. He and his son also made a successful helicopter, or an airplane capable of rising straight up into the air.

BESSEMER, SIR HENRY (1813–1898). English inventor, born at Charlton; known as the originator of the "Bessemer process" of steel making; when a mere boy he turned his attention to mechanical inventions; in 1856 he announced his discovery that pig iron in the molten form, through which a draught of air was drawn, could be converted into malleable iron; this process was at once put into practical use, and has since undergone no radical improvements; Bessemer was awarded the Telford Medal in 1859; was made president of the Iron and Steel Institute of Great Britain in 1871; his own country was slower than others to recognize the value of his work, but he was knighted in 1879.

BIGELOW, ERASTUS BINGHAM (1814–1879). American inventor who was born at West Boylston, Mass., and in youth worked on a farm, taught school for a time, and prepared a book on stenography. He invented devices used in weaving, among which are the power looms for making Brussels, Wilton, tapestry, and other forms of carpets; looms for making counterpanes, ginghams, wire cloth, and other woven products; and perfected the ways of weaving ingrain carpets. Later in life he took a great interest in economic subjects, and wrote several books on the tariff and similar measures. He was one of the original sponsors of the Massachusetts Institute of Technology.

BLAKE, FRANCIS (1850–1913). Inventor of the Blake telephone transmitter (1878). He was born and educated at Needham, Mass., and for 13 years served under the United States Coast Survey. Harvard University gave him the honorary degree of A. M. in 1902.

BLANCHARD (*blăn'shàr*), **THOMAS** (1788–1864). Inventor of a tack-making machine, increasing the capacity to 200 a minute; previously the heads had to be fastened on by hand-work. He made a machine to turn out gun-stocks, a feat long considered impossible; instead of a set tool he used a variable lathe, now known as a "profile lathe"; and this led to many ingenious devices for working on wood. Blanchard's original machine of 1818 is still in the Springfield, Mass., Armory. In 1825 he perfected and ran the first ordinary steam carriage in this country.

BLENKINSOP, JOHN (1783–1831). An English mechanic, who built a locomotive steam engine, which traveled on a racked or toothed rail. This was patented in 1811 and put in use the next year to draw loads of coal near Leeds, and the capacity was 30 tons of material. George Stephenson saw this before he constructed his *Rocket* engine.

BOGARDUS (*bōgär'd-ŭs*), **JAMES** (1800–1874). American inventor, born in New York; his inventions include the dry gas meter (1833), a medal-engraving machine (1836), and an eight-day clock; his machine for the manufacture of postage stamps won the prize offered by the British government (1839); he built in New York the first factory constructed of cast iron.

BORDEN, GAIL (1801–1874). American inventor, who was born in New York, went to Mississippi, and then to Texas, where during the Mexican War he edited a newspaper. He surveyed the land where Houston now is located. When the gold rush to California began, the need of a concentrated portable food was apparent. Borden first made pemmican, which Dr. Kane used in his Arctic journeys in 1851 and 1853. Borden invented a meat biscuit, condensed milk (1856), an extract of beef and other products from fruits and beans. He established factories in New York and elsewhere, and as early as the Civil War his condensed milk was extensively used.

BOTTGER or **BOTTIGER** (*bût'gĕr*), **JOHANN FRIEDRICH** (1682–1719). German inventor, known as the originator of Saxon or Meissen porcelain; a laboratory was erected for him in Saxony, and about 1708 he brought out his celebrated porcelain; attempted to make gold, but without success.

BRAGG, W. H. See under SCIENTISTS.

BRAILLE (*brēl*), **LOUIS** (1809–1852). A French teacher who devised a system of dots representing the letters of the alphabet for use in printing books and music for the blind. He was deprived of sight when he was three, was educated at the Institute for the Blind in Paris, began teaching there in 1828, and developed his system which is now very widely used for instruction in schools for sightless persons.

BROWN, ALEXANDER (1852–1911). Inventor of bulk unloading machinery. Before he perfected the Brown hoist in 1880, ore, coal, and similar products had to be shoveled into a tub or basket, and then hoisted by ropes or other devices. It cost from twenty-five to fifty cents just to hire men to shovel a ton of product. For the old tub Brown substituted a grab bucket. The modern Brownhoist and other like lifting devices and ore bridges are developments of his idea. Of many other patents taken out by him, highway bridges, machines for weighing loads, turntables, and wireless transmission masts are important. He lived in Cleveland, Ohio, where he was graduated from the public schools and also from the Brooklyn Polytechnic Institute.

BROWN, JOHN ROGERS (1810–1876). Pioneer in the design and perfection of various types of precision instruments. Some of these are the first accurate linear dividing machine for use in making graduations on rulers (1850); the vernier caliper, which measures within a single one-thousandths of an inch in accuracy (1851); a precision gear cutter, long the model for all similar machines (1864), and a universal milling machine for use in all sorts of shops (1862). He organized the manufacturing firm of Brown and Sharpe of Providence, Rhode Island, which made the Willcox and Gibbs sewing machine for many years, together with numerous other well-known mechanisms. The influence of Brown's work has been felt in most subsequent attempts to provide machines that are faultless in accuracy.

BROWNING, JOHN M. (1854–1926). An inventor of various types of guns, who was born in Utah, and in 1879 perfected a breech-loading rifle firing a single shot. From that time he designed many types, such as the Remington autoloading, Winchester repeating, Stevens rifles, and Colt automatic pistols. The U. S. army adopted a machine-gun of his design (1890), and two others used in the World War in 1918.

BURDEN, HENRY (1791–1871). He began to manufacture agricultural tools in Albany, N. Y., in 1819, having come from Scotland. In 1820 he patented a cultivator, said to be the first in America. Later he lived in Troy, N. Y. From an early invention

of railway spikes, 1825, fifteen years later he adapted them to the flat rails then coming into use. The present-day hook-headed spike is a descendant of Burden's first type. His horse-shoe making machine (1834) revolutionized the making of iron shoes for horses.

BURROUGHS, WILLIAM SEWARD (1857–1898). After graduating from high school, he worked in a bank in Auburn, N. Y., for seven years; his health being poor, he went to St. Louis where he found work in a machine shop, displaying an obvious mechanical genius. He worked by day in the shop; his evenings were devoted to endless designing and drawing until after repeated failures, he completed designs for all the essential parts of the first adding machines. In 1884 his plans had progressed so far that he was able to obtain a loan of $700 to finance the building of the machine. Seven years of repeated trial and failure followed, but he had found a friend in Mr. Joseph Boyer in whose shop the work was being done and who kept the shop work going, while, to get money to carry on his experiments, Burroughs sold stock in his little company. It cost $100,000 before the machine of practical commercial value was completed. Between 1891 and 1895 the American Arithmometer Co., the parent of the Burroughs Adding Machine Co., sold about a thousand machines but of these more than a hundred had to be taken back because the operators were incompetent. Further improvements had to be made before a "fool-proof" adding machine could be offered to the public. Before Mr. Burroughs died, however, thousands of his machines were in use. In 1904 the business was moved to Detroit and incorporated as the Burroughs Adding Machine Co. It has since grown to mammoth proportions.

BURT, WILLIAM AUSTIN (1792–1858). Going from Massachusetts, his birthplace, to New York, he fought in the War of 1812, and in 1824 emigrated to Detroit. Having been appointed deputy U. S. surveyor in Michigan he invented the solar compass. Later he was a judge of the higher courts of Michigan; he was one of the promoters of the Sault Sainte Marie Canal.

CARTWRIGHT, EDMUND (1743–1823). An English inventor of the power-loom, perfected in 1787, and the wool-combing machine which he first patented in 1790. Mills established by him did not afford him a competence, and the government gave him a grant of 10,000 pounds in 1809, with which he bought a farm in Kent. Other devices patented by him were a machine for making rope (1792), and an alcohol engine (1797), besides some farm machinery.

CAXTON, WILLIAM. First English printer. See DICTIONARY OF AUTHORS.

CHANUTE (*shă-nūt'*), **OCTAVE** (1832–1910). Inventor of gliding planes that were fairly effective; advised the Wright Brothers concerning principles of mechanical flight. The son of a professor, he was born in Paris, educated in New York, and became a civil engineer on the New York Central (1848). In 1867 he built the first bridge across the Missouri River. For years he took part in railway construction and operation, being for a time chief engineer of the Erie Railroad, which he greatly developed. In 1888 he became interested in flying machines. He succeeded in obtaining a fair degree of equilibrium. In 1896 he perfected a five-deck glider, with movable wings fore and aft to prevent pitching; this type led to the invention of a trussed biplane glider. His machines, in which he made hundreds of flights on the sand dunes along Lake Erie, were advances over anything made before.

CLYMER (*klaĭ'mar*), **GEORGE** (1754–1834). The inventor of an improved pump to exhaust the water quickly from coffer dams, was born of Swiss parentage in Pennsylvania. In 1816 he perfected an iron hand-press for use in printing, the first great American invention of such machinery. Putting an eagle on top, and this caused the platen to rise after the impression, he called his press the Columbian. Impressions could be made much more certain and even more delicate by this press.

COLLINS, ARCHIE FREDERICK (1869–). Inventor of the wireless telephone, was born in Indiana, and first succeeded in his experiments at Narberth, Pennsylvania, in 1899. For this he was awarded the gold medal of the Alaska-Yukon Exposition in 1909, after having given a public exhibition the previous year at Madison Square Garden in New York. Collins also invented the rotating oscillation arc in 1909. He wrote *Wireless Telegraphy* (1905), and over 50 other books on scientific and educational subjects, includi *A Bird's Eye View of Invention* (1926).

COLT, SAMUEL (1814–1862). American man facturer; born in Hartford, Ct.; inventor of the volver; secured patents for a revolving pistol (1835 and in 1847 contracted to make 1,000 weapons f General Taylor. Laid one of the first submarine cabl in New York harbor (1843), and erected his weap factory in Hartford (1852).

COOLIDGE, WILLIAM DAVIS (1873–). American physical chemist, inventor of the Coolid tube (1913) for use in X-ray investigations. This a sealed round bulb with prolongations at either en the cathode at one, the anode at the other. T stream from the cathode is provided by evaporati of electrons. Dr. Coolidge also used ductile tungst first in his invention.

COOKE, WILLIAM FOTHERGILL (1806–1879 Inventor of the single needle apparatus in telegrapl (1837), in partnership with Charles Wheatstone (q. v. Disagreeing with the latter as to which had earn the greater share of credit in the invention, he boug out all the others interested and organized his ow company in 1846, which was successful. He was bo in Middlesex, England, served in the Indian arm (1826–31), then studied medicine, but turned to t telegraph as a life interest.

COOPER, PETER (1781–1883). An Americ business man and inventor, born in New York, a was engaged successively in making machines f shearing cloth, in making furniture, and then in t retail business. In 1830 he planned and built t "Tom Thumb," the first steam locomotive made America, which was used on the Baltimore and Oh Railroad. Later he built iron foundries in New Yor New Jersey, and Pennsylvania, where he made ir beams, steel by the Bessemer process, and other pro ucts. He encouraged and financed the laying of t Atlantic cable by Field, and at one time controll about half the telegraph lines in America. Later founded Cooper Institute in New York. For h philanthropies see the index.

CORLISS, GEORGE HENRY (1817–1888). T inventor of the famous Corliss engine for which patented various devices, mainly those for securi uniform revolution of the wheel. A giant model w set up for furnishing power at the Philadelphia position in 1876, and this was later transferred Pullman, Ill. He was born in Easton, N. Y., a lived much of his life at Providence, R. I.

CORT, HENRY (1740–1800). An English fou dryman who built the first puddling furnace and t first rolling mill. In the blast furnace the coal a iron were burned in contact with each other, but Co perfected the process by separating them. This pl allowed the iron to be taken out in a pasty mas which could be hammered, and the process is still common use. Cort also invented some grooved ir rollers, arranged to turn in different directions, a of various sizes arranged in pairs. The iron was r through successions of these and reduced smaller a smaller.

CRISTOFORI, BARTOLOMEO (1665–1731). A Italian musician and maker of harpsichords at Padu In 1687 he was persuaded by the Prince of Floren to take up his residence there, and he remained aft the death of the prince in the patronage of the gra duke. By 1711 he had perfected the predecessor the modern pianoforte, a new type of musical instr ment.

CROMPTON, GEORGE (1829–1886). Coming America from Bolton, England, he became interest in weaving, as several relatives had before him. 1857 he patented a broad loom, capable of almo doubling the width of cloth, and capable of hig speed. Of about 100 of his inventions concerni the making of cloth, a very practical one was a devi to prevent the dripping of oil on fabrics durin weaving.

CROMPTON, SAMUEL (1753–1827). English d signer of the spinning mule, a great improveme over the old spinning devices used before 1779. Bei too poor to take out a patent, he confided the secr to others on stipulation that they should pay him certain sum, but only a small part was receive Not succeeding in business, he was finally awarde £5,000 (1812) by the government.

CRONSTEDT (*krŏn'stĕt*), **EXEL FREDERI** (1702–1765). A Swedish baron and scientist, who

1751 discovered nickel, and this led to the perfection by others of a process of using this element in many commercial ways. He was the first, in a work on mineralogy, to classify rocks according to chemical composition and to distinguish them from minerals.

CROOKES, WILLIAM (1832–1919). English scientist and inventor, best known as discoverer of the element thallium, and for the invention of the Crookes tube, which made modern investigations in radium possible. This is a tube containing a small amount of gas in which an electrical discharge passes. Crookes also invented a kind of glass which protects workers from strong electric rays. See also under SCIENTISTS.

CROWELL, LUTHER CHILDS (1840–1903). After retiring from the sea, Crowell began to invent useful articles. One of his first was a way to fold paper bags, another to tie them, and finally a machine for making them. Hearing that the folding of newspapers after they went through the rotary press was a problem, he perfected a V-shaped device which folded papers of ten or more pages as they went through the press. His invention did away with the old cumbersome tape process of folding.

CURTISS, GLENN HAMMOND. See under SCIENTISTS.

DAGUERRE (*dā-gâr'*), **LOUIS JACQUES MANDE** (1789–1851). French physicist, born at Cormeilles; invented the art of photography on metal, called the "daguerreotype" process; was awarded a pension of 6,000 francs and made a member of the Legion of Honor.

DAIMLER (*dīm'lĕr*), **GOTTLIEB** (1834–1899). Inventor of several types of light oil and gas engines. In 1884 he perfected a four-cylinder gas engine, which he tried in a motor vehicle the following year. He shares with Carl Benz the credit for inventing the first successful gasoline automobile, though George Selden of Rochester, New York (1877) applied for patents on a horseless carriage, which apparently was never manufactured. Benz first applied the electric ignition to a two-cylinder gasoline engine. Daimler was born at Würtemberg in Germany, was educated at Stuttgart, and in 1872 joined with Dr. Otto in perfecting a gas engine. After 1882 he alone developed his inventions.

DALIN (*dā'lĭn*), **GUSTAV** (1869–). A Swedish chemist, who invented a hot-air turbine, a milking machine, a product called agamassan, which will absorb acetylene without danger of explosion, and a substance called solventil, which will cause a fire to light after the sun goes down and will extinguish it when morning comes. He won the Nobel prize in 1912, and in 1913 was blinded by a laboratory explosion.

DANCEL, CHRISTIAN (1847–1897). American inventor who perfected the Goodyear welt system of manufacturing shoes. In 1867 Charles Goodyear, Jr., son of the inventor of the Goodyear rubber process, engaged Dancel to superintend the Goodyear factory, and here he remained for 25 years. Of his numerous inventions, some of the more important ones are the welt guide (1874), the lock-stitch machine, still used in many factories, which was purchased by Goodyear from him (1885), and, finally, the curved needle machine (1893) for sewing welts by lock-stitch while the shoe is on the last.

DAVENPORT, THOMAS (1802–1851). Born of a large family in Vermont, he was set to work at the forge, but turned his thoughts toward an electric magnet near Fort Ticonderoga, N. Y., and from this he developed and patented the first electric motor made in America. In this he used the principle of producing rotary motion by a change in magnetic poles in rapid succession. He employed also the principle of the commutator, or bunch of brush nozzles which take up the electricity generated by a dynamo (1837). He organized the first stock company for electrical developments, applied electricity first to driving the printing press, and left a model of a player piano in incomplete development.

DAVY, HUMPHREY. See under SCIENTISTS.

DEFOREST, LEE (1873–). Inventor of the audion tube and other improvements which have made radio and telephone by wireless possible. He was educated at Yale and Armour Institute, employed by the Western Electric Company, and later established business for himself. He was the first to use alternating generation and transmission in radio, built the first five stations for the U. S. Navy, made other improvements and applications of the audion, and experimented with a device to synchronize sound and picture in the talking film industry.

DELANY, PATRICK BERNARD (1845–1924). Born in Ireland, he lived for many years at Hartford, Conn., and among his inventions is the multiplex telegraph system. This was one of the first plans for transmitting messages and printing them at the other end.

DIESEL (*dē'sĕl*), **RUDOLPH** (1858–1913). A German scientist, who invented a type of engine now bearing his name, which burns heavy oil without explosion in the cylinders. He was educated at Augsburg and Munich and perfected his invention about 1893, with further improvements in 1898, and later he tried to apply the principle to automobiles. The Diesel engine is now used in many of the larger ships.

DISSTON, HENRY (1819–1878). A Quaker of Philadelphia who made the first adequate American steel saws. Not finding good enough material for his product, he went about making better steel (1855), and his firm sold this product to other houses. He commenced in 1840 by making his own tools, but the business was small till the Civil War increased the demand many-fold. Disston equipped and sent 35 of his workmen to war, promising their old jobs back at the end. Later he made fine brass and steel, especially in sheets.

DOLBEAR (*dōl'bēr*), **AMOS EMERSON** (1837–1910). He was born in Norwich, Conn., educated at Ohio Wesleyan, and became a professor at Tufts College. Among his inventions are the improvements in the machine which writes or prints telegrams, in the gyroscope, in magneto-telephony and wireless, and in applying electric waves to photography. He succeeded in converting sound into electricity in 1873.

DOLLOND (*dŏl'ŭnd*), **JOHN** (1706–1761). An English maker of optical goods, originally a weaver, who found a way to make concave lenses of flint glass for use with convex lenses of crown glass. This was a great improvement in telescopic lenses.

DORR, JOHN VAN NOSTRAND (1872–). Metallurgical engineer, who developed the cyanide process for extracting metal from ore rock, and the Dorr classifier and Dorr thickener, which have made it possible to operate many mines hitherto considered unprofitable. He also developed processes for treating sewage and purifying water in running streams. Dorr was born and educated in New Jersey, worked two years with Edison, was a chemist and assayer in the West (1895–1910), a mining operator in Black Hills (1901–13), and then became a consulting engineer.

DREYSE (*drī'zā*), **JOHANN NIKOLAUS VON** (1787–1867). Born at Sömmerda, near Erfurt, Prussia; invented the needle-gun (1827), and made it breech-loading (1836); this firearm was adopted by Prussia in 1841, and used in the war between Prussia and Austria (1866). He was ennobled in 1864.

DUBILIER, WILLIAM (1888–). Inventor of numerous devices for use in radio and the arts, including a substitute for the glass Leyden jar, wireless systems, the first radio installation in a British airplane, and of high frequency apparatus, and other devices covered by scores of patents. United States, British, and French governments adopted his inventions, such as a device for detecting submarines accepted by the British and French in 1916.

DYER (*daĭ'ar*), **LEONARD HUNTRESS** (1873–). American patent lawyer, naval commander, and inventor of a flying boat now built by the Curtiss Company, electric steering apparatus for boats having steam turbines, and a direct drive automobile. He was born in Washington, D. C., and educated at George Washington and Georgetown Universities.

EADS (*ēdz*), **JAMES BUCHANAN** (1820–1887). Eminent American engineer and inventor, born at Lawrenceburg, Ind.; moved to St. Louis (1833); in 1839 he became clerk on a Mississippi steamboat, and studied engineering by himself; he built, within 100 days, seven iron-clad gunboats of his own design, for the use of the government on the Mississippi; he also constructed the bridge across the Mississippi at St. Louis (1867–1874), one of the finest structures of its kind in the world; Eads undertook at his own risk the task of deepening the channel at the mouth of the Mississippi and, by the construction of jetties, successfully carried the enterprise to completion (1875–1879); the last years of his life were devoted to extensive engineering operations; he spent much time

in the planning of a ship-railway across the Isthmus of Tehuantepec; in 1884 the British Society for the Encouragement of Arts, Manufacturers, and Commerce awarded him the Albert medal; Eads was the first American to receive that honor.

EASTMAN, GEORGE (1854–1932). An American inventor, manufacturer, and philanthropist, began as an amateur photographer, perfected a system of making dry plates, and originated the kodak. For many years at the head of the Eastman Kodak Company, and other concerns. Being specially interested in music, he gave large sums to develop a civic opera and music center in Rochester, N. Y., and at the University of Rochester, to which he added considerable money for general purposes. Mr. Eastman also gave millions to the Massachusetts Institute of Technology and two millions to Hampton and Tuskegee Institutes.

EDISON, THOMAS ALVA (1847–1931). Noted American electrician and inventor, born at Milan, Ohio; at an early age he learned telegraphy, and showed a marked fondness for experimenting with electricity; first invention was a "repeater" for use in telegraphy; removed to Boston, and shortly afterward became superintendent of the New York Gold and Stock Telegraph Company; his inventions having placed him in a better financial position, he established a laboratory at Menlo Park, N. J., and developed his quadruplex system of telegraphy; among his other inventions are the microphone, the carbon transmitter, the phonograph (1876), the incandescent lamp (1880), improvements in dynamo-electric machinery, storage cells, etc.; over 300 patents have been granted him; the value of his work has been recognized in Europe as well as in America; in 1878 he was made a member of the Legion of Honor, in 1889 a commander; the Albert medal of the British Society of Arts was awarded him in 1892; no one in the nineteenth century has been so successful in applying scientific truths to practical purposes; laboratory is at present located at West Orange, N. J.

EIFFEL (*ī fel'*), **GUSTAVE** (1832–1923). French engineer, born at Dijon; constructed an iron bridge over the Garonne at Bordeaux (1858), the bridge over the Douro at Oporto (1876), and the remarkable Garabit viaduct (1882); the Eiffel Tower (985 feet), the highest structure in the world, was erected by him (1887–1889) at a cost of about $1,200,000; on the completion of the tower, he was made a member of the Legion of Honor; in 1893 he was arrested for complicity in the Panama Canal scandals and was sentenced to fine and imprisonment, but the sentence was revoked.

EMERSON, HARRINGTON (1853–). American efficiency expert, who perfected ways to eliminate waste in industrial plants, organized long distance mail routes in Alaska (1898–1901), improved service on the Santa Fé system, and helped find a northern route for a submarine cable to Alaska. He was born in New Jersey, educated in Europe, acted as professor of modern languages at the University of Nebraska (1876–82), engaged in banking and land business (1882–96), and was president of Emerson Engineers (1900–23).

ENGERTH, WILLIAM, BARON (1814–1884). Austrian engineer born in Pless, Prussian Silesia. He invented the "Engerth system" for freight locomotives, which since its introduction on the Semmering Railroad has found wide adoption on the Continent. He also invented, devised, and built the river gate near Nussdorf which prevents the entrance of ice into the Danube Canal at Vienna, thus preventing the resultant annual inundations.

ERICSSON, JOHN. See under DICTIONARY OF HISTORY.

EVANS, OLIVER (1755–1819). American inventor, born in Newport, Del.; his first inventions include the automatic flour mill, the first high-pressure steam engine, machine for making card teeth (1777), first steam dredge, the "Cornish" boiler, and an engine for the propulsion of river boats. The dredge weighed about 4,000 pounds, and propelled itself to the river.

FAIRBAIRN (*fâr'bârn*), **WILLIAM** (1789–1874). A Scottish engineer, who at Manchester established a business which led to great results in improving the construction of boilers, the building of bridges, and the use of iron in cannon. Among his early inventions was an iron shaft to replace a wooden one in a cottton mill. With Robert Stephenson, he made a tubular bridge across the Conway and Menai Straits (1845), later applying his knowledge to many oth bridges. In 1869 he was made a baronet.

FARADAY (*făr'ă-dā*), **MICHAEL.** See und SCIENTISTS.

FARMER, MOSES GERRISH (1820–1893). Bo in New Hampshire, he taught in Maine, in Dove N. H., and later at the University of Pennsylvani He was among the first to think of an electric loc motive, building an experimental car which at Dove N. H., in 1846 carried two passengers, using 48 cu of storage battery. For the city of Boston, he pe fected a fire-alarm telegraph, and made some i provements in dynamos. In his day he was the on American honorary member of the English Society Electrical Engineers.

FELT, DORR EUGENE (1862–). Invent of the first key operating calculation machines, a one of the first adding and listing devices. He w born in Beloit, Wisconsin, organized the Felt a Tarrant Company, of which he became president. 1919 he was sent to England by the government investigate conditions of labor and industry.

FISKE, BRADLEY ALLEN (1854–). Ame can rear admiral and inventor of numerous devic used on warships, who was born at Lyons, N. Y was graduated second in his class at Annapolis (187 and became an ensign the following year. He pass through all the grades to rear admiral in 1911 a retired in 1916. As navigator of the *Petrel* in t battle of Manila Bay, he was thanked by Admir Dewey for conspicuous service. Commanded later t *Minneapolis*, *Arkansas*, and *Tennessee*. Of h numerous inventions, the best known are a naval te scope sight now used by all chief navies, a torped plane adopted by most nations, gun director syste and many devices to communicate, steer, and mana boats and guns in action. He wrote *Electricity Theory and Practice*, *The Art of Fighting*, and *I vention*.

FITCH, JOHN (1743–1798). American invento born at East Windsor, Conn. He brought out in 17 a steamboat which accomplished three miles an hou A company for the promotion of navigation on t Delaware proved unsuccessful. Having failed arouse interest in his invention in France (1793) became disheartened and committed suicide. It is sa that Fulton obtained his ideas from some of Fitch plans.

FOUCAULT (*fōō-kō'*), **JEAN BERNARD LEO** (1819–1868). French scientist, who contributed i portant results to the study of light, especially measuring the velocity. He also invented a gyroscop a polarizer now bearing his name, and a device f using electric light in optical and microscopic instr ments. He won the Copley medal (1855) and nume ous honors from learned societies. From 1845 he w scientific editor of the *Journal des Débats*.

FRANKLIN, BENJAMIN (1706–1790). An Ame can author, statesman, scientist, and natural philo opher, one of the great men of the world in his ag Among his inventions are the Franklin open stov a great improvement over anything then existing, t common lightning rod, some improvements in printin and he also proved the identity of lightning with ele tricity and first used the terms positive and negati applied to electric theory. See also under STATESME

FRARY, FRANCIS COWLES (1884–). Ame ican chemist, born in Minneapolis, a graduate of t University of Minnesota, and a student at the Unive sity of Berlin. He taught chemistry at Minneso (1905–15), until he engaged in war service in 191 was with the Oldbury Electro-chemical Company Niagara Falls, New York, and since 1919 with t Aluminium Company of America. He is the invent of Frary metal, a hard alloy of 85% of lead and 15 of antimony, and he has also developed the electrolyt refining of aluminium in the manufacture of the co mercial product.

FRASCH, HERMAN (1852–1914). A Germa American chemist who perfected important process for refining oils, and these were acquired finally the Standard Oil Company. Sulphur, wax, white lea and other commercial substances were treated by hi in new ways. Born in Germany, he came to Ameri in youth, set up a pharmacist shop in Philadelphi and from that developed his interest in ways of pu fying various products.

FRAUNHOFER (*froun'hō-fĕr*), **JOSEPH VO** (1787–1826). German optician and inventor of i proved optical glass, acromatic lenses, and the speci

type of prism through which the light passes in being brought to a focus in front of the telescopic eyepiece. Though not the first to discover dark lines in the solar spectrum, he first studied them and listed 576 which remain more or less constant relatively in various spectra.

FRESNEL (*frā-nĕl'*), **AUGUSTIN JEAN** (1788–1827). French physicist, born in Broglie; ignorant of the work of Young, he established by experiment the undulatory theory of light; invented the Fresnel lenses for lighthouses, which occasioned a great improvement and complete change in the mode of lighthouse illumination.

FULTON, ROBERT (1765–1815). Noted American engineer, born at Little Britain, Pa.; in 1787 he went to London, where he studied painting, but soon decided to devote his time wholly to mechanics, and became interested in steam navigation; while in Paris (1796–1803) he constructed a submarine vessel; a small steamboat made by him in 1803 was entirely successful; returning to New York he launched the *Clermont* (1807), which made regular trips between Albany and New York at the average speed of five miles an hour; Fulton was not the first to apply steam to navigation, but was the first who was successful.

GATLING, RICHARD JORDAN (1818–1903). American inventor, born in Hertford County, N. C.; his principal invention was the revolving gun (1861), which he later improved; the gun was adopted for use by the United States (1866), and by several European governments; among his other inventions may be noted a steam plow, a hemp-breaking machine, and a new gun metal of steel and aluminum; invented the Gatling firearm.

GED (*gĕd*), **WILLIAM** (1690–1749). Inventor of stereotyping, which was patented in 1725. His process consisted of soldering together loose types, but his fellow-printers of Edinburgh refused to adopt his scheme, even though he proved its practical value. In London he formed a partnership, but this resulted in virtual failure, and Ged never profited from his invention. Dutch printers offered him considerable sums, which he loyally as a Briton refused to consider. Through the exertions of his own sons, the process was perfected after Ged's death by Andrew Wilson. Ged had printed two prayer-books and a Latin text from plates made by his process.

GEISSLER (*gīs'lĕr*), **HEINRICH** (1814–1879). The inventor of the mercury high vacuum pump and the tube which both bear his name was a maker of scientific instruments in Bonn, where he established a factory in 1854. The Geissler tubes have been extensively used in spectroscopic examinations of incandescent gases.

GODDU, LOUIS (1837–1919). A French-Canadian inventor of more than 200 devices, most of them connected with the shoe industry. He was born in Canada, but at 16 went to Lynn, Mass., where he worked in a shoe factory for four years. From 1858 to 1866 he lived at Montreal, after which he returned to Mass. Among his inventions was a wire-stitching machine for fastening soles of shoes, much used for many years.

GOETHALS, (*gō'thălz*), **G. W.** See under SCIENTISTS.

GOODYEAR, CHARLES (1800–1860). American inventor, born at New Haven, Conn.; went into business with his father, but failed in 1834; at this time he began experiments with a view to manufacturing india rubber; after discouraging failures, Goodyear finally succeeded in vulcanizing rubber and patented his process (1844).

GRAY, ELISHA (1835–1901). American inventor of the telautograph,—a device for reproducing handwriting through use of electricity in transmitting it,—and of other electric apparatus. Of his other half a hundred patents, the electric annunciator system for hotels and offices, the telegraph printer, and multiplex telegraphy are the most important. He also devised electric bells for use in submarines. Gray's machine for transmitting sound by wire was presented to the U. S. patent office shortly after Alexander Graham Bell's telephone was patented. The United States supreme court at last confirmed the rights of Bell in a series of litigations. Gray wrote *Telegraphy and Telephony* and *Electricity and Magnetism.*

GUERICKE (*gā'rĭ-kē*), **OTTO VON** (1602–1686). A German scientist who first invented the air-pump (1650), which he used to create a vacuum. He also performed many experiments with an electrical machine which used a ball of sulphur to rotate and create the current. Born in Magdeburg, he was educated there and visited France and England, and for a time acted as mayor of his native town.

GUTENBERG (*gōō'tĕn-bĕrg*), **JOHANNES** (*c.* 1400–*c.*1468). Inventor of printing from movable types; with Johannes Fust, set up a press in Mainz, Germany, using wooden types; later printed a Latin Bible with copper or tin types.

GUNTER, EDMUND (1581–1626). An English mathematician who was professor of astronomy at Gresham College, Oxford, from 1619 till his death. Some believe he discovered that magnetic declination at a given point varies from time to time. He is best known, however, as the inventor of Gunter's chain still used in surveying, consisting of 100 links and being 22 yards long; of the scale used often by seamen to solve problems by means of a pair of compasses; the line, which later led to the modern slide rule, and the quadrant, an instrument to find the hour of the day and to determine the altitude of objects in degrees.

HADFIELD, ROBERT ABBOTT (1859–1940). An English metallurgist who patented (1883) a process for the making of manganese steel, and later made many other alloy steels, and improved processes for working in metals. In 1908 he was knighted and in 1917 made a baronet. Besides many technical papers of value, he published a book *Metallurgy and its Influence* (1925), which is a standard work.

HALE, G. H. See under SCIENTISTS.

HALL, CHARLES MARTIN (1863–1914). The inventor of a process for the manufacture of aluminum, which previously had been worth as much as silver, and afterward could be produced for 20 cents a pound. Hall perfected his apparatus in 1886, the year after his graduation from Oberlin College, and by 1890 the company he founded, now the Aluminum Company of America, began turning out the product in quantity. Hall left most of his large estate to Oberlin and other educational institutions.

HALLEY (*hăl'lē*), **EDMUND** (1655–1742). English scientist and astronomer, the discoverer of Halley's comet, and inventor of the diving bell, which is a huge box-like structure in which men can work under water in laying foundations and digging for bridge piers. He also made a leather suit from which the modern diver's apparatus has been evolved. See also under SCIENTISTS.

HAMILTON, WILLIAM ROWAN (1805–1855). See under SCIENTISTS.

HAMMER, WILLIAM JOSEPH (1858–1934). An American maker of radium luminous preparations used in watch and clock dials for seeing time in the dark, and perfector of electrical instruments in connection with the Edison Company. He was born in Pennsylvania, educated at Newark, N. J., and in technical schools abroad, became an associate of Mr. Edison in 1879 and in 1881 the chief engineer of the London branch office. Supervised electrical exhibits at several world expositions.

HAMMOND, JAMES BARTLETT (1839–1913). The inventor of a new type of writing machine characterized by plates on which different alphabets could be placed in the machine in turn for the purpose of using different styles of type and different languages, and of a plan of aligning the machine mechanically. His machine was placed on sale in 1884. Hammond was born in Boston, was graduated from the University of Vermont, the Union Theological Seminary, and later studied philosophy and science in Germany. Much of his later life was devoted to experiments in science.

HAMMOND, JOHN HAYS, JR. (1888–). The son of the eminent mining engineer, John Hays Hammond (q.v.), he was born in San Francisco, educated at Yale, and spent much time in scientific study of improved telephone, radio, and other forms of communication. Of his more than 200 patents, some of the most important are a new type of torpedo for coast defense, controlled by wireless from stations on land, a system of automobile torpedo firing, a device for selective radio telegraphy by which eight messages can be carried at the same time on a single carrier wave, a plan of aerial coast surveying, and several devices for improving the tones of both pipe organs and pianos. Several of these inventions are extensively used by the government for the navy and army.

HAMPSON, WILLIAM (d. 1926). British inventor of a machine to liquefy gases at low pressures, called the Hampson machine, which greatly reduced the cost and increased the efficiency of production. He also made a device for measuring the amount of X-rays in machines used by physicians, and a pencil for practical application of carbonic acid snow to wounds.

HARGREAVES (*här'grēvz*), **JAMES** (—1778). English inventor. While carrying on weaving and spinning at home in 1760, he invented the carding machine, a substitute for hand cards. In attempting to spin several threads at once, an accident revealed the necessary position of the spindles, and the spinning-jenny was the result in 1764. Infringment suits prevented the success he deserved.

HARRISON, JOHN (1695–1776). An English maker of time-pieces of remarkable accuracy, who won a prize offered by the British government for a series of chronometers which would measure the longitude within 60, 40 and 20 miles respectively. His device, on a trip to Jamaica and return, came within less than two minutes from the correct elapsed time and within 18 miles of the correct distance. Between 1762 and 1773 the entire amount of £20,000 was paid him in installments. His gridiron pendulum is a device for keeping its length constant in spite of changes in temperature.

HAYNES, ELWOOD (1857–1925). Securing the aid of the Apperson Brothers, who had a machine shop, Haynes in 1894 perfected a gasoline driven automobile that went one-half mile without stopping. When he drove his machine on the streets of Chicago (1895), he was ordered off by a bicycle policeman.

HENRY, JOSEPH. See under SCIENTISTS.

HERTZ (*hĕrts*), **H. R.** See under SCIENTISTS.

HEWITT, PETER COOPER (1861–1921). An American capitalist and scientist, grandson of Peter Cooper, who established a glue business in the early days of New York. He perfected the process of making glue products, gave up business to devote himself mainly to science, and established a private laboratory. Here he developed the celebrated vapor lamp now much used in photographic studios and other places where certain types of illumination are needed. This is a long glass tube supplied with electric wires, sealed at both ends, and containing a little free mercury, which is heated in the vacuum of the tube and gives off a luminous mist. Red rays are missing from this light, and so it is beneficial to the eyes in printing offices and factories.

HOE, RICHARD MARCH (1812–1886). American inventor, born in New York City; began to study printing press manufacture (1827); his rotary newspaper press known as the "Hoe's lightning press" appeared in 1846; afterwards he invented the web-perfecting press which, besides printing on both sides of the sheet, cuts and folds the papers. His presses revolutionized the art of newspaper printing. Other members of the Hoe family, including his son and grandson, perfected the Hoe presses. His nephew, the third Robert Hoe (1839–1909), was among those who built machines for artistic, magazine, and color work.

HOLDEN, SIR ISAAC (1807–1897). English inventor, who produced the lucifer match (1829); in 1848 he established a large factory at St. Denis, near Paris; there he made many improvements in wool-combing machinery, and became wealthy; established his business at Bradford (1864), entered parliament, and was made a baronet.

HOLLAND, JOHN PHILIP (1844–1914). An Irish-American inventor of the submarine boat, which was perfected finally in 1898. Holland was born in Ireland, taught there for a time, and came to the United States in search of a torpedo device that would destroy a large ship. His first model (1877) proved that a boat could be submerged and controlled under water. Out of his original design all modern submarines and submarine torpedo craft have been developed.

HOLLEY, ALEXANDER LYMAN (1832–1882). American metallurgist, born at Lakeville, Ct.; in 1854, in partnership with one Colburn, he became editor of the *Railroad Advocate*, and later edited other publications; went to England (1863), purchased the Bessemer patents, started the Bessemer plant at Troy, N. Y. (1865), and erected steel works at Harrisburg, Pa. (1867); became president of the Institute of Mining Engineers (1875), and lectured on iron and steel manufacture at Columbia University (1879–1882).

HOPKINS, NEVIL MONROE (1873–). American designer of various electrical devices, instrumen for recording high temperatures, and other mechanis for use in the navy; born in Maine, educated at Geo Washington and Harvard Universities, and enter into practice as an engineer. For three years (190 1908) he was in charge of power plants and constr tion at the U. S. navy yards, and then became expert in the office of the U. S. Bureau of Roa and also technical adviser to several firms and boar

HOUSE, ROYAL EARL (1814–1895). Invent of the telegraph printing machine (1844) by whi messages could be transmitted and printed in Rom characters at the other end. His patent was confirm after extensive litigation. He was born in Vermo lived many years in New York, and died at Brid port, Conn. Numerous improvements in telegraph vices are credited to him.

HOWE, ELIAS (1819–1867). American invent born in Spencer, Mass.; known as the inventor the sewing machine (1845); his machine attract no notice at first, but its value was soon appreciat and he amassed a fortune of $2,000,000; received gold medal at the Paris Exposition (1867), and t cross of the Legion of Honor.

HUNTSMAN, BENJAMIN (1704–1776). A Briti clockmaker of Sheffield, England, who needed bett steel for his own use for watch springs. He devis the crucible steel process, kept it secret for a time, b the plan was revealed by a spy. It consisted simp of melting up small pieces of carbonized iron in a sm crucible. Such a method insured a harder, more u form product.

HUSSEY, OBED (1791–1859). A Nantucke Mass., sailor, who at last turned toward invention. 1833, after less than a year of experiment, he put successful mower in the field anticipating McCormi by at least a year. Taking up the shearing ide Hussey arranged a cutter-bar and fingers, throu which the cutting knives run, and this idea w adopted by all later mowers and reapers. Hussey al invented a type of hook and eye to replace buttons, can-crushing machine, and an artificial-ice machine.

HUTCHISON, MILLER REESE (1876– American inventor of the acousticon, the dictograp klaxon horn and several hundred other patented d vices, many of them having to do with applications electricity. Associated with the Edison interes (1901–17) in the improvement of storage batteri and after 1921 was president of his own company.

HYATT (*hī'at*), **JOHN WESLEY** (1837–1920 An American who patented various products, the chi of which are celluloid and its various adaptation such as the composition billiard ball. A system water purification designed by him is extensively us in American cities. Other important inventions are roller bearing, a stitching machine for sewing leath belts, a new type of crusher for sugar cane in t making of sugar, and a process for solidifying wo for billiard balls, croquet mallets, and the like.

IVES (*īvz*), **FREDERIC EUGENE** (1856–1937 American inventor of the first practical process of col photography and other improvements including t half-tone process now generally used in photo-engra ing (1886), and the three-color printing process no used largely in illustrations and works of art as r produced in papers and magazines. Among his oth numerous patents is one for the taking of moti pictures in colors. Recipient of numerous medals. was born in Litchfield, Conn., and lived for many yea in Philadelphia.

JACQUARD (*zha-kar'*), **JOSEPH MARIE** (175 1834). French mechanician, born at Lyons; know for the Jacquard loom publicly exhibited in 180 which invention revolutionized the art of weaving.

JENKINS, C. FRANCIS (1868–1934). Americ inventor of the first practical projector of life-size m tion pictures, a claim investigated by the Frankl Institute of Philadelphia and confirmed by awardi the inventor a medal in 1895, and the Scott med 18 years later for the usefulness of the machine. M Jenkins completed a first model in 1891, and i troduced it to the public at his home town, Richmon Indiana early in June, 1894. He was born north Dayton, Ohio, educated in Indiana and at Earlha College. In 1890 he became private secretary to S. Kimball, U. S. Life Saving Service. After 1895 devoted himself wholly to invention, and later esta lished his laboratory at Washington. He also pr duced the first photographs by radio (1922), a devi

for viewing distant scenes by radio (1923), and one for transmitting motion pictures to be seen directly on a screen at a distance (1925). Among his 400 other patents are the Jenkins landing altimeter, which enables an aviator to judge the decrease of the distance he is from the ground as he nears a landing point, and the high speed camera. For the U. S. Weather Bureau he perfected machinery for transmitting weather signals and maps by radio. He is a member of many learned societies.

JEROME, CHAUNCEY (1793–1868). Born in Connecticut, he worked for a number of years in a factory where they made clock wheels of wood. He turned out the first clocks with interchangeable brass wheels, and greatly increased the rate of output. Later he established a large factory in New Haven. In 1842 he began shipping clocks to Europe, but two first lots were confiscated, because he set so low a price that the English thought he was trying to beat the customs. At the time he could make and sell a clock for fifty cents. His last few years were spent in Chicago.

JOUFFROY D'ABBANS (*zhoo-frwah' dă-bän'*), **CLAUDE FRANCOIS, MARQUIS DE** (1751–1832). A French inventor and engineer; born at Roche-sur-Rognon, France; in 1776 launched a boat propelled by steam, on the Doubs; this experiment failed, as did likewise another attempt in 1783; Fulton admitted the merit of these experiments; it was not until 1816, 13 years after Fulton's success with the steamboat, that the government granted him permission to float his invention; this final attempt was also unsuccessful. In 1840 his claim was acknowledged by the French Academy.

KATER (*kā'tĕr*), **HENRY** (1777–1835). English scientist who served for a time in the army, attaining the rank of captain, and previously as a surveyor in India. After 1814, when he retired on half pay, he gave himself to invention and study. Among his important accomplishments were the determining of the length of the seconds pendulum at London and elsewhere and the floating collimator, an instrument, of great service in trigonometry. His investigation of the pendulum made it possible for a scientist to determine the length a pendulum should have at any point on earth.

KENNEDY, ALEXANDER (1847–1928). British engineer, who invented devices for the testing of materials to be used in building. He was one of the designers of the first compound marine engines used in the River Tyne in England. In 1874 he became professor of engineering at University College in London, a position he relinquished in 1889 to establish himself as a consulting engineer. Kennedy designed power units for Edinburgh, Manchester, Calcutta, India, towns in Japan, and other centers. He was also instrumental in using a conduit system for some of the underground tramways of London. Applications of his scientific training to actual problems have had a far-reaching effect.

KENT, ARTHUR ATWATER. See under CAPTAINS OF INDUSTRY.

KIER, SAMUEL (1813–1874). First man to refine rock oil or petroleum after the discovery in 1840 that oil burns. Kier about 1845 bottled his "carbon oil," as he named it first, and later sold huge quantities as "medicinal petroleum." In 1845 he erected a pumping station for oil on the banks of the Allegheny in Indiana County, Pennsylvania. He also invented and sold a lamp for burning the oil for lighting.

KRUPP (*krŏŏp*), **ALFRED** (1812–1887). German inventor, metallurgist, and manufacturer, born at Essen, Prussia; in 1852 he invented a method for manufacturing weldless railway tires; his steel siege gun, first made in 1847, was adopted by the Prussian army (1861). It was used with such success in the war of 1870–1871 as to bring Krupp world-wide fame. The Krupp works at Essen, Annen, Kiel, and Gruson in Magdeburg, employ about 43,100 persons.

LANGMUIR, IRVING (1881–). American chemist, who taught at Stephens Institute (1906–09), and then joined the staff of research workers of the General Electric Company, having been selected by the director, Willis R. Whitney to work on a problem in electricity. Dr. Whitney gave him leave to experiment as he saw fit on any important problem he thought worth consideration. For three years, with several assistants, he studied light and the making of electric bulbs. They discovered why bulbs became black inside after burning a time, found also that they would burn much brighter in the presence of nitrogen, and in the end revolutionized the making of electric bulbs. By using tungsten also, it was found that efficiency was multiplied three times. Hundreds of millions of these lamps have been sold. Langmuir has also investigated electron discharge, vacuum pumps, and during the war worked on devices to detect the presence of submarines. Many honors and awards have been granted him.

LANSTON, TOLBERT (1844–). Born in Ohio he served in the Civil War, and afterward was employed in the Pension Office for 22 years. In the meantime he studied law and mechanics. Some of his early inventions were an adding machine, a mail-pouch lock, and an adjustable horseshoe. Departing from the linotype machine used in printing, he developed the idea of casting type one at a time, so that each "job" could be printed with clean, fresh, unmarred type surfaces. Though he took out his patent in 1887, the first machine was not marketed till ten years later. The machine, now called a monotype, is worked like a typewriter, perforating a series of holes in a paper ribbon which proceeds to the casting-machine, and which turns out the finished types at 150 a minute. Thus it is a type-setting and type-casting machine in one.

LECHNER, FRANCIS (? –1915). Inventor of the first power horizontal coal-cutting machine, which was exhibited at Columbus, Ohio, in 1877. Through the help of Joseph A. Jeffrey a company was formed to improve and market the machines. This was the first of the modern efficient types of mining machines.

LEONARDO DA VINCI (*vēn'chē*) (1452–1519). Great Italian artist and author, who attempted to make an airplane, the best model until recent times, though modern science has shown it impractical. Leonardo, however, was the inventor of the parachute. See also under ART.

LESSEPS (*lĕ-sĕps'*), **FERDINAND, VICOMTE DE** (1805–1894). French diplomat and engineer, born in Versailles; evolved the scheme for the Suez Canal (1854), which was begun in 1860, and opened August 15, 1869; commenced the Panama Canal in 1881, but funds for the maintenance of the work were not forthcoming; the management was charged with fraud, and De Lesseps was sentenced to imprisonment and fine; the sentence, however, was never enforced; he received an English knighthood and the Grand Cross of the Legion of Honor for his work on the Suez Canal.

LEWIS, ISAAC NEWTON (1858–). An officer of the United States army who was born in Pennsylvania, was graduated from West Point in 1884, and attained the rank of colonel in 1913, when he was retired because of disability incurred in service. After an intensive study of army equipment in Europe (1900), he made suggestions adopted in rearming the U. S. troops. He invented the Lewis machine gun now in general use, an artillery range and position finder, a time interval clock and bell system of signals, and a quick firing field gun.

LILIENTHAL, OTTO (1848–1906). German inventor and aeronaut, who studied the flight of birds, made important observations of the curvature of their wings, and built an airplane capable of gliding. He first demonstrated the value of curved over flat surfaces in plane construction. After making over 2,000 successful flights, he was killed when his machine upset in a gust at Rhinow.

LIPPMAN, GABRIEL (1845–1921). A French physicist who made important contributions in color photography in which he utilized certain principles of wave motions. This is called the interferential principle of photography. He became professor of physics in the University of Paris and the Sorbonne in 1883. Some of his other inventions were the capillary electrometer, a seismograph that gives the acceleration of the earth directly, an electric connection that does not depend on pressure.

LITTLE, ARTHUR DEHON (1863–1935). Chemical engineer, engaged in practice in Boston from 1886. He superintended the first attempts to make sulphite wood pulp in America (1884). Invented a process of chrome tanning, the electrolytic manufacture of chlorides, artificial silk, gas and petroleum, including the cracking of gasoline by a method which takes out much of the knock. He founded the school of chemical engineering of his alma mater, the Massachusetts Institute of Technology; was a member of the division of engineering of the National Research Council; organized a survey of natural resources for the Canadian Pacific Railway; and in the World War carried on various special investigations.

MacADAM, JOHN LOUDON (1756–1836). Scotch engineer, born in Ayr, Scotland, known for the process of "macadamizing"; came to America in 1770, where he made a considerable fortune, and returned to England in 1783; about the year 1810 he became interested in roadmaking, and evolved the process associated with his name; put his theory to practical use at Bristol (1815), and his roads attracted such attention that his method was considered by a committee of the House of Commons as early as 1819. He was voted the sum of $50,000, and, in 1827, was made surveyor general of metropolitan roads. He declined knighthood.

McCORMICK, CYRUS HALL (1809–1884). American inventor born at Walnut Grove, Va.; common school education; patented his first reaping machine (1834); in 1847 he established the McCormick Harvesting Company at Chicago. His inventions have played an important part in the agricultural development of the United States.

McKAY, GORDON (1821–1905). Inventor of machinery used in the manufacture of shoes, including the heeler, the lasting, and nailing machines, which came into universal use. He was born in Pittsfield, Mass. As early as 1860 he perfected a sewing machine originally invented by L. R. Blake. The bulk of his fortune was willed to Harvard University.

MARCONI (*mär-kō'nē*), **WILLIAM** (1874–1937). Italian electrical engineer, born at Griffone, near Bologna; experimented privately with wireless telegraphy (1895), and put his ideas into practical use in England (1896); established communication across the English channel (1899); between Cornwall, England, and Newfoundland (1901); visited the United States, hoping to induce the government to buy the right to use his system; failed in this, but in 1904 the British post office entered into an agreement with him for the transmission of wireless messages; his system is in use in various European navies, notably those of Great Britain and Italy.

MATHEWS, JOHN ALEXANDER (1872–1935). American inventor of non-corrosive steel alloys, who was born and educated in Washington, Pennsylvania, taught chemistry for two years (1898–1900) at Columbia in New York, and then began to experiment in steel and various combinations. While at the Halcomb Steel Company at Syracuse, New York, he perfected (1906) the use of the first electric furnace to be installed on a grand scale for manufacture of steel in America, and there was able to turn out various steel alloys in quantity. Three years previously he had first used vanadium in high-speed steels. Later nickel and chromium were also used to make stainless steel for use in cutlery, chemical containers, and general purposes where corrosion must not be allowed. Mathews has studied much abroad, has written numerous scientific papers, and after serving as general manager for seven years and president for five of the Halcomb Steel Company, in 1920 became vice president of the Crucible Steel Company of America.

MATZELIGER, JAN EARNST (1857–1889). Inventor of the lasting machine which greatly changed the making of shoes. He was a native of Dutch Guiana, his father being Dutch, and his mother a native black. In 1880, after working some time he made a model of a mechanical laster which his shopmates in derision called a "niggerhead," a name still current. Before he died, a fourth model had been perfected, and success assured. He left his small fortune to the churches of Lynn, Mass., where he worked and died. By this invention one man could last several hundred pairs of shoes a day, instead of less than a hundred as formerly.

MAUDSLEY (*mōdz'li*), **HENRY** (1770–1831). A British inventor of machines for making lock parts, an improved type of lathe, and a machine for producing screw threads of any pitch desired. For eight years he worked in the lock shop of Joseph Bramah, for whom he made (1795) a lathe having a slide-rest. In 1801 he began to design a series of machines suitable for turning out tackle blocks for the navy, and seven years later the first products were finished. It required 44 machines in all, and they were used for a half century at the dockyard at Portsmouth.

MAXIM, SIR HIRAM S. (1840–1916). English inventor, born at Sangerville, Me.; obtained a patent for an incandescent lamp (1877); secured patents for the gun named after him (1881–1882); removed to London, and began the manufacture of his firearm (1888); in later years he gave much thought to the problem of aërial navigation; knighted in 1901.

MERGENTHALER (*mĕr'gĕn-tä-lĕr*), **OTTMAR** (1854–1899). American inventor, born in Württemberg, Germany; in 1872 he came to the United States and took a government position at Washington, where the signal service apparatus, bells, clocks, etc., were assigned to his care; became associated in 1876 with a mechanical engineering firm in Baltimore, Md., and later, while in the employ of the firm, he began experiments which resulted in the typesetting machine connected with his name.

MONTGOLFIER (*mont-gol'fi-ar*), **JOSEPH MICHEL** (1740–1810), and **JACQUES ETIENNE** (1745–1799). French inventors, born at Vidalon-lez-Annonay, in Ardèche, France; made the first balloon (1783), and ascended from Annonay, heated air being used to inflate the balloon. Joseph was the inventor also of a parachute and the water ram. The brothers recieved many honors.

MORSE, SAMUEL FINLEY BREESE (1791–1872). American inventor, born at Charlestown, Mass.; was graduated at Yale (1810); studied painting in England; returned to America and became professor of the history of art, at New York University; successfully operated his recording magnetic telegraph (1835); improved in his instrument and endeavored to interest the Government in his invention, but it was not until 1843 that he received an appropriation of $30,000 for the construction of a line between Washington and Baltimore; this was successfully completed in 1844; the first submarine telegraph line was laid by Morse in New York harbor (1842).

MURDOCK (*mūr'dok*), **WILLIAM** (1754–1839). British inventor, born in Ayrshire, and employed for a number of years with Boulton and Watt in their factory making steam engines. In 1792 he was able to distill gas enough from coal to heat his cottage at Redruth, Cornwall, where he worked setting up the Watt engines. In 1799 he lighted part of a factory at Birmingham with gas. Murdock made improvements on Watt's engine, was the first to devise an oscillating engine (about 1784), and tried to perfect a single cylinder steam-engine for road use, a model of which is in the British Museum. He also made use of compressed air, patented a process for boring stone (1810), devised an iron glue from chips of iron mixed with sal ammoniac, and constructed a steam gun.

NASMYTH (*nē'smith*), **JAMES** (1808–1890). A Scotch engineer, who invented the steam hammer, was born in Edinburgh, the youngest son of the great painter of landscapes, Alexander Nasmyth. In 1839 he made a drawing of the hammer, but this was not used till 1842. Watt apparently had a similar idea in mind. Nasmyth devised a planing machine, a steam piledriver, different types of hydraulic machinery, and other practical devices.

NEWCOMEN (*nū-kŭm ĕn*), **THOMAS** (1663–1729). English engineer who perfected the atmospheric steam engine or the vacuum air pump with driving piston. In his machine a jet of steam in the cylinder was suddenly cooled by means of a stream of cold water, and this produced a vacuum into which the piston was drawn through pressure of the air on the other side. He was associated with Thomas Savery and John Cawley in much of his experiments, the former having already patented a method of drawing water from wells. Newcomen and Savery also produced a pumping engine that served as a standard for fifty years. James Watt's interest in their work gave him an idea for the invention of the steam engine.

NIEPCE (*ny-eps'*), **JOSEPH** (1765–1833). French inventor; his several inventions include making pictures on metal plates (1813), and the process of fixing images of the camera obscura (1824); Daguerre (1826) perfected Niepce's invention, gaining the title "inventor of photography," which seems to belong to Niepce.

NOBEL (*nō-bel'*), **ALFRED BERNARD** (1833–1896). A Swedish inventor and philanthropist; born at Stockholm; aided his father in the manufacture of explosives in Russia (1842); studied mechanical engineering under John Ericsson in the United States (1850–1854); invented a gasometer (1857), and an instrument for measuring liquids (1859); in 1867 invented dynamite or giant powder; of his 129 inventions the more important are dynamite, ballistite, the earliest of modern smokeless powders, and artificial india rubber; owned 15 dynamite factories in different parts of the world; left his fortune of $9,000,000 for the foundation of the Nobel Prizes, the interest on which sum is to be divided equally and distributed

annually between those five persons making the most important discoveries in physics, chemistry, physiology, or medicine, and for the production of idealistic literature and the promotion of universal peace.

OERSTED (*ûr stĕth*), **HANS CHRISTIAN.** See under SCIENTISTS.

OTIS, ELISHA GRAY (1811–1861). American perfector of the safety elevator for use in buildings, was born in Vermont, and erected factories at Albany and Yonkers, N. Y. By his patent a large passenger elevator is prevented from falling even though its cables should suddenly break. Later developments in this type of lift have made large skyscraper office buildings possible.

OWENS, MICHAEL JOSEPH (1859–1923). Inventor of the Owens glass-blowing machines, was born in West Virginia, lived for a time in Wheeling, and then in Ohio. In 1895 he perfected his first machine for casting glass moulds, formerly blown by glass-workers. In 1898 he perfected the bottle blowing machine, which is adapted for large or small containers. The machine consists of a number of blowing-irons, on the ends of which the molten glass is gathered, and then a jet of compressed air is released, and the mass is forced into a mold the exact size and shape of the container desired. This machine, in some types of glass, has revolutionized the making of smaller objects, not requiring special design or skill.

PALISSY (*pâ-lē-sē'*), **BERNARD** (about 1509–1589). Famous French potter, born in Agen; settled at Saintes (1539) and, after 16 years of the hardest labor discovered a process for the production of fine enamel; received royal patronage, but was imprisoned in the Bastille (1585), where he died.

PARSONS, CHARLES ALGERNON (1854–1931). British inventor of an improved type of steam turbine consisting of both fixed and moving blades, the one on a casing, the other on a moving shaft. This proved most efficient, and allowed the building of dynamos of much greater power than the old DeLaval turbines had. The *Mauretania* and other modern ships are equipped with these Parsons turbines. Parsons was the son of the Earl of Rosse and was graduated with high honors from Cambridge University. The first patent for his turbine was issued in 1884. He was knighted in 1911.

PARSONS, WILLIAM BARCLAY. See under SCIENTISTS.

PERKIN, WILLIAM HENRY (1838–1907). English chemist who discovered and perfected aniline dyes, and who was born in London, attended City College, but left early to enter the laboratory of A. W. von Hoffman. Trying to produce artificial quinine from coal tar, which seemed to have some of the properties of the natural medicine, he discovered (1856) that a black powder remaining after oxidation of the impure tar could be made into a beautiful bluish dye. Later he produced alizarin, an artificial red equal to Turkey red from the madder root. He subsequently produced other dyes, coumarin, and various substances. After 1878 he devoted his time to pure science.

PITTS, HIRAM ABIAL (1799–1860). Born in Maine he secured a patent on a treadmill in 1830, and with his brother, John A., perfected a thresher in 1834. His design was very similar to that of modern threshers. He was the first to combine the fanning mill with the thresher, to devise a method of measuring the number of bushels of grain threshed, and to secure any heads or parts that escaped the fanning process.

POPE, FRANKLIN LEONARD (1840–1895). American inventor, who began as a telegraph operator in Great Barington, Mass., were he was born, and later (1857–62) worked at Providence, R. I. In 1867 he joined with Edison and they invented the telegraph ticker, since used entensively in giving stock quotations. In 1872 he invented a rail circuit control for railroads, and seven years later perfected an automatic semaphore system. He made some improvements in telegraph instruments, acted as patent attorney for the Western Union Company, and was president of the American Institute of Electrical Engineers (1895). While assisting in the installation of an electric plant at Great Barrington, he was accidentally electrocuted by a current of 3,000 volts.

PUPIN (*pû-pēn'*), **MICHAEL IDVORSKY** (1858–1935). Hungarian-American inventor of improvements in long distance telephony, electrical wave transmission, and multiplex telegraphy. Having discovered the secondary X-ray radiation (1896), he invented a means of making a short exposure by interposing a fluorescent screen. Born in Hungary, he came to America at 16, was graduated from Columbia University, and then studied at Cambridge, England, then under von Helmholtz at Berlin. Becoming instructor at Columbia in 1890, in 1901 he was made professor of electromechanics. He wrote *From Immigrant to Inventor.*

PULLMAN, GEORGE MORTIMER (1831–1897). He was born in Chautauqua County, New York, worked as a cabinet maker for a time at Albion, and became a contractor in Chicago. He built the first sleeping car (1863), and four years later organized the Pullman Company, of which he was president till his death. Vestibuled trains originated from his suggestions (1887). Pullman was an organizer of the Manhattan Elevated Railway of New York and of other business enterprises. In 1880 he founded a model town in Illinois, which for years attracted no little attention and imitation.

READ, NATHAN (1759–1849). American inventor; born in Warren, Mass.; was graduated at Harvard (1781); built a small boat propelled by steam (1789) and a carriage driven by the same motive power (1790); established an iron works at Salem (1796), and made machinery for the manufacture of nails, for pumping, and for threshing; was a member of Congress (1800–1803), and removed to Belfast, Me. (1807); Read's multitubular boiler, invented in 1789, also deserves mention; he was one of the earliest inventors to apply steam to the propulsion of carriages and boats.

REESE, CHARLES LEE (1862–). American chemist, born in Baltimore and a graduate of the University of Virginia and of Heidelberg, Germany (1886). He taught in several colleges, was connected with the New Jersey Zinc Company (1902–06), and then with the Dupont Company actively till 1924. After the World War he converted vast quantities of deadly chemicals into explosives, especially into sodatol, a new product. Thus he and his assistants saved valuable products. He perfected the contact method of making commercially a fuming sulphuric acid; invented a type of dynamite that will not freeze; and, as director of research of the Dupont Company, produced a variety of products, including artificial leather, pyralin, artificial silk, and lacquers.

REICHENBACH (*rī'hen-bäh*), **KARL, BARON VON** (1788–1869). A German physicist and manufacturer; born at Stuttgart; established foundries in Moravia; was the discoverer of paraffin (1830) and creosote (1833); discovered, as he thought, a new force intermediate between electricity, magnetism, heat, and light, and which he called Od; wrote *Geological Researches in Moravia,* and *Researches on Magnetism.*

REYNOLDS, EDWIN (1831–1909). Inventor of the Reynolds-Corliss engines; introduced the first tripple expansion pumping engine; cross-compound hoisting engine for mining work, and several others.

ROBINSON, STILLMAN WILLIAMS (1838–1911). Inventor and engineering expert; invented the thermometer graduating machine, and various machines for shoe manufacture, having secured about forty patents; author of several books on mechanics.

ROWLAND, HENRY AUGUSTUS (1848–1901). He was born in Pennsylvania, took a course at Rensselaer Institute of Troy, N. Y., and from 1876 to 1901 was a professor of physics at Johns Hopkins University. Among his inventions are the Siemens drum-head armature and a printing telegraph machine, which enables the operator to control the printing of a message at the other end just as a person operates an ordinary typewriter. He also photographed the solar spectrum without the use of plates, and ruled a mirror with 48,000 lines or "gratings" to the inch. See also under SCIENTISTS.

SIANTOS-DUMONT (*sän'tôs dü-môn*), **ALBERTO** (1873–1932). Brazilian aëronaut, born in Sao Paulo; his first balloon ascension was made in 1897 at Paris; he applied the gasolene engine and propeller to an elongated balloon in 1898; attempted to make a dirigible airship, and in 1901 won the Deutsch prize of $20,000; in the same year he was awarded the Encouragement Prize of the Paris Aëro Club, and received a medal from the Brazilian government; he made several successful flights near Monte Carlo in 1902.

SCRIBNER, CHARLES EZRA (1858–). Known as the "wizard of the telephone switchboard," he has taken out nearly 500 patents on various telephone devices and improvements. From 1876 to his

retirement he was connected with the Western Electric Company. Many of the devices now generally used in the switchboard are of his invention.

SENEFELDER, ALOYS (1771–1834). Inventor of the lithographic process, a Bohemian actor and dramatic author, who turned to the printing trade because he was too poor to pay for having his works published. He tried to make his own engravings, but copper-plates were expensive. Finally, almost by accident he discovered that stone could be treated with aqua fortis, a part eaten away in any form of design wished, if a wax coating were used to protect the parts that were to remain "unbitten" by the acid. Thus in 1798 he was able to make fair impressions from stone prepared in this manner, and in 1806 he received help from the government. The king of Bavaria afterward gave him a handsome pension. Before he died his process was in common use. Senefelder published his *Elements of Lithography* (1819), a book curiously illustrated with his own designs, and translated by him into English and French.

SHOLES, CHRISTOPHER LATHAM (1819–1890). Originally a printer by trade, Sholes went to Milwaukee from Pennsylvania, and there became an editor, a member of the Legislature, and for a time postmaster. Some of his early inventions were a device for printing names on the margins of newspapers for mailing, a machine to stamp numbers on bills or on the pages of a blank book, and some improvements in telegraphy. In June, 1868, he demonstrated a crude but practical machine that wrote capitals only. This was improved by Sholes, Carlos S. Gildeen, Charles Weller,—and by others after the rights were transferred to the Remington Company in 1873. About 400 machines were sold in 1874. Before Sholes disposed of his rights, James Densmore had helped finance the project.

SIEMENS (*zī'mens*), **SIR CHARLES WILLIAM** (1823–1883). German-English electrician, born at Lenthe, Hanover; removed to England (1844); constructed a regenerative furnace, which was applied to iron and steel working; in 1866 established steel works at Landore, Wales, and, in 1869, a factory at Charlton, West Woolwich for the manufacture of submarine electric telegraph apparatus; took an active part in the laying of the Atlantic cable (1874); the universities of Oxford, Dublin, Glasgow, and Würzburg awarded him honorary degrees; was president of several scientific organizations; knighted in 1883.

SMEATON (*smē'tan*), **JOHN** (1724–1792). English civil engineer, born in Austhorpe, near Leeds, designed a machine for measuring a ship's way at sea (1751); became a fellow of the Royal Society (1753); designed and rebuilt the Eddystone lighthouse (1756–1758); afterwards built several bridges, and was the engineer of the Forth and Clyde canal. Smeaton also made important improvements on Newcomen's engine.

SOLVAY, ERNEST. See CAPTAINS OF INDUSTRY.

SPERRY, ELMER AMBROSE (1860–1930). An American electrical engineer, who was born in Cortland, N. Y., and was educated there and at Cornell. He was the inventor of the gyroscope, the first electric pick machine for mining, stabilizers for airplanes, a compound internal combustion engine, fire control apparatus, and numerous other machines, including an electric automobile. From many societies and several foreign nations he received awards or decorations.

SPRAGUE, FRANK JULIAN (1857–1934). Pioneer inventor in electric railway operation in the United States. He was born in Connecticut, educated at the United States Naval Academy, and remained in the naval service five years, till 1883. The first modern trolley railway was equipped by him at Richmond, Va., in 1887, followed by 100 similar installations in America and Europe. Invented the multiple-unit control of electric railways, and also a type of automatic signal and brake control, and was a pioneer in underground railway installation.

STEINMETZ (*stīn'mĕts*), **CHARLES PROTEUS** (1865–1923). American electrical expert and inventor, who was born in Germany, educated there, and came to the United States in 1889. After being connected with a factory at Yonkers, N. Y., he joined the staff of the General Electric Company (1893), and became professor at Union College (1902). Besides patenting scores of devices, Steinmetz made important investigations in magnetism and electricity, a method of calculating alternating current performance which made this type more popular for lighting and other purposes, and the investigating of lightning effects, in connection with which he invented valuable arresters for use in high-tension transmission lines to prevent them from being struck by lightning. Other inventions improve dynamos, transformers, and motors.

STEPHENSON (*stē'ven-san*), **GEORGE** (1781–1848). English engineer; born at Wylam, near Newcastle; inventor of the locomotive; invented a colliery safety lamp (1815); was appointed engineer of the Stockton and Darlington Railway (1821); completed the Liverpool and Manchester Railway (1829). His locomotive *Rocket* (1830) ran 30 miles an hour, outstripping all rivals.

STEPHENSON, ROBERT (1803–1859). English engineer, son of George Stephenson; was in South America (1824–1827); became engineer of the London and Birmingham line completed in 1838; built bridges at Montreal (1859), and over the Menai Strait (1854). Known as the inventor of the tubular bridge.

STEVENS, JOHN (1749–1838). An American inventor of the multi-tubular boiler for use in steamboats, a screw propeller adapted to use in a steamboat, which proved impractical only because the boilers of the day failed to generate enough steam to run the two propellers fitted to his steamboat in 1802. Then he turned his attention to the building of better steam-boilers. Stevens's *Phœnix*, on a trip to Philadelphia from what is now Hoboken, N. J., was the first steamship to navigate on any ocean. In 1832 he completed the first railway across New Jersey, which his sons later operated.

STEVENS, ROBERT LIVINGSTON (1787–1856). Son of John Stevens (q. v.), and followed his father's inventions by further designs of ships to make them faster, so that his *New Philadelphia* was the first boat able to ply between New York and Albany by daylight. He also built a ferryboat, introduced the T-rail for use in railways, the wooden tie for use instead of a stone one, and the spikes to hold the rail to the ties. He first used eight wheels for locomotive trucks, and made other improvements in them. For recreation he took up yachting, and built the first yacht to defeat all English challengers, and so founded the American cup races.

TESLA (*tĕs'lă*), **NIKOLA** (1857–). Coming to the United States from the Austrian Croatia in 1884, Tesla for a time was connected with the Edison laboratories, and then set up his own in New York City. Among his many inventions were the induction motor (1888), various devices to use alternating instead of direct current, and he utilized the idea of the rotary magnetic field in the plan for the transmission of power from Niagara Falls, besides many new types of dynamos, electric lamps, induction coils, and condensers.

THOMSON, ELIHU (1853–1937). Of more than 500 patents the chief inventions of Thomson are the process of electric welding now in common use, the first high frequency dynamo (1890), the watt-hour meter for measuring the amount of electricity consumed, and many other improvements in electrical machinery.

THOMSON, WILLIAM, LORD KELVIN. See SCIENTISTS.

TREVITHICK (*trev'e-thik*), **RICHARD** (1771–1833). An English mechanic, born in Cornwall, and in one sense was the father of the modern engine propelled by the steam. In 1796 he placed on exhibition in London a model of his engine, and by 1804 he had constructed "road wagons" propelled by steam engines capable of drawing twenty tons of iron ore. It is said his invention was used in Wales in 1801 to transport passengers. For lack of financial support his efforts came to naught.

TRIPLER, CHARLES EASTMAN (1849–1906). An American physicist, who first made liquid air on a large scale (1895) by use of a machine of his own design for compressing the atmosphere at a temperature of 200 degrees below zero. Linde in Germany and Hampson and Dewar in England made similar experiments about the same time. Tripler in public lectures made the study of liquefaction of gases interesting and popular.

TROUVE, GUSTAVE (1839–1902). French electrician; invented electric polyscope, by which every cavity in the human body may be explored; lamps for use in dangerous places; wound explorer; portable telegraph for use in war; electric motors for small boats.

VAN DEPOLE, CHARLES J. († –1892). Pioneer in the perfection of trolley systems in America, and the inventor of over 250 electrical devices. He

was born in Belgium, came to America in 1846, and perfected the original trolley, first made and named by J. C. Henry. In 1878 he exhibited an immense arc lamp, in 1883 built two trolley roads, and numerous lines thereafter. His electrical training was received in the school at Lille, France, and for several years after he came to the United States he made church fittings at Detroit.

VOGT (*fōht*), **HANS** (1890–). A German who produced a talking film in 1922, after several years of experiment, during which time he had been assisted by Joseph Massolle and Dr. Engl. In his system the voice is photographed directly on the film band and is afterward changed, following adjustments, into light pulsings. It is then reproduced by an electrostatic telephone arrangement.

WATT, JAMES (1736–1819). Scotch engineer and inventor, born at Greenock; famous for his improvements on the steam engine; Watt's engine quickly replaced Newcomen's. He is said to have also discovered the composition of water.

WEDGWOOD, JOSIAH. See under CAPTAINS OF INDUSTRY.

WELSBACH (*vĕls'bäk*), **KARL AUER, BARON VON** (1858–1929). An Austrian nobleman who studied in the laboratories of Bunsen, devoting himself to chemistry as a diversion. While investigating certain rare earth elements, he discovered by accident that a thread of cloth dipped in a solution of thorium and cerium would burn with a brilliant flame. When he made a mantle of cotton cloth, dipped this into a solution, and then lit a flame to it, he found that the form remained of the rare-earth particles after the cloth was consumed. After two years of experimenting to get a mantle strong enough to last he organized a company which turned out the first products in 1885.

WESTINGHOUSE, GEORGE. See under CAPTAINS OF INDUSTRY.

WHEATSTONE (*hwēt'stōn*), **SIR CHARLES** (1802–1875). An English electrician; born near Gloucester; published five papers as a result of his researches on sound (1833); patented an instrument for giving signals by electricity, which proved to be the forerunner of the telegraph; invented the stereoscope (1838), and in 1843 produced instruments for measuring the constants of a voltaic series; brought into public notice an electrical device known as Wheatstone's Bridge.

WHEELER, SAMUEL (1742–1820). A gun inventor, who began as a blacksmith, and served for a time in the Revolutionary War. He secured leave from the army to return to his home and forge in Pennsylvania to make a chain for Washington's men to stretch across the Hudson to prevent the British boats from going up. Among his other inventions was a cannon used at Brandywine, and later in England, a weigher for hay, and a lantern for lighthouses.

WHEELER, SCHUYLER (1860–1926). American who worked with Edison in the development of electric power in New York. He applied electricity to driving tools direct, a motor for use with the Gatling gun, and was the first to introduce a form of electric fan (1886), for which the Franklin Institute gave him the Scott prize in 1904.

WHITWORTH, JOSEPH (1803–1887). British inventor who did much to develop accuracy in instruments, and maker of the first really accurate plane surfaces. He also perfected a standard design for pitch of screws, a measuring machine that was accurate to the ten-thousandths of an inch, and certain improvements in cannon and other arms. To provide a steel of sufficient hardness, he also devised a method of pressing it while in the molten state. In 1869 he was made a baronet. Much of his fortune was left to found scholarships to train artisans.

WHITNEY, ELI (1765–1825). American inventor, born in Westborough, Mass.; was graduated at Yale (1792), and went to work in Georgia; is best known as the inventor of the cotton-gin (patented 1794), but was also very successful in the manufacture of firearms; factory was located at Whitneyville, Ct.

WILKINSON, DAVID (1771–1852). In 1797 he invented the sliding rest for the lathe, but this netted him little, until a grateful Congress in 1848 voted him a grant of $10,000, since this machine had proved extremely useful to the government, notably to the navy. He probably also designed the machinery for Slater's mill at Providence for making woolen cloth.

WILKINSON, JOHN (1728–1808). Beginning with a box-iron invented when he was a boy and patented by his father, Wilkinson became interested in casting different iron products. He perfected a boring machine which Watt used on his engine cylinders, constructed the first iron barge suitable for conveying iron products down the Severn River, and later built the first iron bridge, which connected Broseley and Madeley on the Severn. Wilkinson taught the French how to bore cannon from solid blocks, and his iron works constructed all the pipes and other metal needed for the water works of Paris, one of the greatest engineering feats of the age.

WILSON, ALLEN BENJAMIN (1824–1888). Born in New York, Wilson lived for a time in Pittsfield, Mass., where he invented a new type of sewing machine (1849). He used the double-pointed shuttle, which made one stitch on the forward movement, and one on the backward. This principle was unlike Howe's in the sewing machine. In 1857 he perfected a rotary hook and bobbin and an improved lock-stitch machine. After 1856 he lived in Bridgeport, Conn., where the Wheeler and Wilson Company established a large factory.

WOOD, HENRY A. WISE (1866–1939). Inventor of the autoplate casting machine for making stereotype plates for newspapers. He was born in New York City, the son of Fernando Wood, thrice mayor and member of Congress for 20 years. His newspaper inventions have doubled the speed of printing. The autoplate machine does with three men what eighteen once did at great labor and pain. He took an especial interest in flying, being editor of *Flying Magazine* (1911–19). Awarded gold medal by Franklin Institute.

WOOD, JETHRO (1774–c. 1840). He was the first to devise removable parts for plows to replace worn shares and coulters. Cast iron was substituted for wrought by him with considerable success.

WORCESTER (*wus'ter*), **EDWARD SOMERSET, MARQUIS DE** (about 1601–1667). English inventor of the steam engine; served King Charles during the Civil War; imprisoned in the Tower (1654) because of his failure to raise troops in Ireland for the king; published a *Century of Invention* (1663), which gives an account of the invention of ciphers, signals, mechanical appliances, and of the working of the steam engine invented by him.

WRIGHT, WILBUR (1867–1912). An American aëronaut, born in Dayton, Ohio; invented and demonstrated flying machine, with aid of his brother Orville, first tested the machine at Kitty Hawk, N. C., in 1903; a successful long distance test was made near his birthplace. See under AVIATION.

ZEPPELIN (*tsĕp'ĕ-lin*), **FERDINAND, COUNT VON** (1839–1917). German inventor of various forms of airships, who was born in Baden, served in the army and also on the union side in the American Civil War. In 1891 he retired with the rank of general. After 1900 he made various improvements in airships. See under AVIATION.

AIKINS, JAMES ALBERT MANNING (1851–1929). Canadian solicitor; lieutenant governor of Manitoba (1916–26); M. P. for Brandon (1911–15). Born in Upper Canada, educated at University of Toronto, and called to the bar in 1878. President Canadian Bar Association (1914–24); bencher, Law Society, University of Manitoba from 1882; president of the Commissioners on Uniformity of Laws (1918–23).

AKERMAN, AMOS TAPPAN (1823–1880). Attorney general; born in New Hampshire; was graduated from Dartmouth (1842); admitted to the bar (1844); practised in New Hampshire till 1850, when he removed to Elberton, Ga.; at the opening of the Civil War entered the service of the Confederate government in the quartermaster's department; after the war gave his support to the reconstruction policy of the government; served as United States attorney for the district of Georgia from 1866 to 1870; appointed in the latter year attorney general of the United States; was Republican candidate for United States senator but failed of an election (1873).

AMES, JAMES BARR (1846–1910). Dean of the Harvard Law School from 1895 to his death. He was born in Boston, studied in arts and law at Harvard, and taught there from 1877. Besides a great number of articles in the *Harvard Law Review* and others, he was the author of numerous books, including texts and cases on torts, pleading, partnership, and admiralty.

ANSON, WILLIAM REYNELL (1843–1914). He was born in Sussex, educated at Eton College and Oxford, and in 1874 became Vinerian reader of law, and in 1881 warden of All Souls College. After holding various political offices, in 1890 he was returned to Parliament from the University of Oxford. He was one of those who took an interest in founding a school of Law for Oxford. Two of his treatises, *The Principles of the English Law of Contracts* and *Law and Custom of the Constitution*, have been much used in England.

ALLISON, WILLIAM BOYD (1829–1908). An American lawyer; born at Perry, Ohio; studied law and practised in Ohio until his removal to Iowa (1857); was on the governor's staff during the Civil War; elected to the House of Representatives, serving from 1863 to 1871; in 1872 was elected to the United States Senate, and reëlected five times; the Bland-Allison Act was due to him; representative to Brussels Monetary Conference (1892); prominent in Republican national conventions for presidential nomination (1888, 1896).

ARCHAMBEAULT (*arch'ăm-bōlt*), **HON. HORACE** (1857–1918). Born at L'Assumption, P. Q.; educated at local college and graduated LL.B. with distinction at Laval University (1878); LL.D. (1886). Called to bar (1878); professor of science and law (since 1881); member Legislative Council of Province of Quebec (1888); of Council of Public Instruction (1890); created queen's counsel (1890); attorney general (1897); puisne judge Court of King's Bench, Province Quebec (1907).

BACON, FRANCIS (1561–1626). English essayist, scientist, and student of law, was born in London, was entered at Gray's Inn for legal study (1576), became solicitor in 1607, treasurer of Gray's Inn the following year, and gradually advanced in favor of the court. In January 1618 he became lord chancellor, the same year was made Baron Verulam, and two years later Viscount St. Albans. In 1621 he was removed from office on confession of having received bribes, a custom all too common, but still admitted by Bacon as without good defense. For the rest of his life he retired to study and to complete his scientific and literary labors, including the great *Essays*. He wrote several important legal works, such as *Maxims of the Law, Proposal for Amending the Laws of England, Brief Discourse on the Commission of Bridewell*, and advocated a new codification of English laws. See INDEX for mention in other sections.

BALDWIN, SIMEON EBEN (1840–1927). Born in New Haven, Connecticut, he prepared in law at Yale and Harvard, was instructor (1869–72), and professor of law at Yale till his death. From 1893 to 1907 he was associate justice, and from 1907 to 1910, chief justice of the Court of Errors of Connecticut; governor of Connecticut, 1911–15. He took part in efforts of committees to perfect the statutes and system of taxation of his state. Member and officer of various legal and international societies. Among his books are *Cases on Railroad Law, American Judiciary*, and *The Young Man and the Law*.

BARCLAY, THOMAS (1853–). Of Scotch birth, he was educated at London, Paris, and Jena, acted as correspondent for *The Times*, and was called to the bar in 1881, after which he made a thorough study of law practice in France. Becoming an advocate of better international relations, he visited France, the United States, and Germany, seeking to create interest in arbitration treaties. In 1910 he became a Liberal member of Parliament. Among his important works on law are *Problems of International Practice and Diplomacy, International Law and Practice, Le Président Wilson et l'évolution de la Politique étrangère des Etats-Unis* (1918).

BECK, JAMES MONTGOMERY (1861–1936). Solicitor general of the United States from 1921 to 1925, was educated at the Moravian College at Bethlehem, Pennsylvania. Admitted to the bar in 1884, he held successively positions as U. S. attorney in Eastern Pennsylvania and assistant U. S. attorney general, and then from 1903 to 1921 was a member of law firms in New York City. Delivered many orations on various notable occasions. Author of *War and Humanity, The Passing of the New Freedom*, and *The Constitution of the United States*.

BENJAMIN, JUDAH PHILIP (1811–1884). American lawyer and statesman; born in St. Croix, West Indies, of English-Jewish parentage; admitted to the bar in New Orleans (1832); admitted to practice before Supreme Court; United States senator from Louisiana (1852–1861); withdrew from Senate (1861); was appointed attorney general in provisional cabinet of President Davis; was Confederate secretary of war and in 1862 secretary of state; fled to England on the surrender of Lee at Appomattox; admitted to the English bar (1866); became queen's counsel (1872). In 1868 he published a *Treatise on the Law of Sale of Personal Property*, which is known as a legal classic. In 1881 he retired and went to Paris.

BENTHAM, JEREMY (1748–1832). English philosopher and jurist, a graduate of Oxford (1763) and a student in Lincoln's Inn. He listened to Lord Mansfield and heard Blackstone's lectures on law. Among his works, *Fragment on Government* is a criticism of the *Commentaries* of Blackstone; *Theory of Punishment and Rewards, Treatise on Judicial Proofs*, and *Judicial Organization and Codification* are concerned with changes in the system of administering law. Though Bentham was trained for the law, he practiced little, and later turned to political philosophy. Yet his influence was great.

BERRIEN, JOHN MACPHERSON (1781–1856). Statesman, jurist; born in New Jersey; was graduated from Princeton (1796); admitted to the bar of Georgia (1799), solicitor of the eastern district of Georgia (1809); judge of the same district (1810–1821); sat in Georgia senate (1822–1823); member of United States Senate (1825–1829 and 1840–1852); attorney general of the United States in President Jackson's cabinet (1829–1831); his eloquence before Congress gained him the title of "American Cicero."

BLACK, JEREMIAH SULLIVAN (1810–1883). American jurist; born in Glade, Pa.; admitted to the bar (1831); attorney general of the United States (1857); secretary of state (1860); on the accession of President Lincoln retired from public life; in 1868 counsel for President Johnson in the impeachment case, but withdrew after the answer had been filed; counsel for Tilden before the electoral commission (1877).

BLACKSTONE, SIR WILLIAM (1723–1780). A celebrated commentator on English law, born in London; educated at Oxford; admitted to the bar (1746); lecturer on law at Oxford (1753–1758) when he became first professor of English law; successively (1761–1780) king's counsel, member of Parliament, bencher of Middle Temple, solicitor general to the queen, and judge in the court of Common Pleas. He published (1765–1769) the lectures which form the famous *Commentaries of the Laws of England*, upon which his fame chiefly rests. This most influential treatise is the foundation of all legal education in America and England.

BLAIR, HENRY WILLIAM (1834–1920). American lawyer; born in Campton, N. H.; admitted to bar (1859); served in Civil War; in New Hampshire house of representatives and in state senate (1866–1868); Republican member of Congress (1875–1879); United States senator (1879–1891); framed Blair Common School Bill, and that for U. S. Labor Department.

BLUNTSCHLI (*blŭnch'lē*), **JOHANN KASPAR** (1808–1881). Swiss statesman and jurist, educated at the *Politische Institute* at Zürich and in Germany, and became a conservative. In 1848 he was elected professor of constitutional law at Munich, where his work on contracts gained international recognition. Afterward he turned to international law and was one of the founders of Institute of International Law.

BONAPARTE, CHARLES JOSEPH (1851–1921). American lawyer and cabinet officer; born in Baltimore. A graduate of Harvard (1871) and Harvard Law School (1874); secretary of the navy (1905–1906), and attorney general (1907–1909). He was the son of Jerome Napoleon Bonaparte, and grandson of Jerome, king of Westphalia, a descendent of the sister of Napoleon I.

BORCHARD (*bŏr'shärd*), **EDWIN MONTEFIORE** (1884–). Born in New York, educated at the College of the City of New York, he became an authority on international law, law librarian of Congress (1911–16), serving meanwhile for a year as assistant solicitor of the department of state, and professor of law at Yale from 1917. Wrote *Guide to Law and Legal Literature of Germany, Latin-American Commercial Law,* and translated Fiore's *International Law Codified.*

BORDEN, R. L. See under STATESMEN.

BOWEN, CHARLES SYNGE CHRISTOPHER (1835–1894). Born in Gloucester, educated at Rugby and Oxford, Bowen became a fellow at Balliol College in 1858, and was called to the bar three years later. In the celebrated Tichborne case, arguing as junior counsel against the claimant, he gained great applause, later being made counsel to the treasury and in 1872 a judge of the queen's bench division, and in 1882 a member of the court of appeals. A year before his death he was made lord chief justice of appeals, and was created Baron Bowen of Colwood. Besides various important legal briefs, and a pamphlet on the *Alabama Claims,* he made a notable translation of Virgil.

BRADFORD, WILLIAM (1755–1795). Jurist; born in Philadelphia, Pa.; was admitted to the bar of the Supreme Court (1779); served in the Revolution; appointed attorney general of Pennsylvania (1780); appointed a judge of the Supreme Court under the new constitution of Pennsylvania (1791); U. S. attorney general (1794–1795).

BRADLEY, JOSEPH PHILO (1813–1892). Associate justice of the Supreme Court from 1870 to his death. He studied theology, gave this up for law, and in New Jersey conducted notable cases, including the Passaic bridge litigation, the New Jersey zinc trials, and the Hardin murder prosecution. Noted for knowledge of the law and clever application to human affairs, having but few reversals while he practiced.

BRANDEIS (*brăn'dīs*), **LOUIS DEMBITZ** (1856–). Associate justice of the Supreme Court, appointed in 1916. Born in Louisville, Kentucky, he was educated at Harvard, practiced in St. Louis and Boston, acting as special counsel in many notable cases, such as freight rate investigations, constitutionality of the Oregon minimum wage law, the Ohio nine hour law, Boston subway cases, and New York garment workers strikes. Noted for his progressive views in social and economic controversies.

BRECKENRIDGE, JOHN (1760–1806). Jurist; born in Virginia; admitted to the bar in Charlottesville (1785); said to have been the author of the Kentucky resolutions of 1798; introduced them into the Kentucky legislature; entered the United States Senate (1801); attorney general (1805–1807).

BREWER, DAVID JOSIAH (1837–1910). An American jurist; born in Smyrna, Asia Minor; graduated at Yale (1856) and at Albany Law School (1858); was a United States commissioner (1861–1862); judge of the probate and criminal courts of Kansas; judge of the district court of First Kansas District; justice of the state supreme court (1870–1884); judge of the circuit court of United States (1884–1889); associate justice of the United States Supreme Court (1889–1910); in 1896 appointed a member of the Venezuelan Boundary Commission; affirmed the right of liquor manufacturers to compensation—this was the decision rendered on the Kansas Prohibition Law; member of British-Venezuelan Arbitration Tribunal (1899); president Universal Congress of Lawyers and Jurists, Louisiana Purchase Exposition, St. Louis (1904).

BROWN, HENRY BILLINGS (1836–1913). Associate justice of the Supreme Court, by appointment of President Harrison in 1890. At Yale he was a classmate (1856) with Justice Brewer and Chauncey M. Depew. After locating in Detroit in 1859, he was made deputy U. S. Marshall, judge of the county court, and circuit judge (1875), specializing in admiralty and criminal law. As a public speaker on legal questions, he gained considerable note, expressly for his defense of a permanent judiciary (1889) at the meeting of The American Bar Association in Chicago, and later by an address on *The Distribution of Property.*

BURTON, T. E. See under STATESMEN.

BUSTAMANTE (*bös-tä-män'tā*), **ANTONIO SANCHEZ DE** (1865–). Prominent Cuban lawyer, educated at the University of Havana in law and professor of international law there from 1884. He was elected the sole man of his country to the Institute of International Law, a member of the permanent court of The Hague, and in 1928 was president of the sixth Pan-American Congress. Among his works are *Le Canal de Panama et le Droit International* (1895) and *La Autarquia Personal,* a treatise on international private law.

BUTLER, BENJAMIN FRANKLIN (1795–1858). An American lawyer and politician; born at Kinderhook Landing, N. Y.; studied law and was admitted to the bar (1817); district attorney of Albany County (1821–1824); elected to the state legislature (1827); appointed attorney general by Jackson (1833), and by Van Buren in 1837; secretary of war (1836–1837); organized the department of law in the College of the City of New York, and was the principal professor (1837); United States district attorney at New York City from 1838–1841; served at the head of the electoral college in New York (1844); district attorney from 1845 to 1848.

BUTLER, PIERCE (1866–1939). Born in Minnesota, a graduate of Carleton College, he joined the Minneapolis bar in 1888. Some of his notable cases were in connection with railway arbitrations, especially those in Canada in regard to the Canadian Northern and Grand Trunk cases. He became an associate justice of the Supreme Court in 1922.

CADWALADER, JOHN (1805–1879). After graduation from the University of Pennsylvania, he became a lawyer at 20, taking part very soon in important trials. He was of counsel in the Girard will case, litigation arising out of failure of the Bank of the United States, and acted as counsel to President Buchanan, who appointed him judge of the Eastern District of Pennsylvania, where he served for 21 years. During the Civil War he declared that Congress possessed the legal power to blockade southern ports, a decision that had a far-reaching effect. In the use of precedents in law he was a master.

CARDOZO (*kär-dō'zō*), **BENJAMIN NATHAN** (1870–1938). Justice of the New York Supreme Court, beginning in 1914, and designated in the same year to serve as judge of the Court of Appeals. Author of *Jurisdiction of New York Court of Appeals, The Nature of the Judicial Process,* and *The Growth of Law.*

CARPENTER, MATTHEW HALE (1824–1881). Brilliant constitutional lawyer, brought up in the office of Rufus Choate (q. v.), who furnished money for him to settle in Beloit, Wisconsin (1848). In 1869 and again in 1879 he was elected to the United States Senate. Among other celebrated cases, including some railway litigation, he acted for the government in the suit to test the validity of the reconstruction act of 1867, in the defense of Belknap, Secretary of War, impeached by the Senate, and in behalf of Samuel J. Tilden in the contested presidential election, decided finally in favor of R. B. Hayes. In this last case both sides of the controversy intended to bid for his services. Both as a master in arranging the facts of a case, and in actual persuasive argument, few men of his time equalled him.

CHANDLER, WILLIAM EATON (1835–1917). Lawyer; born at Concord, N. H. Graduated from

Harvard Law School (1854); admitted to the bar (1855); reporter of decisions supreme court of New Hampshire (1859); member New Hampshire legislature (1862, 1863, 1864, 1881); solicitor and judge advocate general navy department (1865); first assistant secretary of treasury (1865–1867); secretary of the navy (1882–1885); United States senator (1887–1901); president Spanish Treaty Claims Commission (1901–1907).

CHASE, SALMON PORTLAND (1808–1873). American statesman and jurist; born in Cornish, N. H.; graduated at Dartmouth College (1826); admitted to the bar (1830); celebrated for his defense in the Matilda case (1837); leader of the political anti-slavery men; senator from Ohio (1849); withdrew from the Democratic party when they adopted a pro-slavery platform (1852); leader of the Republicans in Ohio, and governor of that state (1856–1860); secretary of the treasury (1861); chief justice of the Supreme Court (1864–1873); presided at the impeachment trial of President Johnson (1868).

CHOATE, JOSEPH HODGES (1832–1917). An American lawyer and diplomat. After 1865 Choate conducted many famous trials, both national and international. He defended General Fitz-John Porter, prosecuted the Tweed ring, conducted the Tilden will case, the Chinese exclusion cases, and represented the Canadian government in the Bering Sea dispute. Ambassador to England (1899–1906), after which he resumed his law practice in New York City.

CHOATE, RUFUS (1799–1859). A famous American lawyer and statesman; born in Ipswich, Mass.; graduated at Dartmouth College (1819); studied law and was admitted to the bar (1823); served in lower house of Massachusetts legislature (1826); in state senate (1826); in the national House of Representatives (1831–1834); in United States Senate (1841–1845); ranked high as a debater and able lawyer.

CLARK, JOHN HESSIN (1857–). Engaged in the practice of law in Ohio in 1878; United States District Judge (1914–16), and associate justice of the United States Supreme Court till 1922. He resigned to give all his attention to fostering international good-will and peace; president of the League of Nations Non-partisan Association of the United States, and trustee of the World Peace Society.

CLIFFORD, NATHAN (1803–1881). American jurist; admitted to the bar (1827), in New Hampshire legislature (1830–1834), speaker (1832–1834); attorney general (1834–1838); congressman (1839–1843); attorney general of United States (1846); envoy to Mexico to arrange treaty of peace (1848); associate justice of United States Supreme Court (1858); president of electoral commission (1877).

COKE, SIR EDWARD (1552–1634). A distinguished English lawyer and judge; born in Norfork; called to the bar (1578); recorder of Norwich and London (1586–1592); member of Parliament and speaker of the House of Commons (1593); attorney general (1594–1606); conducted famous trials of Southampton and Essex (1601), of Sir Walter Raleigh (1603), of Gunpowder Plotters (1605); chief justice of the Common Pleas (1606–1613); chief justice of the King's Bench (1613); removed (1616) for opposing the king's unlawful intrusion; imprisoned in the Tower (1621–1622); active in securing Petition of Rights. His best-known work, *Coke upon Littleton, or the First Institute*, is still an authoritative treatise. Others are *Second, Third, and Fourth Institutes; The Complete Copyholder;* and *Reading on Fines.* His law reports mark a period in legal history invaluable to the profession.

COLBY, BAINBRIDGE (1869–). Engaged in the practice of law in New York in 1892. Counsel for Mark Twain in settlement of his business as a publisher, in the Equitable Insurance cases, and in the Northern Securities case. He was one of the founders with Theodore Roosevelt of the Progressive Party, and for the last year of President Wilson's administration acted as secretary of state.

COLLIER, WILLIAM MILLER (1867–). American educator, legal authority, and diplomatist, born near Auburn, New York. He was educated at Hamilton College, became referee in bankruptcy in 1898, and an authority on the subject. He edited American Bankruptcy Reports, 1–12, from 1899 to 1905, and wrote Collier's *Annotated Rules in Bankruptcy*, served also as a lecturer on bankruptcy in the New York Law School for two years. In 1904 he entered the department of commerce as solicitor; served as U. S. Minister to Spain from 1905 to 1909; lectured on international law at the New York Law School from 1912 to 1918; was president of George Washington University, Washington, from 1917 to 1921, when he was appointed Minister to Chili.

CONKLING, ROSCOE (1829–1888). The son of a United States judge, after a common school education, Conkling began the practice of law, was elected mayor of Utica, New York, 1858, and also the same year a member of the United States House. From 1867 to 1881 he was a senator from New York. Afterward in private practice he gained great distinction for skill as a cross-examiner, quickness in meeting the unusual in suits, and good speaking in court. President Grant (1873) offered him the chief justiceship of the United States Supreme Court, and President Arthur (1882), an associate justiceship. He declined these and appointments as secretary of state and minister to England. Among his celebrated cases was the masterly defense of the Rev. Henry Budge, accused of murder, who against the testimony of physicians, was proved innocent beyond doubt by the technical study by Conkling of the case. See also under RULERS AND STATESMEN.

CUJAS, JACQUES DE (1522–1590). One of the most distinguished French jurists of the sixteenth century; successfully taught law at Cohors, Valence, Bruges, and Paris (1554–1590). He made diligent study of Roman law from original manuscripts, of which he owned 500 on Roman law. His treatment of it and the feudal system was profound.

CURRAN, JOHN PHILPOT (1750–1817). One of the greatest jury advocates of his age in Great Britain. He was born in Ireland, called to the bar in 1775, after a course at Trinity College, Dublin, and at last became a great court lawyer, winning many criminal cases, including some notable ones of political offenses. In mastery of humor and pathos he was supreme. Byron said of Curran, "I have heard him speak more poetry than I have ever seen written."

CURTIS, BENJAMIN ROBBINS (1809–1874). An associate justice of the Supreme Court for six years (1851–57); resigned because of disagreement with Chief Justice Taney over changes written into the opinion in the celebrated Dred Scott case. At 20 he was graduated from Harvard, built up a large practice in Boston, and was elevated to the bench by President Pierce. He was one of the counsel for President Johnson in the impeachment trial. Besides two volumes of his own decisions, he issued a condensed collection (22 volumes) of the findings of the Supreme Court to 1854.

CUSHING, CALEB (1800–1879). American politician and jurist; born in Salisbury, Mass. Commissioner to China (1843–1845); concluded the first treaty of the United States with that country; attorney general of the United States (1853–1857), and one of the counsel in the *Alabama* case before the Geneva Arbitration Tribunal (1871); was minister to Spain (1874–1877). He is the author of *Reminiscences of Spain, The Practical Principles of Political Economy*, and *The Growth and Territorial Progress of the United States.*

DANA, FRANCIS (1743–1811). An American jurist and statesman; born in Charlestown, Mass. Elected to the Continental Congress (1776); chairman of the committee to submit plans for the reorganization of the army (1778); member of the committee to consider the conciliatory proposals from Lord North (1778); official secretary abroad to John Adams (1779–1781); minister to Russia, but not recognized by Catherine (1781–1783); elected to the Continental Congress (1784); justice of the Supreme Court of Massachusetts (1785); delegate to the Annapolis Convention (1786); delegate to the Constitutional Convention at Philadelphia (1787); chief justice of Massachusetts Supreme Court (1791–1806).

DANA, RICHARD HENRY. See under AUTHORS.

DAVIS, DAVID (1815–1886). An American jurist, born in Cecil County, Md.; graduated at Kenyon College, Ohio (1832); studied law; admitted to the bar (1835); appointed (1862) associate justice of the United States Supreme Court, by President Lincoln; resigned in 1877, having been elected to the United States Senate, where he served from 1881–1883 as president pro tem., after Vice-President Arthur became president; in 1872 he was a prominent candidate for the presidential nomination.

DAVIS, JOHN WILLIAM (1873–). Lawyer and public official, a West Virginian by birth, received

his college training at Washington and Lee University, taught there for a year, and was a member of a prominent law firm in Clarksburg, West Va., from 1897 to 1913. Having been a member from West Virginia in Congress from 1911 to 1913, he resigned to become solicitor general of the United States, a position he held from 1913 to 1918. He was Ambassador to Great Britain from 1918 to 1921; counsellor of the Red Cross from 1913 to 1918; and a member of the commission appointed to negotiate with the Germans for the exchange of prisoners after the World War. President of the American Bar Association, 1922. Mr. Davis, as Democratic candidate for the presidency in 1924, received 136 electoral votes to 382 for Mr. Coolidge.

DENNIS, WILLIAM CULLEN (1878–). American legal adviser and arbitrator, who was born in Indiana, educated at Harvard, and acted as secretary of the Lake Mohonk Conference on International Arbitration (1902–03). He taught law at George Washington University, acted as assistant solicitor of the department of state (1906–10), as agent of the United States in the Venezuela Arbitration case in the Chemizal Arbitration with Mexico, the Costa-Rica and Panama boundary case, and as adviser to the American members of the commission in the Tacna-Arica boundary dispute. He was also legal adviser to the Chinese government (1917–19), and acted in many other capacities.

DEVENS, CHARLES (1820–1891). An American jurist; born at Charlestown, Mass.; graduated at Harvard, and was admitted to the bar (1841); member of the state senate (1848–1849); was United States marshal for the district of Massachusetts (1849–53); served on the Federal side in the Civil War, attaining the rank of brigadier general, and that of major general; served in the superior and supreme courts of Massachusetts from 1867–1877 as associate justice; appointed United States attorney general by President Hayes, serving from 1877–1881; was again in the state supreme court from 1881 till his death.

DICKINSON, DONALD McDONALD (1846–1917). An American lawyer; born at Port Ontario, New York; was graduated from the University of Michigan (1866); admitted to the bar (1867); in 1888 was appointed postmaster general; was chairman of the National Democratic campaign committee (1892); acted as United States senior counsel before the Bering Sea claims commission (1896); member of court of arbitration to adjust controversy between United States and Republic of Salvador (1902).

DOUGLAS, STEPHEN A. See under STATESMEN.

DRACO. See under STATESMEN.

ELDON, JOHN SCOTT, EARL OF (1751–1838). Lord high chancellor. Born at Newcastle-upon-Tyne; admitted to the bar (1776); made attorney general, and knighted (1793); appointed chief justice of the Court of Common Pleas (1799); created lord chancellor (1801); as a reward for services rendered the king, George IV., he received the title of Earl of Eldon (1821); retired to private life (1827); was a common-law judge of the highest order.

ELKUS, ABRAM I. (1867–). American lawyer, educated at Columbia University, acted as ambassador to Turkey (1916–19), judge of the Court of Appeals of New York, 1919, commissioner to the League of Nations in the Aaland Islands dispute, and special United States attorney in fraudulent bankrupt cases.

ELLENBOROUGH, EDWARD LAW, FIRST BARON (1750–1818). Having been a special pleader for five years, he was called to the bar in 1780, and in 1787 was chosen to lead the defense of Warren Hastings in the impeachment trial, which continued till 1795. He made his first great effort for his distinguished client in 1792, and at the end his reputation in England was second only to that of Erskine. In 1801 he was appointed attorney general, the next year became chief justice and Baron Ellenborough, and in 1806 declined the chancellorship. Though inferior to Erskine as a speaker, he probably excelled him in knowledge of the law and in research. He was opposed to more humane modifications of the criminal code.

ELLSWORTH, OLIVER (1745–1807). An American statesman and jurist; born at Windsor, Conn.; admitted to the bar (1771); elected to the Connecticut legislature (1775); sent as a delegate from Connecticut to the Continental Congress (1778–1783); became a judge of the Connecticut superior court (1784); represented Connecticut in the constitutional convention of 1787 at Philadelphia, where he secured the adoption of the Connecticut compromise; instrumental in the organization of the national government (1789); appointed chief justice of the Supreme Court of the United States (1796–1800); sent with Murray and Davie as commissioner to France (1799); was a member of the governor's council in Connecticut from 1802 until his death; received the appointment of chief justice of the state in 1807, but he died before taking office.

ERSKINE, THOMAS, FIRST BARON (1750–1823). By many considered the greatest advocate of his period, especially in the cause of freedom. He was born in Edinburgh, the third son of the tenth earl of Buchan, and for several years served in the navy. Having entered Lincoln's Inn in 1775, in three years he was called to the bar. As youngest counsel in his first trial, he won a tremendous ovation in court, and immediately numerous cases. In 1781 he made his second great speech in defense of Lord George Gordon, accused of treason. He also defended the dean of St. Asaph from the charge of seditious libel, Lieutenant Bourne for having challenged Sir James Wallace, Hadfield for attempting to kill George III., and Stockdale in the trial involving freedom of the press—the last considered his greatest court effort. In 1806 he was made chancellor and a peer, but for a time lost favor, which was restored by his defense in the trial of Queen Caroline.

EVARTS, WILLIAM MAXWELL (1818–1901). A famous American lawyer and statesman; born in Boston; studied law, and was admitted to the bar (1841); became leading counsel for President Johnson in the impeachment trial before the Senate (1868); was attorney general of the United States (1869); became chief counsel for the United States before the court of arbitration at Geneva, convened to pass on the *Alabama* claims (1872); leading counsel for Hayes before the electoral commission in 1877; appointed secretary of state by President Hayes (1877–1881); United States delegate to the international monetary conference at Paris (1881); member of the United States Senate (1885–1891).

FAIRCHILD, CHARLES STEBBINS (1842–1924). Lawyer, banker; born at Cazenovia, N. Y. Graduated from Harvard (1863); Harvard Law School (1865); admitted to New York bar same year, beginning practice at Albany. Became deputy attorney general of New York (1874); attorney general (1876–1877); secretary of the treasury United States (1887–1889); member monetary commission, appointed by executive committee of Indianapolis monetary conference of 1897. Afterwards practiced in New York City.

FARMAN, ELBERT ELI (1831–1911). Jurist; born in New Haven, N. Y.; graduated from Amherst College (1855); admitted to bar (1858); to United States courts (1862); district attorney, Wyoming County, N. Y. (1868–1875); United States diplomatic agent and consul general at Cairo, Egypt (1876–1881); judge mixed tribunals of Egypt (1881–1884); United States member international commission (1883–1884), to determine amount to be paid the inhabitants of Alexandria for losses in bombardment of 1882; secured gift of Cleopatra's Needle, an Egyptian obelisk, now set up in Central Park, New York City.

FERGUSON, WILLIAM NASSAU (1869–). Justice of appeal, Ontario Supreme Court, from 1916; educated in law at Osgoode Hall, Toronto. Called to the bar in 1894, he became a bencher of the Law Society of Upper Canada in 1916, having been made a King's Counsel in 1908. Identified with charitable and athletic activities.

FEUERBACH, PAUL JOHANN ANSELM, RITTER VON (1775–1833). German judge and writer on law, born near Jena and educated at Frankfort. He became a foremost advocate of reform in criminal law, drafted a new penal code for Bavaria (1813), where he was appointed a judge and ennobled. For a time he held that trial by jury is not proof of crime, but also that the judge should not be given unlimited powers. Later he became president of the court of appeals at Anspach (1817), and four years later was commissioned to study judicial systems of neighboring countries, after which he published important treatises on reforms in legal proceeding.

FIELD, DAVID DUDLEY (1805–1894). A celebrated American jurist; born in Haddam, Conn.; studied law, and was admitted to the bar (1828); appointed a commissioner on practice and pleading by the New

York legislature; he prepared Codes of Civil and Criminal Procedure, which were adopted in New York and subsequently in many other states (1848–1850); placed at the head of a new commission to prepare political, penal, and civil codes (1875); suggested to the British Association for the Promotion of Social Science, a plan for the revision and reform of the law of nations; elected president of an association formed at Brussels for the reform and codification of the law of nations (1873); appointed to fill a vacancy in Congress (1876); presided over the Peace Congress in London in 1890.

FIELD, STEPHEN JOHNSON (1816–1899). A distinguished American judge; born in Haddam, Conn. He was a brother of David Dudley Field and of Cyrus W. Field. Went to California in 1849 and practised law; judge of the supreme court of California (1857) and chief justice (1859). Through his decisions regarding titles to lands the law of real property was placed upon a firm basis. In 1863 Lincoln made him an associate justice of the Supreme Court of the United States, where he contributed greatly to American constitutional law by his famous decisions. He was a member of the Hayes-Tilden electoral commission of 1877 and voted in favor of Tilden.

FRY, EDWARD (1827–1918). English advocate noted in equity and for his careful interpretations of law. He was raised to the bench in 1877 and knighted, from 1883 to 1892 was lord justice of appeals, and acted in many important arbitration cases for England. In 1900 he was made a judge on the Hague Tribunal.

FRYE, WILLIAM PIERCE. See under RULERS AND STATESMEN.

FULLER, MELVILLE WESTON (1833–1910). Jurist; born in Augusta, Me.; removed to Chicago, Ill. (1856); sat in the Illinois state legislature (1864, 1872, 1876, and 1880); chief justice of the United States Supreme Court (1888–1910) to succeed M. R. Waite; member of the arbitration commission at Paris to adjust the Anglo-Venezuelan difficulty (1899).

GAIUS (fl. 150). Celebrated Roman jurist, author of the *Institutes*, which was lost to modern times till 1816, when a manuscript was discovered by Niebuhr at Verona. This work, which falls into four parts, elucidates much of the nature and history of Roman law in later times.

GALT, HON. SIR THOMAS (1815–1910). Born in England; came to Canada (1833); studied law; called to bar (1845); elected bencher of Law Society (1855); created queen's counsel (1858); judge Court of Common Pleas (1869); chief justice (1887); knighted (1888) and retired from judicial life in 1894.

GARLAND, AUGUSTUS HILL (1832–1899). An American politician; born in Tipton County, Tenn.; admitted to the bar (1853); although opposed to secession, he joined the Southern cause; was elected to the Confederate Congress (1861); and afterward elected to the Confederate Senate, which position he held until the close of the war; governor of Arkansas (1874) under the new constitution; U. S. senator (1877–1885); U. S. attorney general (1885–1889).

GERARD, JAMES WATSON (1867–). American diplomatist and attorney, educated at Columbia University practised in New York, and was elected to the Court of Appeals, 1908. He resigned in 1913 to become ambassador to Germany, retiring on the entrance of the United States into the World War in 1917. He wrote *My Four Years in Germany* and *Face to Face with Kaiserism.*

GILPIN, HENRY DILWOOD (1801–1860). Jurist; born in Lancaster, England; educated in England up to 1816, when he removed to America, completing his education at the University of Pennsylvania (1819); admitted to the bar (1822); appointed district attorney for Pennsylvania (1832); appointed solicitor of United States treasury (1837); attorney general of the United States (1840–1841).

GIROUARD, HON. DESIRE (1836–1911). Born at St. Timothée, P. Q.; educated at Montreal College; studied law; B.C.L. (1860); D.C.L. (1874); called to bar (1860); created queen's counsel (1880); entered political life (1874) representing Jacques Cartier from 1878 to 1896; retired from politics. Distinguished himself in connection with Deceased Wife's Sister bill; was one of group of 16 French Conservative men known as "The Bolters." Contributor to Canadian history, receiving the Confederation Medal from Lord Aberdeen. Judge of Supreme Court of Canada (1895–1911).

GOODNOW, FRANK JOHNSON (1859–1939). American professor of law and president of Johns Hopkins, from 1914. Educated at Amherst, Columbia, and in Paris and Berlin. Associated with Columbia University from 1883 to 1914. Among his books are *Comparative Administrative Law, Selected Cases on the Law of Taxation, Principles of Constitutional Government.*

GRAY, HORACE (1828–1902). Appointed associate justice of the Supreme Court in 1881, he wrote many notable opinions, including the decision that United States treasury notes are legal tender in time of peace, that the Great Lakes are not "high seas," and the majority opinion in the Chinese Exclusion Act. He was educated at Harvard, as Court Reporter of Massachusetts published sixteen volumes of Supreme Court reports, acted seventeen years as justice of the Massachusetts Supreme Court, eight of them as chief justice.

GRESHAM, WALTER QUINTON (1832–1895). American jurist; born near Lanesville, Ind.; admitted to bar (1853); elected to state legislature (1860); brevetted major general Civil War (1865); United States district judge for Indiana (1869); postmaster general (1882); secretary of treasury (1884); United States circuit judge (1884); secretary of state (1893).

GROTIUS (*grō-shē'ŭs*) (1583–1645). Dutch philosopher and jurist, who lived for some years in Rotterdam, was imprisoned in 1618, but escaped the next year to France. Known for his studies in philosophy, religion, and for his *De Jure Belli et Pacis*, one of the first books on jurisprudence in modern times. Beginning with the foundations of the Roman law, he built up a structure of law out of nature and reason.

HALE, SIR MATTHEW (1609–1676). Lord chief justice of England; born at Alderley, Gloucestershire; called to the bar (1637); judge of the Court of Common Pleas 1654 till the Restoration, when he was made chief baron of the exchequer, and knighted; chief justice of the King's Bench (1671–1676).

HARLAN, JOHN MARSHALL (1833–1911). American jurist; born in Boyle County, Ky. Studied law at Transylvania University; practised at Frankfort; county judge (1858); elector on Bell and Everett ticket (1860); in Union army (1861–1863); attorney general Kentucky (1863–1867); practised law in Louisville (1867); associate justice United States Supreme Court (1877–1911); one of the American arbitrators of Bering Sea tribunal (1893).

HARMON, JUDSON. See under STATESMEN.

HENEY, FRANCIS JOSEPH (1859–1937). Though born in New York, he lived in San Francisco and Arizona after 1864. Educated at the University of California and the Hastings Law School, Mr. Heney began practice in 1885, but for a number of years after 1885 engaged in the cattle business in Arizona, resuming the practice of law at Tucson in 1889. Engaged as attorney in numerous cases involving titles of land under Mexican grants. Then became attorney general of Arizona for a year, and returned to civil practice in San Francisco in 1895. Having gained a national reputation as a fearless counsel, he was urged by the attorney general of the United States, Philander C. Knox, to represent the government in certain land fraud cases in Oregon. Several persons were indicted, and most of them were convicted. He was also attorney in the San Francisco cases involving Mayor Eugene Schmitz and Abe Ruef, serving for nearly three years without compensation. He was Progressive candidate for senator from California in 1912 and Democratic candidate for governor in 1918, but was prevented by legal technicality from having his name on the official ballot. Appointed special counsel of the U. S. Senate in 1924 for the investigation of the Internal Revenue Bureau.

HOAR, EBENEZER ROCKWOOD (1816–1895). Jurist; born at Concord, Mass.; studied law, and was admitted to the bar (1835); judge of the court of Common Pleas (1849–1855); judge of the state supreme court (1859–1869); appointed attorney general of the United States (1869), serving till 1870; member of the Joint High Commission that framed the Treaty of Washington (1871); member of Congress (1873–1875).

HOLMES, OLIVER WENDELL (1841–1935). Jurist; born at Boston, Mass. Graduated from Harvard (1861), Harvard Law School (1866); served in Civil War, being mustered out with rank of captain. Admitted to Massachusetts bar (1867); practised in Boston; taught constitutional law at Harvard Law School (1870–1871); editor *American Law Review*

(1870–1873); member Shattuck, Holmes & Monroe, law firm (1873–1882); professor Harvard Law School (1882); associate justice (1882–1889), chief justice supreme judicial court of Massachusetts (1899–1902); associate justice United States Supreme Court since 1902.

HOLT, JOHN (1642–1710). Chief justice of England for 22 years. At 21 he was called to the bar, gaining almost immediate fame and success. Among his celebrated cases were the defense of the Earl of Danby for impeachment, Lord John Russell for conspiracy in the Rye House Plot, and for the prosecution in the West India Company against Sandys for trade infringement. He discontinued the practice of bringing prisoners into court in irons and provided counsel for those unable to obtain their own lawyers.

HUBER, MAX (1874–). Swiss professor of law (1902–21) at the University of Zürich. Consulted by the government on many important questions, and acted as representative to various countries on special missions. Swiss representative at the Hague Conference of 1907; judge of the Permanent Court of International Justice in 1922, and a member of the committee of the Council of the League of Nations dealing with the question of the Aaland Islands.

HUDSON, MANLEY OTTMER (1886–). Elected professor of International law at Harvard (1923), after teaching at Missouri and acting in various capacities for the government in international negotiations. Interested in international peace and the League of Nations. Some of his works are *The Permanent Court of International Justice, The Next War,* and *Current International Coöperation* (1927).

HUGHES, CHARLES EVANS. See under STATESMEN.

IMPEY, SIR ELIJAH (1732–1809). An English jurist. First chief justice of Bengal (1774–1783); recalled and impeached for condemning to death the famous forger, Raja Nanda Kumar. He was acquitted with honor as an amiable and upright judge.

JACKSON, HOWELL EDMUNDS (1832–1895). Associate justice of the Supreme Court, by appointment of President Harrison in 1893. He had previously served as judge of the state Supreme Court, and as judge of the Sixth Circuit by appointment of President Cleveland. Though he was a Democrat appointed by a Republican president, he was unanimously confirmed by the Senate as a member of the highest tribunal.

JAY, JOHN (1745–1829). American statesman and jurist; born in New York City. Was admitted to the bar (1768); was a delegate to the first continental congress (1774), a member of the provincial congress of New York, and president of the continental congress (1778–1779). From 1779 to 1782 he represented his country in Spain; was one of the American peace negotiators in Paris (1782–1783), and helped in securing the ratification of the Federal constitution in New York. From 1789 until 1795 he was the first chief justice of the United States Supreme Court, and in 1794 concluded the Jay treaty with the British government. Was governor of New York (1795–1801).

JEFFREYS or JEFFERIES, GEORGE, LORD (1648–1689). Lord high chancellor of England; born at Acton, near Wrexham, Denbighshire; admitted to the bar (1668); was appointed common sergeant of the city of London (1671); became recorder of London (1678); was appointed chief justice of Chester (1680); a baron in 1681; and chief justice of England (1683); presided at the trials of those who had a part in the Rye House and Popish plots, and condemned without mercy; conducted the "Bloody Assizes," after the battle of Sedgemoor, when he ordered 320 executions for high treason (1685); made lord chancellor and keeper of the great seal by James II. (1685); instrumental in consigning the seven bishops to the Tower (1688); attempted flight with his master, James II., but was caught and placed in the Tower, where he died.

JOHNSON, REVERDY (1796–1876). American jurist and statesman; born in Annapolis, Md.; admitted to the bar (1815); state senator (1821–1825); United States senator (1845–1849, and 1863); attorney general (1850); minister to Great Britain (1868).

JUSTINIAN. See under STATESMEN.

KELLOGG, FRANK BILLINGS. See under STATESMEN.

KENT, JAMES (1763–1847). An American jurist; author of the famous *Commentaries on American Law* which holds in this country a position similar to that occupied by Blackstone's *Commentaries* in Great Britain.

KENYON, WILLIAM SQUIRE (1869–1933). Born in Ohio, educated in Iowa at the state university at Fort Dodge, was district attorney, district judge, assistant to the United States attorney general (1910–11), and United States senator until he resigned in 1922 to become judge of the Circuit Court of the eighth district. He acquired a notable reputation as a pleader and interpreter of the law.

KNOX, PHILANDER CHASE (1853–1921). American lawyer and cabinet officer; born at Brownsville, Pa.; admitted to the bar (1875); United States district attorney for Western District of Pennsylvania (1876); partner in a Pittsburgh law firm in 1877, and devoted his time especially to corporation law; president of Pennsylvania Bar Association (1897); attorney general (1901–1904); member of United States Senate (1904–1909); secretary of state (1909).

LaFLAMME (*lä-flăm'*), **RUDOLPHE** (1827–1893). For a generation a distinguished member of the bar in Quebec, Canada, professor of law at McGill University, and counsel in important cases, such as the Guibord burial litigation, the libel case of the Toronto *Mail,* and the defense of the St. Albans raiders. He sat in the House of Commons (1872–8), was minister of inland revenue (1873) and declined a supreme judgship, but became minister of justice in the Mackenzie cabinet (1877–78).

LaFONTAINE, LOUIS HIPPOLYTE. See under STATESMEN.

LAMAR, LUCIUS QUINTUS CINCINNATUS (1825–1893). Statesman; born in Putnam County, Ga.; admitted to bar (1847); elected to Congress (1857–1859); colonel in Confederate army; professor of ethics and metaphysics, University of Mississippi (1866–1867); of law (1867–1870); member of House of Representatives (1873–1877); of Senate (1877–1885); secretary of interior (1885–1888); associate justice United States Supreme Court (1888–1893).

LANGDELL, CHRISTOPHER COLUMBUS (1826–1906). From 1870 to 1900 professor of law at Harvard, and dean of the Law School, 1871–1895. He was born at New Boston, N. H., educated at Phillips Exeter, and Harvard College and Law School, and practised law in New York from 1854 to 1870. At Harvard he introduced the case system, now widely used in American law schools. His *Cases on the Law of Contracts* (1870) was the first book of its type. He made case books also on Sales and Equity Pleading. Through his influence and that of his successor, Dean James Barr Ames, the Harvard Law School became a leader in legal teaching.

LANSING, ROBERT (1864–1928). Authority on international law, and former secretary of state, who received his A. B. at Amherst in 1886. For much of his life he was an attorney, representing the United States in the Bering Sea Arbitration and in the Alaskan boundry dispute with Canada, the Chinese government, and the republic of Chili in the Tacna-Arica arbitration in 1923–4. He was solicitor in the department of state at Washington from 1914 to 1915, when he was appointed in June to the portfolio of state, which he held till Feb. 13, 1920, when he was forced to withdraw because of differences with President Wilson. As one of the commissioners to the Peace Conference in 1919, he wielded a considerable influence in events after the World War. After his retirement he wrote *The Peace Negotiations,* 1921, *The Big Four and Others at the Peace Conference,* 1921, *Notes on Sovereignty,* 1921.

LEE, CHARLES (1758–1815). Jurist; born in Fauquier County, Va.; admitted to the bar; served in the Virginia assembly; naval officer of the Potomac district (1795); attorney general of the United States (1795–1801).

LEGARE, HUGH SWINTON (1797–1843). Jurist; born in Charleston, S. C.; studied law, completing his education in Edinburgh; elected to the state legislature (1824–1830); appointed attorney general of the state of South Carolina; opposed extreme measures during the nullification crisis, although in favor of states right; served as chargé d'affaires at Brussels (1832–1838); elected to Congress; appointed attorney general of the United States by President Tyler (1841); on the retirement of Webster conducted the state department.

LINCOLN, LEVI (1749–1820). A political leader; born in Hingham, Mass.; graduated at Harvard

(1772); made clerk of the court in Worcester County (1775); later becoming probate judge; entered state house of representatives (1796); became a member of state senate (1797); elected to Congress (1800); appointed by Jefferson attorney general of the United States (1801); was acting secretary of state for some months during the same year; was lieutenant governor (1807–1808), and governor of Massachusetts (1808–1809).

LINCOLN, ROBERT T. See under RULERS AND STATESMEN.

LITTLE, HON. PHILIP FRANCIS (1824–1897). Born and educated in Prince Edward Island; went to Newfoundland (1844); entered legislature (1850); leader of Liberal party in the colony and largely responsible for vital changes in old system of irresponsible rule, advocating self-government for the colony; enlisted John Bright and others until he won his cause (1854). Formed ministry of first government; attorney general (1855); senior judge of the supreme court (1858); retired to Ireland (1867).

LITTLETON, THOMAS (c. 1407–1481). English judge and author of a short treatise on *Tenures*, which the great Justice Coke pronounced "The most perfect and absolute work that ever was written in any known science." Coke made an elaborate commentary on this work, which was originally written in legal French. Littleton was a member of the Inner Temple, was King's Sergeant (1455), and Justice of the Common Pleas (1466). His *Tenures* formed the basis for later law of real estate.

LIVINGSTON, EDWARD (1764–1836). American statesman and jurist, born in New York, educated at Princeton, and practised in New York. He was United States district attorney for New York (1801), and held office as mayor of the city at the same time. In 1804 he removed to Louisiana, and there prepared a model criminal code, which attracted wide attention in Europe, though it was never adopted by any American state. Livingston held several political offices, was secretary of state under Jackson, and later went to France to attempt to secure the fulfilment of the treaty of 1831.

LOCKWOOD, BELVA ANN (1830–1917). First woman lawyer to be admitted to practice before the Supreme Court (1879). She was born in New York, was graduated from Genesee College and taught school from 1857 to 1868. Admitted to the bar in Washington, D. C., in 1873, she became interested in suffrage, temperance, universal peace, and better treatment for the Indian. Appointed to serve on several government commissions

LODER, BERNARD CORNELIUS JOHANNES (1849–1935). Lawyer in Rotterdam, Holland, from 1873 to 1908; judge of the high court, until 1921. First president of the Permanent Court of International Justice from 1922 to 1925. Chairman of a conference of the Scandinavian countries, Switzerland and Holland in 1920.

LURTON, HORACE HARMON (1844–1914). American jurist. Born in Kentucky; graduate of Cumberland University, Tenn., and admitted to the bar (1867); justice of supreme court of Tennessee (1886–1893); judge U. S. circuit court (1893–1909); associate justice U. S. Supreme Court (1909–1914).

LYCURGUS (*lī-kûr'gŭs*). See under RULERS AND STATESMEN.

McKENNA, JOSEPH (1843–1926). An American jurist; born at Philadelphia; removed to California (1855); admitted to the bar (1865); district attorney of Solano County; in California legislature (1875–1876); member of Congress (1885–1893); judge U. S. circuit court (1893–1897); attorney general of the United States (1897–1898); associate justice of U. S. Supreme Court (1898–).

McREYNOLDS, JAMES C. (1862–). Born in Kentucky; graduate of Vanderbilt University (1882); law department of University of Virginia (1884); law professor Vanderbilt University (1900–1903); assistant attorney general of the United States (1903–1907); retained as special assistant to attorney general on trust matters; attorney general in President Wilson's cabinet till September, 1914, when he became an associate justice of the U. S. Supreme Court.

McSWEENEY, JOHN (1824–1890). Eminent criminal lawyer, who for years lived in Wooster, Ohio, and was counsel in many important cases, especially for the state. He was noted for his eloquence and dramatic appeals to juries.

MacVEAGH (*mâk-vā'*), **WAYNE** (1833–1917). Lawyer; born in Pennsylvania; graduate of Yale (1853); admitted to bar (1856); captain in Civil War (1862–1863). Minister to Turkey (1870–1871); attorney general in Garfield's cabinet (1881); ambassador to Italy (1893–1897); U. S. counsel in Venezuelan arbitration before Hague tribunal (1903).

MAINE, HENRY JAMES SUMNER (1822–1888). English historian and jurist, educated at Cambridge, where he held the chair of civil law (1847–54). His book, *Ancient Law*, almost at once became a standard treatise. He was legal representative on the council for India (1863–69), professor of comparative law at Oxford, and in 1887 master of Trinity Hall, Cambridge, and professor of international law. Other works like *Village Communities*, *Early Law and Custom*, and *International Law* for years were standard treatises.

MANSFIELD, WILLIAM MURRAY, EARL OF (1705–1793). British jurist; born at Perth; called to the bar in 1730; appointed solicitor general in 1741; king's attorney (1754); chief justice of the King's Bench (1756); exposed to much abuse and party hatred because of his opinions, his house, with all his valuable books and manuscripts, was burned in the Gordon riots of 1780; with dignity, he refused to be indemnified by Parliament. Created Earl of Mansfield in 1776; resigned chief justiceship in 1778.

MARSHALL, JOHN (1755–1835). American jurist whose work on constitutional law constitutes a record. Born in Fauquier County, Va.; served in Revolution; admitted to bar (1781); member Virginia legislature (1782); member of the convention to ratify the Constitution (1788), its adoption by Virginia being largely due to him; went with Gen. C. Pinckney and Elbridge Gerry to influence the French Directory to remove restrictions laid on American commerce (1797); elected to the lower house of Congress, became an acknowledged leader on constitutional and international law; became secretary of state (1800); chief justice United States Supreme Court (1801–1835), when his great constitutional work was done.

MARSHALL, LOUIS (1856–1929). American lawyer, born in Syracuse, N. Y., educated at Columbia University and practised in New York City. Served in various labor and arbitration boards, and was a member of the New York constitutional conventions in 1890, 1894, and 1915, first United States citizen to serve in three such conventions. Acted in the cloakmakers strike of New York, on the commission to fix the price of bread, the committee that secured important regulations of private and foreign bankers, and the state immigration commission. Counsel for Governor Sulzer in the impeachment proceedings. Secured 75 millions for relief of Jewish war sufferers.

MARSHALL, THOMAS RILEY. See under STATESMEN.

MARTIN, LUTHER (1748–1826). Celebrated lawyer, for 27 years the attorney general of Maryland, judge in Baltimore (1814–16), and as member of the convention of 1787 drafted article VI of the Constitution. He was born in New Jersey, educated at Princeton, but moved to Virginia in 1771. He defended Justice Chase of the Supreme Court in impeachment proceedings, Aaron Burr in the trial for treason, and others in important cases.

MASON, JEREMIAH (1768–1848). Called by Daniel Webster the greatest American lawyer of his time. He was born in Connecticut, educated at Yale, and settled in New Hampshire, of which state he was senator (1813–17), having been previously attorney general of the commonwealth. After 1832 he practised in Boston. In knowledge and interpretation of the law he had few equals.

MASON, JOHN YOUNG (1799–1859). A politician; born at Greensville, Sussex County, Va.; studied law and was admitted to the bar (1819); presided over Federal and state courts; served in the Virginia assembly; member of Congress (1831–1837); judge United States district court for Virginia (1837–1844); made secretary of the navy (1844); appointed attorney general in President Polk's cabinet (1845–1346); minister to France (1853); issued with Buchanan and Soulé, ministers of the United States to England and Spain, respectively, the famous Ostend manifesto.

MEREDITH, WILLIAM MORRIS (1799–1873). Born in Philadelphia, he was graduated second in his class at the University of Pennsylvania in 1812. At 17 he was a lawyer, a legislator at 25, and prominent in the Girard will case at 30. President Taylor ap

pointed him secretary of the treasury, and in 1861 he became attorney general of Pennsylvania, serving with great distinction for six years. President Grant appointed him senior counsel in the Geneva arbitration tribunal in 1870.

MOODY, WILLIAM HENRY (1853–1917). American cabinet officer; born in Newbury, Mass.; member of Congress (1895–1902); in March, 1902, he succeeded John D. Long as secretary of the navy; in 1904 he was made attorney general; associate justice of the United States Supreme Court (1907–1910).

MOORE, JOHN BASSETT (1860–). Member of the Court of Arbitration at The Hague, from 1913, judge of the Permanent Court of International Justice, 1921–28, and distinguished in many arbitration and international cases. He was born in Delaware, educated at the University of Virginia, and was professor of international law at Columbia University from 1891 to 1924. Acted for the United States in various arbitration trials. Of his numerous works on law, more important ones are *Report on Extradition, American Diplomacy, Digest of International Law,* and *Principles of American Diplomacy.*

MURRAY, GEORGE JOHN ROBERT (1863–). Chief justice of the Supreme Court of South Australia and Lieutenant Governor, who was educated at Cambridge University, England, and called to the bar in 1888. He was made a K. C. in 1906 and judge of the Supreme Court six years later.

NELSON, JOHN (1791–1860). Jurist; born in Fredericktown, Md.; was graduated from William and Mary College (1811); studied law and was admitted to the bar; was a member of Congress (1821–1823); appointed United States minister to Naples (1831); attorney general of the United States (1843).

OLNEY, RICHARD. See under RULERS AND STATESMEN.

OSBORN, ALBERT SHERMAN (1858–). American authority on questioned legal documents. Born in Sharon, Michigan; lived in New York City for many years. Author of *Questioned Documents* and *The Problem of Proof,* both standard treatises.

OWEN, ROBERT LATHAM (1856–). Former senator from Virginia, who was instrumental in securing the federal reserve and farm loan acts. He began practice of law in 1880, acted for four years as United States Indian agent to the five civilized tribes, and was senator from 1907 to 1925.

PAINE, ROBERT TREAT (1731–1814). American lawyer and patriot; born in Boston; graduated at Harvard (1749); admitted to the bar (1759); member of the Massachusetts general court (1773–1774), of the Continental Congress (1774–1778), and signed the Declaration of Independence; speaker in the Massachusetts house of representatives (1777); state attorney general (1780–1790); associate justice of the state supreme court (1790–1804).

PAPINIAN (about 150–212). The greatest of Roman jurists; his productions include, mostly, digests of decisions, and his writings were so valuable that they formed a part of the course of law study and were employed in settling disputed questions.

PARKER, ALTON BROOKS (1852–1926). American jurist; born at Cortland, N. Y.; graduated at the Cortland Normal School, and at Albany Law School (1872); surrogate of Ulster County (1877–1885); representative at the Democratic National Convention (1884); chairman of the Democratic state executive committee (1885); in the New York supreme court (1886), and court of appeals (1889); chief judge (1897); Democratic candidate for president (1904); and president of the American Bar Association (1906–1907).

PARKER, JOEL (1795–1875). Eminent New England attorney and professor of law, for fifteen years justice of the Supreme Court of New Hampshire. During this time, in a clash between the state and federal courts over the meaning of the term "lien," the United States Supreme Court decided in favor of the view taken by Judge Parker. He was born in New Hampshire, educated at Dartmouth, became a member of the Supreme Court of his state in 1833, chief justice in 1835, and professor of law at Harvard from 1836 to 1848. For 12 years he was professor of medical jurisprudence at Dartmouth.

PARSONS, THEOPHILUS (1750–1813). American jurist; born in Byfield, Mass.; graduated at Harvard (1769); began practice of law at Falmouth (now Portland, Me.) (1774); member of the constitutional convention which framed a new constitution for Massachusetts (1779–1780); member of the state convention called to ratify the Federal Constitution (1788); in 1801 was attorney general of the United States in John Adams' cabinet; from 1806 till his death he was chief justice of the state supreme court.

PEPPER, GEORGE WHARTON (1867–). Senator from Pennsylvania (1922–1927); professor of law, University of Pennsylvania, his alma mater (1893–1910); Lyman Beecher lecturer at Yale (1915). Pepper distinguished himself as a counsellor and author of several legal texts, including *The Borderland of Federal and State Decisions, Pleading at Common Law and under the Codes, Digest of the Laws of Pennsylvania.*

PINKNEY, WILLIAM (1764–1822). An American statesman and lawyer; born at Annapolis, Md.; studied law with Justice Samuel Chase; admitted to the bar (1786); member of the convention to ratify the Federal Constitution (1788); elected to the house of delegates (1788); secured (1796) a claim of $800,000 for Maryland on the Bank of England as compensation due American merchants under the Jay Treaty; elected attorney general of Maryland (1805); sent as minister extraordinary to England (1806); recalled (1811); elected to Maryland state senate, but was appointed attorney general of the United States by President Madison (1811); entered the national House of Representatives (1815–1816); minister to Russia and special envoy to Naples (1816); elected to United States Senate (1820).

POMERENE, ATLEE (1863–1937). Senator from Ohio (1911–23); lieutenant governor of Ohio (1910–11); attorney in Cleveland. He was appointed by President Coolidge one of the two special attorneys in the oil lease cases (1924–27). He was born in Berlin, Ohio, educated at Princeton, and began practice in Canton in 1887, holding city and county offices for a number of years.

POUND, ROSCOE (1870–). Born in Lincoln, Nebraska, and educated at the University of Nebraska and Harvard, Dr. Pound practised law for a time, was a professor and dean of the College of Law, University of Nebraska, professor at Northwestern, Chicago, and Harvard, and dean of the School of Law at Harvard, from 1916. Member of many legal societies, and author of numerous works on jurisprudence, including *Readings on Roman Law, The Spirit of the Law, Introduction to the Philosophy of Law,* and *Law and Morals.*

QUINCY, JOSIAH (1744–1775). American lawyer, orator, and essayist; born in Boston; graduated at Harvard (1763), and with John Adams conducted (1770) the defense of the British soldiers who took part in the Boston Massacre; went South (1773) and arranged for a system of communication between the patriots of that part of the country and those of the North. In 1774 he went to England in the interests of the Patriot party.

RANDOLPH, EDMUND. See under RULERS AND STATESMEN.

READING, MARQUESS OF. See under STATESMEN.

ROBERT, HENRY MARTYN (1837–1923). Author of standard works on parliamentary law, including *Robert's Rules of Order* (1876, rev. 1915), *Parliamentary Practice* (1919), and his *magnum opus, Parliamentary Law* (1922). He was born in South Carolina, a graduate of West Point, and for many years was in the engineering service of the regular army, attaining the rank of brigadier general. Some of the great engineering works planned by him were various lighthouses, harbor improvements, and the new sea wall at Galveston, Texas.

ROBERTS, OWEN JOSEPHUS (1875–). Special counsel appointed, with Atlee Pomerene (q. v.), by President Coolidge to act for the government in the oil lease cases (1924). He was educated at the University of Pennsylvania, where he taught law (1898–1918), was assistant district attorney (1901–04), and acted as special deputy attorney general in the cases arising out of the espionage act during the World War.

ROGERS, HENRY WADE (1853–1927). American judge, legal authority, and college administrator, received his training at the University of Michigan where he taught law from 1883 to 1890, after which he was president of Northwestern University for ten

years. From 1900 to 1916 he was connected with Yale University as lecturer, professor, and from 1903 as dean. Since 1913 U. S. Circuit Judge, second district. Judge Rogers has held many positions of trust, committee chairmanships, and other offices in college, church, and nation, including the M. E. Church, several legal associations, peace societies, and civic federations. Author of *Illinois Citations, Expert Testimony, Introduction to Constitutional History as Seen in American Law*, and many articles in cyclopedias and legal journals.

ROOT, ELIHU. See under STATESMEN.

ROUTHIER, ADOLPHE BASILE (1839–1920). Born at St. Placide, P. Q. Educated at College Ste. Thérèse and Laval University, taking B. A. (1858); called to bar (1861); created queen's counsel (1873); puisne judge of Superior Court of Province of Quebec. Judge of Vice Admiralty Court (1897); president of St. Jean Baptiste Society. Declined appointment to lieutenant governorship of the Northwest Territories (1897). Routhier wrote several literary works under the name of Jean Piquefort, but he is now recalled chiefly as the author of the national song, *O Canada*.

RUSSELL, CHARLES ARTHUR (1832–1900). Chief justice of England, 1894 to his death. After two years of practice in his home town, Newry in Ireland, he removed to London in 1856. He became Queen's Counsel (1872), member of Parliament (1880–94), attorney general in the Gladstone ministries (1886, 1892), and lord of appeal (1894). Among the great cases were the fisheries dispute between United States and England (the Bering Sea case), the Campbell divorce suit, the Parnell Commission, acting as counsel for Parnell, and the libel action of Dixon against Plimsoll.

RUTLEDGE, JOHN (1739–1800). American politician and jurist; born at Charleston, S. C.; studied law in England, and began to practice in Charleston in 1761; sent as a delegate to the Stamp Act Congress (1765); sat in the South Carolina Convention of 1774 and the Continental Congress of the same year; in 1776 appointed chairman of the committee which framed the new constitution for South Carolina; became first president under that constitution; was governor of South Carolina in 1779; served during the Revolutionary War with the Army of the South; served in Congress from 1782–1783; was chancellor of South Carolina (1784); member of the convention which framed the Federal Constitution (1787); appointed an associate justice of the United States Supreme Court (1789–1791); chief justice of South Carolina (1791–1795).

SANFORD, EDWARD TERRY (1865–1930), judge, was graduated from the University of Tennessee and Harvard. Assistant attorney general of the United States, 1907–08, and judge of the Eastern and Middle Districts of Tennessee, U. S. Courts, from 1908 to 1923, when he was appointed an associate justice of the Supreme Court by President Harding.

SOLEY, JAMES RUSSELL (1850–1911). Lawyer, author; born in Boston, Mass.; educated at Harvard College and Columbia University Law School; professor United States Naval Academy (1872–1882); professor United States navy (1876–1890); department of education Paris Exposition (1878); assistant secretary of the navy (1890–1893); member New York bar after 1893; Venezuelan counsel at Paris Arbitration, Venezuela and British Guiana Boundary (1899); lecturer Naval War College, Newport, R. I.

STANTON, EDWIN McMASTERS. See under RULERS AND STATESMEN.

STONE, HARLAN FISKE (1872–). American jurist, educated at Amherst and Columbia; admitted to the New York bar in 1898; professor of law at Columbia (1899–1905) and dean (1910–24). President Coolidge made him attorney general to succeed H. M. Daugherty (1924), and a year later, associate justice of the Supreme Court.

STIMSON, FREDERIC JESUP. See under AUTHORS.

STORY, JOSEPH (1779–1845). Eminent jurist; graduated from Harvard College (1798); admitted to bar (1801); in state legislature (1805); in Congress (1808); associate justice United States Supreme Court (1811–1845); professor of law, Harvard (1829–1845). His legal writings and decisions are now in use.

STRAUS, OSCAR SOLOMON. See under RULERS AND STATESMEN.

SUTHERLAND, GEORGE (1862–), jurist; born in England, for many years practised law and held local offices in Utah. Member of the Fifty-seventh Congress, 1901–03, Senator from Utah, 1905–17. Associate justice of the Supreme Court from 1922 by appointment of President Harding. President American Bar Association, 1916–17.

SWAN, THOMAS WALTER (1877–). A native of Connecticut and a graduate of Yale, Swan settled in Chicago, where he practised from 1903 to 1916, lecturing at the University of Chicago (1903–04, 1908). He was called to Yale as professor of law and dean of the Law School in 1916, and resigned in 1927, on being appointed judge of the second circuit of the federal district court.

SWAYNE, NOAH HAYES (1804–1884). Associate justice of the Supreme Court from 1862 to 1881. He was born in Virginia, at first studied medicine, but soon turned to the law, being admitted to the bar at 19. Two years later he removed to Ohio, where he sat in the legislature, and for 10 years (1831–41), acted as United States district attorney. As lawyer and judge he gained attention for analysis of cases, and for several vigorous dissents, especially in the "slaughter house" cases. His son, Wager Swayne, became a brigadier general in the Civil War, and later an eminent corporation attorney in New York City.

TAFT, WILLIAM HOWARD. See under STATESMEN.

TANEY (*taw'ni*), **ROGER BROOKE** (1777–1864). A celebrated American jurist; born in Calvert County, Md.; admitted to the bar (1799); attorney general of the United States (1831); succeeded Duane as secretary of the treasury; chief justice of the Supreme Court (1836–1864); rendered his most famous decision in the Dred Scott case; he denied the right of the president to suspend the writ of habeas corpus.

TAYLOR, THOMAS WARDLAW (1833–1917). Born in Scotland; educated at Edinburgh, taking B.A. (1852, and Toronto M.A. (1856); called to Toronto bar (1858); referee under Act for Quieting Titles (1869); master in Chancery (1872); queen's counsel (1881); puisne judge of Queen's Bench (1883); chief justice of Manitoba (1887); administrator to Province (1893); royal commissioner (1886, 1895); knighted (1897); author of important legal treatises.

THOMPSON, JOHN SPARROW DAVID. See under RULERS AND STATESMEN.

UNTERMYER, SAMUEL (1858–1940). A lawyer, who practised in New York City from 1879, and engaged in many personal actions and arbitrations. Some of his important cases were as counsel for the committee on housing in New York; for the secretary of the treasury in the litigation with the Riggs Bank of Washington; income tax legislation; campaign contributions investigation by federal Senate (1924); and for Governor Smith in the water-power controversy in New York. Specialized also in certain divorce and estate cases involving large sums of money.

VAN DEVANTER, WILLIS (1859–1941). American jurist; educated at DePauw University and Cincinnati College; city attorney of Cheyenne, Wyoming; chief justice of Wyoming supreme court; assistant United States attorney general (1897–1903); professor of equity pleading and process (1898–1903); of equity jurisprudence, Columbia University (1902–1903); associate justice United States Supreme Court (1910).

VINOGRADOFF (*vē-nō'grä-dŏff*), **PAUL** (1854–1925). Professor of jurisprudence at Oxford from 1903 to his death. For many years he taught in Russia, where he was born, but came into conflict with bureaucratic management because of his advanced ideas of education. Lectured at many universities, including Harvard in 1907, the University of Leyden, 1921, Columbia, Johns Hopkins, Michigan, and California in 1923. Director of Publications of the British Academy and editor of Russian Section of social and economic history of the War (1914–17) for the Carnegie Foundation of New York. He edited many series of books and wrote several on English social and economic life and history, the article on *Russia* in the 12th edition of *Britannica*, and *Outlines of Historical Jurisprudence*. Knighted in 1917.

WAITE, MORRISON REMICK (1816–1888). American jurist; born at Lyme, Conn.; admitted to the bar (1839); member of Ohio legislature (1849); appointed (1871) to represent the United States at tribunal for arbitration of the *Alabama* and other

claims at Geneva; chief justice of the Supreme Court of the United States (1874–1888).

WEBSTER, DANIEL. See under STATESMEN.

WHITE, EDWARD DOUGLASS (1845–1921). American jurist; educated at Mount St. Mary's Maryland, at New Orleans, and Georgetown College, Washington; served in Confederate army; admitted to bar (1868); state senator (1874); associate justice of Supreme Court, Louisiana (1878); United States senator (1891–1894); associate justice United States Supreme Court (1894–1910); chief justice (1910).

WICKERSHAM, GEORGE WOODWARD. See under RULERS AND STATESMEN.

WIGMORE, JOHN HENRY (1863–). Dean of the faculty of law of Northwestern University, Evanston, Illinois, and author of numerous treatises on law. He was born in San Francisco, educated at Harvard, spent two years in practice in Boston, and then was professor of Anglo-American law at Tokyo, Japan, for three years (1889–92). Some important books are *Treatise on Evidence, Principles of Judicial Proof,* and *Cases on Evidence,* all standard texts.

WILBUR, CURTIS DWIGHT (1867–). Born in Iowa, he was educated at the United States Military Academy, but began the practice of law in Los Angeles in 1890. He acted as judge of the Superior Court of Los Angeles County (1903–18), associate justice of the California Supreme Court (1919–22), and chief justice (1922–24) until appointed secretary of the navy in the Coolidge cabinet. He organized a juvenile court in Los Angeles and helped secure important legislation for this.

WILLIAMS, GEORGE HENRY (1823–1910). Jurist; born in New Lebanon, N. Y.; admitted to the bar (1844); judge of the first judicial district of Iowa (1847–1852); chief justice of Oregon territory (1853–1857); U. S. senator from Oregon (1865–1871); member Joint High Commission to settle *Alabama* claims; attorney general of United States (1782–1875).

WIRT, WILLIAM (1772–1834). American lawyer, statesman, author; born at Bladensburg, Md.; settled in Richmond in 1806, and won distinction for prosecution of Aaron Burr; member of Virginia legislature (1807–1808); United States district attorney (1816); attorney general (1817–1829); nominated for president in 1832 by Anti-Masonic party.

ABBOTT, GRACE (1878–1939). Social worker, born at Grand Island, Nebraska, educated there, at the University of Nebraska, and the University of Chicago. After acting as a teacher till 1907, she directed the Immigrants' Protective League to 1917, living at Hull House, Chicago, 1908–15, afterward engaged in government service. Director of the United States Children's Bureau. Writer on social topics, and author of *The Immigrant and the Community.*

ABBOTT, LYMAN (1835–1922). Clergyman, author, and editor, who was born in Roxbury, Mass., educated in New York, and practiced law (1856–59). He held pastorates in Terre Haute, Indiana, New York City, and succeeded Henry Ward Beecher at Plymouth Church (1888–1899). With Beecher he was editor of *The Christian Union* for five years, becoming sole editor in 1881, renamed the journal *The Outlook* in 1893, and continued in general charge. Influenced many of the reform and social movements of the age. Among his books are *Problems of Life, The Rights of Man, The Christian Ministry,* and *Industrial Problems.*

ADDAMS, JANE (1860–1935). An American social settlement worker and a founder of the Hull House at Chicago (1889); born at Cedarville, Ill. Her work is eminently practical. Great executive ability and utter unselfishness have made her a leader of social workers in America; has written much on sociological matters. Chairman of the International Congress of Women at The Hague (1915), and at four subsequent gatherings. Author of *Democracy and Social Ethics* (1902), *Twenty Years at Hull House* (1910), *Peace and Bread in Time of War* (1922).

AKED, CHARLES FREDERIC (1864–). Clergyman, born and educated at Nottingham, England, held pastorates in England from 1886 to 1907, and in New York, San Francisco, Kansas City, and Los Angeles afterward. Noted as a lecturer and as author of religious works, among them being *Mercies New Every Morning, Old Events and Modern Meanings, The Divine Drama of Job.*

AMBROSE, SAINT (340?–397). Early church father, bishop of Milan, and defender of the faith against Arianism. In 381 he presided at a synod of bishops, and later strongly opposed the resumption of certain pagan rites in the church. He was also instrumental for a time in holding back an invasion from Gaul. As a theologian he emphasized sin and repentance, and Saint Augustine was deeply impressed by his doctrines.

ANAXAGORAS (*ăn-ăk-săg'ô-rŭs*), (c. 500–c. 428 B. C.). Greek philosopher, born in Asia, but lived in Athens about 30 years, and had as pupils Pericles, Euripides, and some believe Socrates. He sought to explain the motions of heavenly bodies, was tried for heresy but saved by Pericles, though he was exiled for the last few years of his life. He taught that all things existed from the start in the mass, but were formed by Reason, which possessed all knowledge and power.

ANSELM, SAINT (c. 1033–1109). Great religious thinker, who was born in Piedmont and lived at the abbey of Bec (1056–1103), acting as prior, later as abbot. William I. of England persuaded him to become archbishop of Canterbury in 1093, but a long struggle ensued over the question of whether the king must acknowledge Pope Urban II. as head of the church. From 1097 to 1107, Anselm lived in Italy, taking up his duties again for the last two years of his life, when Henry, William's successor, had finally given in. Among his works are *De Veritate, Proslogion,* and *Cur Deus Homo,* all of which greatly influenced later thought. He said that faith precedes reason and knowledge. His *Cur Deus Homo* attempts to explain for every man the nature of Christ and the Atonement.

ANTHONY, SAINT (c. 250–350). Earliest Christian monk, who for years secluded himself in waste places of Egypt, coming forth only to consult with those who followed his rule of life, and finally to preach against the Arians. Legends report many combats between him and the spirit of evil in various forms,—temptations of home, food, success, and honor. Certain eastern monks still look to him as their guide.

ANTHONY, SUSAN BROWNELL (1820–1906). An American reformer; born at Adams, Mass. Very active in total abstinence and anti-slavery movements. After the Civil War she devoted her work to woman suffrage; founded (1868) and published for three years *The Revolution,* a journal advocating woman's rights. Voted at an election in 1872, for which she was fined.

ANTISTHENES (*ăn-tĭs'thĕ-nēz*) (fl. fourth cent. B. C.). Pupil of Socrates and founder of the Cynic school of philosophy. Lived in great simplicity, wore only rude garments, and spoke in terms that the common man could comprehend. Reputed to have written several works, but now only a few fragments remain.

AQUINAS (*ă-kwī'năs*), **THOMAS** (1225–1274). Born of a noble Italian family, encountered the strongest opposition when he entered the order of the Dominicans. He became a public teacher at Paris until Pope Urban called him to teach philosophy in Italy. He declined an archbishopric to devote himself to study and lecturing. He was called the "Father of Moral Philosophy," and his *Summa Theologiae* is one of the first attempts at a complete theological system.

ARIUS (*ă-rī'ŭs*) (fl. 325). Ordained a bishop in 311 after he had been educated under Lucian of Antioch, Arius became a profound student of the nature of God in reference to man. He finally concluded that God exists as unique being, and that God on earth as man must be of a somewhat different nature. Arius unconsciously precipitated a controversy regarding the nature of Christ which raged for centuries. He was excommunicated in 319, though some bishops followed his ideas, and Constantine summoned a council at Nicea in 325, which pronounced against Arius, and formulated what is now called the Nicean Creed. Arius died in Alexandria, Egypt.

ARISTOTLE (*ăr'ĭs-tŏt'l*) (384–322 B. C.). Greek philosopher, scientist, and critic, born at Stagira; hence sometimes called the Stagirite. He was the son of a physician, and is said to have practiced himself on first coming to Athens (367), intending to study under Plato, who did not return from a mission to Syracuse till 364. In 342 Philip of Macedon called Aristotle to Macedon to teach his son, Alexander, then a mere youth. He returned to Athens in 335, opened a school at the Lyceum (a gymnasium building), and the followers came to be called Peripatetics, from the custom of walking back and forth while they talked. After 12 years, when Alexander died in 323, Aristotle was accused of heresy, retired to Chalcis, and died there the following season. No philosopher of ancient times, unless he be Plato, has more deeply influenced later thinking. Aristotle's writings fall into three chief groups. First, the dialogs, modeled on the style of Plato, in which several different speakers bring out opposing views of life. Many of these are now lost, but we still have the *Protrepticus,* which is a summons to one to lead a philosophic life; *De Philosophia,* a much later discussion of the nature of thinking; and *Politicus* and *Sophistes* are platonic dialogs, concerned with state and a rival sect of the Sophists. Second, we have the essays on *Monarchy,* which is a late work; the one on *Alexander, or the Colonies;* and the *Constitutions,* accounts of various forms of government. In this group also belong some chronologies and compilations. Third, *Categories,* the *Organon,* or explanations of science; *Historia Animalium* an account of the animal world; a work on *Ethics* and a second, probably due in part to later additions by his son; *Rhetoric* and a short treatise on *Poetics;* and an account of *Politics.* The world of Aristotle is one that is in progress continually; so is man in his historical development. In philosophy he emphasized the mean (called Aristotle's Golden Mean), and shunned all defects and excesses. By contemplation man lays hold of immortality. The state exists for the good life of its citizens; governments are amenable to law. People in the mass may be relied upon to elect rulers wisely. Thus, in many respects, he expressed ideas that later became germs of several systems of thought.

ARMINIUS (*ăr-mĭn'ē-ŭs*), **JACOBUS** (1560–1609). Theologian, born in South Holland, studied theology at Leiden for six years, went to Geneva in 1582, visited Italy, and in 1588 was ordained at Amsterdam. He taught theology at Leiden from 1603 to his death. In his beliefs and theories of the church, he developed opposition to Calvanism, which grew as made more formal by his followers. Personally, he was studious, mild in temper, earnest in his thinking, but not disposed to be quarrelsome.

ASBURY (*az'ber-i*), **FRANCIS** (1745–1816). First bishop of the Methodist Episcopal church to be consecrated in the United States. Born in Staffordshire, England, he completed his study in the common schools, became an apprentice in business, and studied theology at home. In 1772 he was designated by Wesley as "general assistant in America," and during the Revolution he supported the American cause. From 1784 to his death he rode about 6,000 miles each year on horseback in supervising the conferences from Maine to Georgia. When he first came to America, the church numbered a few hundreds, all in New York, Philadelphia, and similar towns; and when he died 42 years later, there were over 200,000 members and 2,000 ministers. It has been claimed that more people saw him than saw any other man of his generation, including Washington.

AUGUSTINE (*ô-gŭs'tĭn*), **SAINT** (354–430). Famous scholar and preacher; born near Carthage; a teacher in Rome and Carthage; in 396 became a priest and was made Bishop of Hippo in Africa. *Confessions* and *City of God* are his best-known books.

AURELIUS (*ā-rē'li-us*), **MARCUS.** See under RULERS AND STATESMEN.

AVERY, RACHEL FOSTER (1858–1919). An American reformer; born at Pittsburgh, Pa. Educated here and abroad, taking a special course in political economy at Zurich. Was always active in woman suffrage movements; had charge of many conventions and the Nebraska campaign; corresponding secretary of the National Suffrage Assembly for over 20 years.

BABBITT, IRVING (1865–1933). Leader of the newer Humanism in America. After giving considerable attention to both the classical and the romantic schools of thought, he decided that the influence of Rousseau and other romanticists has been deleterious and should be counteracted. Exaggeration of the personal in our recent literature also seemed injurious to social and national progress. Babbit was graduated at Harvard, studied also in Europe, taught at Williams, and in 1912 became professor of French at his alma mater.

BACON, FRANCIS (1561–1626). Besides the famous *Essays* in which Bacon tried to reduce many subjects to their lowest terms, or to give the quintessence of his ideas, he composed several works that greatly influenced science and thought. Some of these are *De Augmentis Scientiarum,* or *The Advancement of Learning,* in which he sought to "make the circuit of knowledge" and to fill in some gaps left by previous philosophers; the *Novum Organon,* in which he states that he has turned from mere thought to observation, and so he is often called "the father of modern inductive science"; *Historia Naturalis,* in which he records some results of his observations, still lacking in accuracy and not free from bias; *The New Atlantis,* the description of an island in mid-Atlantic, ruled by wise and just laws of long standing, with a minimum of actual government,—a sort of benevolent Utopia. In order to make real progress, Bacon declares (in the *Novum Organon*) man must get rid of the false notions or "Idols" of society or the "Tribe"; those of the "Cave," errors peculiar to particular men; those of the "Market place" or of democracy; and those of the "Theatre" or of all high-flown and unreal speculations, like so many "stage plays." See INDEX for mention in other sections of this book.

BACON, BENJAMIN WISNER (1860–1932). American theologian, educated at Yale, and became a clergyman in 1884, holding pastorates successively at Old Lyme, Connecticut, and Oswego, New York, until he became an instructor at Yale in 1896, and professor the following year. He directed the American School of Archaeology at Jerusalem (1905–06), and acted as Earl lecturer at the University of California (1911 and 1924). Known as a fruitful scholar, he wrote many books, some of which are *The Genesis of Genesis, The Sermon on the Mount, The Story of St. Paul, The Fourth Gospel in Research and Debate, Christianity Old and New, The Teaching Ministry for Tomorrow.*

BAIN (*bēn*), **ALEXANDER** (1818–1903). Scotch philosopher, educated at Marischal College, Aberdeen, and professor of logic and English in the University of the same city (1860–80). He did much to put the study of grammar on a logical and philosophical basis, but is now probably best known for his *Logic;* later he contributed many valuable articles to the periodical called *Mind.* For most of his life he was a close friend and co-worker of John Stuart Mill. At present Bain is also known as the leader in the new Scotch school of psychology, which he carefully distinguished from metaphysics and based largely on a scientific study of the brain and emotions of man.

BAKER, PURLEY ALBERT (1858–1924). An American clergyman and temperance leader, born in Ohio, and a Methodist pastor for a number of years, from 1884. Beginning as manager of the Anti-Saloon League in Cleveland (1896), he became state superintendent (1897–1903), and national superintendent till his death. Advocating conservative and educational methods, he did much to command respect among all those opposed to the open saloon in America.

BARCLAY, ROBERT (1648–1690). Member of the new sect of Quakers in England, which he ably defended in his *Apology for the True Christian Divinity held by Quakers* (1678). He was born in Scotland, educated in Paris, and in late life is said to have known James II. well. A friend of William Penn, he traveled with him on the Continent, and acted as nominal governor of East New Jersey, given to Penn by royal patent.

BARING-GOULD (*bār'in-gūld'*), **SABINE.** See under AUTHORS.

BARNES (*bärnz*), **HARRY ELMER** (1889–). American sociologist, a graduate of Syracuse and Columbia Universities, teacher at Clark University, New School for Social Research, and professor at Smith College, from 1923. Wrote much on penology, history, and sociology, including *Sociology before Comte, The Social History of the Western World, Progress in American Penology, The Repression of Crime,* and *Sociology and Political Theory.*

BARROWS, JOHN HENRY (1847–1902). Clergyman; successive pastorates in Lawrence and East Boston, Mass., and First Presbyterian Church of Chicago (1881); Christian lecturer in India in 1896 for Chicago University; organizer and president of the World's Parliament of Religions at Chicago (1893); lecturer throughout Indian Empire (1896–1897); president of Oberlin College (1898–1902). He wrote *I Believe in God* and *History of the World's Parliament of Religions.*

BARTON, CLARA (1821–1912). For many years president of the American Red Cross Society. Was born in Massachusetts. She founded a school at Bordentown, N. J., entered the government service in the war department in 1854, and at the outbreak of the Civil War resigned to devote her attention to humanitarian service at the front. She was honored by Lincoln, and after the war marked the graves of some 12,000 Union soldiers who were buried in the South. In the Franco-Prussian War of 1870 she engaged in social service, was decorated by several governments, and in 1881 became president of the American Red Cross, a position she held till 1904. Largely by her suggestions the scope of the Society was changed to include relief work in times of distress other than war, including her services at the time of the Johnstown, Pa., flood, Russian famines, Armenian disasters, and the Galveston flood.

BAXTER, RICHARD (1615–1691). English Non-Conformist divine; educated privately; always strongly religious; became a teacher, then a clergyman. During the Civil War he joined with the Puritans, participating in several sieges. His first and most famous book, *The Saint's Everlasting Rest* (1650), was followed by *Call to the Unconverted,* and then by *Paraphrase of the New Testament,* which book caused his imprisonment for 18 months. Other publications, aggregating 160, appeared while he continued preaching.

BEECHER, HENRY WARD (1813–1887). Protestant pulpit orator; (1837–1847) pastor of Presbyterian churches in Indiana; (1847–1887) pastor of Plymouth Church, Brooklyn, a new Congregational organization, where his fame became world-wide. His speeches delivered in England in 1863 changed English public opinion in favor of the North. Besides influential papers contributed to various religious periodicals, Beecher wrote a number of books, some of which are *Star Papers* (two series), *American Rebellion,* an account of his experiences in England, and *Yale Lectures on Preaching.*

BEECHER, LYMAN (1775–1863). American theologian. Became famous through a sermon on dueling after the killing of Alexander Hamilton by Aaron Burr (1804); pastor of Litchfield, Conn. (1810–1826), of Hanover Street Church, Boston (1826–1832); president of Lane Theological Semi-

nary (1832–1852); tried by his presbytery for teaching false doctrines and acquitted; sided with the New School when the Presbyterian Church divided (1838). Several of his children became famous: Henry Ward, noted just above; Harriet, wife of Professor Stowe and author of *Uncle Tom's Cabin;* Catherine Esther, who wrote much on education, and against woman's suffrage; Edward, celebrated clergyman and college president; Charles, clergyman and musician; and Thomas, who was long a pastor in Elmira, New York.

BELLAMY (*bĕl'ă-mĭ*), **EDWARD** (1850–1898). American author, socialist, and journalist; best known work is *Looking Backward or 2000–1887;* a strong socialistic force which led to the formation of Bellamy clubs and of the National Party; *Equality,* a sequel to the first, is on similar lines; other works include sociological essays and short stories.

BENEDICT XV. (Giacomo Della Chiesa) (1854–1922). Born at Pegli, Italy; ordained priest (1878); secretary to Cardinal Rampolla (1887); adviser to the Holy Office and archbishop of Bologna (1907); made cardinal in May and elected Pope in September (1914).

BERNARD OF CLAIRVAUX, SAINT. See under AUTHORS.

BENTHAM, JEREMY (1748–1832). English economist and natural philosopher, who was educated at Westminster and Oxford, was admitted to the bar, but practised little, and became an antagonist of the system of Blackstone. After living on the continent for a time, he returned, failed to gain recognition in politics, and turned to discourses on economy and statecraft. His *Defensé of Usury* asserts that rates of interest should not be limited artificially, a let-alone theory which he extended to other topics. His *Introduction to Principles of Morals and Legislation* (1789) insisted that legislation should be for "the greatest good of the greatest number." Laws should be judged by their real utility.

BERGSON (*bĕrg'sôn'*), **HENRI** (1859–1941). French philosopher, was educated in Paris, taught school, and then took the doctorate in letters in 1889. In 1900 he became a professor at the College of France; in 1913 he came to America and lectured at Columbia University, New York; and in the same year was elected president of the English Society of Psychical Research, to which he gave considerable attention. Some of his books are *Time and Free Will, Matter and Memory,* and the *Creative Evolution,* upon which his fame securely rests. He also wrote *The Meaning of War.*

BERKELEY (*bûrk'lĭ*), **GEORGE** (1685–1753). Irish philosopher and divine, noted for his doctrine of idealism or conception that nothing can exist apart from mind. Objective and subjective, therefore, are the same; or everything is the manifestation of divine intelligence, which guides and arranges things into objective forms and classes. He became a student and finally a fellow of Trinity College, Dublin; published a celebrated theory of vision (1709), in which he applied his doctrine of the idea; and held various offices in the church, being dean of Derry and in 1734 bishop of Cloyne. Among several practical schemes was one to found a college in the Bermudas. He lived for three years in Rhode Island, while waiting for funds and a royal patent from England, which never came. *Alciphron, or the Minute Philosopher,* issued after his return (1833) to England, sets forth his doctrines in great detail. Other works are his *Commonplace Book,* published in 1871, and the *Three Dialogues,* all of which explain the new doctrines. His influence, even in recent decades, his been tremendous.

BESANT (*bĕz'ănt*), **ANNIE** (1847–1933). An English writer and lecturer on Free Thought; born in London. Was associated with Bradlaugh as lecturer and editor of *The National Reformer.* Carried on work among the poor; associated with Madame Blavatsky, whom she succeeded. Her writings on sociological subjects are very numerous.

BIDDLE, JOHN (1615–1662). Father of the modern Unitarianism; was repeatedly imprisoned for his anti-Trinitarian views. To save his life, Cromwell banished him to one of the Scilly isles in 1655. Here he remained three years, until the Protector liberated him in 1658. He then continued to preach his opinions till the death of Cromwell, and also after the Restoration, when he was committed to jail in 1662, and died a few months after.

BLACK HUGH (1868–). Clergyman and professor of practical theology in Union Seminary, New York, from 1906. He was born in Scotland, studied at the University of Glasgow, and held various pastorates from 1891 to 1906. Lectured and preached to large audiences. Some of his discourses are *Friendship, Culture and Restraint, Edinburgh Sermons, Happiness,* and *According to my Gospel.*

BLACKWELL, ELIZABETH. See under SCIENTISTS.

BLAIR, HUGH (1718–1800). Scotch Presbyterian divine, educated at the University of Edinburgh, where he held the first appointment to the chair of rhetoric and belles-lettres. For many years his *Lectures on Rhetoric* were regarded as the last word in the theory of writing. Some of his sermons were translated into many languages; Dr. Samuel Johnson praised them highly.

BLAVATSKY, (*blä-văts'kĭ*), **HELENA PETROVNA** (1831–1891). Founder of the Theosophical Society (1875), and leader in the movement for the study of spiritism, human brotherhood, and comparative religions. She was born of a noble German family then living in Russia, lived there for part of her life, but spent years traveling in various parts of the world. Many prominent persons became interested in phenomena she seemed to produce without the medium of spirits or "spooks" as called then, though no end of controversy was aroused. Her *Isis Unveiled* contains unique theories of man and society. With Col. H. S. Olcott, and William Q. Judge with whom she had collaborated in New York, she went to India in 1879 and reëstablished the Theosophical Society.

BOETHIUS (*bō-ē'thē-ŭs*). See under AUTHORS.

BONAR (*bŏn'ăr*), **HORATIUS** (1808–1889). Scotch Presbyterian minister, who held appointment at Kelso, turned to the Free Church (1843), and after 1866 preached in Edinburgh. He acted as moderator of his denomination in 1883. Bonar is now recalled chiefly in his hymns, several of which are now found in Protestant hymnals.

BONAVENTURA (*bō-nä-vĕn-tōō'rä*), **SAINT** (1221–1274). Franciscan, who was born in Tuscany, educated in Paris, where he lectured for some years, and made a doctor of divinity in 1257. Having declined election to the see of York, England, he was made a cardinal and bishop of Albano in 1273 by Gregory X. He died while attending the Council at Lyons. Somewhat of a Platonist himself, he followed the tenets of the Franciscans in regard to the nature of matter, of man, and of knowledge.

BOOTH, MAUD BALLINGTON (1865–). With her husband, Ballington Booth (1859–), founder of the Volunteers of America (1896). She was associated in England with the Salvation Army (1887–96), which was founded by General William Booth. Her special field was prison work in the United States, concerning which she wrote extensively, some of her works being *Branded, Look up and Hope,* and *After Prison—What?*

BOOTH, (*bōōth*), **WILLIAM** (1829–1912). Founder of the Salvation Army; born in Nottinghamshire, England. Associated with the Methodist body; started the "Christian Mission" in London, from which the Salvation Army originated in 1878. The success of the movement is largely due to Booth's skill as an organizer and executive. Wrote *Darkest England* in 1890.

BOOTH (*bōōth*), **WILLIAM BRAMWELL** (1856–1929). Son and successor of General William Booth, noted just above. Entering the Salvation Army in 1874, he became chief organizer six years later, and head on the death of his father in 1912. His campaign against the traffic in women led to important legislation in England, especially the Criminal Law Amendment bearing on the subject in 1885. On the ground of illness, he was officially retired and was superseded in 1929 by Edward John Higgins, chief of staff.

BOSSUET (*bō'suā*), **JACQUES BENIGNE** (1627–1704). French prelate and controversialist, and considered the greatest of Christian orators; first attempted philosophical treatment of history. His orations at the funerals of the duchess of Orleans and the great Condé are masterpieces.

BOURDALOUE (*bōr'dälō*), **LOUIS** (1632–1704). A Jesuit and one of the greatest preachers France ever produced. The extreme popularity of his sermons induced his superiors to call him to Paris, and he became the favorite preacher of Louis XIV.

BOURNE (*bōrn*), **HUGH** (1772–1852). Founder of the Primitive Methodist Church (1811). For a time he was a carpenter in Staffordshire, England, and did much preaching in the Wesleyan Methodist Church, from which he was expelled in 1808 for disobeying injunctions. Being a popular outdoor speaker, he gained a large following—100,000 before his death.

BOURNE (*bōrn*), **FRANCIS** (1861–1935). English cardinal, who was ordained in 1884, became a monsignor eleven years later, assistant bishop of Southwark in 1896, bishop the following year, archbishop in 1903, succeeding Cardinal Bourne, and cardinal in 1911. Taking a middle ground, he favored establishment of churches wherever needed, education by the government or in schools already established, and a hostile attitude toward Modernism.

BOWNE, (*bōun*), **BORDEN PARKER** (1847–1910). American philosopher, who was born in New York, educated at New York University, and studied in Germany. After acting as religious editor of *The Independent* (1875–76), he was professor of philosophy at Boston University till his death. For many years he was considered one of the greatest thinkers, especially on religious questions and his *Immanence of God* (1905) created an immense interest.

BRACE (*brēs*), **CHARLES LORING** (1826–1890). An American social worker, largely instrumental in founding the Children's Aid Society for the relief of the poor of New York and other cities (1853). Workshops, industrial schools, homes, and other agencies were fostered. He was a graduate of Yale and of the Union Theological Seminary.

BRENT, CHARLES HENRY (1862–1929). Protestant Episcopalian clergyman, bishop, and humanitarian, who was educated in Toronto, received many degrees from universities of two continents, and served in Boston and Buffalo, until elected Bishop of the Philippines in 1901. After being elected bishop of Washington (twice) and of New Jersey, he became bishop of Western New York in 1918. Being recognized as an authority on the opium traffic, Bishop Brent served on several commissions, including the International Opium Conference, 1908–9; the Opium Conference at The Hague, 1911, being president of the Conference in 1911–12, and adviser to the League of Nations in regard to control of narcotics in 1923. He was one of the chiefs of the chaplain service in France in 1918–19, received decorations, and invitations to lecture before colleges and universities. Among Bishop Brent's books are *With God in the World, Liberty and Other Sermons, Leadership, The Sixth Sense, The Mount of Vision.*

BRIDGET (*brij'et*), **SAINT** (453–523). An Irish saint; born at Dundalk; takes rank in Ireland with St. Patrick and St. Columba. Also the name of a Swedish saint in the fourteenth century; founded a new order and 72 monasteries of the order.

BRIGGS (*brigz*), **CHARLES AUGUSTUS** (1841–1913). American theologian, educated at the University of Virginia, Union Theological Seminary in New York, and the University of Berlin. While a professor at the Union Seminary in 1892, he was tried for heresy by the New York Presbytery, acquitted, but convicted on appeal to the next General Assembly. In 1900 he was ordained a priest in the Protestant Episcopal Church. Some of his books are *Biblical Study, The Bible, The Church and Reason, Church Unity,* and *Fundamentals of Christian Faith.*

BROOKE (*bruk*), **STOPFORD A.** See under AUTHORS.

BROOKS (*bruks*), **PHILLIPS** (1835–1893). Bishop of the Protestant Episcopal Church. Rector of Church of the Advent (1862), and Holy Trinity Church, Philadelphia, till 1869, when he became rector of Trinity Church, Boston; bishop of Massachusetts (1891–1893); published *Lectures on Preaching, The Influence of Jesus,* and several volumes of sermons.

BROWN, JOHN (1800–1859). American abolitionist, who was born in Connecticut, worked at various occupations in Ohio, and in 1849 settled as a farmer at North Elba, New York. After five of his sons moved to Kansas in 1854 he followed and engaged actively in the border warfare incident to the struggle to make the newer territory free from slavery. Having collected some money from eastern friends a year or two before, he formed a plan in 1859 of taking the arsenal at Harper's Ferry, West Virginia, and with the stores there started an insurrection among negroes, whom he sought to help to escape to the north and to Canada. Previously he had set up a form of government among his 22 followers. In the skirmish, following the successful raid, Brown was wounded and captured, and only five of his crew escaped. Two of his own sons were killed. Brown and seven of his companions were tried and executed in December, 1859. He is buried at North Elba, New York. Though his bold but futile plan aroused the entire country, the Harper's Ferry incident had little real effect on immediate events. Brown honestly believed that he was called of God to put down a national crime by force of arms.

BRUNO (*brū'no*), **SAINT** (1030–1101). Born at Cologne; retired to a lonely spot near Grenoble, with 14 others, where they lived in cells apart, and met only on Sundays; founder of the Carthusian Order of Monks, the first house of which was established in the solitude of Chartreuse.

BRUNO (*brū'no*), **GIORDANO** (c. 1548–1600). Italian philosopher and skeptic, forced to leave Italy because of heretical views after having been for a number of years a Dominican. He wandered about Europe, inquiring into every system of thought, until at last he was caught by the Inquisition at Rome and burned "mercifully" at the stake. Of his many treatises, the *Speccio* gives his highly moral views, but opposed the faith of the church. Bruno's philosophy is a modified pantheism.

BUCKLEY, (*buk'li*), **JAMES MONROE** (1836–1920). This editor, parliamentarian, and church historian, was educated at Wesleyan University, and for a number of years, after taking a course in theology, held pastorates in New Hampshire, Michigan, and New York. During his editorship of the New York *Christian Advocate,* 1880–1912, he was recognized as a powerful influence in the Methodist Episcopal Church. As a parliamentarian he was widely recognized for many years. His best known works probably are *Christian Science and Kindred Phenomena, History of Methodism in the United States, Extemporaneous Oratory for Professional and Amateur Speakers.*

BUDDHA (*bud'a*) (d. c. 485 B. C.). Little is known of the founder of the Buddhist religion. Tradition makes him a member of the tribe of Gautama, the son of a king among the warrior casts in the Himalayas. At the age of about 30 he set forth on his wanderings, and six years later was enlightened as he sat under a bo-tree. He founded a school of monks, and for the rest of his life went about preaching. Early teachings seem to indicate a middle way between two extremes, and the attainment of perfection and Nirvana (freedom from feeling and pain). They mention four great truths: Those of pain, craving for a higher state, freedom from pain, and the means of arriving at perfection.

BURDETT-COUTTS (*cŏŏtz*), **ANGELA GEORGINA, BARONESS** (1814–1906). English philanthropist, who inherited the vast fortune of her grandfather Thomas Coutts, added the Burdett to her name, and managed her extensive gifts with great business skill. In 1837 she took up her residence in Piccadilly, in 1871 was created a baroness, and the following year was the first woman to be presented with the freedom of London at the Guildhall. In 1881 she married an American by birth, W. H. Ashmead-Bartlett, who took her name and greatly assisted her in her philanthropies. She built churches, founded many societies to benefit the poor, endowed St. Stephen's Institute, encouraged emigration to the colonies, helped the Irish peasantry, did much to protect children, assisted Florence Nightingale in her work of war relief, and started many trade schools. For many years she was one of the best loved and most distinguished persons in the British Empire.

BURRITT (*bur'it*), **ELIHU** (1810–1879). Organizer of peace societies, especially the Brussels Congress (1848), which was followed by similar yearly gatherings in various cities of Europe. Much of his life he lived in New Britain, Connecticut, acting as a blacksmith for years, but before he was thirty he could read fairly well in over forty languages, including the Greek and Latin classics, and those of modern Europe.

BURTON, ERNEST DeWITT. See under EDUCATORS.

BUTLER, JOSEPH (1692–1752). An eminent English divine; became preacher at the Rolls, where he delivered his celebrated *Sermons;* made dean of St. Paul's and finally bishop of Durham; his great work was *The Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature.*

CADMAN, SAMUEL PARKES (1864–1936). American clergyman and lecturer, who was born and

educated in England, but emigrated to America in 1890. Pastor of the Metropolitan Temple, New York (1895–1901), and of the Central Congregational Church Brooklyn, after 1901. Lectured and wrote extensively. In 1924 he was elected president of the Federal Council of the Churches of Christ in America, for which he frequently acted as Sunday afternoon radio preacher. Some of his books are *The Religious Uses of Memory, The Three Religious Leaders of Oxford, Christianity and the State,* and *Imagination and Religion.*

CALVIN, JOHN (1509–1564). An eminent reformer of the sixteenth century; for his attempts at reforming theology was compelled to flee from France (1533); settled in Basle where he wrote the *Institutes of the Christian Religion;* went to Geneva (1536) and worked for the Reformation. His religious works fill 59 volumes, published in Berlin (1863–1900). He established the Presbyterian form of church government; the fundamental principle of his theology is that of predestination to eternal happiness or misery by the absolute decree of God.

CALL, ARTHUR DERRIN (1869–). Secretary of the American Peace Society, who was born at Fabius, New York, educated at Cortland Normal School, Brown and Yale Universities, acted as a superintendent of schools until he became connected with the American Peace Society in 1912. Served on several international committees for promotion of peace. Author of *Our Country and World Peace* and various pamphlets on conciliation.

CAMPBELL (*kam'el*), **ALEXANDER** (1788–1866). Founder of the denomination called Disciples of Christ or the Christian Church, sometimes designated as Campbellites. He was born in Ireland, studied for a year at Glasgow University, settled in 1809 with his father at Washington, Pennsylvania, and three years later established his sect on the principle of going back to primitive Christianity and unity of all Christians without special distinctions. He edited the *Christian Baptist* for many years, founded Bethany College, West Virginia, in 1841, and acted as president till his death.

CANNON, JAMES, JR. (1864–). Bishop of the Methodist Episcopal Church South and leader in reform movements. He was educated at Randolph-Macon College and Princeton University, entered the ministry in 1888, and served as president of Blackstone College (1894–1918), and also as editor of the *Christian Advocate* of his church (1904–18), when he was made a bishop. Engaged in varied temperance activities. Acted as chairman, national legislative committee, Anti-Saloon League, and of the executive committee of the World League against Alcoholism.

CARMAN, ALBERT (1833–1917). Bishop of the Methodist Church in Canada, educated at Victoria University, Cobourg, acted as principal and then chancellor of this institution (1858–68–74), and then bishop until 1883, when the title was changed to general superintendent. Bishop Carman for years was a leader in religious and civic life of the Dominion.

CATHERINE, SAINT (1347–1380). Dominican nun of Siena, Italy, who early in life saw many visions, dedicated herself to the church, and for a time lived as an anchorite. In 1376 she persuaded Pope Gregory XI. to return from Avignon to Genoa, and then to Rome, where he died in 1378. She was able to prevent renewal of the schism in the papacy. Canonized by Pius II. in 1461.

CATT, CARRIE CHAPMAN (1859–). After acting as principal of the high school at Mason City, Iowa, she married Leo Chapman (d. 1886), and then George W. Catt (d. 1905). For many years she lectured in many states in favor of woman suffrage, president of the National Suffrage Association, 1900–03, and after 1916, and also president since 1904 of International Woman Suffrage Alliance.

CAVALIER (*ka-va-lyē'*), **JEAN** (1679–1740). Leader of the Camisards; born at Ribaute; fought for religious freedom against Louis XIV.; passed over to England; served against France, and was governor of Jersey.

CAVELL (*kav'l*), **EDITH LOUISA** (1865–1915). Born in Norfolk, England, she became a nurse and was appointed first matron of the Berkendael Medical Institute, Belgium (1907), and in 1914 and 1915 helped many wounded soldiers reach England from the front. She was arrested, convicted of being a spy, and in spite of attempts by Belgian and English friends, and by the American ambassador to Belgium, she was shot by the Germans October 12, 1915. In 1919 a memorial service was held at Westminster Abbey, and she was interred in Norwich Cathedral.

CHALMERS (*chal'marz*), **THOMAS** (1780–1847). First moderator of the Free Church of Scotland, which was organized in 1843 by 470 seceding clergymen; also first principal of the Free Church College. After preaching for some years in Fifeshire, he went to Glasgow, and soon became known far and wide as an eloquent preacher. In 1823 he became professor of moral philosophy at St. Andrews, and five years later went to the chair of theology at Edinburgh.

CHANNING (*chan'in*), **WILLIAM ELLERY** (1780–1842). American religious leader, long considered "the apostle of Unitarianism," but he himself objected to the name Unitarian as being too formal. His chief opposition was more to Calvinism, as then preached in New England, than to the doctrine of the Trinity. Channing was born in Rhode Island, educated at Harvard, taught for a time, and became a minister in Boston in 1803. One of his sermons against war led to the formation of the Massachusetts Peace Society, and his book, *Slavery,* written after a visit to the West Indies (1835) attracted wide attention. Always interested in all public questions, he issued several pamphlets that gained wide currency. Greatly beloved by his friends.

CHAPMAN, J. WILBUR (1859–1918). American religious leader, a graduate of Lake Forest University (1879). For many years he was a pastor in Ohio, Indiana, and New York, making evangelistic tours with D. L. Moody in intervals. For ten years he acted as corresponding secretary of the Presbyterian General Assembly committee on evangelism. After 1910 he made tours to many nations.

CHEMNITZ (*kem'nits*), **MARTIN** (1522–1586). German Protestant theologian; by inducing the Saxon and Swabian churches to adopt the *Concordien formel* as their confession of faith, he consolidated Luther's work.

CHERRINGTON, ERNEST HURST (1877–). Temperance reformer, who was born in Ohio, educated at Ohio Wesleyan, and held several offices in state and national Anti-Saloon League. Edited various publications, including *The American Issue, The American Patriot,* and other periodicals. Delegate to various international congresses on alcoholism. Author of *History of the Anti-Saloon League, The Evolution of Prohibition in America,* and *America and the World Liquor Problem.*

CHEYNE (*shā'nē*), **THOMAS KELLY** (1841–1915). Biblical scholar of England, who did much to introduce new methods of research and interpretation of the Scriptures. He was educated at Oxford and in Germany, took orders in 1864, and held various ecclesiastical offices, including the Oriel professorship of interpretation of Scripture at Oxford. Assisted in revising the Old Testament. Some of his works were *The Prophecies of Isaiah, Jewish Life After the Exile,* and *The Reconciliation of Races and Religions.*

CHOWN, SAMUEL DWIGHT (1853–). Canadian bishop of the Methodist Church. Ordained in 1879, he held pastorates in Montreal and Toronto, acted as financial secretary of the Brockville District (1888–89) and of the Perth District (1891–1902), was chairman of the Toronto Western District (1897–99), and of the Central Toronto District (1900–02). From 1902 to his election as a bishop in 1910, he was secretary of Temperance in the Methodist Church of Canada.

CHRYSOSTOM, JOHN, SAINT ("GOLDEN MOUTHED") (344?–407). A celebrated Greek father of the church; his works consist of *Homilies, Commentaries, Epistles, Treatises,* and *Liturgies.* The *Homilies* are considered to be finer than any other similar early Christian writings.

CLARK, (*klärk*), **FRANCIS EDWARD** (1851–1927). Founder and from 1887 to his death president of the United Society of Christian Endeavor. Born in Quebec of American parentage, and took the name of an uncle when his own father, Charles C. Symmes, died in 1859. He was graduated at Dartmouth College and Andover Seminary, became a pastor in Portland, Maine, where he founded a local young people's society in 1881, and then in Boston. For many years he was chief editor of the *Christian Endeavor World* and wrote several books, of which those best known now are *The Continent of Opportunity, Christ and the Young People,* and *The Gospel of Out-of-Doors.*

CLARKE (*klärk*), **ADAM** (1762–1832). British Wesleyan clergyman and three times (1806, 1814,

1822) president of the conference. The British Bible Society employed him to make an Arabic Bible, and he wrote a great *Commentary on the Holy Scriptures*, which was long a standard work. Besides being also a popular preacher, he edited many works, including a *Bibliographical Dictionary* and *Memories of the Wesley Family*.

CLEMENT (*klem'ent*) **OF ALEXANDRIA** (c. 150–c. 215). Little is known of his early life except that he was born of pagan parents in Athens, knew Greek philosophy and literature thoroughly, and in middle life became a Christian. Origen was his pupil, and Jerome called him "most learned of men." For some years he acted as presbyter, and later teacher, in Alexandria, where trace of him is lost. Of a number of treatises, four have come down to us: *An Address to the Greeks*, which attacks their ideas of the gods; *Miscellanies*, in which occurs a very early hymn, *Shepherd of Tender Youth*, and many notes on contemporary events and ideas; *The Tutor*, a discussion of teaching; and a discussion of riches.

CLOPPER, EDWARD NICHOLAS (1879–). Social worker among children, born and educated in Cincinnati and Bethany College, West Virginia. For several years taught in Porto Rico (1901–08), was Ohio Valley Secretary of Child Labor Committee (1908–12), field secretary of National Child Labor Committee (1913–21), and then engaged in various similar activities. Directed child labor surveys in many states, prepared official reports and legislation, and wrote extensively on child welfare. Author of *Rural Child Welfare*, *Child Labor in City Streets*, and *Course of Study for Graded Schools in Porto Rico*.

CODY, HENRY JOHN (1868–). Canadian clergyman of the Church of England; educated at University of Toronto and Wycliffe College, and elected rector of St. Paul's Church, Toronto (1899). He served on many important boards and commisssions, was archdeacon of York (1909–19), minister of education, Ontario (1918–19), and member of provincial parliament (1918–20). Declined election as bishop of Nova Scotia (1904), and Archbishop of Melbourne, Australia (1921). Preached sermon in English (1926) at Seventh Assembly of League of Nations at Geneva.

COFFIN, HENRY SLOANE (1877–). Religious leader, preacher, and president of Union Theological Seminary, New York. He was graduated from Yale and from Union Seminary, held pastorates in New York from 1900 to 1926, also acting as associate professor at Union (1904–26), when he became president of this institution. Author of *Social Aspects of the Cross*, *Christian Convictions*, *A More Christian Industrial Order*, and other works on religious and social questions.

COLET (*kŏl'ĕt*), **JOHN** (1457?–1510). English biblical scholar who greatly influenced the study of theology. He was educated at Oxford, studied in Paris, where he became friendly with Erasmus, whom he later greatly influenced, and held various ecclesiastical preferments, ending in the deanship of St. Paul's (1505). Though not a ripe scholar, he greatly influenced reform of the period, especially in regard to church policies.

COLLYER (*kel'yar*), **ROBERT** (1823–1912). Unitarian clergyman of English birth; a blacksmith who became a Methodist preacher, changing to Unitarianism in 1859; founded Unity Church, Chicago (1860); from 1879 to his death pastor of Church of Messiah, New York City. Author of *Nature and Life*, *The Simple Truth*, *Talks to Young Men*, and *Things New and Old*.

COLUMBA (*kō-lum'ba*), **SAINT** (521–597). A native of Ireland. About 563 he landed in the island of Hy, now called Iona, and founded his church; traversed the whole of northern Scotland, preaching the Christian faith and founding monasteries. The Columban Church was in some points of doctrine and ceremonial opposed to that of Rome, to which it owed no allegiance. He died in Iona.

COMSTOCK, ANTHONY (1844–1915). Organizer of the New York Society for the Suppression of Vice (1873), he continued an energetic campaign against all forms of immoral books, pictures, and practices, securing several federal laws to support this work. He was born in Connecticut, served in the Civil War, and was connected with New York Christian Associations before 1873.

COMTE (*kônt*), **AUGUSTE** (1798–1857). Celebrated positivist philosopher, who was educated imperfectly at the Polytechnic School of Paris, tried to teach mathematics, but had a hard time making a living. In youth he was deeply influenced by Benjamin Franklin and Saint Simon, with whom he quarreled and separated as a friend in 1824. After lecturing some, he issued the first of his six volumes of the *Positive Philosophy*. Late in life he formed a friendship with J. S. Mill, and spent some years in devising the rituals of what he called the "Religion of Humanity." He completed his first series of volumes in 1842, and between 1851 and 1854 issued four of the *Positive Polity*.

CONFUCIUS (*kŏn-fū'shĭ-ŭs*) (c. 550–478 B. C.). Great teacher of China, born in the state of Lu, and largely self-educated. He acted as keeper of stores and then superintendent of parks of the head of the Ki clan, set up a school, frequented by many followers, and moved this to a neighboring state, when the ruler of Lu was driven out by his subjects. Here he taught for a number of years, rose to hold influential office for a time, and in his fifty-sixth year went forth to wander among various states and cities of China. After thirteen years he returned to his native Lu. Though greatly admired by his friends, pupils, and several rulers during his life, his fame in death grew to inordinate bounds. His wise sayings are treasured to this day.

CONWELL, RUSSELL HERMAN (1842–1925). Beginning as a lawyer and newspaper man in Minneapolis, Boston, and abroad, Conwell became a Baptist clergyman in 1879, was pastor of Grace Church, Philadelphia (1881–91), founded Temple University (1888), and acted as president till his death. He is best known for his lectures, heard by thousands in all parts of the United States, his *Acres of Diamonds* having been delivered, it is claimed, more than any other lecture on this continent. Among his books are *Women and the Law*, *Lives of the Presidents*, and *The New Day*.

COOPER, ANTHONY ASHLEY. See under SHAFTESBURY.

COOPER, PETER (1791–1888). A manufacturer and philanthropist; born in New York City; apprenticed to a carriage maker; engaged in furniture manufacture; mover in laying the Atlantic cable; took great interest in education; founded Cooper Union.

CORNELL, EZRA. See under CAPTAINS OF INDUSTRY.

CRANMER, THOMAS (1489–1556). Archbishop of Canterbury and leader in the Reformation of England. He was educated at Cambridge, where he taught theology for several years. For Henry VIII. he prepared a pamphlet supporting the divorce from Catherine and later that from Anne Boleyn. In 1530 he went abroad on a mission to Germany and the pope, who bestowed honors on him, and in 1533 Cranmer became archbishop. In 1545 he published the *Litany*, which is quite similar to the form used today, in 1548 the *Catechism*, and two years later his great argument against transubstantiation. When Mary came to the throne, he was deposed, recanted at first, but later asserted his old faith, and went cheerfully to the stake.

CROCE (*krō'chā*), **BENEDETTO** (1866–). Italian philosopher, educated in Naples and Rome, and early turned his attention to history and local antiquities. Beginning with a philosophical essay in 1893, he developed his system of thinking to include by 1926 about a score of volumes. He also reviewed the significant literature of Italy for several decades. Though often compared with Hegel, Croce devoted his thought more often to concrete, every-day interpretation of the life of man around him. In his theory of esthetics he developed interesting and picturesque doctrines.

CROSBY, FANNY. See under AUTHORS.

CROSBY, HOWARD (1826–1891). American clergyman and scholar. In 1863 pastor of the Fourth Avenue Presbyterian Church in New York City; in 1877 a delegate to the first Presbyterian General Council, in Edinburgh; one of the founders and president of the Society for the Prevention of Crime.

CUYLER (*kaĭ'lar*), **THEODORE LEDYARD** (1822–1909). American Presbyterian clergyman, after active pastoral work (1848–1890), became minister at large. Active in temperance and philanthropic work; published about 4,000 articles in religious periodicals.

DAMIEN (*dā'myăn*), **FATHER (JOSEPH DE VEUSTER)** (1840–1889). Missionary to the lepers of the colony of Molokai Island of the Sandwich group. He was born in Belgium, went to Honolulu, where he was soon ordained a priest (1864). Realizing the distressing condition of the government colony, he secured permission to live among the lepers, affording

not only spiritual consolation, but assisting in many improvements in their manner of life. He was later joined by other resident priests. Having contracted the disease, he died in 1889. Robert Louis Stevenson wrote an eloquent tribute to Father Damien.

DAVIDSON, RANDALL THOMAS, first BARON (1848–1930). Archbishop of Canterbury (1903–28), and leader in religious and moral teaching for many years. He was progressive, enlightened, and zealous. Known as an advocate of the League of Nations, and preacher at the opening of the third Assembly (1922), opponent of religious persecution in Africa and Russia, and advocate of closer coöperation among all religious groups. As president of the Church Assembly (1920–28), he favored many progressive movements, and much legislation was enacted. In 1920 he also presided over the Lambeth Conference, which was attended by 252 out of 368 Anglican bishops of the world. Yet the chief measure, the revision of the Prayer Book, was twice rejected by the House of Commons. Davidson, therefore, felt that it would be wise to resign his office in 1928, after he had served more than 25 years. At this time he was created a baron.

DAVIS, JEROME (1891–). American sociologist, professor of practical philanthropy at Yale from 1924; born of American parents in Japan. For a number of years he taught, acted as secretary to Dr. Wilfred Grenfell in Labrador, engaged in Russian war work (1917–19), and taught one year at Dartmouth. He investigated conditions in Russia, in the coal fields of West Virginia, and elsewhere. Wrote *The Russian Immigrant, Christian Fellowship among the Nations,* and *Christianity and Social Adventuring.*

DEMING, HORACE EDWARD (1850–). Civic reformer and lawyer, admitted to the New York bar in 1877, and afterwards practiced in New York City. Engaged in ballot and civil service reforms of New York, on committee to suggest a new charter for Greater New York, and later (1901) on the citizens' committee of 250 to secure revisions in the charter.

DEMOCRITUS (*dĕ-mŏk'rĭ-tŭs*) (b. c. 460 B. C.). Greek philosopher, credited with the first clear statement of the Atomic Theory of creation. He was the son of a very wealthy father, but spent his patrimony in travel in Asia, Africa, and Europe, having lived in Egypt for seven years. Of his numerous works, only a few fragments remain. He taught that, although nothing can come out of nothing, there are different beings in the world. He believed that everything can be explained mechanically, but not according to chance. The soul is composed of atoms; life is sustained by breathing in new atoms, and expelling the dead ones. In ethics he believed the greatest good to be freedom from pain, and a maximum of noble pleasure.

DEVINE (*dē-vĭn'*), **EDWARD** (1867–). Social worker and member of various social and industrial agencies; professor of social economy, Columbia University (1905–19). He edited the *Survey* (1912–21), was a member of the United States Coal Commission (1922–23), acted as special agent for Red Cross relief, and in 1926 became professor and dean, Graduate School, American University, Washington, D. C. Some of his many books are *The Practice of Charity, Misery and Its Causes, The Spirit of Social Work,* and *The Disabled Soldiers and Sailors.*

DEWEY, JOHN (1859–). American philosopher and reformer in education, a native of Vermont, and a graduate of the University of Vermont and of Johns Hopkins. While teaching at Minnesota, Michigan, and Chicago (1888–1904), he became widely known as one who turned from the old literary and speculative to a democratic and scientific philosophy of education. Experience is the starting point and shows the need for progress, evolution of the individual and society, and all fine social movements. Dewey looked toward the future. Some of his important volumes are *The School and Society* (1900), *How We Think* (1909), *Democracy in Education* (1913), *Reconstruction in Philosophy* (1920), *Human Nature and Conduct* (1922).

DILKE, CHARLES WENTWORTH (1810–1869). Credited with having secured the municipal vote for women in England (1884–85), Sir Charles W. Dilke also interested himself in municipal reform, housing of the working classes, and in remedial legislation in general. He was a Cambridge graduate represented Chelsea in Parliament (1868–86), and acted as under secretary of foreign affairs (1880–82), and was president of the local government board (1882–85).

DIONYSIUS (*dī'ô-nĭsh'ĭ-ŭs*) **EXIGUUS** (about 470–about 540). A learned monk, a "Scythian by birth, but wholly Roman in other respects." His works include a collection of the first 50 canons of the Apostles, the canons of 10 Councils, and 38 decretals of the popes from 384 to 498; promulgated by Charlemagne in 802. Dionysius completed the paschal year and introduced the system of counting the years from the birth of Christ.

DOMINIC (*dŏm'ĭ-nĭk*), **SAINT** (1170–1221). Founder of the Dominican Order, who was born in Castile, was ordained a priest in 1195 at Osma, went on a mission with the bishop of his diocese, and for ten years (1205–15) preached among the Albigenses in Languedoc. Little progress of lasting kind was made. In 1218, after some waiting, Honorius III., the pope, gave permission for the founding of a new order; by his death the Dominicans had increased amazingly in western Europe, with over 500 friars.

DOW (*dau*), **NEAL** (1804–1897). Author of the Maine law against the manufacture and sale of intoxicants (1851). He was mayor of Portland (1851), member of the legislature (1858–59), and entered the Civil War as colonel of volunteers. In 1862 he became a brigadier general and for a time had charge of federal forces in Florida. Later he devoted much of his time to social movements.

DOWIE (*dau'ĭ*), **JOHN ALEXANDER** (1847–1907). Religious leader, founder of the Christian Catholic Apostolic Church in Zion, which he established in Zion City, Illinois, with industries and strict laws. For many years he went about as a "healer" in Australia and after 1888 in America, making frequent tours. From 1896 he lived as "First Apostle" of the Zion church at Zion City, but a few months before his death was removed from active leadership, being succeeded by Wilbur Glenn Voliva.

DRACHMAN, BERNARD (1861–). Orthodox Jewish rabbi, educated at Breslau and Heidelberg, and professor in the Jewish Theological Seminary of New York (1887–1908). He also acted as rabbi of Zichron Ephraim, and wrote several works on biblical and scholastic subjects.

DUKE, JAMES BUCHANAN. See under CAPTAINS OF INDUSTRY.

DUNANT (*dü'nän*), **JEAN HENRI** (1828–1910). Swiss philanthropist, instrumental in the founding of the Red Cross Society. Having become interested in aiding wounded soldiers, he wrote and lectured extensively on the subject and in the Geneva Convention of 1864 the nations represented took steps to form an international organization. Much of his private fortune went toward the establishment of various social agencies. Half the Nobel peace prize was given to Dunant in 1901.

DUNS SCOTUS (*dŭnz skō'tŭs*), **JOHN** (c. 1265–1308). Celebrated British theologian, a graduate of Oxford, and a valiant defender of the Franciscan doctrines. Before 1302 he spent some years in Paris, and early in 1308 went to Cologne to establish a university, and there died shortly afterward. Because of the acuteness of his mind, he was called "The Subtle Doctor." Opponents later ridiculed him, and the name *dunce* came from his. Many of his doctrines opposed those of the Dominicans. Scotus is credited with a clear statement of the idea of the Immaculate Conception. He taught that reason alone is insufficient to arrive at truth, but this must be supplemented by inspiration.

DUNSTAN (*dŭn'stăn*), **SAINT** (909–988). An English prelate, who was educated at Glastonbury, and in the time of Edmund became abbot there. From the court of King Athelstan he was driven by rivals, and he gained little favor in the reign of Edwig, but under Edgar was made bishop of London and in the same year also archbishop of Canterbury (959). He continued in favor and power till about 980.

ECK (*ĕk*), **JOHANN MAIER** (1486–1543). Opponent of Luther and a great controversial debater. He argued against Carlstadt at Leipzig in 1519, and a few days later with Luther himself. He influenced the German universities to declare against Luther's doctrines; secured from the pope on a visit to Rome (1520) a bull against them; and later issued several violent pamphlets, which Luther ignored. He was present at Worms (1540), seemed willing to compromise between the church and the new elements, but at Regensburg the next year stood firm against all concessions. In 1530–31 he collected his writings against Luther in four volumes.

EDDY, MARY BAKER (1821–1910). Founder and until her death the leader of the Christian Science

movement. She was born in New Hampshire, of a prominent family, educated there, and married George W. Glover, a southerner, in 1841, but he died within six months. Her second marriage to Daniel Patterson, a dentist, turned out unhappily. Asa Gilbert Eddy, her third husband, was an ardent follower, one of her first pupils. For years Mrs. Eddy taught, first in New Hampshire and later in Boston at the Massachusetts Metaphysical College, founded by her (1881). From early life she was deeply interested in spiritual thought. Her belief in healing dated from two experiences of her own, the second in 1866, from which she traced her ideas of Christian Science. With her followers she founded the First Church, Scientist, of Boston in 1892. In 1928 some 2,370 churches were reported. Besides establishing two periodicals, she wrote much, including such books as *Science and Health* (1875), *Unity of Good, Church Manual, Pulpit and Press,* and *Christian Science versus Pantheism.*

EDDY, SHERWOOD (1871–). Religious worker, mainly in Asia, acting as secretary of the Y. M. C. A., from 1911, especially among students of Japan, Korea, India, the Near East, and Russia. Educated at Yale, he went to India for the Christian Association in 1896, and remained there till 1911. With the British Army at first, and after 1917 with the American in France, in the World War. Author of *The Awakening of India* (1911), *Suffering and the War, New Challenges to the Faith,* and *Religion and Social Justice.*

EDWARDS, JONATHAN (1703–1758). American theologian and preacher, who held the pastorate of the church at Northampton, Massachusetts, from 1727 to 1748, when he was dismissed by his congregation. During much of the time he seldom visited his people, worked in his study for at least twelve hours a day, and apparently did not like to mingle with men. His powerful sermons, Calvinistic in nature, long held his congregations breathless when they heard him preach. In 1750 he went to Stockbridge, Massachusetts, and there preached and did some mission work among the Indians. When his son-in-law, Aaron Burr, president of Princeton College, died in 1757, Edwards reluctantly agreed to succeed him. Smallpox cut him off, however, less than two months after he formally took office. His *Freedom of the Will,* once regarded as a great polemic work, hardly commands much respect among biblical scholars or philosophers today.

ELIOT, JOHN. See under AUTHORS.

EMPEDOCLES (*ĕm-pĕd'ō-klēz*) (c. 490–430 B. C.). Greek philosopher and poet, whose family was distinguished in Sicily, and he refused the kingship, according to tradition. Of a poem on nature of 5,000 lines, but 400 survive, and only a few lines of his hymns. He seems to have been a mystic and scientist at the same time. He believed the universe is composed of but four elements, earth, air, fire, and water,—fire being the essence of life, the rest that of forms and objects in different proportions. He said the world was created out of a conflict of two opposing forces, Hate and Love, when the latter predominated.

EPEE (*ā'pā*), **CHARLES-MICHEL, ABBE DE L'** (1712–1789). Leader in the education of deaf mutes. He was a clergyman, deprived of his offices because of heterodoxy. Then he turned attention to education, from the Spaniard Pereira learned much, and at his own cost founded a school (1755). In 1791 the National Assembly continued his work.

EPICTETUS (*ĕp-ĭk-tē'tŭs*) (b. c. 60). Greek philosopher, probably born in Phrygia, who took the name meaning "acquired"; hence, his original one is unknown. Evidently he was once a slave and of weak constitution. Domitian expelled him and others for their Stoical doctrines, and he afterward lived at Nicopolis. Much of his teaching was reported by his pupils in the *Discourses of Epictetus.* Both Socrates and Diogenes influenced his ideas, which are of high seriousness. Man is a conscious being, responsible to society, and accountable for what he does with his thought life.

EPICURUS (*ĕp-ĭ-kū'rŭs*) (241–270 B. C.). Early Greek philosopher, who spent the first 15 years of his life in Samos, began to teach in Mytilene and later in Lampracus, in 306 going to Athens, where he established a famous school. In habit he was temperate, in ideals moderate, and in teaching inspired. Only a series of maxims now remain of his writings. From the fact that he taught that happiness is the greatest human good, in later times his doctrine was developed into a theory of mere pleasure. He really taught that one's peace of mind is the greatest good.

ERASMUS, DESIDERIUS (1466–1536). This great leader of the Renaissance in western Europe was born in Holland and educated at Gouda and Deventer, taking orders in 1492. He resided in England in 1499, 1505 to 1514, and 1517. Thereafter his chief seat was at Basle, until he was driven to Freiburg for six years returning to Basle in 1535. He taught at Paris, Louvain, Cambridge and elsewhere. Much of his time was given to the edition of the New Testament, the Letters of Jerome and Seneca. His counsel was sought by scholars and monarchs, yet he refused to become allied too strongly with any school of thought. Erasmus left a deep imprint on later thought, as a humanist scholar, a man of letters and a churchman. At Cambridge he knew Colet and lived with More for a time. He advocated primitive doctrines, avoided controversy between church and state, and shunned dogmatism more than most men of his age. Erasmus also acted as a link between Latin and the new learning devoted mainly to Greek studies.

EUCKEN (*oi'ken*), **RUDOLF CHRISTOLPH** (1846–1926). German theologian and author, educated under Lotze and Trendelburg. He held chairs of philosophy at Basle (1871–74) and at Jena (1874–1920). Turning from his early studies in Aristotle and other Greek writers, he developed the idea that man is the meeting place between spirit and nature, and hence should develop his powers of thought, will, and inspiration.

EUSEBIUS (*yu-sī'bi-us*) **OF CAESAREA** (c. 260–c. 340). Called the father of ecclesiastical history and bishop of Caesarea, was known at first for taking a middle ground between the Arians and their opponents. Realizing later that Arius practically denied the divinity of Christ, he cast his lot with the Alexandrians. Becoming bishop in 313, he took part in the Council of Nice, and was widely known as the most learned man of his generation. Constantine greatly admired his abilities and moderation. An edition of all his works was printed in 1542 at Basle. Some of his writings are valuable today, the *Preparation* and the *Demonstration,* for their doctrines of the Church; *History of the Church to 323;* and the *Chronicon,* which contains references to authors not now extant.

FABER (*fā'bĕr*), **FREDERICK** (1814–1863). English theologian and hymn-writer, who gave up his early Calvinistic views, became a warm admirer of John Henry Newman, and joined the Roman church in 1845. He founded a religious community at Birmingham, and in 1849 came to London, where he established a branch. Though he wrote various theological works, he is now known chiefly for his hymns like *O Paradise, O Paradise, Hark, Hark, my Soul, O Gift of Gifts,* and *Sweet Saviour, Bless Us Ere We Go.*

FALCONIO (*făl-kō'nē-ō*), **DIOMEDE** (1842–1917). Roman Catholic archbishop and Apostolic Delegate; held various positions in educational institutions in United States and Newfoundland till 1883; returned to Italy, holding high ecclesiastical offices until 1892, when he became bishop, archbishop (1895), Apostolic Delegate to Canada and the United States (1902); cardinal (1911).

FALK, JOHANN DANIEL (1768–1826). German author and philanthropist, who was a close friend of Goethe, and wrote a number of satirical and other works. Today he is best known as the founder of a philanthropic association (1813), one of the earliest, and also as the organizer of an institution for the care of orphan children.

FARLEY (*fār'li*), **JOHN MURPHY** (1842–1918). Roman Catholic archbishop of New York, a native of Ireland, graduate of St. John's College, Fordham, New York, and later a student of the American College, Rome. Secretary to Archbishop McCloskey (1872–84), vicar general of New York (1891–95), assistant bishop (1895–1902), and bishop on the death of Archbishop Corrigan. In 1911 he became a cardinal. Known for his aid to education.

FARRAR (*far'ăr*), **FREDERICK WILLIAM** (1831–1903). An English clergyman, dean of Canterbury; 16 years master at Harrow; canon and archdeacon of Westminister, and chaplain to the queen. His *Life of Christ* passed through many editions; his sermons in volumes like *Eternal Hope* did much to soften the theology of the age; and *The Life and Works of St. Paul* and *The Early Days of Christianity* did much to

spread the interest in the foundations of the church.

FENELON (*fē-na-lēn'*). See under AUTHORS.

FENWICK (*fen'wik*), **ETHEL GORDON** (1857–). Wife of Dr. Bedford Fenwick, who did much to raise the status of the profession of nursing in Great Britain. Largely through her influence Parliament passed an act regulating nursing (1919). Previously she had founded the Royal British Nurses' Association (1887), and two years later an international body of like character. She also took part in journalism, becoming honorary editor of *The British Journal of Nursing*.

FICHTE (*fich'tē*), **JOHANN GOTTLIEB** (1762–1814). German idealistic philosopher, who developed the ideas of Kant. He taught that subject and object are the same, and all things are merely appearances, phenomena related to spirit, the only real being in the universe. His influence on later philosophy has been tremendous, especially on men like Emerson, Hegel, and Schopenhauer. Of Swedish descent, he was educated at Jena, where he became professor of philosophy in 1794, and rector of the University of Berlin in 1810. Following Kant's great work, Fichte published *A Critique of Revelation* (1792), which turned away from the early influences of Spinoza. Other important works are *Theory of Knowledge, System of Moral Philosophy*—his greatest treatise—and *The Way to a Blessed Life*.

FILENE, EDWARD A. (1860–1937). Boston merchant who became a leader in organized coöperative movements of various kinds. Beginning with attempts to secure greater efficiency among the employees of his retail stores, he offered them shares in the business. Later he founded the Twentieth Century Fund to promote better industrial and economic conditions. Served on numerous national and international committees and foundations. During the World War assisted the United States at home and abroad. Active in organizing the United States Chamber of Commerce, National Credit Union Extension Bureau, Boston Planning Commission, and the Public Franchise League. He was decorated by France, Austria, and Italy.

FISHER, GEORGE PARK (1827–1909). American theologian, who was educated at Andover Theological Seminary, and was a professor at Yale from 1854,—first till 1861 of divinity, and then of ecclesiastical history. His influence on thought was widely exerted. Some of his books are *History of the Reformation* (1873), *Grounds of Theistic and Christian Belief* (1883), and *History of Christian Doctrine* (1896).

FOLKS, HOMER (1867–). Social worker, educated at Albion College and Harvard; engaged in various capacities in New York,—superintendent of the Children's Aid Society (1890–93); State Charities Aid Society (1892–1902, and after 1904); president of New York State Probation Commission (1907–17); chief of American Red Cross Survey Mission to Italy, Serbia, and other lands (1918–19). Served in many other civic and national movements. Wrote *Care of Destitute, Neglected, and Delinquent Children* and *The Human Cost of War*.

FOSDICK, HARRY EMERSON (1878–). American clergyman, educated at Colgate University and Union Theological Seminary, New York. He was pastor of the First Baptist Church, Montclair, New Jersey (1904–15), instructor in Union Seminary, and professor of practical theology from 1915, and in 1918 became minister of the First Presbyterian Church, New York. In 1925, on being required to become a member of the Presbyterian Church, he resigned the pastorate, and immediately was installed as pastor of the Park Avenue Baptist Church, which agreed to admit to membership all Christians without insisting on baptism or credal declarations. Fosdick was a popular preacher among universities. Some of his books are *The Second Mile, The Manhood of the Master, The Meaning of Faith*, and *Twelve Tests of Character*.

FOURIER (*fū-ri-ā'*), **FRANCOIS MARIE CHARLES** (1772–1837). A French social economist; at first in trade, then in the army. After seeing a cargo of rice thrown into the sea to raise the price he was led to attempt a reform abolishing the competitive system, by means of associated production and life in "phalansteries." He died in Paris.

FOWLER, CHARLES HENRY (1837–1908). Bishop of the Methodist Episcopal Church from 1884. He was president of Northwestern University (1872–76), as bishop made important visits in various lands, organizing conferences in China and Russia, universities at Peking and Nanking, China, and mission st tions elsewhere. For years he delivered an extreme popular lecture on Abraham Lincoln.

FOX, GEORGE (1624–1691). An Englishma founder of the Society of Friends, or Quakers. Whe 19 years old he believed himself called to preach, ar wandered about England doing so; his numerous fo lowers gained their name Quakers in 1650, becau Fox had bidden the magistrates, who frequently a rested him, "to tremble (quake) at the word of t Lord."

FRANCIS OF ASSISI (*äs-sē'zē*), **SAINT** (1182 1226). Founder of the Order of the Friars Minor, Franciscans. Born in Assisi, Italy; in business wi his father until 24, when he retired to lead a life lik Christ's; with 11 others he received the approval Pope Innocent III. to form the order (1209). H rule of life consisted of 23 chapters, prescribi poverty, obedience, chastity, giving up of propert and obligation to live upon alms. The order w formally sanctioned in 1216.

FRANCIS OF SALES (*sālz*), **SAINT** (1567–1622 Swiss prelate who founded the order of the Visit tion, as he said, to favor those of "strong souls wi weak bodies." Acting under orders of Bishop Granier, he went (1535) to win back some Swi subjects to the church from the heresy of Calvanis This commission he rigorously pushed to success. 1602, after a second visit to Paris, he succeeded Granier at Geneva, spending the rest of his life zealous works of the spirit. In 1665 he was made saint.

FRY, ELIZABETH (1780–1845). Daughter John Gurney, a wealthy British merchant, she marri Joseph Fry, a merchant of London. Brought up Quaker, in 1811 she was admitted to preach, b turned her attention to prison reform through Europe. Beginning at Newgate Prison in London, s secured various reforms in segregation of the sex in prisons, providing employment, sanitation, and oth necessities. At times she visited France, Switzerlan Germany in addition to Scotland and Ireland. H work had definite and immediate effect in all the lands.

FUNK, ISAAC KAUFMAN (1839–1912). Ame can clergyman, who held various Lutheran pastorat (1867–1878), when he joined with A. W. Wagna in organizing a publishing house. Besides foundi the *Standard Dictionary*, the *Jewish Cyclopedia*, t *Homiletic Review*, and the *Literary Digest*, he pu lished or wrote many religious and reference work

GAILOR (*gāl'ŏr*), **THOMAS FRANK** (185 1935). Bishop of the Protestant Episcopal Church America; chairman of the House of Bishops fr 1916. He was graduated from Racine College, W consin, and the General Theological Seminary of N York; was rector at Pulaski, Tennessee (1879–8 professor of ecclesiastical history, and then vi chancellor of the University of the South (1882–9 coadjutor bishop till 1898 and bishop since then. his books, *The Trust of the Episcopate, The Maste Word and the Church Act, The Communion of Sain* and *The Christian Church* may be mentioned.

GANDHI (*gänd'hē*), **MOHANDAS KARAMCHA** (1869–). Indian social and political lead known for asceticism and self-sacrifice. He was bo of a cult that refuses to harm any living thing. Co pleted his education in England in 1891. Decidi that the law was distasteful to him, he gave up a l thousand dollar practice, took vows of virtual pover and spent much time from 1893 to 1914 in So Africa quietly inciting revolt against some laws, s eral of which were finally repealed. Returning India, by 1921 he reached the climax of his fa advocating passive resistance to British rule. prisoned for a time, but released early in 1924, found his power somewhat eclipsed. In 1930, h ever, he adopted a more active policy of resista and was again thrown into jail.

GARRISON, WILLIAM LLOYD (1805–187 Abolitionist leader, journalist, and philanthropist, established the Newburyport, Massachusetts, *P Press*, edited the *National Philanthropist* (1827), the *Liberator* (1831–65). Founded the New Engl Anti-slavery Society (1832), and for years lectu widely. He was often threatened, more than o mobbed, but never flinched in advocating the aboli of human slavery. Garrison, however, did not lieve in war even to suppress slavery. He also oppo the use of alcohol and tobacco, capital punishm

freemasonry, imprisonment for debt, and restrictions of the suffrage because of sex.

GEORGE, SAINT (died c. 300). Little is known of his life, save that he was an early churchman, perhaps a martyr at Lydda in Palestine. Much legend grew up around his name, including the story of the slaying of a dragon by him, described at some length in the *Golden Legend* of Jacobus de Voragine and traced back to about 500 A. D. Yet he became the patron saint of England, Aragon, and Portugal. The Oxford Council in 1222 made his feast a national affair and Edward III. made him a patron saint.

GEORGE, WILLIAM REUBEN (1866–1936). Founder of the George Junior Republic at Freeville, New York (1895). While living in New York City, he became interested in young boys and girls, conceived the idea that they could support themselves and live in a model community away from city influences. His group of 150 at Freeville govern themselves and engage in ordinary adult pursuits, while also being trained in schools and industrial shops. Many similar republics have been founded by others in various states.

GIBBONS (*gĭb'ŏnz*), **JAMES** (1834–1911). Cardinal and Archbishop of Baltimore. He was ordained a priest in 1861, was bishop of North Carolina (1868–72); of Richmond, Virginia (1872–77); and succeeded Archbishop James R. Bailey of Baltimore in the latter year. He held important offices in the councils of the church, took a thoroughly American attitude, and was greatly beloved by all classes. *The Faith of our Fathers*, statement of Roman Catholic beliefs mainly for Protestants, passed through over a hundred editions in America and England. Other works were *Our Christian Heritage*, *The Ambassador of Christ*, and *A Retrospect of Fifty Years*.

GIRARD (*jĭ-rärd'*), **STEPHEN** (1750–1831). American philanthropist, born in France, but came to Philadelphia when he was 26. Becoming wealthy he helped the government in 1810 by investing a million in the depreciated securities of the United States Bank, and in 1814 by subscribing for nearly all of a government loan of five millions. In 1793 and 1798 he did valiant service in the yellow fever epidemic of the city. The bulk of his estate went to Philadelphia for the establishment of a school (named Girard College) for orphan boys, where they are prepared for college and taught useful occupations and trades. Owing to litigation the school was not opened till 1848.

GLADDEN, WASHINGTON (1836–1918). American clergyman and social reformer, for 30 years pastor of the First Congregational Church at Columbus, Ohio. Born in Pennsylvania and educated at Williams, he held several pastorates before going to Columbus in 1882. Among his influential books are *The Young Men and the Churches*, *Art and Morality*, *Social Salvation*, and *Christianity and Socialism*.

GOKHALE, GOPAL KRISHNA (1866–1915). Indian political and religious leader, holding offices in the Indian National Congress, and striving for constitutional reforms. He founded the Servants of India Society (1905), a group which took upon themselves vows of poverty and service. In financial reform his influence was considerable.

GORDON, CHARLES W. See RALPH CONNOR under AUTHORS.

GORDON, GEORGE ANGIER (1853–1929). Clergyman and university preacher, who was born in Scotland, came to the United States in 1871, and was minister of the Old South Church, Boston, from 1884 to 1927. For years he preached to large congregations at Harvard, Yale, and other universities, also acting as lecturer on special foundations at both. Some of his books are *The Witness to Immortality*, *Ultimate Conceptions of Faith*, *Humanism in New England Theology*, and *My Education and Religion*.

GOUCH (*gŏff*), **JOHN BARTHOLOMEW** (1817–1886). Celebrated temperance reformer, who was born in Kent, England, but came to the United States at 12. He lived on a farm and became a bookbinder in western New York, but in 1835 lost his position through drunkenness. In 1842 he took the pledge, and, after some lapses, decided to give his life to lecturing on the evils of drink, becoming a powerful speaker in great demand on the public platform.

GRANT, HEBER JEDEDIAH (1856–). Elected head of the Mormon Church in 1918, the first native son of Utah to hold the office, in succession to Joseph F. Smith, nephew of the founder. Engaged in successful mercantile enterprises as head of his own insurance company and Zion Coöperative Mercantile Association, banking, and insurance companies. He became one of the Council of Twelve (1882), went on missions to Japan (1901–03), and presided over the European Mission (1904–06).

GREELEY, HORACE. See under RULERS AND STATESMEN.

GREGORY (*greg'o-ri*) **I.** (c. 540–604). First of sixteen popes of that designation and one of the last great scholars of the Latin Church, born in Rome, and became a monk after holding a political office. He founded six monasteries in Sicily and one in Rome, of which he later became abbot. He started on a mission to Britain, was recalled, and in 590 was elected pope. In almost every way he advanced the interests of the church.

GREGORY (*greg'o-ri*) **VII., SAINT** (c. 1021–1085). Pope from 1073 to 1085 as successor to Alexander II., known now chiefly for his quarrel with Henry IV. of Germany. He was born in Tuscany, studied at Cluny, and took holy orders in 1049. Because he forbade investiture and certain other church practices, Henry deposed the pope in 1076, but one year later went to Canossa and penitently humiliated himself before Gregory. Yet in 1080 Henry succeeded in driving Gregory from Rome to Salerno, where he died five years later.

GREGORY (*greg'o-ri*) **XIII.** (1502–1585). A native of Bologna, who succeeded Pope Pius V. in 1572. He was deeply versed in the canon and civil law and had distinguished himself at the Council of Trent. He ornamented Rome with many fine buildings and fountains; but his pontificate is chiefly memorable for the reformation of the calendar which bore his name. Gregory omitted 10 days in the calendar to correct a cumulative error, and made another minor change affecting century years.

GREGORY NAZIANZUS (*nā-zi-ăn'ŭs*), **SAINT** (329–390). Bishop of Constantinople; excelled all his contemporaries in pulpit eloquence. Many of his works are extant, and consist of orations, letters, and poems. His theological system is best set forth in his *Theological Orations*.

GRENFELL (*gren'fel*), **WILFRED THOMASON** (1865–1940). British medical missionary and sociologist, educated at Oxford, and in London under Sir Frederick Treves. Spent three years (1889–1891) with deep sea fishermen cruising in the north Atlantic; in 1892 settled in Labrador, where he organized hospitals, founded industries, and did much otherwise to improve conditions of the people; and in 1912 united various enterprises by the formation of the International Grenfell Association. Served in the World War with the Harvard Surgical Unit. Knighted by King George in 1927.

GUISE (*gīz'*), **HENRY OF LORRAINE, 3d DUKE OF** (1550–88). Sometimes called Balafré, because of a scar received in battle. He took up the quarrel against the Huguenots, countenanced the massacre of St. Bartholomew, and had political ambitions, which were cut off by his murder at the instigation of Henry III.

GULICK, SIDNEY LEWIS (1860–). Missionary in Japan, who did much to promote international friendships. He was born in the Marshall Islands, educated at Dartmouth College, and Union Theological Seminary of New York, was in the mission field from 1887 to 1914, and then served as secretary of the committee on international good will of the Federal Council of Churches of Christ in America. Connected with other social and missionary societies. Wrote numerous books, including *The White Peril in the Far East*, *The American-Japanese Problem*, *American Democracy and Asiatic Citizenship*, and *The Christian Crusade for a Warless World*.

HAMILTON, JOHN WILLIAM (1845–1934). American Methodist Episcopal bishop, born in Virginia, educated at Mt. Union College, Ohio, and held pastorates in Ohio and Massachusetts until 1892. Secretary Freedman's Aid Society (1892–1900), elected bishop in 1900, chancellor American University (1916–22). Organized missions in Alaska, acted as one of the commission for unification of Methodist denominations, and of the committee on organic union with the Presbyterian and other church bodies.

HARRISON, FREDERIC (1831–1923). English leader in the positivist movement, founded originally by Comte, editor of the *Positivist Review*. Harrison was a graduate of Oxford, for many years practiced as a lawyer in equity cases, assisted Lord Westbury in

the codification of law, turned his attention to social and literary movement, and exerted a great influence upon world thought. Though he was a liberal, he never became an agnostic; though he was a trade unionist, he did not join any social or political group. For years he warned against the disaster which a conflict like the World War might produce. As a literary historian he wrote many biographies of statesmen and several books like *Meaning of History, Byzantine History in the Early Middle Ages,* and *George Washington.* As a literary critic of sane and discriminating judgment, he wrote works like *Memories and Thoughts, Tennyson, Ruskin, Mill, and other Literary Estimates.*

HARRISON, LEON (1866–1929). Rabbi of the Temple Israel of the Reformed Jewish faith in St. Louis from 1891 to his death. Honor graduate of the New York public schools and of Columbia University (1886). Known as an orator at the funeral of Henry Ward Beecher and for the city of St. Louis at the McKinley memorial services. Founded the Sisterhood of Personal Service, St. Louis, and interested in various peace and reform movements.

HART, HASTINGS HORNELL (1851–1932). Reform worker and sociologist, educated at Oberlin, and a pastor from 1880 to 1883. Then secretary of Minnesota State Board of Charities (1883–98), superintendent of Illinois Children's Home and Aid Society (1898–1908); and director of child-helping (1908–24), and then consultant of the Russell Sage Foundation, New York City. Among other books, he wrote *Preventive Treatment of Neglected Children, Social Problems of Alabama, How to Give Wisely $25,000 to $1,000,000, The Third Degree,* and *Restoration of the Criminal.*

HARTMANN (*härt'män*), **KARL ROBERT EDUARD VON** (1842–1906). German philosopher, educated at Rostock and lived mainly in Berlin. His reputation is based chiefly on his *Philosophy of the Unconscious,* a clear exposition of the idea that Will and Reason are in conflict and the end should be to exert the powers of will so strongly as to bring on unconsciousness of the troubles of life.

HARTZELL, JOSEPH CRANE (1842–1928). Methodist Episcopal missionary bishop to Africa (1896–1916). He was a graduate of Illinois Wesleyan University, held pastorates in Illinois and in New Orleans from 1870 to 1873 and then till 1882 was in charge of educational work in New Orleans, and was assistant secretary and secretary of the Freedman's Aid Society till elected bishop in 1896. Founded the *Southwestern Christian Advocate* and acted on various committees, especially as envoy from the United States to England for settlement of troubles in Liberia.

HARVARD (*här'vard*), **JOHN** (1607–1638). By a gift of half his estate or a sum of £780 and 260 books, he became the first benefactor of the new school, named Harvard College in his honor, at Cambridge, Massachusetts. He was a Puritan minister, a graduate of Emmanuel College of Cambridge University, England, who settled as minister in Charlestown, Massachusetts, and died there at an early age. The first commencement was held in 1642, but the foundation had been laid in 1637, and the college named two years later.

HAYES (*hāz*), **PATRICK JOSEPH** (1867–1938). American cardinal, ordained a priest in 1884, chancellor of New York, 1903, president of the Cathedral College, 1903–17, auxiliary bishop of New York, 1914, archbishop of New York, 1919, and cardinal, 1924.

HEARST (*hûrst*), **PHEBE APPERSON** (1842–1919). Wife of George Hearst, once United States Senator from California, who managed large mining and business affairs after the death of her husband. Noted for her philanthropies, she organized kindergarten classes at various places, established libraries at Lead, South Dakota, and Anaconda Minnesota, gave $250,000 to the Cathedral School for Girls at Washington, D. C., built a mining building at the University of California and paid for elaborate plans for improvement of this.

HEBER (*hē'bẽr*), **REGINALD** (1783–1826). English bishop and writer of hymns, a native of Cheshire, a graduate of Oxford, and admitted to orders (1807). After being prebendary of St. Asaph, and minister at Lincoln's Inn, he was elected Bishop of Calcutta, where he did notable work, but suffered from the climate. His influence as a hymnist has been tremendous, especially for *Holy, Holy, Holy, God Almighty, From Greenland's Icy Mountains, The Son of God Goes Forth To War,* and *Brightest and Best of the Sons of the Morning.*

HECKER (*hĕk'ẽr*), **ISAAC THOMAS** (1819–1888). Founder of the Paulist Fathers, noted for his zeal and piety. He was born of German parentage in New York City, lived at the Brook Farm colony for six months, and in 1844 became a Roman Catholic. After acting as a Redemptorist priest for many years he sought unsuccessfully to found a novitiate of the order in the United States. Later, however, Pius IX (1858) authorized him to organize a new community of Paulist Fathers, which he supervised till his death. He also organized the Catholic Publication Society.

HEGEL (*hā'gĕl*), **GEORG WILHELM FRIEDRICH** (1770–1831). German philosopher, one of the four idealistic thinkers of his age, with Kant, Fichte, and Schelling, the last of whom influenced him greatly. He was a professor at Jena (1801–06), acted as editor after the Napoleonic campaign closed the university, and then taught for a time at Nuremberg. His chief works are *The Phenomenology of the Spirit, Science of Logic,* a very important work, *Philosophy of Right,* and a great *Encyclopedia of Philosophic Sciences.* Hegel emphasized the relation of perception to objects themselves. His study of art is interesting.

HENNEPIN (*en-paN'*), **LOUIS** (1640– ?). Belgian missionary and explorer of territory in the United States, who was a member of the Franciscan order and came to Canada in 1675. With La Salle he journeyed westward (1678), penetrated as far as the modern Peoria, Illinois, when La Salle had to return for supplies, and Hennepin went on north as far as the present site of Minneapolis. Captured by the Indians, he was rescued after 11 months, returned to France (1683), and published an account of his travels.

HEPBURN (*hep'bûrn*), **JAMES CURTIS** (1815–1911). Missionary to China and Japan and translator. From 1840 to 1846 he labored as a medical man in China, and from 1859 to 1892 in Japan. He compiled the first English dictionary of Japanese, made a Japanese grammar, translated the Bible into Japanese (1872–88), and compiled other works.

HERZL (*hĕrtz'l*), **THEODOR** (1860–1904). Founder of Zionism or the return of the Jews to Palestine under conditions of political autonomy. He was born in Budapest, published a celebrated pamphlet in 1896 entitled *Der Judenstaat,* and from then on was a zealous advocate of the cause he favored. Though he gained the enthusiastic support of countless Jews, and of some men of wealth, who were not especially interested in the religious feature of the movement, he failed to gain the support of prominent church leaders. In 1903 the British offered him land in East Africa for an autonomous colony, but nothing short of a return to Palestine was favored by many Zionists.

HERACLITUS (*her-a-klai'tus*) (c. 540–475 B. C.). Called the "Dark Philosopher" by his fellow Greeks, he founded the study of metaphysics. He believed that all things are one in essence, but that fire is the uniting or primary substance of the world. Reason should control but most men act as if they had a reason of their own.

HICKS (*hĭks*), **ELIAS** (1748–1830). Founder of the Unitarian or Hicksite branch of the Quakers or Society of Friends; born in New York and in 1778 became an itinerant preacher. He was instrumental in securing an act in the New York Legislature (1817) freeing in ten years all negroes born in the state and not emancipated under the act of 1799. His theology he advocated no set creed, but favored the doctrines of Unitarians in regard to the divinity of Christ. In 1828 his followers formed a new organization.

HILARIUS (*hĭl'ā-rĭ-ŭs*), **SAINT** (c. 300–367). Opponent of the Arians while bishop of Poitiers, he was banished by the synod of 356 to Phrygia. He joined with certain bishops in the East, wrote a letter to those in western Europe, and on petition to Constantine was allowed to return to his see. His *De Trinitate* expounds his Trinitarian views as opposed to the Unitarian of the Arians.

HILL, ROWLAND (1795–1879). Father of penny postage in England, interested in education and invention, suggested first in 1837 that postal revenue might be increased by reducing the rate, by using stamps, and by prepayment of postage. Commons adopted the rate of twopence the half ounce in 183

and in 1840 the rate became a penny. Hill served for a time in the Treasury department, but was dismissed by a change in government, though in 1846 he returned with the Liberals as secretary to the postmaster general, in which he did valuable service till 1864, when he retired.

HILLIS (*hĭl'is*), **NEWELL DWIGHT** (1858–1929). American clergyman, author, and lecturer, educated at Lake Forest University and McCormick Seminary, Chicago, and acted as pastor in Illinois till 1899, after which time he served in the Plymouth Church in Brooklyn, until he retired in 1924.

HOBBES (*hŏbz*), **THOMAS** (1588–1679). English philosopher, who studied at Oxford, and became the friend of many notable men in England and of Galileo while in Italy. Acted as tutor to the Prince of Wales, later Charles II., but was dismissed after Hobbes published his *Leviathan* (1651), yet was pensioned by Charles in 1660. Hobbes stood for an independent spirit of inquiry in matters of thought and faith, and so his chief works were condemned by Parliament in 1666. He argued that the end of thought is social, and the government supreme in law and also in matters of faith. Both in the applications of science to knowledge and as an early student of psychology, Hobbes had a profound influence on later generations.

HOLMES (*hōmz*), **JOHN HAYNES** (1879–). Clergyman and social reformer, pastor in Dorchester, Massachusetts, and after 1907 of the Church of the Messiah, which was renamed the Community Church of New York. President Unitarian Fellowship for Social Justice (1908–11), Free Religious Association (1914–19), director Civil Liberties Bureau from 1917, and of the American Union Against Militarism (1917–19). Author of *Is Death the End?* (1915), *New Wars for Old* (1916), *New Churches for Old* (1922), *Patriotism is not Enough* (1925), and other works.

HOFFDING (*hĕf'dĭng*), **HARALD** (1843–1931). Danish philosopher, educated at Copenhagen, and a professor there from 1883. Knowledge, being, and ethics were his special fields, the latter of which derives from religion and is based mainly on sense of values. Of his numerous works, the best-known perhaps are the *History of Philosophy*, *The Problems of a Philosopher*, *Philosophy of Religion*, and *Modern Philosophers*.

HOLYOKE (*hōl'yōk*), **GEORGE JACOB** (1817–1906). English social reformer, who devoted much of his life to the coöperative movement among laboring classes. He was convicted (1841) for blasphemy in a public address, the last trial of its kind under old statutes, and he was also the last person to be indicted for publishing a newspaper without sanction just before the law was repealed.

HOOKER, RICHARD (1553–1600). British theologian, educated at Oxford, and at first a tutor to sons of prominent persons. He was a rector in Buckinghamshire (1581–85), master of the Temple (1585–91), rector at Boscombe (1591–95), and finally at Bishopbourne (1595–97). During these years he completed four books of his masterpieces, *Laws of Ecclesiastical Polity*. After his death four additional books were issued, but some portions at least are doubted as being his. Hooker wrote a fine prose, showing his broad interests. He connects reason and law, the latter ultimately being the offshoot of reason itself, which proceeds from God. Thus the laws of God are discovered only through reason. He advocated close union of church and state, but insisted that powers of government derive from the will of the governed. See also under AUTHORS.

HOOKER, THOMAS (1586–1647). English clergyman, who was forced to emigrate to Holland and then (1633) to America because he persisted in delivering moral and other addresses not sanctioned by church authorities. He settled in what is now Cambridge, Massachusetts, but took a party of emigrants to Connecticut, where they founded the present city of Hartford. He declared to the Legislature in a sermon (1638) that those who have power to appoint magistrates and officers also have the power "to set the bounds and limitations of the power and place unto which they call them." For this and similar statements, he has been called the father of the modern American ideas of democracy. All authority and right go back to God ultimately, according to Hooker.

HOPKINS (*hop'kinz*), **JOHNS** (1795–1873). An American philanthropist; born in Anne Arundel County, Md. In 1873 he gave property worth $4,500,000 to found a free hospital. He presented Baltimore with a public park and he also gave over $3,000,000 to found the Johns Hopkins University in Baltimore.

HORR, GEORGE EDWIN (1856–1927). Theologian, who was president of Newton Theological Institution, from 1908 to his death. A graduate of Brown University, he entered the Baptist ministry, preached at Tarrytown, New York (1879–84), at Charlestown, Massachusetts (1884–91), edited *The Watchman* (1891–1903), and then became professor at Newton. In his denomination his influence was profound, and he also delivered religious lectures at Harvard (1913 and 1923).

HOSS, ELIJAH EMBREE (1849–1919). Bishop of Methodist Episcopal Church, South, since 1902; pastor at Knoxville, Tenn., San Francisco, Cal., and Asheville, N. C.; professor and president of Martha Washington College, Va. (1876–1881); vice-president and later president of Emory and Henry College (1881–1885); on theological faculty of Vanderbilt University (1885–1902); editor of Nashville *Christian Advocate* (1890–1902).

HOWARD, JOHN (1726–1790). English prison reformer, who in 1773 became high sheriff of Bedford, and immediately began a movement for improving the conditions and discipline in prisons. The following year he gave evidence before Commons, resulting in an act which abolished many abuses. At various times he traveled widely on the continent, dying of camp fever in Russia on his last visit. Much of his information was used in building and conducting new prisons. His chief works are *The State of Prisons in England and Wales* (1777) and *Account of the Principal Lazarettos in Europe* (1789).

HOUGH (*hŭff*), **LYNN HAROLD** (1877–). American minister, author, and university president, who entered the Methodist Episcopal pastorate in 1898, held appointments at Arcola and Cranford, New Jersey, King's Park and Long Island City, New York, and at Baltimore until called to the chair of historical theology, Garrett Biblical Institute, Evanston, Illinois, in 1914. He acted as president of Northwestern University for one year, went to the Central church of Detroit (1920–28) and then to the American Presbyterian Church in Montreal, Canada. Of his many books on practical theology are the *Theology of a Preacher*, *Living Book in a Living Age*, *Synthetic Christianity*, and *Evangelical Humanism*. Lectured at various universities on special foundations.

HOWE, SAMUEL GRIDLEY. See under EDUCATORS.

HUME (*hūm*), **DAVID** (1711–1776). British philosopher and historian, who gave up the law as a career because of poor health, and who developed a system of rationalism which doubted much of the mental experience of mankind. As a philosopher he is still regarded, but at present Hume's historical writings are known to be lacking in results of scholarship and research. He was unsuccessful in attempts to gain a chair of ethics at Edinburgh, and one of logic at Glasgow, but in 1752 became librarian of the Advocates Library at Edinburgh, a position that gave time for study and reading. The volumes of history were published between 1754 and 1761. Now known for his *Essays on Human Understanding*, *Enquiry concerning the Principles of Morals*, and *Political Discourses*.

HURLBUT (*hŭrl'but*), **JESSE LYMAN** (1843–1930). Methodist Episcopal clergyman and editor. Pastor from 1865–1879; agent of Sunday School Union, to 1884; assistant and finally editor of *Sunday School Literature* (1884–1900); pastor in New Jersey since 1901; counselor of Chautauqua Society; author of *Manual of Biblical Geography*, *Revised Normal Lesons*, *Organizing and Building up the Sunday School*, *Story of the Christian Church*.

HUSS (*hus*), **JOHANN** (1373–1415). A distinguished religious reformer; born in Bohemia; convicted of heresy by the Council of Constance, and by the secular authorities burned at the stake. His followers, called Hussites, inaugurated a war for religous freedom (1419), continued until the emperor Sigismund granted acceptable terms and peace was restored.

HUTCHINSON (*huch'in-son*), **ANNE** (c. 1600–1643). Religious leader, who came to Massachusetts from England (1634), asserted that she, John Cotton, and a few others were inspired by the Holy Ghost, whereas most of the clergy were given to a "covenant of works." Opinion became divided, and at last she was tried and excommunicated, after which (1638)

she withdrew to what is now Rhode Island, and finally to a point on Long Island Sound near the modern New Rochelle, New York, where she was killed by Indians.

INGE (*ĭng*), **WILLIAM RALPH** (1860–). Elected dean of St. Paul's in London in 1911, Dr. Inge came to be known as the "gloomy dean" because of certain pessimism and criticism of modern life, yet his preaching was highly popular. He was educated at Cambridge University, acted as master of Eton College (1884–88), was fellow of Hertford College, Oxford (1889–1904), and professor of divinity at Cambridge (1907–11). He lectured several times in American cities, especially in 1906 and 1925.

IGNATIUS (*ĭg-nā'shĭ-ŭs*), **SAINT** (first century). Called Theophorus or "Godbearer." Little is known of his biography, except that he was a bishop, and probably was martyred at Rome. Yet his letters give a vivid picture of his hatred of heresy, zeal for the church, and conditions of early Christianity. He seems to have first used the term "eucharist" of the Lord's Supper, and the phrase "the Catholic Church," in the sense of the church universal.

INNOCENT (*in'o-sent*) **III. (Lotario de Conti).** Pope from 1198–1216, who was not even a priest when he was unanimously elected to succeed Celestine III. His education had been completed in Paris, and he was a great scholar. His fame now rests, however, on his wise and firm extension of the powers of the papal office. He made his influence felt in the temporal affairs of Spain, France, and England, forcing King John to receive Stephen Langton as archbishop of Canterbury. All his acts, however, were free from self-interest or guile.

IRELAND, JOHN (1838–1918). Roman Catholic archbishop of St. Paul since 1888; priest (1861); rector cathedral, St. Paul; coadjutor Bishop of Saint Paul (1875), succeeded Bishop Grace (1884) with the title of archbishop (1888); important figure in movements for total abstinence, colonization in the Northwest, and the establishment of the Catholic University at Washington; author of *The Church and Modern Society*.

IRENAEUS (*ī-rē-nē'ŭs*), **SAINT** (second century). Bishop of Lyons for the last quarter of the second century, he may have suffered martyrdom. Known for his preaching among the Gauls, his attempts to unite the two factions of the church in dispute over the date of Easter, and a work against heretics, only a few fragments of which in the original remain.

JACKS, LAWRENCE PEARSALL. See under AUTHORS.

JAMES, WILLIAM (1842–1910). Philosopher and leader in the movement known as Pragmatism. He was born of the distinguished James family of New York City, being a brother of Henry James, the author, and a son of Henry James, the elder, noted as a thinker. James received a varied and somewhat desultory schooling, studied art, and then entered the Lawrence Scientific School at Harvard. From medicine and science he turned, after study in Germany, to psychology, but James suffered from ill health. His *Principles of Psychology* (1891) began his study of various phases of physiology, psychology, and thought in general.

JANSEN (*jăn'sĕn*), **CORNELIUS** (1585–1638). For the last two years of his life Bishop of Ypres, and leader of the sect which opposed the Jesuit order of the Roman Catholic Church. He studied in Paris, was in charge of a college for theological students at Louvain, went to Spain twice on missions, and became a professor at the University of Louvain in 1630. His chief work, *Augustinus*, explains the theology and work of the Augustinians.

JEROME (*jĕ-rōm'*), **SAINT** (c. 340–420). Church father, educated in the Roman schools, visited the East, where he lived for a number of years, especially at Antioch as an ascetic after a severe illness. Jerome resolved to abandon secular for sacred literature. He was made a priest at Antioch in 379, went to Constantinople, and then to Rome where he remained until 385. Urged to use his scholarship in translating the Scriptures, he compiled and made a Latin translation still in use. For a number of years he lived at Bethlehem, where he died.

JOAN OF ARC (*jōn ŭv ärk'*) (1412–1431). French patriotic leader and martyr, who was born at Domremy; from her earliest years professed to hear voices and experience visions. Gradually she conceived the idea that she was chosen of God to deliver the French from the English forces then encamped Orleans. Dressed in male attire and a suit of wh armor and riding a black charger, she rode at the he of 6,000 soldiers, who took the city in April, 142 In a month over two years, she fell into the han of the English, claimed to obey the voice of God o and not that of the church, and was allowed to go the stake on May 30, 1431. After an exhaustive quiry (1456), the original judgment against Jo was annulled. She was beatified in 1909 and ca onized ten years later by Pope Benedict XV.

JOHN OF DAMASCUS (about 700–754). A fath of the church; the author of the standard text-bo on dogmatic theology in the Greek Church; canoniz by both the Latin and Greek churches; one of t doctors of the Latin Church; the ablest philosoph of his time; wrote three *Operations* or letters on imag worship.

JOHNSON, TOM LOFTIN. See under RULERS AN STATESMEN.

JOHNSON, WILLIAM EUGENE (1862– World temperance leader, known as Pussyfoot Joh son. He was born in New York and became journalist in Lincoln, Nebraska, New York, an Chicago (1884–1905). Then acted in various capa ties: As government enforcement agent in India Territory and Oklahoma, member of Internation Temperance Committee of Fifty, director of publicatio of Anti-Saloon League, and director of the Lond office, World League against Alcoholism. Lectur thousands of times all over the world. Lost an e at Essex Hall, London, in 1919 when struck missile thrown by member of the audience.

JONES, ELI STANLEY (1884–). Missiona leader, who was born in Maryland, educated at th City College of Baltimore and Asbury College, Ke tucky. In 1907 he wished to go to Africa, but w sent to India instead by the Methodist Episcop Board of Missions. Here he formed contacts wi most of the native religious leaders, including Gandh Decided to center his attention on Christ and less o theology. Resigned election as bishop in 192 Wrote *Christ of the Indian Road*, *Christ of the Roun Table*, and *Christ of Every Road*.

JONES, SAMUEL MILTON. See RULERS AN STATESMEN.

JOWETT (*jou'ĕt*), **JOHN HENRY** (1864–1923 British minister, pastor of the Fifth Avenue Presb terian Church (1911–18). He was born in Yor shire, educated at Edinburgh and Oxford Univers ties, and held pastorates at Newcastle-upon-Tyne an Birmingham (1889–1911). Known far and wide a an eloquent preacher.

JUDD, CHARLES HUBBARD. See unde EDUCATORS.

JUDSON, ADONIRAM (1788–1850). An America missionary; born in Malden, Mass. In Februar 1812, he sailed with his wife for Asia. During th voyage he was converted from the Congregational fait to that of the Baptist church. In 1814, when th Baptists of the United States organized a missionar union, he was taken under its care. He settled i Burma, mastered the language, and labored there fo nearly forty years. He died at sea.

JULIUS II. (Giuliano della Rovere) (1443–1513 Able pope, the nephew of Sixtus IV. Twenty yea before he was chosen, he exerted a powerful politic influence in France, where he persuaded Charles VII to proceed against Naples. He abolished nepotism i the church, condemned duelling by a papal bull, se missionaries to various parts of the world, and mad alliances, the last being with Aragon and Venic against France. He laid the foundations of S Peter's at Rome, started the Vatican museum, an patronized the arts and letters.

JUSTIN, surnamed **THE MARTYR** (about 100 about 165). An early Christian apologist; studie philosophy in the Stoic and Platonic schools, and wa converted to Christianity; was the author of *Apologie for the Christians* and *Dialogue with Tryphon the Jew* suffered martyrdom.

KANT (*kănt*), **IMMANUEL** (1724–1804). Em nent modern philosopher and greatest metaphysicia who was educated at the University of Königsber in East Prussia. From 1746 until he was appointe a professor in 1770, he earned his living by tutorin and acting as librarian. He was early influenced b Leibnitz and Wolff, but later turned way from them He divided the mind into intellect, feeling, and will

rejected the old doctrines of rationalism and the English empiricism of men like Hume; and placed mind above the material or the subjective over the objective forces. Thus he is the father of modern idealism. *Dreams of a Visionary, Prolegomena, Metaphysic of Ethics,* and his great masterpiece, *The Critique of Pure Reason,* which probably had a deeper and wider influence than any other work on philosophy in recent decades, are his great books.

KEBLE (*kē'b'l*), **JOHN** (1792–1866). English religious leader, regarded by many as the founder of the Oxford or High Church movement in England. He won honors at Oxford, was fellow and tutor at Oriel College (1811–23), professor of poetry at Oxford (1831–41), and then till his death rector at Hursley, Hampshire. His sermon, *National Apostacy* (1831), aroused great interest which was fanned by the tracts which Keble and others issued from time to time; hence, the name Tractarian Movement applied to their work. The tracts ended in 1841 with one in which John Henry Newman (q. v.) declared in favor of the Roman Catholic faith. Keble continued to maintain the High Church doctrines he had espoused. As a literary man, if not altogether, he is known now largely for his *Christian Year* (1827), a collection of poems appropriate for all Sundays, saints' days, and festivals of the Church of England.

KINGSLEY, CHARLES. See under AUTHORS.

KLOPSCH (*klŏpsh*), **LOUIS** (1852–1910). American editor and philanthropist of German birth. After engaging in the business of publishing the New York *Daily Reporter* (1877–90), and other journals, he acquired a principal interest in the *Christian Herald,* and made this weekly religious paper a power. Through its columns and free service in soliciting funds, more than $4,000,000 were raised and distributed for relief in Armenia, China, India, and many other lands including America.

KNOX, JOHN (1505–1572). A Scotch religious reformer; pioneer of Puritanism; prisoner of war, for 19 months, in French galleys; friend of Calvin and Beza; a preacher of sermons that moved his hearers to demolish convents; arrested for treason, and armed "congregation" at his heels; burned in effigy; for years a dictator—he spent his life forwarding the Reformation in Scotland. His great work distinguished in Scottish prose was his *History of the Reformation of Religion within the Realm of Scotland.*

KOHLER (*kōlar*), **KAUFMANN** (1843–1926). Leader of Reformed Judaism in the United States. In 1885 called a Rabbinical Conference at Pittsburgh, at which a platform was adopted for Reformed Judaism. President of Hebrew Union College from 1903; pastor in Detroit, Chicago, and New York; editor of *Jewish Reformer* and *Sabbath Visitor.*

KYRLE (*kurl*), **JOHN** (1637–1724). Philanthropist; born in Gloucestershire; was distinguished for his benefactions; has given name to a society founded, among other things, for the betterment of the homes of the people.

LACORDAIRE (*lă-kôr-dâr'*), **JEAN BAPTISTE HENRI** (1802–1861). French religious leader and orator, educated as a doctor of medicine, and for a time practised law. Deeply influenced by the *Essay upon Indifference* of Lamennais, he became a priest. With Montalembert, he opened a school, which the authorities immediately closed. His series of conferences at the Collége Stanislas (1834) gained great favor, as did his sermons at Notre Dame. From 1838 to 1841 he was in Rome, where he became a priest under the name Dominique; but his later conferences, sermons, and orations at Notre Dame in Paris (1843–51) gained him an election to the Academy. Some of these were published.

LACTANTIUS (*lak-tan'shus*), **FIRMIANUS** (c. 260–c. 340). Early Christian teacher, converted in middle life, and evidently acted as tutor to the son of Constantine the Great. For a time he lived at Nicomedia in Bithynia, where he at least started his great work on the *Divine Institutions.* Author of *The Death of Persecutors,* which may not be genuine, but greatly influenced similar writings in the Middle Ages.

LAMENNAIS (*la-me-nē'*), **HUGHES FELICITE ROBERT** (1782–1854). French religious and philosophic writer, whose *Essay on Indifference* (1817) violently attacked toleration and liberality in religion. His paper *L'Avenir* standing for "liberty and God," was disapproved by the Pope, and Lamennais grew indifferent to the church, turned toward the extreme side of the democratic party, and in the revolution of 1848 sat in Parliament as a member of the extreme Left.

LANG, COSMO GORDON (1864–). Archbishop of Canterbury in 1928, in succession to Dr. R. T. Davidson (q. v.). He was the son of the moderator of the Church of Scotland, was educated at St. Andrews and Oxford, preached at Leeds, St. Mary's at Oxford University, and Portsea, was fellow and divinity dean at Magdalen College, Oxford, suffragan bishop of Stepney, and from 1908 to 1928 archbishop of York. He interested himself in social work in London, advocated reception by the Commons of the Revised Prayer Book, and was a member of the royal commission on divorce.

LANGE, CHRISTIAN (1869–1939). Norwegian peace advocate, for a time secretary of the Nobel Committee in the Parliament. He represented his nation at The Hague (1907), in the Assembly of the League of Nations (1921), and in the same year was awarded half the Nobel Peace Prize. Author of numerous articles and discussions of peace.

LASSALLE (*lă-sal'*), **FERDINAND** (1825–1864). Leader of the Social Democratic Party, a brilliant thinker and student of politics and world affairs. Though he followed Karl Marx in the main, he differed in some essentials. Heine called him "the Messiah of the nineteenth century." By letters, addresses, and writings he attempted to incite the workers to assert their rights. Some of his propaganda tracts are *The Working Man's Programme* and *The Open Letter.* He died from a wound received in a duel with the husband of his sweetheart, Fräulein von Dönniges, who evidently had been forced to marry against her best wishes. His fate led George Meredith to write his *Tragic Comedians.* Other works are *Heraclitus the Obscure,* an able work in philosophical interpretation; *The Italian War and Prussia's Mission,* which anticipates the doctrines of Bismarck; and *Das System des erworbenen Rechts,* a legal treatise on the rights of property.

LATIMER, HUGH (c. 1485–1555). Forerunner of the Reformation in England, who suffered martyrdom in the reign of Mary along with Ridley and others. He was born near Leicester, educated at Cambridge, and was fellow of Clare College (1510), university preacher (1522), Bishop of Winchester (1535–39), for a time was imprisoned in the Tower (1546), and was known far and wide as a powerful preacher. Foxe in the *Acts and Monuments* vividly described his death.

LAUD, WILLIAM (1573–1645). An English prelate; archbishop of Canterbury in the reign of Charles I. His endeavors to introduce the liturgy into Scotland made him numerous enemies; therefore he was impeached by the Commons and sent to the Tower. After lying there nearly three years he was declared guilty of treason, and was beheaded on Tower Hill. Laud enriched the University of Oxford with over 1,300 manuscripts; wrote a *Diary* and a few other works published in collected form in 1887.

LAVAL-MONTMORENCY (*lă-vāl'-mōn-mo-raN-sī'*), **FRANCOIS XAVIER DE** (1622–1708). French bishop, born at Laval; received the tonsure at nine years of age, becoming a priest at twenty-three and at thirty-one Archdeacon of Evreux; sent to Canada as vicar of Pope Alexander VII., with title of Bishop of Petra (1659); established Seminary of Quebec (1663); titular Bishop of Quebec (1674–1683). His name is perpetuated in Laval University, Quebec, founded in 1852.

LAWRENCE, WILLIAM (1850–). Episcopalian bishop of Massachusetts (1893–1926) and bishop of the American Churches in Europe, 1928. He was a graduate of Harvard, rector at Lawrence, (1876–84), then professor and dean of the Episcopal Theological School, Cambridge, till consecrated bishop. He was closely identified with all forward movements of his diocese, took an active part as an Overseer of Harvard University, and was president of the Church Pension Fund, and a member of the National Council of the Protestant Episcopal Church.

LEE, ANN (1736–1784). Founder of the Society of Shakers in America; born in Manchester, England. She was poor and uneducated, and in 1758 joined the Shakers, a sect allied in their belief to the Friends, but who were peculiar in their form of worship. She believed herself inspired, and was imprisoned in 1770 for preaching the new doctrine of celibacy. In 1774 she emigrated to America and founded the Society of Shakers in 1776.

LEIBNITZ (*līp'nĭts*) **or LEIBNIZ, GOTTFRIED WILHELM** (1646–1716). German philosopher and mathematician, a native of Leipzig, and graduate of the local university. On being refused his doctorate because of his youth (1666), he was invited to Nuremberg, given his degree, and a chair of philosophy. He served the Elector of Mainz for a time, went to France with a proposal for the conquest of Egypt, a plan which later (1806) attracted Napoleon. There Huygens persuaded him to study mathematics more deeply, and in London he knew Newton, Boyle, and other scientists. Later he served under Duke Frederick of Brunswick, who founded at his suggestion (1700) the Academy of Sciences, of which Leibnitz was elected president. Leibnitz said that the world is made up of a considerable number of monads, each being somewhat independent, but also in harmony with the rest and with God, the cause of all things.

LICK, JAMES (1796–1876). An American philanthropist; born in Fredericksburg, Pa. In 1847 he emigrated to California, taking with him $30,000, which he invested in real estate in San Francisco, and its rapid advance in value made him wealthy. In 1874 he placed his entire property in the hands of trustees, to be devoted to public and charitable purposes. The total amount thus given was $13,000,000, of which $700,000 was for Lick Observatory, to be connected with the University of California; $150,000 for free public baths in San Francisco, and $540,000 for an institution to be called the California School of Mechanical Arts. He died in San Francisco, Cal.

LIDDON (*lĭd'an*), **HENRY PARRY** (1829–1890). English leader in the High-Church Party after Newman left the Anglican Church (1845). He was prebendary of Salisbury Cathedral, canon of St. Paul's, professor at Oxford, and chancellor of St. Paul's (1886). His preaching in London attracted immense audiences, and he succeeded in spreading the doctrines of the Tractarians as nobody had since the early days of the Movement.

LINDSAY, SAMUEL McCUNE (1869–). American sociologist, formerly a professor at the University of Pennsylvania, and then at Columbia University. Acted as special agent of the United States in labor investigations, studied the school system of Porto Rico, and corresponded with various foreign social agencies. Author of several books, including *Social Aspects of Philadelphia Relief Work, Inauguration of the Public School System in Porto Rico*, and joint author of *Financial Administration of Great Britain*.

LINDSEY, BENJAMIN BARR (1869–). Judge of the juvenile court of Denver, Colorado, from 1900 to 1927. Made many changes in the procedure of the court, notably in the nature of putting boys on their honor. Later secured legislation making parents responsible in part for delinquency of their children. Advocated companionship marriage and other changes in domestic relations. Author of *Problems of the Children, The Revolt of Modern Youth*, and *Companionate Marriage*.

LIVERMORE, MARY ASHTON RICE (1821–1905). American reformer, who served with the United States Sanitary Commission in the Civil War, and afterward devoted much time to agitation and lecturing on suffrage and temperance. In 1845 she married a Universalist minister, Daniel P. Livermore, who died in 1899. Some of her books are *The Children's Army, My Story of the War*, and *What Shall We Do with our Daughters?*

LIVINGSTONE, DAVID. See under STATESMEN.

LOCKE, JOHN (1632–1704). English philosopher, who took his M. A. at Christ Church College, Oxford, and became a tutor there (1658). For 15 years after 1667 he acted as confidential secretary to the Earl of Shaftesbury, during which time he studied many subjects. His *Essay Concerning Toleration* (1666) had already attracted much notice, for Locke argued that no limits should be placed on individual freedom of belief and doctrine. He spent some years in France and Holland and from 1691 to his death in Essex, England. Other works also have greatly influenced English philosophy, such as the *Essay Concerning Human Understanding* (1690), which seeks to fix the limits of speculation; *Thoughts on Education* (1693); two more letters to meet attacks on his opinions as to toleration; and finally some religious treatises.

LODGE, SIR OLIVER. See under SCIENTISTS.

LUTHER, MARTIN (1483–1546). German reformer, translator, and leader in the Protestant Reformation. He was born of peasant parents in Saxo struggled through school, and received his first deg at Erfurt in 1503, and his doctorate two years la Then he became an Augustinian priest (1507), p fessor at Wittenberg (1508), made a visit to Ro and after his return attracted immense crowds by preaching. In 1517 he nailed to the church door Wittenberg his 95 theses or propositions against sale indulgences, for which he was summoned to Ro but refused to go. Gradually he became more a more advanced in his views. In 1521 he attend the diet at Worms, made his confession, but was plac under a ban, and for a time was secluded by power friends. In 1524 he discarded his monk's dress, following year he married Catherine von Bora, former nun, and from this time he gradually wi drew from public controversy. Luther's numero works had a profound influence on his age. So of them are *On the Liberty of a Christian Man*, va ous commentaries on books of the *Bible*, and his *Re lutions*, or the 95 theses.

MacARTHUR, MARY REID (1880–1921). Briti leader among laboring women and founder of the N tional Federation of Women Workers (1903). Throu her efforts laws were passed regulating sweat sho assisting women workers during the World War, a providing better employment conditions. In 1911 s married W. C. Anderson (died 1919), who was cha man of the Labour Party and M. P. from 1915 1918. In 1919 she lectured in the United States.

McCABE, CHARLES CARDWELL (1836–1909 A Methodist Episcopal bishop; pastor (1860–1862) Ohio; chaplain in the army till 1866; prominent Methodist Church extension movement and raised ov a million dollars a year for missions; became bish in 1896 and chancellor of American University Washington, D. C., in 1902.

McCLOSKY, JOHN (1810–1885). First Americ cardinal, born in Brooklyn, New York, educated Emmitsburg, Maryland, and first president of what now Fordham University, bishop of Albany (1847 64), archbishop of New York (1864–75), and card nal from 1875. He was instrumental in building th cathedral at Albany and a theological school at Tro New York.

McCONNELL, FRANCIS JOHN (1871– Methodist Episcopal bishop, educated at Ohio We leyan University, held various pastorates (1894 1909), was president of DePauw University (1909 12), and elected bishop in 1912. Leader in soci and reform movements. Some of his works are *Th Increase of Faith, Democratic Christianity, Th Preacher and the People*, and *Is God Limited?*

McDOWELL, WILLIAM FRASER (1858–1937) Methodist Episcopal bishop, pastor in Ohio after gra uation from Ohio Wesleyan (1882–90), chancellor the University of Denver (1890–99), and secretar of the Board of Education of the M. E. Church (1899 1904), when he was elected a bishop. Lectured -o special foundations at Yale, DePauw, University Illinois, and other universities. President of th Board of Temperance of the M. E. Church.

McPHERSON, AIMEE SEMPLE (1890–) Evangelist and founder of the Foursquare Gosp movement. She was born in Canada, at 17 bega her evangelistic labors; settled in Los Angeles in 1918 and built a huge auditorium, named Angelus Temple and established other activities. Known as a magneti preacher of the simple gospel. Wrote *The Bridal Ca* (1915), *Divine Healing Sermons* (1920) and th *Second Coming of Christ* (1920).

MALTHUS (*măl'thŭs*), **THOMAS ROBERT** (1766 1834). English economist, whose *Essay on Populatio* expressed the idea that population increases muc faster than the means of subsistence. He was bor in Surrey, was a fellow student of Coleridge at Cam bridge, and acted as curate for a time. During hi lifetime six editions of his *Essay* were published fro 1798 to 1826. Malthus gradually came to the con clusion that wars, pestilence, vice, and other mean do not sufficiently hold the population within bounds He advocated moral restraints, postponing the age o marriage, and improvement in living conditions a checks on over-population. It is said that Darwin wa greatly influenced by Malthus.

MANI or **MANES** (*mā'nēz*) (215 or 216–276) Babylonian religious leader, who founded a sect whe he was about 25. Favored by the Persian monarch then in power, he spread his teaching abroad and made journeys to other lands as a missionary of the new

faith. He taught that the world was subjected to two influences, good and bad, the first man being created by the latter. Gradually the good tended to predominate. Mani believed that he was the last great prophet, but he had only a confused or shadowy idea of Christ. When a new king came to the throne of Persia, Mani was arrested by fanatics and put to a cruel death. Yet his religion spread rapidly.

MANNING, HENRY EDWARD (1808–1892). English cardinal and social reformer, educated at Harrow and Oxford, and noted for many years as an eloquent preacher. In 1851 he became a Roman Catholic, was made Roman archbishop of Westminster in 1865, and a cardinal in 1875. Led in the movement for definition of infallibility by Pius IX. Later he gave much attention to the cause of labor, favored the formation of certain unions, and did much to settle several strikes.

MANNING, WILLIAM THOMAS (1866–). Episcopalian bishop of New York since 1921. Born in England, he became a priest in California (1891), and acted as rector at Lansdown, Pennsylvania, Nashville, Tennessee, St. Agnes's Chapel of Trinity Church, New York, and then assistant rector, and rector (1908–21), of Trinity Church. Through his efforts the Cathedral of St. John the Divine in New York was pushed toward completion.

MARQUETTE (*mär-kĕt'*), **JACQUES** (1637–1675). French missionary to the region of the Great Lakes and one of the re-discoverers of the Mississippi River. He came to Canada in 1666, two years later explored the upper St. Lawrence, and in 1673 followed the Mississippi to the point of union with the Arkansas. While trying to plant a mission among the Illinois Indians (1675), he was stricken and died.

MARSHMAN, JOSHUA (1768–1837). English Baptist missionary, a native of Wiltshire, sent to India in 1799, where at Serampur he had Carey, Ward, and others as companions. He translated the Bible into native dialects, certain important parts into Chinese, and with his son founded Serampur College. His son, John Clark Marshman, published the first English weekly newspaper in India.

MARTINEAU (*mär'tĕ-nō*), **JAMES** (1805–1900). English Unitarian theologian, who turned from mathematics and engineering to the ministry in 1828. After preaching in various places, he was elected professor of philosophy at Manchester New College (1840), which was removed to London in 1853. In 1858 he also became minister of the Little Portland Street Chapel in London. From 1869 to 1885 he acted as principal of New College. Even without his denomination and circle of admirers, his influence was profound. Some of his chief works are *The Rationale of Religious Enquiry*, *The Study of Religion*, and *The Seat of Authority in Religion*.

MARX, KARL (1818–1883). A German socialist; born at Treves, of Jewish descent; was at first a student of philosophy and a disciple of Hegel, but soon abandoned philosophy for social economy; early adopted socialistic opinions, for his zeal in which he was driven from Germany and France, to settle in London, where he spent the last 30 years of his life; one of the founders of the "Internationale," and wrote a work, *Das Kapital*, which has become the text-book of Socialism.

MASSILLON (*ma-sï-yōn'*), **JEAN BAPTISTE** (1663–1742). A distinguished French pulpit orator; called to the Church of the Oratory in Paris (1699) and preached the *Advent Sermons* before Louis XIV. at Versailles. Among his celebrated works are *Le petit carême*, a course of 10 Lenten sermons (1718), and his earlier *Advent Sermons* and *Le grand carême*; won distinction through his many brilliant funeral orations; named bishop of Clermont (1717); consecrated in 1719; academician (1719).

MATHER (*măTH'ẽr*), **COTTON** (1663–1728). Congregational minister of Boston, the son of Increase Mather, noted just below. He took his degree at Harvard in 1678 and was at the Second Church from 1685 to his death. Once active in politics, he later was rejected because of his conservatism, which may also have prevented his election as president of Harvard. He advocated inoculation for smallpox. Author of some 400 works on various subjects, he gained an international reputation. Several books of his on witchcraft probably stimulated the belief in this, but he told the judges at Salem (1692), that some of their acts were unfair and some of their victims innocent. Now known chiefly for his *Magnalia, Wonders of the Invisible World*, and *Essays to Do Good*.

MATHER, INCREASE (1639–1723). Congregational minister, and president of Harvard College (1684–1701). After graduation from Harvard, he took his A. M. at Trinity College, Dublin (1658), and remained in England three years. From 1690 to 1692 he lived in England in an attempt to get a renewal of the old charter for the colony. King William gave him a modified form, allowed him to nominate a governor for Massachusetts, but both these became unpopular, and he was forced from the presidency of Harvard. From then he took less interest in affairs, wrote more than 125 books, and helped end the witchcraft persecutions. In 1683 he organized a scientific society in Boston.

MATHEW, THEOBALD (1790–1856). Known on both continents as Father Mathew, a powerful advocate of total abstinence. He was born near Cashel, Ireland, joined the Franciscan order, and after 1838, when he took the pledge, exerted his influence against all forms of crime and intoxication. Under his example, thousands of total abstinence societies were formed in Great Britain and America.

MATHEWS, SHAILER (1863–). American theologian and educator, professor of history at Colby College, Maine (1889–94), and professor at the University of Chicago from 1897. He became dean of the Chicago Divinity School in 1908. For four years (1912–16), he acted as president of the Federal Council of Churches in America, visiting Japan on a mission in 1915. Besides various articles he wrote a number of books, including *The Social Teachings of Jesus*, *The Spiritual Interpretation of History*, and *The Faith of Modernism* (1924).

MELANCHTHON (*mĕ-lăngk'thŭn*), **PHILIP** (1479–1560). An eminent German theologian and reformer; was the contemporary, friend, and the successor of Luther as the head of the German Reformation; the foremost teacher of his time; and according to Hallam "far above all others the founder of general learning throughout Europe." His writings fill 28 volumes. At 19 he published an edition of Terence that ran through 73 editions.

MENDES (*men'dez*), **HENRY PEREIRA** (1852–1937). Born and educated in England and at University Medical College, New York (1885). Minister of the Spanish and Portuguese Congregation, New York, 1877–1920. A founder of the Jewish Theological Seminary, New York Board of Jewish Ministers, School for Jewish Crippled Children, School for Jewish Deaf Mutes, and the Montefiore Home for Chronic Invalids. Writer on ethical and religious topics.

MERCIER (*mĕr'syā'*), **DESIRE** (1851–1926). Belgian cardinal, who studied at the University of Louvain, was professor at Malines and afterward at Louvain. He became archbishop of Malines in 1906, and a cardinal the following year. During the World War Cardinal Mercier gained the respect of the nations by his heroic proclamation of spiritual independence of the Belgians, and later he was a leader in the conferences on religion that took place at Malines in 1920 and 1923.

MERRY DEL VAL (*mĕr'rē dĕl väl'*), **RAPHAEL** (1865–1930). Spanish cardinal and diplomatist, born and educated in England. Beginning as private chamberlain to Pope Leo XIII., he rose soon to eminence, went on a mission to Canada to settle the school dispute in Manitoba, in 1900 became archbishop of Nicea, cardinal in 1903, and secretary of state till 1914. Afterward acted as secretary of the Supreme Congregation and (1920) camerlengo of the Holy Roman Church.

MILMAN, HENRY HART (1791–1868). English ecclesiastic, author, and church historian. In 1812 he won the Newdigate prize for a poem, and four years later the English prize at Oxford for his *Comparative Estimate of Sculpture and Painting*, and in 1821 he was elected professor of poetry at Oxford. Becoming dean of St. Paul's in 1849, he acquired the title of the "Great Dean." Much of his work after 1829, however, was historical. Histories of the Jews, of early Christianity, and an edition of Gibbon's *Decline and Fall of the Roman Empire* secured him wide recognition. His *Latin Christianity* passed through many reprintings.

MOHAMMED (*mo-ham'ed*) or **MAHOMET** (c. 571–632). Founder of the religion of Islam or Mohammedanism, as called by others. He was a poor boy, left

an orphan at an early age, and brought up by his uncle. At the age of 25 he married a rich widow, much older than himself, but she had a great influence over him. He began to study religion, and for a time lived in a cave, where he had visions and formed the rudiments of his faith in one God. His saying was "There is no God but God, and Mohammed is his prophet." Beginning at his native place, Mecca, he preached his doctrine, at first with moderation, and then with fiery eloquence. Later he engaged in various conquests, bringing his neighbors to the faith by the sword. The first mosque was erected at Medina. He denounced idolatry, preached the ideas of heaven and hell, fasting, praying five times daily, use of no wine, and special favors for soldiers of the faith. After his death his sayings formed the basis of the *Koran*, sacred book of Islam.

MONTEFIORE (*mon-ti-fi-ō'ri*), **MOSES HAIM** (1784–1885). Jewish banker and philanthropist, born in Italy, but became a member of the London Stock Exchange, and in 1824 retired with a large fortune. By marriage he entered into business relations with the Rothschilds. He made seven journeys to Palestine, interviewed the sultan, and various European monarchs to secure better treatment of the Jews. Much of his money was spent in relief of those of his faith. Queen Victoria made him a baronet in 1846; he had been knighted and made Sheriff of London in 1837.

MONTESSORI, MARIA. See under EDUCATORS.

MOODY, DWIGHT LYMAN (1837–1899). American evangelist of great power. He received a scanty education, worked in a shoe store in Boston at 17, went to Chicago (1856), and built up a Sunday School class, which gradually became a church, and in 1860 he gave up business. During the Civil War he worked among the soldiers, from 1865 to 1869 was president of the Chicago Y. M. C. A., engaged with Ira D. Sankey (q. v.) in world-wide evangelism. A school for girls was started at Northfield, Massachusetts, in 1879, followed by one for boys two years later, a Bible Institute in Chicago in 1889, and summer conferences for Christian workers at Northfield in 1880, and for students in 1887. Moody gained his power by brushing aside all theological quibbling, by refusing to attack the faith of others, by his sincerity, honesty, and singleness of purpose in winning souls.

MOORE, GEORGE FOOTE (1851–1931). American Biblical scholar and theologian, a graduate of Yale and Union Seminary of New York, and a professor at Harvard from 1902. His field lay in the examination of the Old Testament and in the history of religions.

MOTT, JOHN R. (1865–). Religious leader, since 1888 connected with the International Y. M. C. A. He made many tours to various parts of the world in the interests of young people; member of the commission sent to Mexico in 1916 by President Wilson; and the mission to Russia in 1917. Served in World War as general secretary of the War Work Council of the Y. M. C. A. Wrote *The Future Leadership of the Church.*

MOTT, LUCRETIA (1793–1880). An American reformer; born in Nantucket, Mass. In 1818 she joined the Friends. In 1833 she assisted in the formation of the American Anti-Slavery Society, and in 1840 went to London as its delegate to the World's Anti-Slavery Convention; was one of the four promoters of the Woman's Rights Convention in the United States, an active exponent of the cause of equal suffrage, temperance, and universal peace.

MUHLENBERG (*mū'lĕn-bĕrg*), **HENRY MELCHIOR** (1711–1787). German Lutheran clergyman, a graduate of Göttingen and in theology of Halle. In 1742 he came to America, where he organized the first Synod in this country, and acted as superintendent of many of the Lutheran churches from New York to Maryland.

MUHLENBERG, WILLIAM AUGUSTUS (1796–1877). American philanthropist and clergyman, noted for making the service of the Episcopal church more flexible, for encouraging a new type of hymnody, and the founding of several schools. He was a graduate of the University of Pennsylvania (1814), preached at Lancaster, Pennsylvania, Flushing, Long Island, and the Church of the Holy Communion, New York City. The last of these was built by his sister, and was made the center of experiments in practical Christianity. He founded the Flushing Institute, the refuge for the poor called St. Johnland, on Long Island, and the Sisterhood of the Church of the Holy Communion, the first order of Protestant Episcopal deaconesses. He was a great-grandson of H. M. Muhlenberg, noted above.

MUNDELEIN (*mŭn'dĕ-līn*), **GEORGE WILLIAM** (1872–1939). American cardinal, born in New York City, educated there and at Rome, Italy. He served as secretary of Bishop McDonnell, pastor of a Lithuanian church, chancellor of the diocese, auxiliary bishop of Brooklyn, and archbishop of Chicago, until created a cardinal in 1924.

MUNSTERBERG (*mŭn'stĕr-bĕrg*), **HUGO** (1863–1916). German psychologist, who was called to Harvard University in 1892 and taught there till his death. He was an expert in the new psychology, which he tried to popularize by his own experiments and by numerous articles and books. He was born at Dantzig, studied there and at Geneva, and took his Ph. D. at Leipzig and an M. A. at Heidelberg. While teaching at Freiburg, he established a laboratory in his own house, one of the first of its type. Later he was called by William James to Harvard to develop the work in practical psychology. Of his many books, some of which were issued in both German and English versions, are *American Traits, Psychology and the Teacher, Psychology and Industrial Efficiency, The War in America* (1914), and *The Eternal Values*, the last being designed as a summary of his thinking.

MURPHY, FRANCIS (1839–1907). American temperance reformer, born in Wexford, Ireland; came to the United States as a child; lectured in America and England on total abstinence; 10,000,000 people are said to have signed the pledge through his influence; chaplain in the Spanish-American War (1898).

NEWMAN, JOHN HENRY (1801–1890). English religious leader, first in Church of England, later in Roman Catholic Church; vicar of St. Mary's, Oxford (1828); published *Tracts for the Times* (1833–1841); leader in "Oxford movement"; ordained Roman Catholic priest (1846); rector of University of Dublin (1854–1858); made a cardinal (1879); writer of marked ability; poem *Dream of Gerontius* and hymn *Lead, Kindly Light*, most famous; wrote much relating to affairs of the church.

NEWTON, JOHN (1725–1807). English clergyman and author of hymns with the poet, William Cowper. Having had little education, he engaged in sea trade from 1737 to 1755. Then he took up the study of Latin and Greek, and in 1764 settled as curate at Olney. Here he and Cowper issued the *Olney Hymns* in 1779. His fame now rests on hymns like *Glorious Things of Thee are Spoken* and *How Sweet the Name of Jesus Sounds*, noted for their fervor and genuine inspiration.

NEWTON, JOSEPH FORT (1876–). American clergyman and orator, who held important pastorates in Dixon, Illinois (1901–08); Cedar Rapids, Iowa (1908–16); City Temple, London, England (1916–19); Church of the Divine Paternity, New York (1919–25); and of the Memorial Church of St. Paul, Overbrook, Pennsylvania. Some of his books are *Wesley and Woolman* (1914), *The Sword of the Spirit* (1918), *Some Living Masters of the Pulpit* (1922), and *The Religion of Masonry* (1926).

NEWTON, RICHARD HEBER (1840–1914). An American clergyman. In 1869 he became rector of All Souls' Church, New York. Among his works are *The Children's Church, The Morals of Trade, Womanhood, Studies of Jesus, Right and Wrong Uses of the Bible, Book of the Beginnings, Philistinism, Social Studies, Church and Creed*, and *Christian Science.*

NIGHTINGALE, FLORENCE (1820–1910). An English philanthropist; born in Florence, Italy. During the Crimean War she promptly volunteered to organize a select band of nurses at Scutari. The offer was accepted by the British War Office, and within a week Miss Nightingale was on her way to the East, where she rendered invaluable service. She was consulted during the American Civil War and the Franco-German War. From 1872 much of her life was passed in her own home, where she studied Greek and theology, received callers, and maintained an immense correspondence. In 1907 the Order of Merit was conferred upon her.

NOYES, JOHN HUMPHREY (1811–1886). Founder of the Oneida Community, a religious cult, in central New York, where goods were held in common and a peculiar system of marriages obtained. Opposition of the community and the laws led Noyes and most of his own followers to withdraw to Canada, where he died at Niagara Falls, Ontario. Some re-

mained at Oneida, formed a purely business organization without any religious features, and perpetuated the name to our time.

OASTLER, RICHARD (1789–1861). English reformer and advocate of shorter hours for working people. For over fifteen years he agitated on every opportunity, but in 1838 he lost his position as steward of a large estate in Yorkshire. Being unable to pay his old employer a debt of £2,000, he was imprisoned for three years for debt, until friends raised a fund and secured his release. Meanwhile, he issued *Fleet Papers* from prison, advocating reforms in industry.

OBERLIN (*ō'bĕr-lĭn*), **JEAN FREDERIC** (1740–1826). A benevolent Alsatian Lutheran pastor; labored all his life at Ban de la Roche, a wild mountain district of Alsace, and devoted himself with untiring zeal to the spiritual and material welfare of the people. Oberlin College, Ohio, was named in his honor.

O'CONNELL, WILLIAM HENRY (1859–). American cardinal, bishop of Portland, Maine (1901), archbishop of Constance and assistant bishop of Boston (1906), and archbishop of Boston (1907). Made a cardinal in 1911. He was educated at Boston College and in Rome.

OECOLAMPADIUS (*ĕk'ō-lăm-pā-dĭ-ŭs*), **JOHANNES** (1482–1531). One of the leaders of the Reformation; born at Weinsberg, in Württemberg; became preacher at Basel; assisted Erasmus in his edition of the New Testament; entered a convent at Augsburg; came under Luther's influence and adopted the reformed doctrine.

OGLETHORPE (*ō'gl-thôrp*), **JAMES EDWARD** (1696–1785). An English military officer and philanthropist; born in London, England. It was through his efforts that a colony was formed of insolvent debtors and persecuted Protestants, whom he brought to America and settled in Georgia in 1733. He remained in America till 1743, when he returned to England. He died in Cranham Hall, Essex, England.

OLDHAM (*ōld'ăm*), **WILLIAM FITZJAMES** (1854–1937). American Methodist Episcopal bishop, who was born at Bengalore, India, the son of missionary parents, and was educated partly at the Madras Christian College. In America he completed his studies at Allegheny College and Boston University. Entering the ministry in 1883, he labored for years in Asia, founding the Malaysian Mission and the Anglo-Chinese School at Singapore. Professor of Missions at Ohio Wesleyan University (1895–1900), missionary bishop of Asia (1904–12), corresponding secretary of the Board of Missions (1912–16), and bishop of the M. E. Church from 1916.

ORIGEN (*ŏr'ĭ-jĕn*) (c. 185–c. 254). Learned church father, most eminent teacher of his age, a native of Alexandria, where his father suffered martyrdom (202). He survived several persecutions himself, made journeys to Palestine (216 and 231 or 232), and settled there after he was virtually excommunicated at Alexandria. He built up a flourishing school, traveled widely to Arabia, Greece, and perhaps farther, and did much to preserve the Scriptures. Before he left Alexandria, he had issued his Old Testament. Most of his writings, which were very numerous, have been lost. In theology he opposed the Greek teachings and the heretical sects, but was influenced in turn by Platonism.

OTTERBEIN (*ŏt'ĕr-bīn*), **PHILIP WILLIAM** (1726–1813). Founder of the Church of the United Brethren in Christ; came as missionary to America in 1752; was a powerful preacher, and started a great revival in 1766.

OWEN, ROBERT (1771–1858). Social reformer; called "the father of modern communism"; born in Newtown, North Wales; at the age of 19 he was manager of a large cotton mill in Manchester; 10 years later bought the New Lanark Mills on the Clyde, where he at once proceeded to improve the condition of the mill employees, by providing better homes and good food at cost prices; transferred children from the factory to the schools which he had established; he worked for better factory laws. Owen started some communistic schemes, no one of which succeeded, particularly the one at New Harmony, Indiana, in which he lost much of his personal fortune. His ideas on punishment, on religion, and social customs also alienated many who really believed in his economic program. Four of his sons became American citizens.

PAINE, ROBERT TREAT (1835–1910). American philanthropist, born in Boston; although a member of the bar he retired from the practice of his profession in order to promote his benevolent enterprises; one of the founders and, after 1878, president of the Associated Charities of Boston; organizer of the Workingmen's Loan Association and many similar societies; was in favor of lower tariff and free raw material. He wrote extensively upon themes in which he is interested.

PALEY (*pā'lĕ*), **WILLIAM** (1743–1805). An English divine and author; in 1775 became rector of Musgrave, and in 1782 was made archdeacon of Carlisle. It is said that he would have received a bishopric had not King George III. taken offense at a paragraph on "Property" in one of his writings. The principal works of Paley are *The Principles of Moral and Political Philosophy, Horae Paulinae, A View of the Evidences of Christianity,* and *Natural Theology.*

PALMER, RAY (1808–1887). An American hymnologist; taught in New York City and at New Haven, Conn.; occupied a pastorate in Bath, Me., until 1850, and then in Albany, N. Y. Among his hymns are *Jesus, the Very Thought of Thee* and *My Faith Looks Up to Thee;* the latter has been translated into twenty languages. His chief collections are *Hymns and Sacred Pieces, Hymns of My Holy Hours,* and *Voices of Hope and Gladness.*

PANKHURST, EMMELINE GOULDEN (1858–1928). English suffrage leader who married Richard M. Pankhurst. When the Liberal party failed to include suffrage in its platform, Mrs. Pankhurst (1903) started the Women's Social and Political Union. She was imprisoned several times for offensive agitation, particularly in 1912 for breaking windows and inciting to violence. In 1910 and 1911 she lectured in America. During the World War she remained loyal and did much to recruit men in both England and America. For a time afterward she lived in Canada and Bermuda. Late in life she joined the Conservative ranks, being a candidate for Parliament at the time of her death. In many of her early struggles she was joined by her daughter, Christabel (b. 1880), who retired from agitation, and by another, Sylvia (b. 1882), who became a Communist.

PARKER, MATTHEW (1504–1575). Archbishop of Canterbury; born in Norwich. In 1544 he was appointed master of Corpus Christi College, Cambridge, and elected vice chancellor of Cambridge University the following year. When Queen Mary succeeded to the throne Parker was deprived of his offices, and remained in concealment till the accession of Elizabeth in 1558. By royal command he was summoned to Lambeth and appointed archbishop of Canterbury.

PARKER, THEODORE (1810–1860). American preacher, scholar, and reformer; pastor of the West Roxbury Unitarian Church (1837–1842). His sermon, *The Transient and Permanent in Christianity* (1841), ranks with Channing's *Baltimore Sermon* of 1819 and Emerson's *Divinity School Address* of 1838; published *A Discourse on Matters Pertaining to Religion, Lessons from the World of Matter and the World of Man,* and *Experiences As a Minister.*

PARKHURST, CHARLES HENRY (1842–1933). Clergyman and reformer, who was born in Massachusetts, educated at Amherst, studied further in Germany, and taught for a time. Pastor at Lenox, Mass. (1874–80) and at the Fifth Avenue Presbyterian Church, New York (1880–1918). President of the Society for Prevention of Crime. His accusations against officialdom in New York City led to a legislative investigation, which largely substantiated the charges. Dr. Parkhurst wrote a number of books, of which those now best known are *Our Fight with Tammany,* and *What Would the World Be Without Religion?*

PARMENIDES (*păr-măn'ĭ-dēz*) (b. c. 515 B. C.). Native of Elea in Italy and a follower of Xenophanes (q. v.), founder of the Eleatic school of philosophers. In 448 he visited Athens and became a friend of Socrates. His poem *On Nature* advances the theory that sense is decisive and only through mental application may one know what is the ultimate reality. Both Plato and Aristotle admired his teachings.

PATON (*pā'tŭn*), **JOHN GIBSON** (1824–1907). Missionary for ten years in Glasgow, Scotland, and in 1858 sailed for the New Hebrides, where he worked four years among the cannibals. In 1862 he began at Aniwa, all the inhabitants of which he had converted by 1882. One of the most successful foreign missionaries in recent times

PATRICK, SAINT (fifth century). Much doubt clouds the life-story of this missionary to the Irish,

and some regard his entire history as a fiction of a later romance. Two documents purporting to be his have come down to us, the *Confession* and a *Letter* to Coroticus, a British king. Legend states that he was held captive for a time, spent some years in a monastery in southern Europe, and about 432 set out for Ireland, where he challenged idol worship, visited various points, founding churches, and was bishop of Armagh.

PATTON, FRANCIS LANDEY (1843–1932). Theologian and educator; pastorates in New York and Chicago till 1881, when he became professor of theology in Princeton Seminary and of ethics in the University; president of the University (1888–1902); president of Princeton Seminary (1902–1913). Known as a staunch defender of the older theology in books like *The Inspiration of the Scriptures, Summary of Christian Doctrine,* and *Fundamental Christianity.* After he retired from Princeton, he lived at his old home at Warwick, Bermuda.

PAUL, SAINT (originally called Saul) (flourished first century). The great Apostle of the Gentiles; born at Tarsus, in Cilicia; by birth a Jew and a Roman citizen. He did more for the extension, if not the exposition, of the Christian faith at its first promulgation than any of the Apostles, and perhaps all of them together, and it is questionable if but for him it would have become, as it has become, the professed religion of the most civilized section of the world.

PEABODY, FRANCIS GREENWOOD (1847–1936). Theologian, from 1881 a professor at Harvard University; acting dean and dean at various times. His lectures and sermons for a generation were famous. Some of his books are *Short Addresses to Young Men on Personal Religion, Jesus Christ and the Social Question, The Christian Life in the Modern World,* and *Religious Life of an American Citizen.*

PEABODY, GEORGE (1795–1869). American philanthropist, who made a huge fortune as a merchant in Washington, D. C., Baltimore, Maryland, and in London, England, where he lived from 1837 to his death. His benefactions amounted to $8,000,000, including sums to his native town of Danvers, Massachusetts; about $1,000,000 for the Institute in Baltimore that bears his name; large sums to Harvard University; and a great fund for education in the South. He also contributed a half million pounds to build houses for working men in London. Queen Victoria offered him a title, which he declined.

PEARSONS, DANIEL KIMBALL (1820–1910). American philanthropist, who accumulated a fortune in real estate in Chicago, and gave over $4,000,000 in all to some two score American colleges. His plan was to require an equal or larger sum to be raised by other friends of a college within a specified time. He was a native of Vermont, became a physician in Chicopee, Massachusetts, but went west in 1857, where he settled in Hinsdale, Illinois, moving to Chicago three years later.

PEASE, EDWARD R. (1857–). Secretary of the Fabian Society from 1890 to 1913. After acting as a merchant, and member of the Stock Exchange, he became a cabinet maker, founded the Fabian Society (with others) in 1883, and was one of the governors from the start of the London School of Economics. Wrote on socialism.

PERIN, HENRI XAVIER CHARLES (1815–1905). Belgian Christian socialist and economist, born at Mons; held the chair of political economy and law in the Catholic University at Louvain for 37 years, when he retired, as professor emeritus (1881). Perin bases his hopes for the success of an ideal society upon the moral influence of the church.

PERRY, JAMES DE WOLF (1872–). Son of the noted clergyman of the same name (1839–1927). He was educated in Germantown, Pennsylvania, at the University of Pennsylvania and Harvard, became a priest in 1896 in the Protestant Episcopal Church, holding pastorates in Springfield and Fitchburg, Massachusetts, and New Haven, Connecticut, until chosen bishop of Rhode Island in 1911. Elected presiding bishop of the church in 1930.

PETER (–64?). The Greek surname of an apostle of Jesus. Peter's real name was Simon, his father's Jonas, his brother's Andrew. Peter was of an impulsive temperament, generous, but too forward in speech and rash in action. After the Ascension, he was for a time the most prominent of the Apostles. Tradition makes him die as a martyr at Rome, crucified with his head downward. Roman Catholics claim him as the first bishop of Rome, and consider that the authority delegated him by Jesus appertains also to his successors, the popes of Rome.

PETER THE HERMIT (c. 1050–1115). Preacher of the First Crusade and one of those who went to Jerusalem in 1096. He was a priest at Amiens, France, gained great fame for his eloquence, and led a great horde to Constantinople in 1096, where he awaited other divisions of the Crusade. His followers suffered defeat in Asia Minor while he was absent at Constantinople. He joined the other princes in 1097, but evidently played a minor part, and reached home about 1100 or 1101.

PHILLIPS, WENDELL (1811–1884). American reformer, of a prominent family, his father being the first mayor of Boston in 1822. To follow the career of an agitator, led by William Lloyd Garrison, he gave up a lucrative law practice, made his first great speech at a meeting in Faneuil Hall, Boston in 1837, after the murder of Elijah P. Lovejoy at Alton, Illinois, and from that time to 1870 was unsparing in his efforts. He gained great fame as a platform orator and agitator, being able to handle large hostile crowds by his magnetism and eloquence. After the Civil War, Garrison said the Anti-Slavery Society had accomplished its end, and should be disbanded. Phillips rejected this doctrine, and continued after Garrison as the president until 1870. He also favored woman suffrage, prison and court reforms, and prohibition of the liquor traffic.

PINGREE, HAZEN S. (1842–1901). American municipal reformer, born in Denmark, Me.; served in the Civil War and was six months in Andersonville prison (1864); afterwards started a shoe factory in Detroit, having previously been employed in a shoe factory; was mayor of Detroit (1890–1896), and threw himself into the work of fighting political corruption; was the advocate of municipal ownership of street railways, free water, the eight-hour law, and other reforms; he secured a reduction in the price of gas; in 1896 he became the Republican governor of Michigan.

PIUS IX. (GIOVANNI MARIA MASTAI FERRETTI) (1792–1878). Chosen to the pontificate (1846). During his incumbency the dogmas of the immaculate conception and of papal infallibility were promulgated, temporal power overthrown (1870), and the papal states annexed to Italy.

PIUS X. (GIUSEPPE SARTO) (1835–1914). Ordained (1858); parish priest until 1875, when made episcopal chancelor; bishop of Mantua (1884–1893); cardinal (1893); chosen to the pontificate (1903). Pius X. abhorred conflict of all sorts, war most of all. One of his last acts was to refuse to bless the cause of Austria in the World War. It is said the pope exclaimed "I do not bless war: I bless peace."

PIUS XI. (ACHILLE RATTI) (1857–1939). Pope since 1922, known as a great scholar, lover of nature, especially of mountain climbing in Switzerland, and as an astute and patient diplomatist. Perhaps the chief event of his reign was the agreement with the king of Italy in closing the Roman Question (1929). He was born near Milan, took doctors degrees at the Lombard college, studied at the Great Seminary, becoming professor of theology for a time in the latter, and for 30 years in Milan directed the work of the Cenacle. His knowledge of languages and books suggested his appointment as classifier of the books in the Ambrosian Library and later as sub-perfect of the Vatican Library. Benedict XV. was his friend and adviser, appointing him a difficult mission to Poland. In 1921 he became archbishop and cardinal of Milan, succeeding Benedict as pope on February 6, 1922.

PLATO (*plā'to*) (c. 428–c. 348 B. C.). Greek philosopher, with Aristotle and Socrates the greatest of ancient times, founder of the celebrated school at the Academy, and the most influential philosophical writer of all times. He came from excellent families in Athens, aspired to be a politician, and in 367 was commissioned to educate the heir to the throne of Sicily. His immediate influence in statecraft, however, was not potent. About 387 he started the Academy, where students were trained in reason, mathematics, and science. Many of the great thinkers of the next age were his pupils; such as Eudoxus, the celebrated mathematician; Speucippus, the scientist (Plato's nephew and successor); Delius, who greatly influenced Alexander the Great; and Archytus, the inventor, a close friend—but possibly not a pupil. Thus Plato was in touch with all learning of his day, both with his predecessors and with his contemporaries. In

all he wrote 40 works on many subjects. The chief treatises have greatly modified or have directed the thinking of the ages. Much of our knowledge of Socrates comes from dialogs of Plato, in which the master appears as one of the speakers. Some of the chief dialogs are: *The Republic,* in which Justice is considered ethically; *Symposium,* a collection of ideas on love; *Phaedrus,* a discussion of rhetoric; *Parmenides,* an argument on philosophy of Parmenides; *Timaeus,* an explanation of the natural world. His longest work, the *Laws,* is a discussion of an ideal state, social relations, and theology. Plato developed the philosophy of idealism of Forms or Ideas, as variously called. All visible things, for instance, are reflections of abstract or ideal forms. We know individual men, but still we have the conception of man in general. We see trees, but have an idea of tree, or the nature of every tree. We have experiences with all sorts of chairs, but have an idea of a chair generally. Thus, for all concrete objects there are ideas, ideal patterns, or spiritual entities. Spirit or the ideal form is the only ultimate reality. Aristotle studied under Plato, but eventually founded the Lyceum, and neglected the philosophy of ideas. Plato ruled in the early ages, till about the thirteenth century, when Aristotle became more and more a formative influence. Augustine continued the doctrines of Plato through the church. In both the sixteenth and seventeenth centuries other Platonic revivals occurred. Plato's Academy continued as a school till 529 A. D., when it was suppressed by Justinian. In literature Plutarch followed Plato. See also under AUTHORS.

PLOTINUS (*plō-tī'nŭs*) (c. 204–270). Leader in Neoplatonism, or the revival of interest in Platonic idealism. His youth was spent in Alexandria, at 39 he accompanied Gordius on an expedition to the East, where Plotinus hoped to study, but his leader was killed, and he barely escaped with his life. After 244 he lived in Rome. Porphyry, who collected the sayings of Plotinus, states that his master was generally beloved. His influence on Christian thinking could not be exaggerated, nor is it extinct today. Emerson was deeply influenced by Plotinus. The latter taught that "There is nothing Yonder which is not also Here.,' All things proceed from spirit, and no soul can be extinguished, though the individual soul may fall into sin. Our world reflects the eternal nature of the world beyond. Truth, Goodness, and Beauty are final values. Plotinus trained many pupils.

POLING, DANIEL ALFRED (1884–). Religious leader, president of the International Society of Christian Endeavor, pastor of the Marble Collegiate Reformed Church of New York from 1923, and editor of the *Christian Herald.* Secretary of the Flying Squadron, which covered every state (1914–15), and leader in various temperance and social service organizations. Wrote, among other works and novels, *What Men Need Most* (1923), *Radio Talks to Young People* (1926), and *Huts in Hell* (1918).

POTTER, HENRY CODMAN (1834–1908). American bishop of the Protestant Episcopal Church and social reformer. He was the son of Bishop Alonzo Potter and nephew of Bishop Horatio Potter, whom he assisted (1883–87), and then succeeded. Previously he held appointments at Greensburg, Pennsylvania, Troy, New York, Trinity Church, Boston, and Grace Church, New York City. At Grace Church he founded clubs for working people, nurseries, and kindergartens, being a leader in the "institutional church movement." He also sponsored the Subway Tavern, which was designed to promote temperance by encouraging the use of light drinks instead of those of heavy alcoholic content. During his administration the cornerstone of the Cathedral of St. John the Divine was laid in 1892. Some of his books like *The Religion of To-day* attracted wide attention.

POWDERLY, TERENCE VINCENT (1849–1924). American labor leader, a native of Pennsylvania, where he worked as a machinist, became president of the Machinists and Blacksmiths Union, and was four times mayor of Scranton on a labor ticket. In 1901 he was admitted to the bar, having been United States Commissioner of Immigration (1897–1902), and from that time was chief of information of the Bureau of Immigration. He wrote *Thirty Years of Labor* and *History of Labor Day.*

PROTAGORAS (*prō-tăg'ō-răs*) (c. 481–411 B. C.). Greek philosopher, leader of the Sophists, those who taught for pay. Pericles commissioned him to frame laws for a new dependency of Athens. In his old age he was convicted of atheism, banished, and lost at sea. He was about the first to organize the study of grammar in a regular system. Sophists at first differed from other educators in striving to prepare their pupils for political and active life. Followers of Protagoras organized learning for the purpose of practical instruction, not merely to ascertain truth, as the philosophers aimed.

PROUDHON (*prö-hôn'*), **PIERRE JOSEPH** (1809–1865). French socialist, who advocated a reduction of government activities, taxes on rent and interest, equality of labor and compensation, and ŏther plans to even the social scales of justice. Though sometimes called an anarchist, he did not believe in violence, but merely what he termed /'a union of order and anarchy." He disagreed with other socialists of France in that he believed changes could be brought out only by long effort and patience, not by sudden or revolutionary schemes. In Paris he was imprisoned for three years for his speeches and agitation.

PUSEY (*pū'zĭ*), **EDWARD BOUVERIE** (1800–1882). English religious leader of the Anglo-Catholic party of the Church of England. Though he did not initiate the *Tracts for the Times* (a series of short papers on doctrine published at intervals), he joined with men like J. H. Newman (q. v.) and Keble in a profound study of the history and principles of the early church. His sermon, *The Holy Eucharist* (1843), raised a tremendous storm, and Pusey was suspended from preaching for two years, but 18,000 copies of the tract were sold. Pusey sought to reconcile the English and Roman Catholic churches. Thus he was a leader of the High Church party, or Tractarianism, or Puseyism, or the Oxford Movement, as the influence was variously called. In 1828 he was appointed professor of Hebrew and Canon of Christ Church, Oxford, holding the latter office for 54 years, till his death. His sermons on absolution, on the real presence in the communion, and on certain portions of Scriptures had important influence on later English theology.

QUAYLE (*quā'l*), **WILLIAM ALFRED** (1860–1925). Methodist Episcopal bishop and author of poems and nature books. He was born in Missouri, educated at Baker University, of which he acted as president from 1890 to 1924. He held important pastorates in Kansas City and Indianapolis, and was elected bishop in 1908. As a preacher and author, he was justly famous for the beauty of his thought and language. Some of his chief books are *The Poet's Poet, Prairie and Sea, The Climb to God,* and *Beside Lake Beautiful.*

QUELCH, HENRY (1858–1913). English socialist, editor, and author; born in Hungerford, Berkshire; organizer of the South Side Labor Protection League; he was prosecuted for connection with strikes; member of Social Democratic Federation; editor of *Justice.*

QUESNEL (*kĕ-nĕl'*), **PASQUIER** (1634–1719). French theologian, one of the followers of Jansen (q. v.), banished from Paris in 1681, lived with the bishop of Orleans four years, and then in Brussels and Amsterdam the rest of his life. In 1703 he escaped from prison at Brussels after being incarcerated for three months. His *Moral Reflections on the New Testament* called forth a papal bull condemning certain passages of that work.

RAIFFEISEN (*raĭf'aĭ-zeŋ*), **FRIEDRICH WILHELM** (1818–1888), German economist; established coöperative savings and loan associations in the country districts of Germany, to save the peasants from the clutches of usurers.

RAIKES (*rāks*), **ROBERT** (1735–1811). English reformer and organizer of the first Sunday Schools. In 1757 he succeeded his father as publisher of the *Gloucester Journal,* and in 1780 started a school at Gloucester, his native town, for the study of the Scriptures and church doctrines. Before his death every corner of England had a Sabbath School.

RASPUTIN (*räs-pō'tēn*), **GREGORY EFIMOVITCH** (1871–1916). Russian peasant religious devotee, who greatly influenced the court of the tsar in the last years of the old régime. He was illiterate, but had a powerful imagination, dominating personality, and magnetic hold over many classes of people. Though he spent some time in various monasteries, he never became learned, had little knowledge of politics, or of the world of culture. Yet his mysticism, doctrine that repentence is at the basis of religion, and freedom from all conventional restraints gained many adherents. He was murdered by a group of men who professed to be actuated by a desire to rid Russia of a dangerous fanatical influence.

REYNOLDS, JAMES BRONSON (1861–1924). American social reformer; born at Kiantone, New York; educated in the leading universities of America and Europe; head worker in the New York University settlement; member of the State Tenement House Commission; afterward special adviser to President Roosevelt on Washington municipal affairs. Reynolds also did important work as a member of the committee appointed to investigate the Chicago stock yards, after Upton Sinclair published his indictment of them in *The Jungle* (1906). He served also as assistant district attorney (1910–13) in New York City, where he practiced law for many years.

RICHELIEU (*rish'ĕ-lō*), **CARDINAL.** See under STATESMEN.

RICHMOND, LEGH (1772–1827). An English divine and religious writer; active in the reforms of his day; best known by his *Annals of the Poor;* his *Dairyman's Daughter* reached, within 20 years after his death, a circulation of 4,000,000 copies in 19 languages; he edited a series of *Fathers of the English Church.*

RIDLEY, NICHOLAS (c. 1500–1555). English martyr, a graduate of Pembroke Hall, Cambridge, of which he became assistant treasurer, after study on the continent. In 1540 he became master of Pembroke Hall, and the following year chaplain to Henry VIII. Two years later he was tried and acquitted on a charge of heresy, in 1547 became bishop of Rochester, and helped to compile the Prayer Book. Having taken the side of Lady Jane Grey, Ridley tried to escape punishment when Mary came to the throne. In prison he defended himself for his religious opinions, refused to recant and was burned at Oxford, with Cranmer and Latimer, on October 16, 1555.

RIIS (*rēs*), **JACOB** (1849–1914). Danish-American philanthropist, journalist, and author. Come to New York in 1868, and became police reporter for daily newspapers, and the experience gained in this occupation led him to devote himself to all phases of social uplift and betterment. Among his literary works, by which he accomplished much, were: *How the Other Half Lives, The Children of the Poor, Out of Mulberry Street, The Battle with the Slums, The Making of an American.*

RIPLEY, GEORGE (1802–1880). American reformer, scholar, and Unitarian minister; a graduate of Harvard. Influenced deeply by the Transcendental movement and a desire to conserve some of the practical results, he founded the Brook Farm social experiment at West Roxbury, Massachusetts, in 1841. Here artists, scholars, poets, and others proposed to devote half-time to their regular pursuits and half to working on the estate with their hands. This was one of many socialistic enterprises in America between 1825 and 1875. Ripley later lived in New York City, and with Charles A. Dana edited *Appleton's Cyclopedia.*

ROBERTSON, FREDERICK WILLIAM (1816–1853). A distinguished English preacher; curate at Winchester, at Cheltenham, and Brighton, is widely known for his printed sermons.

ROGERS, AMES EDWIN THOROLD (1823–1890). English economist; professor of political economy at Oxford; devoted himself to historical research on economic subjects; his *History of Agriculture and Prices* necessitated 20 years of patient study among all kinds of old records.

ROYCE (*rŏis*), **JOSIAH** (1855–1916). American philosopher, educated at the new University of California, where he came under the influence of LeConte, the geologist, and Sill, the poet, turning to literature and philosophy instead of engineering. He completed his education in Germany and at Johns Hopkins, Baltimore. From 1892 to his death he taught philosophy at Harvard, where he became noted for monistic idealism, with highly ethical scientific bearings. Royce deeply influenced many pupils, standing with William James, whose philosophy differed from his, in the relation of close friend and collaborator.

RUSH, BENJAMIN (1745–1813). American physician and one of the founders (1774) of the first anti-slavery society in America. He obtained a medical degree at Edinburgh and spent some time in the hospitals of London and Paris. Started the first dispensary in Philadelphia, and in the yellow fever scourge of 1793 is said to have saved 6,000 lives. Rush Medical College, Chicago, took its name from Dr. Rush. He was one of the signers of the Declaration of Independence, and was a member of the convention which adopted the Federal Constitution. For years he taught medicine at the Philadelphia Medical College and later at the University of Pennsylvania.

RUSSELL, BERTRAND ARTHUR WILLIAM (1872–). English philosopher, who in his *Principles of Mathematics* (1903) sought to prove the similarity or identity of formal logic and pure mathematics. He has also written much on other phases of philosophy and on more practical subjects, always applying the principles of logical relations. He was a graduate of Cambridge University, served a term in jail for obstruction during the World War, lectured in China in 1920, and with his wife later established a school. In 1922 and 1923 he stood for Labour as a parliamentary candidate. Some of his other studies are *Practice and Theory of Bolshevism* (1920), *On Education* (1926), and *Outline of Philosophy* (1928).

RUSSELL, HOWARD HYDE (1855–). American reformer, one of the founders of the Anti-Saloon League, which he served in various capacities. For several years he was a lawyer, a school superintendent, and a pastor. Between 1893 and 1905 organized the League in 36 states. Also founded the Lincoln-Lee Legion, which attained a membership of six millions; was one of the organizers of the World League Against Alcoholism; and visited various countries of Europe in the interest of the temperance movement.

SAGE, MARGARET OLIVIA SLOCUM (1828–1918). American philanthropist, the wife of Russell Sage, the financier, who left her a fortune of nearly $65,000,000 to distribute as she saw fit. During her lifetime she gave away $40,000,000, and at her death left $36,000,000 to be divided among 52 public enterprises. She established the Russell Sage Foundation for the improvement of social conditions of the United States, giving $10,000,000 for this purpose.

SANKEY, IRA DAVID (1840–1908). An American evangelist; associated with the late Dwight L. Moody for some years, attracting and holding the attention of great audiences by singing hymns composed by himself, which are published as *Gospel Hymns, Sacred Songs,* and *Sacred Songs and Solos.*

SAVAGE, MINOT JUDSON (1841–1918). Unitarian clergyman; Congregational pastor from 1864–1873; Unitarian pastorates in Chicago; Church of the Unity, Boston (1874–1896); Church of the Messiah, New York (1896–1906). A voluminous writer on ethical topics as well as editor.

SAVONAROLA (*sa-vō-nä-rō'lä*), **GIROLAMO** (1452–1497). Famous Italian religious and political reformer of noble birth, a member of the Dominican order; by his intense religious zeal and powerful oratory became a prophet to his followers. Political disturbances within Italy followed by French invasion resulted in its control by Savonarola and his party, who aimed to establish a Christian commonwealth. Through too high a standard and his attacks upon the pope, he was forbidden to preach; was imprisoned and tried for heresy and sedition; finally hanged and his body burned. His numerous writings include sermons, poems, religious and political essays.

SCHELLING, FRIEDRICH WILHELM JOSEPH VON (1775–1854). German philosopher, who lectured at Yena (1798–1803), while still under the influence of Fichte and Hegel. Shortly afterward he broke with them and with the idealistic philosophy they advocated. Schelling sought to combine the subject and object, or material and ideal in philosophy. Both nature and spirit he considered equal factors, whereas the followers of Kant, for the most part, considered nature to be a manifestation of spirit. Schelling said that the Infinite is the source of both; so real nature and spiritual or transcendental are both common attributes. From 1806 for a number of years he was secretary of the Academies of Munich, lecturing meanwhile (1820–27) at Erlangen. Later he lectured at Berlin.

SCHLEIERMACHER (*slī'ĕr-mäkĕr*), **FRIEDRICH DANIEL ERNST** (1768–1834). German theologian, who sought to reconcile the diverse systems of Kant and Spinoza. He also opposed strongly the rationalism of his day. For two years he taught at Halle (1804–06), and was one of those instrumental in organizing the University of Berlin, where he held a chair of theology from 1810 to his death. He taught that self-perfection is necessary to social progress, which is the end after all. Moral values are judged by social good or necessity. The highest good is the complete man, all his interests harmonized. Attempting to combine variant and opposing ideas, he is not always convincing, but still aroused no little sympathy.

SCHOPENHAUER (*shō'pĕn-hŏw-ĕr*), **ARTHUR** (1788–1860). German philosopher, the father of modern philosophical Pessimism. His birth, early education, relations with his mother, and solitary life all gave rise to a mental squint that seemed incurable. In Göttingen he read Plato and Kant, heard Fichte and Schleiermacher, but turned within himself for the answer of the riddle of the universe. He at last tried lecturing in Berlin, but Hegel held the favor, and empty benches were his only auditors. *The World as Will and Idea* (1819) is his greatest work. An earlier one, *The Fourfold Root of the Principles of Sufficient Reason* (1813) gained only meager notice. Schopenhauer disputes the claims of both reason and science. Though he began with a realistic foundation, he rose to idealism, in that man can break the bonds of nature and custom. He can indeed free himself by two mean: art and renunciation. By contemplating only the beautiful, man can rise above his ordinary nature, and by refusing to expect too much from life, man can learn to modify his losses and forget many of his pains.

SEBASTIAN (*si-bas'tian*), **SAINT.** A Roman soldier at Narbonne, and martyred under Diocletian when it was discovered he was a Christian; is depicted in art bound naked to a tree and pierced with arrows; and sometimes, with arrows in his hand, offering them to heaven on his knees, he having been first shot with arrows and then beaten to death.

SERRA JUNIPERO (*sĕr'rā*), **MIGUEL JOSE** (1713–1784). Spanish missionary, founder of the first mission in California at San Diego (1769). He was a Franciscan who arrived at Mexico City in 1750, labored among the Indians till he went to California, where he also founded missions at Monterey, which became his headquarters, at San Antonio, San Gabriel, and other places. These he visited on foot, his last journey being about a year before his death at Monterey.

SERVETUS (*sĕr-vē'tŭs*), **MICHAEL** (c. 1509–1553). Spanish doctor and theologian, burned at the stake as a heretic at Champel in Switzerland. He appeared first at Basle in 1530, and published his doctrine of the Trinity the following year. In 1553 he was accused of writing an anonymous book, tried, imprisoned at Geneva, but escaped for several months, and later was recognized and burned. In denying the divinity of Christ and the nature of the Trinity, Servetus offended both Catholics and Protestants. Calvin seems to have furnished evidence that convicted Servetus, but whether with malice or not is not entirely clear.

SHAFTESBURY, ANTHONY ASHLEY COOPER, 7th EARL OF (1801–1885). English reformer and statesman, who was educated at Harrow and at Oxford, entered Parliament in 1826, and succeeded his father as earl in 1851. Throughout his busy life he took a zealous interest in securing better working and social conditions for laborers. In 1846 he resigned his seat as representative from Dorset, largely because of opposition to the bills relating to the Corn Laws. He favored Catholic emancipation, for years fought for a bill limiting hours of labor in factories to ten hours a day, and succeeded at last in 1874 in getting the desired relief. Measures for reform of the coal mining industry were also sponsored by Lord Shaftesbury. He founded some of the Ragged Schools for children in the poor districts of London, several reformatories, Young Men's Christian Associations, philanthropic, and missionary societies. For nearly 60 years he engaged in these and other public and social movements.

SHELDON, CHARLES MONROE (1857–). American clergyman and author, known for his books advocating practical Christianity in daily life. He was a pastor in Vermont, at Topeka, Kansas (1889–1919), save for three years of general preaching, and was chief editor of the *Christian Herald* (1920–25). In 1900 he edited the Topeka *Capital* for one week to show that a daily could be conducted as Christ would wish. Of his many books, some that reached large circulations are: *In His Steps* (1896), *Lend a Hand, A Little Book for Every Day*, and *In His Steps Today* (1923).

SHEPARD, HELEN MILLER (1868–1938). American philanthropist, the daughter of the late Jay Gould, great financier; married Prof. Finley J. Shepard (1913). Identified with various religious and philanthropic works for many years. She gave a library and the Hall of Fame to New York University; $100,000 to the government for war relief (1898), and engaged personally in service in camps; a dormitory to Northfield Seminary; and a building to the naval branch of the Y. M. C. A. in Brooklyn.

SHEPARD, THOMAS (1605–1649). English Puritan divine; silenced for non-conformity, he went to Boston (1635); pastor at Cambridge, where he took active part in founding Harvard College and in Indian missionary work.

SIMPSON, ALBERT B. (1846–1919). Canadian clergyman, founder of the Christian Alliance (1887); incorporated with the International Missionary Alliance (1897) under the name, Christian and Missionary Alliance, of which he was president and superintendent; equipped hundreds of foreign missionaries and maintains a missionary training institute; pastor of Gospel Tabernacle in New York City.

SIMPSON, MATTHEW (1811–1884). Bishop of the Methodist Episcopal Church, known for his oratory and logical preaching. Beginning as a physician in 1833, he was soon licensed to preach; held pastorates until in 1837 he was called to Allegheny College as professor of science; and from 1839 to 1848 acted as president of what is now DePauw University. After editing the *Western Christian Advocate* (1848–52), he was made a bishop, and was always in great demand in American Methodism as preacher, orator, and counsellor. He wrote *A Hundred Years of Methodism* (1876), *Lectures on Preaching* (1879) and edited a *Cyclopedia of Methodism* (1878).

SIXTUS V. (FELICE PERETTI) (1521–1590). Pope from 1585 to 1590 in succession to Gregory XIII., for whom he had conceived a violent dislike, and hence lived in retirement while Gregory was pope. He brought hundreds of robbers to justice, completed or began many important public works, and did much to improve the physical features of Rome. During his reign the dome of St. Peter's was completed, the papal palaces repaired, the aqueduct of Severus restored, and the Pontine marshes partly drained. In diplomacy he was not so skilled, but managed to prevent Philip II. of Spain from causing open rupture with France.

SLATTERY, CHARLES LEWIS (1867–1930). Bishop of Massachusetts since 1927, Protestant Episcopal Church. He was born in Pittsburgh, educated at Harvard, became a priest in 1895, was dean of the Cathedral at Faribault, Minnesota (1896–1907), rector in Springfield, Massachusetts (1907–10), and of Grace Church, New York City (1910–22), when elected coadjutor bishop of Massachusetts. Acted as general chairman, Church Congress, and of the Commission on Revision of the Book of Common Prayer. Lectured and preached at various colleges. Among numerous books, he wrote especially *The Authority of Religious Experience, The Gift of Immortality*, and *Following Christ*.

SMITH, JOSEPH (1805–1844). Founder of Mormonism, was born in Vermont, went with his parents when he was ten to Palmyra, New York, where in 1827 Smith claimed to have unearthed two gold plates on which the *Book of Mormon* was written in "reformed *Egyptian*" characters. Other revelations came from time to time. In 1830 he started his new sect. They moved to Kirtland, Ohio, then Missouri, then to Nauvoo, Illinois, where Smith incited his followers to destroy the plant of a newspaper which had published derogatory statements about the Mormons. He was imprisoned in the jail at Carthage, Illinois, but a mob stormed the place and shot Smith and his brother Hyrum. In 1845 the Mormons moved to Utah.

SMYTH, WILLIAM NEWMAN (1843–1925). American clergyman and author, who raised a stir in 1908 with his book *Passing Protestantism and Coming Catholicism*, in which he favored one great universal church. He was born at Brunswick, Maine, educated at Bowdoin, and studied at Andover Theological Seminary. From 1882 he was pastor of the First Congregational Church of New Haven, Connecticut.

SOCINUS (*sō-sī'nŭs*) **(SOZINI, SOZZINI).** Two theologians, born in Siena, Italy, and precursors of a form of Unitarianism. Lelio (1525–1562), who spelled his name Sozini, visited various cities of central Europe, studied the Bible carefully, and encountered various difficulties as to the resurrection, predestination, and the authority of the original Scriptures. In 1555 he declared himself orthodox. His nephew, Fausto Sozzini (1539–1604) took a more advanced ground, but did not profess to found a sect or school. He lived at Siena, Lyons, Rome, Basle, and (1579–1604) in Poland. For 12 years (1563–75) he conformed to the Roman Catholic Church. During his last years he

wielded a great influence in the anti-Trinitarian movement. Though he drew the line closely between orthodoxy and heresy, he said that Christians had no right to act as civil judges. He opposed all taking of human life, favored a natural instead of a supernatural view of religion, and claimed that the work of Christ is tested in human individuals more than in doctrines.

SODERBLOM (*sō dĕr-blŭm*), **NATHAN** (1866–1931). Archbishop of Uppsala, where he was educated in the university. He was a leader in church unity and prepared the way for the general Christian conference at Stockholm in 1925.

SOLLY, HENRY (1813–1903). Unitarian clergyman (1840); feeling need of social intercourse among workmen, he set himself the task of establishing clubs; traversed entire country to further his idea; formed nearly 3,000 clubs with almost a million members.

SOMERSET, LADY HENRY (1851–1921). British philanthropist and leader in reform movements. She devoted much time to improving the condition of her tenants, many thousands in number. With Frances E. Willard, president of the American Temperance Union, she founded the World Women's Christian Temperance Union and advocated not only temperance but social purity and woman's suffrage. In 1894 she founded the *Woman's Signal*, of which she for years was chief editor.

SPALDING, JOHN LANCASTER (1840–1916). Roman Catholic bishop of Peoria (1877–1908); built St. Augustine's Church for Catholic negroes of Louisville (1869); secretary and chancellor diocese of Louisville (1871); of New York (1872–1877); appointed in 1902 by the president arbitrator in coal strike; author of many essays and reviews upon social, educational, and ethical questions, also poetry of a high order.

SPARGO (*spär'gō*), **JOHN.** See under AUTHORS.

SPEER, ROBERT ELLIOTT (1867–). Religious leader, the secretary of the Presbyterian Board of Missions. He was educated at Princeton, studied at the Princeton Seminary, and took up missionary service in 1891. Visited many parts of the world in the interest of Christian missions, acted on many boards, including the Federal Council of Churches and the Wartime Committee of the Churches.

SPENCER, HERBERT (1820–1903). British philosopher and scientist, educated by relatives, and from early life independent in all his thinking. After a brief period as an engineer and attempts at invention (1837–46), he began to write for the *Nonconformist*, and acted as one of the editors of *The Economist* until freed by a bequest in 1853. During the next few years his philosophy took definite and positive shape. His *Principles of Psychology* (1855), *Essays* (1857), and other occasional writings brought friends who saw to his ordinary needs in life. For years, however, ill health and writing alternated. Of his numerous works, *First Principles* (1862), *Principles of Biology* (1864, 1899) *Principles of Psychology* (1855, 1876), and *Principles of Ethics* (1879, 1882) are of most importance. All Spencer's work is marked by the excess of his virtues—those of clear thinking, freedom from emotion, stolidity, and confidence in his own powers of reason. He was little touched by ordinary life, its affairs, or its emotions. Toward the end, when leaders of all movements had shunned him, he said wistfully, "I am more Tory than any Tory and more radical than any Radical." Perhaps this is why he was at last allowed to fall into neglect: The leaders could see the faults of their own systems magnified in the candid glass that Spencer set up before the public. No man ever remained more true to his own convictions. Though he is incorrigibly logical, his writings often leave one with a sense of special pleading, in which the world is ransacked for "proofs," but rather obvious exceptions and counter indications right at home are generously ignored. Yet his service in trying to survey various realms of scientific speculation can hardly be undervalued.

SPINOZA (*spĭ-nō'zä*), **BARUCH** (1632–1677). Pantheistic philosopher, called by the poet Novelis "the god-intoxicated man." He was a great disciple of the Cartesian system of thought, and even went so far as to state some of his ideas in form of proposition and answer as in mathematics. In 1656 he was excommunicated for heresy. His living came from the trade of grinding optical glass, and his free hours were given to speculation and study. The chief items in his doctrine are: 1, two substances, mind and matter, are attributes of one infinity or God; 2, man is but a mode of that infinity. From these two propositions developed his idea that individual differences should be suspected and probably repressed. The intellectual love of God should eliminate all personal passions, griefs, and anything out of the ordinary.

SPURGEON (*spĕr'jŏn*), **CHARLES HADDON** (1834–1892). English popular preacher, who was ordained in the Baptist denomination in 1851, but late in life (1887) severed his formal connection with the Baptist Union. Beginning at New Park Street Chapel (1853), he soon needed a larger room, and Exeter Hall also proved inadequate, and so in 1861 a huge "Tabernacle" was erected in Newington Causeway, where he preached on Sundays and Thursdays. His discourses sold by hundreds of thousands in printed form. Annual volumes were collected for about fifty years. *John Plowman's Talks* (1869), a book of sayings for "plain people," also gained a wide reading. His sermon on *Baptismal Regeneration* (1864) emphasized his belief that baptism of any type is a mere outward sign of an inward conversion.

STANFORD, JANE LATHROP (1825–1905). American philanthropist, wife of Leland Stanford (1824–1893), business man and political leader in the early days of California. She was born at Albany, New York, where she endowed a hospital for children. Before the death of Mr. Stanford, they had founded a university at Palo Alto, California, in memory of their deceased son, Leland Stanford Junior. Altogether they gave over $30,000,000 in cash, lands, and securities to the endowment of Stanford, which at the time (1901) was the wealthiest in America.

STANLEY, ARTHUR PENRHYN (1815–1881). Widely known as Dean Stanley. An English scholar and divine; professor of ecclesiastical history in Oxford, and published lectures on the Eastern Church, the Jewish Church, the Athanasian Creed, and the Church of Scotland; accompanied the Prince of Wales to the East in 1862, and became dean of Westminster (1864); wrote *Historical Monuments of Westminster Abbey* and *Christian Institutions*.

STANTON, ELIZABETH CADY (1815–1902). Leader of the woman's rights movement in the United States. While studying in the law office of her father, Judge Daniel Cady, at Johnstown, New York she earned of many disabilities falling upon women in regard to the holding of property, rights over children, and other legal limitations. By petition (1848) she secured a law in New York giving women property rights. In the same year she called the first woman's rights convention at Seneca Falls, New York. At this time she labored with Mrs. Lucretia Mott, and later with Susan B. Anthony. From 1865 to 1893 she was president of the National Woman Rights Association. With Miss Anthony and Matilda Gage, she wrote *History of Woman Suffrage* (1887–1902).

STEAD, WILLIAM THOMAS (1849–1912). English journalist and reformer, editor of the Darlington *Northern Echo* (1871–80), assistant (1880–83) and editor (1883–89) of the *Pall Mall Gazette*, and then founder and editor of the *Review of Reviews* till his death. He went down in the ship *Titanic*. For years he carried on an energetic campaign, one result of which was a modification of the Criminal Law in England. He was also interested in spiritualism, advocated universal peace, better working conditions in industry, and numerous other causes. Besides his journalistic articles, he wrote many books which caught the popular attention, like *The Truth about Russia* (1888), *If Christ Came to Chicago* (1893), and *The Americanization of the World* (1902).

STELZLE, CHARLES (1869–). Clergyman and leader of movements toward conciliation in industry. From 1885 to 1893 he was in the mechanical department of R. Hoe and Company, manufacturers, New York City, then he entered the ministry, and held pastorates for ten years. Superintendent of church and labor department, Presbyterian Church (1903–13); field secretary Federal Churches of Christ in America (1916–18); organizer of the Labor Temple, New York (1910–12); arbitrator of disputes in New York newspaper offices from 1913; and publicity director for many religious and social agencies. Some of his works are *Boys of the Street* (1904), *Principles of Successful Church Advertising* (1909), *American Social and Religious Conditions* (1912), and *Why Prohibition?* (1918).

STONE, LUCY (BLACKWELL). American reformer, who married Dr. Henry B. Blackwell (1824–1909), who agreed with her that she should retain her original name Through her own efforts she worked her way through Oberlin College, and immediately went

on the lecture platform in favor of woman's suffrage and against slavery. For years she was a powerful lecturer. Her husband assisted her in starting and editing the *Woman's Journal* of Boston. Campaigned in various states for a suffrage amendment.

SUNDAY, WILLIAM ASHLEY (1863–1935). Evangelist. Billy Sunday, as he has usually been known, was born in Ames, Iowa, and was educated at the Nevada High School, Iowa. From 1883 to 1890 he played professional baseball with the Chicago, Pittsburgh, and Philadelphia National League team; from 1891 to 1895 he was assistant Y. M. C. A. secretary in Chicago; after which he engaged continually in evangelistic campaigns. His earnest, unconventional attitude toward sin and salvation made him wonderfully successful in mass campaigns, and for several years over 1,000 persons a month expressed themselves as making decisions in his meetings.

SUTTNER, BERTHA, BARONESS VON (1843–1914). Austrian writer and peace advocate, daughter of Count Franz Kinsky, and wife of the novelist Arthur von Suttner. Many of her tales and articles denounce war, and she founded the Austrian Society of Peace-Lovers (1891), which had a powerful influence in her country. Awarded the Nobel peace prize in 1905.

SWENDENBORG (*swē'dĕn-bôrg*), **EMANUEL** (1688–1772). Swedish natural philosopher and mystic, the founder of the Church of the New Jerusalem or Swedenborgian sect. His writings, mainly in Latin, only in the last few decades have been duly appreciated. In science and speculation he was much in advance of his age, especially in certain theories of the physiology of the brain and its functions. Toward middle life he left scientific research and was inspired by many "visions" as he believed them to be. He studied Hebrew anew, spent much time in deep meditation, and wrote commentaries on the Scriptures. He believed that love is a chief attribute of God, who dwells in man individually, and that there are three degrees,—love, wisdom, and end. In his theology he sought to combine love and wisdom, but he did not design to found a separate denomination. *Divine Love and Wisdom* is the most read now of his numerous volumes.

TALMAGE, THOMAS DE WITT (1832–1902). American minister and religious writer, a graduate of what is now New York University and of the Reformed Dutch Seminary at New Brunswick, New Jersey. He held pastorates in Syracuse, Philadelphia, Brooklyn, and finally Washington, D. C. For years he exerted a wide influence as editor of the *Christian Herald*.

TAYLOR, GRAHAM (1851–). Founder and resident warden of the Chicago Commons Social Settlement, professor of social economics, Chicago Theological Seminary, from 1892, president of the Chicago School of Civics and Philanthropy (1903–20). He was born in New York, graduated at Rutgers College and at the Reformed Theological Seminary, Rutgers, New Jersey. From 1873 to 1892 he was a pastor, and from 1888 to 1892 professor of practical theology at Hartford Theological Seminary Interested in many social and reform movements. Author of *Religion in Social Action* (1913) *Pioneering on Social Frontiers* (1930).

TAYLOR, JEREMY. See under AUTHORS.

TAYLOR, WILLIAM (1821–1902). Bishop of Africa in the Methodist Episcopal Church (1884–1902). He was born in Virginia, ordained in 1842, went to California in 1849, and spent five years (1856–1861) in Canada and the East, before going to Africa a pioneer missionary. He served at various stations and after he became bishop established 36 mission centers in Central Africa. On his official tours he also visited every English-speaking people in the world.

THERESA, SAINT (TERESA DE CEPEDA) (1515–1582). Spanish nun, founder of the order of the Descalzos or Barefoot division of the Carmelites. She sought to restore the older austerities, had many visions, and lived a life of extreme piety and self-renunciation. She founded 16 convents and 14 monasteries of her order, and by request of her superiors wrote an interesting autobiography. *The Way to Perfection* and *The Castle of the Soul* are two accounts of aspiration toward God.

TINGLEY, KATHERINE (1852–1929). Theosophist leader and head for life of the Universal Brotherhood and Theosophical Society, with branches throughout the world. Successor of Madame Blavatsky and W. Q. Judge. Traveled in various parts of the earth, founding schools at Point Loma, California, in Cuba, and in Sweden, hospitals at Spring Valley, New York, Montauk Point, New York, Manila, and Cuba, especially during the Spanish-American War. Editor of the *Theosophical Path* and other publications. Founded a university at Point Loma, California (1919).

THALES (*thā'lēz*) (c. 650 B. C.). Called the father of Greek philosophy and one of the seven sages of Greece. Much of his thought came from Egypt and the East, but he made many advances over the science of the older ages. In geometry, navigation, and astronomy he made interesting calculations and theories. He believed that all things come from water.

THOMAS, NORMAN MATTOON (1884–). Christian socialist leader, who was born at Marion, Ohio, educated at the Union Theological Seminary in New York, and for a number of years (1910–18) held pastorates in the Presbyterian Church. Founder and editor of *The World To-Morrow;* secretary of the Fellowship of Reconciliation; associate editor of *The Nation* (1921–22), and director of the League for Industrial Democracy. He is perhaps better known for his speeches as a candidate for governor of New York on the socialist ticket (1924), for mayor of New York City (1925) and for president of the United States (1928).

TOME, JACOB (1810–1898). An American philanthropist, born in Manheim township, York County, Pa.; went to Port Deposit, Md., in 1833. In 1884 he presented to Dickinson College a valuable building for scientific uses. His largest gift was for the foundation of the Jacob Tome Institute, at Port Deposit, $1,600,000, a sum that was increased by his will more than $3,500,000. He died in Port Deposit, Md.

TRUEBLOOD, BENJAMIN FRANKLIN (1847–1916). A graduate of Earlham College, who was president of Wilmington, Ohio, College (1874–79) and then of Penn College of Oskaloosa, Iowa (1879–90). For 19 years secretary of the American Peace Society, Boston and Washington, D. C., and editor during the same period (1892–1915) of the *Advocate of Peace*. Active in many reform movements, and wrote *The Federation of the World* (1899).

TUCKWELL, GERTRUDE MARY (1862–). English Christian socialist, a justice of the peace and advisor to the government on list of suitable women to act as justices. She was an elementary schoolmistress (1885–92), honorary secretary to the Woman's Trade Union League (1892–1904), and served on various committees of the Ministry of Reconstruction (1905–23). Edited *Life of Sir Charles Dilke* and wrote *The State and its Children* and *Workers' Handbook*.

TYSON, ROBERT (1845–1917). English political economist and social reformer; born in Canterbury; removed to Toronto, Canada, in 1870; worked in a machine shop as a boy; advocated vigorously in the cause of single tax, then for direct legislation and proportional representation; was the advocate of electoral reform; newspaper reporter and editor; writer.

ULFILAS (*ŭl'fĭ-lăs*) (about 311–about 381). The apostle and bishop of the Goths; labored among the Goths for over 30 years; preached and wrote in Greek, Latin, and Gothic; his translation of the Bible into Gothic is the beginning of all German literature; he omitted the books of Samuel and Kings, for he considered that they were too vivid a picture of war to present to his fierce countrymen.

VINCENT DE PAUL, SAINT (1576–1660). French priest, the founder of the Congregation of Missions and of the Sisters of Charity. He became a priest in 1600, was captured and held as a slave in Tunis by Barbary pirates, until he converted one of his masters, an Italian, with whom he escaped to Europe. After acting as a tutor, he obtained great success in his missions among the peasants of France. In Marseilles he founded a hospital for galley slaves and two orphanages in Paris. Clement XII. canonized him in 1737.

VINCENT, JOHN HEYL (1832–1920). Bishop of the Methodist Episcopal Church and principal founder of the Chautauqua movement at Chautauqua Lake, New York (1874), of which he acted as president for many years. He was aided by Lewis Miller and the Studebakers of South Bend, Indiana. Bishop Vincent was also a leader in the Sunday Schools of his denomination, acting as editor at various times of important publications in this field.

WATTS, ISAAC (1674–1748). English clergyman and writer of 600 hymns. From 1702 to 1712 he was pastor of Mark Lane Chapel, but was forced to retire because of poor health. Afterward he wrote a good deal on educational and religious subjects. Some of

his books are *Logick* (1725), *The First Principles of Geography and Astronomy* (1726), *Doctrine of the Trinity* (1722), *Essays on the Freedom of the Will* (1732).

WEBB, BEATRICE (1858–). English social economist, daughter of Richard Potter, once president of the Great Western Railway of England and the Grand Trunk Railway of Canada, and wife of Honorable Sidney Webb (q. v. below). She has served on many labor and government boards, investigated conditions in industry, and written numerous works. Justice of the Peace for London (1919–27). Author, besides others, of *The Coöperative Movement in England* (1891), *Men's and Women's Wages: Should they be Equal?*, and seven standard books, with her husband, on various phases of labor and industry.

WEBB, SIDNEY (1859–). English economist and sociologist, educated at City College, London. Held various city and government offices (1875–91), member of the Faculty of London University; of the Royal Commission under Development Act (1910–12), serving without salary; Coal Commission and various others at different times (1903–20). Author of many books, all treating on labor and industry, some of which are *Socialism in England* (1890), *The Eight Hours' Day* (1891), *Grants in Aid* (1911), *The Works Manager Today* (1917), and with his wife, Beatrice Potter Webb (q. v.), *The History of Trades Unionism* (1894), *History of Liquor Licensing* (1903), *English Prisons under Local Government* (1922), *Consumers Coöperative Movement* (1921), and others. See also under AUTHORS.

WESLEY (*wĕs'lĭ*), **JOHN** (1703–1791). English clergyman whose work and influence led to the establishment of the Wesleyan or Methodist Church of England and the Methodist Churches of America. He was the son of Samuel Wesley, rector of the church of England at Epworth. He was educated at Charterhouse School in London, Christ Church College, Oxford, and ordained in 1725. After acting as curate to his father (1727–29), he spent six years as a tutor at Lincoln College, Oxford. Here, Charles, a younger brother (1707–88), had been leader in a small undergraduate group, who observed all rules of the church, and were dubbed "Methodists" because of their strict methods. John became a leader of this small company, which numbered about a score, including the celebrated Whitefield (q. v.). After his father's death in 1735, both brothers were sent to Georgia of the American Colonies by the Society for the Propagation of the Gospel. Here they labored with great zeal. Charles there published the first of his great hymns (1737), the *Collection of Psalms and Hymns*. In 1738 Wesley came for a time under the influence of the Moravians and visited a settlement at Herrnhut, and in 1838 his second "conversion" occurred at Aldergate Street Church in London. From this time Wesley went about everywhere preaching, growing more and more popular till his death. He spent more than six years in Ireland, and made 22 journeys to Scotland. In 1784 Wesley declared in favor of a new conference, and hence Methodism arose. Previously (1768) a church had been started in New York City, and three years later Asbury went out to America. In 1784 Wesley ordained his assistant, Dr. Coke, superintendent or bishop in America. Wesley's *Journal*, reëdited in 1909, throws much light on his life and times.

WHITMAN, MARCUS (1802–1847). American pioneer and missionary; with his wife and three other missionaries took the first wagon across the Rocky Mountains to Washington (1836). He secured the Oregon territory for the United States (1842–1843).

WHITEFIELD (*hwhĭt'fēld*), **GEORGE** (1714–1770). English religious leader, associated with Charles Wesley at Oxford, and with John Wesley in the Georgia mission (1738). After remaining in America three months, he returned to England and received orders, but many clergymen shut him from their churches, whereupon he took to preaching before great audiences in the fields. At times ten thousand or more persons heard him; for his voice was powerful and his manner exceedingly dramatic and forceful. He toured England, Scotland, and Ireland several times, and established a preaching center in London (1756). He was in America from 1744 to 1748, and in 1769 came for the seventh time. He died suddenly and is buried at Newburyport, Massachusetts.

WILBERFORCE, WILLIAM (1759–1833). Founder of the English anti-slavery society; born at Hull, England; member of the House of Commons; framed the abolition of slavery bill which was passed one month after his death; was interested in many other reforms and philanthropies.

WILLARD, FRANCES ELIZABETH (1839–1898). An American temperance reformer; born in Churchville, near Rochester, N. Y. After some years spent in teaching she became professor of esthetics in the Northwestern University, and was made dean of the Woman's College in February, 1871. She began her active temperance work in 1874, and was made secretary of the National Woman's Christian Temperance Union. In 1879 she was made president of that organization and held the office till her death. She was chosen as president of the World's Christian Temperance Union in 1888, and in 1892 visited England as the guest of Lady Somerset, the well known temperance worker. She was an orator of great eloquence, humor and power. Her executive ability and genius for organization were wonderful, and her work for temperance and social purity will live in the history of her country. She died in New York City.

WILLIAMS, GEORGE (1821–1905). Founder of the Young Men's Christian Association, an English merchant, was born in Somersetshire, but after 1841 lived in London. He entered the dry goods business; persuaded some of his employees to organize a prayer meeting; and in 1844 he and eleven others named their group the Young Men's Christian Association. Through his good offices Exeter Hall became headquarters. From 1863 to 1885 he was treasurer and then president of the Association. Queen Victoria made him a knight in 1894.

WISE, STEPHEN SAMUEL (1872–). Rabbi and sociologist, a graduate of the College of the City of New York, and pastor of the Fifth Avenue Synagogue (1893–1900), then at Portland, Oregon (1900–06), and founded the Free Synagogue, New York, in 1907. He was a leader in the Zion movement, commissioner of child labor of Oregon, member of many Jewish relief committees, director of the Peace Society of New York, and an inspiring preacher. Besides volumes of sermons he wrote *How to Face Life* and *Child Versus Parent*.

WISEMAN (*wĭz'măn*), **NICHOLAS PATRICK STEPHEN** (1802–1865). An English Roman Catholic prelate; ordained to the priesthood in 1825; made professor of oriental languages in the University, and rector of the English College of Rome until 1835, when he returned to England, where he became noted as a preacher and lecturer; created by the pope a bishop in partibus (1840); made vicar apostolic of the London district (1849); and in 1850 Roman Catholic Archbishop of Westminster and a cardinal. His principal works are *Lectures on the Connection between Science and Revealed Religion*, *The Real Presence*, *Lectures on the Catholic Hierarchy*, *Recollections of the Last Four Popes*, and *Sermons on Our Lord Jesus Christ and His Blessed Mother*.

WOLFF, CHRISTIAN (1679–1754). German philosopher and scientist, who advocated the testing of religious dogma by mathematical and strictly logical formulas. His statement that the doctrines of Confucius show how human reason can rise through its own efforts to morality brought forth a storm from the orthodox Lutherans; he was expelled from Prussia, but established himself at Marburg, where he became popular. Frederick the Great recalled him to Halle (1740), but his influence no longer was potent.

WOLFF, HENRY WILLIAM (1840–). Leader in the coöperative movement, especially in agriculture and industry, one of the founders and president until 1907 of the International Coöperative Alliance. Adviser to the Indian and Irish governments on agricultural organization. Some of his writings are *Employers' Liability*, *Coöperation Banking*, and *Coöperative Credit in the United States*.

WOLSEY (*wŏŏl'zĭ*), **THOMAS** (c. 1475–1530). English cardinal and statesman, who rose rapidly (1500 to 1514) through various offices until he became Archbishop of York. Leo X. created him a cardinal in 1515. As adviser to Henry VIII. he is best known now. Wolsey directed the plans for the war against France, went on embassies, acted as a private prime minister to the king, and went to Amiens in 1527 to conclude peace. He incurred the displeasure of Henry in 1529 because of delays in obtaining the king's divorce from Catherine of Aragon, was indicted but pardoned, and in the following year was arrested for high treason. Wolsey died on the way to London to answer the charges.

WOOLLEY, JOHN GRANVILLE (1850–1922). American reformer, candidate for the presidency on the

Prohibition ticket (1900), and later prominently identified with the Anti-Saloon League. He was a graduate of Ohio Wesleyan University (1871) and practiced law (1871–86). Once an intemperate man, he felt impelled (1888) to give most of his time to lecturing and campaigning against strong drink. Edited the *New Voice* (1899), and wrote, among other works, *Temperance Progress in the 19th Century* (1903).

WOOLMAN, JOHN (1720–1772). Philanthropist; abolitionist; Quaker; began by teaching the neglected children of the poor; his journal has been published with an introduction by Whittier; he died of smallpox in England.

WORCESTER (*wo͝os'tĕr*), **ELWOOD** (1863–1940). Originator of the Emmanuel Movement in religious therapy. He obtained a Ph. D. at Leipzig (1889), was professor of philosophy at Lehigh University (1890–96), and then rector in Episcopalian Churches, mainly in Philadelphia (1896–1904), and subsequently in Boston at Emmanuel Church. There he instituted clinics for the discouraged, depressed, and ill, on the theory that such troubles are almost wholly mental, yet he sent to physicians those suffering from severe maladies. Some of his works are *Religion and Medicine* (1907), *The Christian Religion as a Healing Power* (1909), *The Issues of Life* (1915).

WUNDT (*vunt*), **WILHELM MAX** (1832–1920). German philosopher and scientist, who studied medicine at Tübingen, Heidelberg, and Berlin, began to lecture at Heidelberg in 1857, became assistant professor there in 1864, and professor at Leipzig in 1875. Combining his knowledge of anatomy with his training as a thinker, he established a laboratory for experimental psychology, which was a leader in this field. He was the author of many books.

WYCLIF (WYCLIFFE), JOHN (c. 1320–1384). An English patriot and reformer; in 1360 became master of Balliol College, and for a while was royal chaplain; translated the Bible into English; was repeatedly arraigned for heresy, and finally prohibited from teaching in the University; retired to his rectory of Lutterworth. His buried remains, by order of the rival pope, Clement VIII., were disinterred, burned, and the ashes cast into the Swift, a branch of the Avon River.

XAVIER (*zăv'ĭ-ẽr*), **SAINT FRANCISCO DE** (1506–1552). With Ignatius Loyola the founder of the Society of Jesuits (1534). Three years later he became a priest, remained in Rome for several years, and then went for ten years on missionary journeys to Malaysia, Japan (1549–51), and other eastern countries. China refused him admission. He won thousands to Christianity.

XENOPHANES (*zẽ-nŏf'ă-nẽz*) (fl. 540–480 B. C.). Founder of the Eleatic school of philosophers, for a time lived in exile in Sicily, having been driven from his home in Ionia, and then went to Elea in southern Italy. In poetic hexameters he sang of reason as opposed to mere athletic prowess, declared in favor of unity in the world, a unity like God in the modern thought. He also emphasized the smallness of man and the importance of the earth in growth.

YALE, ELIHU (1648–1721). A native of Boston, he went to the East Indies as a trader (1672), and was governor of Ft. Saint George, Madras (1687–92). In 1701 a collegiate institute had been founded at Killingly and Saybrook, Connecticut. After it was decided to move this to New Haven, Yale contributed a cargo of goods from India, which was sold for nearly $4,000 at Boston, and the college for the first time at commencement 1718 was given his name.

YERKES, ROBERT MEANS (1876–). American experimental psychologist, who developed various theories as to the behavior of animals; specialized in the anthropoid apes, and published many research papers on a variety of topics. He was educated at Ursinus College and at Harvard, taught at Harvard and Minnesota, and in 1923 became professor of psychology in the Institute of Psychology at Yale University. From 1919 to 1924 he acted as chairman of research service of the National Research Council.

YOUNG, BRIGHAM (1801–1877). Second president of the Mormon Church, or Church of Jesus Christ of the Latter Day Saints, and founder of the state of Utah. He was active in promoting agriculture; founded the University of Deseret and other schools; was interested in the construction of railroads and the prime mover in building the celebrated Mormon Temple. He displayed remarkable efficiency in organizing and consolidating the Mormon Church.

ZENO (*zẽ'nō*) (c. 340–270 B. C.). Founder of the Stoic philosophy, so named because he taught in the painted porch, a place where the poets had met, *stoa* being the Greek name for porch. He studied in all schools, allied himself with the Cynics, but looked back to Socrates as a master. He emphasized reason, but in general was materialistic.

ZENO OF ELEA (fl. 500 B. C.). Greek philosopher, a native of Elea in Italy, and a disciple of Parmenides, with whom he went to Athens. Through a series of paradoxes, he sought to prove that the doctrine of "the Many" is impossible, and that "the One" is the only infinite being. Plato and later philosophers were deeply impressed by his teachings.

ZINZENDORF (*tsĕn'tsĕn-dôrf*), **NIKOLAUS LUDWIG VON, COUNT** (1700–1760). A German count; established the religious community of Herrnhut on his estate in Saxony, consisting chiefly of a body of Moravian brethren who had been driven out of Bohemia and Moravia, called Herrnhuters, of which he became one of the leaders and chief apostles; author of more than 100 works in prose and verse.

ZOROASTER (*zō'rō-ăs-tẽr*), **ZARATHUS'TRA** or **ZER'DUSHT** (660–583 B. C.). The founder or reformer of the Parsee religion. Though certainly a historical personage, nothing whatever is known except that his family name was Spitama, that he was born in Bactria, and that he could not have flourished later than 580 B. C.

ZWINGLI (*ts-wĭng'lẽ*), **ULRICH** (1484–1531). Swiss reformer, who preached the simple Gospel, opposed many of the older forms of the church, and gained a great following. Becoming a priest in 1506, he ministered at Glarus, was chaplain of Swiss troops, then was at Einsiedeln, and in 1518 went to Zürich. This district through his preaching, public debates, and interpretations of Scripture, became Protestant, though he strongly disagreed with Luther, mainly over the communion. In 1531 civil war broke out between his canton and the five others of Switzerland, and he died in battle.

ABBAS I. (*ăb-bas'*), **THE GREAT** (1557–1628). Persian monarch; came to the throne (1586); victorious over the Uzbeks at Herat (1597); won many battles from the Turks (1601–1609); drove the Portuguese from Ormuz (1622). He is noted for his many important reforms.

ABD-UL-HAMID II. (*ăb'dul hä-mĭd*) (1842–1918). Thirty-fourth sultan of the Ottoman Empire (1876–1909). In 1877 Russia declared war on account of the Bulgarian outrages. England alone saved Turkey. The Treaty of San Stefano was modified by the Berlin Congress, but Turkey lost Montenegro, Serbia, Roumania, Bulgaria, and Herzegovina. The Armenian outrages (1895–1896) again roused Europe, but the sultan skillfully played off one European power against another and nothing was done. In 1897 Crete rebelled, and secured by the aid of foreign powers some degree of autonomy. In 1908 the sultan was forced by the "Young Turk" party, whom hitherto he had treated as rebels, to sign a constitution assuring representative government in place of autocratic rule. Deposed April 26, 1909.

ADAMS, CHARLES FRANCIS (1807–1886). American diplomatist, son of John Quincy Adams; was graduated at Harvard (1825); editor the Boston *Whig* (1846–1848); Free Soil candidate for vice-president (1848); minister to England (1861–1868); member of Geneva Court of Arbitration to settle Alabama Claims.

ADAMS, JOHN (1735–1826). Second president of the United States, born of Scotch ancestry at Braintree (now Quincy), Mass., was graduated from Harvard in 1755; taught school for a time, and entered politics as a leader of the Whigs of his state after he had been admitted to the bar. He opposed the Stamp Act in writings and speeches in 1765. Moving to Boston in 1768 he served in the House of Representatives of Mass., in the Revolutionary Congress, where he stoutly defended the rights of his countrymen, and finally was one of the signers of the Declaration of Independence. He took the unpopular side in defending the British captain and soldiers who fired on and killed four of the people in the "Boston Massacre" (1770). With Franklin and Arthur Lee, he served as a commissioner to France in 1778, and as minister to Holland, helping to secure recognition in both countries. Adams was minister to England (1785–88); vice president (1788–96); and president for one term, till 1800. Failing of reëlection he retired to Quincy, and died July 4, 1825, on the fiftieth anniversary of the signing of the Declaration of Independence. His opponent, Thomas Jefferson, died on the same day. Adams was an able statesman, patriotic and energetic, but subject to limitations which made his own party distrust him.

ADAMS, JOHN QUINCY (1767–1848). Sixth president of the United States, son of John Adams, second president (q.v.). Born in Quincy, Mass., he was named for his maternal grandfather, John Quincy, who for years sat in the state legislature. In 1778 and in 1780 he accompanied his father to Europe, studying a year in Paris and for a time at the University of Leyden, Holland. He then began to keep the diary which remains as a monument of many years of his life and throws much light on contemporary men and manners. In 1787 he finished his course at Harvard, became a lawyer in 1790, wrote some papers in reply to Thomas Paine's *Rights of Man*, supported the government in a neutral policy toward Europe, and in reward was made minister to the Hague by Washington in 1794 and in 1796 to Portugal, but his father sent him to Berlin (1797), before he began his residence at Lisbon. On the election of Jefferson to succeed the elder Adams, John Quincy was recalled at the close of his father's term as president. After a year in the Massachusetts senate, Adams went to the U. S. Senate in 1803, but because he left the Federalists and voted with the Republicans he was not reëlected in 1808, resigning before the end of his term. He was among those who nominated Madison, a Republican, for the presidency. J. Q. Adams served as professor of rhetoric at Harvard for a time; then was minister to Russia, and later helped negotiate the treaty of Ghent in 1814; acted as secretary of state from 1817 and did much to formulate the Monroe Doctrine and to purchase Florida from Spain. With Clay, Crawford, and Jackson he was a candidate in 1824, receiving only 84 votes to 99 for Jackson, 41 for Crawford, and 37 for Clay. Yet the Clay votes were turned in his favor in the election by the House, and he became president. His term of four years was not notable, owing to opposition and lack of opportunity. The most notable part of his career is his term in the House from 1831 to his death in 1848. He opposed slavery for many years, succeeded in getting the House rules made more liberal, and engaged in many fiery debates. His eloquence was proverbial, and he served ably till he fell insensible on the floor of the House on Feb. 21, 1848, dying two days later.

ADAMS, SAMUEL (1722–1803). Called the Father of the Revolution, and the Man of the Town Meeting. Through his influence the idea of resisting the legislation of parliament with regard to the Colonies took shape; he engineered the Boston Tea Party, and by his speeches and letters to the press, he gained a wide following. General Gage attempted to capture him and Hancock at Lexington, on April 18 and 19, 1775, and his proclamation of amnesty of all rebels on June 12 excepted these two men. In the Continental Congress, 1774–1781, he sought unity against the British government. He was a member of the Massachusetts Constitutional Convention, signed the Declaration, was lieutenant governor five years, and governor of Massachusetts from 1794 to 1797.

AGESILAUS (*ă-jĕs-ĭ-lā'ŭs*) (about 444–360 B. C.). King of Sparta (401–360). Commander-in-chief of Spartan forces in Asia Minor during the Persian War (397); led the forces against Athens, Thebes, and other states in Greece (394); led an expedition against Egypt (361), and died on his way home.

ALBERT or ALBERT FRANCIS AUGUSTUS CHARLES EMMANUEL, PRINCE OF SAXE-COBURG-GOTHA (1819–1861). Husband of Queen Victoria and known as the Prince Consort; married Victoria, February 10, 1840. He attained an important place as a statesman and accomplished much good. His last official act was the prevention of war between England and the United States over the Trent affair.

ALBERT I. (1250?–1308). Archduke of Austria and emperor of Germany; was the son of Rudolph I. On the death of Rudolph in 1291 Albert hoped to succeed to the throne, but on account of his reputation for tyranny was passed over and Adolph was chosen. In 1298 Adolph so disgusted the princes that he was dethroned and Albert was made king. They met in battle near Worms and Adolph was slain. Pope Boniface VIII. claimed that he alone was emperor, but Albert forced him to terms and conducted several foreign wars unsuccessfully. Albert was assassinated by his nephew, John, in 1308.

ALBERT I. (1875–1934). Third king of the Belgians, nephew of King Leopold II. of Belgium, became king on the death of Prince Leopold and Prince Baldwin, his cousin and his brother respectively. He was carefully educated, traveled widely, became king on Dec. 1, 1909. He said then "Our prosperity depends on the prosperity of the masses," and he sought to preserve peace. At the opening of the World War he reminded Germany of the neutrality of Belgium, and, when this was violated, he took the field in person, and later served as commander of the French and Belgian northern army corps. After the War he fostered colonial development, education, and the happiness of his people. He and the queen, Princess Elizabeth of Bavaria, from 1914 to 1918 and later, notably in the great flood of 1925, gave heroic service to their people.

ALBERT II. OF GERMANY AND V. OF AUSTRIA (1397–1439). In 1437 he was elected king of Bohemia and of Hungary to succeed his father-in-law, Emperor Sigismund. In March, 1438, he was elected ruler of Germany. Wars with the Turks and rebellions in Bohemia and Hungary marked his short reign.

ALEXANDER THE GREAT (356–323 B. C.). Known as the Great. King of Macedon and conqueror of Greece, having laid waste the city of Thebes, crossed into Asia with about 35,000 men, defeated the strong Persian armies, and made himself master of most of the East. After his first success at Granicus, he lay for a time at Gordium in Northern Phrygia, where he cut the "Gordian knot" on the chariot of the Phrygian king Gordius as a symbol that he would proceed in his victorious march. Then he passed through Cilia, where he narrowly escaped death of fever, marched past the Persians in the mountains, who sought to cut his rear, but he defeated and scattered them at the battle of Issus. Then he occupied Syria and Phoenicia, and finally Egypt in 332, where he was hailed as a god by the priests of Ammon. In the spring of 331 he marched across

Mesopotamia to meet Darius, the Persian monarch, at the battle of Arbela, and finally he reached India in 327, after various minor campaigns en route. Leaving the conquered part of India to others, he started to return to his base, encountering opposition and discontent of his troops. Finally, on reaching Babylon, intending to make further explorations and conquests near by, he suddenly took a fever, and after about 11 days died. His kingdom split up soon, and the conquered nations again resumed their former independence. Later he became the subject of many legends, poems, and prose stories.

ALEXANDER I., PAULOVITCH (1777–1825). Czar of Russia (1801–1825). Son and successor of Paul I., who was the son of Catherine II. At first friendly to Napoleon, he later opposed him; made peace with him in 1807; broke it and Napoleon invaded Russia in 1812. Alexander then joined England and Prussia and with them invaded Paris (March 31, 1814); joined Austria and Prussia in the "Holy Alliance" after Waterloo (1815). He was succeeded by Nicholas I.

ALEXANDER II., NIKOLAYEVITCH (1818–1881). Czar of Russia (1855–1881). Son and successor of Nicholas I. Ascended the throne during the Crimean War; compelled to sign the humiliating Treaty of Paris (1856); freed all the slaves or serfs in his kingdom (1858–1861), over 23,000,000 people; sold Alaska to the United States (1867); fought a successful war against Turkey (1877–1878); had great trouble with Nihilists and was assassinated by them in the streets of St. Petersburg (1881). Alexander III. succeeded him.

ALEXANDER III., ALEXANDROVITCH (1845–1894). Czar of Russia (1881–1894); not crowned until 1883 for fear of the Nihilists, against whom he made strict and severe laws; the persecutions of the Jews began in his reign; Russia and France were forced into friendship in opposition to the Triple Alliance of Germany, Austria, and Italy. He did much to strengthen the army and navy. Nicholas II. succeeded him.

ALEXANDER I. (1876–1903). King of Serbia, succeeded his father, King Milan, who abdicated in 1889, acting as regent till he was in his 17th year. In 1894 he abolished the liberal constitution by restoring a conservative one of 1869. He married a widow, Draga Mashin, while his father was negotiating an alliance with a German princess, and in 1901 granted a liberal constitution. While rumors persisted that he was to proclaim his brother-in-law heir apparent, he suspended the constitution for half an hour, turned out the old ministers, and appointed a new set favorable to his policies. A conspiracy was formed, and the king and queen were killed in their palace on June 11, 1903. King Peter, of another dynasty, succeeded.

ALEXANDER SEVERUS (208–235). Last of the Syrian emperors of the Romans, who was adopted by Heliogabalus and made his heir. Though a lad he showed considerable insight, encouraged reforms, religious toleration, building of public works, reduction of taxes, and curbing of luxury and vice. In a war against the Persians he gained some successes, returned to Rome for a triumph in 233, but was called to Gaul to suppress a revolt the next year and in 235 was killed by mutinous troops.

ALFONSO X. (1221–1284). "The Astronomer," "the Philosopher," or "the Wise"; king of Leon and Castile. Succeeded his father, Ferdinand III. (1252); elected king of the Germans (1257), but was excluded by Rudolph of Hapsburg (1273); defeated the Moors (1262); deprived of his throne by his son, Sancho (1282); noted in literature.

ALFONSO XIII. (1886–). King of Spain. His mother, Maria Christina, Archduchess of Austria, acted as regent until his majority. His reign has been marked by mutinies abroad and cabinet crises and anarchistic disturbances at home. In 1894 and 1895 rebellion broke out in Cuba and the Philippines. In 1898 the United States declared war on Spain, and in the treaty of Paris, December 10, 1898, Spain lost Cuba, the Philippines, and Porto Rico. In 1906 the king married Princess Ena of Battenberg, niece of Edward VII. of England. Alfonso gained the respect of his people by his coolness, especially during several attempts on his life, and by his democracy. Under Premier Maura (q.v.) Spain seemed destined for a new era of union and prosperity, but succeeding troubles, the World War,—during which Spain remained impartial,—the troubles in Morocco, and labor disturbances intervened. Finally, Primo de Rivera (q.v.) organized a directorate and suspended all constitutional guarantees, acting as a virtual dictator, gradually relaxing his hold during 1927–1930. Upon the resignation of Primo de Rivera in 1930 and the restoration of parliament more governmental power was assumed by Alfonso.

ALFRED THE GREAT (848?–901). King of Wessex (871–901), was a son of King Aethelwulf, and began to reign after his three older brothers had preceded him in trying to stabilize the kingdom and repel the Danes. When he was five his father took him to Rome, where he was honored by Pope Leo IV. He spent one year there (855–856). During the reign of his third brother, Aethelred, Alfred fought nine great battles (870), one at Reading being a great victory for the English. Aethelred died in 871, Alfred succeeding him to the delight of the nation. Several battles followed in 876, but in 878 Alfred decisively defeated the invaders, and Guthrum, the Danish king, and his nobles accepted baptism. After fourteen years of peace, the Danes again came in 893, and for three years the issue was in doubt. Alfred succeeded in blocking their ships in the Thames, and at last the Danes, for the most part, settled peacefully in Northumbria and East Anglia. Alfred spent much of his time encouraging learning; he gathered at his court various scholars, some of them translating noted works of the church. His publications include the *Dialogues of Gregory*, by Bishop Werfurth, Gregory's *Pastoral Care*, evidently by Alfred himself, and then the *History of Orosius*, made into an almost new work by him, and Bede's *Ecclesiastical History*, which some scholars think is not by Alfred. The most influential work, however, was Boethius's *Consolation of Philosophy*, translated from the Latin, a standard work in the Middle Ages.

ALGER, RUSSELL ALEXANDER (1836–1907). American soldier and politician; born in Lafayette, Ohio; served through the Civil War and rose to the rank of major general; governor of Michigan (1885–1886); commander-in-chief of the G. A. R. (1889), secretary of war in McKinley's cabinet (1897–1899) and as such he met vigorous criticism for conditions during the Spanish-American War; United States senator (1902–1907).

AMES, FISHER (1758–1808). American statesman and orator, born at Dedham, Mass., educated at Harvard College and the Law School, but gave up practice for politics. During Washington's two terms he was a foremost Federalist in the House of Representatives, becoming famous as a parliamentary orator. His great speech came in support of the Jay Treaty in 1796, when the Republicans tried in vain against his persuasive eloquence to defeat the ratification. He delivered the eulogy of Congress when Washington retired. He led in opposing the French policy of President John Adams.

AMURATH or **MURAD II.** (1401–1451). Tenth sultan of the Turks (1421–1451). Son and successor of Mohammed I.; took Salonica from Venice (1430); defeated several times by Hunyadi, the Hungarian patriot; overwhelmed the Hungarians at Varna (1444), where Ladislas, king of Hungary and Poland, fell; defeated Hunyadi at Kossovo (1448). Succeeded by his son, Mohammed II., the conqueror of Constantinople.

ANDRASSY (*on'drăh-shĕ*), **JULIUS (GYULA), COUNT** (1823–1890). Hungarian statesman. Advocated the popular cause in the revolution of 1848; exiled in France and England (1849–1857); member of the Diet (1861); vice-president (1865–1866); prime minister of Hungary (1867); minister of foreign affairs of Austria-Hungary (1871); chief representative of Austria-Hungary at Berlin Congress (1878). He was the first great Magyar statesman, noble in private life, resourceful, amiable, and greatly loved by the public. After 1879 he lived in retirement, but took an active interest in politics.

ANDROS (*ăn'drŏs*), **SIR EDMUND** (1637–1714). In 1674 he was made British colonial governor of New York. In 1686 he was made governor of New England. He carried on an administration of tyranny which lasted for three years; declared all marriages unlawful unless celebrated by Episcopal clergymen; levied exorbitant taxes, etc., until imprisoned by the people of Boston in 1689, and sent to England; afterwards made governor of Virginia and then of Guernsey.

ANNA COMNENA (1083–1148). Byzantine princess and historian, daughter of Alexius I Comnenus. She tried in vain to persuade the emperor to disinherit his son and grant the crown to her own husband, who spoiled the plot by refusing to join. Her property was forfeited, she retired to a convent, and spent her time writing the *Alexiad*, a history of her father's reign, but this is more an interesting literary production and defense of her family than a solid history. Her husband, Nicephorus Bryennius, wrote some reliable history, however.

ANNE (1665–1714). Queen of Great Britain and Ireland, last of the Stuarts. Second daughter of James II. and Anne Hyde. Married Prince George of Denmark. Lady Churchill (Duchess of Marlborough) gained an ascendency over her, as did, later, Mrs. Masham. She was succeeded by George I. After the deaths of her husband and children in 1700, and the removal of some of her favorites, she lived a lonely life, with no hope of any direct successor. She was a dull woman, obstinate, opposed to extremes of all kinds, and content to enjoy her last years in eating and the common joys of life. Yet she tried honestly to serve the country and her subjects well. Her time has been called "The age of prose and reason," for it was the time of Addison, Bolingbroke, Swift, and Steele. Anne favored the clergy, building of churches, and to some degree patronized literature.

ANNE OF AUSTRIA (1601–1666). Daughter of Philip III. of Spain and wife of Louis XIII. of France. Mother of Louis XIV. Though neglected and cruelly treated by her husband, she became regent on his death (1643). Cardinal Mazarin ruled well for her and prepared a great kingdom for Louis XIV.

ANNE (1693–1740). Empress of Russia, second daughter of Ivan V., married Frederick William, duke of Courland, but he died almost at once, leaving her to rule his lands. During her reign as empress, she was ruled by a brilliant favorite, Biren, who did all he could to humiliate the Russian nobles. During the War of the Polish Succession and the second Crimean War, she lost many thousands of men and acquired only a little territorial advantage, but Russia a bit later made her wishes known in European affairs. Her last days were occupied in strengthening the position of the heir, Ivan VI., the son of Anne's niece.

ANTALCIDAS (*ăn-tăl'çi-dăs*). Great Spartan statesman; son of Leon. Sent by his government to Tiribazus, the Persian satrap at Sardis (393 B. C.), to break up the understanding between Athens and Persia. He succeeded, but agreed that Sparta should recognize Persian supremacy over the Greek cities of Asia Minor. This displeased the Persian king, Artaxerxes, and Tiribazus was recalled; to be restored (388 B. C.). Encouraged by this fact Antalcidas was sent again as a Spartan admiral to treat again with the Persian court; received an interview and carried his point; thus breaking the blockade of the Athenians and shutting them out from the Aegean Sea. He compelled the resultant peace known as the "Peace of Antalcidas," its final ratification taking place at Sparta (386 B. C.). Persian support was held until after the battle of Leuctra, when he lost favor and is said to have starved himself to death in disappointment.

ANTIOCHUS III. (*an-tī'ō-kus*), **THE GREAT,** King of Syria (223–187 B. C.). Son and successor of Seleucus II. He made war on Ptolemy IV. of Egypt; quelled a rebellion at home; extended his empire to the east; made war with Philip of Macedon, as an ally, upon Ptolemy V. of Egypt; took some of his territory, but was forced by Rome to return it; made war upon Greece; was defeated at Thermopylae in 191 B. C., and again at Magnesia in 190 B. C.; after which he was forced to give up a part of his territory in Asia Minor and to pay a tribute of 15,000 talents. To get this vast sum he pillaged a temple, and was murdered in 187 B. C.

ANTIOCHUS IV., EPIPHANES. King of Syria from 175 to 164 B. C., known for his hostility to the Jewish faith, defeated the Egyptians who tried to conquer Palestine, and in turn held part of their territory till checked by the Romans. He sacked Jerusalem, plundered the Temple, and instituted persecutions which led to the rising of the Maccabees.

ANTONINUS (*ăn'tō-nī-nŭs*) **PIUS** (86–161). A famous Roman emperor (138–161). Consul in 120; adopted by the emperor Hadrian (138); emperor the same year; his reign was peaceful and happy; persecution of Christians was greatly lessened; conducted a campaign in Britain and built a wall from the Forth to the Clyde.

ANTONY, MARK or **MARCUS ANTONIUS** (83–30 B. C.). A Roman triumvir. He fought under Gabinius in Palestine and Egypt, and with Caesar in Gaul. Thence he went to Rome in 50 B. C. to advance the interests of Caesar. He was elected a tribune in that year, but was expelled the next for his zeal in Caesar's interests. He fled to Caesar, who on the outbreak of the war with Pompey, made Antonius commander of the army in Italy. He commanded the left wing of Caesar's army at the battle of Pharsalia, and, during Caesar's absence in Africa, governed Italy. He was made consul in 44 B. C. After the assassination of Caesar in that year, he compelled the conspirators to leave Rome. Cicero denounced him, and Octavianus now appeared as a rival. Antony fled to the camp of Lepidus in Gaul, and with the army of Lepidus and his own scattered forces marched on Rome. Octavianus made an alliance with him and formed with Lepidus the second triumvirate. Then began the slaughter of Roman citizens, including Cicero. Appian says that 300 senators and 2,000 knights were assassinated. Antony and Octavianus then went to Macedonia and defeated the forces of Brutus and Cassius at Philippi in 42 B. C. Antony went to Athens, thence to Egypt to contend with Cleopatra, who captivated him by her beauty. A dispute over the division of the empire caused a new arrangement. Antony took the East, Octavianus the West, and Lepidus, Africa. Antony returned to Egypt and Octavianus incited the Romans against him. He was deprived of his power and war was declared on Cleopatra. A naval engagement took place at Actium in 31 B. C., where Antony and Cleopatra were completely defeated. Antony returned to Egypt and Octavianus followed him. Antony was told falsely that Cleopatra was dead, and he committed suicide in 30 B. C.

APPONYI (*ŏp'pō-nyē*), **COUNT ALBERT** (1846–1933). Hungarian statesman, son of Count George Apponyi (1808–1899), who did much to reconcile Austria and Hungary, was born in Pest, educated at Vienna and Pest, and was influenced by French and Roman Catholic traditions. He was a member of the opposition parties till he joined the Wekerle ministry in 1905, and in 1906 to 1910 became minister of education. He succeeded Kossuth as a member of the Hungarian independence party, and after the World War retired to private life, having accomplished his main objectives. Yet as a member of the League of Nations councils, he made a profound impression by his sincerity and his oratory, and afterward was acknowledged as a great moral leader in his native land.

ARABI PASHA (1839?–1911). Leader of the national party in Egypt in 1882. From a private he rose to be colonel in the Egyptian army; organized a rebellion under the rally of "Egypt for the Egyptians"; became minister of war in 1882; set aside the French-English control in finances of Egypt. England intervened; war was declared; Alexandria bombarded (July 11 and 12, 1882); Arabi was defeated at Tel-el-Kebir (September 13, 1882). He surrendered next day; sentenced to life exile in Ceylon; pardoned in 1900, and returned to Egypt.

ARCADIUS (378–408). First emperor of the East (395–408). He was the eldest son of the emperor Theodosius, after whose death the empire was divided into the West and East. He lived a life of luxury and indifference, the affairs being in the hands of Rufinus, the Gaul; Eutropius, the eunuch; and Eudoxia, the wife of Arcadius. The only really great man of the times was Chrysostom, patriarch of Constantinople, whom Arcadius became powerful enough to banish in 404.

ARIOVISTUS (*ă-rī-ō-vĭs'tŭs*) (1st. cent.), chief of a German tribe defeated by Caesar in 58 at Vesontium, the modern Besancon, after he had crossed the Rhine to help the tribes of Gaul. He escaped from Caesar by flight into his own country.

ARISTIDES (*ăr-ĭs-tī'dēz*) called **THE JUST** (550–468 B. C.). Athenian patriot, noted for an unswerving integrity, a trait that led to his banishment in 483 B. C.; was next highest in command at the battle of Marathon, after which he was made archon of Athens; recalled from exile to oppose the Persians under Xerxes, he commanded at the battles of Salamis and Plataea. He exerted himself to save from banishment his rival, Themistocles, and died so poor that he was buried at public cost.

ARMINIUS (*ăr-mĭn'ŭs*) (17 B. C.–A. D. 21). Otherwise Hermann or Armin. Of the tribe of Che-

rusci, he served in Roman armies, but returned home to find that the Roman governor, Varus, had badly treated his people. In A. D. 9 he ambushed Varus in Teutoburger Wald, utterly cut down three Roman legions, and forced the invaders to withdraw to the Rhine from the Elbe. Later he was defeated by Germanicus Caesar, after the latter barely escaped the fate of Varus, but the campaign was so costly that the Romans ceased their efforts to win back what they had given up. Arminius became the national hero, but his last days were troubled with disputes and civil war, and at last he was murdered.

ARTAXERXES (*är-taks-ürk'sēz*) **I.**, called Longhand, because his right was longer than his left hand, ruled Persia from 465 B. C. to 424 B. C. When he found his vizier Artabanus had killed his father, he put him and his sons to death in a fight in the palace. His reign was benevolent, but Nehemiah, his cupbearer, testifies that he was weak and indulged his wife beyond reason in her political schemes. Two insurrections were put down by him, the latter in Egypt. Two other rulers of the same name followed, the first his grandson, who was defeated by Cyrus at the great battle of Cunaxa, and his great-grandson, who put most of his own relatives to death, met with considerable resistance in Greece and Egypt, but finally subdued all opposition, though he was at last killed by his favorite vizier

ARTEMISIA (*är-tē-mĭsh'ĭ-ȧ*) (about 350 B. C.). A queen of Caria; wife and successor of Mausolus. She is noted for her love for her husband, her extraordinary grief at his death, and the splendid monument she built to his memory; hence the word "mausoleum." Portions of some of the fine sculptures which adorned this tomb were discovered in 1857 and are now in the British Museum.

ARTHUR, CHESTER ALAN (1830–1886). Twenty-first president of the United States, succeeding when President Garfield died in 1881. He was born in Vermont, educated at Union College, from which he was graduated with honor in 1848, became a noted lawyer, especially in defending the rights of slaves, did much to equip troops as quartermaster general of New York in the Civil War, and in 1871 became collector of the port of New York. Though in person opposed somewhat to the spoils system in politics, he did not actively seek to remedy conditions, and so in 1878 was removed from office. Having supported Grant in 1880 for a third term, when Hayes was nominated, to appease the followers of Grant, Arthur was nominated for vice presidency. Though he won the favor of the public slowly, Arthur made a conscientious and able president, free from undue bias or partisanship. When Blaine became the successful candidate against him in 1884, Arthur supported Blaine, even though for many years he had been a warm friend of Conklin, who actively opposed Blaine.

ASHBURTON, ALEXANDER BARING, BARON (1774–1848). For many years the head of the great Baring banking house. He began life as a Whig. In 1835 he was raised to the peerage; in 1842 he was appointed by Sir Robert Peel as special commissioner to negotiate the Ashburton Treaty between Great Britain and the United States, concerning the disputed Maine territory, which threatened to involve the two countries in a war; in 1798 he married the daughter of William Bingham of Philadelphia. He was a liberal patron of the fine arts.

ASOKA (ruled 264–c. 227 B. C.). Celebrated Buddhist emperor of India, who did much to establish certain doctrines, and to conquer men by "religion" rather than by the sword. His rule embraced an empire almost as large as modern India. He set up many pillars on which religious and ethical inscriptions are found today.

ASQUITH, HERBERT HENRY (1852–1928). Prime minister of England, 1908–16, was born in Yorkshire, educated at Oxford, became a barrister in 1876, and represented East Fife in Parliament from 1886 to 1918, and Paisley from 1920 to 1924, when he was created first Earl of Oxford and Asquith, and took his seat in the House of Lords. Some of his important offices were queen's counsel, secretary of state for the home department, chancellor of the exchequer (1905–08), and then premier for 8 years. He was extremely skilful in conciliating elements in his own party, the Laborites, and the Irish nationalists. In May, 1915, he formed a coalition ministry, which continued till December of the next year, when Lloyd-George forced the issue and was asked to form a special war council, or virtual dictatorship. Asquith's *Genesis of the War* is an important account of events, and his wife's *Autobiography of Margot Asquith* created a sensation by its frank discussion of men and measures while her husband was in public life.

ASTOR, NANCY WITCHER, VISCOUNTESS (1879–). First woman to sit in the British Parliament, was an American lady born at Greenwood, Virginia, the daughter of Chriswell D. Langhorne. After the death of her husband, Viscount William Waldorf Astor, in 1919, she entered the House of Commons. Among other reform measures she sponsored and secured the passage of a bill forbidding the sale of liquor to minors.

ATAHUALLPA (*ä-tä-wäl'pa"*) (c. 1502–1533). Called the last of the Incas or native rulers of Peru, on the death of his father received the kingdom of Quito, part of the empire, since he was not a descendant on both sides of the house from the ancient rulers. In a quarrel with his half-brother, Huascar, ruler of part of the empire, the latter was thrown into prison. Pizzaro, the Spanish conqueror, appeared at this time (1532), captured him by strategy, killed many defenseless Peruvians, and after accepting a ransom of $4,000,000 in silver, on a trumped-up charge put Atahuallpa to death in 1533.

ATHELSTAN (895–940). Grandson of Alfred the Great. The first ruler to take the title of King of England. He was crowned in 925. Athelstan seized Northumbria, and a league of Scots, Welsh, and English was formed against him. This was followed by a more formidable revolt, which was crushed at the battle of Brunanburh (937). He made good laws and improved the condition of his people.

ATTILA. King of the Huns; by Christians called "the Scourge of God." Became king (434), sharing the vast empire in Asia and Europe with his brother, whom he killed (444 or 445); devastated the coasts of the Black and Mediterranean seas. Defeated Theodosius thrice; took 70 cities from Rome; vast possessions south of the Danube paid him tribute; Aetius and Theodoric defeated him in Gaul; the Romans and allies defeated him at Chalons, he losing 300,000 men; he invaded Italy, and Rome was saved only by the intervention of Pope Leo I. When planning a second invasion he died of dysentery (453).

AUGUSTUS (63 B. C.–14 A. D.). At birth his name was Gaius Octavius; when adopted by Julius Caesar, he was called Gaius Julius Caesar Octavianus; by decree of the Senate in 27 B. C. he was named Augustus. The first Roman emperor and grandnephew of Caesar, who adopted him. When Caesar was assassinated in 44 B. C., Octavianus returned to Rome from his studies abroad and found Antony in control. War ensued, and Antony was beaten and fled across the Alps. Supported by Cicero and others Octavianus rose to such power that on the return of Antony he formed the second triumvirate with him and Lepidus. He took Italy, Africa, and Sicily; Antonius took Gaul; and Lepidus, Spain. After the battle of Philippi, a new division was made. Octavianus obtained Italy, and Lepidus, Africa. While Antony was in the power of Cleopatra, Octavianus was building himself up, and war was finally declared against Cleopatra. Octavianus was victorious at Actium, and became sole ruler of the Roman world. He declared universal peace in 29 B. C. In his eleventh consulship (23 B. C.) the Senate made him tribune for life. On the death of Lepidus (12 B. C.) he was made Pontifex Maximus and was supreme ruler of Rome. His reforms were beneficent and he beautified the city of Rome. His was the Augustan age of literature.

AURELIAN (LUCIUS DOMITIUS AURELIANUS) (about 212–275). Roman emperor (270–275). Successor of Claudius. Captured Palmyra, the capital of Queen Zenobia. Aurelian was killed by his own soldiers, near Byzantium, while on his way to Persia. He was called by the Senate "The Restorer of the Roman Empire."

AURELIUS, MARCUS (121–180). His surname was Antoninus, but he is better known as Aurelius. The emperor Hadrian befriended him, and Antoninus Pius adopted him and Commodus. When Pius died in 161, Marcus Aurelius succeeded him, but gave half the rule to his foster brother Commodus, who married his daughter, as Marcus had married the daughter of Pius. After the death of Commodus (169) Marcus Aurelius ruled alone. Though he was a great lover of peace and philosophy, several wars kept him away from Rome much of the time, during which he gained

the complete respect of his soldiers for the austere simplicity of his life. His *Meditations* profoundly influenced later ages and the Christian church, though Aurelius himself allowed persecution of early Christians. Among the later Stoic philosophers he takes very high rank, and the people for a long time regarded him as a god.

BABER (1483–1530). Descendant of Tamerlane, grandfather of the great Akbar; founded the Mogul Empire in Hindustan in 1527. His dynasty lasted for three centuries. He invaded India several times, finally in 1525 defeating the sultan of the Afghans and becoming master of the country. He was an able sovereign and soldier, made many improvements, and left a valuable autobiography.

BACON, FRANCIS (1561–1626). Statesman and philosopher, born of fine London family, educated at Cambridge, became convinced that the philosophy taught in the schools was not effective, studied hard at law, and became the most learned man of his day. His various political offices under James I include that of solicitor general, judge, attorney general, lord keeper of the great seal, lord high chancellor, and he was finally made Baron Verulam in 1618. During the next year he was called before Parliament, convicted of taking bribes, deprived of the speakership of the House, fined heavily, and sent to the Tower in disgrace, but soon was pardoned. His later life was spent in investigation and writing, but he had already published several notable works. (See *Index* for mention of Bacon in other sections of this book.)

BAEZ (*bah'eth*), **BUENAVENTURA** (1820–1884). President for four terms of the Republic of Santo Domingo (1849–1853); driven out by Santa Anna; president from 1856 to 1858; driven out again; president from 1865 to 1866; again exiled (1867). In 1869 the United States Senate refused to ratify the treaty which he and President Grant drew up for annexation of Santo Domingo. He was the son of a wealthy mulatto.

BAGOT, SIR CHARLES (1781–1843). Governor general of Canada (1842–1843); minister to the United States (1819); ambassador to Russia (1820); to Holland (1824); special ambassador to Austria (1834).

BAILLY, JEAN SYLVAIN (1736–1793). French political leader and scientist. He was president of the third estate, 1789, mayor of Paris, 1789–1791, but became unpopular because he had the guard disperse a mob, retired to Nantes, visited Leplace at Melun in 1793, was arrested, tried and guillotined. See under SCIENTISTS.

BAJAZET (*bay-a-zet'*) or **BAYAZID I.** (1347–1403). Sultan of the Ottomans; succeeded his father, Amurath I., in 1389. His vast energy and the swiftness of his movements gained for him the surname "Ilderim" or "lightning"; conquered Asia Minor, considerable of Turkey in Europe, and carried his campaign into Bulgaria, Hungary, Wallachia, and part of Greece; was first in his family to assume the title of sultan. He was desirous of taking Constantinople and defeated a league of the Christian powers commanded by Sigismund, King of Hungary, on the banks of the Danube at Nicopolis, in September, 1396. He is said to have made the boast that his horse would eat on the altar of St. Peter's at Rome. In 1402 he was defeated and made prisoner by Tamerlane just as he was preparing to attack Constantinople. Shut up in an iron cage, he was carried in the train of his conqueror, and about nine months later died in the Tatar camp in Pisidia.

BALDWIN I. (1058–1118). King of Jerusalem; succeeded his elder brother, Godfrey of Bouillon, in 1100; obtained many victories over the Turks, Persians, and Saracens; made himself master of all the important towns on the coast of Syria; distinguished himself in the First Crusade. He was buried on Mount Calvary.

BALDWIN II. Seventh Latin emperor of Constantinople (1228–1261). The son of Pierre de Courtenay and nephew of Baldwin I. His reign was disastrous. He spent much of his time in the West seeking aid for his capital. He sold to St. Louis of France some of the most sacred relics of Constantinople. In 1261 his capital was taken by one of the generals of Michael Palaeologus, ruler of Nicaea, and Baldwin fled to Italy. He was the last of the Latin emperors, and was succeeded by the Nicaean emperors.

BALDWIN, ROBERT (1804–1858). Canadian statesman, born in York (now part of Toronto), was called to the bar in 1825, in 1829–30 sat in the parliament of Upper Canada, became a member of the executive council in 1841, formed the first liberal administration the next year, and from 1848 to 1851 with Louis Lafontaine formed a ministry. Though a reformer, he refused to take his stand with the radical elements, and in 1854 refused to stand for the upper house. Responsible government, for which he struggled for years, finally became a reality in his lifetime.

BALDWIN, STANLEY (1867–). British prime minister, was educated at Cambridge, went into business, became wonderfully successful, attracting the attention of Bonar Law in 1916, eight years after he had entered Parliament. Then he became in succession junior lord of the Treasury, joint financial secretary, member of the privy council, president of the British Board of Trade, chancellor of the exchequer, and at last in May, 1923, took charge of the government, after Bonar Law, with Baldwin, had revived certain Conservative elements the year before. In the fall elections his party met defeat, and he was compelled in November to relinquish the premiership to Ramsay MacDonald early in 1924, but after nine months again he became premier until June 5, 1929, when he was once more succeeded by MacDonald. Baldwin proved an able, conscientious, persistent, and patriotic statesman. In 1919 he gave about 20 per cent of his fortune to the British Treasury to help pay the war debts.

BALFOUR, ARTHUR JAMES (1848–1930). A British statesman. In 1874 he entered Parliament, first representing Hertford, and in 1886 the east division of Manchester; president of the local government board (1885); secretary for Scotland (1886); secretary for Ireland (1887–1891); lord rector of Glasgow University (1890); in 1891, chancellor of Edinburgh University, and first lord of the treasury, then leader of the House of Commons. In 1895 he again became first lord of the treasury and leader of the House. He passed the crimes and law acts, secured a free grant for railways, and created the Congested Districts Board; became prime minister July 12, 1902, upon the resignation of Lord Salisbury, but failed to secure a majority in the general election of 1905; resigned leadership (1911). Joined coalition cabinet of Lloyd-George as first lord of the admiralty, 1915–1918; foreign secretary, 1916–1919; and head of the British Mission to America in 1917, and member of the delegation to the Washington Conference, 1921–1922.

BALMACEDA (*bäl-mä-sā'thä*), **JOSE MANUEL** (1838–1891). A Chilian statesman. Early in life he distinguished himself as an orator. In Congress he was foremost advocate of the separation of church and state in 1884; while premier, he introduced civil marriage; in 1886 he was elected president. He was accused of cruelty and dishonesty in office, and through the efforts of Señor Fuentes, who wished to supplant him and his supporters, he was overthrown (1891) and committed suicide September 18 of same year.

BANKS, NATHANIEL PRENTISS (1816–1894). Born in Waltham, Mass., he became a bobbin boy in the mills there, and was so called all his life. He served as speaker of the House of Representatives in 1856, having been elected on the 133d ballot, the first great Republican victory, was governor of Massachusetts from 1858 to 1861, general in the Civil War, member of Congress from 1865 to 1877, was U. S. marshal for Massachusetts for nine years, and again sat in Congress. In turn he allied himself with the Free Soil, coalition, American, Republican, Liberal-Republican supporting Greeley, Democrat, and then again Republican party.

BARNEVELDT, JOHN VAN OLDEN. See under DICTIONARY OF HISTORY.

BARRETT, JOHN (1866–1938). Statesman; minister to Siam (1894–1898). Special diplomatic and commercial envoy to Japan, Siam, Korea, Siberia, and India; American plenipotentiary to International Confederation of American Republics at Mexico (1901–1902); minister to Argentina (1903–1904), Panama (1904–1905), Colombia (1905–1906); director International Bureau of American Republics, 1907–1920, and afterward acted as adviser and arbitrator in disputes.

BATU KHAN (? –about 1255). Leader of the Mongols or Tatars in their invasion of Europe in the thirteenth century. Grandson of Genghis Khan; crossed the Volga (1235); took Riazan (1237); Moscow, Vladimir, and Kiev (1240); perpetrated horrible

massacres and atrocities; invaded Hungary (1241); conquered the Siberian Duke and Teutonic Knights at Wahlstatt. His army was named the Golden Horde from the richly embroidered tent of the Khan. His khanate was Kipchak, from the Jaxartes in Turkestan to the limits of Russia.

BEACONSFIELD (*bĕk'ŏns-fēld*), **BENJAMIN DISRAELI, EARL OF** (1804–1881). An English statesman and author; born in London. The crown of his ambition was to become premier. He attained that honor in 1868 at the resignation of Lord Derby, but at the general election he was not returned to power; again elected prime minister in 1874 with a strong majority, he retained the office for six years. During this period he was raised to the peerage. Parliament was abruptly dissolved in 1880, and the new Parliament had an overwhelming liberal majority; Beaconsfield remained leader of the Conservative party. *Endymion*, published shortly after this time, is probably the best known of his literary works.

BEBEL (*bā'bĕl*), **AUGUST** (1840–1913). Leader of the German Social Democratic Party, was born near Cologne, became a wood turner by trade, and in 1871 became a member of the Reichstag. He opposed the war of 1870 and the annexation of Alsace. In 1872 he was imprisoned for high treason, serving his term in comfort in a castle, and also a second in 1874. With Liebknecht he organized the Social Democratic Party and was connected with the party paper for a time. As a party orator he attained great power. Just before the World War he announced that the great increase of the German navy was a real menace to the peace of England, and that nothing could be more disastrous than a quarrel between Germany and England.

BEDFORD, JOHN PLANTAGENET, DUKE OF (1390–1435). Brother of King Henry V.; made constable of England in 1403; created Duke of Bedford in 1415. Henry V. wanted him made regent of France, but by act of Parliament he was made protector of the kingdom. His claim for Henry VI., as king of France upon the death of Charles VI., in 1422, involved the two countries in war for some years, but the tide turned against him at the siege of Orléans, which was raised by Joan of Arc. Disappointment hastened his death. Bedford was a patron of literature.

BELL, JOHN (1797–1869). Actively engaged in American politics until 1860, when he was nominated for the presidency by the Constitutional Union Party; member of Congress (1827–1841); speaker of the House in 1834; secretary of war under Harrison in 1841, and was a member of the United States Senate (1847–1859); joined the Confederacy and advised Tennessee to withdraw from the Union in 1861.

BENES (*bĕ'nĕsh*), **EDWARD** (1884–). Statesman of Czechoslovakia rose from poverty, after a course at Prague University, to a position of leadership. With Mesaryk and Stefanik during the World War he acted as a journalist and adviser in Paris seeking the independence of the district now called Czechoslovakia. In 1918 he became minister of foreign affairs in his government and premier in 1922–23. He was also a member of the peace delegation at Paris, of the council of the League of Nations, 1924–26, one of the framers of the Geneva Protocol, and prominent in the Little Entente.

BENTON, THOMAS HART (1782–1858). An American statesman and soldier. He was born near Hillsboro, N. C.; made his home in Tennessee. There he studied law and was made a member of the Legislature. In the War of 1812 he raised a regiment of volunteers. He also served on General Jackson's staff. His St. Louis newspaper, which he started after the war, entangled him in several duels. After Missouri was admitted as a state he was chosen United States senator in 1820, and during 30 years of continuous service took a prominent part in public affairs.

BERGER, VICTOR L. (1860–1929). Socialist congressman from Wisconsin, born in Austria, lived in Wisconsin mainly after 1878. Edited various socialist papers in Milwaukee, notably the daily *Leader* from 1911 till his death. He was the first Socialist ever elected to Congress (1911–13), but was twice refused admission after being convicted of disloyalty during the World War, but was seated after third election when the Supreme Court had made it necessary to quash all indictments against him. He was one of the moderate socialists, the author of several articles and papers, and an able speaker.

BERKELEY, SIR WILLIAM (1610–1677). Colonial governor of Virginia (1641–1650). He was superseded by Cromwell's appointee, Richard Bennet, in 1651; remained in the colony; chosen governor by the General Assembly in 1660. Lost favor with the people and suffered by Bacon's rebellion; was forced to resign in 1660.

BERNADOTTE (*bĕr-nä-dŏt'*), **JEAN BAPTISTE JULES.** See CHARLES XIV. CHARLES JOHN.

BETHMANN-HOLLWEG (*bāt'män-hŏl'vāk*), **THEOBALD VON** (1856–1921). A German statesman, born near Berlin, educated at Strasbourg, Berlin, and Leipzig, and rose to the rank of chancellor in 1909. He was successful in dealing with a number of acute problems, but failed to conciliate some of the minor parties. In 1914 he told the British ambassador at Berlin that the treaty to respect the sovereign rights of Belgium was "a scrap of paper," and this phrase at once was echoed round the world. He refused to sanction or reject the plan for unrestricted submarine warfare, lost the support of the reichstag, and resigned in July 1917, when Hindenburg and Ludendorff came to Berlin from the war lines to consider the peace resolution offered in the reichstag by Erzberger.

BISMARCK, KARL OTTO EDUARD LEOPOLD, PRINCE VON (1815–1898). Born at Schönhausen. He early entered political life, being always a strong imperialist. The idea of Germany's freedom from foreign control and union under the crown of Prussia originated with Bismarck, but his sincerity and judgment were doubted at first. In 1862 he was made minister of foreign affairs. In 1864 he won general approbation by the conquest and annexation of Schleswig. Next he brought Austria to terms in 1866, in consequence of which his long cherished plan was made possible, and the establishment of a German confederation with Prussia at its head made him the idol of his compatriots. Exasperated by his treatment, Napoleon III. declared war and advanced upon Berlin. To the surprise of all Europe, the French were ignominiously driven back. The threatening powers of France and Austria helpless, the German Empire restored under a Hohenzollern king, Bismarck was installed as chancellor. He reformed the coinage, increased the army, established protection, and repressed socialism. But no deed of his equaled the stupendous feat of reorganizing and building up the empire. After numerous quarrels with William II., he resigned (March 20, 1890). He was the greatest European statesman of the nineteenth century.

BLAINE, JAMES GILLESPIE (1830–1893). An American statesman; born in Brownsville, Penn.; one of the founders of the Republican Party. In 1862 he became a member of the House of Representatives. In 1869 he took the chair as speaker of the House, which office he retained for six years. From 1876 to 1881 he was a member of the Senate. He was secretary of state under Garfield (1880 to 1884). In 1884 he was the Republican candidate for the presidency, but was defeated by Grover Cleveland. He wrote *Twenty Years in Congress*, a work of lasting value to history. Besides this, his best known literary work, we have many others of his writings and speeches on the most important public questions of his day. He removed to Augusta, Maine (1854), and engaged in journalism.

BLAND, RICHARD PARKS (1835–1899). American legislator; born near Hartford, Ky.; practiced law in Missouri, California, and Utah, and was interested for some time in mining. From 1873 to 1895 he was a member of Congress, and again from 1897 till his death. In 1896 he was one of the foremost candidates for the presidential nomination in the Democratic National Convention; was noted as the leader of the free silver movement in national House of Representatives. He was the author of the Bland Silver Bill, which was introduced by him in 1878. This bill provided for the coinage of not more than $4,000,000 nor less than $2,000,000 worth of silver bullion a month. The bill was passed in spite of the veto of President Hayes and remained in force until 1890, when it was nullified by the passage of the Sherman act.

BOABDIL (*bō-äb-dēl'*) (? –1536). The last Moorish king of Granada. He dethroned his father, Abu-l-hassan, in 1481, and two years after that was overthrown and taken prisoner by the Castilians in the vicinity of Lucena. He bought his freedom and returned to Granada, where he struggled with his father and with his warrior uncle, El-Zazhal, for the

throne. He was expelled from Granada for the last time in 1491 by Ferdinand of Castile and Aragon, and after that lived in Africa, where he was killed in battle in the service of the king of Fez.

BOADICEA, QUEEN OF THE ICENI. A British queen, who, in 60, rose in rebellion against the Romans. Prasutagus, her husband, died in 60 and left his wealth to the Roman emperor and to his own two daughters, thus hoping to protect his kingdom from the rapacity of the Roman emperor; but the plan failed, and the kingdom was plundered and the queen and her daughters were insulted. Boadicea was at first victorious, destroyed over 70,000 Romans, and captured several towns. In a battle the Romans, led by Suetonius Paulinus, were completely victorious, and over 80,000 Britons were slain in 62. Boadicea, in despair, committed suicide.

BONAPARTE, CHARLES LOUIS NAPOLEON, NAPOLEON III. (1808–1873). French emperor, son of Louis Bonaparte; born in Paris. Failed completely in an attempt to take Strassburg (1836); imprisoned in Ham for attempt to bring about an uprising in his favor; escaped (1846) and made his way to England, but returned (1848) and was elected president; re-elected for 10 years in 1851. He married Eugénie, Countess de Montijo, in 1853. During the Franco-German War the emperor took the field and, after his capture at Sedan, was deposed and spent the remainder of his life at Chiselhurst, England.

BONAPARTE, JOSEPH (1768–1844). Eldest brother of Napoleon; born at Corte, in Corsica; elected a member of the Council of Five Hundred (1797); was appointed commander-in-chief of the army of Naples (1804); ruler of the Two Sicilies (1805); king of Naples (1806); transferred to the throne of Spain (1808), but, being unable to suppress the insurgents there, returned to France after the defeat of the French at Vittoria (1813). Joseph came to the United States after the battle of Waterloo, where for many years he engaged in agriculture at Bordentown, N. J. He returned to Europe (1832), and in 1841 went to Florence, where he died.

BONAPARTE, NAPOLEON, NAPOLEON I. (1769–1821). The most consummate master of generalship of modern times; born at Ajaccio, Corsica; attended military school (1779–1784) and at the age of 16 began his military career as sub-lieutenant in the army. At 23 he had advanced to the rank of captain of artillery. The following year he was commandant of artillery, in which position he distinguished himself at the reduction of Toulon, held by the Spanish and English. This success won him a commission as brigadier general. The army was remodeled in the summer of 1794, and he was suspended and put on half pay, the authorities giving as a reason his youth, considering 25 too young for a commander of artillery. However, when an insurrection led by the National Guard broke out in the fall, Napoleon was recalled, and won a brilliant victory after a short but bloody engagement. This made him practically commander-in-chief of the army of the interior. In 1796 he held the commander-in-chief of the army of Italy. That same year he married Josephine de Beauharnais. In his first campaign Napoleon displayed a genius for generalship, gaining four victories in a few weeks, conquering Lombardy and capturing Mantua, and almost annihilating three Austrian armies. He then turned his efforts against the pope and compelled him to pay 15,000,000 francs and give up many valuable works of art. After defeating another army from Austria, Napoleon finally concluded a treaty with that country making his success secure. In 1798 he took command of a powerful expedition sent into Egypt for the purpose of striking at the power of Great Britain. There he gained important victories over the Mamelukes and Turkish auxiliaries. Returning to France he overthrew the Directory and was elected first consul. He gained the great victory of Marengo in 1800. In 1801 he reorganized the government, reconstructed the educational system, established the Legion of Honor, and codified the laws. He became emperor in 1804 and opened war with England, Russia, Sweden, and Prussia. In 1809 he was divorced from Josephine and a year later married Maria Louisa, daughter of the emperor of Austria. The tide turned against him in 1812, when in the famous Russian campaign he is said to have lost 380,000 men. In 1813 he made a disastrous retreat at Leipzig. In 1814 the combined allies entered Paris, forced him to abdicate, and sent him to Elba, where although held as a prisoner he was granted the sovereignty of that island. However, he returned to France and succeeded in exciting such unbounded enthusiasm that he was able to raise an army of 125,000. But his insatiable ambition had finally overreached itself; and his overwhelming defeat at the hands of the duke of Wellington at Waterloo put an end to his career (1815); sentenced by the allies to banishment, he died a state prisoner on the island of St. Helena. The life of Napoleon presents probably the most noteworthy example in history of military genius guided by a great intellect, spurred by a powerful, indomitable will, and entirely unrestrained by any principles of honor. He was preëminently great in all matters pertaining to government and the art of war. His greatness lies not only in the inception of his colossal schemes, but in the titanic force he threw into their accomplishment. The man who curbed the Revolution and refashioned the life of France, who rolled back the West toward the East in the greatest movement since the Crusades, and who, by the splendor of his daring, drew the admiration of all and won the hearts of millions, must stand for all time a majestic figure among the great immortals.

BONIVARD (*bō-nē-vär'*), **FRANCOIS DE** (1496?–1570). Known as the hero of Byron's poem, *The Prisoner of Chillon*, but his life and character differ materially from the account by Byron. Bonivard came of an old Savoy family, succeeding his uncle as prior at St. Victor in 1510. Because he resisted the encroachments of Duke Charles III. of Savoy, Bonivard was twice imprisoned, at first for nearly two years, and later for four years in a dungeon underground. In 1536 the Bernese seized the castle where he was confined, released him, and took Vaud from the duke. Bonivard became a Protestant and wrote an official history of Geneva, not published till 1831.

BORAH, WILLIAM EDGAR (1865–1940). Born in Illinois, educated at the University of Kansas, practiced at Lyons, Kan., 1890–91, and then at Boise, Idaho. United States senator from Idaho since 1907; chairman of Foreign Relations committee, and known as an advocate of United States independence of foreign entanglements. A captivating orator and logician.

BORDEN, FREDERICK WILLIAM (1847–1917). Canadian minister of militia from 1896 to 1911, and from 1874 to 1891, except for three years, a representative from Nova Scotia in the Dominion Parliament. Served for several years as a surgeon in the Canadian forces, having taken a medical degree at Harvard. He also became a zealous advocate of national defense. He was made a knight in 1902.

BORDEN, ROBERT LAIRD (1874–1937). Canadian premier, born in Nova Scotia, premier from 1911, in succession to Laurier, to 1920. Entering Parliament in 1896 as a Conservative, he succeeded Sir Charles Tupper as leader of that party, and advocated a contribution of money to Great Britain in lieu of establishing a Canadian navy, a plan which failed to carry the Senate. During the World War and later he was able to secure a separate representation for Canada in important ways.

BOURASSA, HENRI (1868–). French-Canadian statesman, after a term as editor, became a Liberal in the House of Commons in 1896, but resigned three years later in disagreement with Sir Wilfrid Laurier, becoming leader and member of the Nationalist party in 1900 and 1904, and then resigned to become a member of the Quebec Assembly from 1908 to 1912. During the World War he opposed conscription. In 1925 he returned to Parliament as an independent, favored Mr. Mackenzie King, but refused a seat in his cabinet.

BOURGEOIS (*bōōr-zhwä'*), **LEON VICTOR AUGUSTE** (1851–1925). French statesman who held several offices at times after 1888, including the leadership of a Radical ministry in 1895, which fell over a disagreement regarding the right of the senate to veto certain supply items. He also acted as minister of exterior in the Sarrain cabinet in 1906, of foreign affairs in the Ribot cabinet in 1914, and as minister without portfolio in the Briand cabinet during the World War. From 1920 to 1923 he was president of the senate. Always a zealous advocate of peace, he gained some fame at the Hague conference in 1899, and became a member of the Permanent Court of Arbitration in 1903. He was also one of the first advocates of the League of Nations, representing France until 1924, serving in both the Assembly and the Council. Bourgeois won the Nobel prize for peace in 1920.

BOUTWELL, GEORGE SEWALL (1818–1905). American politician and Cabinet officer; born in Brookline, Mass. Leader of the Democratic Party in his state; governor (1851) and reëlected; left the Democratic Party on the repeal of the Missouri Compromise and helped to form the Republican Party (1854); organized the new Department of Internal Revenue (1862); elected to Congress (1863), and twice reelected; one of the managers for the impeachment of President Johnson; secretary of the treasury (1869–1873); United States senator (1873).

BRADFORD, WILLIAM (1590–1657). An American author; second governor of the Plymouth colony and one of the first settlers of New England; born in Yorkshire, England. The famous compact drawn up on the *Mayflower* bears his name as one of the signers. He was governor of Plymouth from 1621 until his death, except for five years when he declined the office. He was trusted and honored by all who knew him, and his administration was remarkable for efficiency. His tact in dealing with the Indians deserves special mention. He died in Plymouth, Mass.

BRANTNG, KARL HJALMAR (1860–1925). Statesman born in Stockholm, who early became a socialist, edited the *Social Democrat*, and acquired a great influence as leader of suffrage movement, an advocate of peaceful separation of Sweden and Norway in 1905, and of strict neutrality in the World War, though he favored the Allies. He acted as peace delegate from Sweden and was the first representative of his country in the League Assembly, and in 1922 served as a member of the Council. He was premier of Sweden in 1920, from 1921 to 1923, and again a third time from the election of 1924 to the close of Jan. 1925, when he had to resign because of ill-health. He won the Nobel peace prize in 1921.

BRECKINRIDGE, JOHN CARELL (1821–1875), Vice-president of the United States when James Buchanan was president (1856–1860); born near Lexington, Ky. From 1851 to 1855 he occupied a seat in Congress. In 1860 he ran for the presidency against Lincoln. In 1861 he was in the national Senate; served in the Confederate army through the war; second in command under Early at Shenandoah (1864); secretary of war in the cabinet of Jefferson Davis (January to April, 1865); escaped to Europe; returned in 1868 and practised law.

BRIAN, surnamed **BOROIMHE** (926–1014). King of Ireland; a beloved Irish hero. He ruled for many years with vigor and justice. His reign was one of the most prosperous Ireland had ever seen, but he became involved in war with the king of Leinster, who revolted and asked the Danes to aid him in his uprising. Brian gained a brilliant victory over the combined forces at the battle of Clontarf (April 23, 1014), but was slain in the engagement.

BRIAND (*brē-äṅ'*), **ARISTIDE** (1862–1932). French statesman, who became successively a lawyer, journalist, and politician of pronounced liberal theories, but his fairness gained the respect of all parties. He held the portfolio of public instruction in 1906, minister of justice 1912 and 1914–16, premier and minister of the interior and worship in 1909–1910, when his cabinet fell over a question of a workmen's strike, but he at once formed a new cabinet, which terminated in 1911. Then he became minister of justice under Poincaré, and premier when the latter became president, but this cabinet lasted about six months only. Again he became minister of justice under Viviani, and premier in 1915 to March 1917, January 1921 to June 1922, and November 1925 to March 1926, acting usually as his own minister of foreign affairs. Briand had an important part in negotiating the Locarno treaty in 1925, receiving with Chamberlain and Stresemann the Nobel peace prize for his efforts with them. He acted as spokesman for France in the Washington Conference in 1922, and represented France at the London Conference in 1930.

BRIGHT, JOHN (1811–1889). British statesman; the greatest English orator of modern times. His father was a Quaker cotton spinner. He was one of the foremost members of the Anti-Corn Law League in 1839, and, associated with Cobden, was a champion of free trade. His influence upon the conduct of public affairs both in England and abroad is said to have been greater than that of any other man of his time. This was largely due to his great moral power, for his life was exemplary, and his sense of justice keen. He was a vigorous advocate of the northern cause in the American Civil War. In 1885 he and Gladstone disagreed on the question of Home Rule, which led to an open rupture between them.

BROUGHAM (*brōō'ăm* or *brōōm*), **HENRY PETER** (1778–1868). Born in Edinburgh and educated there, he became a Scotch and later an English barrister. In 1810 he entered Parliament, became interested in reform, defended Queen Carolina in her trial in 1821, became a peer in 1830, and was lord chancellor till 1834. For thirty years he continued to advocate many causes, introducing many bills and making countless speeches. His present reputation rests on his advocacy of reforms in education, electorate, suffrage, and law.

BROWN, GEORGE (1818–1880). A Canadian statesman; member of Parliament (1852); formed the Brown-Dorian ministry (1858); resigned in three days; member of the Senate (1873); negotiated a commercial treaty with the United States (1874); shot by a discharged employee. Founded the Toronto *Globe* newspaper (1844).

BROWN, JOHN (1800–1859). One of the foremost American opponents of slavery. He bore a conspicuous part in the murderous feuds of the Kansas struggle, having moved to Ossawattomie of that state in 1855 from Torrington, Conn., where he was born. In 1858 he planned to liberate the slaves by seizing the arsenal at Harper's Ferry, Virginia. Having only 18 men he was, of course, soon overcome and captured by the regular troops. He was tried and executed at Charlestown, W. Va. His grave is at North Elba, N. Y. The Harper's Ferry incident, which occurred October 16, 1858, made the name of John Brown famous.

BRUCE, ROBERT (1274–1329). King of Scotland. He submitted for a time to Edward I. In 1299 a regency was appointed, Bruce and his rival, Comyn, at the head. For several years Bruce pretended loyalty to Edward, but in 1306 he murdered Comyn, and after several battles with the English, in some of which he was defeated, he won his cause, the freedom of Scotland, at the battle of Bannockburn (June 24, 1314), against Edward II.

BRUCE, STANLEY MELBOURNE (1883–). Statesman born in Melbourne, Australia, served in the World War, was wounded and invalided back home, where he managed the affairs of a mercantile firm, but did much to keep up the spirit of his countrymen. In 1921 he represented his commonwealth in the League of Nations, became treasurer of Australia in 1922, and premier on the fall of the Hughes ministry in 1923 as a Liberal leader in a coalition with the Nationalists. In 1925 he was given a vote of confidence in a general election. Bruce advocated the status of Australia as one of the "autonomous" parts of the British empire.

BRUTUS, LUCIUS JUNIUS (flourished 500 B. C.). Roman patriot who overthrew the Tarquins, destroyed the monarchial and substituted the republican form of government in Rome. His character was that of the stern old Roman hero. His sons, detected in a conspiracy, were sentenced to death by him. He fell in battle against the sons of Tarquin.

BRUTUS, MARCUS JUNIUS (85–42 B. C.). A prominent Roman; one of the conspirators against Caesar. His father was slain by Pompey's orders, yet he supported Pompey rather than Caesar. Caesar, after the victory of Pharsalia, pardoned Brutus and made him governor of a part of Gaul. He was made praetor by Caesar in 44 B. C. While holding this office he entered into a conspiracy against Caesar. After the murder of Caesar, Brutus fled to Athens and became powerful in Macedonia. Cassius raised an army in Asia Minor and together they made a stand against Octavianus and Antony at Philippi. The wing commanded by Brutus was victorious over that of Octavianus; while Cassius was beaten back by Antony. Cassius killed himself in despair. When this was reported to Brutus, he took his own life.

BRYAN, WILLIAM JENNINGS (1860–1925). A prominent American political leader. His birthplace is Salem, Ill. In 1881 he was graduated from Illinois College, after which he studied law at Union College, Chicago. In 1887 he made his home in Lincoln, Nebraska, and in 1921 in Florida. From 1891 to 1895 he was a member of Congress. In 1896 he was the Democratic candidate for the presidential chair against McKinley. He was the advocate of free and unlimited coinage of silver by the United States in the proportion of 16 to 1 without regard to the action of any other nation. The silver question, in fact, was the

dominating feature of this campaign, in which Bryan was defeated. In the Spanish War he was colonel of a regiment of volunteers with headquarters in Florida. In 1900 he again came forward as presidential candidate for the Democratic party. Their platform in this campaign was opposition to trusts, anti-imperialism, and free silver. McKinley again defeated him. When he once more ran for the presidency in 1908, he was defeated by William H. Taft, the Republican candidate. Thus he had the distinction of having led his party three times in a presidential campaign. While acting as secretary of state in the Wilson cabinet from 1913 to 1915, Bryan negotiated some 30 odd treaties of arbitration, but he resigned because of disagreement as to policy. In 1925 he acted as advisory counsel in the Scopes trial at Dayton, Tenn., acting for the so-called Fundamentalists. He also published two works on religious controversy, *The Menace of Darwinism* and *The Bible and its Enemies.* He died at Dayton suddenly after the conclusion of the trial.

BRYCE, JAMES (1838–1922). An eminent English statesman and writer; a barrister; professor of law at Oxford (1870–1893); member of Gladstone's Cabinet (1886); again in 1892; fellow of the Royal Society; Liberal in politics; visited the United States in 1870, 1881, 1883; British ambassador to the United States (1906–1913). In 1913 he was appointed a member of the permanent Court of Arbitration at The Hague, and in 1914 he was created a viscount. His extensive fame as a statesman was augmented by several books, chief of which is the *American Commonwealth,* a standard work. Others are *The Holy Roman Empire, Studies in History and Jurisprudence,* and *Modern Democracies.*

BUCHANAN, JAMES (1791–1868). Fifteenth president of the United States, born in Pennsylvania, educated at Dickinson College, he was a lawyer, congressman (1821–31), ambassador to Russia (1832–33), Democratic member of the U. S. Senate (1834–45), having been first a member of the dissolved Federalist Party, and secretary of state (1845–49), during which time Texas was annexed and the war with Mexico was fought. In 1853 he became minister to Great Britain and in 1856 became president. He lost favor by vacillation in regard to slavery, having insisted that it was wrong for a state to withdraw from the Union, but the Federal government could not prevent it. During the Civil War he supported the Union, after his term as president ended March 4, 1861.

BULWER (*bo͝ol'wēr*), **WILLIAM HENRY LYTTON EARLE, BARON DALLING and BULWER** (1810–1872). English diplomatist who was instrumental in negotiating a commercial treaty with Turkey, while acting as secretary of the English embassy there. He also concluded peace between Spain and Morocco in 1843 and secured the Clayton-Bulwer treaty with the United States in 1849.

BURGHLEY, LORD. See CECIL, WILLIAM.

BURKE, EDMUND (1729–1797). A British statesman, parliamentary orator, and author, was born in Dublin and educated there at Trinity College. He was successively secretary to W. G. Hamilton, who was Irish secretary, and Lord Rockingham, when the latter became prime minister. During his term in Parliament, which began in 1766, Burke continued to speak for the rights of the American colonists. In 1782 he became paymaster of the forces, and afterward acted in the ministry of the duke of Portland. His great effort as an orator was in the speech against Warren Hastings during the impeachment proceedings. Burke found himself out of sympathy with the Revolution in France, withdrew finally in 1794 from the Whig party because many of his old friends supported the events across the English Channel, and lived in political retirement till his death. His great talents in statesmanship were cramped because he belonged to the minority and never had a fair chance to show them in any great office. (For Burke as a writer, see DICTIONARY OF AUTHORS.)

BURR, AARON (1756–1836). American political leader, the son of Rev. Aaron Burr, president of what is now Princeton University, and of a daughter of Jonathan Edwards. He was educated at Princeton, distinguished himself during the Arnold expedition against Quebec, and also as commander of American lines protecting New York from the British. Resigning from the army in 1779, he was admitted to the bar in 1782, elected to the state assembly in 1784, became attorney general of New York in 1789, U. S. Senator in 1791, defeating the father-in-law of Alexander Hamilton, General Colfax, and in 1800 was nominated for the vice-presidency with Jefferson. Through his friends in the Federalist party, he received more votes, but the house gave the presidency to Jefferson, making Burr the vice-president. In 1804 he ran for the governorship in New York. Resenting remarks made by Hamilton, who for years opposed him, Burr challenged Hamilton to a duel, in which the latter was mortally wounded. Burr became almost an outcast for several years. He acquired some land in Louisiana, joined with Harmon Blennerhasset in a scheme for founding a state west of the Mississippi, was arrested, tried for treason, but was acquitted. After some years in England, he settled in New York in the practice of law.

BURTON, THEODORE E. (1851–1929). One of few men to serve in the House after being in the Senate. Educated at Oberlin. Served in U. S. House, 1889–1891, 1895–1909, then in Senate, 1909–1915, again in House for term 1921–1929, when elected again to Senate in 1928. On important commissions, including the Foreign Debt and Interparliamentary Union, Chairman of Waterways Commissions, member National Monetary Commission. President of American Peace Society. Author of *Financial Crises, The Constitution, Life of John Sherman, Corporations and the State.* College lecturer.

BUTLER, BENJAMIN FRANKLIN (1818–1893). An American politician and general; born in New Hampshire; was educated for the bar. In 1862 he was military governor of New Orleans, his administration being singularly efficient, the success with which he combated the scourge of yellow fever being specially noteworthy. In 1866 he became a Republican member of Congress, which position he held for several terms. In 1862 he was elected Democratic governor of Massachusetts, but was defeated the following year for the same office. He was the Greenback-Labor and the Anti-Monopolist candidate for the presidential chair in 1884, but was defeated.

CAESAR, CAIUS JULIUS (100–44 B. C.). A Roman general, statesman, and writer. One of the most remarkable men of all time. He left Rome in 81 B. C. through fear of Sulla, but returned on his death in 78 B. C. After some study he joined Pompey. He held several minor offices in succession and with growing popularity. In 60 B. C. he was elected consul and succeeded in bringing together Pompey and Crassus and formed with them the first triumvirate in that year. In 58 B. C. he went to the provinces of Gaul, which the Senate gave to him, and for nine years conducted those brilliant campaigns upon which so much of his fame rests. He conquered the Helvetii, the Germans under Ariovistus, in 58 B. C.; the Belgae in 57 B. C.; and the Veneti in 56 B. C. In 55 B. C. Crassus went to the East, where he was slain in 53 B. C.; Pompey went to Spain; and Caesar's control of his provinces was extended for five years. He defeated Vercingetorix at Alesia in 52 B. C., and in 51 B. C. reduced the whole of the Aquitani. Pompey had returned from Spain and grew jealous of Caesar's fame, and induced the Senate to order Caesar to lay down his command. Caesar refused unless Pompey did likewise. The Senate would make no conditions and Caesar marched his army across the Rubicon river into Italy, thus defying the Senate. Pompey fled to Brundusium and Caesar followed. Pompey escaped to Greece and in three months Caesar was master of Italy. In the battle of Pharsalia, in 48 B. C., Pompey was defeated and fled to Egypt, where he was murdered. Caesar was made dictator for one year, consul for five years, and tribune for life. He went to Egypt; assisted Cleopatra successfully in the Alexandrine War; overthrew Pharnaces, son of Mithridates; thence to Africa and defeated Scipio and Cato in the battle of Thapsus (46 B. C.). In 46 B. C. he revised the calendar. In 45 B. C. he defeated Gneius and Sextus, sons of Pompey, in the battle of Munda. He was made dictator and prefect for life and consul for 10 years. He entered upon vast designs for the improvement of Rome, but was assassinated on the Ides (15th) of March, 44 B. C., by conspirators led by Brutus, Cassius, and others who were fearful of his growing power and that he might be made king.

CALHOUN, JOHN CALDWELL (1782–1850). An American statesman; born in Abbeville District, S. C.; was graduated from Yale (1804); admitted to the bar (1807); elected to Congress (1811); secretary of war (1817); vice-president (1825–1832); secretary of state (1844); returned to Senate (1845). He was an upholder of slavery, and champion of the

rights of individual states against the central government.

CALIGULA, GAIUS CAESAR GERMANICUS (12–41). Third emperor of Rome (37–41). He first adopted a policy of reckless extravagance. In one year he spent the enormous wealth left by Tiberius of 720,000,000 sesterces, or about $28,000,000. He banished or murdered his relatives, excepting his uncle, Claudius, and his sister, Drusilla. He filled Rome with executions and scenes of torture. He declared himself a god and had temples erected to himself. A conspiracy was formed among his guards and he was assassinated in 41.

CALONNE, CHARLES ALEXANDRE DE (1734–1802). French minister of finance for Louis XVI. He tried to finance the nation on unstable principles, for which he was dismissed and exiled.

CALVERT, LEONARD (about 1606–1647). First colonial governor of Maryland (1634–1647); appointed by his brother, Cecil Calvert, Lord Baltimore; they were sons of George Calvert, first Lord Baltimore.

CAMBYSES (? –522 B. C.). King of the united Medes and Persians. He was the son of Cyrus the Great. On the death of his father he made his brother, Smerdis, governor or viceroy of the eastern part of Persia or Iran. He defeated Psamethik III., king of Egypt, in 525 B. C., and made Egypt a Persian province. He conquered Nubia, but failed in his attack upon Ethiopia. An impostor in the meantime appeared as Smerdis, who had been secretly murdered by order of Cambyses, and the latter hastened home to punish him, but Cambyses died at Ecbatana in 522 B. C. He subjected the Egyptians to outrages, rifling the tombs and slaying the sacred bull, Apis.

CAMERON, SIMON (1799–1889). American political leader; born at Maytown (now Donegal), Penn. From 1845 to 1849 he was a Democratic member of the United States Senate, and as a Republican he was again a member of the Senate (1857–1861); in 1861 was appointed secretary of war in Lincoln's Cabinet; United States minister to Russia from January to November, 1862. In 1866 he was again elected to the Senate, but retired in 1877 in favor of his son, James Donald Cameron.

CANNING, GEORGE (1770–1827). British statesman and orator; born in London; entered Parliament (1794); under-secretary for foreign affairs (1796–1801); refused office in the ministry of "all the Talents" (1806), but became foreign secretary in the Tory administration succeeding it (1807). The retirement of Lord Liverpool placed him at the head of the government, but unsupported by Wellington, Peel, and the leading Tories, his premiership lasted only four months.

CANNON, JOSEPH GURNEY (1836–1926). American official, who was for many years a member of the U. S. House of Representatives, was born in Guilford, N. C., but lived most of his life in Illinois. After seven years as a states attorney, he entered the House in 1873, retired in 1891, and again from 1893 to 1913 served continuously. From 1903 to 1911 he was Speaker of the House during the 58th to 61st Congresses. He again served, this time the 18th district of Illinois, from 1915 to 1917, having served previously the 12th district.

CANUTE (*kă-nūt'*) or **KNUT** (about 995–1035). King of England, Denmark, and Norway; son of Sweyn of Denmark. On the death of Edmund Ironside, with whom he had divided the country, he was proclaimed king of England. On the death of his brother, Harold, he also became king of Denmark (1019). He secured his position by the creation of a standing army. In 1028 he invaded and annexed Norway. He died suddenly at Shaftesbury, England, and was buried in St. Peter's Abbey Church in Winchester.

CAPET (*ka-pay'*), **HUGH** (938?–996). Founder of the third Frankish dynasty, which ruled France in the direct line from 987 to 1328 and through collateral branches till the Revolution (1789). The son of a Neustrian noble, he was elected king (987) by the feudal barons in opposition to Karl of Lorraine, the last of the Carlovingians. The Capet kings ruled for 341 years. They eventually conserved the kingdom by abandoning the practice of dividing it among the sons of a deceased king, and they also by the Salic law, as they interpreted it, shut out all female rulers.

CARNOT (*kar-nō'*), **MARIE FRANCOIS SADI** (1837–1894). President of the French Republic; born at Limoges; minister of public works (1880) and finance (1885); elected president (1887); assassinated at Lyons by an Italian anarchist (1894).

CARON, HON. SIR JOSEPH PHILIPPE RENE ADOLPHE (1843–1908). Born in Quebec; B.C.L. McGill University (1865); called to bar (1865); queen's counsel (1879); member of Parliament for Quebec (1873–1891), after which he was returned for Rimouski; represented Three Rivers and St. Maurice (1896); minister of militia (1880–1892); postmaster general (1892–1896). Knight of St. Michael and St. George for services during Riel rebellion (1885).

CARRANZA (*kär-rän'sä*), **VENUSTIANO** (1859–1920). President of Mexico. For many years he was a senator for Coahuila, his native state, and in 1914, on the resignation of Huerta, he assumed the important functions of government, being elected president by a large vote in 1917, though he had been recognized by many nations two years before. Differences with Zapata, Villa, and Obregon arose, and he fled after a revolt in 1920, crossed into the United States, and died on American soil.

CARROLL, CHARLES (1737–1832). American patriot; born at Annapolis, Md. He was the last survivor of the 56 signers of the Declaration of Independence. During the Revolution he was a member of the Continental Congress (1776–1779); Federalist member of the United States Senate (1789–1791).

CARTWRIGHT, SIR RICHARD JOHN (1835–1912). Canadian statesman, lawyer, and banker; born at Kingston, Ontario. Member of Parliament (1863) as a Conservative; Liberal in 1870; minister of finance in the Mackenzie Cabinet (1873–1878); minister of trade and commerce in the Laurier Cabinet (1896); member of the Anglo-American Joint High Commission (1898).

CARVER, JOHN (1575?–1621). Leader of the Pilgrim Fathers who took refuge in Holland (1607–1608). He came to Massachusetts on the Mayflower and was the first governor of the Plymouth Colony (1620–1621). He was re-elected (1621), but died of sunstroke one month afterwards.

CASS, LEWIS (1782–1866). American statesman; born in New Hampshire, acted 18 years as governor of the Territory of Michigan, where he had served in the campaign of 1812 under Hull, whose loss of Detroit he strongly condemned. He conceived a dislike for England because of the refusal to abandon the principle of right of search, and while ambassador to France later succeeded in getting the Quintuple Treaty defeated. Later as secretary of state in Buchanan's cabinet he saw the attitude of England changed. He resigned in 1860 because he thought Buchanan not firm enough as to slavery.

CASSIUS LONGINUS (*kăsh'ĭ-ŭs*), **GAIUS.** One of the assassins of Caesar. In 44 B. C. he sided with Pompey against Caesar though holding the office of pretor from Caesar. He was promised the governorship of Syria for the following year. Fretting under the beneficence of Caesar, he planned his murder. He won over Brutus to his views and on the Ides (15th) of March, 44 B. C., murdered Caesar in the Senate. He fled to Asia Minor, made himself master of Syria, joined forces with Brutus, and met the army of Octavianus and Antony in Philippi, Macedonia. In the battle the wing commanded by Cassius was beaten by that of Antony, and Cassius in despair committed suicide (42 B. C.). His example was followed by Brutus.

CASTELAR (*kăs-tă-lär'*), **EMILIO** (1832–1899). Spanish statesman, orator and professor of history at Madrid, and leader of revolt against King Amadeus. He lived in exile for two years (1866–1868), until the king abdicated and a republic was proclaimed, but this lasted only a few months. Then he became virtually dictator, reformed the army, stopped the encroachments of the church, adopted a firm policy toward Cuba. He resigned after an adverse vote on Jan. 2, 1874, spent fifteen months in exile later, and finally sat in several parliaments.

CASTRO, CYPRIANO (1863–1924). President of Venezuela from 1899 to 1908. Founded a political party, succeeded in displacing Pres. Andrade, after the latter had served one year in office, and in holding the reins till a successful revolution, one of two or three, displaced him in Dec. 1908 in favor of Gomez. Castro tried to avoid claims presented by Great Britain and Germany after the revolution of 1902, and the case was finally taken to the Hague Court of Arbitration.

CATHERINE I. (1682–1727). Empress of Russia. Succeeded her husband, Peter the Great, in 1725. She established a privy council, opposed England indirectly, so that a squadron was sent to the Baltic in 1726, but the queen died before granting any demands.

CATHERINE II., THE GREAT (1729–1796). Empress of Russia; daughter of a Prussian field marshal; born at Stettin; became sole ruler on the death of her husband, Peter III. She was an energetic sovereign and her reign is only second in importance to that of Peter the Great. She founded the Academy and wrote several comedies. She waged war with Turkey (1772–1792) and with Sweden (1790), and as a result of these and the three partitions of Poland she extended her dominions.

CATHERINE OF ARAGON (1485–1536). Queen of Henry VIII. of England, and daughter of Ferdinand and Isabella of Spain; divorced (1533). She was an important factor in the Reformation in England. Since the Pope, after elaborate negotiations, refused to accept the divorce of Catherine as valid, Henry turned away from the Roman church.

CATHERINE DE MEDICI (1519–1589). Queen of France; daughter of Lorenzo de Medici; married Henry, Duc d'Orleans, afterwards Henry II. of France. She attempted to marry one of her sons, the Duke of Anjou, to Queen Elizabeth of England. Failing to gain her ends by moderate means, she countenanced the plot which led to the massacre of St. Bartholomew. Three of her sons ruled France.

CATILINE (*kăt'i-lin*), **(LUCIUS SERGIUS CATILINA)** (about 108–62 B. C.). A Roman noble who conspired against the republic. Governor of Africa in 67 B. C., he aspired for the consulship but was disqualified for maladministration of affairs in his province. He formed a conspiracy of young Roman nobles. This was revealed to Cicero, then consul, by Fulvia. Cicero was to be assassinated as a first step. He was kept so well informed of every step that he was able to protect himself. On November 6, 63 B. C., a meeting of the conspirators was held and new plans evolved. Cicero frustrated them. On November 8, Catiline appeared in the Senate and Cicero launched forth the famous oration against Catiline, exposing the minutest details of the plot. Catiline tried to answer but was mocked. He fled, his fellow conspirators were arrested, and, in the following year, Catiline was defeated and slain by a Roman army.

CATO, MARCUS PORCIUS, THE ELDER (234–149 B. C.). A Roman statesman. Son of a plebeian farmer, he remained a farmer till induced to go to Rome, where he quickly distinguished himself as a lawyer and was finally elected consul (195 B. C.). In 184 B. C. he was chosen censor and given the surname Censor for his thorough work in instituting reforms. In 175 B. C. he was sent to Carthage as mediator but returned, declaring that city Rome's most formidable rival. Thereafter all his speeches in the Senate concluded with "Carthage must be destroyed."

CATO, MARCUS PORCIUS, THE YOUNGER (95–46 B. C.). Roman statesman; in youth a soldier; became questor (65 B. C.); elected tribune (63 B. C.); delivered a famous speech against Cæsar's influence in the conspiracy of Catiline; always an enemy of Cæsar.

CAVOUR (*ká-vōōr'*), **CAMILLO BENSO, COUNT** (1810–1861). Italian statesman, largely responsible for the unification of all Italy. In his early life he turned from a military career to agriculture, but a sojourn in England led him to propose to the king of Sardinia a liberal constitution similar to that of England. It was adopted in 1848, and Cavour held in turn several ministries, culminating in the premiership in 1852. His alliance with Napoleon III. was broken by the latter after Sardinia and Austria went to war. Yet the forces of Austria were forced out of Italy. Cavour, after a year of retirement, joined with Garibaldi in the struggle for unification and freedom from Austria for several smaller states. This culminated shortly before his death, when the first Italian parliament met at Turin.

CECIL (*sĕs'il* or *sĭs'il*), **WILLIAM, LORD BURGHLEY** (1521–1598). Born of yeoman rank in Lincolnshire, he was graduated from Cambridge, with an unusual knowledge of Greek, became an astute courtier and politician, and finally rose to high favor with Elizabeth. He held minor offices with Edward VI. and with Mary, always avoiding extremes of religion and policy. Elizabeth made him secretary of state, a peer in 1571, and the next year lord high treasurer, a position he continued to hold till his death. No man was better fitted in his age to carry out the queen's policy of shrewd intelligence of affairs, watchful waiting, and conciliation of important elements in the realm, at the same time being harsh toward manifest offenders.

CHAMBERLAIN, AUSTEN (1863–1937). Eldest son of Joseph Chamberlain, noted below. Educated at Cambridge, and became in turn civil lord of the Admiralty, financial secretary to the treasury, postmaster general, chancellor of the exchequer, secretary of state for India, member of the war cabinet, 1918, chancellor of the exchequer again, leader of the House of Commons, and then secretary of state for foreign affairs. Thus his influence was felt from 1895 in both politics and affairs of state in England.

CHAMBERLAIN, JOSEPH (1836–1914). English statesman; born in London; thrice mayor of Birmingham before he was returned for Parliament in 1876. Thereafter he was a conspicuous figure in English public life. After the split in the Liberal ranks over Gladstone's Home Rule Bill, he coöperated with the Conservative government. In 1887 he was one of the commissioners sent to Washington in connection with the Canadian fisheries dispute. In 1895 he was appointed colonial secretary, and saw the passing of the Australian Commonwealth Act (1900). His visit to South Africa after the Boer War produced good results. His chief legislative successes are the Bankruptcy Act (1883) and the Workmen's Compensation Act (1897). He retired from the Cabinet in 1903. He was instrumental in founding the Birmingham University (1900), and became its first chancellor. In the defeat of the Unionist party in 1906, Chamberlain returned amazingly triumphant as a member from West Birmingham. In the middle of the session for that year, however, he was stricken with paralysis, and though again elected in 1910 never was able to take any prominent part in affairs. He strongly advocated a preferential tariff for the British dominions.

CHARLEMAGNE (*shär'lĕ-mān*), **or CHARLES THE GREAT** (742–814). King of the Franks after 768 and emperor of Rome from 800 to 814. He was the son of Pipin the Short. He took the eastern or Germanic parts of his father's empire in 768 and his brother took the western part. The brother, Karlman, died in 771 and Charlemagne took the whole empire. He thus shut out the young sons of his brother. Their mother fled to Desiderius, king of the Lombards. This brought on war and after a 10 months' siege of Pavia Desiderius was compelled to retire to a monastery. In 777 Charlemagne proclaimed himself king of the Lombards; confirmed the donation of lands by Pipin to the pope. He had crossed the Alps twice into Italy to reach his enemies. He invaded Spain in 778 and while returning to put down a rebellion of the Saxons his rear guard was attacked and almost annihilated in the pass of Roncesvalles, where Roland, the hero of a voluminous literary legend, fell. He completed the conquest of Spain and in 800 was crowned emperor of the West by the pope at Rome. In 787 he completed the conquest of Lombardy. In 804 he conquered the Saxons, with whom he had waged a long war. His attainments in the promotion of art, literature, religion, and civilization mark him as one of the most illustrious men of the Middle Ages and of all time. He was buried at Aix-la-Chapelle and was succeeded by his son, Louis the Pious.

CHARLES I., CHARLES STUART (1600–1649). King of Great Britain and Ireland; married the French princess, Henrietta Maria; succeeded to the throne (1625). For 11 years he governed without Parliament, levying "tonnage and poundage" (1629), granting monopolies, and exacting fines. His two chief advisers were Laud (archbishop of Canterbury) and Strafford. The latter was impeached by the Long Parliament (1640). The long struggle between the king and Parliament ended in civil war, and the final trial and execution of the king.

CHARLES II., CHARLES STUART (1630–1685). King of Great Britain and Ireland; crowned at Scone, January 1, 1651; invaded England in August, but was routed by Cromwell at Worcester. He was recalled to the throne of his father (1660). In 1662 he married Catherine of Braganza. The Test Act of 1673 was aimed at the king's favoritism of Catholics. The trumped-up plot of Titus Oates (1678–1680) and the Rye House Plot (1683) brought many to the block.

CHARLES V. (1500–1558). Emperor of Germany; king of Spain as Charles I. He summoned the Diet

of Worms (1521) to check the advance of Luther's teachings. He soon was at war with his great rival, Francis I. of France and Pope Clement VII., and in 1527 sacked Rome and took the pope prisoner. The Diet of Augsburg (1530) led to the formation of the Smalkaldic league of Protestant princes. A threatened invasion by the Turks compelled him to conciliate the Protestants. He defeated Barbarossa and captured Tunis (1535), setting free thousands of Christian slaves. Defeated by the Protestants under Maurice of Saxony, he agreed to the treaty of Passau (1552) and to the peace of Augsburg in 1555. In the following year he abdicated in favor of his son Philip.

CHARLES VI. (1368–1422). King of France (1380–1422). Son and successor of Charles V. During his minority he was in the care of his four uncles, of whom the duke of Anjou was regent. In 1388 Charles took the government into his own hands and ruled well until he became insane. A regent was appointed and civil war broke out again. The nation was divided into the parties of Orléans and Burgundy. They each at times called in the aid of the English. Henry V. took advantage of the conflict and won the victory of Agincourt that left France almost helpless in 1415. Massacres and civil war waged until 1420, when, by the treaty of Troyes, Charles disinherited his son and accepted Henry V. as his successor. On his death in 1422 most of France was in the hands of the English.

CHARLES VII. (1403–1461). King of France (1422–1461). Son and successor of Charles VI. All France north of Paris was in the hands of the English, who proclaimed as king Henry VI. of England, then only 18 months old, with the duke of Bedford as regent. In 1427 the French obtained their first successes. In October, 1428, the English besieged Orléans, the most important city held by Charles. In 1429 the French were defeated at Harengs. Then Joan of Arc appeared and raised the siege of Orléans in 1429; Charles was consecrated king at Rheims in the same year; the English gradually lost their possessions; and the duke of Burgundy, their ally, went over to Charles. In 1436 Charles entered Paris and the English gradually lost all of the French possessions except Calais. Charles, during the rest of his reign, vastly improved the condition of his empire.

CHARLES X. (1622–1660). King of Sweden, nephew of Gustavus Adolphus (q. v.), succeeding when Queen Christiana abdicated in 1654. With an immense army he subdued Warsaw and Cracow in Poland, but was forced to retire from the siege of Czenstochow. He made an alliance with Brandenburg, roused the Danes to declare war, and crushed them in 1658 after crossing two arms of the sea on ice, an unheard-of feat up to that time. The Danes had great difficulty to get him to suspend hostilities long enough to grant them an humiliating peace, by which they lost much territory on the Swedish peninsula. Having intended a war against Norway, he died on a journey back to Sweden to get his parliament to grant supplies.

CHARLES XII. (1682–1718). King of Sweden from 1697. Russia, Denmark, and Poland combining against him, he besieged Copenhagen, compelled Denmark to sue for peace, and defeated the Russians. Invading Poland, he forced King Augustus to abdicate. He then marched into Russia, but was routed at Pultowa, and fled for a time to Turkey. He next attacked Norway, but was slain at the siege of Frederikshald.

CHARLES XIV., CHARLES JOHN (1763–1844). King of Sweden and later of Norway and Sweden. As one of Napoleon's generals he was known as Jean Baptiste (Jules) Bernadotte, the son of a French attorney. After a series of brilliant successes in the French wars he became a general in 1794 and minister of war in 1798. On being elected crown prince of Sweden in 1810, he went to Stockholm, changed his name to Charles John, turned against Napoleon, and helped the allies defeat him at Leipzig in 1813. Then he compelled the Danes to give up Norway, which became part of the Swedish kingdom. In 1818 he succeeded Charles XIII., and his reign was peaceful and uncommonly prosperous. Of several attempts by generals of Napoleon to establish a royal house in some foreign land, Bernadotte was the only one who succeeded.

CHARLES MARTEL or **CHARLES THE HAMMER** (689–741). Son of Pipin of Heristal and mayor of the palace under the last of the Merovingian kings of the Franks. He was made mayor of the palace on the death of his father in 714. He conquered the West Franks and became ruler of all the Franks. He is most famous for his wars against the Saracens, who settled in Spain and attempted to cross the Pyrenees and conquer the rest of Europe. He overthrew them in 732 in a great battle near Poitiers in which their chief, Abd-er-Rahman, fell. He defeated them again in 738 and took Languedoc from them. He left his kingdom to his two sons, Karlman and Pipin the Short.

CHARLES THE BOLD (1433–1477). Last duke of Burgundy, son of Philip the Good, in early youth showed military prowess and assumed virtual control with his father's consent in 1465. Much of his reign was taken up with a conflict with Louis XI., the crafty monarch of France, with whom Charles made a brief truce in return for exchange of some of the privileges gained by Louis from Philip. From 1470 on tried to extend his power, but died in battle with the Swiss and Lorraine men before Nancy. Walter Scott's *Quentin Durward* gives a fictional, but picturesque account of these two men, Charles and Louis XI. Charles the Bold has often been called the last representative of the feudal spirit. In private he favored arts and learning, and had a marvelous way of winning his subjects.

CHARLOTTE (1840–1927). Last empress of Mexico, daughter of Leopold I. of Belgium, married to Archduke Maximilian of Austria in 1857, and accepted with him the Mexican crown in 1864. When her husband needed alliance, on the withdrawal of the French troops of Napoleon III. from Mexico, she went to Europe for help, but became insane in 1866, the year before Maximilian was shot, and the rest of her long life was clouded.

CHRISTIAN IX. (1818–1906). He became king after Frederick VII. (who left no direct heirs), by decree of the powers at a meeting in London in 1852, ascending the throne the next year. His reign was troubled with the war with Germany by which Schleswig and Holstein were lost for the time to Denmark, and by troubles with the radical elements, which finally came into power in 1901. Christian is better known now as the father of monarchs: His son became Frederick VIII.; his second son George became king of Greece; his grandson Charles became King Haakon VII. of Norway in 1905 and another became prince and later king Constantine of Greece; his daughter Alexandra became wife of Edward VII. of England, and another, Dagmar, became wife of tsar Alexander III. of Russia.

CHRISTIAN X. (1870–). Became king of Denmark and Iceland on the death of his father Frederick VIII. in 1912. He was immensely popular with his subjects, acknowledged Iceland as an independent kingdom, with crown joined to that of Norway in 1919, and did much to unite the kings of Sweden, Norway, and Denmark in a defensive neutrality during the World War. Slesvig Nord was given back to Denmark after the World War.

CHRISTINA (1626–1689). The daughter of the great Gustavus Adolphus, became queen of Sweden in 1650, but lost her interest in state affairs in favor of literature, relinquished the throne to her cousin Charles Gustavus in 1654, became a Roman Catholic, and lived abroad most of her remaining years. She tried in vain to reclaim the throne after the death of Charles in 1660.

CHURCHILL, WINSTON LEONARD SPENCER (1874–). Entered the army in 1895, and served as war correspondent with the forces of Spain in Cuba, 1895; then in India; and next in South Africa during the Boer War, when he was captured but escaped in about a month, witnessing many important engagements in 1900. Elected to Parliament in 1900; president of the board of trade, 1908–10; home secretary, 1910–11; first lord of the admiralty, 1911–15. Served in France in 1916, and became minister of munitions the next year. Wrote books describing his experiences in various campaigns. He again entered the cabinet as secretary of state for war, 1918–21, was in the Colonial Office the next year, and chancellor of the exchequer, a post held once by his father, in 1924. Later he did much to secure an understanding on international war debts.

CICERO, MARCUS TULLIUS (106–43 B. C.). The greatest orator of Rome and one of the most famous statesmen. Studied law and oratory and traveled abroad; elected questor in 76 B. C.; delivered his six orations against Verres, and was elected consul in

63 B. C. He frustrated the conspiracy of Catiline (see CATILINE); was charged by his enemies with putting citizens to death without trial and was obliged to leave Rome and live in Thessalonica in 58 B. C. He was recalled in 16 months, and, while opposed by his own party, was courted by Pompey and Cæsar. After the battle of Pharsalia he joined Cæsar. In the civil war he supported Octavianus, and denounced Antony in his Philippics. When the triumvirate of Octavianus, Lepidus, and Antonius was formed, Cicero was proscribed and his life was sought. While trying to escape in a covered litter, old and infirm, he was overtaken by soldiers and, without resistance, offered his neck to the executioners.

CINCINNATUS (*sĭn-sĭ-nā'tŭs*), **LUCIUS QUINCTIUS.** A famous Roman patrician. When the consul, Lucius Minucius, was surrounded by the Aequi, Cincinnatus was called from his simple farm life to act a dictator. He saved the consul, and, after a dictatorship of 16 days, retired again and took up his simple life. He was again, at the age of 80, called as dictator in an emergency and suppressed a threatened uprising of the plebeians (439 B. C.).

CLARK, CHAMP (1850–1921). After serving as president of Marshall College, West Virginia, Clark entered the practice of law at Bowling Green, Missouri, where he held several minor offices, served from 1889 to 1892 in the Missouri House, and then from 1893 to 1895 and 1897 to 1919 in the United States House, where he was speaker from 1911 to 1919. He proved himself an impartial and able presiding officer, beloved by all members. In 1912 he led in the Democratic convention for 8 ballots as candidate for president, but finally had to give way before the growing strength of Woodrow Wilson.

CLAUDIUS (*klâ'dĭ-ŭs*) **(10 B. C.–54 A. D.).** Roman emperor after 41, the first one so raised by the soldiers to that rank. He did many things to encourage soldiers, including pay for them, to give more power to his officials, and to build public works, which for 11 years kept 30,000 laborers engaged. He took personal command of the Roman campaign in Britain, but relied too much on advice of his wives, the second of whom finally poisoned him with mushrooms, because she feared Claudius was going to disinherit her son Nero.

CLAY, HENRY (1777–1852). American orator and statesman; born in Hanover County, Va.; admitted to the bar (1797); elected to Kentucky legislature (1803); filled out the unexpired term of John Adair in the United States Senate (1806–1807); elected to the House of Representatives (1811) and was re-elected speaker four times. In 1824 he was a candidate for the presidency, and in 1832 was again defeated as the candidate of the Anti-Jackson Party; was again in the Senate (1831–1842); presidential candidate (1844); re-elected senator (1848). He was known as "The Great Pacificator," and was one of the greatest orators America ever produced.

CLEMENCEAU (*klā-măn-sō'*), **GEORGES** (1841–1929). French journalist, physician, and statesman, born in Vendée, spent four years after 1865 in the United States as a teacher and journalist. He was in the army of Grant at Richmond. Returning to France, he practiced as a physician at Montmartre, of which he served as mayor. He was a member of the Chamber of Deputies from 1876 to 1893 and from 1902 to the close of World War. With Zola he espoused the cause of Alfred Dreyfus, and to defend him founded a daily in 1903, in which Zola's celebrated letter "I Accuse" was printed. For many years Clemenceau had been known as the destroyer of ministries by his oratory, his brilliant editorials, and sympathies for the cause of justice. During his first term as premier from 1906 to 1909, the law separating church and state in France was put into effective operation. In November 1917, after the fall of the ministry of M. Painlevé, Clemenceau again became premier, at the age of 76, and succeeded in uniting the various political elements of France in one grand effort toward victory. Always a dominant figure during these last years, during the Peace Conference his influence was felt as president and spokesman for all of France. Having achieved most of his own ideals, especially in the defeat of Germany and the restoration of Alsace-Lorraine, M. Clemenceau retired to a well earned rest from public life. He spent the last years in writing, just before his death having virtually completed his comments on the World War, especially with regard to the United States.

CLEOMENES III. (*clē-ŏm'e-nēs*) (? –220 B. C.). The last great statesman of Greece. He became king of Sparta about 235 B. C. His efforts toward reform were directed to abolish the office of ephors, restore the kingship, and by reforms to make Sparta the leading power in Greece. Defeated in battle, he fled to Egypt, and finally took his own life.

CLEOPATRA VI. (*klē-ô-pā'trà*) (68–30 B. C.). Queen of Egypt and the most fascinating woman of all time. She was the daughter of Ptolemy XIII., Auletes. She succeeded to the throne in 51 B. C. and shared the government with her younger brother, whom she afterwards poisoned. She captivated Cæsar and, later, Antony. Rome declared war on her and she and Antony were defeated in the sea fight of Actium in 31 B. C. She fled to Egypt and Antony followed. Octavianus, afterwards Augustus, went to Egypt. Cleopatra failed to captivate him and after the death of Antony, fearing that Octavianus would take her to Rome in triumph, she poisoned herself.

CLEVELAND, GROVER (1837–1908). Twice president of the United States, was the son of a Presbyterian minister, Rev. Richard F. Cleveland, stationed at Caldwell, N. J., and later at Fayetteville and Clinton, N. Y. His plan of attending Hamilton College was frustrated when he was sixteen by the death of his father. For a time he taught in the N. Y. Institution for the Blind, where he formed a life-long friendship with Fanny J. Crosby, the eminent hymnist. Later he went to Buffalo, was admitted to the bar, and held several local offices, including that of assistant district attorney, sheriff, and mayor. After two years as governor of New York, in 1884 he was elected president and again for a second term in 1892, serving till 1897. Both as governor and mayor he attained fame for independence, civil service reforms, vetoes of many appropriation bills (especially pension grants), and attempts to place the country on sound financial foundations. When Great Britain seemed to him to interfere too much in affairs of Venezuela, President Cleveland invoked the Monroe Doctrine, and war was narrowly averted.

CLINTON, DE WITT (1769–1828). American political leader; born at Little Britain, N. Y.; admitted to the bar in 1789; member of the United States Senate (1802–1803); thrice mayor of New York, and again state senator (1806–1811); lieutenant governor of New York (1811–1813). He was the chief promoter of the Erie Canal, which for long was derisively known as "Clinton's Ditch."

CLINTON, GEORGE (1739–1812). At first a sea man, a lawyer and assemblyman, a member of the second Continental Congress, he served as a general in the Revolution, first governor of New York, for 18 years in succession, and finally as vice president from 1808 to his death. He was defeated for the presidency by Madison, did all he could to prevent the ratification of the Constitution by New York, because he objected to certain articles, and as president of the Senate in 1811 cast the deciding vote which killed the charter of the Bank of the United States.

CLIVE (*klīv*), **ROBERT LORD** (1725–1774). The creator of the Indian Empire; born at Styche, near Market Drayton. At 18 he went to India and entered the service of the East India Company. He rose from ensign to general by his marvelous energy and skill; won several victories over the French; and in 1757, at the head of only 3,000 British troops, he routed Siraj-ud-Daula and his army of 65,000. He was appointed governor general of India (1765). Two years later he returned to England in broken health.

CLOVIS (*klō'vĭs*), or **CHLODWIG** (about 481–511). Founder of the kingdom of the Franks. He overthrew the Romans and the Gauls in 486, near Soissons, and extended his conquests to the Loire. In 493 he married Clotilda of Burgundy, a Christian princess. In 496, in battle with the Alemanni, being hard pushed, he vowed to accept Christianity if successful. On his victory he kept his vow, and on Christmas Day he and 3,000 followers were baptized. He defeated and slew Alaric II., king of the Visigoths, at Vouillé and added much to his dominions (507–510). He made Paris his capital and died there in 511. His kingdom was divided among his four sons.

COBDEN, RICHARD (1804–1865). An English statesman and economist, known as the apostle of free trade. First brought into public notice by his efforts to abolish the Corn Laws in which, after seven years' hard work, he was successful; elected member of Parliament (1841). His uprightness of character gained for him the respect of continental nations, as

well as of his own country, but he declined all civic honors.

COLLINS, MICHAEL (1892–1922). Irish leader and advocate for freedom. In 1916 he was one of the party at Easter which seized the post office at Dublin, and in 1918 he was imprisoned briefly for treason. Later he was elected to the Dail Eireann, became finance minister, and after the treaty of adjustment with Great Britain, became commander in chief of the forces of the Irish Free State, but was killed in a skirmish with irregulars in 1922.

CONEYBEER (*kŏn'ē-beer*), **FREDERICK WILLIAM** (1859–). South Australian statesman and labor leader. Emigrated from his birthplace, Bristol, England, with his father in 1865; lived in New South Wales till 1881; and then in South Australia became identified with many reform movements, and minister of education, 1908–9, and 1910–12; M. P. for East Torrens, from 1893, except for 1921–24, and speaker of the Assembly for South Australia, 1915–21.

CONKLING, ROSCOE (1829–1888). American political leader, orator, and lawyer; born at Albany, N. Y.; was a representative in Congress (1859–1863 and 1865–1867), and was a member of the Senate (1867–1881). He and his colleague, Thomas C. Platt, resigned in 1881 because President Garfield appointed William H. Robertson, an anti-Conkling man, collector of the port of New York, without consulting them.

CONRAD III. (1093–1152). First German emperor of the house of Hohenstaufen; elected by the anti-papal faction of the German princes (1138); son of Frederick of Swabia. The duchy of Franconia was given to him by Henry V. in return for his help during the civil war. Internecine troubles between the Ghibellines, of which he was the head, and the Guelfs under Henry the Proud of Bavaria and Saxony, never gave him leisure to be crowned in Rome. In 1147, as a result of St. Bernard's preaching, a vast crusade with Conrad at its head set out for the Holy Land, but it ended disastrously.

CONSTANTINE I. (*kŏn'stăn-tĭn*) (1868–1923). King of the Hellenes, succeeded his father George I. in 1913. He was educated in Germany, formed connections with the dynasty there, and in later Balkan wars became very popular at home. Affecting neutrality in 1914, he was influenced by Venezelos (q. v.), to declare sympathy for the western allies in the Dardanelles campaign, and later he was forced to demobilize his army in large part and in 1917 to abdicate, but late in 1920 he returned, though he was forced to abdicate finally in September 1922, retiring to Palermo, where he died.

CONSTANTINE I., THE GREAT (FLAVIUS VALERIUS AURELIUS CONSTANTINUS) (272–337). A Roman emperor (306–337) who served under Diocletian in Egypt, and Galerius in Persia; the latter was jealous of Constantine's father, Chlorus, who had succeeded Diocletian in 305, and attempted to get rid of Constantine, who joined his father in the West and succeeded him (306). This caused a quarrel in which six emperors participated at once. Constantine conquered the West and after Galerius's death (311) defeated Licinius in the East and became sole ruler of the Roman world of which he made Constantinople the capital. He became a Christian and was baptized just before his death. He presided at the first sitting of the Council of Nice (Nicæa) in 325.

CONSTANTINE XI., PALAEOLOGUS. Last of the Byzantine emperors and last of the Palaeologi (1394–1453). The son of Manuel II. Though an intelligent and capable ruler his position was hopeless. Mohammed II. was preparing for the final assault on Constantinople and Constantine's appeal to Christendom was unavailing. After a long siege the city was captured on May 29, 1453. Constantine was slain. Mohammed gave his body fitting burial.

COOLIDGE, CALVIN (1872–1933). Thirtieth president of the United States, was born at Plymouth, Vermont, on July 4, 1872, the son of John Coolidge, farmer and storekeeper. After his graduation from Amherst in 1895 he entered into the study and practice of law at Northampton, Mass., and held various city and state offices. He was city solicitor, mayor, member of the state senate (1912–15, and president, 1914–15), governor for two terms (1919–20), and became vice-president on March 4, 1921. On Aug. 3, 1923, he took the oath of office as president on the death of Warren G. Harding. After completing the Harding term, he was elected president to serve from 1925 to 1929. He retired to Northampton, Mass. resumed his old life there on March 5, 1929, and later did considerable writing. In 1930 Mr. and Mrs. Coolidge made a trip to California and dedicated the Coolidge dam in Arizona.

COOPER, ANTHONY ASHLEY. See SHAFTESBURY.

CORIOLANUS (*kō-rĭō-lē'nŭs*), **GAIUS** or **GNAEUS MARCIUS.** A famous Roman patrician who for his opposition to the plebeians and their tribunes was impeached and banished. He went to live with the Volsci, a neighboring tribe. He led them against Rome (491 B. C.), and at the moment of victory yielded to the prayers of the Roman matrons, headed by his mother and his wife, Volumnia, and her two children. He withdrew his forces and retired to private life.

CORTELYOU, GEORGE BRUCE (1862–1940). After graduating from the Westfield, Mass., Normal school and some years as a principal in New York, and some in business he became assistant secretary and later secretary to Presidents McKinley and Roosevelt, the latter of whom advanced him to three cabinet positions in turn, the new department of commerce and labor, post office, and treasury (1903–09). He was chairman of the Republican Committee from 1904 to 1907, and after 1909 was president of the Consolidated Gas Company of New York, and a director in various other corporations.

CORWIN, THOMAS (1794–1865). American political leader and orator; born in Bourbon County, Ky.; successively a member of Congress (1830–1840), governor of Ohio, United States senator (1844–1850), secretary of the treasury (1850–1853), and United States minister to Mexico (1861–1864). "The most famous stump-speaker of his time."

COSGROVE, WILLIAM THOMAS (1880–). President of the Irish Free State, was born in Dublin, became one of those who refused to follow John Redmond as a leader in 1914, was elected to represent Kilkenny in 1917, and minister of local government later. On the death of Griffith and assassination of Collins, provisional presidents, Cosgrove rose to become head of the Irish State. His administration organized order out of chaos in Ireland.

COSTIGAN, JOHN (1835–1916). Canadian statesman, who served in the House of Commons from 1867 to 1898. He was active in securing more liberal educational privileges for those of Catholic faith. Minister of inland revenue, secretary of state, and minister of fisheries and marine, 1882–1896. Afterward identified with large business enterprises.

COX, JAMES MIDDLETON (1870–). American governor and presidential candidate, became a journalist on the Cincinnati *Inquirer* and later purchased several papers in Ohio and the Miami, Fla., *Metropolis*. He served in Congress from 1909 to 1913, was governor of Ohio from 1913 to 1915 and 1917 to 1921. Many important reform measures were passed while he was chief executive of Ohio, including some of benefit to labor. In 1920 as Democratic candidate, he received 127 electoral votes to 404 for Harding, and a popular vote of nine millions compared with sixteen for his rival.

CRASSUS (*krăs'ŭs*), **MARCUS LICINIUS** (? –53 B. C.). A Roman triumvir. He helped Sulla at the battle of the Colline Gate in 82 B. C., when the fate of the Marian party was sealed. He crushed Spartacus and the gladiators in 71 B. C., and in 70 B. C. was made consul with Pompey, whom he hated. Crassus was the most wealthy of the Roman citizens and Caesar courted him. While consul, Crassus gave a dinner to the people, which was spread on 10,000 tables, and distributed to each person a supply of corn for three months. Plutarch says Crassus had 7,000 talents (about $8,260,000); Pliny says his lands were worth 8,000 talents ($9,440,000). In 60 B. C. he formed with Pompey and Caesar the first triumvirate. In 55 B. C. as consul with Pompey he obtained the province of Syria, and prepared a campaign there. He was defeated by the Parthians and betrayed into a conference with the general, Surenas, by whom he was slain.

CRISPI (*krēs'pē*), **FRANCESCO** (1819–1901). Italian statesman and one of the leaders in the movement for a united Italy. He became a journalist, a lawyer, a revolutionary leader, but had to flee from Sicily to France, to England, and other countries. At first a republican, he became a monarchist that Italy might be united. With Garibaldi and others

he entered Sicily in 1859–60, and later became deputy, president of the chamber, and premier of the new Italy. After 1898 he lived in retirement. He did much to increase the prestige of Italy abroad and strongly favored an entente with Germany and Austria.

CROCKETT, DAVID (1786–1836). American pioneer, politician, and humorist; born at Limestone, Tenn.; member of Congress (1827–1829 and 1831); took part in the Texan War and was killed in the Alamo (March 6, 1836). His oft-quoted motto was, "Be sure you are right, then go ahead." He is said to have written or dictated *A Life of David Crockett*, which was published in 1835, but two or three other continuations are probably forgeries.

CROESUS (*krē'sus*) (590–546 B. C.). Last king of Lydia; son of Alyattes; renowned for his vast wealth; declared war on Cyrus, king of Persia, the oracle of Delphi assuring him that he would destroy a great empire, but his own empire paid the penalty. He was defeated and captured.

CROKER, RICHARD (1843–1922). New York politician and leader of Tammany (1886–1902); succeeded John Kelly; conducted mayoralty campaigns of Hugh Grant (1889), Thomas F. Gilroy (1893), and Robert Van Wyck (1897); supported Bryan for president (1900); retired after Seth Low's election (1902); freeman of Dublin (1908).

CROMER, EVELYN BARING, first Earl of (1841–1917). British soldier and statesman, often called the "maker of Egypt." After a brief military career, he became secretary to the earl of Northbrook, commissioner of the debt of Egypt, placing the finances of that disordered land on a firm basis, controller-general, and finally consul general for England from 1883 to 1907, in which position he attained power next to that of a viceroy.

CROMWELL, OLIVER (1599–1658). The great protector; born in Huntingdon, England. At the outbreak of the Civil War he joined the Parliamentary forces as a cavalry captain (1642) and rose to be the greatest English military leader of the time, as was demonstrated at Marston Moor (1644), Newbury (1644), Naseby (1645), Preston (1648), Dunbar (1650), and Worcester (1651). He was equally distinguished as a statesman, and safeguarded English liberties. He signed the death warrant of Charles I. (1649), and was elected protector. Summoned to Scotland, when Charles II. had been proclaimed king, he defeated the Scots at Dunbar (1650) and at Worcester (1651). He dissolved Parliament in 1653 and relied upon the support of the army.

CROMWELL, THOMAS (c. 1485–1540). Influential minister and confidant of Henry VIII., Cromwell succeeded in getting several notable men degraded or dismissed, but he finally went too far and was executed after he lost the favor of the king. He served Wolsey till the latter's fall, as one of the chief agents in the Reformation, and in the dismantling of some of the monasteries, Lord Privy Seal, Lord Chamberlain, and Earl of Essex. Shakespeare's **Henry VIII.,** Act 3, has reference to Wolsey and Cromwell.

CURZON (*kûr'zŏn*), **GEORGE NATHANIEL** (1859–1925), first Baron Curzon of Kedelstone. During the earlier part of his career, he traveled widely in Asia, writing as a result three important books on the Far East. He became secretary of foreign affairs in 1895, governor general of India from 1899 to 1905, an ally of Lord Lansdowne, gave much attention to reform at Oxford as chancellor, joined the Asquith cabinet as lord privy seal, and was president of the Air Board. Later he showed great ability in trying to adjust the troubles over Turkey and Russia, but was disappointed that he did not receive an important post in either of the Baldwin cabinets. Lord Curzon married twice, each time an American lady.

CYRUS THE GREAT. The founder of the Persian Empire and the conqueror of Babylon (600–529 B. C.). He was the son of Cambyses and grandson of Astyages, whose kingdom he overthrew, and gained the mastery of Media before 550 B. C. He vanquished Crœsus, king of Lydia, in 546 B. C.; conquered Babylon, sending Nabonidus into exile and putting his son, Belshazzar, to death in 539 B. C. He set the captive Jews at liberty in 537 B. C. He fell, fighting, in 529 B. C. in a war against either the Scythians or an Indian tribe. The details of his reign are recorded upon the famous cuneiform cylinder found a few years ago. Xenophon made him the hero of his *Cyropædia*, a famous historical romance.

DALE, SIR THOMAS (? –1619). A colonial governor of Virginia (1611, 1614–1616), whose administration was noted for pitiless severity. His laws were known as "Dale's Code," and the colonists referred to the years 1611–1616 as their "five years of slavery." As commander of the English fleet, he defeated the Dutch near Batavia in the East Indies in 1618, and died the next year at Masulipatam.

DALLAS, ALEXANDER JAMES (1759–1817). An American politician; born in the island of Jamaica; educated in Great Britain, and removed to Philadelphia (1783). Secretary of the treasury in Madison's cabinet (1814–1816); secured the passage of an act to incorporate a new United States bank (1816); was secretary of war as well as of the treasury (1815–1816).

DALLAS, GEORGE MIFFLIN (1792–1864). American statesman and diplomat; United States senator from Pennsylvania (1831–1833); attorney general of Pennsylvania (1833–1835); American minister to St. Petersburg (1837–1839); vice-president of the United States (1845–1849); cast the deciding vote for the tariff bill (1846); minister to England (1856–1861).

DAN'DOLO, ENRICO (1108–1205). Doge of Venice (1192); member of one of the 12 great families of Venice. He helped the Fourth Crusade with money and ships, and was present at the siege of Constantinople. He is the "blind old Dandolo, the octogenarian chief, Byzantium's conquering foe" of Byron's *Childe Harold.*

DANIELS, JOSEPHUS (1862–). Secretary of the Navy under Wilson, 1913–1921. Trained for the law, but entered journalism instead and became editor of Raleigh, N. C., *State Chronicle* in 1885, which was consolidated with three other papers eventually, under the name of *News and Observer.* Member Democratic National Committee from 1896 to 1916. He advocated a large and effective navy.

DARIUS I. (*dā-rī'ŭs*), or **DARIUS HYSTASPES.** Darius is the title of several Persian kings and is used much the same as Pharaoh or Cæsar by the Egyptians and the Romans respectively. Darius Hystaspes, the first of the line, reigned from 522 to 486 B. C. He led a plot to murder Smerdis and gained the throne. Under him the kingdom was divided into 20 satrapies or provinces ruled over by satraps. Inscriptions record nine or ten rebellions against Darius. He besieged Babylon unsuccessfully for two years, after which his general, Zopyrus, took it in 516 B. C. by stratagem. He began the great rock inscription at Behistun in 514 B. C. and thus recorded the chief events of his reign. In 513 B. C. he crossed the Bosporus with 700,000 men on a bridge of boats and reached the Danube in an unsuccessful campaign against the Scythians. He sent 80,000 men to conquer Thrace. In 501 B. C. the Ionian cities in Asia Minor revolted; the Athenian forces helped them; Sardis was burned and Darius resolved to invade Greece to punish them. In 492 B. C. he sent Mardonius with a fleet to attack Thrace and Macedonia and at the same time directed a fleet against Greece. The fleet was shipwrecked and dispersed. In 490 B. C. he tried again, but his army was defeated by the Athenian force under Miltiades at Marathon and the fleet was also beaten. While preparing for a third attempt, Darius died in 486 B. C., and was succeeded by his son, Xerxes.

DARIUS III., CODOMANNUS. The great-grandson of Darius II. He came to the throne in 336 B. C. Early in his reign Alexander the Great of Macedon defeated him at Issus (333 B. C.), capturing his mother, wife, and three children. He was again beaten by Alexander at the battle of Gaugamela near Arbela in 331 B. C., after which Darius fled to Ecbatana; thence he went to the northern provinces, where he was seized by Bessus, the satrap of Bactria. Alexander in a fit of generosity went to attack Bessus and to relieve Darius. Bessus fled, and, on the refusal of Darius to accompany him, stabbed him. The scouts of Alexander found Darius dying. Alexander had him buried in the royal tomb. With his death the Persian Empire came to an end.

DAUNOU, PIERRE CLAUDE FRANCOIS (1761–1840). French statesman; born at Boulogne-sur-mer; entered the Congregation of the Oratory (1777); member of National Convention (1792); opposed execution of Louis XVI.; refused to support proscribing of Girondists. Imprisoned and narrowly escaped death. First president of the Council of Five Hundred.

DAVIES, LOUIS HENRY (1845–1924). Canadian statesman and authority on fisheries. In 1882 he en-

tered Parliament, in 1896 became minister of fisheries, in 1901 a judge of the supreme court of Canada. In 1877 he was counsel for Great Britain in the fisheries arbitration at Halifax, in 1897 with Sir Wilfrid Laurier represented his country in the Bering sea case, and in 1898–1899 was a member of the Anglo-American commission. In 1918 he became chief justice and a member of the council of Canada.

DAVIS, JEFFERSON (1808–1889), An American statesman and president of the Confederate States; born in Kentucky; was graduated at West Point (1828); took part in the Black Hawk and Mexican wars; Mississippi member of the United States Senate (1847–1851). In 1851 he ran unsuccessfully for the governorship of Mississippi; was secretary of war in Pierce's Cabinet (1853–1857); reëlected to Senate (1857). He was preëminently the spokesman of the Southern States, of which he was elected provisional president (1861) and definitely elected for six years (1862). He held office throughout the Civil War; was captured near Irwinville, Ga., on May 10, 1865, and for two years imprisoned at Fortress Monroe, where he awaited trial for treason. He was released on bail, and though indicted for treason proceedings against him were abandoned. After 1879 he retired to an estate in Mississippi, where he passed the remainder of his life. He published the *Rise and Fall of the Confederate States* (1881).

DAVIS, JOHN WILLIAM (1873–). American lawyer and public official, a West Virginian by birth, received his college training at Washington and Lee University, taught law there for a year, and was a member of a prominent law firm in Clarksburg, West Va., from 1897 to 1913. Having been a member from West Virginia in Congress from 1911 to 1913, he resigned to become solicitor general of the United States, a position he held from 1913 to 1918. He was Ambassador to Great Britain from 1918 to 1921; counsellor of the Red Cross from 1913 to 1918; and a member of the commission appointed to negotiate with the Germans for the exchange of prisoners after the World War. President of the American Bar Association, 1922. Mr. Davis, as Democratic candidate for the presidency in 1924, received 136 electoral votes to 382 for Mr. Coolidge.

DAVITT (*dăv'ĭt*), **MICHAEL** (1846–1906). Irish nationalist leader. At eleven years of age he lost his right arm in a cotton mill accident while at work there. Becoming a Fenian in 1865, he was arrested in 1870, convicted, and served seven of a fifteen-year sentence for treason, and afterward he served two short terms for similar offenses. After residing in the United States, he persuaded Parnell to join in the land and the freedom questions, but later they divided on questions of policy. Later he helped form the United Irish League. Davitt was an energetic, sincere and able advocate of freedom by peaceful and constitutional means. In later life he allied himself with some of the socialists.

DAWES, CHARLES GATES (1865–). American financier and vice-president, was graduated from Marietta College, practiced law in Lincoln, Nebr., from 1887 to 1892; and then engaged in business and banking interests in Evanston and Chicago, Illinois. Assisted in the movement resulting in the nomination of William McKinley for the presidency in 1896. Controller of the Currency, 1897–1902. Since 1902 served as chairman of the board, Central Trust Company of Illinois. Served in the engineering corps during the World War, attaining the rank of brigadier general in October, 1918, but resigned from the Army in 1919, and returned to the United States. Director of the Federal Budget in 1921 and president of commission to inquire into the ability of the Germans to manage a budget. Elected vice-president in 1924. Awarded half of the Nobel peace prize with Austen Chamberlain in 1925, Dawes gave his portion toward the endowment of the Walter Hinds Page School of International Relations. In 1929 he became Ambassador to Great Britain.

DAY, WILLIAM RUFUS (1849–1923). American statesman; born at Ravenna, Ohio. Judge of the Court of Common Pleas (1886); secretary of state to succeed John Sherman (1898); chairman of the United States Peace Commission at Paris to arrange terms of peace with Spain (1898); judge of the United States Circuit Court (1899); associate justice of the Supreme Court 1903–1922, when he resigned.

DEAK (*dā'ăk*), **FRANCIS** (1803–1876). Hungarian statesman who counseled moderate measures in the stormy days of the struggle with Austria. He always opposed the extremes of Kossuth and his party. In 1848 he became minister of justice, but resigned when he saw conciliation doomed to fail. From 1848 on he lived in Pest, and it was chiefly through his efforts from 1857 on that at last, ten years later, secured Hungary a rightful place in the union with Austria. As an orator and logician he had few equals in Europe in his age.

DEAKIN (*dē'kĭn*), **ALFRED** (1856–1919). Australian statesman who served from 1883 in various important posts in the government. In Victoria he advocated various reforms, always stood by the British idea of the dominions, and served thrice as premier of the Federated commonwealth, at times from 1903 and 1910, after which he became opposition leader. He advocated an Australian navy.

DELAWARE or **DE LA WARR, THOMAS WEST, THIRD BARON** (1577–1618). Colonial governor of Virginia; born in Hampshire, England; succeeded to the peerage in 1602; in 1610 was appointed the first governor of Virginia and captain general for life. The state, bay, and river of Delaware perpetuate his memory.

DENNISON, WILLIAM (1815–1882). An American politician, "War Governor" of Ohio; born in Cincinnati. Governor of Ohio (1860–1864). At one time when 11,000 troops were called for, Governor Dennison raised over 30,000. From 1864 until 1866 he was postmaster general in the cabinets of Lincoln and Johnson. One of the earliest of the prominent politicians to join the Republican Party and was chairman of the Republican National Convention in 1864.

DEPEW, CHAUNCEY MITCHELL (1834–1928). American lawyer, railroad president, politician, and orator; born in Peekskill, N. Y. In the State Assembly (1861–1862); secretary of state for New York (1863–1865); president of the New York Central (1885–1898); United States senator (1899–1911). After his retirement he spent his remaining years in business.

DERBY, EDWARD GEOFFREY SMITH STANLEY, FOURTEENTH EARL OF (1799–1869). A celebrated English orator and statesman, "The Rupert of debate"; was Irish secretary in Earl Grey's ministry. When Peel proposed to amend the Corn Laws he became leader of the Protectionists and the Conservative Party; was premier in 1852, 1858, and again in 1866; resigned in favor of Disraeli (1868).

DE VALERA (*dĕv-ă-lē'rà*), **EAMON** (1882–). Irish leader, born in New York of a Spanish father and Irish mother, he taught in Dublin, was one of the insurgents in 1916, was condemned to long imprisonment, but pardoned in the general amnesty of 1917. Later he formed a Republican party, became its first president, and escaped from prison to raise money for the cause in the United States. In 1921 he refused to sign the treaty granting an Irish Free State, endorsed by his two colleagues, resigned from the Dail, continued to agitate as a Republican, but in 1924, with some of the former party men, took the oath of allegiance.

DE WET (*dē vĕt'*), **CHRISTIAN** (1854–1922). Boer general in the South African War of 1899–1902, during which he ably led a party of natives in various raids, and always eluded the English forces. He was a peace commissioner in 1902, visited England with the other generals, in 1907 became a member of the legislature of the Orange River colony, serving as minister of agriculture. After acting as a unionist, he became a separatist in the negotiations regarding the Union of South Africa, and in 1914 refused to coöperate. He was finally convicted of treason, but his fine and sentence were commuted when he agreed to cease obstructive activities.

DE WITT (*dē vĭt'*), **JAN** (1625–1672). Dutch statesman; born at Dort; became grand pensionary of the United Provinces of the Netherlands (1653). During the war with England his influence waned, and the Orange party he had so strenuously opposed elected Prince William of Orange as Stadtholder. With his brother, Cornelius, he was murdered during a popular tumult.

DIAZ (*dē'ăs*), **PORFIRIO** (1830–1915). Mexican soldier and statesman; born at Oaxaca; enlisted in the army during the war with the United States, but saw no active service; studied law in the Institute of Arts and Sciences, Oaxaca, where he afterwards became professor of Roman law. He commanded a battalion in the revolt against Santa Anna (1854);

became chief of a brigade in the War of the Reform (1859); was promoted to general during the War of the Intervention, and was taken prisoner on the capture of Puebla by the French (May, 1863). He escaped and was made commander in chief; defeated Marquez and secured the surrender of Mexico City (June 21, 1867), which marked the end of Maximilian's Empire. In 1872 and 1876 he led the revolutionary forces or "Porfiristas" against the government. In November, 1876, he was made provisional president, and in April, 1877, was elected for a term ending 1880. Ineligible for immediate re-election, he gave place to his secretary, General Gonzalez, but was again made president (1884), and the constitution having been amended he was continuously re-elected without opposition until 1910; a revolution followed and he resigned May 26, 1911. He gave Mexico a new international standing, and his presidency marked an epoch of progress and pacification.

DIDO. A queen of Carthage in the north of Africa. She was the daughter of Agenor or Belus, a king of Tyre. His successor, Pygmalion, brother of Dido, murdered her husband, Sichaeus. She fled from Tyre with her husband's treasure, accompanied by many Tyrians, and founded the city of Carthage. Vergil makes Aeneas stop at Carthage and relate to Dido his misfortunes at Troy. She is there represented as killing herself on a funeral pyre through grief at her unrequited love for Aeneas. It is now believed that Carthage was built more than 150 years before the founding of Rome.

DIEMEN, ANTON VAN (1593–1645). A Dutch administrator; rendered conspicuous service in the Dutch Indies and was made governor general. The name Van Diemen's Land (Tasmania) was given by Abel Tasman to the island discovered by him in 1642, while voyaging on behalf of Van Diemen.

DILLON, JOHN (1851–1927). Irish leader, born in Dublin, represented Tipperary at first and then continuously East Mayo in Parliament. In 1889 he collected funds in New Zealand and Australia, but, on returning to Ireland, was arrested, escaped with W. O'Brien, and went to the United States. When Healy withdrew from the Irish National Federation, Dillon became chairman. In 1905 he advised his followers to vote to support the English Liberal government, and in 1912 to center their attack on the House of Lords. During the World War he actively supported the British government, becoming leader of his party to replace Redmond, but in 1918 he shared the defeat of the Nationalists.

DINGLEY, NELSON, JR. (1832–1899). American congressman; born in Durham, Maine. Editor of the Lewiston *Journal* (1856–1886); in the state Legislature (1862–1873); speaker (1863–1864); governor (1874–1875); in Congress from 1881 until his death. He was the framer of the tariff bill of 1897, which bears his name.

DIOCLETIAN (*dī-ō-klē'shăn*) (245–313). Roman emperor, elevated by the soldiers after the murder of Numerianus. He virtually deprived the senate of power, established a huge bureaucracy, divided the empire into four parts, confirming a ruler in three to act with himself, but after nine years (305) he retired and lived at Salona. Terrible persecutions marked the last of his reign, his object being to try to revive the old religion.

DIONYSIUS (*dī-ō-nĭsh'us*) **THE ELDER** (431–367 B. C.). Tyrant of Syracuse; made himself tyrant of the city in 406 B. C.; captured Rhegium (387 B. C.) and ruled the southern corner of Italy. Under his rule Syracuse became one of the most brilliant of the Grecian cities.

DIX, JOHN ADAMS (1798–1879). American statesman and soldier; born at Boscawen, N. H. Served through the War of 1812; was a prominent member of the Albany Regency; member of the Assembly of New York (1842); United States senator (1845–1849); secretary of the treasury under Buchanan (January to March, 1861); major general of volunteers (1861); minister to France (1866–1869); governor of New York (1873–1875).

DOLE, SANFORD BALLARD (1844–1926). A Hawaiian statesman; born of American parents in Honolulu; admitted to the bar in Boston, Mass.; judge of the Supreme Court of Hawaii (1887–1893); when the kingdom was overthrown (1893) he became president of the provisional government; president of the Hawaiian Republic (1894). President Cleveland's intention of restoring Queen Liliuokalani was defeated by Dole. In 1898 he was a member of the commission for suggesting legislation for Hawaii; and in 1900, after annexation, was governor. From 1903 to 1915, when he retired, he was United States district judge of Hawaii.

DOLLIVER, JONATHAN PRENTISS (1858–1910). American senator, born in West Virginia and graduated at the state university, established a law practice at Fort Dodge, Iowa, in 1878. He served in Congress from 1889 to 1910, when he became senator, known for his independence and great ability in speaking. With A. B. Cummins, his colleague, he opposed several administration policies, mainly the Payne-Aldrich tariff.

DOMITIAN (*do-mĭsh'ăn*) **(TITUS FLAVIUS DOMITIANUS)** (51–96). Roman emperor (81–96); was the son of Vespasian and younger brother of Titus. The earlier years of his rule were marked by beneficence and wisdom; but through the failure of campaigns, especially against the Dacians, he grew embittered and ruled cruelly and tyrannically. He drove nearly all good men from Rome; paid the soldiers enormously; and pacified the people with expensive games and gladiatorial combats. He was stabbed to death in his bedroom by a freeman named Stephanus.

DONGAN, THOMAS, EARL OF LIMERICK (1634–1715). A colonial governor of New York; born in County Kildare, Ireland. Appointed governor of New York (1682); granted a charter to the city of New York and another to Albany, which remains the basis of municipal rights.

DORION, SIR ANTOINE AIME (1818–1891). A Canadian politician; born in Sainte Anne de la Perade. Member of the Canadian Assembly for Montreal (1854–1861) and for Hochelaga (1862–1867); member of the Dominion Parliament (1867–1874); leader of the Rouge or French-Canadian Liberals; held several cabinet offices; after 1874 was chief justice of Quebec; knighted in 1877.

DOUGLAS, STEPHEN ARNOLD (1813–1861). American statesman; born in Brandon, Vt. He represented Illinois in both houses of Congress, and was a member of the Senate from 1847 to his death. His re-election in 1858 was unsuccessfully contested by Lincoln. In 1860 the democratic Convention being divided on the slavery question, he was nominated by the moderates while John C. Breckinridge represented the extremists, he obtaining the largest popular vote next to Lincoln. When the South seceded he came to the support of Lincoln's government. "There can be no neutrals in this war," he said. His small stature and indomitable pluck gained him the title of "The Little Giant."

DOUMERGUE (*dōō'mĕrg'*), **GASTON** (1863–1937). Twelfth president of the third French Republic, held appointments in Cochin China and other places, was minister of colonies in 1902–05, and vice president of the Chamber. After holding several cabinet posts, including the ministry of education in the Briand and Clemenceau cabinets, he became a senator, and in 1913 premier, but his government fell a year later on the issue of military service for three years. During the first three years of the World War, he was again minister of colonies, and after an interval, again president of the senate, and finally in 1924 president of France.

DRACO. An Athenian legislator who put into form, about 621 B. C., the common law of Athens. As the penalties seemed severe to later ages it has been said that his laws were written not in ink but in blood. Draco is said to have died in a theater in Aegina from suffocation by the garments of the people thrown upon him as a mark of respect.

DUDLEY, THOMAS (1576–1653). Second colonial governor of Massachusetts; born in Northampton, England. Came to the Massachusetts Bay Colony (1630) as deputy governor under Winthrop (1630–1643); governor of the colony four times (1634, 1640, 1645, and 1650); was the chief founder of Newtown (now Cambridge, Mass.), and took an active part in founding Harvard (1636). His daughter was Anne Bradstreet, the poetess.

DUFFERIN (*duf'ĕr-in*) **AND AVA, FREDERICK TEMPLE HAMILTON BLACKWOOD, MARQUIS OF** (1826–1902). British statesman and diplomat. Governor general of Canada (1872–1878); ambassador to Russia (1878–1881); to Turkey (1881–1884); governor general of India (1884–1888); ambassador to Italy (1888–1891); to France (1891–1896). His

last years, spent largely on his Irish estate, were rendered unhappy by the death of his eldest son and by business reverses.

DUNMORE, JOHN MURRAY, EARL OF (1732–1809). English governor of New York in 1770, of Virginia 1771–1776. He dissolved the native assembly on three occasions, and in 1775 removed the powder from the magazine at Williamsburg, followed by his removal of the government to a warship in the harbor of Yorktown. He was charged with stirring up an Indian war largely for profit. From 1787 to 1796 he was governor of the Bahamas.

DURHAM, JOHN GEORGE LAMBTON, FIRST EARL OF (1792–1840). English statesman who was lord privy seal in the cabinet of Lord Grey, his father-in-law in 1830. Did much to secure the passage of the Reform Act in 1832, and accomplished a difficult mission to Russia shortly afterward. He was made governor-general of Canada in 1837 shortly after Papineau's rebellion had been quelled. For granting amnesty to all but 15 persons besides Papineau, he was censured, and then resigned, but attempted to justify his conduct while still in Canada. His *Report* to Parliament is a great state document. Then rejected, it later formed the basis for the colonial government of Great Britain. Durham also was instrumental in securing English claims to New Zealand in 1839.

EDMUND IRONSIDE (about 981–1016). English king; son of Ethelred II.; great opponent of Canute and the Danes. At his father's death the Danes proclaimed Canute king, but the people favored Edmund; defeated by Canute at Assandun or Ethandun. The kingdom was divided, but, Edmund dying, Canute became sole king.

EDMUNDS, GEORGE FRANKLIN (1828–1919). American legislator, and author of the "Edmunds Act," or Anti-Polygamy Act of 1882, and another similar act of 1887. Member of the Electoral Commission (Hayes-Tilden) of 1877; United States senator from Vermont (1866–1891); president pro tem during Arthur's administration. Afterward he attained considerable fame in Philadelphia as a constitutional lawyer.

EDWARD THE CONFESSOR (about 1004–1066). King of England. He was the elder son of Ethelred the Unready. His mother, Emma, was married to Canute and thus Edward was the half-brother of Hardecanute, the last of the Danish kings of England. Edward lived in Normandy during the Danish possession of England. On the death of Hardecanute in 1042, Edward was chosen king. Earl Godwin was the real power during the reign. Edward passed his time in study and in religious works. He caused Westminster Abbey to be built. As his life had been spent in Normandy, his reign really prepared England for the Norman Conquest which immediately followed.

EDWARD I. (1239–1307). King of England (1272–1307). The eldest son and successor of Henry III. He was taken prisoner with his father at the battle of Lewes (1264), but escaped and defeated his enemies at the battle of Evesham (1265). He went to the Crusades (1270), and reached home in 1274, two years after his father's death. He waged war for 10 years with the Welsh, during which the famous Prince Llewellyn was slain. It ended in the annexation of Wales (1282). He next undertook the conquest of Scotland, in which he was opposed by Robert Bruce and Sir William Wallace. He carried off from the castle of Scone the famous stone upon which kings were crowned and which now stands in Westminster Abbey. While the king was on his way to chastise Bruce, he was taken ill and died. Edward was a great ruler and introduced sound financial, legal, and legislative reforms.

EDWARD II. (1284–1327). King of England (1307–1327). Son and successor of Edward I. On his father's death he gave up the conquest of Scotland. His early reign was contemptible and he became involved in a quarrel with his nobles over unworthy favorites. In 1314 Edward invaded Scotland with a large army and was met and defeated by Bruce with a small army at Bannockburn. In 1319 he concluded a peace with the Scotch for two years. He then became involved in another quarrel with his nobles and was taken prisoner. After a period of imprisonment he was murdered in Berkeley Castle in 1327. Edward II. was the first Prince of Wales, created in 1301.

EDWARD III. (1312–1377). King of England (1327–1377). Son and successor of Edward II. His mother and Mortimer ruled the kingdom until 1330, when Edward seized Mortimer and put him to death and imprisoned his mother, Queen Isabella. The Scots were defeated at Halidon Hill (1333). The Hundred Years' War began in 1337. Edward claimed the throne of France through descent from his mother, Isabella, daughter of Philip the Fair, whose sons were all dead. The French pleaded the Salic law and war began. The French were defeated at Cressy or Crécy (1346), where Edward the Black Prince showed remarkable bravery. Calais was reduced by the English and a nine months' truce concluded. In England the Scots were defeated at Neville's Cross (1346) and David II. taken prisoner. In 1356, at Poitiers, the English under the Black Prince defeated the French, and King John of France was taken prisoner.

EDWARD IV. (about 1442–1483). King of England (1461–1483). Son of Richard, Duke of York, who was the grandson of Edward III. His father was killed in the battle of Wakefield Green (1460). After routing the Lancastrian forces at the battle of Mortimer's Cross (1461), he marched to London and was crowned king. He defeated the Lancastrians at Towton (1461). He gave offense to the nobles by his marriage and Warwick raised an army which drove him out of England and Henry VI. was restored (1469). Edward returned in 1471 and met Warwick's forces at Barnet, where Warwick was defeated and slain. There was a steady growth of the constitution in this reign. Printing and silk making were introduced. Direct pleading in courts was adopted.

EDWARD V. (1470–1483). King of England (though never crowned). He was the son of Edward IV. and was 13 when his father died. He was taken care of by his uncle, Richard, Duke of Gloucester, who made himself protector of the kingdom. He confined Edward and his younger brother, the duke of York, in the Tower, where they were smothered by the uncle's commands. In the reign of Charles II., skeletons were found at the foot of the White Staircase in the Tower which were recognized as those of the young princes.

EDWARD VII. (1841–1910). King of Great Britain, Ireland, and British Dominions beyond the Seas (1901–1910); emperor of India; eldest son of Queen Victoria and the Prince Consort; born at Buckingham Palace, November 9, 1841. In 1860 he visited Canada and the United States, his visit to Washington's tomb creating a deep impression. Two years later he visited the Holy Land, and on March 10, 1863, married Princess Alexandra of Denmark. During his mother's long reign the Prince's career was one of great public activity and usefulness, while he frequently acted for the Queen in ceremonial and other public duties. In 1869 he visited Egypt and Ireland. In November, 1871, he was stricken with typhoid fever, and his life was for a time despaired of. He visited India in 1875 and Ireland in 1885. On the death of Queen Victoria (January 22, 1901) he became king. His numerous visits to the Continent did much to foster international good will. The Anglo-French *entente cordiale* is mainly due to his personal efforts, while his visit to Germany in the beginning of 1909 did much to bring about a better understanding between the two nations. The king's unfailing tactfulness and diplomacy obtained for him the title of "Edward the Peacemaker."

EGBERT (? –839). A king of the English. In 802 he became king of the West Saxons (Wessex). Between 825 and 829 he conquered the other kingdoms of England and compelled them to acknowledge him as their overlord. He thus became the first king of all England. Toward the latter part of his reign he was involved in war with the Danes. He was defeated by them in 835, but in 837 was victorious over them.

ELGIN, JAMES BRUCE, EIGHTH EARL OF (1811–1863). An English statesman; governor general of Canada (1847–1854); settled the free trade and fishery questions with the United States; consummated the Tientsin Treaty with China (1858); postmaster general of England; viceroy of India (1862 until his death).

ELIZABETH (1533–1603). Queen of England; daughter of Henry VIII. and Anne Boleyn; ascended the throne on the death of Mary (November 17, 1558). Her reign was one of the greatest in history. She placed the Protestant religion on a sure footing,

repulsed the Armada, promoted exploration and colonization, and was a great patron of letters. Mary, Queen of Scots, was executed, having been proved privy to a plot against Elizabeth. The reign is celebrated for the mighty outburst of intellectual energy, represented by the immortal names of Shakespeare, Spenser, Marlowe, Raleigh, Sidney, and Bacon. The personal character of Elizabeth has puzzled the historians. She was widely learned, brilliant, witty, but capricious, headstrong, and at times cruel. Vanity in dress was one of her great weaknesses. As a diplomatist she showed great acumen, keeping even the wisest guessing as to her intentions, especially in early years as to whom she might marry. By playing one interest against another and one suitor against the rival, she kept things in suspense, and likewise by steering a middle course in state craft, she kept factions down and herself, the court, and the land in the foreground.

ELIZABETH PETROVNA (1709–1762). Empress of Russia; daughter of Peter the Great and Catherine I.; succeeded to the throne (1741). She aided Maria Theresa in the War of the Spanish Succession, and in the Seven Years' War frequently defeated Frederick the Great. She was able, and on occasion energetic, literature and art owing much to her patronage. She formed an offensive alliance with Austria against Prussia, but played France against Austria without knowledge of the latter.

ELLENBOROUGH, EDWARD LAW, FIRST EARL OF (1790–1871). An English statesman; entered Parliament (1813); appointed governor general of India (1841), but recalled in 1844. Subsequently he was made first lord of the Admiralty and Indian minister by Lord Derby. He was one of the most distinguished orators of his day.

ENDICOTT, JOHN (1588–1665). One of the founders, and for many years a governor, of the colony of Massachusetts; born at Dorchester, England. In 1628 he led a band of settlers to Naumkeag (Salem), Mass. He gave way in 1630 to John Winthrop, and led an expedition to Block Island against the Pequots (1636); was deputy governor in 1641–1643, 1650, and 1654; governor in 1644, 1649, 1651–1654, and 1655–1665; elected president of the United Colonies of New England in 1658. He was a Puritan of the extreme type, but an able administrator.

EPAMINONDAS (*ĕ-păm-ĭ-nŏn'dăs*) (about 418–362 B. C.). A Greek statesman and general; born in Thebes. He was commander in chief of the Theban army in the Theban war with Sparta. With 6,000 men he defeated a much larger force of Spartans at the battle of Leuctra (371 B. C.), and overthrew the supremacy of Sparta. In 370 B. C. Epaminondas and Pelopidas unsuccessfullly invaded Sparta. This expedition was followed by another in 368 B. C. and by a third in 366 B. C. Again in 362 B. C. he led a fourth against Sparta supported by strong allies, yet in the face of great odds Sparta was defeated in the battle of Mantinea, though Epaminondas fell in this battle. He was one of the best and noblest of all Greek characters.

ERIC EDWARDSON or **SAINT ERIC.** King of Sweden (1150–1160). Christianized upper Sweden and built a number of churches and monasteries. He undertook a crusade against the Finns, which was the beginning of the long feuds between the countries. He compiled laws known as Saint Eric's Lag in which the rights of women were set forth.

ERIC OF POMERANIA (1382–1459). King of Norway, Sweden, and Denmark. (See MARGARET.) On the death of Margaret, Eric's utter disregard for treaties, oaths, and promises led to dissensions among his subjects. In 1438 the Danes renounced their allegiance and chose Christopher of Bavaria as their king. In 1439 Sweden withdrew and Scandinavia was a scene of rebellion and bloodshed for many years. Eric fled to Gothland and for 10 years was a pirate. He had married Philippa, daughter of Henry IV. of England, and treated her cruelly.

ESPARTERO (*ĕs-păr-tā'rō*), **JOAQUIN BALDOMERO, DUKE OF VITTORIA** (1792–1879). A Spanish statesman and general who operated most successfully against the Carlist forces, and for his expulsion of Don Carlos from Spain (1839) became Duke of Vittoria and Morella and grandee of Spain; became military dictator (1841). His government was marked by great ability and energy, but was overthrown (1843), and Espartero driven into exile. Upon the abdication of Queen Isabella, he refused to become a candidate for the throne of Spain (1870).

ESTERHAZY (*ĕs'tĕr-hä-zē*), **PRINCE NICHOLAS** (1765–1833). Famous Hungarian patron of arts and letters. Lived for several years in the centers of culture in Europe. Napoleon in 1809 offered him the crown of Hungary, but Esterhazy declined. In two branches this family traces back to the thirteenth century, and many distinguished statesmen made the name celebrated in all parts of Europe.

ETHELBERT (552?–616). King of Kent; converted to Christianity by Augustine (597); drew up the first written Saxon code of laws, and so brought about a successful rebellion against himself under Raedwald.

ETHELRED II. (c. 968–1016). Called the Unready. From the beginning of his reign in 979 the Danes harried England year after year. In 1000 he was defeated by Richard II., Duke of Normandy, and also made peace with the invaders. Yet he treacherously slew many Danes in time of peace. For this Sveyn compelled him to pay large tribute for peace in 1007–1012, and in 1013 parts of England acknowledged Sveyn as king, while Ethelred fled to Normandy. He reigned two years after Sveyn died before his own death, having defeated Canute the year before.

EUGENIE (*ū-zhā-nē'*) **(EUGENIE MARIA DE MONTIJO)** (1826–1920). Ex-empress of the French and wife of Napoleon III.; born in Granada, Spain; filled the office of regent at three different times in absence of Napoleon in the army (1859, 1865, 1870). In the eyes of many historians she was the sole cause of the downfall of the Second Empire. During the Franco-German War she was forced to flee to England (1870). Her only son, the Prince Imperial, was slain in the Zulu War.

EVERETT, EDWARD (1794–1865). American statesman and educator; born at Dorchester, Mass.; was appointed Eliot professor of Greek in Harvard (1815); was editor of the *North American Review* (1820–1824). He became successively a representative in Congress, governor of Massachusetts, and United States minister to Great Britain. In 1846 he became president of Harvard, and in 1852 secretary of state. He resigned in June, 1854. He was a celebrated orator of the old school, his best-known orations being the one on Washington and the Gettysburg Oration (delivered November 15, 1863).

EWING (*ū'ĭng*), **THOMAS** (1789–1871). American jurist and political leader; born near West Liberty, Virginia; was a whig member of the United States Senate from 1831 to 1837; secretary of the treasury (1841); first secretary of the interior (1849–1850); again elected to the Senate in 1850–1851. He was a supporter of Lincoln's war policy in 1861–1865.

FABIUS MAXIMUS (*fā'bĭ-ŭs*) **QUINTUS CUNCTATOR** or **"THE DELAYER"** (? –203 B. C.). Roman consul five times and censor twice; was appointed dictator after the defeat of the Romans by Hannibal at Lake Trasimenus (217 B. C.). His tactics of harassing the enemy during the Second Punic War while avoiding a general engagement and so allowing Rome to strengthen her forces gave rise to the term "Fabian policy."

FAIRBANKS, CHARLES WARREN (1852–1918). American lawyer and politician; vice-president of the United States (1905–1909); born in Union County, Ohio; was graduated from Ohio Wesleyan University (1872); removed to Indianapolis, Ind. (1874); United States senator (1897–1905); member of United States and British Joint High Commission which met at Quebec (1898) to adjust Canadian questions.

FALLIERES (*fȧl-yȧr'*), **CLEMENT ARMAND** (1841–1931). Eighth president of France (1906–1913). Of peasant parentage; became a lawyer; elected to Chamber of Deputies (1876); minister of the interior (1882, 1883, and 1887); minister of public instruction (1883–1885 and 1889–1890); minister of justice (1887–1888 and 1890–1892); senator (1890) and reëlected (1897); president of the Senate (1899); reëlected for eight successive terms.

FARINI (*fa-rē'nē*), **LUIGI CARLO** (1812–1866). Italian statesman and historian. Exiled to France (1843); general secretary in Liberal Cabinet (1847); director general of sanitary department; minister of public instruction (1851); proclaimed dictator at Modena (1859); influenced strongly a united Italy (1860), ranking with Garibaldi and Cavour in the long struggle; minister of the interior; asked to form

a new ministry (1862). His history of the *Roman State* (1853) established his reputation as a historian.

FAWCETT (*fô'sĕt*), **HENRY** (1833–1884). Though blinded in 1858 by accident, two years after his graduation from Cambridge, he continued his studies and became professor of political economy in 1863. He wrote several notable books. Both he and his wife, Millicent Garret, advocated removal of restrictions upon women in industry and granting the suffrage. Fawcett is best recalled, however, by his introduction of parcel post, cheap sending of telegrams, and banking by post, while he acted as postmaster-general.

FERDINAND III. (1199–1252). Called "the Saint," king of Castile and son of Alphonso IX. of Leon, and Berengaria, daughter of Alphonso VIII. of Castile. When the king of Castile died suddenly, Berengaria renounced the crown in favor of her son. His father considered himself outwitted, and the son had to fight him. In 1231 he succeeded his father peacefully to the throne of Leon. He reduced the Mohammedan rule in Spain to Granada only, revived the old university and placed it at Salamanca, and proved a wise and just ruler. He was canonized by Pope Clement X. in 1671.

FERDINAND V. (1452–1516). Founded the Spanish monarchy. Joint sovereign with his wife, Isabella. The year 1492 was the most brilliant of his reign, marking not only the discovery of America by Columbus, but also the entry of Ferdinand and Isabella into Granada and the end of the Moorish occupation.

FERDINAND (1861–). By a series of brilliant victories in 1912–13, Bulgaria pressed past Adrianople into Turkish territory. The Treaty of London failed to acknowledge the rights to conquered territory, and in consequence the second war followed, and Bulgaria was driven by her neighbors to an unwelcome peace. Joining the fortunes of Germany, in the World War, Ferdinand achieved again some great victories, but they were nullified by his defeat by the Allies in 1918, after which Ferdinand abdicated in favor of his son Boris.

FERDINAND I. (1865–1927). King of Rumania, nephew of Charles I., became heir apparent in 1889 and king in 1914. He was a Hohenzollern by birth, but during the World War declared against his native country and was driven with his army into Moldavia. Later after great hardships Rumania achieved victory and added territory, and in 1922 he was crowned king of all Rumanians. During his reign large estates were broken up and given to the people, his own being first of them. All Rumanian Jews were given full rights as citizens.

FERRY, JULES FRANCOIS CAMILLE (1832–1893). Eminent French statesman, was the father of the modern system of free primary education, compulsory, and non-clerical. He also fostered a more extensive colonial policy for economic reasons after the war of 1870. He acted as administrator in Paris during the siege of 1870, was minister to Athens, and minister of instruction and later of foreign affairs from 1879 to 1885, with two slight interruptions, serving twice as premier in the meantime. French influence in Tunis, Madagascar, and Indo-China was arranged by him. He died of a wound from a revolver fired by a crazed man.

FESSENDEN (*fĕs'ĕn-dĕn*), **WILLIAM PITT** (1806–1869). American statesman; born in Boscawen, N. H.; elected United States senator (1854); opposed the Kansas-Nebraska Bill; secretary of the treasury (1864) during the blackest financial period in the history of the country. Gold was at 280, a paper dollar was worth 34 cents, and the government had just withdrawn a loan from the market which it could not float. Fessenden issued the "seven-thirty" bonds. Gold fell to 199 and Fessenden went back to the Senate. He voted in favor of Johnson's acquittal on his impeachment. He was one of the leaders in the Senate during the early Reconstruction period.

FIELDING, HON. WILLIAM STEVENS (1848–1929). Born in Halifax, Nova Scotia. Liberal member for Halifax county (1882); provincial secretary and treasurer (1882); resigned to attend to editorial duties (1884); formed new cabinet and became provincial secretary. Minister of finance and member of House of Commons (1896); introduced new tariff policy, advocating preferential trade with Great Britain (1897), and later the measures imposing a surtax on German products in consequence of German action adverse to Canada. Vice chairman Ottawa Reform Convention (1893); Vice-president Maritime Provinces Liberal Association (1895); president St. George's Society.

FILLMORE, MILLARD (1800–1874). Thirteenth president of the United States, was born in Cayuga County, N. Y., where his father had built a log cabin in 1795. He was apprenticed to a fuller and maker of cloth, later studied law, and attained eminence in practice at Buffalo, N. Y. He served in the state assembly (1829–32), in the national House (1833–35, 1837–43), in 1844 was a candidate of the Whigs for governor of New York, and in 1848 became vice-president with Zachary Taylor as president. At first he entered Congress as an anti-Jackson candidate, and later he became a Whig, and as chairman of the ways and means committee of the House secured a grant of $30,000 to S. F. B. Morse for his electric telegraph. When Taylor died in office on July 9, 1850, Fillmore succeeded him. In both 1852 and 1856 he was an unsuccessful candidate. His tendency to compromise and take mild views alienated his old political friends.

FISH, HAMILTON (1808–1893). American statesman; son of Nicholas Fish (1758–1833), a revolutionary soldier; born in New York City; entered Congress (1842); became governor (1848); member of Senate (1851–1857), first as a whig and then as a republican. He opposed the Kansas-Nebraska Bill of 1854; was secretary of state in Grant's Cabinet (1869–1877), and was one of the Joint High Commission that negotiated the Treaty of Washington (1871), and assisted in the arbitration of the Alabama Claims.

FISHER, CHARLES (1808–1880). A Canadian statesman. Member of the New Brunswick Cabinet (1837); of the Executive Council (1848–1857); consolidated and codified the statutes (1852); attorney general (1854–1861 and 1866); one of the representatives of British North America in London when articles of confederation of the provinces into the Dominion of Canada were arranged (1867); judge of the Supreme Court of New Brunswick until his death.

FISHER, HERBERT ALBERT LAURENS (1865–1940). English educator and statesman, born in London and educated at Oxford, where for a time he lectured. Member of royal commission on public services of India, 1912–15; minister of education and member of parliament for part of Sheffield, 1916, and from 1918 to 1926 as Liberal member for the universities. In 1917 he introduced an education bill which had many important provisions, and in 1925 he was elected warden of New College, Oxford.

FOSTER, GEORGE EULAS (1847–1931). A Canadian politician; born in Carleton, New Brunswick. Professor of history and classics in the University of New Brunswick (1871–1879); public lecturer on temperance and sociology; elected to the House of Commons (1882) from Kings County; minister of marine and fisheries in the Macdonald government (1885) and prepared Canada's brief to present to the commission at Washington on the deep-sea fisheries dispute; minister of finance (1888–1896); minister of marine and fisheries (1911–1917), when elected to the Senate; represented Canada in the Peace Conference, 1919, in the first assembly of the League of Nations was vice-president, and served in the seventh assembly in 1926.

FOSTER, JOHN WATSON (1836–1917). American diplomatist; born in Pike County, Indiana; was graduated at Indiana State University (1855); admitted to the bar; fought in Civil War and became colonel; edited the Evansville *Daily Journal* and was postmaster of that city (1869–1873); minister to Mexico until 1880, to Russia until 1881, and to Spain from 1883–1885; secretary of state in 1892–1893; member of the Anglo-Canadian Commission (1898). He is the author of *A Century of American Diplomacy, American Diplomacy in the Orient,* and *Arbitration and The Hague Court.*

FOX, CHARLES JAMES (1749–1806). English statesman; born in London. Entered Parliament in 1768 as a tory, but from 1774 to 1782 was the leader of the whigs, and strongly opposed to Lord North's American policy. In 1783 he formed a short-lived coalition ministry with Lord North, and from 1784 he was in opposition. Burke describes him as "The most brilliant and accomplished debater that the world ever saw."

FRANCIA (*frän'se-ä*), **JOSE GASPAR RODIQUEZ** (1757–1840). Dictator of Paraguay; born at Asuncion; practised as a barrister; in 1811 became secre

tary to the newly established government of Paraguay. In 1813 he became one of the consuls, and on the death of Yegros, his colleague, sole ruler. From 1817 until his death he was dictator of the republic. He was opposed to all foreign intercourse and to all religion.

FRANCIS I. (1494–1547). King of France; son of Charles of Angoulême; born at Cognac, France; succeeded Louis XII., who died without male issue (1515). He became involved in a series of wars with Germany; was defeated and captured at the battle of Pavia (1525); signed the Treaty of Madrid (1526); and of Crespy (1544). He sided with the Protestants abroad, while persecuting them in his own kingdom. His son, Henry II., succeeded him.

FRANCIS II. (1768–1835). Last Roman emperor; as Francis I. was the first emperor of Austria. The son of Leopold II., he was born in Florence, educated in Vienna. Much of his reign was occupied with various coalitions against Napoleon, until in 1810 Napoleon married his daughter, Marie Louise. He acted as his own prime minister for much of his reign, and in the last part was guided by Metternich in foreign affairs. In 1806 he was obliged to abandon the title of Holy Roman emperor, which had been in existence a thousand years.

FRANCIS, FERDINAND (1863–1914). Archduke of Austria, heir apparent to the throne after the death of Crown Prince Rudolph and of his own father. As time went on he took much interest and part in public affairs. While at Serajevo, Bosnia, on June 28, 1914, he and his wife were killed by assassins. This event led directly to the World War.

FRANCIS, JOSEPH I. (1830–1916). Emperor of Austria from 1848. Son of the Archduke Francis. A revolution was in progress at the time of his accession, and war with Hungary soon broke out. But the emperor subdued the enemy, at the same time defeating the Italian insurgents. Austria lost Lombardy to the Italians (1859), and after Sadowa (1866) was forced to give Venetia to Italy. The differences between Austria and Hungary were settled by forming the Austro-Hungarian state (1867). On the death of his son Rudolph, the Crown Prince, 1889, his nephew, Francis Ferdinand, noted just above, became heir apparent. During the last years, he formed a closer alliance with both Germany and Italy. Under the treaty of 1878, he was allowed to occupy Bosnia and Hercegovina, finally annexing them. Francis Joseph intended fairly well, but the estrangement of his wife, her death by assassination, the suicide of his son, and at last the assassination of his nephew and heir were enough personal misfortunes for any man. Besides, almost his entire reign was occupied with dickerings with his subjects, especially with Hungary.

FRANKLIN, BENJAMIN (1706–1790). An American statesman, diplomatist, and author. He was born at Boston; son of a tallow-chandler; the 15th of 17 children; apprenticed to his brother, James, as a printer (1719); eventually settled in Philadelphia and founded the *Pennsylvania Gazette* (1728), and began to publish *Poor Richard's Almanac* (1732), which for 25 years made "Poor Richard" a household word. In 1730 he married Deborah Read of Philadelphia, who died in 1774. In 1736 he was appointed clerk of the General Assembly of Pennsylvania, and in 1750 was elected a member of the Assembly. He was postmaster of Philadephia (1737), and from 1753–1774 was one of the two deputy postmaster generals for North America. He held many posts of public trust, while his scientific discoveries gained him an international reputation. Honors were showered upon him, both at home and abroad, and he was the most conspicuous figure in the America of his day. His last public act was the signing of an anti-slavery petition to Congress. He died April 17, 1790, mourned by the entire nation. Franklin's literary reputation rests mainly on his unfinished *Autobiography*. His chief contributions to science are his various electrical discoveries and his invention of the lightning conductor. He rendered the greatest service to his country by his skill in diplomacy, especially while acting as plenipotentiary abroad.

FREDERICK I., BARBAROSA or **REDBEARD** (1121–1190). Holy Roman emperor (1152–1190). Nephew and successor of Conrad III. as king of the Germans. After securing order in Germany he sought to reëstablish the imperial power in Italy. On receiving the Lombard crown he went to Rome and set Adrian IV. in the papal chair and was crowned emperor. In 1158 he besieged and took Milan; in 1159 began the long contest between Frederick and the pope, Alexander III., the successor of Adrian IV. In 1160 he took Crema; in 1161 and 1162 he took and razed to the ground Milan. He set up Victor IV. as an antipope. After many triumphs he was defeated at Legnano by the Lombards, and in 1183, by the Peace of Constance, he gave many privileges to the Lombard cities. In 1177 he made peace with Pope Alexander III. and resumed the contests with the Guelphs. In 1189, with a prospect of peace, he resigned his empire to his son, Henry, and set out with 100,000 men for the Holy Land. After some victories he was drowned in a small stream in Cilicia.

FREDERICK II. (1194–1250). King of Sicily (1197–1250) and Holy Roman emperor (1215–1250). Grandson of Frederick I., Barbarossa, and son of Henry VI. He caused the deposition of Otho IV. in 1214 after the battle of Bouvines and was crowned king in 1215, and emperor in 1220. He organized his Italian possessions, founded the University of Naples, and patronized literature and the arts. He set out in 1227 on a crusade, but returning in three days under pretense of illness was excommunicated by the pope. In 1228 he set out again, made a 10 years' truce with Saladin, took Jerusalem and the land about Jaffa and Nazareth, and crowned himself king of Jerusalem. The rest of his reign was spent in a struggle with the Lombards and the papacy.

FREDERICK II., THE GREAT (1712–1786). King of Prussia; born in Berlin; succeeded in 1740; invaded Silesia, almost the whole of which was ceded to him by Maria Theresa (1742). In 1756 he invaded Saxony and so began the Seven Years' War against the allied armies of Austria, France, and Russia. His forces were decimated, and on the death of Elizabeth of Russia, France grew tired of the struggle, and Austria, not caring to continue single-handed, signed the treaty of Hubertsburg in 1763, by which Frederick was allowed to retain his kingdom intact. During the ensuing period of peace he devoted himself to the development of the country. In the first partition of Poland (1772) he managed to acquire West Prussia. He cultivated the French language and authors in preference to German, and was a friend and admirer of Voltaire. He was a voluminous writer himself, but wrote chiefly in French.

FREDERICK WILLIAM (1620–1688). Elector of Brandenburg; known as the "Great Elector"; born at Berlin; succeeded his father (1640). He ranks next to Frederick the Great as the chief founder of the Prussian monarchy; he established the University of Duisburg and the Royal Library at Berlin. On ascending the throne he found an empty exchequer and a country devastated by Swede and Imperial troops during the Thirty Years' War. He brought order out of chaos, and prosperity from ruin; suffered several wars and hard reverses, but by 1680 was at peace and prospering. After the revocation of the Edict of Nantes 20,000 French Protestants were received; he encouraged immigration from Holland; increased population; introduced many industries; opened canals; established a system of posts; beautified Berlin.

FRELINGHUYSEN (*frē'ling-hī-zen*), **FREDERICK THEODORE** (1817–1885). American politician; born in Millstone, N. J.; admitted to the bar (1839); United States senator (1866–1869 and 1871–1877). He was a member of the Electoral Commission and secretary of state under President Arthur (1881–1885).

FREMONT, JOHN CHARLES (1813–1890). American explorer; born at Savannah, Ga.; explored Des Moines River (1841) and the Rocky Mountains (1842). In 1846 he arrived in California and soon afterwards a number of American residents captured the town of Sonoma from the Mexicans. This is known as the "bear-flag revolt." During the war with Mexico he was court-martialed for disobedience and had to leave the service. In 1848 he made his fourth expedition to discover a direct route to California. He was governor of Arizona (1878–1881), and in April, 1890, was made major general and put on the retired list.

FRONTENAC, LOUIS DE BUADE, COMTE DE (about 1621–1698). The greatest French governor of New France (now Canada). Succeeded De Courcelles as governor (1672); convened the clergy, nobles, and commons, and established formal government at Quebec. Quarrels ensued with the Jesuits, Intendant Fafon, and the governor of Montreal. Frontenac was recalled by the king (1682), but was restored in 1689 and held office till his death. He dealt tactfully with the Indians, restrained the Iro-

quois, and defeated Sir William Phips at Quebec (1690).

FRYE, WILLIAM PIERCE (1831–1911). American legislator; born at Lewiston, Maine. Elected to Congress 1871) and reëlected five times; entered the Senate (1881) as Blaine's successor; reëlected in 1883, 1889, 1895, and 1901; president pro tempore (1896); permanent presiding officer after Hobart's death (1899) and again on McKinley's death (1901); member of the Peace Commission at Paris at the close of the Spanish-American War in 1898.

FULLER, GEORGE WARBURTON (1861–). Australian statesman, educated at the University of Sydney. Member of parliament of New South Wales, 1889 to 1894, and in the first three Federal parliaments; chief secretary and acting premier, New South Wales, 1916–20, and premier 1922–25.

GADSDEN (*găd'dĕn*), **CHRISTOPHER** (1724–1805). American patriot; born in Charleston, S. C.; was educated in England; delegate to the international convention held in New York City (1765) to protest against the Stamp Act; member of first Continental Congress, Philadelphia (1774); commissioned colonel at outbreak of the Revolution; made brigadier general (1776); prisoner at Fort Augustine for two months; exchanged (1781); elected governor of South Carolina (1782), but refused to serve because of age and infirmities.

GADSDEN, JAMES (1788–1858). American diplomatist; born in Charleston, S. C.; served with distinction in the War of 1812 and in the Seminole War (1818), in which he was aide-de-camp to General Jackson; United States minister to Mexico (1853); negotiated the Gadsden Purchase, which determined the boundary between Mexico and the United States.

GAGE, LYMAN J. See under FINANCIERS.

GAGE, THOMAS (1721–1787). English general and colonial governor of Massachusetts (1774–1775); in 1763 was made commander in chief of the British forces in America. He returned to England (1772), but in 1774 was ordered to Boston, where he enforced the Boston Port Bill and other obnoxious regulations, thus provoking the rebellion. On news of the battles of Lexington and of Breed's Hill reaching England, he was recalled, and sailed from Boston (October 10, 1775). In April, 1782, he was promoted general.

GALLATIN (*găl'à-tĭn*), **ALBERT** (1761–1849). An American statesman and financier; born at Geneva, Switzerland. In 1789–1790 he was a member of the Pennsylvania Constitutional Convention. In 1793 his election to the United States Senate was declared void; served in the House of Representatives (1795–1801); secretary of the treasury (1801–1813). He was one of the foremost financiers of America. From 1816 to 1823 he was United States minister to France, and in 1826–1827 minister to Great Britain; was president of the National Bank of New York (1829–1839).

GALVANAUSKAS, ERNEST (1882–). Patriot and statesman of Lithuania. For stirring up influence against Russian domination in Lithuania, he was arrested in 1906, escaped to Belgium in 1908, became a leader in the World War, serving in the Serbian and in the French armies. He acted as a member of the Lithuanian delegation at Versailles, served as prime minister and minister of foreign affairs, and led the Lithuanian delegation to the League of Nations, and in 1924 became ambassador to England and also to The Hague.

GAMBETTA (*găm-bĕt'à*), **LEON** (1838–1882). French statesman; born at Cahors. An extreme republican, he was minister of the interior in the first provincial government. Escaping from besieged Paris (1870) in a balloon, he conducted the war from Tours, having full dictatorial powers. He was the most influential man in France, and became premier in 1881, but resigned after 66 days (1882).

GARFIELD, JAMES ABRAM (1831–1881). Twentieth president of the United States, came of a poor Ohio family. He was born at Orange in a log cabin. Having little chance in early life, he became a farm hand, worked on a canal boat, made his way through high school, sometimes doing carpentry, and at last was graduated by Williams College in 1856, after which he became a professor at the Eclectic Institute of Hiram, Ohio, where he had prepared for Williams. Then he became a lawyer, member of the state senate in 1859, rose to the rank of major general in the Civil War, resigning in 1863 to take a seat in the national House, which he held till 1880, when he was elected to the Senate from Ohio. When the partisans of neither Blaine nor of Grant, the latter running for a third nomination, could not secure a majority, Garfield was chosen as a compromise candidate. His term of office, beginning on March 4, 1881, was cut short on July 2 by the bullet of an assassin, a disappointed office seeker named Guiteau. Garfield died on Sept. 19.

GARFIELD, JAMES RUDOLPH (1865–). United States Cabinet officer; born at Hiram, Ohio; son of James A. Garfield, twentieth president of the United States; was graduated at Williams College (1885); admitted to the bar (1888); was a member of the Ohio Senate (1896–1899); and became secretary of the interior (1907–1909). Afterward practiced law in Cleveland. As a cabinet official he instituted several reforms in the granting of government lands.

GEDDES (*gĕd'ĭs*), **AUCKLAND CAMPBELL** (1879–). Born and educated in Edinburgh, professor of anatomy at Edinburgh, Dublin, and McGill. Served in South African and World Wars. Principal of McGill University, 1919–20, and British Ambassador to the United States 1920–24. Director of Recruiting, British War Office, 1916–17, Minister of National Service, 1917, 1918, 1919, Minister of Reconstruction, 1919, and President of the Board of Trade, 1919–20.

GEDDES (*gĕd'ĭs*), **ERIC** (1875–1937). Born in India, engaged in lumbering in United States, held various war offices, 1915–1918, including Inspector-generalship, additional member of the Board of Admiralty, and First Lord of the Admiralty. In 1919 he was minister without portfolio, 1912–22, chairman of committee to advise on national expenditures, president of federation of British industries, 1923 and 1924, and held other positions in business.

GENET (*zhĕ-nĕt'*), **EDMOND CHARLES EDOUARD** (1765–1834). A French diplomat. After service in several French embassies to European courts he was transferred in 1793 as "minister plenipotentiary to the Congress of the United States." He came with the avowed purpose of stirring up war with Great Britain. Encouraged by a warm reception he began to solicit privateers against English commerce and to fit out an expedition to take Louisiana from Spain. Washington and Jefferson refused to be drawn into the affair and warned him to desist. After setting them at defiance they took a firm hand with him and the French government recalled him. He was afraid to return home, and settled in New York.

GENGHIS KHAN (*jĕn'gĭs kän*), (1162–1227). A Mongol chief and conqueror. He succeeded his father when only 13. Some chiefs refused to acknowledge him and a long war resulted, and Genghis was obliged to seek shelter with Ungh Khan, who gave him command of his army and his daughter in marriage. Through his success in arms his master's jealousy was aroused, and Genghis fled back to his own people, where he arrived safely with 5,000 cavalry. He raised an army and defeated Ungh Khan, who in turn fled. After the defeat of some jealous Tatars he became master of all Mongolia. He conquered the northern part of China, scaled the Great Wall in 1211, and entered Peking in 1215. In 1219 he continued his conquest of Asia, and in the following years overran Persia, Russia, and the whole of southern Asia.

GENSERIC (*jĕn'sĕr-ĭk*) (? –477). King of the Vandals. In 429 he invaded Africa, and all Africa west of Carthage fell into his hands in the quarrel between Aetius and Boniface. In 439 he made Carthage the capital of his dominions. He also took Sicily, Sardinia, and Corsica. He encouraged Attila to attack Rome. In 455, at the invitation of Eudoxia, widow of Valentinian, he marched against Rome to avenge her on Maximus. He took the city, gave it up to a 14 days' pillage by his men, and took the empress and her two daughters prisoners. Genseric died in 477 at the height of his power, which gave him the title to the greatest of all of the kings of the Vandals.

GEORGE I. (1660–1727). King of Great Britain and Ireland (1714–1727); son of Ernest Augustus, elector of Hanover, and Sophia, daughter of Frederick, elector of Palatine, who married Elizabeth, daughter of James I. His preference for Hanover made him unpopular in England. The failure of the Jacobite rebellion (1715) and the strong foreign policy of Stanhope, Walpole, and Townshend, strengthened the new dynasty. The development of cabinet government was a feature of his reign.

GEORGE II. (1683–1760). King of Great Britain and Ireland; succeeded his father (1727); during the Austrian Succession War (1740–1748) he fought in the battle of Dettingen (1743). This was the last battle at which an English king was present. He defeated the Young Pretender at Culloden (1746) and secured victories over the French in Canada and India.

GEORGE III. (1738–1820). King of Great Britain and Ireland; son of Frederick Louis, eldest son of George II.; born in London; ascended the throne in 1760. The imposition of the American Stamp Act, and the obstinacy of George and his ministers, drove the American colonies to rebellion. Pitt, the prime minister, formed the triple alliance between England, Holland, and Prussia (1788). In 1793 France declared war with England, which ended in the defeat of Napoleon at Waterloo (1815). The Irish rebellion of 1798 brought about the union of England and Ireland in 1801. The king became insane in 1811 and his son, George IV., acted as regent.

GEORGE V. (1865–1936). "The Sailor King." King of Great Britain, Ireland, and the British possessions beyond the seas; emperor of India; second son of King Edward VII. and Queen Alexandra; born June 3, 1865. Educated at the royal naval academy, he was rapidly promoted, becoming captain in 1893, when his brother's death made him Duke of York; Prince of Wales (1901). He married Princess Mary Victoria of Teck, June 6, 1893; became king May 6, 1910. He was crowned emperor of India at a magnificent durbar at Delhi, Dec. 12, 1911. During the World War he showed his energy and sagacity in many ways. In 1929 he suffered from a long and dangerous illness, during a part of which Great Britain was ruled largely by a council of state.

GEORGE I. (1845–1913). King of Greece (1863–1913). Prince William of Denmark, second son of King Christian IX., was chosen king of the Hellenes, as George I., by the National Parliament of Greece with the consent of the powers in 1863. He was assassinated in Salonica while visiting the Greek army during the Balkan War. The prosperity of Greece was greatly advanced during his reign of fifty years.

GERRY, ELBRIDGE (1744–1816). American statesman, born in Massachusetts, was graduated from Harvard, and took a prominent part in agitation leading to the Declaration of Independence, of which he was a signer. In 1775 he had proposed to Massachusetts a bill to arm American ships engaged in ocean trade. He sat in the Continental Congress (1777–1781), and again later. He was one of three special ambassadors sent to France to settle a number of ticklish questions, but the other two delegates came home soon because they were so badly used by Talleyrand. While he was governor of Massachusetts (1810–12), a law redistricting the state was passed. This resulted in a fanciful likeness to a salamander in one district, of which a newspaper showed a cartoon naming it a "gerrymander." From this the term has been used to indicate moving boundaries to secure a political advantage for a party or individual. Gerry was elected vice-president in 1812, and died in office two years later.

GIBSON, HON. JOHN MORISON (1842–). Educated at Central School, Hamilton, and at Toronto University, gaining Prince of Wales prize, medals in classics and modern languages; LL.B. with gold medal (1869); LL.D. (1903); called to bar of Upper Canada (1867); provincial secretary of Ontario (1889); commissioner of crown lands (1896); attorney general (1899–1905); made queen's counsel (1890); bencher of Law Society of Upper Canada (1899); honorary lieutenant colonel of 13th regiment (1895); colonel commanding 13th brigade Canadian militia (1903); president Dominion Rifle Association 14 years; won Prince of Wales prize at Wimbledon (1879); commander Canadian rifle team to Wimbledon (1881), and to Bisley (1907). President of Canadian branch Red Cross Society; honorary aide-de-camp to Earl of Aberdeen and Earl Minto when governors general of Canada, and very prominent in many other National matters. Lieutenant governor of Ontario 1908–1914.

GILLETT, FREDERICK HUNTINGTON (1851–1935). American statesman, was born in Massachusetts, educated at Amherst and Harvard. From 1877 he practiced law at Springfield, Mass., and was a member of 53d to the 68th Congresses (1893–1924), being speaker of the House from 1919 to 1924. Elected senator to succeed Henry Cabot Lodge of Massachusetts in 1924.

GLADSTONE, WILLIAM EWART (1809–1898). British statesman; born in Liverpool; was educated at Eton and Christ Church; entered Parliament (1833) as member for Newark. His talents and oratorical powers marked him out for leadership and responsibility. He held many ministerial appointments, but none with greater distinction than that of chancellor of the exchequer. From 1867 to his death he was leader of the Liberal party, and his name was always identified with free trade, equitable taxation, manhood suffrage, and popular education. He first became prime minister in 1861, the leader of the opposition being his powerful rival, Disraeli. In 1886, during his third premiership, he introduced and almost carried the Home Rule Bill for Ireland. This caused a split in the Liberal party. In 1892, during his fourth and last ministry, he carried the amended bill through the Commons, but it was thrown out by the lords. He retired from office, March 3, 1894. His works include *Studies on Homer; Gleanings from Past Years*, being eight volumes of literary and political essays contributed to the *Quarterly Review* and other periodicals; and *Speeches* and *Letters*. The best life of Gladstone, is written by John Morley (1902). Gladstone was the greatest of the Victorian statesmen, and his political life was inspired by the loftiest sense of public duty. His foreign policy was weak, and his domestic measures were not always well advised, but no one ever doubted the sincerity of his aim or his devotion to his countrymen. The British working classes in particular owe him a lasting debt of gratitude.

GLASS, CARTER (1858–). American politician, born in Virginia, and served in the state senate for two terms (1899–1903), in the national House from 1902 to 1918, and then as Wilson's secretary of the treasury. In 1924 he was chosen to be senator from Virginia. He took a prominent part in the legislation that led to the founding of the federal reserve banks and floated the fifth Liberty loan in 1919.

GODFREY OF BOUILLON (*bōō'yôn*) (c. 1060–1100). Leader in the first crusade, was a man of great piety, and though not permitted to enjoy all the rights as duke of lower Lorraine as designed by his maternal grandfather, Duke Godfrey II., he fought for King Henry IV. As leader of about 40,000 Germans, he first reached Jerusalem, later determined what course should be taken for the princes, and in 1099 they chose him king of Jerusalem for a year, notable for various conflicts with other tribes. He became the subject of several later stories, poems. and epics in Italian and French, including Tasso's great epic of *Jerusalem Delivered*.

GOETHALS, GEORGE WASHINGTON. See under SCIENTISTS.

GOMEZ Y BAEZ (*gō'mās ē bā'ās*), **MAXIMO** (1826–1905). He was born in Santo Domingo, served in the Spanish army there and in Cuba, saw the conditions in the latter island, and twice led the Cuban patriots, 1868–78, and 1895–1900. When the United States intervened, he put his army at the disposal of the American government, and after the war did valuable service in assisting to establish a sound federal government. Though he spent much of his life as a soldier, he had the abilities of a statesman and political leader.

GONZALEZ (*gōn-zā'lĕs*), **MANUEL** (1833–1893). Mexican soldier and president; fought against the European invaders in 1861, and became brigadier general in 1867. He was secretary of war under Diaz (1878), and became president (1880). In 1884 he resigned in favor of Diaz, and afterwards became governor of Guanajuato.

GORDON, JOHN BROWN (1832–1904). American soldier and politician; born in Upson County, Ga. In the Confederate army he rose to the grade of lieutenant general and was in command of one wing of Lee's army at the surrender at Appomattox. United States senator (1873–1880 and 1891–1897); one of the Democratic leaders and an eloquent speaker; governor of Georgia (1887–1890). He attained great fame for his lecture "Last Days of the Confederacy."

GORMAN, ARTHUR PUE (1839–1906). United States senator; born in Maryland. A conspicuous leader of the Democratic party for over 30 years. Senator (1881–1899 and 1903–1906). Led the opposition to the Force Bill (1889) and was one of the remodelers of the Wilson Tariff Bill (1894). He made a study of the canal projects across the isthmus and favored the Nicaraguan route.

GORTSCHAKOFF (*gôr-chà-kôf'*) **PRINCE ALEXANDER MICHAILOVITCH** (1798–1883). Russian

statesman; born at St. Petersburg; Russian ambassador at Stuttgart and Vienna (1854–1856); appointed chancellor in 1863 and was for many years the most influential minister in Europe. He promoted the Franco-Russian agreement, which Bismarck met by the triple alliance.

GOUIN, LOMER (1861–1929). Canadian politician, educated at Laval and McGill Universities, prime minister of Quebec from 1905 to 1920, declined Borden's invitation to the coalition ministry, and declared as a Liberal. He was minister of justice in the King cabinet in 1921, represented Canada at the fourth meeting of the League of Nations, and attended the imperial and economic councils at London in 1924. Created a knight in 1908.

GOULBURN, HENRY (1784–1856). An English statesman. He held several cabinet positions and was one of the peace commissioners at the close of the War of 1812. He was highly respected by all parties during his honorable career. While chancellor of the exchequer under Peel, he succeeded in reducing the rate of interest on the national debt, and aided in securing the repeal of the corn laws.

GRACCHUS (*grak'us*), **GAIUS SEMPRONIUS.** (159–121 B. C.). Roman statesman. After his brother's murder, he returned from Spain to Italy; made questor (126 B. C.) and began to avenge his brother's death; tribune in 123 B. C. and again in 122 B. C., he sought to enforce his brother's laws and to extend the franchise to the Italian allies. The aristocracy plotted secretly against him and he was pursued. All hope of escape being cut off, he caused his faithful slave to kill him.

GRACCHUS, TIBERIUS SEMPRONIUS (163–133 B. C.). Brother of the preceding. Roman statesman. Took part in the destruction of Carthage (146 B. C.); tribune of the people (133 B. C.), and introduced a land bill to relieve their sufferings and concerning a fairer distribution of wealth. In a riot at the ensuing elections Gracchus was slain.

GRANT, ULYSSES SIMPSON (1822–1885). Eighteenth president of the United States, born in Ohio of Scotch ancestry, for a time helped his father on the farm, was graduated at West Point in 1843, served under General Taylor in the Mexican War, became a farmer at St. Louis, and in 1860 clerked in his father's store at Galena, Ill. When the Civil War opened, he volunteered, was commissioned colonel and by 1862, after the capture of Fort Donelson, was made major general, captured Vicksburg, Miss., after a stubborn and long campaign of waiting, brought the battle of Chattanooga to a success for the North, and virtually forced the surrender of Lee, April 9, 1865. Grant's immense popularity gave him a sure road to the white house in 1868 and again in 1872. After his term of office expired, he made a notable tour of the world. His friends tried to secure a third nomination in 1880, and Grant obtained more than 300 votes in the convention for 36 ballots, when Garfield became a compromise candidate. In 1881 Grant invested his savings in a business venture in New York City, but this failed in 1884, leaving him penniless. Though he was stricken with cancer then, he consented to write his *Memoirs*, which attained an immense fame and fortune after his death on July 23, 1885. Grant was a kindly, sympathetic, and honorable man in all his dealings.

GRATIAN (*grā'shan*) (359–383). Roman emperor from 367 to his death, who assigned most of the eastern, western, and home parts of the Roman empire to others for rule under his direction. He in turn gave his attention to Britain and Gaul, but the Roman general Maximus led a revolt in Britain, which extended to Gaul, and Gratian was assassinated at Lyons, where he had fled from Paris after being deserted by his troups. Christianity became the official religion in his reign, and he refused to observe pagan dress, rights, and the honors due the Vestals. Influenced by Ambrose, bishop of Milan, he persecuted the heathen Romans and renegade Christians, though ordinarily he was a mild and humane ruler.

GRATTAN (*grăt'ăn*), **HENRY** (1746–1820). Irish statesman, born in Dublin, educated at Trinity College there, and was called to the Irish bar. He became a celebrated orator and labored with great zeal to secure an independent parliament for Ireland and for Catholic emancipation. In 1805, indepedence not being attained, he joined the English Parliament, where he was befriended by Fox. Though he took a moderate ground, somewhat thereby alienating many Irish at home, he always worked for the good of his countrymen. For moderation, honor in private life, and all noble sentiments Grattan became widely popular among all parties.

GREELEY, HORACE (1811–1872). American journalist and politician, who with Thurlow Weed engaged in newspaper work in New York. In 1841 he founded the *Tribune* and for years became a great power in national thought. He supported many reform movements like suffrage, abolition of capital punishment, and the tariff. Though he at first admitted the rights of the southern states to withdraw, he became an eager and effective supporter of the union in the war. Later he tried to negotiate with reputed southern leaders for a cessation of hostilities, and after the war he favored mild measures for the southern participants. He signed the bail bond of Jefferson Davis. When he became a presidential candidate against Grant in 1872, Greeley lost much support from his old adherents because of his attitude toward the South. He died a disheartened and broken man three weeks after the election.

GREVY (*grā-vē'*) **FRANCOIS PAUL JULES** (1807–1891). French statesman and third president of France. He was elected a deputy in 1868, and became president of the National Assembly (1873). In 1876 he was made president of the Chamber of Deputies, and succeeded MacMahon as president of the republic in 1879, being reëlected in 1885. He resigned in 1887 on account of the scandal connected with his son-in-law, Wilson, who was charged with trafficking in decorations.

GREY, ALBERT HENRY GEORGE, EARL (1851–1917). British statesman; educated at Harrow and at Trinity College, Cambridge; in Parliament from South Northumberland (1880–1885), from Tyneside (1885–1886); succeeded to the peerage (1894); administrator of Rhodesia (1896–1897); director of British South Africa Company (1898–1904); governor general of Canada (1904–1911). In his later years he labored for imperial federation and proportional representation.

GREY, CHARLES GREY, SECOND EARL OF (1764–1845). He was a Whig member for Northumberland in 1786, assisted Fox, Burke, and Pitt in the impeachment of Warren Hastings, and became one of the "Society of Friends of the People," the object of which was to secure reforms in the franchise system. Grey, now Lord Howick, became first lord of the admiralty in 1806, foreign secretary on the death of Fox that same year, and in 1830 prime minister. His reform bill extending the voting rights met defeat, Parliament was dissolved, but a new one more favorable succeeded. Grey since 1807 had been an earl. His reform bill of 1832 was again rejected, but Grey secured permission to create enough favorable lords to pass it, since the House of Commons had already yielded. The Duke of Wellington, who had led the opposition, now gave up the struggle, and the bill was finally enacted. Another great measure was a law abolishing slavery in British territory.

GREY, EDWARD VISCOUNT (1862–1933). English statesman, educated at Winchester and Oxford, became a baron in 1882, and undersecretary of foreign affairs from 1892 to 1895, and by 1905 had risen to a commanding position in diplomacy. Some of his great achievements were the opposition to the annexation of Bosnia and Hercegovnia by Austria in 1908, though the plan failed; his success in blocking concessions in Morocco to Germany; and his treatment of the Balkan problems in 1914. He did everything possible to promote friendly feeling among the nations in 1914, and proposed that the Austro-Serbian difficulty should be arbitrated. He was created Earl Grey in 1916, in 1919 served as special ambassador to Washington, and in 1928 was elected Chancellor of Oxford University.

GREY, LADY JANE (1537–1554). "The nine days' queen" of England; born at Broadgate, Leicestershire; great-granddaughter of Henry VII.; married Lord Guilford Dudley, son of the duke of Northumberland. The latter proclaimed her queen on the death of Edward VI. (1553), but the usurpation was short-lived and Mary was proclaimed on July 19, 1553. The ill-fated Lady Jane and her husband were beheaded in the Tower (February 12, 1554).

GUSTAVUS (*gŭs-ta'vŭs*) **I. (VASA)** (1496–1560). King of Sweden; ascended the throne (1523); introduced the Reformation into Sweden; freed the country from the monopolies long enjoyed by the Hanseatic League, and established a navy.

GUSTAVUS II. (ADOLPHUS) (1594–1632). King of Sweden (1611–1632); son of Charles IX.; de-

feated the Polish and Russian invaders; went to the aid of the Protestant league in Germany and defeated Tilly at Breitenfeld, near Leipzig (September 17, 1631). He was killed in the hour of victory at the battle of Lützen (November 16, 1632), in which he was opposed to the famous Wallenstein.

GUSTAVUS III. (1746–1792). King of Sweden (1771–1792). He regenerated his country, though his extravagances alienated many of his subjects. He declared war against Russia without consulting Parliament, and in 1790 almost annihilated the Russian fleet at the battle of Svensksund. He was assassinated in 1792.

GUSTAVUS IV. (1778–1837). King of Sweden; came to the throne in 1792, the duke of Sudermania being regent during the king's minority. He lost Finland to the Russians, and his subjects finally deposed him (May, 1809). He died at St. Gall in Switzerland.

GUSTAVUS V. (1858–). King of Sweden since December 8, 1907: born in the Castle of Drottningholm; first son of King Oscar II. Studied law at the University of Uppsala (1877–1878), traveled extensively, and resumed study in the university (1889); entered the army (1875) and gradually rose in rank until he became lieutenant general (1892) and general (1898). From 1884 to 1891 he was vice-king of Norway; married Princess Victoria (1881), daughter of Frederick William Louis, grand duke of Baden. He succeeded Oscar II. as king.

HAAKON VII. (*hô'kŏn*) (1872–). King of Norway (1905–). The second son of Frederick, king of Denmark. Elected king by the Storthing of Norway on the separation from Sweden; married Maud, third daughter of King Edward VII. of England.

HADRIAN (PUBLIUS AELIUS HADRIANUS) (76–138). Roman emperor (117–138). Governor of Syria (117); proclaimed emperor (117); made peace and governed justly. Built Hadrian's Wall in Britain; the Temple of Venus in Rome; the Mausoleum (i.e., Castle of St. Angelo); the Aelian Bridge; founded Adrianople.

HAGGART, HON. JOHN GRAHAM (1836–1913). Born in Perth, Ont.; mayor of Perth (1867–1869–1871); elected for South Lanark to House of Commons in 1872. Postmaster general (1888–1902); department of railways and canals (1892–1896). Leader of Ontario Conservatives in Parliament (1892); completed construction of Sault Ste. Marie Canal, the final link in the mighty chain of Canadian canals connecting the Great Lakes with the St. Lawrence. Haggart led the opposition as a Conservative in parliament during the administration of Sir Wilfrid Laurier.

HALDANE (*ha'dān*), **RICHARD BURTON, VISCOUNT** (1856–1928). British philosopher and statesman, was born in Scotland and educated at Edinburgh and Göttingen, becoming a barrister in 1879. He served as a Liberal in parliament from 1885 to 1911, secretary of state, 1905–12, and then lord chancellor for three years, and again in the ministry of Ramsay Macdonald in 1924, continuing on invitation of Baldwin his connection with the ministry. A report on the machinery of government was adopted by Mr. Baldwin in principle. Haldane wrote several scholarly works, including *The Reign of Relativity* (1921) and in the following year *The Philosophy of Humanism*. His influence in all departments of government was profound.

HALE, JOHN PARKER (1806–1873). Statesman; born in Rochester, N. H.; admitted to bar (1830); elected to state legislature (1832); United States district attorney for New Hampshire (1834–1841); congressman (1843–1845); United States senator (1847–1865), excepting an interval of two years; minister to Spain (1865–1869).

HALIFAX, CHARLES MONTAGU, EARL OF (1661–1715). See under DICTIONARY OF FINANCIERS.

HALIFAX, GEORGE SAVILE (1633–1695). English statesman, created Baron Savile of Halifax in 1667, sat in the Convention parliament of 1660, went on a diplomatic mission to Holland, opposed the Exclusion Bill, but approved the Regency Bill, and so alienated Charles II, but later the king again took him up more actively. James dismissed him from public service, but Halifax returned under William and Mary as lord privy seal. Though his life was made up of several compromises, he tried to serve the best interests of state, and to steer an even course between religious and political factions. Thus as a conciliator he had a great influence.

HAMILTON, ALEXANDER (1757–1804). One of the greatest of American statesmen; born on the island of Nevis, West Indies; entered Columbia University (1773) and early attracted attention by several pamphlets of a political nature. He was a lieutenant colonel under General Washington (1777–1781); was a member of the Continental Congress (1782–1783), of the Annapolis Convention (1786), of the Constitutional Convention in Philadelphia (1787), and of Congress (1787–1788). As United States secretary of the treasury he helped to mold the country's policies. After the definite formation of parties, he became leader of the Federalists. His support of Jefferson in 1800 increased the hatred existing between him and his rival, Aaron Burr. A trivial occasion led to a duel between the two men in which Hamilton was mortally wounded.

HAMLIN, HANNIBAL (1809–1891). An American statesman; born in Paris Hill, Me. Practised law and was a member of the Maine legislature (1836–1840 and 1847), of the lower house of Congress (1843–1847), of the United States Senate (1848–1857); became governor of Maine (1857); was vice-president of the United States (1861–1865); sat in the Senate (1869–1881); and from 1881 to 1883 was minister to Spain.

HAMMURABI (*hä-mu-rä'bi*) (2067–2025 B. C.). Great king of the first Babylonian dynasty, is known for his various works of reorganization and for a code of laws for use in courts of his empire. This code is preserved on an immense diorite stela in 21 columns, a few of which are defaced, and on the other side 28 more columns, containing also an account of the works of the king among other material. In all there are about 250 laws now readable in the Sumerian language in which they were inscribed. Hammurabi seems to have been an able and progressive monarch, given to public improvements and justice.

HANCOCK, JOHN (1737–1793). American statesman; born in Quincy, Mass.; was graduated from Harvard (1754) and inherited a considerable fortune from his uncle (1764); was a member of the Massachusetts general court (1766–1772), of the Continental Congress (1775–1780 and 1785–1786), where he served as president (1775–1777). His name appears in a bold hand on the Declaration of Independence. He was the first governor of Massachusetts under the new constitution (1780–1785 and 1787–1793), and president of the convention (1788) which met to consider the new Federal constitution.

HANNA, MARCUS ALONZO (1837–1904). American politician; born in Lisbon, Ohio. In 1896 he secured the nomination of William McKinley for president and he himself became the chairman of the Republican National Committee. Appointed senator (1897) to succeed the late John Sherman; elected in 1898. One of the most influential advisers of the administration.

HARCOURT, SIR WILLIAM VERNON (1827–1904). English statesman; born at Nuneham Park, Oxford. From 1869 to 1887 he was professor of international law at Cambridge. Was home secretary and cabinet minister (1880–1885), chancellor of the exchequer (1886 and 1892–1895), and leader of the House of Commons (1894) on Gladstone's retirement. His death-duties budget (1894) is his greatest achievement. He was knighted in 1873.

HARDICANUTE (*har-dĭ-că-nūte'*) **(HARDACNUT)** (c. 1019–1042). King of England and Denmark; the son and successor of Canute. At the death of his father (1035) he was under-king of Denmark. The English Witan decided that Harold, half-brother of Hardecanute, should have the south and that Hardecanute should have only Wessex. As Hardecanute was slow in taking his kingdom, it all went to Harold in 1037. On the latter's death, in 1040, it all passed to Hardecanute.

HARDING, WARREN G. (1865–1923). Twenty-ninth president of the United States, born in Morrow County, Ohio, studied at Ohio Central College at Iberia, taught school, read some law, and then entered journalism, which became his permanent profession. From 1884 to shortly before his death he was chief owner, and for many years was editor, of the Marion, Ohio, *Star*. Joseph B. Foraker encouraged him to enter politics, and their friendship continued to the end, even though he replaced Foraker in 1914 as

Republican candidate for senator for Ohio. Harding sat for two terms in the Ohio senate (1900–04), for two years was lieutenant governor of Ohio (1904–06), but was defeated in the race for governor in 1910. Before he had completed his term as senator, which began in 1914, he was elected president by an overwhelming vote in 1920, taking office on March 4 next. Following a trip to Alaska in 1923, an attack of pneumonia and heart disease caused his death at San Francisco on Aug. 2. The outstanding event of his administration was probably President Harding's invitation of the great nations to a Limitation of Armament Conference in Washington in 1921. He opposed the League of Nations, but favored an association with less autocratic powers.

HARDINGE, RT. HON. SIR CHARLES (1858–). Viceroy of India (1910). Entered diplomatic service (1880); served successively as secretary of embassy at Constantinople, Berlin, Washington, Sofia, Bucharest, Paris, Teheran, and St. Petersburg till 1903; assistant under-secretary for foreign affairs (1903–1904); ambassador at St. Petersburg (1904–1906); and permanent under-secretary for foreign affairs (1906–1910). In 1910 he was appointed Viceroy of India and made a peer, remaining abroad till 1916, and from 1920 to 1922 he was ambassador to France.

HARMON, JUDSON. See DICTIONARY OF LEADING JURISTS.

HAROLD. Name of two kings of England. **HAROLD I.** (? –1040), surnamed **HAREFOOT.** Became joint ruler with Hardecanute (1035); but the prolonged absence of Hardecanute in Denmark led the people to give over his share of the kingdom to Harold, who became sole king (1037). **HAROLD II.** (?1021–1066). Became king in 1066; was the second son of Earl Godwin. In 1066 he defeated the Norsemen at Stamford Bridge, but a few days later was defeated and slain by William, duke of Normandy, at Senlac.

HARRISON, BENJAMIN (1833–1901). The twenty-third president of the United States, was a grandson of W. H. Harrison, ninth president and the son of John Scott Harrison, member of Congress from Ohio (1853–57). He worked on a farm, attended school in a log-cabin, completed a course at Miami University, studied law under Bellamy Storer at Cincinnati, and settled at Indianapolis in 1854. After distinguished service in the Civil War, especially in the command of General Sherman and at the battles of Kenesaw Mountain and Nashville, he was breveted brigadier general in 1865. After interrupted practice of the law until 1881 he entered the Senate, having refused a cabinet place offered by Garfield, whom he strongly supported. As chairman of the committee on territories, he wielded a great influence upon the policy of admission of new states. He defeated Grover Cleveland for the presidency in 1889, but was replaced by the latter four years later. Important tariff, peace, and monetary legislation was passed during Harrison's term, but he was defeated because of the attitude of labor on the tariff.

HARRISON, WILLIAM HENRY (1773–1841). Ninth president of the United States, born in Charles County, Virginia, the son of Benjamin Harrison, one of the signers of the Declaration of Independence and governor of Virginia (1781–84). W. H. Harrison was graduated from Hampden-Sidney College, was prevented by the death of his father from completing a medical course, joined the army, and spent many years in treating with the Indians. He acted as secretary of the North-west Territory (1798), and the next year represented the district in Congress. From 1801 to 1812 he was governor of Indiana Territory, much larger than the present state of the same name, made various treaties with the Indians, helped confirm their rights, fixed their boundaries, and secured legislation preventing sale of liquor to them. In the War of 1812 he advanced to the rank of major general, finally defeating the British decisively at the battle of the Thames (1813). He was a member of Congress (1816–19), of the Ohio senate (1819–21), U. S. Senator (1825–28), resigning to be first minister to Colombia, but served only part of a year, returning to his home in North Bend, Ohio. In 1840 he defeated Van Buren for the presidency by an electoral vote of 234 to 60, after a strenuous campaign, many speeches, and endless mass meetings. Harrison died after a month as president. Much of the policy regarding the Indians and new territory dates from Harrison's wise recommendations. His defeat of the Indians at the Tippecanoe near the present Battle Ground, Indiana, was long a source of his popularity and of his hold on Indian affairs.

HARUN-AL-RASCHID (*hä-rōōn'äl-rä'shĕd*) (? – 809). Caliph of Arabia and the fifth of the line of the Abbassides. He succeeded his elder brother, Al-Hadi, in 786. Under him the capital, Bagdad, became the most flourishing city of the times. He is best known as the caliph around whom center the tales of the Arabian Nights. His success was due to the ability of the grand vizier, Yahya, of the family of the Barmecides. The caliph grew envious and distrustful of them, and put the vizier and his four sons to death. After this rebellions spread throughout the caliphate, and while on his way to check a formidable one at Khorassan in 809, he was attacked by apoplexy and died.

HASTINGS, WARREN (1732–1818). An English statesman; governor general of India; born at Churchill, in Oxfordshire. In 1769 he went to India for a second time, and in 1772 became president of the supreme council of Bengal. The administration of Hastings was vigorous and successful, and on his return to England (1785) he was received with acclaim. But the whigs questioned his methods, and his impeachment, which began in 1788, extended over seven years, and finally ended in his acquittal. He devoted the remainder of his life to literature.

HAY, JOHN (1838–1905). American statesman and diplomat; born in Salem, Ind. Law student with and private secretary of President Lincoln; editorial writer of the New York *Tribune* (1870–1875) and later editor-in-chief; first assistant secretary of state under Hayes (1879–1881); ambassador to Great Britain (1897); secretary of state (1898), which office he held until his death. Though a prominent public man he never once held an elective office.

HAYES, RUTHERFORD BIRCHARD (1822–1893). The nineteenth president of the United States, who was born at Delaware, Ohio, attended school at Norwalk, Ohio, and Middletown, Conn., was graduated from Kenyon College and the Harvard Law School (1845). He immediately began the practice of law, after 1848 in Cincinnati, having first settled in Upper Sandusky (now Fremont), Ohio. For three years he acted as city attorney (1858–61), served with distinction and was severely wounded in the Civil War, being made a brevet major general of volunteers. He was elected to Congress (1864 and 1866), was governor of Ohio (1868–72), and began his interest in "sound money," or the coinage of silver at a fixed rate of value and weight rather than the issue of paper or fiat money. In 1876 he was preferred over James G. Blaine, his Republican opponent, as candidate for the presidency, but the Democratic nominee, Samuel J. Tilden, received a majority of the popular votes. Irregularities in four states were settled by an electoral commission of 15 men, who by a vote of 8 to 7 settled the contests so that Hayes was declared elected. The two great accomplishments of his term were the resumption of specie payments and the conciliatory attitude toward the Southern states. After his retirement he returned to Fremont, Ohio, and interested himself in charitable and public movements.

HAYNE, ROBERT YOUNG (1791–1839). American statesman; born in St. Paul's Parish, Colleton District, S. C. He was admitted to the bar (1812); was attorney general of his state (1818–1822); served also in other important positions. He is best remembered for his brilliant debate with Webster on the "States' Rights" question. In 1832 he was elected governor of South Carolina and, though he firmly supported his state, was strongly opposed to the violent methods of the extreme nullifications.

HEAD, SIR EDMUND WALKER (1805–1868). English governor general of Canada; born near Maidstone, Kent; was educated at Winchester and Oxford, was a fellow of Merton College (1830–1837), and in 1847 was made lieutenant governor of New Brunswick. During his term (1854–1861) as governor general of Canada, the clergy reserves and seigneurial tenures were done away with, the Victoria bridge at Montreal built, and Ottawa made the capital.

HEARST (*hûrst*), **WILLIAM RANDOLPH** (1863–). An American journalist and politician; born in San Francisco, Cal. In 1886 he became editor of the San Francisco *Examiner;* bought the New York *Journal* (1895); and in 1900 began to publish the Chicago *American.* Elected to the United States House of Representatives (1902 and 1904). In 1905 he was nominated for mayor of New York City, but was defeated by George B. McClellan. In 1906 Hearst

was nominated for governor of New York, but was defeated by Charles E. Hughes. He was again defeated in 1909.

HEINSIUS (*hain'si-us*), **ANTOON** (1641–1720). Dutch statesman; born at Delft; was the actual governor of Holland under William of Orange. He is remembered for his obstinacy in dealing with Louis XIV, of France, of whom he made humiliating demands in behalf of the alliance of Holland on the one hand, and Great Britain, Denmark, Hanover, Austria, Prussia, and Savoy on the other. He was the last to sign the Peace of Utrecht.

HENDERSON, ARTHUR (1863–1935). British labor leader and politician. He was born in Glasgow, was a moulder and became interested in the labor movement, in 1908 becoming chairman of the labor party. He sat in the first coalition ministry of Asquith as president of the board of education and later as paymaster general, pledged the support of labor, and sat in the cabinet of Lloyd-George. In 1917 he visited Russia and joined in advocating an international labor and socialist congress, but the idea became unpopular, he lost his seat in the House of Commons in 1918, 1922, and 1923, but went in by means of a by-election in each case. Both he and two sons were in parliament in 1924, and he was secretary of state for home affairs in the MacDonald cabinet.

HENDRICKS, THOMAS ANDREWS (1819–1885). American statesman; born near Zanesville, Ohio. Member of Congress from Indiana (1851–1855); United States senator (1863–1869); governor of Indiana (1873–1877); candidate for vice-president with Tilden (1876), and elected vice-president with Grover Cleveland (1884), but died on November 25, 1885.

HENGEST (*hĕn'gĕst*) (? –488). Traditional Jutish chief. It is said that at the invitation of Vortigern, he landed on the Isle of Thanet (449) to aid in the expulsion of the Picts and Scots. He later turned against the Britons, and in 457 became king of Kent.

HENRY I. (1068–1135). King of England (1100–1135). The fourth son of William the Conqueror. In 1091 William Rufus and Robert took his possessions away from him and drove him into exile. When William Rufus was found dead, Henry went at once to England, seized the royal treasure, was crowned king and issued a charter of rights, which was the basis of Magna Charta. He recalled Anselm, archbishop of Canterbury, and married Matilda, daughter of Malcolm Canmore of Scotland, thus greatly pleasing the Saxon people. Robert of Normandy made war upon his brother and Henry was obliged to surrender all of his possessions in Normandy and pay a bounty to Robert in 1101. War broke out between them again in 1104 and they met at Tenchefrai, in France, and Robert was defeated and held as a prisoner in Cardiff Castle until his death. The holding of Robert's possessions in France brought about frequent wars, but these had much to do with the amalgamation of the races in England, and great strides were taken in this reign towards a union of the Saxons and Normans. Henry lost his favorite son, William, in 1120.

HENRY II. (1133–1189). King of England (1154–1189). Son of Matilda and grandson of Henry I. His father was Geoffrey Plantagenet. Henry was the first of the line of Plantagenet kings. He succeeded Stephen by the Treaty of Wallingford. He gained large possessions in France by inheritance and by marriage; in fact, his French territory was greater than that of the French king. Henry sought to repair the damage done by the civil war in Stephen's reign. He soon became involved in quarrels with the clergy. A direct consequence of this was the murder of Thomas à Becket, the archbishop of Canterbury, in 1162. Henry did penance publicly for this crime. Ireland was conquered by him in 1157. The latter part of his life was troubled by the rebellions of his sons. In the course of one of these the king died and was succeeded by his son, Richard Coeur de Lion.

HENRY III. (1207–1272). King of England (1216–1272). The eldest son of John, whom he succeeded when only nine years old. The affairs were administered by the earl of Pembroke until 1219, then by Stephen Langton and Hubert de Burgh. In 1258 the barons, led by Simon de Montfort, rose against him and forced from him concessions known as the Provisions of Oxford. The king got back his power and annulled the provisions in 1264. "The Mise of Lewes" followed the battle of Lewes in 1264, when the king was defeated and captured. By this the king's power was greatly limited and Simon de Montfort tried to secure a new constitution for England. A parliament was summoned, which was attended by knights and representatives of the shires, and is known as the first parliament of England. Statute laws date from Henry's time, the Provisions of Merton being the first enactment on the English statute book.

HENRY IV. (1367–1413). King of England (1399–1413). The eldest son of John of Gaunt, the fourth son of Edward III. He was banished by Richard II. in consequence of a quarrel with the duke of Norfolk in 1398. In 1399 John of Gaunt died and King Richard II., breaking his promise, confiscated all of his estates. The son landed in England and, as Richard was returning from Ireland, took him prisoner, caused his abdication in 1399, and took the throne in his place. He put down a rebellion of the Welsh under Owen Glendower (1400); defeated the Scotch at Homildon Hill in 1402; overthrew the Percy rebellion at Shrewsbury in 1403, when the famous Percy, Harry Hotspur, was slain.

HENRY V. (1387–1422). King of England (1413–1422). Son and successor of Henry IV. Conducted a war with France in which he took the town of Harfleur and gained the battle of Agincourt against enormous odds in 1415; took Normandy in 1417, and Rouen in 1419. While undertaking a third campaign against France he was taken ill and died at Vincennes in 1422. His son, Henry VI., succeeded him.

HENRY VI. (1421–1471). King of England (1422–1461). Son and successor of Henry V. He was declared king of England when only a few months old, and king of France a few weeks later. The duke of Bedford was regent. In 1421 Joan of Arc caused the defeat of the English in France, and the country gradually passed out of English control. By 1451 Calais was the only English possession in France. The king lost his mind at times and affairs were in a bad way. In 1450 the men of Kent, under the leadership of Jack Cade, rose in rebellion and demanded that the duke of York be placed at the head of the government. In 1455 the first battle of St. Albans was fought between the king's forces and those of the duke of York. This was the first battle of the Wars of the Roses, or the long struggle between the House of Lancaster, to which Henry VI. belonged, and that of York, led by Richard, duke of York. Henry was taken prisoner in this battle. He was again captured at the battle of Northampton (1460). It was then agreed that Henry should keep the crown but that York should be his successor. Margaret, the wife of Henry, was angered that her son should be shut out, so she raised forces and the battle of Wakefield Green was fought in 1460 and the duke of York slain. Edward, earl of March, York's son, raised a force and fought the battle of Towton in 1461 and was crowned king as Edward IV. Other engagements followed, and Margaret caused Edward to be driven out of England and Henry restored. Edward returned the same year (1471) and Henry was recaptured and murdered.

HENRY VII. (1457–1509). King of England (1485–1509). He was the son of Edmund Tudor, earl of Richmond, and Margaret, granddaughter of John of Gaunt, from whom he derived his claim to the throne. He defeated Richard III., of the house of York, at Bosworth Field in 1485 and Richard was slain in battle. Several uprisings by Yorkists in his reign accomplished nothing. The royal power increased rapidly in this reign. The Star Chamber was instituted for the detection and punishment secretly of powerful nobles. Henry kept out of foreign wars and devoted himself largely to increasing his power and in amassing a fortune. North America was discovered by John Cabot in this reign.

HENRY VIII. (1491–1547). King of England (1509–1547); second son of Henry VII.; married Catherine of Aragon; defeated the French at Guinegate, and the Scotch at Flodden (1513). Until 1529 Wolsey was a power almost as supreme as the king himself. In actual warfare Henry sided with Francis I. of France, though in diplomatic transactions he often favored Emperor Charles V.; there were many interviews, one of the most noted of which was the "Field of the Cloth of Gold." Failing to receive the pope's consent to a divorce from Catherine, Henry deposed Wolsey, made himself head of the Church of England, and in 1533 married Anne Boleyn. Cranmer was made archbishop of Canterbury, monasteries were abolished, and all subjects made to take oath of allegiance to the king. Henry, actuated only by personal motives, did not realize that he had forever broken papal power in England. Anne Boleyn was executed (1536) and Henry married Jane Seymour, who died

(1537); married Anne of Cleves (1540); divorced shortly after, and married Catherine Howard, who was executed (1542); married Catherine Parr (1543), his sixth wife. During his last years Henry endeavored to establish his authority in Ireland, and was at war with Scotland and France (1542–1546). The succession was granted by Parliament to his children, Edward, Mary, and Elizabeth.

HENRY IV. (1050–1106). Holy Roman emperor (1056–1106). The son and successor of Henry III. He became king when only six years old and the nobles and clergy who had been held in check by Henry III. sought to gain privileges by force. Revolts took place and Germany was in a state of anarchy. In 1073 Hildebrand was elected pope under the title of Gregory VII. A decree was passed by the church claiming sole right of investiture or appointment of bishops and other church dignitaries. Henry contested this right, and after a struggle he went to Canossa and waited as a penitent for three days barefooted in the courtyard for absolution from the pope. This action, while humiliating to Henry, really averted a union of the church and the nobles, and was diplomatic. Henry was afterward taken prisoner in a rebellion and forced to abdicate. He died shortly after.

HENRY V. (1081–1125). Holy Roman emperor (1106–1125). Son and successor of Henry IV. Appointed after Conrad had forfeited his right to the throne by rebellion. Pope Paschal II. demanded that he give up the right of investiture, which Henry refused to do. In 1110 he invaded Italy with 300,000 men. The pope agreed that the church should give up its lands and property in Germany if the emperor would give up the right of investiture. This was agreed to. The Romans opposed the crowning of Henry as emperor and the pope and cardinals were taken prisoners. Then the pope recognized the right of investiture and Henry was crowned. As soon as he had crossed the Alps on his way home, the pope renounced the treaty and Henry was excommunicated. Germany was then plunged in civil war. In 1116 Henry went back to Italy, drove Paschal from Rome, and after his death had Gregory VIII. elected pope. The papal party then set up Gelasius as pope and Henry allayed the opposition to him in Germany. Pope Calixtus II., who succeeded Gelasius in 1119, compromised the situation and the struggle was closed for a time by the Treaty of Worms (1122). Henry was succeeded by Conrad III.

HENRY IV. (1553–1610). King of France, was educated a Protestant, married Margaret of Valois, and by feigning a change of faith escaped the massacre of St. Bartholomew. He engaged in various battles and alliances, sought to weaken the power of the Guises, and finally, on the death of Henry III. became king of France. Yet he had to win his authority, and even to become a Catholic before Paris welcomed him. By the edict of Nantes, however, he allowed freedom of conscience to the Protestants. Henry encouraged industry, sought foreign alliances, especially against the Habsburgs, and entertained at least a kindly feeling toward the common people.

HENRY, PATRICK (1736–1799). American patriot and orator; member of the Continental Congress; twice governor of Virginia. From very humble beginnings, and after failure in business he became a lawyer; won fame for his speech in the "Parsons' Cause"; opposed the Stamp Act, and by his eloquence stirred up Virginia to action in the War of Independence. He was the first speaker of the General Congress at Philadelphia.

HENRY THE FOWLER (876–936). King of the Germans (919–936). The son of Otho, duke of Saxony. He succeeded his father in 912, and on the death of Conrad I., the German king in 919, he was chosen king by the Franconian and Saxon nobles. In 925 Lotharingia, or Lorraine, came over to Henry's side. The Hungarians had long made inroads upon Germany, and in 924 Henry was obliged to buy a truce with them for nine years of peace. He took part of this time to prepare and train his army. When he thought it was ready he tried it against some Danes and Slavs. He then refused payment of the annual tribute to the Hungarians. They made war upon him and he defeated them in Thuringia so badly that they did not venture into Germany for several years thereafter. Henry gathered around him the powerful nobles and made himself secure through their influence.

HEPBURN, WILLIAM PETERS (1833–1916). Congressman in 1881–87 and 1893–1909 of the eighth Iowa district. His parents removed to Iowa in 1841 and he became a printer, later an attorney, and soldier in the Civil War, when he became a lieutenant colonel. He was chairman of the congressional committee on interstate commerce and drafted the act which bears his name for the regulation of interstate carriers.

HERRICK, MYRON T. (1854–1929). Lived much of his life in Ohio as lawyer and business man, holding many local and state political offices, including the governorship of Ohio from 1903 to 1906. He declined appointment, for business reasons, as secretary of the treasury under both McKinley and Taft, but in 1912 was appointed ambassador to France by the latter, serving also under Wilson till 1914. During the first months of the World War he also acted for Austria, Germany, and Turkey at Paris, established an American hospital at Neuilly, and engaged in other relief activities, for which France gave him the cross of the Legion of Honor. He was again United States ambassador to France from 1921 till his death in Paris, March 31, 1929.

HILL, DAVID BENNETT (1843–1910). A Democratic politician, prominent in New York state; born at Havana, N. Y. Lieutenant governor of New York with Cleveland, whom he succeeded (1885) until 1891; United States senator to succeed Evarts (1891); defeated for governor by Levi P. Morton (1894).

HILL, DAVID JAYNE (1850–1932). American diplomatist, scholar, and author, born in Plainfield, New Jersey, was graduated from Bucknell University in Pennsylvania, became professor of rhetoric in his alma mater and president from 1879 to 1888, when he became president of the University of Rochester. Resigning in 1896, he studied law in Europe, in 1898 was appointed assistant secretary of state and also acted as professor of diplomacy at Washington, in 1903 went to Switzerland as minister, in 1905 to Holland, and in 1908–11 was ambassador to Germany. See under DICTIONARY OF AUTHORS.

HOAR, GEORGE FRISBIE (1826–1904). American legislator; born in Concord, Mass. Member of the Free-Soil party and of the Republican party. Congressman (1869–1877); United States senator (1877 till his death); member of the Electoral Commission (1877); presided over the Republican National Convention which nominated Garfield (1880); always opposed "imperialism."

HONORIUS (*hō-nō′ri-us*), **FLAVIUS** (384–423). Emperor of the West, on the division of the Roman empire after the death of Theodosius. He was at first influenced by Stilich, his father-in-law, a Vandal, and later by his general Constantius. Britain, Spain, and Gaul were lost during his reign. He rooted out pagan religious practices, tried to abolish the gladiatorial shows, reduced taxes, and made some improvements in laws. The Visigoths finally sacked Rome in 410.

HOOVER, HERBERT CLARK (1877–). Thirty-first president of the United States, was born at West Branch, Iowa, the son of an implement dealer and village blacksmith and of a mother noted as a Quaker preacher and public speaker. His father died when he was six, his mother when he was nine. Herbert lived with relatives, worked on a farm, studied as he could, and in the fall of 1891 entered the first class registered at Stanford University, California. After intensifying in geology and the study of mining, and working his way as a laboratory and field assistant, he engaged for a time as a workman in a mine, went to Australia in 1897, and to China in 1899,— after his marriage with his old friend, Lou Henry, also a student in mining at Stanford. The Boxer outbreak interned them for four months in the besieged city of Tientsin. For the next 13 years he acted as consulting engineer in several lands of both hemispheres. At the start of the World War the Hoovers were in London, where they and a group of friends arranged and financed the return to America of thousands of stranded countrymen. He organized and carried on the relief work in Belgium and occupied France, in four years collecting and expending about a billion dollars and saving countless lives of non-combatants. In 1917 President Wilson called him to conduct the Food Administration in the United States, after which in 1919 he organized a private corporation which finally fed and clothed nearly two million European children. From 1919 to 1928 he acted as secretary of commerce in the cabinets of Harding and Coolidge. In these years he acted on several relief and industrial commissions. His adherents tried to secure the presidential nomination for him in 1920, and the vice presidential, against his wish, in 1924. On the initial ballot in

1928 he was chosen by 837 out of a possible total of 1,089 votes in the Republican National Convention, and was elected by an electoral vote of 444 to 87 for Alfred E. Smith.

HOUGHTON (*hō'tŭn*), **ALANSON BIGELOW** (1863–). Ambassador to Germany, for many years was connected with the manufacture of glass at Corning, New York. From 1919 to 1922 he represented the 37th New York district in the House of Representatives, resigning to become minister to Germany. In March, 1925, he succeeded Ambassador Kellogg at the Court of St. James.

HOUSE, EDWARD MANDELL (1858–1938). American political leader who never held office himself, but was potent in the counsels of the Democratic party, especially in Texas and in the administration of President Wilson. He refused to take a cabinet position under Wilson, but advised him in the selection of several others, acted as confidential adviser, and served with him as spokesman at the Versailles Peace Conference. House was an astute and enlightened leader.

HOUSTON (*hū'stŭn*), **DAVID** (1866–1940). Born in North Carolina, he taught political science at the University of Texas from 1894 to 1902, acting as dean of the college, 1899–1902. Then he became successively president of the Agricultural and Mechanical College of Texas, University of Texas, and Washington University, St. Louis. He was secretary of agriculture under Wilson from 1913 to 1920 and of the treasury, February 1920 to March 1921, and then president of the Mutual Life Insurance Company, New York.

HOUSTON, SAM (1793–1863). American soldier and statesman; born near Lexington, Virginia. In 1813–1814 he served under General Jackson against the Creek Indians; later studied and practised law in Tennessee, and was a representative in Congress (1823–1827); was governor of Tennessee (1827–1829); removed to Texas and became commander-in-chief of the revolutionary forces there (1835); was president of Texas (1836–1838, 1841–1844). After the annexation of Texas he was United States senator (1846–1859), and governor of Texas (1859–1861), of which position he was deprived because he would not support the Confederacy.

HOWARD, ESME (1863–). A British diplomatist who was born in Cumberland, educated at Harrow, and entered the service in 1885. Attached to embassies at Rome, Berlin, secretary of state for foreign affairs, 1894–95; was in the South African war; served in embassy again at Rome and at Washington, and then became consul-general to Crete and to Hungary, 1903–11. Then was minister to Switzerland, Sweden; ambassador to Spain, and in 1924 to the United States.

HOWICK, LORD. See CHARLES GREY.

HUGH CAPET (*hū kā'pĕt*) (c. 938–996). King of France and founder of the race of sovereigns which has given over a hundred rulers to Europe. His kingdom grew from some fiefs around Paris ruled by his father, to which he added the kingdom of Louis V, through the power of Adalberon, bishop of Laon, who took prisoner the other rival, Charles, duke of Lower Lorraine. When Arnulf, appointed by him bishop of Reims, proved a traitor to Hugh, he had the French bishops elect a successor, but the latter was excommunicated by the Pope. Yet Hugh was a church man, friend of many bishops, and delighted in the services of the church.

HUGHES, CHARLES EVANS (1862–). American lawyer and statesman, born at Glens Falls, New York, educated at Colgate and Brown Universities and the Columbia University Law School, and taught law at Cornell and New York Law Schools. His public career began in 1905 in the investigation by the lighting commission of New York, and afterward in the special investigation of insurance companies, in which he attained wide fame. In 1906 he became governor of New York, being the only Republican elected on the ticket, and his term was characterized by legislative reforms, laws to protect working women and children, to provide a public service commission, and to forbid race-track gambling and betting. He resigned in 1910 to become associate justice of the United States Supreme Court, but withdrew in 1916 to become candidate for the presidency on the Republican ticket, having refused to be considered in 1912. He received 254 votes as to 277 for Woodrow Wilson. From 1917 to 1921 and after 1924 he engaged in practice of law in New York City. During President Harding's administration, 1921 to 1924, he acted with great distinction as secretary of state, his principal accomplishments being the naval limitation conference in Washington, refusal to recognize the Soviet regime, and a tentative principle for the settlement of war debts by Germany, resulting finally in the Dawes and Young plans. In 1924 he acted as chairman of a commission to reorganize the state government of New York, and recommended that about 175 bureaus should be reduced to 18, a plan effected by the Legislature. In 1926 he became a member of the Hague Court of Arbitration; in 1927 a special commissioner appointed by the Supreme Court to study the rights of Chicago in the diversion of water from Lake Michigan, reporting in favor of the city and against the protesting states bordering on the Great Lakes; in 1928 he was chairman of the Pan-American Conference at Havana; and in 1929 a judge of the Permanent Court of International Justice. Thus Hughes has a large hand in molding national and international legislation for many years. In February, 1930, Hughes was nominated by President Hoover to become chief justice of United States. Although considerable opposition developed in the Senate on the part of certain senators his nomination was confirmed by a wide majority.

HUGHES, SAM (1853–1921). Canadian soldier and politician, who was educated at the University of Toronto and taught English and history at a Toronto collegiate institute, afterwards owning and editing the Lindsay *Warder* (1885–1897). He served in the militia during the Fenian raids in 1870, in the South African campaign, rising to the rank of major general in the army in 1914. From 1911 to 1916 he was minister of militia, and as such he raised 350,000 men in Canada for the European service before he resigned, following disagreements with Premier Borden.

HUGHES, WILLIAM MORRIS (1864–). Statesman of Australia, premier from 1915 to 1922. Born in Wales, he went to Australia at the age of 20, engaged in prospecting, herding, teaching, and organizing laborers, till he entered parliament in 1894 for part of Sydney. In 1904 he became minister for external affairs under J. C. Watson; in 1908 he became attorney-general in the Fisher ministry, succeeding him as premier in 1915, when Fisher went to London, having offered Britain every resource and man for the World War. Hughes also became an ardent imperialist, visited England in 1916, after which against great opposition he advocated conscription for Australia. At the peace conference in 1918, he championed independent rights for Australia, including a mandate over Papua, and something in essence like a Pacific Monroe Doctrine. Difficulties arising after the World War led to the formation of a Liberal-Country coalition which forced him from office in 1923 in favor of S. M. Bruce.

HUMBERT I. (*hŭm'bĕrt*) (1844–1900). King of Italy was the son of Victor Emmanuel II. and of Archduchess Adelaide of Austria. His reign was comparatively peaceful, but several attempts were made on Humbert's life, the last of which by the anarchist Bresci was successful at Monza on July 29, 1900. For his charitable donations, notably during the floods of 1882, the earthquake of 1883, and the cholera epidemic of 1884, he gained the esteem of most of his subjects. He firmly stood by the constitution and asserted the independence of Italy of all foreign and ecclesiastical domination, though he favored both the Triple Alliance and a naval understanding with England.

HUNYADI (*hōōn'yŏd-ĭ*), **JANOS (JOHN).** See under DICTIONARY OF HISTORY.

HUSSEIN IBN ALI (1856–1931), first king of the Hedjaz, came of an ancient family and is recognized as the senior descendant of Mohammed. From 1890 to 1908 he was virtually a prisoner in Constantinople, where his four sons were educated in modern customs and ways. After the revolution in Turkey in 1918, Hussein became Grand Sheriff of Mecca. In this position he refused the suggestions that a holy war against Christians should be proclaimed. Then he took the side of the Allies and rendered valuable service in the campaign in Arabia and Mesopotamia. Being proclaimed King of Hedjaz, a new Arab state with Mecca as the capital, on October 29, 1919, Hussein was at once recognized by all the allied powers.

HUTCHINSON, THOMAS (1711–1780). The last royal governor of the Province of Massachusetts Bay (1771–1774). He was acting governor during the "Boston Massacre" (March 5, 1770). He was succeeded by General Gage, who was military governor.

HUYSMANS (*ŭs-man'*), **CAMILLE** (1871–). Belgian statesman, professor at the Liberal College of

Ypres and later at the New College of Brussels. In 1910 he entered the Chamber of Deputies, from 1905 to 1922 he acted as secretary of the Socialist International Bureau, and in 1917 attempted to organize the party conference of the socialists at Stockholm. In June 1925 he began a term as minister of science and arts. Besides works on socialism, he wrote several literary and dramatic compositions.

HYMANS (*ē'män*), **PAUL** (1865–). Belgian statesman, who was born in Brussels, became a lawyer and professor of comparative history of parliaments in the University of Brussels, deputy and liberal leader. He went on a mission to the United States in 1914, then was a representative at London, and from 1918 to 1920, 1924–25, and from 1927 minister of foreign affairs of Belgium. He represented his nation in many of the important international conferences, and in 1920 was the first president of the Assembly of the League of Nations.

IBRAHIM (*ĭb-rā-hēm'*), **PASHA** (1789–1848). Viceroy and general of Egypt; born at Cavalla, Roumelia. In 1810 he crushed a rebellion of the Arabs in upper Egypt, and in Arabia suppressed the Wahabis. In the Greek war of independence he supported the Turks; took Navarino, Tripolitza, and, after a memorable defense, Missolonghi (1826). In 1831 he invaded Syria, soon making himself master of the whole of that country; but he was eventually compelled by the powers to relinquish his claim on the conquered territory. In 1848 he was made viceroy of Egypt.

IGNATIEV (*ĭg-nä'tyĕf*), **NICHOLAS PAVLOVICH** (1832–1908). Russian diplomatist who negotiated a treaty after a difficult mission to Bokhara, another to Peking in 1860, by which he secured large territorial concessions for Russia, and acted as Russian ambassador at Constantinople from 1864 to 1877. He sought to free from Turkish influence the nations in southeastern Europe, but the Russo-Turkish war intervened, though he negotiated the peace of San Stefano afterwards. From 1881 for a year he acted as minister of the interior under Alexander III.

IL KAMON NO KAMI (*ēl kāy'mŏn nō kä-mē*) (1815–1861). A Japanese statesman who was largely instrumental in throwing Japan open to foreign trade and intercourse. He assisted Commodore Perry in 1853 in his diplomatic errand and forced the signing of the treaty with the United States. He was assassinated and his memory was execrated for some years among his own people.

INGALLS, JOHN JAMES (1833–1900). An American statesman; born in Middleton, Mass. Removed to Kansas (1858); member of the state senate (1862); United States senator (1873–1891); president pro tempore of the Senate (1887–1891); defeated by the Democratic-Populist forces. A fluent speaker, brilliant at repartee, and an excellent parliamentarian.

ISAAC I. (COMMENUS) (?–1061). First of the Commeni emperors of Byzantium, who with the nobles deposed Michael VI. in 1057, ruled but two years, and spent two before his death in the monastery of Studion. He revoked many old pensions, repaired the broken fortunes of the empire, took part of the revenues of wealthy monasteries, and sought to restore strict order in the government. His *Scholia* or commentary on the *Iliad* is still extant in manuscript.

ISABELLA I., THE CATHOLIC (1451–1504). Queen of Castile and León; born at Madrigal; succeeded to the throne on the death of Henry IV., in 1474. The war with Portugal ended in her favor (1479); the conquest of Granada was successfully completed; and the Inquisition carried on with fanatical earnestness. The queen is best remembered for her acquiescence in the plans of Columbus.

ISABELLA II. (1830–1904). Queen of Spain (1833–1868). Daughter of Ferdinand VII. The Salic Law was set aside to permit her to succeed her father. Her mother, Maria Christina, was regent. Don Carlos, her uncle, should have succeeded Ferdinand, and a rebellion in his favor raged with violence in 1840. In consequence of a rebellion in 1868, Isabella fled to France and, in 1870, she abdicated in favor of her son, Alfonso XII. He came to the throne in 1875, after the brief reign of Amadeus of Savoy and the failure of the republic under Castelar.

ISABELLE OF FRANCE (1292–1358). Queen of England, wife of Edward II., whom her adherents deposed, and with whose assassination she is charged. Her son, Edward III., ordered her arrest, put her lover, Mortimer, to death in 1330, and imprisoned her for the rest of her life.

ISMAIL PASHA (*ĭs-mä-ēl pä-shä'*) (1830–1895). Viceroy (1863) and khedive (1867) of Egypt. During the American Civil War he amassed great wealth in cotton. He encouraged the building of the Suez Canal. While his schemes for the aggrandizement of Egypt were ambitious, his extravagance plunged the country into such financial distress that France and England interfered (1879) and the sultan deposed Ismail Pasha and Prince Mohammed Tewfik was proclaimed khedive. Ismail received an annual pension of £50,000 and left the country.

ITAGAKI (*ē-tä-gä'kē*) (1838–1919). Japanese statesman known as the "Rousseau of Japan." An ardent advocate of government for his country based upon those of the United States and England; held many Cabinet offices. He opposed the government of Ito based upon that of Germany. A Christian and a church officer. In 1881 he formed the first real political party in Japan, secured the promise of the emperor that constitutional government should begin in 1891, held the office of minister of home affairs in 1898, and retired in 1900.

ITO, HIROBUMI (1840–1909). A Japanese statesman. Studied the coinage of the United States and obtained the adoption of the decimal system in Japan and the establishment of a mint at Osaka (1871). As minister of public works, he had the first railroad of Japan built from Yokohama to Tokyo (1872). He secured the adoption of foreign dress. In 1889 the constitution prepared by him was adopted. As premier (1892–1895) he carried the nation through the Chino-Japanese War; recalled to the premiership in 1898 he directed the Japanese against the Boxer uprising in China. He was active during the Russo-Japanese War. Called the "Bismarck of Japan" and the "Father of the Constitution." Assassinated.

IVAN III., THE GREAT (1440–1505). King of Russia and the founder of the present monarchy. He was the son and successor of Vasili the Blind, and came to the throne in 1462. His achievements were: the consolidation of the Russian Empire; the expulsion of the Tatars; the union with the Byzantine Empire by his marriage with Sophia Palaeologus, niece of the last emperor. In 1481 he defeated the Tatars and began the release from the chain which had bound Russia for two centuries and a half. He opened diplomatic relations with other European countries by the exchange of envoys. He was succeeded by his son, Vasili or Basil.

IVAN IV., THE TERRIBLE (1530–1584). Czar of Russia; was king after 1533, but did not really begin to rule until 1543. He began his reign with many notable improvements, and in the course of about 10 years completely destroyed the Tatar power. The imprisonment of the councilors, Silvester and Adatcheff, led to an uprising in favor of these men. It was 1572 before the country was restored to order, and during this time the punishments inflicted by Ivan justly won him the sobriquet, "The Terrible." In 1582 Ivan was defeated by the Poles, lost Polotsk and his conquests on the Baltic, and completed the conquest of Siberia. His acts of cruelty are unsurpassed in history, though they were often committed during fits of passion, which he afterwards regretted.

JACKSON, ANDREW (1767–1845). Seventh president of the United States, the son of immigrants from Ireland, was born near the North Carolina-Tennessee border (probably on the Carolina side), in a log cabin. At 13 with his brother he took part in operations against the British and he was captured. In 1784 he became a lawyer at Martinsville, N. C., in 1788 prosecuting attorney for the western part of the state, assisted in forming the constitution of Tennessee in 1796, and a part of the year served in the national House, where he became a violent opponent of Washington, and again for a brief time as senator in 1797. He was a judge of the supreme court of Tennessee (1798–1804), defended Burr as a friend after the fatal duel with Hamilton in 1807, defeated the Creek Indians in 1813, and the next year became a major general in the war against the British, defeating them at New Orleans in 1815, as he also did the Seminoles of Florida three years later. He acted in turn as governor of Florida Territory, as U. S. Senator for Tennessee (1823–25), and won 99 electoral votes, the largest number, for president in 1825. J. Q. Adams, however, was chosen by the states in a new combination. Jackson was elected in 1827 and again in 1832. Though his quarrelsome and untactful disposition made him many enemies, and caused several duels, he went out of office much more popular than he had entered public life years before.

JAMES I. OF ENGLAND AND VI. OF SCOTLAND (1566–1625). Son of Mary Queen of Scots, and Darnley; born in Edinburgh Castle. During his minority Moray and Morton were the chief regents. He ruled alone after 1581. In 1603 James succeeded to the crown of England and Ireland. His wish to rule absolutely, and to tolerate the Roman Catholics, soon brought him in opposition to the House of Commons. In 1619 James's son-in-law was made king of Bohemia as Frederick V. In the Thirty Years' War which followed, James refused to aid Frederick and the Protestants on the continent. Hoping now to restore Frederick to the palatinate by diplomatic means, he made every effort to bring about a marriage between the Infanta of Spain and Prince Charles. In this he failed, the outcome of his efforts being war with Spain. James was intolerant, superstitious, believed in the divine right of kings, and could not see the essential weakness of Spain and of his own efforts as a diplomatist. Yet he had a sincere wish to take a middle ground in state and church. He wrote numerous works, some of at least average quality as literature. His *Daemonologie* denounces witchcraft and calls on the civil powers to suppress it, and his *Basilikon Doron* is strongly Protestant. Some wag called him "the wisest fool in Christendom," a verdict in which many of James's own contemporaries would join.

JAMES II. (1633–1701). King of England (1685–1688). Son of Charles I. He was duke of York and Albany, and succeeded his brother, Charles II. Suppressed the rebellion raised by the duke of Monmouth, James's son, and caused his execution. The Bloody Assizes, presided over by the infamous judge, Jeffreys, followed, in which 320 persons were hanged. The Declaration of Indulgence, allowing freedom of worship, was issued in 1687, and was followed by a second in 1688. The clergy disobeyed the command to read the second in churches, and seven bishops entered a protest. James committed them to the Tower, but the court acquitted them. William, prince of Orange, was sent for by leading men to come and take the throne, which he did. James fled after the Battle of the Boyne (1690) and lived in France.

JAMES STUART, THE OLD PRETENDER (1688–1766). He was the son of James II, with whom he lived at the court of St. Germain in France. On the death of his father, he was proclaimed James III. by Louis XIV. of France, but a like ceremony in London met with jeers and violence. In 1702 William signed a bill of attainder against James, and by this Anne, the latter's half-sister, became queen of England. In 1715 a rebellion in his favor in the Scotch Highlands ended disastrously at the battles of Sheriffmuir and Preston, and, after going south as far as Scone, he departed for France. Later in life he lived with his wife Marie Clementina of Poland, in some splendor at Rome, under the patronage of Pope Clement XI, who acknowledged them king and queen of England. His son, Charles, claiming the English throne also, was beaten at the battle of Culloden (1746), and so the active efforts of the Stuarts to reclaim the throne ended.

JEFFERSON, THOMAS (1743–1826). Third president of the United States and founder of what is now called the Democratic Party, was born at Shadwell, Virginia. His mother's family, the Randolphs, belonged to the aristocracy of the state, but the Jeffersons lived in frontier style of democracy. Jefferson studied at William and Mary College and later became a good scholar, a tireless reader, mathematician, violinist, and author of works on government. His personal life and his marriage were most fortunate and happy. He was admitted to the bar in 1767, but left practice to lead the life of a gentleman planter and office holder. He sat in the Virginia house (1769–75), deliberated in many committees and public bodies, helped frame and sign the Declaration of Independence, though he never made a real speech in his life. From 1779 to 1781, he was in Congress, was minister to France from 1785 to 1789, secretary of state for Washington from 1790 to 1793, when he retired to his estate at Monticello, Va. In 1796 he and Adams ran for the presidency, and according to custom, Adams was declared elected on securing the higher number of votes, and so Jefferson became vice-president. He was elected, however, in 1800 and again in 1804, retiring to his estate in 1809, where he died on July 4, 1826, on the day when Adams also died. Jefferson favored a liberal mode of government, states rights, the gradual emancipation of slaves by their masters, and the expansion of the public domain, to promote which he purchased the Louisiana Territory in 1803.

JIMMU TENNO (*jĕm'mŭ tĕn'nō*). The first ruler of Japan; said to have held the throne from 660 to 581 B. C. He is the reputed founder of the present line of rulers. The Japanese reckon from the era of Jimmu, who is said to have lived 137 years.

JOHN, surnamed **LACKLAND** (1167–1216). English king (1199–1216). Hated by the nobles, they and France supported Arthur, his nephew, as rightful heir to the throne. War ensued, England losing Normandy, Touraine, Maine, Anjou, and Poitou. Deposed by the pope (1212); submitted to the pope (1213); defeated at Bouvines (1214); forced by barons to sign the Magna Charta (1215).

JOHN II., THE GOOD (1319–1364). King of France (1350–1364); defeated at Poitiers, captured and taken to London; released under Treaty of Bretigny (1360). When his son, the duke of Anjou, broke his parole, and left England, John voluntarily surrendered; died in London (1364).

JOHN III. or **JOHN SOBIESKI** (1624?–1696). King of Poland; was youngest son of James Sobieski, governor of Cracow. In 1665 he was made grand marshal and general of the Polish armies. He retook several cities from the rebellious Cossacks. In 1673 he gained the memorable battle of Khotin, near the Dniester, in which the Turks lost 28,000 men. On the death of Michael in the same year he was elected king of Poland, and shortly afterward compelled the Turks to sue for peace. He died in Warsaw.

JOHNSON, ANDREW (1808–1875). Seventeenth president of the United States, was a man of little education, who had started life in Raleigh, N. C., and afterward at Greeneville, Tennessee, under great handicap. He became a tailor and finally learned to read and write. From 1834 to 1843 he served in the state house and senate, and in the Federal house from 1843 to 1853, after which he was governor of Tennessee till 1857, and then U. S. senator till 1862. Refusing to leave the senate on the outbreak of the Civil War, as other southern members did, Johnson was appointed military governor of Tennessee, and he did much to hold the sentiment against disunion in his state. Though Johnson had continued to rank himself as a Democrat, he was nominated with Lincoln in 1864, and became vice-president, succeeding when Lincoln was assassinated in April, 1865. Johnson's term accomplished much reconstruction, but it was a long battle with the two houses of Congress, culminating in impeachment, but Johnson escaped being removed from office since the vote lacked one of the necessary two-thirds of the senate. After March 4, 1869, he lived in Tennessee until elected U. S. senator in 1875. He sat among many men who had voted to remove him from the presidency, but died before his efforts to regain his fame could be realized.

JOHNSON, HIRAM WARREN (1866–). Senior Senator from California, studied two years in the University of California before entering on the study of law. From 1888 to 1902 he practiced in Sacramento, removing to San Francisco and becoming a member of the staff of prosecuting attorneys in the graft cases. Assisted in securing the conviction of Abe Ruef and others after Francis J. Heney had been shot down in court. Governor of California from 1911 to 1917 and senator since then. Nominee of Progressives for Vice-President in 1912.

JOHNSON, RICHARD MENTOR (1781–1850). Seventh vice-president of the United States, born in Kentucky, became a lawyer, and entered Congress where he served in the House many years in three different periods and in the Senate from 1819 for ten years. He raised two regiments and served under General Harrison in the Canadian campaign; according to tradition, it was his bullet that killed the Indian chief Tecumseh, battle of the Thames in 1813. The Senate chose him vice-president among four candidates, none of which had a majority, and he served from 1837 to 1841. In the Democratic convention of 1840, no candidate was nominated to succeed him, and he obtained most of the Democratic votes, being defeated by the Whig rival, John Tyler.

JOHNSON, TOM LOFTIN (1854–1911). American capitalist, municipal reformer, and congressman was born in Kentucky, educated in Indiana, and acquired street railway holdings in Indianapolis, Cleveland, Detroit, and Brooklyn. From 1891 to 1895 he was in Congress, was mayor of Cleveland from 1901 to 1910, and advocated a three-cent fare on street railways, besides other municipal changes and reforms.

JOHNSTONE, HARRY HAMILTON (1858–1927). British explorer and administrator in Africa. He was

born in London, educated at King's College, and in 1879–81 visited the wilds of interior Tunisia, in 1882 went to Angola, and in 1883 visited Stanley and explored a tract in central Africa. Later he acted as vice-consul in the Cameroon, was consul in the Niger delta, where he laid the foundation for the British administration later, was consul in Portuguese Africa, and acted as commissioner in Uganda. He also terminated the Arab slave trade in the Nyasa region. Johnstone made scientific discoveries and took much interest in animal life.

JOLY DE LOTBINIERE (*jō'lē dē lŏt'bēn-yĕr*), **HENRI GUSTAVE** (1829–1908). Canadian politician, born in France, adopted the name of his mother in 1888. First elected to the house of the assembly of Canada in 1861, he served also from 1867 to 1874 in the House of Commons, Ottawa. Prime minister of Quebec 1878–79, and led the opposition after his defeat till 1883. He retired from public life in 1885 in protest because of the execution of Louis Riel for treason, but returned again in 1896, accepting later in the Laurier ministry the post of controller of inland revenue, and served from 1900 to 1906 as lieutenant governor of British Columbia.

JONES, ANSON (1798–1858). A president of the republic of Texas; born in Great Barrington, Mass. He settled as a physician in Texas in 1833; member of the second Texan Congress (1834); minister to the United States (1835); secretary of state with Houston (1841); elected president (1844); turned over the government to J. Pinckney Henderson, the first governor under the Constitution of the United States (1846).

JONES, SAMUEL MILTON (1846–1904). Known familiarly as "Golden Rule Jones," four times mayor of Toledo, Ohio, being elected thrice as an independent, and at first as a Republican. He was born in Wales, came to America in 1849, amassed a fortune in manufacturing, and as mayor defeated wrongdoing and championed the rights of the ordinary citizen. He asserted that Christianity could be applied to business and to government.

JONESCU (*yŏn'ĕs-kŭ*), **TAKE** (1858–1922). Rumanian statesman, who for a number of years was minister of education and finance in several cabinets. He organized the Conservative-Democratic party, and became minister of the interior in a cabinet of that group in 1912. During the World War he favored casting the lot of Rumania with the Allies, and in 1918 he went to Paris and did much to secure rights for his country. In 1920 he became foreign minister and helped create the Little Entente.

JOSEPH I. (1678–1711). Holy Roman emperor (1705–1711); born at Vienna; became king of Hungary (1687) and king of the Romans (1690). With the aid of Holland, Savoy, and England, a successful war was carried on against Louis XIV. The duke of Marlborough and Prince Eugène led the allied forces.

JOSEPH II. (1741–1790). Holy Roman emperor (1765–1790). In 1772 he signed, together with the sovereigns of Prussia and Russia, a treaty by which Poland was divided among them, and in 1780, at his mother's death, inherited the Austrian throne. Established religious toleration; abolished feudal serfdom.

JOSEPHINE (1763–1814). French empress; married the Vicomte de Beauharnais, who was executed during the Reign of Terror (1794). Two years later she married Napoleon I., but the union was dissolved (1809) that Napoleon might marry Maria Louisa of Austria, a step taken to further the emperor's political ambitions.

JOUBERT (*you'bĕrt*), **PETRUS JACOBUS** (1834–1900). General and statesman of South Africa, born in Cape Colony, but went to Transvaal, being elected to the assembly and in 1870 attorney-general of the republic, and in 1875 acting president. He fought against annexation to Great Britain twice, in 1880 and in 1898. Three times he was a candidate for the presidency of the Transvaal, representing the progressive Boers. He was a cautious, but beloved statesman.

JUAREZ (*hwä'räs*), **BENITO PABLO** (1806–1872). President of Mexico; born in Oajaca; was governor of the state of Oajaca (1847–1852); secretary of the interior and chief justice (1857); president (1858). A civil war, which completely exhausted the treasury, at once broke out. In 1861 the president's suspension of payment of public debts led to an expedition against Mexico in which England, France, and Spain took part. The result was that Maximilian, of Austria, became emperor of Mexico. Maximilian was shot (1867); Juarez then regained and held the presidency until his death.

JUGURTHA (*ju-gûr'thȧ*) (? –104 B. C.). King of Numidia, influenced by Scipio and other Romans, but he usurped the rights of some of his relatives, including two cousins, who were to share in the rule, according to the will of Jugurtha's father. The Roman senate declared war on him in 111 B. C., but he escaped by stratagems until he fell into ambush in 104, was brought to Rome to grace the triumph of Marius, and died in a subterranean prison. Sallust, the Roman historian, himself afterward governor of Numidia, gives a full account of Jugurtha and his varied exploits.

JULIAN (*jōōl'yăn*) (c. 331–363). Commonly called Julian the Apostate because he forsook Christianity and compelled the Christians of Constantinople to help restore the heathen temples. He claimed to be a neoplatonist, but was mild in his dealings with other faiths. He won victories over the Germans in Gaul, and the troops of the Romans revolted from Constantius in his favor. Julian made a triumphal entry into Constantinople as emperor in 361. Two years later he was killed on an expedition against the Persians.

JUSSERAND (*zhŭ-o-răn'*), **JEAN JULES** (1855–1932). French diplomatist and author. He became consul at London in 1878, served in Tunis, returned to England in 1887, in 1890 went as ambassador to Switzerland, and from 1902 to his retirement in 1925, served with great distinction as ambassador to the United States. For some years he was the eldest in point of service of all foreign ministers at Washington. For his literary work, see the BIOGRAPHICAL DICTIONARY OF AUTHORS.

JUSTINIAN I. (FLAVIUS ANICIUS JUSTINIANUS (483–565). Emperor of the Byzantine or Eastern Roman Empire (527–565). Justin I., his uncle, took him to Constantinople and educated him and rapidly advanced him until in 527 he made him colleague as emperor. A few months after, Justin I. died and Justinian occupied the throne alone. His reign was the most brilliant in the history of the Byzantine Empire. Belisarius and Narses, as the generals, did much to make it so. He conquered the Vandals in Africa; drove the Goths out of Italy; withstood the Persians; and survived the attacks of the Huns on the north. He built extensively, especially the church of St. Sophia, and made a great name through the compilation of laws known as the Code of Justinian and these were published under the name of the Pandects in 534. These were followed by the Institutes of Justinian.

KALAKAUA (*kä-lä-kow'ä*), **DAVID** (1836–1891). Seventh king of the Hawaiians. He received an English training in Honolulu, visited California, and, on the death of King Kalagaua, was elected the successor by the legislative assembly. Followers of Emma, widow of a former king, tried to nullify the election, but English and American ships quelled the riot which ensued. Kalakaua granted a more liberal constitution in 1887.

KALININ (*kȧl-è-nĕn'*), **MICHAEL IVANOVITCH** (1875–). Russian workman, who was several times arrested for his liberal views, sent to Siberia, forbidden to stay in St. Petersburg, and remained in hiding from 1913 to the revolution of 1917. Later he became the peasant representative in the Soviet régime, was elected a member of the central committee, and in 1919 was chosen president of the central executive committee.

KALLIO, KJOSTI (1873–). Statesman of Finland; member of the Diet in 1904 and of the Senate in 1917, minister of agriculture, 1919–22, prime minister, 1922–24. In 1925 he organized a coalition government, moderate in plan, but this gave way late in 1926 to a socialist cabinet.

KALNOKY (*käl'nō-kē*), **GUSTAV SIEGMUND, COUNT** (1832–1898). Statesman of Austria-Hungary, noted for his skill in diplomacy. He was for years in the army, rising to the rank of general in 1879, acted from 1860 for ten years as secretary of the embassy at London, then in Rome and Copenhagen, and finally as ambassador to St. Petersburg, now Leningrad. From 1881 to 1895 he was minister of foreign affairs in Austria-Hungary. He did much to promote an alliance with Germany and Italy, also keeping the balance of power in the Balkan states.

KAMENEV (*käm'ĕ-nĕf*), **LEO BORISOVICH (ROSENFELD)** (1883–1936). Russian leader of the

Soviet régime, for years acted as lecturer and organizer, was banished, and lived from 1908 to 1914 in Paris. He became a follower of Lenin, a representative of the Bolshevik party, but later disagreed with Lenin in the matter of policy. When Lenin died in 1924, he was elected chairman of the council of labor and defense, opposed the plan of Trotsky, but later changed his opinions, and from late in December 1927 to June 1928 was shut out of the communist party.

KAMIMURA (*kä-mē-mōō'rä*), **HIKONOJO, BARON** (1849–1919). A Japanese admiral, born in Satsuma, was active in the Chino-Japanese war in 1894–5, when he commanded the second squadron, and ten years later defeated the Russian squadron and sank the battleship *Rurik* off Korea.

KAROLYI (*kä'rōl-yē*), **MICHAEL, COUNT** (1875–1934). Hungarian leader, at first interested in the agrarian movement, later formed a more radical connection under the influence of Karl Marx, seeking to break the connection between Austria and Hungary and destroy the capitalistic holdings in his country. On Nov. 16, 1918, he became premier and in 1919 president of the People's Republic, but nearly three months later he had to give way to the party of Bela Kun. Later his estates were declared forfeited, and he was forced to remain out of Hungary.

KATO (*kä'tō*), **TAKA-AKIRA** (1859–1926). A gifted Japanese statesman, representative at London, 1894 to 1899, and 1908 to 1913. He served in the brief Ito Cabinet (1900–1901), and again as foreign minister under Saionji in 1906 for a time, but resigned because he opposed the cabinet measure of nationalization of railways. In 1913 he served briefly in Katsura's cabinet and then organized a constitutionalist party, from which he made up all the cabinet positions as premier in 1925. He had served as foreign minister in the Okuma cabinet (1914–15), and as premier of the coalition cabinet in 1924, during which time complete manhood suffrage was voted for Japan. He died in office.

KATSURA (*kä'tsŏŏ-rä*), **TARO, PRINCE** (1847–1913). Japanese soldier and statesman, who twice was sent by his country to Germany to study military tactics, made a remarkable record as a general in the war with China in 1894–95, and acted as secretary of war from 1898 to 1901. He was three times premier, at first from 1901 to 1905, four and a half years, a long term for Japan. Katsura concluded treaties with England and held the peculiar doctrine that he was responsible to the emperor only, and in no sense to the legislative assembly, and still, by his power to conciliate, he was able to hold office.

KELLOGG, FRANK BILLINGS (1856–1937). American lawyer and statesman, was born in New York, emigrated to Minnesota, and became an attorney. He represented the United States in suits against the Standard Oil Company, the so-called Paper Trust, and the attempts to unite the Union and Southern Pacific railways. He was senator from Minnesota, 1917–23, ambassador to England, 1924–25, and secretary of state in the cabinet of Coolidge until 1929. He was active in peace negotiations, and most especially in the multilateral treaty renouncing war, called the Kellogg Treaty. His policy was firm, but conciliatory.

KEMAL PASHA. See MUSTAPHA KEMAL.

KING, RUFUS (1755–1827). American politician; born at Scarborough, Me.; was graduated at Harvard (1777); was member of the Confederation Congress (1784–1787), of the Constitutional Convention (1787), and of the United States Senate from New York (1789–1796, 1813–1825) as a Federalist; served as minister to Great Britain (1796–1803, 1825–1826); was a candidate for the vice-presidency (1804 and 1808), and for the presidency (1816).

KING, WILLIAM LYON MACKENZIE (1874–). Canadian statesman, who was graduated from Toronto, held political science fellowships at Chicago and Harvard, from which latter he received the Ph. D. He served as conciliator in labor disputes, served as deputy minister of labor in Canada, and finally as minister in 1909, and for the Rockefeller Foundation investigated industrial relations from 1914 to 1917, during which time he wrote *Industry and Humanity*. In 1919 he succeeded Sir Wilfrid Laurier as Liberal leader, and from 1921 to 1926 acted as premier, and again after a few months in September of the latter year. In 1928 he signed the Kellogg Treaty at Paris for Canada.

KING, WILLIAM RUFUS (1786–1853). American statesman; born in Sampson County, N. C.; was a member of the North Carolina House of Commons (1808–1809) and Democratic representative in Congress (1811–1816); removed to Alabama (1818); was United States senator from that state (1819–1844); minister to France (1844–1846); again senator (1846–1853); elected vice-president on the ticket with Pierce (1852).

KITCHENER, H. H. See DICTIONARY OF HISTORY.

KOO, VI KUYIN WELLINGTON (1887–). Chinese statesman, was educated in China and at Columbia University, New York. In 1915 he became Chinese minister at Washington, being transferred to Great Britain in 1921. He represented his nation at the Peace Conference, at the first assembly of the League of Nations, and the Washington Conference in 1921–22. From 1922 to 1924 he served as foreign minister of China and as finance minister from 1926.

KOSSUTH (*kŏsh'ŏŏt*), **LOUIS** (1802–1894). Hungarian patriot and statesman; born in Monok, County Zemplin; entered the Diet (1874); became minister of finance (1848) and virtual dictator during the insurrection of 1848–1849; took refuge in Turkey, but visited the United States (1851–1852), where, although enthusiastically received, he failed to accomplish his purpose—to induce the American republic to aid his countrymen. After his American tour he lived for eight years in England, and in 1859 he went to Italy to organize an Hungarian legion for the war in the Crimea, but the end of hostilities frustrated this plan. From that time he lived in Italy, unreconciled to the régime in his native Hungary, and refusing to take advantage of a political amnesty. He died in Turin, but was interred at Pest with great solemnity.

KRUGER (*krōō'ger*), **STEPHANUS JOHANNES PAULUS** (1825–1904). A Boer statesman familiarly known as "Oom Paul"; born near Colesberg, Cape Colony. Took part in several military excursions, and in 1883 was made president of the Transvaal. He was reëlected in 1888, 1893, and 1898. In the Jameson raid (1895), the leader and his associates were captured and eventually given over to Great Britain for trial. This angered the radical Boer element, and the embittered relationship between the Boers and the British soon afterward led to the Boer War (1899). The Transvaal, which had been put into splendid defensive shape in anticipation of such a struggle, stood out longer than it otherwise could have done. With the fall of Pretoria, Kruger left for Europe, finally taking up his residence in Holland.

KUN, BELA (1886–). Hungarian leader, imprisoned in Russia early in the World War, became an enthusiastic communist of extreme stripe, returned to Hungary, and unsuccessfully tried to force the nationalization of all industry and property on his countrymen. Later he spent much of his time in Russia, but in 1928, on a return to Vienna, he was arrested and served several months in prison.

KWANGSU (*kwäng'sū*) (1872–1908). Emperor of China (1875–1908). Son of Prince Chun. Kwangsu was placed upon the throne by his aunt (1875), who forced his marriage with her niece to strengthen her power; he had little active part in actual government, virtually made prisoner in his palace (1898).

LABOUCHERE (*lăb-ōō-shâr'*), **HENRY DUPRE** (1831–1912). English politician and journalist; born in London. Was in diplomatic service (1854–1864), part of which time he served in the United States at Washington. In Parliament for Windsor (1865–1866), and for Middlesex (1867–1868). Labouchere was an advocate of the Irish Home Rule policy, and sympathized with the Boers during the war in the Transvaal. He established the London *Truth* (1876). He favored abolishing the House of Lords. For the last ten years of his life he resided mainly in Italy.

LADISLAUS I. (*lad'is-lōs*), **SAINT** (1040–1095). King of Hungary who enlarged the frontier, founded several cities, supported the pope against Henry IV., is said to have refused the crown of Germany, and secured Croatia for Hungary. He firmly established the Catholic faith, rooted up heathenism, and died suddenly while preparing for the first crusade. No other early Hungarian king was so greatly beloved, and he was long regarded as a saint before his actual canonization.

LAFAYETTE (*lä-fā-yĕt'*), **MARQUIS DE.** See DICTIONARY OF HISTORY.

LA FOLLETTE, (*lah fol'et*), **ROBERT MARION** (1855–1925). An American politician, born in Wisconsin, graduated from the University of Wisconsin, and practiced law in Madison. During his term in Congress (1885–91), he helped draft the McKinley tariff bill, and during his governorship of Wisconsin (1901–05), he secured much reform legislation in regard to taxation and nomination of candidates for office by direct vote of the people. After 1905 he was a member of the senate. Running as a Progressive in 1924 against Coolidge and Davis, he received 34 electoral votes. He was succeeded by his son, R. M. La Follette, Jr.

LAFONTAINE (*lă'fôn-tăn*), **LOUIS HIPPOLYTE** (1807–1864). Canadian statesman, judge, and baronet. He was educated at the College of Montreal under the Sulpicians, became a lawyer, and represented Terrebonne in the Assembly from 1830 to 1837. Lafontaine supported Louis Papineau in principle, but not in rebellion. In 1841 he led the French Canadian Reformers; in 1842–43 and 1848–51, he was attorney-general in the cabinet of Robert Baldwin, after which he retired to private life. From 1853 to his death he presided as chief justice of Lower Canada, during which time the land tenure question was finally adjudicated.

LANDON, ALFRED M. (1887–). Born at West Middlesex, Pa., graduated in law from Kansas University, in 1908. He followed in the footsteps of his father as an independent oil operator, and served in the chemical service in the World War. His first wife died in 1918, leaving one daughter, Peggy Ann. There are two children by his second wife, Theo Cobb. In 1932 he was elected governor of Kansas, and became the only Republican governor to be re-elected in the Democratic landslide of 1934. He put Kansas local units on a cash basis, reduced cost of government from 67.25 in 1932 to 51.32 per capita by 1934 and bonded debts of cities and counties by over 17,000,000. His sensible and economical administration won him the Republican presidential nomination in 1936.

LANSDOWNE (*lanz'down*), **HENRY CHARLES KEITH PETTY-FITZMAURICE, MARQUIS OF** (1845–1927). An English statesman and governor general of Canada (1883–1888). During his rule the Canadian Pacific railway was completed, fisheries dispute settled, and Riel's rebellion suppressed. From Canada he went to India as viceroy and governor general (1888–1893); secretary of war in Salisbury's Cabinet (1895); secretary of state for foreign affairs (1900–1906), during which time the treaty with Japan was signed. In 1903 he became Unionist leader in the House of Lords, in 1915 a member of the Asquith coalition cabinet without portfolio, and in 1917 published a letter asking on what terms the Allies would make an early peace.

LANSING, ROBERT (1864–1928). Secretary of State in the cabinet of President Wilson from June, 1914, to Feb. 13, 1920, when he was compelled to withdraw because of difference with the president. He was educated at Amherst, became a lawyer, representing the United States in the Bering Sea dispute with England over seal fisheries, the Chinese government in important negotiations, and Chili in the Tacna-Arica dispute in 1923–24. During the peace negotiations at Paris in 1918, as one of the American delegation, he wielded a considerable influence. After his retirement from public life, he wrote *The Peace Negotiations*, 1921, *The Big Four and Others at the Peace Conference*, 1921, *Notes on Sovereignty*, 1921.

LAURENS, HENRY (1724–1792). American statesman; born in South Carolina. Was sent on a mission to The Hague (1779), and while en route was captured by the English and kept a prisoner in the Tower of London for 15 months. Concluded with Adams, Jay, and Franklin the preliminary treaty at Paris (1782).

LAURIER (*lō'ri-ā'*), **THE RIGHT HON. SIR WILFRID** (1841–1919). Canadian statesman; born at St. Lin, Quebec. He studied law at McGill University, taking B.C.L. in 1864, and was that year called to the bar; made queen's counsel (1880); member of Royal Commission revising code of civil procedure of province of Quebec; entered the Quebec Legislature (1871), and the Dominion House of Commons (1874); was a member of the Mackenzie ministry in 1877, and in 1891, on the retirement of Blake, he became leader of the Liberal party. Laurier became prime minister (1896), and his government was sustained in 1900, in 1904, and again in 1908; defeated in 1912. He is the first man of French blood to be prime minister. Under Laurier Canada took on national characteristics, but he insisted that the British Empire is "a galaxy of free states."

LAW, ANDREW BONAR (1858–1923). English statesman; born in New Brunswick; an iron merchant of Glasgow, Scotland; parliamentary secretary of board of trade (1902–1906); Unionist member of Parliament from Blackfriars division of Glasgow (1900–1906); member from Dulwich (1906–1910); leader of the Unionist in the Commons (1912–1923), succeeding Balfour. For 209 days (1922–May 20, 1923) he was prime minister, until his health broke down and he was forced to resign.

LAWRENCE, ABBOTT (1792–1855). American merchant and diplomatist, born in Groton, Mass., and gave his name to Lawrence where he had business interests. He sat in Congress from 1835 to 1837 and 1839 to 1840; helped settle with Lord Ashburton of England the north-eastern boundary of the United States, and was minister to Great Britain from 1849 to 1852. He disapproved the course taken by President Tyler, proposed Clay for the presidency, and drew the hostility of Webster in the famous Faneuil Hall address in Boston. He gave $100,000 to found a scientific school at Harvard.

LEE, RICHARD HENRY (1732–1794). Born of a distinguished Virginia family, he was educated in England, returned in 1752, sat in the Virginia House, where he opposed slavery and the encroachments of England. As a delegate to the First Continental Congress, he introduced a resolution, similar in essence and passed two days before the Declaration of Independence. He was a member of the House, 1774–1780, and 1784–1787, and one of the first Senators from his native state. He proposed the Tenth Amendment to the Constitution in virtually its present form.

LENIN (*lyĕ'mĕn*), **NICOLAI (VLADIMIR ILYICH ULYANOV)** (1870–1924). Leader of communists and first ruler of Russia under the Soviet government. He studied law at Kazan University and finally in 1891 became a lawyer at Samara and in 1894 at St. Petersburg. Meanwhile, he had become an ardent Marxian socialist, wrote considerable, and gradually developed a power among the workers, leading after 1903 the radical wing or Bolsheviki. From 1907 to 1917 he lived outside Russia, always studying and preaching his doctrines. When the Revolution of early 1917 broke out, he started to return from Switzerland, but had to travel through Germany, since England opposed any other route. From April till the middle of 1922 he held the chief power in Russia. Paralysis gradually gained on him from then till his death on Jan. 21, 1924. In his honor Petrograd (formerly St. Petersburg, the Germanic form of the name) was changed to Leningrad in 1924, *gorod* being the Russian name for town.

LEONIDAS (*lē-ŏn'ĭ-dăs*) (fl. 500–480 B. C.). King of Sparta, succeeded his half-brother about 488. Sent with about 7,000 men to hold the pass of Thermopylae against the Persians under the great Xerxes in 480, he took his stand in a narrow defile with 300 of his own and about 1,000 other troops. A traitor betrayed the entrance to the Persians, and Leonidas and all his Spartans fell defending the pass. They have been celebrated in song and story for heroism these 2,500 years since their brave stand.

LEOPOLD II. (1835–1909). King of the Belgians (1865–1909). He brought about the organization of the African International Association (1876), and paid out of his own resources a large portion of the expenses for Stanley's exploration of the Congo. In 1885 the Berlin Conference gave him the sovereignty of the Congo Free State. Leopold was very wealthy, and one of Europe's most energetic business men.

LEWIS, CAPT. MERIWEATHER (1774–1809), secretary to Pres. Jefferson, was appointed to lead the Northwest expedition from May, 1804, to Nov., 1806. Later granted 1500 acres of land and was governor of Louisiana. Journals of the Lewis and Clark Expedition were published in 1903–05.

LI HUNG CHANG (*lē' hoong' chäng'*) (1823–1901). Chinese statesman; born in Lu-chow, Nganhwei. He was a friend to Western civilization and culture. With the help of Gordon he put down the Taiping rebellion (1864). He became governor of the Kiang provinces (1864), and from 1870 to 1895 was viceroy of the province of Chi-li. The foreign policy of China during this period was under Li's control. He reorganized the army, was obliged to bear the

burden of defeat in the war with Japan, and afterward negotiated the treaty of peace. In 1896 he began a tour of the world, was everywhere enthusiastically received, and on his return was soon reinstated in his former government position.

LILIUOKALANI (*lē'lē-ō-ō-ka-la'nē*) (1838–1917). Queen of the Hawaiian Islands. She succeeded to the throne in 1891. Her husband, John O. Dominis, who was an American, influenced her in favor of American interests. But he died soon after she became queen, and Liliuokalani attempted to substitute a reactionary constitution for the liberal one of 1887. At this the white population revolted under Sanford B. Dole, established a provisional government, and applied for annexation to the United States. This was not brought about until 1898, and in the meantime Liliuokalani, who had been unsuccessful in pleading her cause in the United States, retired to Honolulu.

LINCOLN, ABRAHAM (1809–1865). Sixteenth president of the United States, came of a poor family that had emigrated from Virginia to Hardin County, Kentucky, where Abraham was born near Hodgenville in a log cabin, now enclosed in a magnificent marble structure. In 1816 the family moved to southern Indiana, near the modern Gentryville, where his mother Nancy Hanks died in 1818. Mr. Lincoln married a capable widow in 1819, who encouraged the son to complete his education, which was almost wholly self-acquired, save for a few months altogether in the country school. In 1830 they again moved to Macon County, Ill., from which point the following year he made a trip with produce to New Orleans on a flat boat down the Mississippi River. Then he enlisted for the Black Hawk war, but saw no active service; conducted a store, but his partner fled leaving Lincoln with debts which it took 17 years to pay. He studied law in 1832, became postmaster a year later, and won an election to the legislature, which had been denied earlier. Again elected in 1836 and admitted to the bar the next season, he established a reputation as a cautious and firm statesman, opposed to extension of slavery into new territory and to all acts of state nullification. From 1839 he lived in Springfield, Ill., where he practiced law until elected president in 1860. He declined election to the U. S. Congress after serving a term from 1846. The high light of his early career was the series of debates with Stephen A. Douglas, his Democratic opponent in the race for the U. S. senate in 1858–59. Though Douglas was elected, Lincoln had forced him to make admissions, which later prevented Douglas from becoming president. Lincoln served from March 4, 1861 to his death April 15, 1865, after being shot by an actor, John Wilkes Booth, at Ford's Theatre, Washington, on the previous evening. While evading capture, Booth was shot nine days later.

LINCOLN, ROBERT TODD (1843–1926). Lawyer, born at Springfield, Ill., son of Abraham Lincoln; graduated from Harvard (1864); served under Grant in Civil War; admitted to Illinois bar (1867); practiced at Chicago; delegate to Republican state convention (1880); presidential elector (1880); secretary of war (1881–1885); United States minister to Great Britain (1889–1893). From 1907 he was president of the Pullman Company.

LIVINGSTON, EDWARD. See under DICTIONARY OF JURISTS.

LIVINGSTON, ROBERT R. (1746–1813). American statesman; born in New York; was graduated at Columbia College (1765); became a member of the Continental Congress, and was member of the committee appointed to draw up the Declaration of Independence; was chancellor of New York from the time of the adoption of the Constitution until 1801, and was made secretary of foreign affairs in 1781. He used his influence to secure the ratification of the Federal Constitution in New York, and in 1801 was appointed minister to France.

LLOYD-GEORGE, DAVID (1863–). Rose from humble circumstances to be premier of England from 1916 to 1923. He was educated in a Welsh school, admitted to practice law in 1884, and was a member of Parliament after 1890, and president of the board of trade from 1905 to 1908. Mr. Lloyd-George helped secure the passage of an old age pension law, a workmen's insurance law, and advocated the minimum wage law which settled the great English strike of coal miners in 1912. He was chancellor of the exchequer from 1908 to 1915; minister of munitions 1916, and secretary of state for war, after the death of Kitchener in June, 1916. On the fall of the Asquith ministry, Lloyd-George formed a coalition cabinet, which continued till after the World War. In the elections of 1918 he was returned to power by a great majority, but gave way to the partisan ministry of Stanley Baldwin, after being refused a vote of confidence in Parliament.

LODGE, HENRY CABOT (1850–1924). American statesman, orator, and writer; born in Boston, Mass. Member of Massachusetts Legislature (1880–1881); delegate to Republican National Conventions (1884, 1888, 1892, 1896, 1900); placed Thomas B. Reed in nomination for the presidency (1896); permanent chairman (1900); chairman of committee on resolutions (1904); member of Alaskan Boundary Commission; member of Congress for Sixth Massachusetts district (1887–1893); United States Senator from 1907 to the time of his death. U. S. Immigration commissioner (1907); at one time editor of *North-American Review*, and of *International Review;* lecturer on American history at Harvard and at Lowell Institute; author of many historical works. Noted for his insistence upon laws to safeguard the franchise, and upon the necessity for the restriction of immigration. Largely through his opposition, and reservations unacceptable to President Wilson, the Versailles Treaty failed of ratification in the Senate. He was one of four American delegates at the Limitation of Arms Conference in Washington in 1921. Later his influence declined, and he was returned to the Senate again by only a narrow margin in 1922.

LONG, JOHN DAVIS (1838–1915). American politician; born in Buckfield, Maine. Governor of Massachusetts (1880–1882); member of Congress (1883–1889); secretary of the navy under McKinley in 1897 and during the Spanish-American War. His administration was exceedingly able during this difficult period.

LONGWORTH, NICHOLAS (1869–1931). American congressman, born in Cincinnati, and educated at Harvard and the Cincinnati Law School. From 1899 to 1901 member of the House of Ohio, then state Senator for two years, and from then member of the U. S. House of Representatives, save for the term from 1913 to 1915. Floor leader of the Republicans, 1923–25, and then speaker of the House. Married Alice Lee, daughter of President Roosevelt, in 1906.

LOUBET (*lōō'bā'*), **EMILE** (1838–1929). French statesman; seventh president of the French Republic; born at Marsanne. In 1876 he was elected to the Chamber of Deputies: re-elected to the Lower House (1877 and 1881), and was chosen senator (1885). In 1887 he became minister of public works in the Cabinet of M. Tirard, and in 1892 President Carnot appointed him premier to succeed M. de Freycinet. Though short, his administration was marked by the successful solution of several important problems. He resigned in the latter part of the same year; was elected president of the Senate (1896 and again in 1898), and on the death of President Felix Faure (1899) was chosen president. During his administration Dreyfus was pardoned, church and state were separated, and France and England joined in an *entente*.

LOUIS IX. or **SAINT LOUIS** (1215–1270). King of France (1226–1270). The son and successor of Louis VIII. His mother, Blanche of Castile, was regent during his minority. In 1242 he became involved in a war with Henry III. of England and defeated him in two battles. During an illness he vowed to go on a crusade if he recovered. Accordingly in 1248 he sailed with 40,000 men on the Seventh Crusade. He was defeated and captured by the Mohammedans and ransomed with 6,000 followers. He returned in 1252 on account of the death of his mother. He embarked on another crusade in 1270, and while in the East a pestilence attacked the camp and carried off the greater part of the army and the king himself. His son, Philip III., made peace and returned to France. Louis was the most distinguished monarch of his time.

LOUIS XI. (1423–1483). King of France (1461–1483). Son and successor of Charles VII. He made several unsuccessful attempts to procure the throne from his father and was obliged to flee to Philip the Good of Burgundy until his father's death in 1461, when he became king. He directed all of his efforts towards cutting down the power of the feudal lords and enlarging his empire. He worked by the most unscrupulous strategy rather than by force of arms. He did much to encourage literature, commerce, and manufacturing.

LOUIS XII. (1462–1515). King of France (1498–1515). Son of Charles, duke of Orleans, and successor of Charles VIII. His reign was marked by mildness and wisdom so that the king was called the "Father of the People." In 1499 he laid claim to the kingdom of Milan and overthrew Ludovico Sforza and took the city. In 1500 he formed the Treaty of Granada with Ferdinand by which the conquest and division of Naples were agreed upon. These monarchs quarreled over the division, and in 1503 the French were driven out of southern Italy. In 1508 Louis joined the pope, Ferdinand, and the emperor Maximilian, in the League of Cambrai against Venice. In 1509 Louis gained the battle of Agnadello and crushed Venice. In 1511 the pope, Venice, Ferdinand, and Henry VIII. of England formed the Holy League against France, which was driven out of Italy in 1512. In 1513 England gained the battle of the Spurs. Louis was succeeded by his son-in-law, Francis I. of Angoulême.

LOUIS XIII. (1601–1643). He was the son of Henry IV. and Marie de' Medici, who during his youth acted as regent. His reign was noted for continued struggles against the Huguenots, who finally in 1628 had to make terms of peace, and for plots of the queen-mother and others with Spain. In all events after 1624 Cardinal Richelieu held a firm hand, retaining to the end his ascendency over the king and being able to weather all storms of opposition. Louis outlived the Cardinal only half a year.

LOUIS XIV., THE GREAT (1638–1715). King of France (1643–1715); born at Saint-Germain-en-Laye; son of Louis XIII. and Anne of Austria. The queen was nominally regent, but affairs were really controlled by Mazarin, the prime minister. In 1660 Louis was married to Maria Theresa of Spain and, on the death of Mazarin (1661), decided to be his own prime minister. He at once brought about him a group of advisers of exceptional ability, restored the finances, and encouraged industries. For 54 years he ruled France with great decision and energy. The wars engaged in brought France much glory, but also completely exhausted her exchequer. At home Louis ruled absolutely. He revoked the Edict of Nantes, and decreed that all children should be educated in the Roman Catholic faith. The later years of Louis's life were occupied with the War of the Spanish Succession. His reign was identified with the zenith of French power, producing Retz and Saint-Simon in history; Pascal in philosophy; Rochefoucauld and Bruyere in morals; Bossuet in oratory, and La Fontaine and Boileau in poetry.

LOUIS XV. (1710–1774). King of France (1715–1774); supported father-in-law in claim on Polish crown (1733); aided in War of Austrian Succession (1745); squandered money on Madame de Pompadour; abolished parliament; banished its members; formed a new ministry. His dissolute life paved the way for the Revolution.

LOUIS XVI. (1754–1793). Born at Versailles; king of France (1774–1792); incompetent ruler; finances in chaos; reforms irritated nobles and people; conditions became intolerable and October, 1789, a Parisian mob marched upon Versailles and conducted the royal family to Paris. The queen (Marie Antoinette) advised the unwise flight to Varennes, confirming rumors of negotiations with foreign powers. The Tuileries stormed (Aug. 10, 1792); the royal family sent prisoners to the Temple; Louis XVI. condemned to death, and died under the guillotine (January 21).

LOUISE (1776–1810). Queen of Prussia; born in Hanover. In 1793 she was married to the crown prince of Prussia (later Frederick William III.). As a queen she was very popular, her dignified conduct and beauty winning those with whom she came in contact. The Order of Louise in Prussia was founded in honor of her memory. She was the mother of Frederick William IV. and William I., afterwards emperor of Germany.

LOUIS PHILIPPE (1773–1850). King of France (1830–1848); eldest son of Philippe, duke of Orléans; born in Paris; entered the National Guard on the outbreak of the Revolution; distinguished himself at Jemappes (November, 1792); but after the battle of Neerwinden was obliged to seek refuge in Switzerland. Traveled in the United States (1796–1800), and in 1809 married Marie Amélie, daughter of Ferdinand I. of the two Sicilies. When the revolution of July, 1830, overthrew Charles X., he accepted the offer of the crown. The corruption of the electoral system, the foreign policy of Louis, together with his attempts to suppress freedom of the press, aroused great dissatisfaction among all classes of people. On February 22, 1848, disturbances occurred in the streets of Paris, and the king, seeing that he would not receive the support of the National Guard, abdicated in favor of his grandson (February 24). The remainder of his life was spent in England.

LOWDEN, FRANK O. (1861–). American congressman and governor, born in Minnesota, educated at University of Iowa and Union College of Law in Chicago. Practiced law in Chicago, 1887 to 1906, member of Congress, 1907 to 1911, and governor of Illinois; 1917 to 1921. Leading candidate for nomination of Republicans for presidency during several ballots in 1920, winning as many as 311½ votes. Mr. Lowden gave much attention to agricultural subjects, especially to certain plans for cooperative marketing of farm products. During the World War as governor of Illinois Lowden exercised every energy toward marshalling the resources of his state.

LUGARD, FREDERICK JOHN DEALTRY (1858–). English administrator, served in colonial wars, 1879–1888, explored parts of Africa, and acted as administrator in Uganda, Bornu, and Nigeria. In 1907 he was appointed governor of Hong-Kong, and in 1912 of both Nigerias, which he amalgamated in 1914, and continued to act as governor-general until 1919. In 1922 he became one of the mandate commission of the League of Nations. He was made a baron in 1928.

LUNACHARSKY, ANATOLY VASILIEVICH (1875–1933). Russian author and democratic leader, who began to speak and write of socialism in 1892, was exiled for three years, joined with Gorky and others in opposing the policies of Lenin, but later allied himself with the Bolsheviki in Russia, after living some years in Italy following the Revolution of 1905. During the World War he assumed an anti-military attitude. Later acted as people's commissar of education in Russia, and did much to further education of the great masses.

LUTHER, HANS (1879–). German statesman, who did much to stabilize the finances of Germany after the World War. He was a local official at Charlottenberg, Magdeburg, and burgomaster of Essen in the Ruhr during the occupation by the Allies after the war. Entering the Cuno cabinet as minister of food and agriculture, he continued in the first Stresemann cabinet, and was minister of finance in the second Stresemann and Marx cabinets. He was called to form a government in 1924, after he had concluded the Dawes loans for Germany. He took prominent part in tax reductions, in the Locarno and other conferences, and signed the Rhine Pact and Arbitration Treaties in 1925. His united cabinet then resigned, but he was soon called again to form a new one without the Social Democrats who refused to coöperate He again resigned on May 13, 1926.

LYCURGUS. A Spartan lawgiver who lived in the ninth century B. C. and was the son of Eunomus. He introduced a constitution and established a new social order in Sparta inuring the people to hardships and developing a nation of warriors (884 B. C.). He exacted a promise from the people not to change any of his laws until his return from a pretended visit, then went away from Sparta forever. His institutions were abandoned by the Spartans in 188 B. C.

LYTTON, EDWARD ROBERT BULWER-LYTTON, EARL OF (1831–1891). English poet and diplomatist. For his literary works, see under his pen-name Owen Meredith in Dictionary of Authors. Beginning as second secretary of the legation at Florence in 1832, Lord Lytton rose by stages until he became ambassador at Paris in 1887, serving till his death four years later. In 1875 having declined to act as governor of Madras, he became governor-general of India under Disraeli. He did everything to conciliate the amir of Afghanistan, who fell under the influence of Russia, but concessions were secured with the amir's son, now ruler in his place in 1879. Later in the year the British Resident or representative in Kabul was murdered. The war which followed had not concluded when Lytton resigned in 1880. His administration was noted for the assumption by Queen Victoria of the title of Empress of India, and by a plan to prevent famines as severe as that of 1876–78.

MACBETH (d. 1058). King of Scotland, who became *mormaer* or hereditary ruler on the death of Malcolm, and who killed Duncan, Malcolm's grandson, in 1040. Duncan's son, Malcolm, in turn fought

against Macbeth, secured the assistance of Siward, King of Northumberland, and Macbeth died in battle at Lumphanan. He generously aided churches, and his reign was prosperous. The view of Macbeth given in Shakespeare's play is founded on old chronicles, which may not be reliable.

MACDONALD, JAMES RAMSAY (1866–1937). British labor leader and politician, born in Scotland, had a limited education, and entered journalism. For 12 years he was secretary of the Labour Party and edited the *Socialist Library*. From 1906 to 1918 he served as a member in Parliament, from 1911 to 1914 acting as leader of his party, but he resigned when his opposition to the entrance of Britain into the World War made him unpopular even with a large portion of the labor elements. In 1918 he lost his seat, but returned in 1922 as leader of the second largest party in the House. Making a motion of lack of confidence in 1924, MacDonald secured a vote against the Conservative government with Liberal support. He formed a cabinet, which fell in October on a minor issue, after he had sought to stabilize conditions at home and negotiations over war debts. In May 1929 MacDonald again came into office when Labour obtained more votes than any other single party. MacDonald advocated reduction of armaments and made a visit to Washington in the fall of 1929 to confer with President Hoover. He took a prominent part in the London Conference of 1930, seeking relief from burdens of preparation for war.

MACDONALD, SIR JOHN ALEXANDER (1815–1891). Canadian statesman; born in Glasgow, Scotland. The father of Canadian confederation; formed the first Canadian government (1867), becoming minister of justice and attorney general; one of the commissioners on the Alabama Claims (1871); a signer of the Washington Treaty (1871); his government was defeated in 1873; formed another government in 1878 and filled several Cabinet positions and was continuously in power until his death.

MACDONALD, JOHN SANDFIELD (1812–1872). Represented Glengarry in the Canadian Parliament for 16 years, from 1852 to 1854 acting as speaker of the house. From 1862 to 1864 he was prime minister. In 1867 he opposed consolidation, but the Conservatives invited him to organize the government of Ontario. For three years, ending in 1871, he headed the provincial cabinet with great ability and economy.

MACHADO (*mä-chä'dō*), **BERNARDINO** (1851–). Portuguese leader, born in Rio de Janeiro, became professor in Goimbra University, and early espoused openly the cause of republicanism. When elected a deputy at Lisbon in 1906, the excitement following led to the fall of the government. In 1910 he was foreign minister in the new provisional republican government; in 1914 for several months he acted as premier, and secured adherence of Portugal to the Allies; and from 1915 to 1917 he was president; but went into exile, returning again to the government as premier in 1921. Once more he was forced to leave the country in 1927.

MACHIAVELLI (*mä'kyä-vĕl'lē*), **NICCOLO** (1469–1527). Italian statesman and writer; born at Florence. From 1498 to 1512 he was secretary of the Florentine Republic, but was dismissed on the victory of the Medici party and imprisoned for a short time (1513). In 1519 the Medici, whose favor he had won, assigned him some minor posts. The remainder of his life, however, was devoted principally to literary work. His most noted production is *The Prince*.

MACKENZIE, ALEXANDER (1822–1892). Canadian statesman; born near Dunkeld, Scotland. Member of first Canadian Parliament (1867) and reform leader; forced the resignation of the Macdonald government (1873) and became the first Liberal premier. He pushed the construction of the Canadian Pacific railway and formed the first Supreme Court of the Dominion. Defeated by the Macdonald party (1878) he led the opposition for two years and retired, though a member of Parliament until his death. He declined the honor of knighthood offered by the queen.

MACKENZIE, WILLIAM LYON (1795–1861). Leader of the Upper Canada Rebellion of 1837–1838; born in Dundee, Scotland. Elected to the legislature (1828); re-elected in 1830 but his seat was refused him for alleged libel; re-elected three times and each time expelled; first mayor of Toronto (1834); elected to legislature and seated (1834). November 25, 1837, he set up a provisional government of Upper Canada and with 800 followers tried to seize the government. Sir Francis Bond Head with a force defeated them at Montgomery's Farm; Mackenzie fled to the United States, was arrested for violating the neutrality act, and imprisoned until 1840 at Rochester, N. Y. Under the amnesty he returned to Canada in 1849 and was elected to Parliament (1850–1858).

MACKINNON, HON. DONALD ALEXANDER (1863–1932). Educated at Prince of Wales College of Charlottetown, and at Dalhousie University of Halifax; made LL.B. Called to bar of Prince Edward Island (1887); made queen's counsel (1900); president of Law Society of P. E. I. (1901); member of House of Assembly, P. E. I. (1893); re-elected for Murray Harbor (1897); attorney general in Provincial Cabinet; member of Parliament for East Queen's, P. E. I., to House of Commons, Canada (1900–1904). Made king's counsel, and was lieutenant governor of Prince Edward Island, 1904–1910.

MADERO (*mä-thā'rō*), **FRANCISCO INDALECIO** (1873–1913). Mexican leader and president, born in the state of Coahuila, educated at the University of California, and lived in France from 1889 to 1895. He sought to introduce more democratic rule in Mexico, and after 1905 opposed the regime of President Diaz. From his refuge in Texas he issued a call to revolution in 1910. After seven months of fighting in Mexico, Diaz sued for peace, and Madero, after acting for six months as provisional president, was elected by a large majority, beginning his full term Nov. 6, 1911. Various forces soon obstructed his plans for land and other reforms, and revolutions broke out in both the north and the south of Mexico, and finally in Mexico City. Madero had to give way to the Huerta forces, and, on Feb. 22, 1913, he was killed on the way to prison.

MADISON, JAMES (1751–1836). Fourth president of the United States, born in Virginia, educated at Princeton, and studied law. He sat in the Virginia convention (1776), favored revision of the state laws as proposed by Jefferson, sat in the Continental Congress (1780–83), helped frame the U. S. Constitution, sat in the Federal house (1789–1797), after which he opposed the Alien and Sedition Laws, as he had opposed the policies of Washington and Hamilton in regard to foreign affairs and the funding of the national debt. As secretary of state under Jefferson (1801–09), Madison did much to fix the policies of the time, including the purchase of Louisiana, the war with the Barbary pirates, and the doctrine of illegality of the search-and-seizure policy of Great Britain. During his presidential term (1809–1817), Madison was hampered by poor advisers, and at last had to abandon a commercial policy for a military one against Great Britain, ending in the War of 1812.

MAHMUD (*mäh-mōōd'*) (979?–1030). Sultan of Ghazni; born in Ghazni, Afghanistan; founder of the Mohammedan Empire in India; took the reins of government (999); took possession of Khorassan (1000); and began a series of inroads into Hindustan (1001). In 1006, 1007, and 1009, Mahmud made other expeditions into Hindustan and, in the years that followed, conquered Ghur, Jurjistan, and Khwarezm. His last expedition against the Hindus took place in 1025. He was a patron of literature and the arts.

MAITLAND, WILLIAM (1528–1573). A Scotch statesman; "Secretary Lethington"; made an extraordinary lord of session (1561); objected to the extreme measures of Knox; and participated in the plot against Rizzio. He fought against Mary's forces at Langside, and is said to have proposed a union between Mary and the duke of Norfolk. In 1569 Maitland was arrested for complicity in the Darnley murder, but later became one of the leaders of the queen's party. This caused him to be regarded as a rebel, and he was besieged in Edinburgh Castle, finally forced to surrender, and imprisoned in Leith Castle, where he died.

MALCOLM, SIR JOHN (1769–1833). Anglo-Indian statesman, one of the founders of modern India. He was born in Scotland, joined the British in India, and in 1799 became envoy to Persia. Made many treaties, and was secretary to Lord Wellesley. In 1817 was in the Deccan; in 1827 was governor of Bombay, and instituted reforms. Malcolm returned to England in 1830. He wrote extensively on Persian, Indian and other historical subjects.

MALCOLM. The name of four kings of Scotland. **MALCOLM III.**, surnamed **CANMORE** (Great Head) (1024?–1093). On the death of his father, Duncan, at the hands of Macbeth, he was aided in the fight for the throne by Siward of Northumbria. Having defeated and killed Macbeth, he was crowned at Scone (1057). In 1070 he married Margaret, sister of

Edgar Atheling, a Saxon nobleman, who had found refuge at the Scottish court. He ravaged Yorkshire and Northumberland the same year, but was obliged to retreat. The greater part of his reign was spent in warfare with England.

MALET (*mäl'ĕt*), **EDWARD BALDWIN** (1837–1908). A British diplomatist, born at The Hague, educated at Eton and Oxford, and held many posts in various lands. Among them were those at Brussels, Rio de Janeiro, Washington, Lisbon, Peking, Athens, and Rome. After acting as consul-general in Egypt in trying times from 1879 to 1883, he became envoy to Brussels and then to Berlin, where he remained for 11 years. In 1899 he was made a member of the court of arbitration at The Hague.

MALVEY, LOUIS JEAN (1875–). French Radical politician and government official, who acted as an under-secretary in the cabinets of Monis and Caillaux, minister of commerce under Doumergue, and minister of interior under Viviani, Briand, and Ribot (1911–1917). Charged by Clemenceau with lax administration, he resigned, was finally tried for treason, acquitted, but banished for five years for certain irregularities in office. After remaining in Spain he again entered the Chamber in 1924, took part in the Morocco negotiations, acted as finance commissioner of the Chamber, and in March 1926 became minister of interior in the Briand cabinet. Through continued opposition, however, he resigned, but again in June 1928 took his old place as finance commissioner.

MANN, JAMES ROBERT (1856–1922). American legislator, was born in Illinois, educated at the University of Illinois and the Union College of Law of Chicago, and entered the House of Representatives in 1897, being elected successively till 1923. He acted as floor leader of the Republicans and vigorously attacked certain policies of the Democratic administration as to canal tolls and the tariff.

MANUEL I., COMNENUS (1120–1180). Byzantine emperor (1143–1180). The youngest son of the emperor Calo-Joannes. His reign was marked by continuous wars with Asia and Europe. In 1144 he reduced Raymond, prince of Antioch, to a state of vassalage. In 1147 the troops of Louis VII. of France and of Conrad III. of Germany marched through Manuel's dominions and came to blows with the Greeks. The German crusaders were falsely led by a guide, and, confronted by starvation, were obliged to retreat, losing nine tenths of their number. Manuel was severely defeated by the Seljuks in 1176 at Myriocephalon. He failed in his efforts to drive Frederick Barbarossa out of Italy. He was unsuccessful in his wars against the Venetians.

MANUEL II., PALAEOLOGUS (1348–1425). Byzantine emperor (1391–1425). Son and successor of John VI., with whom he had been associate ruler since 1373. He applied for aid from the Western princes against the Turks. The combined army was defeated by Bajazet at Nicopolis in 1396. In 1398 his nephew, assisted by the Turks, rebelled and Manuel was forced to make him co-emperor under the title of John VII. In 1402 Bajazet was defeated and taken prisoner by Timur in Angora and died (1403). Manuel reigned in peace then for 18 years. In 1421 Mohammed I. died and the war was renewed with his successor, Amurath II. In 1422 Constantinople was besieged and was saved by a humiliating treaty. Manuel retired in 1423 to a monastery, where he died in 1425.

MANUEL I., THE GREAT (1469–1521). King of Portugal (1495–1521) during the most splendid period of its history. He sent Vasco da Gama around the Cape; Cabral on the voyage which led to the discovery of South America; Cortereal to North America; and Almeida and Albuquerque to the East Indies.

MARCUS AURELIUS. See AURELIUS.

MARCY, WILLIAM LEARNED (1786–1857). An American statesman; born at Southbridge, Mass.; was graduated at Brown University (1808), and began the practice of law at Troy, N. Y.; served in the War of 1812; was made associate of the Supreme Court of New York (1829); elected United States senator (Democrat) (1831); was governor of New York (1832–1838); made secretary of war in President Polk's Cabinet (1845); and was secretary of state (1853–1857) during the administration of President Pierce. The remark, "We can see nothing wrong in the maxim that to the victors belong the spoils," was made by him in the Senate.

MARET (*mä-rāy'*), **HUGUES-BERNARD** (1763–1839). French leader and ambassador, after several years as a barrister, founded a journal for publishing the debates of the National Assembly; later with C. J. Panckoucke he established the *Moniteur universel*, which long was known for accuracy and impartiality. During the French Revolution he served on two missions to England, and on a third one later; was ambassador to Naples, where he was held in prison for a time; and later became the confidant, secretary, and aid of Napoleon in many of his campaigns. He also served as secretary of state for a time, but was exiled during the second regime of the Bourbons, returning in 1820, and in 1830 was named a peer of the realm, having been created duc de Bassano by Napoleon in 1809.

MARGARET (1353–1412). Queen of Denmark, Norway, and Sweden. The daughter of Waldemar IV., king of Denmark, and wife of Haakon VI. of Norway. On the death of Waldemar without direct male heirs, the nobles, after an interregnum, offered the crown, in 1376, to Margaret and her husband in trust for their young son, Olaf. Haakon died in 1380, and Margaret was sole trustee of her son, Olaf, who died in 1387. She was then elected sovereign of both kingdoms. She nominated her grand-nephew, Eric of Pomerania, her successor. The Swedish king, Albert of Mecklenburg, had so alienated his subjects that they declared the throne vacant and offered it to Margaret. She defeated the king's German troops at Falköping in 1395. In 1397 she brought about, by the Union of Kalmar, the union of the crowns of the three Scandinavian kingdoms. In that year Eric, who was only 16, was declared king. Margaret continued to exert her great influence for good until her death in 1412.

MARGARET OF ANJOU (1430–1482). Wife of Henry VI. of England, daughter of René the Good of Anjou, king of Naples. She gained complete control of her weak husband, and the birth of a son to her so disappointed Richard, duke of York, in his hopes for the throne, that he precipitated the Wars of the Roses. Margaret led the Lancastrians in these wars and won the battle of Wakefield Green (1460), where the duke of York was slain. She was defeated at Towton (1461), Hexham (1464), and taken prisoner at Tewkesbury (1471). After five years of imprisonment Louis XI. paid 50,000 crowns for her release. She died in France.

MARIA DE' MEDICI (1573–1642). Queen of France. Second wife of Henry IV. and daughter of Francis, duke of Tuscany. As the mother of Louis XIII., she ruled as regent after Henry's assassination (1610), but was an incapable ruler. Through her influence Richelieu was made cardinal and minister of state, but when she found she could not control him she opposed him. She was imprisoned, escaped to England and Charles I., her son-in-law, was compelled to leave London (1641) and died in destitution.

MARIA THERESA (*mȧ-rī'ȧ tĕ-rē'sȧ*) 1717–1780). Queen of Hungary and Bohemia; archduchess of Austria; born at Vienna; married Francis Stephen (1736), duke of Lorraine (later grand duke of Tuscany). In 1740, on the death of her father, she became queen, nominating her husband joint ruler with herself, as Francis I. Her right of succession was at once disputed. (See AUSTRIAN SUCCESSION, WAR OF.) She brought about many reforms in education, abolished legal torture, and confiscated much church property. Maria Theresa was the mother of Leopold II., Joseph II., and Marie Antoinette.

MARIE ANTOINETTE (*mȧ-rē' ăn-twȧ-nĕt'*) (1775–1793). Wife of Louis XVI. of France; youngest daughter of Emperor Francis I. of Germany and Maria Theresa; born at Vienna; married the French dauphin (1770), who became king of France as Louis XVI. in 1774. Her girlish love of pleasure, and indifference to public opinion and public needs, made her very unpopular, and with the Diamond Necklace affair (1785) the nation lost all faith in her. In the management of both foreign and internal affairs her influence was unwisely exerted and when the Notables met in 1787, she was accused of squandering the finances. From the outbreak of the Revolution until her death, she was the object of the mob's bitter hatred. In October, 1789, the royal family removed from Versailles to the Tuileries. Marie planned the flight of June 20, 1791, to Varennes, a move which only served to confirm the charges brought against her. At last (August 10, 1792) occurred the final storming of the Tuileries, Marie doing all in her power to induce the king to resort to arms. This he refused to do, thinking resistance useless, and both king and queen were taken to the prison of the Temple. In January, 1793, the queen had a parting interview with

Louis, who had been condemned to death. Her trial occurred the following October before the revolutionary tribunal. She was sentenced to death and guillotined the same day.

MARIE (1875–1938). Queen of Roumania, the oldest daughter of the second son of Queen Victoria of England, in 1893 married Ferdinand, and both were crowned rulers of Roumania in 1922. Queen Marie wrote several books, travelled widely, and visited the United States in 1926–27. On the death of the king in 1927, she retired from public life. During the World War she put forth every effort to help her adopted countrymen.

MARSHALL, THOMAS RILEY (1854–1925). Governor of Indiana (1909–1913). He was born at North Manchester, Ind., and attended the common schools there; was graduated from Wabash College in 1873; admitted to the bar (1875) and practiced law in Columbia City until 1909; governor of Indiana, 1909–13; and vice-president in the two terms of Wilson, 1913–1921. Urged neutrality at start of World War, strongly favored the League of Nations, but opposed granting the suffrage to women. He acted as one of the United States coal commission in 1922. His *Recollections* were published in 1925.

MARX, WILLIAM (1863–). Chancellor of Germany from 1922 to 1925, spent several years in earlier life as a lawyer and jurist. For twelve years he was a member of the Reichstag, being one of the leaders of the Clerical Party. During his term as chancellor he engaged in several important conferences with France and England, exerting his influence to secure the adoption of the Dawes Plan in Germany. In the elections of April, 1925, he was defeated for the presidency of Germany by von Hindenburg.

MARY I. (1516–1558). Queen of England; daughter of Henry VIII. and Catherine of Aragon; married Philip II. of Spain. In her efforts to restore the Catholic religion she acted always in a legal manner, first securing the consent of Parliament to all of her acts. The mass was restored in 1553, and the power of the pope reluctantly acknowledged in 1554. During her reign many persons were burned for their religious faith. Calais was lost (1558) in an effort to please her husband by engaging in war with France.

MARY STUART (1542–1587). Queen of Scots; born in Linlithgow Palace; only daughter of James V. and Mary of Guise. The greater part of her early life was spent in France, and in 1558 she was married to the Dauphin, who died in 1560; returned to Scotland (1561) as queen and in 1565 married Darnley, who offended her by aiding the conspiracy for Rizzio's death (1566). The growing intimacy between Bothwell and Mary resulted, after the murder of Darnley, in his marriage with the queen. The Protestants, constantly aware that Bothwell was responsible for Darnley's death, now took up arms to deliver Mary from him; taken as a prisoner to Edinburgh, she refused to be divorced from Bothwell, and (1568) escaped; at Langside her forces were defeated, and she fled to England; for more than 13 years, held a prisoner until her execution (February 8, 1587), after she had been found guilty of countenancing the plot of Babington for the murder of Queen Elizabeth.

MASARYK (*mä'sà-rēk*), **THOMAS GARRIGUE** (1850–1937). President of the republic of Czecho-Slovakia, was born in Moravia, interested himself early in the education of his countrymen. At various times he taught schools and did much literary work, principally in showing that the famous documents of Koeninghof and Gruenberg were forgeries. For a time he sat in parliament, but resigned to devote himself to the moral education of the people of Bohemia, whom he tried to protect from the encroachments of Austria, as he likewise tried to shield Austria from the domination of Germany. During the World War he became an exile in Italy and finally in England, where he taught in King's College. Later he organized the national movement of his people, became their first president, and established a semblance of stability in Czecho-Slovakia. His works include treatises on history, philosophy, and logic.

MASSEY, WILLIAM FERGUSON (1856–1925). Statesman of New Zealand, emigrated from Ireland to that country in 1870. For many years he held various positions in the government, being a member of Parliament from 1894. In 1912 Massey was Prime Minister and later held portfolios of finance and other departments, until 1917 when he represented his land in the Imperial War Conference, in 1919 in the Peace Conference at Versailles, and in 1921 in the British Imperial Conference.

MATTHIAS I. (1440–1490). King of Hungary, the second son of János Hunyadi, was elected king by a large vote in 1458 after some opposition on the part of nobles and his own father-in-law, against whom later he waged unsuccessfully a war to prevent Ladislaus, king of Poland, from becoming king of Bohemia. Matthias succeeded in keeping the Turks and other surrounding nations from encroaching too much on his domains, while he extended his frontiers, especially toward the south. For military and administrative abilities he has been compared with Napoleon.

MAURA, ANTONIO MONTANER (1853–1925). A Spanish statesman, educated at Valencia and Madrid, studied law, and became a great parliamentary orator. Elected a deputy of his native city, Palma de Mallorca, in 1881, he was at first a Liberal, but 20 years later turned to the Conservatives. In 1903 he became a reform prime minister and during the next few years made important negotiations with France in regard to Tangier and Morocco and with England in regard to rights of the seas. In 1913 he declined to continue as leader of his party, but again in 1918, 1919, and 1921 he organized a cabinet. He could not wholly sympathize with Primo de Rivera, though he agreed with him that certain changes and reforms were urgent, and to the end maintained his interest in constitutional government of a progressive type.

MAXIMILIAN I. (1459–1519). Holy Roman emperor (1493–1519); son and successor of Frederick III.; at war with Louis XI. of France over Burgundy, which Maximilian had obtained with his wife; was victorious at Guinegate (1479), but was obliged to surrender his possessions to Louis by the treaty of Arras (1482); Maximilian was elected king of the Romans (1486); the Flemings rose in rebellion and he was taken prisoner for a time (1488); joined the League of Cambrai against Venice (1508) and the Holy League against France (1513); after the great victory of Francis I. at Melegnano (1515) was forced to give up Milan. The marriage of Philip, son of Maximilian, to the Infanta Joan, daughter of Ferdinand and Isabella, placed the House of Habsburg on the throne of Spain in the person of Charles I., afterwards Charles V. The marriage of the two grandchildren of Maximilian to the son and daughter of the king of Bohemia and Hungary brought these two countries into the hands of the House of Habsburg.

MAXIMIL'IAN (FERDINAND MAXIMILIAN JOSEPH) (1832–1867). Archduke of Austria and emperor of Mexico; executed by the Mexicans. He was brother of Emperor Francis Joseph of Austria. While the French troops were in possession of the greater part of Mexico the throne was offered to him. On their withdrawal (1866), at the request of the United States, his support was gone and he alienated the loyalty of the people, who rebelled against him. He was courtmartialed, convicted, and shot on June 19, 1867. (See Charlotte in this section.)

MAZARIN (*mà-zà-răn'*), **JULES** (1602–1661). A prime minister of France; born at Piscina, in the Abruzzi, Italy. His diplomatic talents having been demonstrated, he was sent to France on a papal mission, where he made an agreement with Richelieu to further French interests in Italy. This he did, and openly entered the service of France (1639). Received a cardinal's hat (1641); succeeded Richelieu as prime minister (1642); and ruled almost as absolutely as his predecessor had done. Mazarin was avaricious, and at his country's expense acquired a fortune of $6,000,000.

McADOO, WILLIAM GIBBS (1863–1941). Secretary of the Treasury under his father-in-law, President Wilson, and candidate for the presidency on the Democratic ticket in 1924, when John W. Davis was nominated, began his law practice in Tennessee, but removed to New York in 1892. As president of the Hudson and Manhattan Railway, he constructed the first tunnel across to New Jersey under the Hudson River, opened for traffic in 1908. From March 6, 1913 to Dec. 16, 1918 he acted as head of the U. S. Treasury Department, and also as director general of railways, 1917–1919.

McCARTHY, JUSTIN (1830–1912). Irish leader and man of letters, who was born in Cork, engaged in journalism in Ireland and later in London, acting as editor of the *Morning Star* for four years. He sat in parliament as a Liberal and Home Rule member from

several different districts of Ireland in succession from 1879 to 1900. He was the nominal leader of the Anti-Parnellites from 1890 to 1896. Of several historical works by McCarthy, *History of our Own Times* established his present reputation; he also wrote several dramas.

McKINLEY, WILLIAM (1843–1901). Twenty-fifth president of the United States, born at Niles, Ohio, attended Allegheny College, but withdrew to make his living as a school teacher, and enlisted in the Union army for the Civil War, from which he emerged a major. In 1867 he began the practice of law at Canton, O., which became his permanent home. He spoke many times for Hayes in the campaign of 1875, and the following year was elected to the national house from a normally Democratic district of Ohio. In spite of great opposition at home, he continued to hold the voters until 1890, except for the election of 1882. From 1891 to 1895 he served as governor of Ohio, always keeping up his close connection with the Republican organization. He had long advocated a higher protective tariff, and so in 1896 McKinley was the natural candidate for the presidency. The campaign turned upon the policy of the free coinage of silver at the ratio of sixteen to one, a plan advocated by the opposition nominee, William J. Bryan. During McKinley's term other changes were made in the tariff. After he had commenced his second term he was fatally wounded by an anarchist at the Pan-American Exposition, Buffalo, N. Y., Sept. 6, 1901, dying eight days later.

McMILLAN, HIS HONOR SIR DANIEL HUNTER (1846–1933). Born at Whitby, Ontario. Served with Canadian volunteers (1864); during Fenian raid (1866); Red River expedition (1870); Northwest rebellion, gaining medal (1885); returned member for Winnipeg in Manitoba legislature (1880); member of Manitoba government (1889). Created Knight Commander of St. Michael and St. George, and from 1900 to 1911 lieutenant governor of Manitoba and Keewatin.

MEDICI, CATHERINE DE'. See under CATHERINE DE' MEDICI.

MEDICI, COSIMO DE', THE GREAT (1519–1574). First grand duke of Tuscany; raised to the ducal chair (1537), on the death of Alessandro de' Medici; was a patron of literature, science, and the arts; founded academies, made collections of paintings, statuary, etc. The title of grand duke of Tuscany was conferred upon him (1569) by Pius V.

MEDICI, (*mā'dē-chē*), LORENZO DE', THE MAGNIFICENT (1448–1492). The virtual head of the Florentine state; succeeded in winning the favor of the lower classes and thus making his own power absolute; was himself a poet of great ability; encouraged the arts and literature. Envious of the growing power of the house of De' Medici, some of the malcontents formed a conspiracy (of the Pazzi) to overthrow them (1478); the brother of Lorenzo fell, but the latter escaped. The policy of advancing only the members of his own family left Florence a prey to her enemies. Other members of this celebrated family, the male line of which became extinct in 1737, were Salvestro, Giovanni, and Pietro. The family furnished two popes, Leo X. and Clement VII. and a long line of dukes of Tuscany. Salvestro was the real founder of the family, but Giovanni was its earliest man of wealth, and he acquired a great reputation for trying to relieve the poor of Florence from the burden of taxation by levying more heavily on the rich.

MEIGHEN (*mē'un*), ARTHUR (1874–). Canadian political leader, who was born in Ontario, educated at Toronto University, and trained for the law. He was successively solicitor-general in the government of Sir Robert Borden, secretary of state, minister of interior, and in July 1920, premier, holding the office till the defeat of his Conservative party in 1921, and also for a brief time in 1926, in succession to W. L. Mackenzie King. During the World War he vigorously fought for a conscription act, and so alienated much of his possible support in Quebec, failing thereby to win a victory in 1925, though greatly in favor in Ontario and some other provinces. He advocated a higher tariff and protection of Canadian resources against encroachment from outside.

MEIJI TENNO (1852–1912). Emperor of Japan, succeeding his father in 1868. Among the acts of his reign were the suppression of the old shogunate, the opening of Japan to foreign influence, the gain in personal power of the emperor as ruler, the end of the feudal regime, building of railways, and the winning of new treaties from other nations now more favorable to Japan. Wars with China in 1894 and with Russia in 1904, as well as three serious revolts, also marked his reign, yet his popularity increased year by year. For his reign he adopted the motto Meiji, meaning "Enlightened Peace." His son, Yoshihito (q. v.), succeeded him.

MENELEK II. (*měn'ĕ-lēk*) (1844–1913). Emperor or negus negusti (king of kings) of Abyssinia; born in Ankobar; son of Ailu Malaketh, king of Shoa; defeated the son of John, king of Tigre (1889), and was crowned (1890); brought the army to a high standard of efficiency and completely defeated the Italians at Adowa (1896), thus putting an end to Italian claims upon Abyssinian territory. He extended his territory, introduced European ways, and thwarted rebellion. He was succeeded by his grandson, Lij Yasu, who later was deposed.

METTERNICH (*mĕt'ĕr-nĭk*), CLEMENS WENZEL NEPOMUK LOTHAR VON (1773–1859). Austrian statesman; ambassador at Dresden (1801); at Prussia (1803); at Paris (1806); minister foreign affairs (1809); conducted war against Napoleon; brought about Quadruple Alliance; Austrian chancellor (1821). From 1809 he molded the diplomacy and firmly administered the affairs of Austria for 40 years, until forced into exile by the revolution of 1848. He lived in England and Brussels for three years, and then settled down in retirement once more in Austria.

MEYER, GEORGE VON LENGERKE (1858–1918). Born in Boston, Mass.; in Massachusetts legislature (1892); speaker of House (1894–1900); ambassador to Italy (1900–1905); to Russia (1905–1907); postmaster general (1907); secretary of navy (1909–1913).

MICHAELIS (*mē'kĕl-ĕt*), GEORG (1857–1936). German statesman, who succeeded Bethman Hollweg as chancellor, in July 1917 and continued till November 1, when he gave way to Count Hertling. Advanced to power as a compromise by the military party, he failed to take a firm stand and soon lost support.

MICHALAKOPOULOS (*mē-käl-ä-kôp'ŏō-lŏs*), ANDREAS (1875–). Greek statesman who entered politics in 1910 as an independent, but joined the Liberals and served under Venizelos in 1912 and 1915. He was in Paris for the peace conference, from 1920–23 was out of the government, and in 1923 returned, holding the premiership for eight months in 1924–25, when he was exiled during the military coup of General Panglos, but in 1926 again returned as minister of foreign affairs. His moderate and enlightened views made him a valuable force for order in troublesome times in Greece.

MIFFLIN, THOMAS (1744–1800). An American statesman; born of Quaker parentage in Philadelphia, Penn.; was graduated at the University of Pennsylvania (1760); member of the Pennsylvania legislature (1772–1773), and served as quartermaster general of the Continental army (1775–1777); was a member of the Continental Congress (1774–1776) and 1782–1784), being president from November, 1783, to November, 1784; was involved in the "Conway Cabal"; was speaker of the Pennsylvania legislature (1785); president of the supreme executive council of Pennsylvania (1788–1790), and first governor of his native state (1790–1799).

MILLERAND (*mĭl-răn'*), ALEXANDRE (1859–). French president from 1920 to 1924. Millerand asserted the right of the president to take a more active part than customary in affairs of state, but he was blocked by the liberal elements, and in consequence resigned after serving but four years of a seven-year term. In 1885 he had entered the chamber of deputies as a radical socialist, but broke with some of the party later. He was minister of public works in the Briand cabinet, 1910; minister of war under Poincare in 1912–13, and again under Viviani, 1914–15, and in 1919 was appointed commissioner-general of Alsace-Lorraine. During the war he did much to increase the military efficiency of France.

MINTO, THE RT. HON. GILBERT JOHN, EARL OF (1845–1914). Born in England; educated at Eton College and Cambridge University. Received his B.A. degree, and entered the Scots Guards (1867); appointed captain of Roxburgh Rifles, captain in army Reserve, and colonel, with rank of brigadier general, commanding South of Scotland volunteer brigade. Was war correspondent in Carlist War (1874); assistant military secretary with Turkish army on Danube (1877); staff volunteer in Afghan cam-

paign (1879); private secretary to Lord Roberts in South Africa (1881); wounded in Egyptian campaign (1882); military secretary of Lord Lansdowne in Canada (1883–1886), and chief of staff in Northwest rebellion, Canada (1885). Awarded Afghan and Egyptian medals; Medjidie; Khedive star; Northwest medal and clasp; defeated at Hexham, England, for member of Parliament (1886). Assumed title (1892) at death of his father, the second Earl of Minto. Governor general of Canada (1898–1904). Viceroy of India (1905–1910).

MIRABEAU (*mē-rȧ-bō'*), **HONORE GABRIEL DE RIQUETTI, COMTE DE** (1749–1791). A French statesman, orator, and writer; born at Bignon, near Nemours. He was imprisoned for debt, and was afterwards sentenced to death. This sentence was subsequently revoked, and Mirabeau in 1784 withdrew to London. Returning to Paris nine months later, he was twice sent on government missions to Prussia (1785 and 1787), and vigorously attacked Necker's financial methods. In 1789 he was elected to the States-General and, from this time until his death, was one of the most important figures in the public affairs of France. He was chosen president of the Jacobin Club (1791) and shortly after elected president of the National Assembly. He was one of the greatest French statesmen.

MITHRIDATES (*mĭth-ri-dā'tez*) **THE GREAT** (135?–63 B. C.). King of Pontus; born at Sinope; succeeded his father as king about 120 B. C. He waged three wars against the Romans—the First, Second, and Third Mithridatic wars. Mithridates made favorable progress against the Romans until, in 66 B. C., Pompey completely defeated him. He committed suicide. He failed because it was impossible for him to raise and train an army capable of conquering the Romans.

MONROE, JAMES (1758–1831). The fifth president of the United States was born in Westmoreland County, Virginia, of Scotch-Welsh descent. He left the College of William and Mary to enlist in the Revolutionary War, in which he was a lieutenant, and in 1780 began the study of law with Jefferson, then governor of Virginia. Monroe became successively a member of the Virginia house, of the Congress of the Confederation (1783–86), of the Virginia house of delegates, of the U. S. senate (1790–94), when he was appointed minister to France by Washington, but his failure to conciliate the French led to his recall in 1796. He served as governor of Virginia (1799–1802 and Jan. to Nov. 1811), acted in France, Spain, and England (1803–07), after which he again sat in the Virginia house of delegates. In Nov. 1811 he became secretary of state for Madison, and became in addition secretary of war (1814–15). In 1816 he received 183 votes to 34 for Rufus King, his Federalist opponent, for the presidency, and in 1820 he received all but one vote for a second term. Monroe is best known as the first sponsor of the American "Doctrine" which bears his name, and which resents undue interference by foreign nations in the internal affairs of any part of the three Americas.

MORGENTHAU (*môr'gĕn-tow*), **HENRY** (1856–). American lawyer, financier, and diplomatist. He was educated at the College of New York and Columbia University, engaged in law practice for 20 years, and then in financial enterprises. Ambassador to Turkey, 1913–1916, and acted for Great Britain, France, Italy, Russia, and other countries at Constantinople during the World War. Served on the mission appointed in 1919 to investigate conditions in Poland. Chairman of finance committee of Democratic party, 1912 and 1916.

MORLEY, JOHN. See DICTIONARY OF AUTHORS.

MORRILL, JUSTIN SMITH (1810–1898). American statesman who represented Vermont in the House from 1855 to 1867 and in the Senate from 1867 to his death. He is known as the author of a vigorous tariff bill in 1860, designed for revenue as well as for protection, and in 1862 as the father of the bill which established the land grant colleges in various states. The act reads that the "leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts." A second bill in 1890 gave $25,000 yearly to each land grant college.

MORRIS, GOUVERNEUR (1752–1816). Born at Morrisania, N. Y.; admitted to bar (1771); member Continental Congress (1777–1780); superintendent of finance (1781–1785); outlined present system of coinage; minister to France (1792–1794); United States senator (1800–1803).

MORROW, DWIGHT WHITNEY (1873–1931). American diplomatist and financier, educated at Amherst, became an attorney, and entered the firm of J. P. Morgan and Company as a partner in 1914. Morrow did important work in arranging finances and in connection with shipping during the World War; and he also served as chief aide to General Pershing at Chaumont, France. In 1925 he was made chairman of the aircraft board and in 1927 ambassador to Mexico. In 1930 was made one of the delegates to the London Conference on naval limitation.

MORTON, LEVI PARSONS (1824–1920). American banker and public official, after several years of business in New Hampshire and Massachusetts, went to New York and established a firm, which in 1873–84 acted as fiscal agents of the government in several important transactions, including the reception of the $15,500,000 awarded in settlement by England of the "Alabama Claims." He sat in Congress, 1879–81, was U. S. minister to France, 1881–85, vice president, 1889–93, and governor of New York, 1895–96.

MOWAT (*mou'ȧt*), **SIR OLIVER** (1820–1903). Held the high office of premier of Ontario province for 24 years (1872–1896), the longest continuous term. Born in Kingston, Ont. Educated at private school; called to bar (1841), practising in Toronto as Burns, Mowat, & Vankoughnet. Created queen's counsel (1855) and bencher of Law Society. Served on commission consolidating the public general statutes of Canada and Upper Canada (1856–1859). Elected to Parliament, representing South Ontario (1856–1864). Was provincial secretary (1858); postmaster general (1863); appointed representative of Liberal party of Upper Canada; active in framing constitution of "Fathers of Confederation," and a vice chancellor of Ontario (1864); premier of Ontario (1872–1896); attorney general (1896), then retired. He may be said to have lived down all opposition. The story of his achievements is a romance of statesmanship. He was eminently a man to be trusted; 24 years of power with stainless integrity. Appointed lieutenant governor of Ontario (1897); and in 1899 entered the Senate and became minister of justice in the Laurier cabinet. Created Knight Commander of the Most Distinguished Order of St. Michael and St. George, and Knight Grand Cross of same order.

MULCAHY, RICHARD JAMES (1886–). Politician born in Ireland and first entered Parliament in 1918, representing part of Dublin till 1922. He assisted in organizing the Irish Volunteers with Michael Collins, and became chief-of-staff in 1918, minister of defense in 1922, and commander-in-chief after the death of Collins. From 1924 to 1927 he was out of the government, returning as minister for local government.

MULLER (*mül'ĕr*), **HERMANN** (1876–1931). German statesman, who for several years edited a socialist newspaper and sat in the Reichstag from 1916 to 1918, having tried in vain to avert the World War by a visit to the socialists of France and Germany. As minister of foreign affairs, he signed the Peace Treaty at Paris, in 1920 was chancellor for a time, and in 1928 formed as chancellor a new ministry representing all important parties.

MURRAY, JAMES STUART, EARL OF (1531?–1570). Scotch statesman; son of James V. of Scotland. When Mary was invited to become queen of Scotland, Lord James Stuart was for a few years her chief minister. Seeing that the marriage of Mary with Darnley meant Catholic supremacy, he took up arms to oppose the union, was defeated, and forced to take refuge in England (1565). In 1568 he defeated Mary's forces at Langside, near Glasgow. He met his death by assassination.

MUSSOLINI, BENITO (1883–). Leader of the Italian Fascisti and Premier of Italy, for several years was journalist, teacher and traveler. For much of his life he was an adherent of a somewhat radical form of socialism, which he gradually abandoned after 1908. During the World War he was detached from the socialist party altogether and turned his attention toward the ideals of Italian nationalism. Discipline for all is the main principle of Fascism. Through the exhortation of Mussolini this group, enlarged to a party in 1921, became the dominant factor suddenly in Italy, and assumed power with Mussolini as Premier or virtual dictator of Italy.

MUSTAFA KEMAL (*mŏŏs'tä-fä*) (1880–1938). Turkish leader and first president of the republic. His name Kemal (meaning *perfection*), was given him by his teacher of mathematics in a Turkish military school. From 1904 to 1907 he spent in exile in Asia Minor, in 1908 he felt that the new party in power was not progressive enough, and so he gave much of his time to his military career, going to Tripoli *incognito*, and there he became a major, after which he fought in the Balkan wars, and in the World War finally acted in defense of the Dardanelles. When the Turks were defeated in Palestine in 1918, Mustapha continued the resistance, established himself at Angora, declared his opposition to the abject peace terms of Turkey, and in 1920 became president of the new Nationalist Assembly at Angora. The next year he was the chief figure in the Greco-Turkish War, as he was in the foundation of the republic, of which on Oct. 29, 1923, he became first president. After bitter opposition in 1926, he was again elected president on Nov. 1, 1927.

MUTSUHITO. See MEIJI TENNO.

NADIR (1688–1747). King of Persia; born near Kelat; aided Tahmasp II. in driving out the Afghans (1725–1727); deposed Tahmasp, and was proclaimed Shah (1736) on the death of Abbas III. He was beaten by the Turks (1733), but recovered (1734–1735) Georgia, Armenia, Kars, and Erivan. In 1738–1739 he captured Delhi, and carried off the Koh-i-nur diamond; subdued Bokhara and Khiva (1741).

NAPOLEON. See BONAPARTE.

NASI, JOSEPH (d. 1579). Jewish leader in Turkey, who was born in Portugal, emigrated to Antwerp, where he became wealthy but restless in a Catholic regime, and so he settled in Turkey. The sultans promoted him to high office, he founded a Jewish colony at Tiberias, and in 1566 became duke of Naxos, having won Cyprus for the emperor Selim. Foreign powers often approached the Turkish ruler through Nasi, and potentates conferred with him. When Selim died in 1574, Nasi retired from active affairs, retaining his titles and wealth.

NEBUCHADNEZZAR (*nĕb-ū-kăd-nĕz'ar*) (d. c. 560 B. C.). More properly Nebuchadrezzar, king of Babylon, who apparently was a Chaldee. He defeated Necho (q. v.) of Egypt, and annexed Syria to his empire, making his capital city one of the wonders of the ancient world. He besieged Tyre for 13 years after a revolt, twice proceeded against Jerusalem, and finally destroyed the city in 586 B. C., when king Zedekiah was carried with many other Hebrews to Babylon. He seems to have been a progressive and religious monarch.

NECHO (*nē'kō*) (d. 594 B. C.). Called in the Bible Pharaoh-necoh. During the attempt to conquer Syria, he slew Josiah, the ruler of Judah, and deposed his son Jehoahaz. After extending his boundaries to the Euphrates River, he was defeated by Nebuchadnezzar (q. v.). Then he confined his attention to the development of Egypt, trying even to build a canal from the Nile to the Red Sea.

NECKER (*nĕk'ĕr*), **JACQUES** (1732–1804). French statesman and financier; born at Geneva; became well known for his publications on political economy and finance, and was made director general of finances (1777). His publication on the finances of France caused his dismissal (1781); recalled in 1788; dismissed in 1789; shortly recalled, but again dismissed (1790).

NELSON, KNUTE (1843–1923). American statesman, who became instrumental in establishing the department of commerce and labor at Washington. He was born in Norway, lived for 21 years in Wisconsin, and fought in the Civil War. After settling in Minnesota, he served in the state senate, was regent of the University of Minnesota for 11 years, 6 years a representative in Congress, and from 1895 to his death was U. S. Senator. Though nominally a Republican, he often went outside party lines to vote for progressive measures he thought worthy.

NERO (37–68). Roman emperor (54–68). He was the son of Agrippina, the wife of Claudius, who adopted him and made him his heir. On the murder of Claudius by Agrippina, the soldiers proclaimed Nero emperor in 54. He caused Britannicus, son of Claudius, to be poisoned, as he feared him as a rival; poisoned his own mother to please Poppaea Sabina. To marry the latter he divorced and put to death his wife, Octavia, in 62. In 61 a rebellion broke out in Britain under Boadicea, which was suppressed by Suetonius Paulinus. Rome itself was on the verge of a rebellion. In 64 two thirds of the city of Rome was consumed in a great fire which it is believed was caused by Nero. He blamed the Christians and began a persecution of them. He rebuilt the city in great magnificence, including the palace known as the Golden House. All Italy was plundered to supply the money for his extravagance. A conspiracy against him failed in 65 and Seneca and Lucian fell victims to his vengeance. He killed his wife, Poppaea Sabina, in a rage. His soldiers rose against him and he fled from Rome and ended his life by suicide in 68.

NEWLANDS, FRANCIS GRIFFITH (1848–1917). American legislator, who was born in Mississippi, educated at Yale, and the Columbian Law School at Washington, practiced in San Francisco, and settled in Nevada. He served as a Democrat in the House from 1893 to 1903 and as senator until his death. Important legislation sponsored by him includes the Newlands Act for settling railway labor disputes by arbitration.

NICHOLAS I., PAVLOVITCH (1796–1855). Emperor of Russia; born at St. Petersburg; third son of Paul I. He married in 1817 Charlotte, the eldest daughter of Frederick William III. of Prussia, and in 1825, on the death of Alexander I., Nicholas became emperor. He revived capital punishment; codified Russian law (1827–1846); converted Poland into a Russian province, and completely Russianized the foreign element in the country. In 1828 a successful war with Turkey gave Russia more territory. Intent upon forcing his hereditary designs upon Constantinople, Nicholas involved the country in the Crimean War, during which struggle he died at St. Petersburg.

NICHOLAS II. (1868–1918). Emperor of Russia; born at St. Petersburg; eldest son of Emperor Alexander III. and Maria Feodorovna. In 1891, during the famine, he was president of the committee of succor; held several military commands in his own country, and in 1893 the Order of the Garter was conferred upon him in England. He traveled extensively in the Russian Empire in order to become better acquainted with its problems and, on the death of his father (1894), succeeded to the throne. Although he had previously seemed to lack the qualities essential to a ruler, Nicholas now began a reign which exhibited both energy and decision. Perhaps his most important act was to issue a peace edict, which in 1899 led to the first Peace Conference at The Hague and the Court of International Justice. He gave up his crown without resistance on demand in 1917. Later he and his family were sent to Ekaterinburg, where they were slain on July 16, 1918.

NICHOLAS I. (1841–1921). King of Montenegro in succession to his uncle in 1860. He took part in wars against Turkey, visited Russia where Alexander III. spoke of Nicholas as his "only friend," granted a constitution in 1905, and in 1910 assumed the title of king as an independent sovereign. Meanwhile plans had been considered for a union with Serbia, and in the Balkan wars additional territory came to his little kingdom. He joined with Serbia in the World War, but kept in touch with Austria, suing for a separate peace, which move increased his unpopularity at home and on Jan. 19, 1916 caused him to flee to Italy. In 1918 the Assembly deposed him and his dynasty, and he lived in Italy till his death. Nicholas was a poet and dramatist of some ability.

NITTI (*nēt'tē*), **FRANCESCO SAVERIO** (1868–). Italian statesman and authority on economics, who, after several years as a professor of finance at Naples, entered Parliament in 1904. He was minister of agriculture, industry, and trade from 1911 to 1914, came to the United States on a financial mission in 1917, was minister of the treasury in the Orlando cabinet, 1917 to 1919, and then premier till June, 1920. He was elected again to parliament in 1921, but did not become a candidate in 1924, being out of sympathy with the Fascist regime. He afterwards left Italy.

NORRIS, GEORGE WILLIAM (1861–). American legislator, who was born in Ohio, admitted to the bar in 1883 and moved to McCook, Nebraska, where he became prosecuting county attorney, district judge from 1895 to 1902, after which he was a representative in Congress till 1912, when he was elected senator from Nebraska. In the House he championed revision of the rules and in the Senate direct legislation of senators; he opposed entrance into the World War, the selective draft, and the Versailles Treaty. He fostered a bill for government control of Muscle

Shoals power development and for protection of natural resources. Though nominally a Republican, he often voted with the opposition, supported Smith in 1928, and the Democratic candidate for senator in Pennsylvania in 1926.

NORTH, FREDERICK, EIGHTH LORD NORTH AND SECOND EARL OF GUILFORD (1732–1792). English statesman; was educated at Eton and at Trinity College, Oxford. He was sent to the House of Commons for Banbury (1754); was a junior lord of the treasury (1759–1765), and chancellor of the exchequer (1767). North succeeded to the duke of Grafton as prime minister (1770) and, although he was aware that his policy in regard to the American colonies must in the end fail, he nevertheless set aside his own convictions to please the king's obstinacy. Being unable longer to continue his policies, Lord North resigned (1782); succeeded as earl of Guilford (1790).

NORTHCOTE, SIR STAFFORD HENRY, EARL OF IDDESLEIGH (1818–1887). An English statesman. Chairman of Hudson Bay Company (1869–1874) and caused the transfer to Canada of Prince Rupert's Land; member of the Joint High Commission which signed the Treaty of Washington (1871); chancellor of the exchequer in Disraeli's Cabinet (1874); first lord of the treasury in Salisbury's Cabinet (1885–1886); foreign secretary (1886).

NUBAR, PASHA (1825–1899). An Egyptian statesman, born of Armenian parentage at Smyrna. He was educated in Europe, became a Christian, acted as secretary to Mehemet Ali, Ibrahim Pasha, Abbas Pasha, and Said, all rulers in Egypt. Under Ismail Pasha, he acted in diplomatic and other capacities, as minister of public works, and premier. He served as premier under Raiz Pasha also. Altogether he had much to do with Egyptian diplomacy for fifty years, retiring in 1895.

OBREGON (*ō'brā-gōn'*), **ALVARO** (1880–1928). Mexican leader and president, who for a number of years acted as a scientific farmer and stockman. To aid President Madero in 1912 he recruited some thousands of Indians, and later he lent important aid to Carranza, defeating Zapata, Villa, and other bandit chiefs who were warring against the stability of Mexico. In the battle of Celaya he lost an arm, 1915. Later he quarreled with Carranza and sought to replace him. Obregon became president of Mexico in 1920 and served four years, doing much to promote peace and stability in the country, in spite of counter movements. He was killed by an assassin near Mexico City, after being elected president once more.

O'CONNOR, THOMAS POWER (1848–1929). Irish leader known familiarly as "Tay Pay." He was at first a strong supporter of Parnell and the Irish Nationalist Party. After graduation from Galway College, he became a journalist in Dublin, then on the London *Daily Telegraph*, and finally in the London office of the New York *Herald*. Elected from Galway in 1880 and from Galway and Liverpool both in 1885, he chose to represent the latter, and was reëlected for a quarter of a century. He toured the United States to secure aid for the Irish cause.

ODOACER (*ō-dō-ā'sẽr*) (c. 434–493). The first barbarian ruler of Italy, who put his old commander, Orestes, to death in 476, took the crown from Augustulus, son of Orestes. He gave the eastern part of the empire to Zeno, who finally rose against him in response to a call from Nepos, a deposed Roman emperor. He was defeated in 493 at his capital, Ravenna, and later was slain treacherously by Theodoric the Ostrogoth.

O'HIGGINS, BERNARDO (1776–1842). Head of the first native government of Chili. He was the son of an Irishman, who was governor of Chili (1778–95), and viceroy of Peru (1795–1801). He fought in the revolution in 1810, and in 1813 succeeded Carrera as commander, but was forced the next year to take refuge across the mountains, where he consented to serve under San Martín. They gained a decisive victory at Chasabuco in 1817 and at Maipú in 1818. O'Higgins acted as ruler of Chili from 1817 to Jan. 1823 under the title of director-general. Though he gave a liberal constitution in 1822, he was unpopular, and retired to an estate in Peru.

O'HIGGINS, KEVIN CHRISTOPHER (1892–1927). Irish patriot, educated at the National University, joined the Sein Fein in 1916, and was minister of justice from 1923. In 1927 he also became minister of external affairs. O'Higgins was waylaid by three men and shot near Dublin on July 10, 1927.

OKUMA (*ō'kōō-mȧ*), **SHIGENOBU, MARQUIS** (1838–1922). Japanese statesman and educator. Learning English and Dutch, he changed his plans from a military career to become a leader in reform movements, but took no direct part in the revolution of 1868. He served in turn in the department of foreign affairs, as secretary of the departments of interior and finance, and as minister of finance. A dozen years later he became a member of the cabinet and premier in 1898 on Ito's retirement, but resigned after a few months. In 1914 he became prime minister, but retired because of poor health two years later. While not in office he cultivated his beautiful estate at Waseda, near Tokyo, founding also several schools, including Waseda University, of which he acted as president.

OLDENBARNEVELDT (*ōl'dĕn-bär'nĕ-vĕlt*), **JOHAN VAN** (1547–1619). Dutch patriot, statesman, and religious leader. See DICTIONARY OF HISTORY UNDER BARNEVELDT, p. 235.

OLNEY, RICHARD (1835–1917). American statesman, educated at Brown and the Harvard Law School. He practiced in Boston, sat in the Massachusetts legislature, served in the Cabinet of President Cleveland as attorney-general, 1893–95, and as secretary of state, after the death of Gresham, 1895–97. His state papers were models of clear reasoning and trenchant style. In a note to Great Britain concerning the dispute between the British and Venezuelan governments, Olney wrote an interpretation of the Monroe Doctrine which was firmer and more inclusive than any previous statement.

ORANGE, WILLIAM THE SILENT, PRINCE OF (1533–1584). Founder of the Dutch Republic; born at Dillenburg. He was the leader of the insurrection which resulted from the attempt of Philip II. of Spain to stamp out Protestantism and establish Catholicism in the Netherlands. He succeeded in bringing about, in 1579, the Union of Utrecht (q. v.). This marked the birth of the Dutch Republic, but in 1580 Philip put a price on William's head, and he was assassinated at Delft.

ORLANDO, VITTORIO EMANUELE (1860–). Italian statesman and war premier, was minister of justice in the Salandra cabinet and minister of the interior in the Boselli ministry. When the Italian armies met disaster at the battle of Corporetto in 1917, Orlando became premier, retaining this post till the time of the Peace Conference in 1919. During his administration the power of the Austrian armies in Italy and surrounding countries was broken by resisting the great attack of the enemy in June, 1918, and launching a tremendous counter offensive late in October of the same year.

OSCAR I., JOSEPH FRANCOIS BERNADOTTE (1799–1859). King of Sweden and Norway; born in Paris; son of Marshall Bernadotte; (q. v.) married Josephine Beauharnais (1823), by whom he had five children. He became king in 1844, and began a reign noted for its justice and beneficent measures. When Oscar's health failed in 1857, his eldest son (later Charles XV.) was appointed regent.

OSCAR II. (1829–1907). King of Sweden and until 1905 king of Norway; born in Stockholm; third son of Oscar I.; succeeded his brother, Charles XV., on the throne in 1872, and proved a most successful ruler. In 1857 he married the Princess Sophie of Nassau, by whom he had four sons. Oscar attained some note as a writer, and patronized industry, science, and the arts. Though he opposed the separation of Norway from the joint kingdom in 1905, his patience and good will prevented any serious disturbances.

OTTO I., THE GREAT (912–973). Founder of the Holy Roman Empire of the German nation. The eldest son of Henry the Fowler, king of Germany, and succeeded him in 936 as king of Germany. He overcame the revolutions in his kingdom and the incursions of the Huns. The latter were defeated at Lechfeld in 955 and never after renewed their raids. He took northern Italy and in 962 he was crowned by Pope John XII., and thus founded the Holy Roman Empire.

OTIS, JAMES (1725–1783). American statesman; born at West Barnstable, Mass. He was brought into notice by his speech against the writs of assistance, and by the publication of several pamphlets against Parliamentary taxation; was instrumental in bringing about the Stamp Act Congress (1765) and in effecting other measures for the defense of American liberties.

OXENSTIERNA (*ok'sen-shär-nä*), **AXEL, COUNT** (1583–1654). A Swedish statesman; born at Fanö, in Upland; made imperial chancellor (1611). During the Polish War (1621–1625) he was regent in everything but name and, on the death of Gustavus Adolphus (1632), became director of the Swedish policy in Germany; concluded the advantageous peace of Brömsebro with Denmark (1645).

OYAMA (*ō'yä-mä*), **IWAO, PRINCE** (1842–1916). A Japanese general, who rose from the rank of colonel in 1871 to that of general in 1898. During the war with Russia, as chief of staff of the Japanese army, he became the active leader of all forces in the field and won the important battles of Liao-Yang, the Shako, and Mukden. In the Franco-Prussian war of 1870 he acted as observer with the German forces. At different times he held important posts in the Nippon military organization, resigning as chief of staff in 1906.

PAGE, WALTER HINES (1855–1918). An American writer and diplomatist, who was born in North Carolina, was educated in Virginia and at Johns Hopkins, and for several years was a journalist in New York and North Carolina. In 1887 he became editor of the *Forum*, in 1895 connected himself with a Boston publishing house, edited the *Atlantic Monthly* for a year, and then helped organize Doubleday, Page, and Company, founding also the *World's Work* of which he was editor from 1900 to 1913. President appointed him ambassador to Great Britain. Here Page did much to promote friendly relations, and during the World War to assist the Allies in every way he could. Though remaining officially neutral before the War, he had personally urged President Wilson to declare against Germany when the *Lusitania* was sunk. In 1918 ill health forced his retirement.

PAINLEVE (*păn-lè-vā'*), **PAUL** (1863–1933). French political leader, at first a professor of mathematics in the Sorbonne, who took the portfolio of public instruction and inventions in the Briand cabinet in 1915, resigning in 1916, when a new cabinet was formed. In 1917 he became minister of war, then on Sept. 12 premier, but on Nov. 13 gave way to Clemenceau, having in the meantime joined in forming the supreme Allied command with Foch as chief for France. From April to November 1925, he again acted as premier, and then as minister of war and also of finance, or as minister of war alone, in several succeeding cabinets.

PALMA (*päl'mä*), **THOMAS ESTRADA** (1836–1908). Cuban statesman; born near Bayamo; in the Ten Years' War (1868–1878); conducted school at Central Valley, New York; president of new Cuban republic (1902); but on Sept. 6, 1906 resigned, and the United States took over the government for the time being. Palma was an honest and faithful leader of the Cubans.

PALMERSTON, HENRY JOHN TEMPLE, VISCOUNT (1784–1865). Born at Broadlands; succeeded to title (1802); member House of Commons (1807); secretary of war (1809–1828); secretary of state for foreign affairs (1830–1841 and 1846–1851); home secretary (1852); prime minister (1855–1857, 1859–1865). Palmerston refused to ally himself permanently with any group or party, trying to serve all elements in Great Britain alike. In private life he was accomplished and popular, and as a leader he favored many progressive causes.

PANIN (*pä'nĭĭĕn*), **NIKITA IVANOVICH** (1718–1783). Russian count and statesman, who played an important part in the diplomacy of Europe for many years. After a few months as minister to Copenhagen, 1747, he was sent to Stockholm, where he exerted a considerable influence as opponent of the French for 12 years. He was the chief adviser of Catherine the Great for a longer period, and also of Paul, the grand duke. Favoring a guarantee of Polish solidarity, he virtually caused the surrounding nations to combine against him, the result being the Turkish War. He sought with what he called a "Northern Accord" to unite various nations against Austria and France, but in the end so lost the favor of Catherine in 1781. Panin, however, was a learned, conscientious, and able statesman.

PAPINEAU, LOUIS JOSEPH (1789–1871). Born at Montreal. Elected to Legislative Assembly of Lower Canada (1809). As leader of French Canadian party was chosen speaker (1817–1837). Quarreled with royal governors repeatedly; Lord Dalhousie declined to accept him as speaker, but the Assembly insisted and Lord Dalhousie resigned. The Assembly under his lead transmitted to England the famous "Ninety-two Resolutions." Affairs became more critical (1835); Papineau arranged with William Lyon Mackenzie, the leader of the revolutionary party in Upper Canada, to coöperate in forcing England to make the Provincial Council elective, instead of appointive. His violent speeches produced ultimate rebellion (1837); he fled to the United States and (1839) to France, returning under general amnesty to Canada (1847). Elected to Lower House of the now united Canadian Parliament, but his influence was gone.

PARKES, HENRY (1815–1896). Often called the father of the Australian Commonwealth. He was born of a very poor family in Warwickshire, England, emigrated to Australia in 1839, settled in Sydney, and from 1849 to 1858 conducted the *Empire*, a paper which opposed sending criminals to Australia and favored responsible government. After a term in the legislative council, he went to England to promote emigration to Australia, remaining there for two years (1861–63). He was colonial secretary (1866–68), prime minister (1872–75), prime minister and colonial secretary for several months in 1877, and once more from Dec., 1878 to Jan., 1883, and 1887 to 1889. He presided over the Sydney convention (1891) and largely wrote the constitution then proposed.

PARNELL, CHARLES STEWART (1846–1891). Irish leader, born at Avondale, Wicklow, entered Parliament first in 1875, and adopted a policy of obstruction rather than of force to get England to grant Home Rule to Ireland. Much of the legislation of benefit during the term of Gladstone and later was through his influence. After some hesitation he approved the Land League in 1879, and under a special Coercion Act he was arrested in 1881 for advising tenants in a course of obstruction, or even of boycott. Following certain acts of violence, in 1882, Parnell remained away from Parliament largely because of ill health, but in 1883 he was accused of complicacy. A special commission exonerated him. He finally lost his influence in 1889 through a divorce suit filed by the husband of a Mrs. O'Shea, whom Parnell afterward married. Refusing to resign his leadership, he was followed by only a part of his former adherents.

PASIC, NICHOLAS (1846?–1926). Serbian leader, several times premier, from 1891–92, his first term, to his last, 1921–26. He held office during both Balkan wars, did much to unite neighboring states with Serbia against Russia and Turkey, refused stubbornly for a time some of the plans for a united Yugoslavia, until his opponents under Radić granted certain concessions.

PAUNCEFOTE (*pâns'frĭt*), **LORD JULIAN** (1828–1902). Minister to United States (1889); first "ambassador" (1893); arbitrated Venezuelan, Bering Sea, and other difficulties between England and United States; revised Clayton-Bulwer Treaty; party to Hay-Pauncefote Treaty; delegate to Hague Conference (1899). Among his important accomplishments was an Anglo-American arbitration treaty.

PEDRO I. (DOM ANTONIO PEDRO DE ALCANTARA BOURBON) (1798–1834). Regent of Brazil (1821); supported Independents; recognized by Portugal; emperor (1825–1831). Abdicated in favor of his son, Pedro II.; proclaimed king of Portugal (1826), but transferred throne to daughter, Donna Maria.

PEDRO II. (DOM PEDRO DE ALCANTARA) (1825–1891). Emperor of Brazil (1831–1889). Crowned (1841), his reign marked by rebellions and insurrections. Opened the Amazon to international trade (1867); abolished slavery (1888); forced to abdicate by a revolution (1889).

PEEL, SIR ROBERT (1788–1850). English statesman; Irish secretary (1812–1818); home secretary (1822–1827) and again under Wellington (1828–1830); introduced the Catholic Emancipation Bill (1829); prime minister (1834–1835) and again (1841–1846); repealed the corn laws (1846). Gladstone and Disraeli began their careers under his direction. Peel was a conscientious, able, and determined administrator, slow to form opinions, but remarkably tenacious of what he considered right. His fall from power followed the disruption of the Conservatives after the repeal of the corn laws, which they had long made almost a fetish.

PEPIN. See PIPPIN.

PERICLES. The greatest statesman of ancient Greece (? –429 B. C.). His father, Xanthippus, conquered the Persians at Mycale in 479 B. C. Peri-

cles championed the democratic party of Athens and made it supreme during what is known as the "Age of Pericles" (465–429 B. C.), the most brilliant epoch in Athenian history, not only in its political power, its trade and commerce, but in art and literature. He was the foremost orator, statesman, and general of his time. He introduced many reforms, carried Athens safely through several wars, formed the Confederacy of Delos, restored the buildings of Athens destroyed by the Persians, made Athens the most beautiful city in the world, and erected the Parthenon. After the defeat of the Peloponnesian War and the outbreak of a plague, the fame of Pericles waned. He was deposed from office, fined, and imprisoned. Though restored, he died soon after from a lingering disease.

PETER I., THE GREAT (1672–1725). Czar of Russia; founder of the modern Russian monarchy; born at Moscow; crowned joint emperor with Ivan (1682), under the regency of Princess Sophia; became sole ruler (1689); went to war with Turkey (1695); and in 1696 conquered Azov; in 1697 traveled in western Europe to acquire the knowledge necessary for developing his empire; founded St. Petersburg (1703), renamed Petrograd (1914). Russia, Denmark, and Poland united in war against Charles XII. of Sweden (1699), in which the latter was victorious till 1709, when Peter defeated him at Pultowa; the Russians conquered Finland (1713); Peter assumed title of Emperor of all the Russias (1721), when peace was concluded with Sweden; was the first to introduce into his country the reforms of other European nations.

PHILIP II. or **PHILIP AUGUSTUS** (1165–1223). King of France (1180–1223). The son and successor of Louis VII. and one of the greatest monarchs of the Capetian dynasty. In 1181 he despoiled the count of Flanders of two rich districts. In 1182 he drove the Jews out of his territories and confiscated their wealth. In 1187 he helped the English in their attack on Languedoc. In 1190. he went to the Third Crusade with Richard Coeur de Lion of England, but quarreled and returned home. He promised Richard to respect his lands; but at once on his return entered into a conspiracy with John of England to divide up Richard's possessions in France. Richard's return caused a war which was carried on against John after the death of Richard in 1199 and much of his land was lost to France. In 1214 Philip defeated the allied Germans, English, and Flemish at Bouvines. He improved and built up the large cities, and gave the first charter to the University of Paris. France obtained a commanding position in Europe in this reign.

PHILIP IV., THE FAIR (1268–1314). King of France (1285–1314). Son and successor of Philip III. The most prominent event of the reign was the struggle with the papacy. The French undertook to tax the clergy, whereupon Boniface VIII., the pope, issued the bull *"Clericis laicos"* in 1296, instructing the clergy to resist the attempt. The government issued a decree forbidding the exportation of metals from France. Then the pope gave way at once, as this would have prevented the sending of money to Rome. In 1302 Boniface again attempted to carry his point and issued the famous bull *"Unam Sanctam,"* which set forth the claims of the papacy and was a challenge to all of the monarchs of Europe. To strengthen his position Philip summoned for the first time in the history of France the States-General. In 1303 Boniface died. After a short rule of Benedict XI., Philip obtained, in 1305, the election of Clement V. as pope. In 1309 the pope took up his residence in Avignon and until 1378 the papacy was under the control of France. He became involved in war with England under Edward I. and with Guy of Flanders. He was defeated at Courtrai in 1302 and made peace (1305).

PHILIP VI. (1293–1350). King of France (1328–1350). First king of the House of Valois. The son of Charles of Valois, younger brother of Philip IV. His right to the throne was disputed by Edward III. of England, who claimed it through his mother. This involved France in the Hundred Years' War. He wiped out the disgrace of Courtrai by defeating the Flemish at Cassels (1328). The Hundred Years' War began in 1337. The French fleet was destroyed off Sluis in 1340. Philip was extravagant and the States-General declared in 1338 that their consent was necessary before the imposition of taxes. In 1346 Edward won Crécy, and by the intervention of the pope a peace was made in 1347. The black death broke out in the same year. Philip's extravagance knew no bounds and the country was greatly oppressed.

PHILIP II. (382–336 B. C.). King of Macedonia and father of Alexander the Great. He came to the throne in 359 B. C. and gradually made himself master of all of Greece. His great stand was at Chaeronea, where, in 338, he defeated the allied Thebans and Athenians. In the midst of his preparations to invade Persia, he was assassinated. He was succeeded by his son, Alexander the Great. It was against his efforts to become master of Greece that Demosthenes uttered the famous speeches known as Philippics.

PHILIP II. (1527–1598). King of Spain; born at Valladolid; son of Emperor Charles V. He received the government of the Netherlands (1555); became king of Spain (1556); stamped out Protestantism in Spain, but his attempt to do so in the Netherlands resulted in a disastrous revolt; in 1580 Portugal came under his power, but the "Invincible Armada" equipped for the conquest of England was completely defeated by the English (1588).

PHIPS or **PHIPPS, SIR WILLIAM** (1651–1695). First royal governor of Massachusetts; born at Woolwich, Me. When about 18 years of age he removed to Boston, and in 1687, when he recovered $1,500,000 in treasure from a wrecked Spanish galleon, was knighted and appointed sheriff of New England. Phips captured Port Royal (1690), made an unsuccessful attack on Quebec (1691), and was appointed governor of Massachusetts (1692). As a governor he displayed a rough and arbitrary spirit, and was called to England to answer charges (1694).

PICKERING, TIMOTHY (1745–1829). American statesman; born in Salem, Mass.; was graduated at Harvard (1763), and began the practice of law (1768). He took part in the battle of Lexington (1775); marched with the Essex regiment to join Washington in New Jersey (1776); was made adjutant general by Washington; participated in the campaign against Howe (1777); became quartermaster general (1780), and aided in the campaign resulting in the surrender of Cornwallis. He was a member of the Pennsylvania Constitutional Convention (1789); postmaster general (1791–1795); secretary of state from 1795 to 1800, when trouble with President Adams caused his dismissal. Pickering served as United States senator (1803–1811), and was elected to the House of Representatives (1812 and 1814).

PIERCE, FRANKLIN (1804–1869). Fourteenth president of the United States, was born in New Hampshire, completed his education in 1824 at Bowdoin College, and married the daughter of its president, Jane Means Appleton, after he served his first term in Congress. Pierce was a member of the New Hampshire house (1829–33), of the national house (1833–37), and the senate (1837–42), resigning to resume his law practice. He refused several political appointments, served in the Mexican War, during which he rose to the rank of brigadier general, and in 1852 accepted the nomination as compromise candidate for the presidency. He received the votes of all but four states, appointed a notable cabinet, all of whom remained in office (one of few such examples) during his term of four years. Pierce was a warm friend of Nathaniel Hawthorne who wrote his biography.

PINCHOT, GIFFORD (1865–). Conservation expert and governor of Pennsylvania. He was born in Connecticut, graduated from Yale, where he acted as professor of forestry and founded the school of forestry at New Haven and the summer school at Milford, Pa., and from 1898 to 1910 was chief of the division (later the bureau) of forestry of the U. S. government. He also served on notable commissions. In 1920 he became state forester of Pennsylvania and was governor from 1923 to 1927, during which time he introduced a budget system, paid off the state debt in large part, and helped settle a great coal strike in 1923, largely through arbitration.

PINCKNEY, CHARLES COTESWORTH (1746–1825). American statesman and soldier; born at Charleston, S. C. He was educated in England, and returned to America (1769); served in the first Provincial Congress of South Carolina (1775); was one of Washington's aids-de-camp; prominent member of the United States Constitutional Convention (1787); of the convention which framed a constitution for South Carolina (1790); United States minister to France (1796), where, in answer to the French minister's demand for money, he is said to have given the famous reply, "War be it, then; millions for defense, sir, but not one cent for tribute." Unsuccessful Federalist candidate for vice-president (1800); for president (1804 and 1808).

PIPPIN or **PEPIN.** The name of several mayors of the palace in the kingdom of the Franks and the ancestors of the Carolingian kings. **PIPPIN THE ELDER** (died 639) controlled the policy of the state with Arnwulf, bishop of Metz, under Dagobert I. **PIPPIN OF HERISTAL** (died 714). Son of Pippin the Elder. He had charge as majordomus of the eastern part of the Frankish kingdom known as Austrasia, about 679. He defeated Ebroin, majordomus of the western part. He thus became ruler of all of the Franks in 687. His son was Charles Martel. **PIPPIN THE SHORT** (714–768). King of the Franks (751–768). The second son of Charles Martel. In 741 he and his brother, Karlmann, received the office of mayors of the palace. In 742 they placed Childeric III. upon the throne. In 747 Karlmann abdicated and became a monk. In 751 Pippin was crowned king and Childeric was compelled to enter a monastery. Pippin was the first king of the Carolingian line. He conquered the Lombards, took land from them, giving some of it to the pope, and among other conquests took Aquitaine after eight years of attack. He failed to subdue the Saxons. At his death the territory held by Pippin was divided between his two sons, Carolman and Charles or Charlemagne (q. v.).

PISISTRATUS (*pĭ-sĭs'trà-tŭs*) (d. c. 525 B. C.). In championing the poor people and in the attempt to redress their wrongs he was protected by a bodyguard of 500 armed men (560 B. C.); seized the Acropolis at Athens, made himself tyrant or ruler of Athens, but was driven out; returned but was again banished in 550 B. C.; went to Euboea for 10 years; gathered a force at Marathon, defeated his foes, and was re-established in 540 B. C., holding power until his death. He inaugurated reforms and improved the condition of the people. His family was known as the Pisistratidae.

PITT, WILLIAM (1759–1806). Famous English statesman; born at Hayes. Entering Parliament (1781), he made his first motion for reform in representation in 1782, which, although it failed, made so favorable an impression that Shelburne made him chancellor of the exchequer (1782). In 1783 he became prime minister; was active in the negotiations of peace with the United States; reorganized the finances; attempted to establish free trade between England and Ireland (1785); supported the proposal for the abolition of slave trade; and endeavored to effect a union between England and Ireland, which should also relieve the Catholics of their disabilities. The union act passed, but the Catholic emancipation measures failed because of the king's opposition to them; he resigned in 1801, but was recalled (1804).

PLATT, THOMAS COLLIER (1833–1910). American politician; United States senator (1881). After a few months he and Senator Roscoe Conkling resigned because Garfield did not defer to them in New York appointments. Both were defeated in an appeal to the legislature. Platt was again elected in 1897 and in 1903, retiring in 1909. President of the United States Express Co. (1880–1910).

POINCARE (*pwăn-kà-rā'*), **RAYMOND** (1860–1934). The ninth president of France, and member of the French Academy since 1909; minister of public instruction (1893–1895); of finance in 1894 and 1906; premier (1912–1913); and then president till early 1920; premier again (1922–24) and from July, 1926. Poincaré during the war remained firm and considerate, but never interfered with either the army or the government. Though he differed sharply with Clemenceau, for what he believed the good of France Poincaré placed him in office. He managed the occupation of the Ruhr, at first without English cooperation; survived a financial crisis; and finally in 1926 took measures which restored the franc to something like its value before the World War. Poincaré also attempted an elaborate work describing conditions in France during his terms of office, besides older books like *Contemporary Ideas, Political Studies and Figures,* and *Literary and Artistic Causes.*

POLK, JAMES KNOX (1795–1849). The eleventh president of the United States, was born in North Carolina, received his education in the common schools and the state university, and began the practice of law at Columbia, Tennessee, in 1820. He served in the state house of representatives (1823–25), and in the national (1825–39), acting as speaker during the last four years, after which he became governor of Tennessee (1839–41), being defeated in 1841 and 1843. Put forward as a compromise candidate, Polk easily defeated Henry Clay for the office of president, which he held four years ending in 1849. He died on June 15 following. Polk believed in great national expansion, and during his term the boundary of Oregon was fixed, the Mexican war was fought, and California and other territory acquired.

POMPEY, GNAEUS MAGNUS POMPEIUS or **POMPEY THE GREAT** (106–48 B. C.). A famous Roman general and statesman. He joined Sulla against Marius, and on the death of Marius he was intrusted with the conduct of the war in Africa against the remnants of the Marian party. He drove the followers of Lepidus out of Italy and defeated the Marian party in Spain under Sertorius. He was elected consul in 70 B. C., though under the legal age. In 67 and 66 B. C. he drove the Cilician pirates from the seas; conquered Mithridates and Tigranes in Asia Minor; and formed an alliance with Caesar. Later Crassus was added and the first triumvirate was formed in 60 B. C. Pompey grew jealous of Caesar's successes in Gaul and he induced the Senate to order him to lay down his command. Caesar refused and crossed the Rubicon River into Italy, thus defying the Senate. (See CAESAR.) After the battle of Pharsalia in 48 B. C. Pompey escaped to Egypt, where he was murdered. His head was presented to Caesar on his arrival there, but Caesar ordered the murderer to be put to death.

PORTER, HORACE (1837–1921). Born in Pennsylvania, he served in the Civil War, acted as aide to General Grant (1864–69), and as assistant secretary while Grant was acting as secretary of war (1867–68), and was executive secretary during Grant's presidency. He retired from the army in 1873, went into business, but acted as U. S. ambassador to France (1897–05). At his own expense he carried on a long search to locate the resting place of the body of John Paul Jones, which was finally transferred to America. He was an American delegate to the Hague Conference in 1907.

PORTES GIL (*pōrtes hēēl*), **EMILIO** (1891–). President of Mexico, the first non-military candidate in recent times to be elected. He studied law at the National University, acted as a judge in Sonora state, as provisional governor and as governor of Tamaulipas, as secretary of interior and head of the cabinet of President Calles. On Sept. 25, 1928 he became provisional president of Mexico, being succeeded in 1929 by Rubio. Portes Gil sponsored much legislation of benefit to the labor and farm classes, including a partial prohibition measure.

PRIMO DE RIVERA (*prē'mō dā rē-vā'rà*), **MIGUEL** (1871–1930). Spanish general and dictator, also known as the Marquis of Estella, was trained for an army career, fought in the Philippines in 1897, and in 1915 was governor of Cadiz, but was relieved because he criticised the government policy in Morocco. In 1921, while senator from Cadiz, he urged the necessity of reducing the burden of the Moroccan war, and on Sept. 12, 1923, he issued a manifesto proclaiming a directorate of military and naval officers, with himself as premier and virtual dictator. He organized a group of "citizens of good will" to work out a better destiny for Spain; in 1925 dissolved the directorate, adding civil officers to the government, and in Feb. 1930 resigned all control, withdrawing to Paris, where he died the following month.

PROTIC, STOJAN (1857–1923). Yugoslav leader, at first in government service, then an editor and leader of the Radical party, being sentenced in 1899 to a long term of prison, but pardoned after nine months. He became director of the National Library, was minister of the interior during most of the time from 1903 to 1907, and again 1912–1914, took part in the post-war deliberations, and acted as premier, 1918–19, of the new Yugoslav state, declining office in 1921.

PTOLEMY I., called **"SOTER"** or **PRESERVER** (about 367–283 B. C.) was a native of Macedonia. On the death of Alexander the Great (323 B. C.) the great kingdom was divided and Ptolemy took Egypt as his share. In 306 B. C. he took the name of king and made Egypt a power of the first rank. His capital, Alexandria, became the foremost city of the world in commerce and in culture. He founded a library and a museum there and gathered around him from Greece and elsewhere the greatest men of letters; abdicated in favor of his son, Ptolemy II. (285 B. C.).

PTOLEMY II., PHILADELPHUS (308–247 B. C.). The son and successor of Ptolemy I.; reigned from 285 to 247 B. C. He engaged in no wars, but developed the greatness of his kingdom, built a great

fleet, opened up commerce, built a canal from the head of the Red Sea to the Nile, erected the famous lighthouse, the Pharos, one of the wonders of the world. Manetho wrote the history of Egypt at his suggestion and a translation of the Bible was made.

PTOLEMY III., EUERGETES (THE BENEFACTOR) (reigned 247–221 B. C.). The son and successor of Ptolemy II. He made a three years' war on Syria, Babylon, and Susa, bringing back rich booty and the Egyptian gods taken away by Cambyses, from which act he gained his surname. Egypt reached the highest point of prosperity, wealth, and military glory. He enlarged the library at Alexandria and added buildings at Karnak and elsewhere.

PTOLEMY VII., PHILOMETOR (about 188–146 B. C.). Son of Epiphanes; reigned from 181 to 146 B. C. Antiochus IV. of Syria invaded Egypt and was victorious at Pelusium and proclaimed king at Memphis. Ptolemy was taken prisoner. His brother, afterwards Ptolemy IX., gathered a force and defended Alexandria, proclaiming himself king. Antiochus retired, but on a second invasion would have been victorious had not Rome interfered and ordered him back to his kingdom. The two Ptolemies ruled together until 163, when they quarreled and Philometor fled to Rome. He regained the throne and his brother was made king of Cyrene. In 146 Philometor was slain in battle against the Syrian usurper, Alexander Balas.

PYM (*pĭm*), **JOHN** (1584–1643). English statesman; born at Brymore, Somersetshire; entered Parliament for Calne (1614); supported the Petition of Right (1628); assumed the leadership of the Short Parliament (1640); took a prominent part in drawing up the Grand Remonstrance (1641); and, after the unsatisfactory results of the campaigns (1642), carried out the union with the Scots. Pym was strongly anti-Catholic.

PYRRHUS (*pĭr'ŭs*) (c. 318–272 B. C.). King of Epirus, who, after various exploits in his own land and in Egypt, where he married the step-daughter of the ptolemy, was called in 281 to Tarentum, Italy, to fight against the Romans. By using elephants, but with tremendous losses on his side, Pyrrhus won the battle. On being congratulated he said that one more such victory, and "Pyrrhus is destroyed." Hence, the term now "a Pyrrhic victory," for one gained at cost that leaves no real advantage. He won again at Asculum, helped Sicily against Carthage, and then went back to Macedonia, where he had some success, but was killed while besieging the town of Argos.

QUAY, MATTHEW STANLEY (1833–1904). American politician; born in Dillsburg, Pa.; graduated at Jefferson College (1850); in 1861 he entered the Union army, and served with distinction; was a member of the legislature (1865–1867); secretary of the state of Pennsylvania (1872–1878, 1879–1882); state treasurer (1885–1887); in 1887 he was elected United States senator, and was reëlected in 1893 and 1901.

QUINCY, JOSIAH (1772–1864). American political leader, was born in Boston, educated at Harvard, admitted to the bar, but never practiced actively. He sat in the Massachusetts House in 1804–05, and in the National from 1805 to 1813. From 1813 to 1820 he served in the Massachusetts senate, then in the House, acting as speaker for a time, was mayor of Boston for six years, resigning in 1829 when elected president of Harvard. He retired in 1845. Quincy instituted many reforms both in administration of Boston and of Harvard.

RADIC, STJEPAN (1871–1928). Yugoslav leader, born near Fiume, educated at Zagreb and Prague, acted as a journalist and advocate of the rights of the Croatian peasants, and after a time abroad settled at Zagreb. His group after 1910 became powerful. During the World War he favored the Austrian monarchy, but later turned his party toward republicanism. At times he was held in prison for various oppositions to the party in power. After a year in London, Moscow, and Vienna, he returned to Zagreb, continued his efforts for Panslavism, again was sent to prison, but for a time sat in the Yugoslav cabinet. On June 20, 1928, he was shot in the legislative assembly, dying on Aug. 8. His nephew Pavle Radić (1880–1928), was also shot while seeking to save his uncle.

RAKOVSKY (*rä-kŏf'skē*), **CHRISTIAN GEORGIEVICH** (1873–). Russian diplomatist, born in Rumania of Bulgarian parentage. Finding it unpleasant in the Dobruja, he went to Geneva, Germany, and France, where he acquired pronounced socialist views. He joined the Soviets in the revolution, and then commenced his diplomatic career as head of the delegation in the Ukrainian peace negotiations, and in 1922 he represented Russia at the Genoa conference. Two years later he negotiated a trade treaty with Great Britain, rejected by the Conservatives later. In 1926–27 he represented Russia at Paris, but was recalled, opposed certain elements in the party, and was expelled and exiled.

RALEIGH, SIR WALTER (1552–1618). English statesman, navigator, and author; born at Hayes Barton, in Devonshire; a great favorite of Queen Elizabeth; served in various positions, and in 1585 planted a settlement on Roanoke Island, which proved a failure. It was through his efforts that the potato and tobacco plants were introduced into England. His complicity in a plot against the king being detected, he was sent to the Tower (1603) and, though condemned to death, was reprieved. He made his last voyage in 1616, and on his return was executed by James I.

RAMESES (*răm'ē-sēz*). The name of twelve kings of Egypt in the XIX. and XX. dynasties. **RAMESES I.**, first king of the XIX. dynasty, ruled for a short time about 1355 B. C. He waged war in Nubia, left an inscription there, built a part of Karnak. His mummy was found in 1881 at Deir-el-Bahari.

RAMESES II., son of Seti I. and grandson of Rameses I., reigned in Egypt (1388–1322 B. C.) and is regarded as the Pharaoh of the Hebrew oppression. He conducted foreign wars, built splendid temples at Abou Simbel, Karnak, Luxor, Abydos, Memphis, Thebes, and elsewhere. His mummy was also discovered in 1881.

RAMESES III. (about 1269–1244 B. C.) was the second Pharaoh of the XX. dynasty. His reign was marked by a general decline of Egyptian greatness.

RANDOLPH, EDMUND (1753–1813). Statesman born in Virginia. Became a lawyer, one of the framers of the state constitution, attorney general, representative in the Continental Congress (1779 and 1780–82), and governor (1787–88). He originated the Virginia or Randolph plan in the constitutional convention, favoring a strong centralized government, three executives from different parts of the country, and prohibition of importation of more slaves. He opposed the Constitution, but urged that Virginia should ratify to save the Union. In 1789 he was the first attorney-general of the United States, advocated a Federal code, and in the celebrated suit of Chisholm against Georgia argued that a state could be sued by a citizen of another state. On Jan. 2, 1794, he succeeded Jefferson as secretary of state, but resigned after he had been falsely accused of seeking money from France for his influence against Great Britain.

RANDOLPH, JOHN, OF ROANOKE (1773–1833). American statesman; born at Cawsons, Va.; elected to Congress (1799); and in 1801 was made chairman of the ways and means committee; lost his seat (1813); but was returned (1815); elected to the senate (1825); minister to Russia (1830).

RANKIN, JEANNETTE (1882–). First woman to be elected to the United States Congress. After studying in the University of Montana and other educational institutions, she specialized in advocating woman suffrage and in time headed the state suffrage association in Montana. As such she became well known, and in 1916 was elected a representative at large to the House, but failed to be renominated in 1918.

READING, RUFUS DANIEL ISAACS, FIRST MARQUESS OF (1860–1935). British statesman, who was born in London, educated there and abroad, went to sea, and finally became a great barrister, prosecuting many notable cases, including that of Whitaker Wright for fraud. He entered the House of Commons in 1904, was made attorney-general in 1910 and in 1912 given a seat in the cabinet, the first time the office had been so honored. In 1913 he became lord chief justice, an office he filled till 1921 with great dignity and acumen, serving as special envoy to the United States in 1917 and again in 1918. As viceroy and governor-general of India (1921–26), he promoted reforms, granted further concessions to the natives, and showed firmness when needed, as in forcing the abdication of the maharajah of Indore, who resigned rather than stand trial for murdering a merchant.

REDMOND, JOHN EDWARD (1856–1918). An Irish politician, who was educated at Trinity College, Dublin, followed the minority that stuck by Parnell after the latter's divorce, and in 1891 became virtua

leader of the Parnellites. In 1900 he was made leader of the reunited wings of the party and in 1910 secured enough votes to be able to demand concessions for Ireland. He tried to conciliate the English government, being finally opposed by a small minority of the Irish leaders. Largely through his efforts the Home Rule bill was passed. He greatly regretted the outbreaks of Easter 1916, sought to hold Ulster with south Ireland in the plan for a separate government, and finally in May 1917 accepted the proposal made by Lloyd-George for an Irish convention to settle the form of the new government.

REED, THOMAS BRACKETT (1839–1902). American politician; born at Portland, Me.; graduated at Bowdoin College (1860); was a member of the legislature (1868–1869); state senator (1870); attorney-general of Maine (1870–1872); member of Congress (1877–1899). He was speaker of the fifty-first, fifty-fourth, and fifty-fifth Congresses, where he earned the name of "Czar" Reed for his method of counting a quorum; he was an efficient speaker, and was a prominent candidate for the Republican presidential nomination (1896).

REID, WHITELAW (1837–1912). American diplomatist and journalist; born at Xenia, Ohio. Became editor and proprietor of the New York *Tribune* (1872) on the death of Horace Greeley. Candidate for vice-president (1892); minister to France (1889–1892); special ambassador to Queen Victoria's jubilee (1897); member of the Peace Commission which terminated the Spanish-American War (1898); special ambassador to King Edward VII.'s coronation (1902); ambassador to England to succeed Joseph Choate (1905–1912).

RENNER, KARL (1870–). An Austrian politician, leader of the Social Democratic party, and first chancellor of the Austrian republic. Entering parliament in 1907, he often spoke against the government, engineered the events leading up to the abdication of the emperor, thwarted those who wished to break up the new government, and at Paris in 1919 and later secured terms favorable to Austria in financial and other post-war reconstruction. He refused to grant certain demands of Hungary, lost the votes of the Christian Socialists in his country, and in 1920 resigned as chancellor, but continued as foreign minister until October.

RHODES, CECIL JOHN (1853–1902). African statesman; born in Bishop Stortford, Herefordshire; the one aim of his life was the extension of British rule in South Africa. In 1888 Rhodes obtained from the king of the Matabele a grant of the territory now known as Rhodesia. He was premier of Cape Colony from 1890 to 1896, resigning after the Jameson raid; on the revolt of the Matabele (1896), he went unarmed and alone into the midst of the rebels and concluded permanent peace. One of Rhodes's projects, the building of a Cape-to-Cairo railway, was partly carried out before his death. In his will he bequeathed practically his whole fortune ($30,000,000) to the public service; to his college, Oriel, at Oxford, he left $500,000, while about $10,000,000 was left to found a number of three-year scholarships tenable at Oxford. Two of these were offered to each state and territory in the American Union. The annual income for each scholarship is about $2500. Rhodes is buried in the Matoppo Hills in the territory which bears his name.

RICHARD I, COEUR DE LION (1157–1199). King of England (1189–1199). On the death of his father, Henry II., he was crowned king, but with Philip Augustus of France went on the Third Crusade in 1190. Affairs were handled by William Longchamp, but John obtained more and more power each year. The Crusade was a failure. Richard made enemies, and when he was returning home was taken prisoner by Leopold, duke of Austria, through whose kingdom he was passing, and by him handed over to the emperor, Henry VI., who imprisoned him. He was ransomed and returned to England in 1194. He forgave John, but began a war with the king of France. He was killed while storming a town in France in 1199. Sismondi says of him, "A bad son, a bad brother, a bad husband, and a bad king."

RICHARD II. (1366–1400). Son of Edward, the Black Prince, and the grandson and successor of Edward III. (1377–1399). Affairs were well administered for a time by John of Gaunt, the king's uncle. In 1381 Wat Tyler led an insurrection over a heavy poll tax, which was settled with much skill by the king. Richard had much trouble with the nobles; while he was in Ireland subduing the country, Bolingbroke landed in England with followers. Richard was taken prisoner, having been deserted by his friends, and taken to London, where he formally abdicated in 1399. Bolingbroke took the throne with the title of Henry IV. Richard was imprisoned in Pontefract Castle, where he was murdered in 1400.

RICHARD III. (1452–1485). King of England (1483–1485). Youngest son of Richard, duke of York, and brother of King Edward IV., whom he greatly assisted in the wars of the Roses. On the death of Edward IV. Richard was the foremost man in the kingdom. He caused his two nephews to be smothered in the Tower and took the throne in 1483. Buckingham planned an uprising against Richard in favor of the earl of Richmond of the House of Lancaster. His plans were frustrated and he was executed. The earl of Richmond landed in England with a force and met the king's army on Bosworth Field in 1485, where Richard was defeated and slain. Richmond became king as Henry VII. of the House of Tudor.

RICHELIEU (*rē-shē-lyû'*), **ARMAND JEAN DUPLESSIS, CARDINAL DE** (1585–1642). French statesman; born in Paris of noble family; consecrated bishop of Luçon (1607); in 1622 he received the cardinal's hat from Gregory XV. Louis XIII. called him to the office of prime minister in 1624, and from this time until his death he was the ruler of France in everything but name. His objects were (1) to ruin the Protestants as a political party, (2) to humble the pride of the nobles, (3) to reduce all subjects to their duty, (4) to raise France to its proper position among foreign nations. Richelieu was a patron of letters, the founder of the French Academy, and the author of many important reforms in finance and in the army. He ranks among the greatest statesmen of France.

ROBERT I. OF SCOTLAND. See BRUCE, ROBERT.

ROBESPIERRE (*rō-bĕs-pyâr'*), **MAXIMILIEN MARIE ISIDORE** (1758–1794). French revolutionist of Irish origin; born at Arras. On the death of Mirabeau (1791), he was recognized as revolutionary leader. Was a member of the "Great Committee of Public Safety" (1793), and in this position he put to death many innocent men and women, finally perishing on the guillotine himself. Robespierre was precise, austere, and earnest; his aim was to establish a reign of virtue.

ROOSEVELT (*ro-ze-velt*) **FRANKLIN DELANO** (1882–). Thirty-second president of the United States, a native of New York and educated at Harvard in arts (class of 1904), and at Columbia in law, 1907. He practiced law in New York, until he became a state senator in 1910. After three years he became assistant secretary of the Navy, during the Wilson administration until 1920, when he became a vice-presidential candidate with Cox on the Democratic ticket. An attack of Infantile Paralysis left him badly crippled in 1921. Roosevelt became governor of New York in 1928 and was reelected in 1930. In 1924 and 1928 he supported Alfred E. Smith for president, nominating him as "The Happy Warrior" in the Democratic convention. In 1932 he won the nomination over Smith and others, being elected president by overwhelming majority, taking office in March 1933. He instituted important changes, as the devaluation of the dollar, creation of new bureaus, and many emergency ideas marked his administration. Renominated at Philadelphia in 1936.

ROOSEVELT, THEODORE (1858–1919). Twenty-sixth president of the United States who was born in New York City. During his youth could not engage in sports because of frail health, which continued even during his career at Harvard from which he was graduated in 1880. He had spent some time in the Maine woods, and three years in western Dakota (1884–1887), where he greatly improved his physique. He prepared himself for law at the Columbia University Law School, and in his uncle's office, but really preferred literature and natural history. He was in the New York legislature from 1881 to 1884, and went to Dakota after the death of his first wife, who was Alice H. Lee of Boston. Being defeated for mayor in New York, he became police commissioner, and from 1889 to 1895 one of the U. S. Civil Service Commission. By this time he had adopted his idea of the strenuous life. In 1897–98 he acted as assistant secretary of the navy, helped hasten the preparations for the war with Spain, and then resigned to organize (with Dr. Leonard Wood) a group known as the Rough Riders, of which he became

colonel after Wood was promoted. He was elected governor of New York in 1898, and vice president in 1900, and then became president on the death of McKinley on Sept. 14, 1901. On his retirement after serving the rest of the term, and a single term of his own, Roosevelt went to Africa on a hunting trip in 1909. In 1912 he responded to the demand that he run again, after the Republican Convention had narrowly missed nominating him. In 1913–14 he made a scientific expedition to South America. He sought to assist in every way during the World War, even to the extent of leading an American brigade. Weakened by a fever contracted in Brazil, which returned several times later, he was in ill health in 1918, but recovered and resumed his literary labors, cut short by his death during sleep, Jan. 6, 1919. For his literary work see the DICTIONARY OF AUTHORS.

ROOT, ELIHU (1845–1937). American Cabinet officer; born in Clinton, N. Y.; counsel for William M. Tweed in the "Tweed Ring" trial; also in the Stewart will case and the Fayerweather will case; secretary of war to succeed General Russell A. Alger (1899–1904); member Alaskan Boundary Tribunal (1903); secretary of state to succeed John Hay (1905); president American Society of International Law (1906). U. S. senator (1909–1915). Received Nobel peace prize (1912). As a member of various commissions, Root wielded a stabilizing influence. He presided at the New York Constitutional Convention (1915), advocating the short ballot, reduction of costs and time in litigation, and laws favoring impeachment of incompetent officials. Unofficially, he had much to do with shaping the policies of the League of Nations, and also as one of the committee that planned the Court of International Justice, and as one of the U. S. delegates to the International Conference on Armament Limitation at Washington in 1921.

ROSAS (*rō'sōs*), **JUAN MANUEL DE** (1793–1877). Dictator of the district of Buenos Aires (1835–52). By organizing cowboys he had virtually reduced the province to peace in 1829, after which he acted as governor for three years. He fought with almost all the neighboring states of South America and with France and England, finally being overthrown by a combination against him. Then he fled to Europe where he lived in obscurity till his death.

ROSEBERY, ARCHIBALD PHILIP PRIMROSE, FIFTH EARL OF (1847–1929). English political leader and orator, who held the under-secretaryship of the home office (1881), was first commissioner of works, with cabinet seat (1884), foreign secretary under Gladstone (1886 and 1892), premier (1894–95). He resigned leadership of the Liberal party in 1896, remained aloof for several years, though taking a keen interest in public affairs. In 1910–11 he opposed the measures designed to curb the House of Lords; during the World War he was active in recruiting as lord lieutenant of Midlothian and Linlithgowshire. He was also the author of biographies or appreciations of Gladstone, Pitt, Cromwell, and Randolph Churchill.

ROWELL (*rōu'ĕl*), **NEWTON WESLEY** (1867–). Canadian political leader, born in Ontario, sat in the provincial legislature (1911–17), was president of the council of the Dominion government and member of the lower house (1917–21), and member of the war cabinet of the empire in 1918. He acted as representative for Canada in the International Labor Conference at Washington in 1919, as delegate to the League of Nations Assembly in 1920, and was president of the League of Nations Society in Canada.

RUDOLPH I. (1218–1291). King of Germany and Holy Roman emperor (1273–1291), and founder of the house of Habsburg, for centuries the reigning house of Austria. The Great Interregnum began in 1256 and for many years Germany was without an acknowledged head. In 1272 the pope tried to force the election of an emperor. Rudolph of Habsburg was chosen as the most fitting, and was crowned at Aix-la-Chapelle in 1273. In 1276 he made war on the king of Bohemia, who refused to acknowledge him, and took valuable territory from him. He defeated and slew Ottokar in 1278 at Marchfeld and placed his own sons, Albert and Rudolph, in charge of the forfeited lands. He suppressed the "robber barons" and destroyed their strongholds.

RUDOLPH II. (1552–1612). He was son of Emperor Maximilian II, whom he succeeded as emperor in 1576, having been king of Bohemia and of the Germans for a year, and of Hungary for four years previously. Becoming an increasing reactionary, he lost support of many subjects in 1604, and in 1608 he was forced to cede Hungary and control of Austria and Moravia to his brother Matthias, and also Bohemia in 1611. Matthias succeeded him in 1611. Rudolph, though not progressive in politics, was a well-intentioned and capable ruler. His own tastes, however, were scientific and literary, and his agents collected many fine works of art for the royal museums at Prague.

RUSHDI PASHA (*rōōsh'dē*) (c. 1864–1928). Egyptian leader, educated in France, and made a judge in the mixed courts, in the Egyptian Court of Appeals, and in 1908 minister of justice. From 1914 to 1919 he ably acted as chief justice, accepting the British protectorate when Turkey entered the World War. He joined with Saad Pasha Zaghlul in seeking to get England to pronounce as to the political status of Egypt, and sought till his death to secure terms which the Egyptians might accept.

RUSSELL, LORD JOHN (1792–1878). English statesman; an ardent champion of parliamentary reform; carried the Test and Corporation acts (1828); supported the Catholic Emancipation Bill (1829), Reform Bill (1832); premier (1846–1852 and 1865); secretary of foreign affairs in coalition ministry (1852); foreign secretary under Palmerston (1859).

RYKOV (*rŷ'kôf*), **ALEXEI IVANOVICH** (1881–). A Russian political leader, who was born at Saratov, where he took up revolutionary and democratic propaganda, continued at times till the revolution of 1917. He visited Lenin at Geneva, and in 1905 became a member of the central committee of the Communist party. In 1907 he was banished to Samara, escaped before his term was over, went to Paris, and in 1911 was again in Russia, where he was imprisoned till 1913, and then exiled. In 1917 he took part in the revolution, acted as chief of the economic council, and became after Lenin president of the council of people's commissars.

SAIONJI (*sī'ôn-jē*), **KIMMOCHI, PRINCE** (1849–1940). Japanese statesman, who entered public life in 1881 and accompanied Ito to Europe and the United States in 1882 to learn about foreign governments. He acted as minister to Austria (1885–88), became a member of the privy council in 1894 and was minister of education in the second Ito cabinet. In 1906 and 1911–12 he was prime minister, and in 1919 chief envoy to the Peace Conference at Paris, after which in 1920 he was made a prince. Saionji also acted as foreign minister on three occasions pending appointments.

SALADIN (*săl'ă-dĭn*), **SALAH-ED-DIN YUSUF** (1137–1193). Sultan of Egypt and Syria; born at Tekrit; became ruler of Egypt (1174); conquered Syria and the greater part of Mesopotamia (1174–1183); crushed the kingdom of Jerusalem (1187); Tiberias, Acre, Beirut, and many other places were also taken. Acre was retaken, after a memorable siege (1191), by the armies of the Third Crusade under Philip II. and Richard the Lion-hearted, and a three years' truce between Richard and Saladin (1192) left to the Christians the coast from Jaffa to Tyre.

SALANDRA (*sål-lăn'drà*), **ANTONIO** (1853–1931). Italian statesman, member of the Liberal party, under-secretary of the treasury in 1893, minister of finance (1906), and of the treasury (1909–10). In 1914 he became premier, at first keeping Italy neutral, and finally took the task of bringing Italy into participation on the side of the Allies, but resigned after the Austrian success in 1916, though he supported the next two ministries. He took part in the Assembly and Council of the League of Nations, and in 1928 became senator, after hesitating at times as to giving his whole support to the Fascist régime.

SALISBURY (*sawlz'bury*), **ROBERT ARTHUR TALBOT GASCOYNE CECIL, THIRD MARQUIS OF** (1830–1903). English statesman; born at Hatfield, Hertfordshire; in 1865, on the death of his elder brother, he became heir to the marquisate and assumed the title of Lord Cranborne; he was a member of the House of Lords as Marquis of Salisbury (1868); chancellor of the University of Oxford (1869). When the Disraeli ministry came into power (1874), Salisbury again became secretary of state for India; and his entire sympathy with the new premier's imperialist policy led to his appointment in 1876 as British representative to the Conference of Constantinople. He was appointed secretary of state for foreign affairs (1878), chosen leader of the Conservative party (1881), and on the retirement of the Gladstone ministry (1885)

became head of the government. In 1892 he went out of office, but returned (1895). In 1900 the Unionists were again returned with a large majority under the leadership of Lord Salisbury; in July, 1902, he resigned office, having been premier for a longer period than any other minister since the Reform Act of 1832. He was succeeded by Arthur Balfour, his nephew. His foreign policy was sound and on the whole successful, and no statesman was more alive to the necessity of maintaining the peace of Europe.

SANKARIN NAIR, SIR CHETTUR (1857–1934). Indian politician and jurist, who acted as public prosecutor of Madras, advocate general and judge of the Madras high court. For years he sat in the legislature of Madras, held the education portfolio (1915–19). In 1925 he became a member of the Council of State for India, and in 1928, chairman of a committee representing all India to coöperate with the Statutory Commission.

SANTA ANNA or **SANTA ANA, ANTONIO LOPEZ DE** (1795–1876). Mexican politician and general; born at Jalapa, Mexico; in 1828 he took the field as a supporter of Guerrero for the presidency. On becoming commander in chief (1829), he defeated the last attempt of Spain to re-establish authority in Mexico, and was chosen president (1833). His tendencies toward monarchism led to a rebellion (1835), in the suppression of which he was taken prisoner. He defended Vera Cruz against a French fleet (1838), and was president (1841–1845). Was Mexican general in the war with the United States (1846–1848); president of Mexico (1853–1855). He died in poverty.

SARDANAPALUS (*sär'dā-na-pē-lŭs*) (corrupted from Assyrian *Asshur-bani-pal*) (668–626 B. C.). Last great Assyrian monarch; son of Esarhaddon. The weakness of Assyrian forces resulted in the loss of Egypt about 653 B. C.; and a siege of Tyre ended, finally, in capitulation. Sardanapalus is noted, not for his conquests, but for his magnificent building plans carried out in the cities of Babylonia and in Nineveh. It is from his great library at Nineveh that much of the modern knowledge of Babylonian literature and religion is obtained. He died on a great funeral pyre, if the classical story is to be relied upon.

SASTRI, V. S. SRINIVASA (1869–). Indian leader, who joined the Servants of India Society in 1907 and succeeded Gokhale as president in 1915. As member of the viceregal legislature, he attracted attention as an orator and conciliator, serving on various committees, was at London for the Imperial Conference, at the League of Nations Assembly, and the Washington Conference on reduction of naval armaments. Later he did much to promote a better feeling with the Union of South Africa while acting as agent-general of India.

SAZONOV, SERGHEI DMITRIEVICH (1866–1927). A Russian leader and diplomatist, who served at Rome, London, and the Vatican in various capacities (1900–10). He sought to promote peace in the Balkans, a better understanding with Germans, where his sincerity was suspected, and a delay at the start of the World War. He tried to conciliate Austria and to restrain the Serbians, and to prevent complete Russian mobilization, though these efforts failed. As foreign minister (1909–17), he exerted a great influence over the czarist policies.

SCHEIDEMANN (*schī'dé-mȧn*), **PHILIPP** (1865–1939). German Socialistic leader, who exerted a lively influence in the government both before and after the fall of the kaiser. In 1918 he became vice-president of the Reichstag, later secretary of state in the cabinet headed by Max of Baden, and active in organizing the new republican form of government, being elected in 1919 president of the first ministry under the new assembly at Weimar. He resigned when the government decided to adhere to the Versailles Treaty, and then resumed the leadership of the Socialistic group.

SCHOBER, JOHANN (1874–1932). Austrian president of police, who did much to protect the royal family and maintain peace during the bloodless revolution in 1918. For his great abilities and frankness, he was chosen as the man best suited to negotiate with the Allies for a favorable loan to Austria and to form a union ministry in 1921. Yet when he negotiated a pact with Czechoslovakia, the leaders who planned eventual union with Germany withdrew support, and Schober was forced to resign the chancellorship, afterwards returning to his old position as president of police.

SCHURMAN (*shoŏr'mȧn*), **JACOB GOULD** (1854–). Was born on Prince Edward Island, Canada, and won the Canadian Gilchrist scholarship to the University of London, from which he was graduated in 1877, with further studies in Germany and Italy. He was professor of philosophy at Acadia College, and Dalhousie College, Nova Scotia, for six years and then went to Cornell, where he was Sage Professor of Philosophy from 1886 to 1892, and president from 1892 to 1920. Dr. Schurman spent much of 1899 in the Philippines as president of the U. S. Commission; from 1912 to 1913, he was minister to Greece and Montenegro; from 1921 to 1925 envoy to China; and then ambassador to Germany till 1930.

SCHURZ (*shoŏrts*), **CARL** (1829–1906). American statesman; born in Liblar, Prussia; he came to the United States in 1852, and practised law in Milwaukee (1859). President Lincoln appointed him minister to Spain (1861), but he shortly resigned to join the Union army; served as United States senator from Missouri (1869–1875), and was secretary of the interior in Hayes's Cabinet. He subsequently engaged in literary work, writing several books, among which may be mentioned biographies of Clay and Lincoln.

SEITZ (*sī'tz*), **KARL** (1869–). Austrian member of the Social Democratic party,—in 1901 to the dissolution vice president of the Reichsrat, and from 1918 to 1921, president of the assembly, and acting federal president for a time in 1920, becoming vice president of the national assembly or Nationalrat in 1921.

SELEUCUS I. (*sī-liū'kŭs*) (c. 312–281 B. C.). A son of Antiochus, one of the generals of Alexander the Great, obtained eventually by far the lion's share in the division of the empire, until at last his kingdom extended from Babylon to the Mediterranean on the west. From 316 to 312 he was a refugee in Egypt, while Antigonus held Babylonia. His return to power in the east, 312, was afterward regarded as the date for the reckoning of time till the fifteenth century A. D. By defeating Antigonus he gained additional territory in Asia Minor, and he founded a new capital at Antioch in Syria, allowing his son to rule in the eastern part of his empire. After some success in Thrace, he was assassinated in Macedonia in 281. See Seleucus II. and Antiochus III. in this DICTIONARY OF STATESMEN AND RULERS.

SELEUCUS II. King of Syria (246–226 B. C.). He gained the throne by assassinating Antiochus II. He was driven from his kingdom by Ptolemy Euergetes. On the withdrawal of the latter he regained his throne, and succeeded in holding Syria and most of Asia Minor. He conducted an expedition against the revolted provinces of Parthia and Bactria. He was routed by Arsaces the Great, the deliverer of Parthia. He was succeeded by his sons, Seleucus III. and Antiochus III., the Great.

SEMIRAMIS. Mythical queen of Assyria, supposed to have been of divine parentage. She married Ninus, king of Assyria and founder of Nineveh. After his death she ruled as regent for her son. She invaded India and made many foreign conquests. She built the city of Babylon in all of its magnificent grandeur, and all great works were attributed to her. In her sixty-second year she mysteriously disappeared,—some say she was transformed into a dove. Much fable is mingled in the stories and it is doubted by many that she ever lived, although according to Herodotus there was a Semiramis in Assyria in the first half of the eighth century B. C.

SERVIUS TULLIUS (*sŭr'vi-us*) (578–434 B. C.). Sixth Roman emperor or king, who married the daughter of Tarquinius the Elder and succeeded him. His reign of 44 years is notable for an alliance made with the Latins, including the formation of a league with Rome, and for the granting of a new constitution which in time gained rights for the plebeians. He died during a revolt led by his son-in-law, Tarquinius Superbus.

SEVERING, WILHELM KARL (1875–). German republican leader, who acted as commissioner for the Rhineland and negotiated with the striking workmen in the Ruhr, was minister of interior of Prussia almost continuously from 1920 to 1925 and again under Müller in 1927, and was largely responsible for curbing the disturbances of 1923.

SEVERUS (*sē-vē'rus*), **LUCIUS SEPTIMIUS** (146–211). Roman emperor (193–211). He was commander of a legion and governor of provinces when, on the murder of Pertinax, he was proclaimed

emperor in 193. Julianus had taken the throne when Severus arrived at Rome, but he was promptly murdered. Severus distributed large donations to the soldiers and assured himself of the power. He captured Byzantium after a three years' siege in 197; plundered the capital of the Parthians, Ctesiphon, in 198. On his return to Rome in 202 he pleased the people with magnificent shows and the distribution of money. He quelled a rebellion in Britain, marching with a large army to the extreme north of the island. He built the Wall of Severus in Britain; died at Eboracom (York).

SEVIER (*sē-vēr'*), **JOHN** (1745–1815). Pioneer, was born in Virginia. He organized companies which fought the Indians, during the Revolution and later, especially against the Creeks in 1793. In 1794 he became governor temporarily of the state of "Franklin," a district subsequently granted to Tennessee, and the inhabitants set up their own government. Brigadier general in 1789, entered Congress 1790, first governor of Tennessee, 1796–1801, 1803–1809, and served also in twelfth and thirteenth Congresses.

SEWARD, WILLIAM HENRY (1801–1872). Famous American statesman; born in Florida, New York; graduated from Union College (1820); a member of the New York state senate (1830); and was governor of his state (1838–1842); he was a member of the United States senate (1849–1861), where his ability made him the undisputed leader of the Whigs. The election of Lincoln to the presidency in 1860 was a great disappointment to Seward, whose hope for the presidential chair had been high. But he nevertheless, on becoming secretary of state in 1861, gave splendid support to the administration. His most important diplomatic achievement was the purchase of Alaska from Russia (1867). An attempt was made on his life simultaneously with the assassination of Lincoln.

SEYMOUR, HORATIO (1810–1886). American politician; born at Pompey Hill, N. Y.; was military secretary to Governor Marcy (1833–1839); mayor of Utica (1842); governor of New York (1853–1855 and 1863–1865); unsuccessful Democratic candidate for the presidency (1868). During the war he gave his support to the Lincoln administration.

SFORZA (*sfôr'tsä*), **CARLO, COUNT** (1872–). Italian diplomatist and foreign minister, secretary of the embassy at London, then in turn minister at Peking, Belgrade, Italian commissioner in Turkey, undersecretary of foreign affairs, and senator. From 1920 to 1922 he was foreign minister, and as such objected to the granting of 12 islands in the eastern Mediterranean to Greece.

SHAFTESBURY, ANTHONY ASHLEY COOPER, SEVENTH EARL OF (1801–1885). See under DICTIONARY OF REFORMERS AND PHILANTHROPISTS.

SHERMAN, JOHN (1823–1900). American statesman and lawyer; born in Lancaster, Ohio; member of Congress (1855–1861) and Senator (1861–1877); member of committee of inquiry sent to Kansas, and participated in the movement for the formation of the Republican party; author of the refunding act (1870); secretary of the treasury (1877–1881) when his able management of the treasury made it possible for the government to resume specie payments (1879); again served as Senator (1881–1897); secretary of state (1897–1898).

SHERMAN, ROGER (1721–1793). Eminent statesman; born in Newton, Mass. He removed to New Milford, Conn. (1743), and in 1754 was admitted to the bar; served as judge of the Connecticut supreme court (1766–1789); was a member of the Connecticut senate (1766–1785); mayor of New Haven (1784–1793). In the Constitutional convention at Philadelphia (1787) he took an active part, and was influential in securing the ratification of the Federal constitution in Connecticut. Sherman is best remembered as being one of the Committee of Five appointed to prepare a draft of the Declaration of Independence.

SIDNEY or SYDNEY, ALGERNON (1622–1683). Famous English statesman; he rendered his first military service against the rebels of Ireland (1642); entered the Long Parliament for Cardiff (1645), and although appointed commissioner (1648) for the trial of Charles I. did not present himself at any of the court sessions. Not approving of concentration of power in Cromwell, he withdrew from politics in the Protectorate, and in 1659 was sent on a political mission to Denmark. Returned to England (1677); plotted with Louis XIV. against Charles II.; for alleged complicity in the Rye House plot (1683), he was summarily sentenced to death.

SIGISMUND (*sij'iz-mund*) (about 1368–1437) Holy Roman emperor (1411–1437). Second son of Charles IV. In 1396 he undertook a crusade against the Turks, but was overwhelmed by Bajazet I. at Nicopolis. In 1387 he came to the throne of Hungary but was deposed in 1401. By the aid of hired troops he regained it. In 1411 he was elected Holy Roman emperor. He was the author and protector of the Council of Constance, and brought about the deposition of Pope John XXIII. His greatest disgrace was the desertion of John Huss, to whom he granted safe conduct to the Council, where he was afterward burned at the stake. In 1419 he succeeded to the throne of Bohemia. The Hussites were in arms and bloody defeats were sustained by the army of Sigismund and the allied Germans. He was the last of the House of Luxemburg.

SKRŻYNSKI (*skr-zĭn'skē*), **ALEXANDER** (1882–). Polish count and statesman who was minister of foreign affairs in 1922–23, and 1924–26, delegate to the League of Nations, and Polish representative in the Locarno conference. He always sought to reconcile the national ideas of his country with the friendship of foreign nations.

SLIDELL, JOHN (1793–1871). American statesman; born in New York City; in 1810 he graduated from Columbia College and, removing to New Orleans (1819), served (1829–1833) as United States district attorney for Louisiana; he was elected to Congress (1843); appointed minister to Mexico (1845); was United States senator (1853–1861); made Confederate commissioner to France, and was taken prisoner by Wilkes. (See TRENT AFFAIR.) Slidell spent the remainder of his life in England.

SMITH, ALFRED EMANUEL (1873–). Received his education in the parochial schools of New York City, where he has lived most of his life. From 1895 to 1903 he served in the office of the commissioner of jurors; from 1903 to 1915, in the New York Assembly, acting as Democratic leader in 1911 and Speaker in 1913. Then he became sheriff of New York county from 1915 to 1917; president of the Board of Aldermen in 1917; and then governor of New York for three terms, beginning in 1919, 1923, and 1925. As Democratic candidate for the presidency in 1928 he received 87 votes to 444 for Hoover, the Republican nominee.

SMOOT, REED (1862–), senator from Utah since 1903; born in Salt Lake City. President of various Utah corporations, including Provo Commercial Bank, Smoot Investment Co., and director of enterprises in Salt Lake City, including Deseret National Bank. He was a member of the World War debt funding commission and chairman of the commission which in 1927 began providing additional public buildings in Washington.

SMUTS (*smŏŏts*), **JAN CHRISTIAN** (1870–). South African statesman. Though an enemy of England during the Boer War, became an ardent ally in the fight against the power of Germany in Africa. In 1916 he broke the hold of Germany on East Africa, and Lloyd George summoned him to England, where he became the only colonial member of the Imperial War Cabinet. In 1919 Smuts was elected premier of the Union of South Africa, but was defeated again in 1920, though he became premier when the South African Party was joined by the Unionists. Smuts continued as premier till a new alignment of parties forced his cabinet out in 1924.

SOBIESKI (*sō-byĕs'kē*). See JOHN III. OF POLAND.

SOLYMAN (*sŏl'ĭ-măn*) **(SULEIMAN).** The name of three Turkish sultans, the most renowned being Solyman II. the Magnificent (about 1495–1566). He began to rule in 1520, and made military preparations for carrying out an extensive scheme of conquest. His armies overran a great part of central Europe, Persia, and Arabia; in 1542 the Turks were supreme in the Mediterranean. At Malta (1565), however, he was repulsed. Under him the Ottoman empire reached the height of its power.

SONNINO (*sôn-nē'nô*), **SIDNEY, BARON** (1847–1922). Italian statesman, financier, and author, served in the legations at Madrid, Vienna, Berlin, and Versailles, entered journalism, but in 1893 as minister of finance saved Italy from a crash. For ten years after 1896 he acted as leader of the opposition or of the parliamentary majority. In 1906 and in 1909–10 he was prime minister, and foreign minister from 1914 to 1919. He was second Italian delegate to the Peace Conference with Premier Orlando till the fall of the ministry, June 1919.

SPOONER, JOHN COIT (1843–1919). American legislator; born in Lawrenceburg, Ind.; settled in Wisconsin; served during the Civil War and was brevetted major at its close; elected to the United States Senate in 1885; defeated for governor by George W. Peck in 1892; again elected to Senate in 1897 and in 1903; a prominent debater and was regarded as the spokesman of the McKinley and Roosevelt administrations; resigned from the Senate (1907) to practice law.

SPRING-RICE, CECIL ARTHUR (1859–1918). British diplomatist, educated at Eton and Oxford, acted as secretary to Lord Granville and then for Lord Rosebery (1884–85), was connected with various diplomatic legations until he became minister to Persia in 1906, then to Sweden in 1908 and finally ambassador to the United States, 1912–18. He died at Ottawa, Canada, on his return journey to England.

STALIN (*stä'lyĕn*), **JOSEPH VISSARIONVITCH** (1879–). Russian communist leader, who after the death of Lenin became the most powerful figure in Soviet Russia. From 1898 to the 1917 revolution he went about agitating among the workers, being arrested and either imprisoned or banished several times. In 1913 he directed the propaganda among members of the Duma, having acted the previous year also as editor of two Bolshevik journals. Afterward he held several positions in the communist government.

STAMBOLISKY (*stăm-bō-lits'kē*), **ALEXANDER** (1879–1923). Bulgarian peasant leader and premier, after finishing his education in Germany, took up the agrarian cause in his country, opposed King Ferdinand more and more till he was able to engineer the abdication of the monarch in 1918. From 1919 to 1923 his influence dominated, until his government was overthrown by a military coup, and after a flight of three days Stambolisky was overtaken by soldiers and put to death on June 12. His ideal was to unite the peasants of all lands and also probably to form a great Balkan state with Bulgaria a central influence.

STANTON, EDWIN McMASTERS (1814–1869). American statesman; born at Steubenville, Ohio; a successful lawyer; attorney general of the United States (1860); secretary of war (1862–1868); made associate justice of the United States Supreme Court (1869), but did not live to assume his new duties.

STEPHEN (1097?–1154). King of England (1135–1154). Nephew of Henry I. and his successor. Although Henry tried to have his daughter, Matilda, succeed him, Stephen, Earl of Blois, by promises to the nobles of permission to build castles on their own estates and the granting of other privileges, obtained their support. David I. of Scotland invaded England to enforce his niece's claims, but was badly defeated at Northallerton, or "the battle of the Standard." For fourteen years the country was in a state of civil war and completely devastated. In 1141 Stephen was taken prisoner at the battle of Lincoln. Matilda was crowned but proved unsatisfactory as a ruler. Stephen was released and crowned again. After much strife a compromise was made whereby Matilda's son, Henry, should succeed Stephen.

STEPHENS, ALEXANDER HAMILTON (1812–1883). American statesman; born near Crawfordville, Ga., was admitted to the bar (1835); state House of Representatives (1836); Congress (1843). He was made vice-president of the Confederacy (1861) and, with Messrs. Campbell and Hunter, met Lincoln and Seward in an effort to end the war by negotiation; member of the House of Representatives (1873–1882); governor of Georgia (1883). Called the "Nestor of the Confederacy."

STEVENS, THADDEUS (1793–1868). American statesman; born at Danville, Vt. In 1816 he was admitted to the bar, and served in Congress from Pennsylvania (1849–1853, 1858–1868). Stevens was probably as bitter an enemy as the South ever had.

STRAUS (*strous*), **OSCAR SOLOMON** (1850–1926). Merchant and diplomatist, member of the importing firm of L. Straus and Sons, pottery and glassware, 1881–1906. U. S. minister to Turkey, 1887–9, 1898–1901, 1909–11; secretary of commerce and labor in cabinet of President Roosevelt, 1906–9; Chairman of Public Service Commission, first district, New York, 1915–18; member of the Court of Arbitration at The Hague, 1902, and reappointed by Presidents Taft and Wilson; member of commissions and boards affecting labor and civic affairs. Author of *Reform in the Consular Service, United States Doctrine of Citizenship, Our Diplomacy with Reference to our Foreign Service, The American Spirit, Under Four Administrations.*

STUYVESANT (*stī'vĕ-sănt*), **PETER** (1592–1672), Dutch governor of New Netherland, a picturesque and strong character. He kept the Indians friendly and helped fix the boundary of New England. Being forced by the English to withdraw in 1664, he went to Holland, but returned and lived for years on his farm, the Bowerij, from which the Bowery, New York, is named.

SULLY (*sü-lē'*), **MAXIMILIEN DE BETHUNE, DUKE DE** (1560–1641). The great minister of Henry IV. of France. He reformed the state affairs and from 1597 to 1609 he trebled the income of the state. After the death of Henry in 1610, Sully was one of the council of regency, but was forced by his colleagues to resign in the following year. He encouraged farming, industry, conservation, and national defense.

SUMNER, CHARLES (1811–1874). An American statesman; born in Boston; was a successful lawyer, but his Fourth of July oration on the "True Grandeur of Nations" (1845) first made him well known. In the formation of the Free Soil party he played an important part; was senator (1854–1874). Sumner's unflinching courage, sincerity, and devotion to duty give him high rank among American statesmen.

TAFT, WILLIAM HOWARD (1857–1930), son of Judge Alphonso Taft, was born in Cincinnati, graduated from Yale in 1878 and Univ. of Cincinnati Law School in 1880. Second in class of 121 at Yale and won half first prize in law in his law class. Served in Cincinnati successively until 1900 as a law reporter, asst. pros. attorney, as private counselor, asst. county solicitor, judge of Superior Ct., solicitor general of U. S., Judge of Circuit Court, and Dean of the Cincinnati Law School. Pres. U. S. Philippine Com. and first civil governor of the islands. Sent by Pres. Roosevelt on several missions, including those to arrange with the Pope for purchase of church lands, to Panama, to Cuba, where he acted as provisional governor, and to the Far East. Sec. of War, 1904–08. Elected president over Bryan in 1908 by 321 to 162 electoral votes. In three-cornered fight was defeated by Wilson and Roosevelt in 1912. Kent Prof. of Law, Yale, 1913–1921, when chosen Chief Justice of Supreme Court. Member of Nat. War Labor Conf. Board, 1918–19; Pres. Amer. Red Cross, 1906–13, Amer. Bar Assoc., 1913, Amer. Acad. of Jurisprudence, 1914, and of League to Enforce Peace; Chancellor Smithsonian Institution, 1923. Early in 1930 he was forced to resign from the chief justice bench because of ill health. Died March 8, 1930. He lectured extensively and was the author of various works, including *Four Aspects of Civic Duty, United States and Peace,* and *Our Chief Magistrate and his Powers.*

TAKAHIRA (*tä-kä-hē'rä*), **KOGORO** (1854–). One of the "elder statesmen" of Japan, baron, and diplomatist, entered the Foreign Office, as a translator in 1877; became connected with the Japanese Embassy at Washington in 1879; was minister there 1901–05, 1908–9. With Baron Komura he signed the Russian Peace Treaty at Portsmouth, N. H., in 1905. Also was minister of Japan in Italy, Austria, and Switzerland at different times.

TALLEYRAND (*tăl'ĭ-rănd*), **DE PERIGORD, CHARLES MAURICE, PRINCE OF BENEVENTO** (1754–1838). French diplomatist and statesman; born in Paris. Having been educated for the church, he was made bishop of Austin (1789). On being excommunicated by the pope some time later, he severed connections with the church and in 1797 was appointed minister of foreign affairs. When Bonaparte became emperor, Talleyrand, who had upheld his ambitious projects, became grand chamberlain and Duke of Benevento. After the peace of Tilsit (1807) he broke off relations with the emperor and became, by degrees, leader of the opposition. He favored Napoleon's deposition, and, on the return of Louis XVIII., became his minister, and was made ambassador to the Congress of Vienna. Talleyrand committed his greatest crime in bringing about the death of the Duc d'Enghien.

TAYLOR, ZACHARY (1784–1850). The twelfth president of the United States was a Virginia man, who took up a military career, which began in 1806 and lasted nearly 40 years with little interruption. Taylor fought in the Indian uprising, in the War of 1812, against Black Hawk in 1832, in the Seminole War of 1837, becoming a brevet brigadier general,

and attained great fame in the Mexican War, especially by his defeat of the chief opposing general, Santa Anna, at Buena Vista. At the beginning of the war, he had left his plantation in Louisiana, had driven the Mexicans out of what is now Texas, but most of his men had been drawn away to join those of General Scott. Partisans who needed a Whig candidate in 1848 spread the idea that Taylor had been virtually shelved through politics, and he was the successful nominee over Clay, Webster, and Scott, all popular with certain factions of the Whig Party. In his brief term of a little over a year and four months, Taylor had small opportunity of proving his executive worth. He favored extension of the domain, the annexation of California, and was on the point of readjusting his cabinet when typhus fever cut him down on July 9, 1850.

THEODORIC (*thē-ŏd'ō-rĭk*) (c. 454–526). King of the Ostrogoths, as a lad spent ten years in Constantinople, and even before the death of his father, Theudemir, he had exacted tribute from Macedonia and Moesia. After his father's death in 474 he waged a long series of fruitless wars with Zeno and with a rival Gothic chieftain. From 488 to 493 he spent in conquering Italy, which for 33 years enjoyed great peace and prosperity under his energetic rule. He did much to improve the land and to encourage agriculture and was mainly neutral in religious controversies.

THEODOSIUS I. (*thē-ō-dō'shĭ-ŭs*), **THE GREAT** (c. 346–395). Roman emperor, son of Theodosius, a general who carried on a successful campaign in Britain, accompanied by his son and namesake. He defeated both the eastern and the western Goths, having been assigned to rule the eastern part of the Roman empire by the emperor Gratianus. He restored Valentinian II. to be ruler of the western part of the empire, and later united both parts, but lived only a short time afterward.

THIERS (*tyâr*), **LOUIS ADOLPHE** (1797–1877). French statesman and historian. After the revolution of 1830, which he countenanced, he became minister of the interior, and remained in the cabinet four years in different positions (1832–36), and for a time in 1840 was president of the council and foreign minister. For 23 years he held no government office, entering political life again in 1863 as deputy from Paris. He led the anti-imperialists, opposed the war with Germany in 1870, and as president of the cabinet made a peace. Then from Aug., 1871, to May, 1873, he was president of France, after which he permanently retired. He wrote an elaborate 10-volume history of the French Revolution and one of the Consulate and the Empire.

THOMAS, ALBERT (1878–1932). French socialist and labor leader, who first entered the government as under-secretary of armaments in 1915, though he had been a member of the Chamber since 1910. In 1916 he was minister of munitions, went to Russia in 1917 to persuade a continuance of the war, and afterward favored the causes of some of the smaller nations like Poland and Serbia. In 1919 he was appointed director of the International Labour Office and performed the duties at Geneva with great distinction.

THOMPSON, JOHN SPARROW (1844–1894). A Canadian statesman, born in Nova Scotia, where he became attorney-general in 1878 and premier in 1882, and a judge of the province supreme court. In 1885 he was appointed minister of justice in the Federal cabinet, and the next year defended with skill and success the execution of Louis Riel. He helped frame a treaty with American delegates for the government of seal fisheries off Newfoundland and elsewhere, but the American government rejected this. From 1892 to his death he was dominion premier, and died at Windsor Castle, England, a few minutes after he had been sworn as a member of the privy council by Queen Victoria.

TILDEN, SAMUEL JONES (1814–1886). American official, who was born in New York, educated at Yale and at the College of New York, became a celebrated lawyer, and held various offices in state and nation. He was in the state assembly in 1846, the constitutional convention of 1846 and 1867, and as a reform Democratic member of the assembly in 1872 was largely instrumental in breaking up the notorious Tweed Ring of politicians. As a result he was made governor in 1874, and Democratic candidate against Hayes for the presidency in 1876. Tilden received a majority of the popular vote, but conflicting returns from four states deprived him of the electoral vote, and finally the contest was decided against him by a special commission. At his death he left the bulk of his estate, reduced by litigation to about $2,000,000, to found a library in New York City. His bequest and the Astor and Lenox foundations were united in 1895 to establish the New York Public Library.

TITUS, FLAVIUS SABINUS VESPASIANUS (c. 40–81). Roman emperor (79–81); captured Jerusalem (70); on death of his father surprised all by his wisdom and justice. He gave money lavishly to all sufferers in the great fire at Rome (80), which destroyed the Temple of Jupiter Capitolinus, and other handsome buildings. At the height of his popularity he suddenly died. He was succeeded by his younger brother, Domitian.

TONISSON, JAAN (1868–). Esthonian statesman, after several years in judicial service in Russia, became editor of *The Postilion*, oldest Esthonian daily at Dorpat. In 1905 he led the moderate constitutional element, and as such sat in the Russian Duma, and after 1917 he took part in every important political movement in Esthonia. In Stockholm, after being expelled from his native land by Russia, he succeeded in getting Allied recognition. In 1919–20 he was prime minister of Esthonia, and in the second parliament became president of the Chamber.

TOUSSAINT (*tōō'sān*), **FRANCOIS DOMINIQUE** called **L'OUVERTURE** (*lōō'vēr-tür'*) (1743–1803). Haitian statesman; full-blooded negro, born in Haiti. He joined the French republicans (1794), and became commander in chief of the island. Supported by the whole body of negroes, he afterward became president. He was treacherously seized by the French (1802), and died in captivity in France; he is a splendid type, intellectually and morally, of the possibilities of the negro.

TRAJAN (*trā'jăn*), **MARCUS ULPIUS** (52–117). Roman emperor (98); born in Spain. Although a great part of his reign was spent in gratifying his warlike ambitions, he by no means neglected internal affairs. He maintained impartial justice, managed the finances successfully, built military roads, bridges, canals, and suppressed the Christians as political enemies. Trajan's column, built in 114, may still be seen in Rome.

TREVELYAN (*trē-vĕl'yăn*), **GEORGE OTTO** (1838–1928). English statesman and historian, from 1864 to 1897 a member of Parliament, in 1868 civil admiralty lord (1868–70), secretary to the admiralty (1880–82), and later secretary for Scotland (1886 and 1892). He sponsored legislation extending the suffrage and abolishing purchase in the army. His *Life* of Lord Macaulay, the historian, who was his uncle, takes high rank among biographies. For years he carried on a correspondence with Theodore Roosevelt.

TROTSKY (*trŏt'shē*), **LEO (LEV DAVIDOVICH)** (1879–). Russian political leader, whose real name was Bronstein, was born in south Russia and educated at the University of Odessa. In 1898 he was deported to Russia, but escaped in 1902 to England by means of a passport made out in the name of Trotsky, which name he then adopted. Later he was again expelled from Russia, in 1910 declared his position as midway between the Bolshevik and Menshevik policies, in 1913 he was a war correspondent in Constantinople, and after the World War began he was imprisoned for publishing a book on the origins of the conflict. He was refused asylum in Germany, France, and Spain for his pacifist and other doctrines, and finally came to New York where he edited *Novy Mir* (The New World), a Russian daily. In 1917 he was sent to Russia by his friends, but was arrested at Halifax and interned, being released on appeal from Russia. He was second only to Lenin in the revolution of late 1917, acting as commissar of foreign affairs, and later as commissar of war, being superseded in 1924. In 1927 he was read out of the party, exiled, and in 1929 went to Constantinople.

TRUMBIC, ANTE (1863–). A statesman of Yugoslavia, member of the Austrian parliament in 1907, leader in attempts to unite the Serbs and the Croats, and a member of the Peace Conference at Versailles. During the World War he sought support in Italy, in England, and elsewhere, which finally culminated in the congress of small groups at Rome in 1918. Later that year he was made foreign minister in the provisional Yugoslav government. After 1920 and the Treaty of Rapallo, he was mainly

in opposition, except for a brief time, and in 1925 he became leader of a smaller group of Croat peasants.

TSANKOFF (*sänk'ŏff*), **ALEXANDRE** (1879–). A Bulgarian professor and statesman, who completed his education in Germany, was professor of economics at Sofia University, and not until 1922 entered politics by forming an educated group into a National Concord. When Stamboliski (q. v.) was driven from office in 1923, Professor Tsankoff formed a coalition government of all parties except the communists, and continued in office till 1925.

TUPPER, SIR CHARLES (1821–1915). Canadian statesman; born in Amherst, Nova Scotia; elected to Provincial Legislature (1855); premier of Nova Scotia (1864–1867); strongly supported confederation; president of Council (1870–1872); minister of inland revenue (1872); of customs (1873); of public works (1878); of railways and canals (1879); high commissioner for Canada in London (1884 and 1888); British plenipotentiary on Fisheries Commission at Washington (1887–1888); premier of Canada for six months (1896) and then leader of opposition till he lost his seat in 1900.

TUPPER, HON. SIR CHARLES HIBBERT (1855–1927). Born at Amherst, Nova Scotia. Educated at Windsor Academy and McGill University, winning Governor General's scholarship. LL.B. Harvard (1876); called to bar of Nova Scotia (1878); queen's counsel (1890); called to bar of Ontario (1895); member executive coucil Canadian Bar Association (1896); returned to House of Commons for Pictou (1882–1904); minister of marine and fisheries (1888–1895); minister of justice and attorney general (1895); solicitor general (1896); assisted in fur seal discussion (1891); representative of Her Majesty as agent for Great Britain at Paris, in Bering Sea Arbitration (1893); Knight Commander of St. Michael and St. George. He carried through Parliament many measures of importance to mercantile and shipping classes, especially acts for improvement in shipping cattle from Canadian ports across the Atlantic.

TUTANKHAMEN (*tōōt-änk-ä'mĕn*) (d. 1350 B. C.). Last king of the celebrated eighteenth dynasty, which reigned from about 1588 to 1350 B. C. He followed his father-in-law, the great Amenhotep IV., and evidently died young and left no descendants. He restored an older worship of Amen to replace the sun-worship instituted by his predecessor, with whom he acted for a few years as co-ruler. When his tomb was discovered in 1922 by Lord Carnarvon and Howard Carter, the interest of the world was aroused by its magnificence.

TWEED, WILLIAM MARCY (1823–1878). American politician and leader of the "Tweed Ring"; born in New York City. The "Ring" conducted the most flagrant system of spoliation of the city ever heard of. The system was exposed by the New York *Times* (1871); a committee of seventy citizens led by Samuel J. Tilden investigated and Tweed was indicted for forgery and grand larceny. He was sentenced to 12 years' imprisonment and a fine of $12,300.18. After two years' imprisonment he was released on a technicality. He was at once rearrested on a civil warrant for over $6,000,000. While out for a drive with an attendant from Ludlow Street jail he escaped and fled to Spain. He was returned (1876) and again imprisoned in Ludlow Street jail, where he died.

TYLER, JOHN (1790–1862). Tenth president of the United States; was another Virginia man, a graduate of William and Mary, and admitted to the bar in 1809. He was a member of the Virginia house three different times (1811–16, 1823–25, 1838–40), of the Federal house (1816–21), governor of Virginia (1825–27), U. S. senator (1827–38), and in 1841 became vice president, succeeding Harrison, when the latter died after a month in office, on April 4. In the changing political complexions of the day, Tyler was the candidate of a faction in 1844, but withdrew in August before the presidential election. L. G. Tyler, his son, was president of the College of William and Mary from 1888 to 1919.

ULMANIS (*ul'män-is*), **KARL** (1877–1940). A Latvian statesman, who was educated in agriculture in Germany and the United States and in 1918 succeeded in unifying all parties into a patriotic group, which on Nov. 18 proclaimed a republic. After the Latvians won a conflict with both Russia and some German irregulars, he formed a government. From the beginning of the republic to 1921, and from Dec. 1925 to May 1926, he was prime minister and then minister of foreign affairs to Dec. 1926. As leader of the middle-class Farmers party, his power was universally recognized in Latvia.

VALENS (c. 328–378). Roman emperor of the East (364–378). The brother of Valentinian I., with whom he shared the empire. Valens reduced taxes by 25 per cent; defeated the Ostrogoths in a war lasting from 367 to 369; defeated the Persians in 372; and permitted the Goths, who were hard pressed by the advancing hordes of the Huns, to settle in Thrace. This brought about war with the Goths themselves, in which the army of Valens was completely routed and he was slain at Adrianople (August 9, 378).

VALENTINIAN (*văl'ĕn-tĭn'ĭ-ăn*), **I.** (321–375). A Roman emperor (364–375) of humble origin; was the successor of Jovian in 364; chose his brother Valens as his colleague and gave the East to him. The foreign possessions suffered from the incursions of the barbarians, but the administration of affairs at home was excellent. He won victories over the Alemanni and Saxons. Valentinian was a strong and able ruler as well as an orthodox and tolerant Christian.

VAN BUREN, MARTIN (1782–1862). Eighth president of the United States was born and died at Kinderhook, N. Y. From 1803 for many years he enjoyed a profitable law practice in New York. He was surrogate of Columbia County (1808–13), a state senator (1812–20), and was also attorney general meanwhile (1815–19). In 1821 he was made a U. S. senator, resigning in 1828 to become governor of New York on Jan. 1, 1829, but he gave up the latter office also to be secretary of state in Jackson's cabinet. He was appointed minister to England in 1831, went abroad in September, but on Jan. 25, 1832, the appointment failed of confirmation by the senate, largely through the influence of Calhoun. This procedure added to his fame and he was elected vice president in 1832 and president four years later. Failing to take definite action in some cases, and seeming to favor the South in some others, lost him support as a nominee in 1840, prevented his nomination in 1844, and gave him only part of the support of the party in 1848. During the Civil War he supported President Lincoln's policies.

VANE, SIR HENRY (1613–1662). English statesman; born at Hadlow, in Kent. Came to America (1635); became governor of Massachusetts (1636); returned to England (1637), where he was joint treasurer of the navy (1639–1641). Vane was knighted in 1640; succeeded Pym as leader in the House (1643); member of the council of state (1649); took part in the negotiations for the union of England and Scotland (1652). He was executed in 1662.

VENIZELOS (*vĕn-ē-zā'lŏs*), **ELEUTHERIOS** (1864–1936). Greek statesman born in Crete, led in the movement uniting Crete and Greece. About 1910 he moved to Athens and formed the league which made war on Turkey in 1912. During the World War, as premier of Greece, he used every method in his power to bring Greece into union with the allies against Germany, but the king of Greece, for family reasons, prevented, and Venizelos resigned in 1915. Following the first abdication of Constantine, he returned to Greece as premier in 1917, and Greece joined the allies. During the Peace Conference he was one of the most enlightened delegates, wielding a large influence. He continued to be premier till Nov. 1920, when his government fell at the very height of his popularity because the war in Asia Minor had displeased the mass of the people. Returning to influence in 1922, he represented Greece in various conferences, as he had at Versailles in 1919. Early in 1924 he was premier for about three weeks, resigning because of poor health, and living abroad till in 1928 his party came back strong, and he once more returned to power. Venizelos did much to promote peace with other nations.

VESPASIAN (*vĕs-pā'zhĭ-ăn*) or **TITUS FLAVIUS VESPASIANUS** (9–79). A Roman emperor of humble origin. He passed through minor military offices until in the reign of Claudius he was made commander of a legion and was sent to Britain in 43, where he conquered the Isle of Wight. In 66 he was chosen to conduct the war against the Jews. When Galba died in 69 he was proclaimed emperor by his soldiers in Alexandria. The Senate meantime proclaimed Otho. Civil war resulted, for the army in Germany had proclaimed their general, Vitellius, emperor. Vespasian, being in Egypt, cut off the grain supply from Rome, gave the Jewish war over to his son, Titus, and remained in the East. Otho died a violent death and the army of Vitellius was routed.

The murder of Vitellius in 69 left Vespasian in control of the Roman world. He reigned for ten years. Jerusalem was captured by Titus (70); Vespasian and Titus shared the grand triumph; the Colosseum was built; Britain was conquered by Agricola in 78 and 79. Vespasian died in 79 and was succeeded by his son, Titus.

VICTOR EMMANUEL II. (1820–1878). Was king of Sardinia (1849–1861); king of Italy from 1861; assisted by Garibaldi, he created a new Italian kingdom. Venice welcomed him in 1866, and with the occupation of Rome in 1871 the unity of Italy was completed.

VICTOR EMMANUEL III. (1869–). King of Italy since August 11, 1900, succeeding his father, King Humbert I. Educated principally under the direction of his mother; entering the army in 1887 as a second lieutenant, rose gradually in rank until in 1897 he was commanding general at Naples. Having represented his father in several affairs of a diplomatic nature, he was well prepared, both as a statesman and as a soldier, to assume the crown on the assassination of his father. The king went into office with the full confidence of his subjects, and has shown himself to be an efficient ruler. In 1896 he married Princess Helena (1873), daughter of Prince Nicholas of Montenegro. From 1915 till Nov. 14, 1918 Victor Emmanuel remained in the war zone and did much to encourage his soldiers. For a time afterward the monarchy was not very popular, but the coming of the Fascist régime rather strengthened the position of the king. In 1929 the king ratified a Treaty with the Holy See and so ended the religious question.

VICTORIA, (1819–1901). Queen of Great Britain, daughter of Edward, Duke of Kent, fourth son of George III.; born at Kensington Palace; she ascended the throne (1837) and, in 1840, married Albert of Saxe-Coburg-Gotha. He died in 1861. Victoria received the title of empress of India by act of Parliament (1876). Her impartiality, unselfishness, and high sense of duty made her beloved by her subjects. She ruled longer than any previous English sovereign, while her reign was one of the most illustrious in the annals of any nation.

VIVIANI (*vē-vyȧ-ne'*), **RENE** (1863–1925). French orator and statesman, held many offices, including that of Minister of Labor, under Clemenceau in 1906, also continuing under Briand in 1910, Minister of Public Instruction, and after the Great War, Minister of Justice. He became Premier in 1914, being succeeded by Briand the next year. Best known for his efforts to prevent the Great War, and for his notable speeches, particularly one in 1914. Known for wealth and imagery and metaphor. After 1917 he took little part in public affairs, except as delegate to the Washington Conference in 1921–22.

VLADIMIR (*vlăd'ĭ-mĭr*) (c. 956–1015). Russian warrior and convert to Christianity after extending the boundaries of the kingdom and engaging in building heathen temples. He sent envoys to various nations in 987 to study the religious conditions, and the report of Christianity at Constantinople was so alluring that he agreed to be baptised. Basil II. gave him his sister Anna as queen in 988, after which Vladimir and many of his people embraced the new faith. Much of his subsequent life was spent in building churches and promoting peace.

WALES, PRINCE OF, EDWARD ALBERT (1894–). Entered the Royal Naval College at Dartmouth, England, in 1909. On his sixteenth birthday was proclaimed Prince of Wales, and in 1911 was presented to the Welsh people at Carnavon Castle. His course at Magdalen College, Oxford, which he began in 1912, was interrupted by the World War, in which he served in various capacities, with Sir John French in France, with the English forces in Egypt, in Italy, and last with the Canadian corps in France. In 1919, 1923, and 1924, he visited Canada, having a ranch in Alberta; in 1920 he visited New Zealand and Australia; and in 1925, South Africa.

WALPOLE, SIR ROBERT, FIRST EARL OF ORFORD (1676–1745). English statesman; born at Houghton in Norfolk; in 1708 he was made secretary of war; in 1710 treasurer of the navy; was paymaster of the forces (1714 and 1720); in 1715, chancellor of the exchequer, and first commissioner of the treasury. He was prime minister from 1715 to 1717, and from 1721 to 1742. Walpole hesitated at no method to advance his own policies and those of the Whigs.

WALSH, THOMAS JAMES (1859–1933). Senator from Montana since 1913, received a law degree from the University of Wisconsin in 1884, was principal of a high school, and then began the practice of law at Redfield, South Dakota. Since 1890 he has resided in Helena, Montana. From 1908 he has been a member of the Democratic national conventions, being on the committee on platform. In 1924 he rose to national prominence by his energetic prosecution of the cases involving the sale or lease of public lands to private companies.

WASHBURNE, ELIHU BENJAMIN (1816–1887). American politician; born at Livermore, Me.; studied law at Harvard, and was admitted to the bar (1840); removed to Galena, Ill., and sat in Congress (1853–1869), being chairman of the committee on commerce (1855–1865). His economical methods in government service won him the name of "Watch Dog of the Treasury." When Grant became president he was made secretary of state, shortly resigned to become minister to France, and returned to the United States (1877).

WASHINGTON, GEORGE (1732–1799). First president of the United States, the son of Augustine Washington, whose ancestors came from England. He was born in Westmoreland County on a plantation near the mouth of the Potomac River. After the meagre schooling the county afforded, he resided at Mount Vernon south of Washington with his brother Lawrence, taking employment in the Fairfax family as a surveyor in western Pennsylvania in 1748–50. The next year he entered the military service, was with Braddock in the disaster at Fort Duquesne in 1755, helping collect the remnant of the scattered troops routed by the Indians. For 15 years after 1759 he spent his time on the large Virginia estates, making Mount Vernon his home after the death of his half-brother in 1752. He increased the estates to more than 4,000 acres. Taking command of the colonial army at Cambridge, Mass., July 3, 1775, he pressed the campaigns to a close, and took leave of the army on Dec. 4, 1783. He acted as president of the Constitutional Convention in 1787, received the unanimous vote for president in 1789, was reëlected in 1793, but declined to be a candidate again in 1797. For two years he lived quietly on his plantation, though Congress again on July 3, 1798 commissioned him General of the armies in anticipation of a war with France which was averted. He died at Mount Vernon, Dec. 14, 1799. It was Congress that declared Washington "First in war, first in peace, and first in the hearts of his countrymen."

WEBSTER, DANIEL (1782–1852), American statesman, lawyer, and orator; born in Salisbury, N. H.; graduated from Dartmouth (1801); admitted to the bar (1805); in House of Representatives (1813–1816, 1823–1828); in Senate (1828–1841, and 1845–1850); made his famous reply to Hayne (1830); received nomination for the presidency (1836), but was defeated; defeated for the presidency by Taylor (1848); secretary of state (1850). In his reply to Hayne, probably the greatest speech made in Congress, Webster showed clearly the nature of the Union.

WENCESLAUS (*wen'sĕs-lăŭs*) (1361–1419). Holy Roman emperor (1378–1400) and king of Bohemia as Wenceslaus IV. (1378–1419). The son and successor of Charles IV. In 1393 he caused John of Nepomuk to be tortured to death for refusing to give up the secrets of the confessional. In 1394 he was arrested and imprisoned by a conspiracy of the nobles, but the German princes secured his release. In 1395 he sold the title of the duke of Milan to Visconti for 100,000 florins. The powerful archbishop of Mainz secured his deposition from the throne in 1400, Rupert of the Palatinate being chosen to succeed him. He still retained the throne of Bohemia. In 1402 his brother, Sigismund, imprisoned Wenceslaus in Vienna for fifteen months. Wenceslaus resigned in favor of his brother, Sigismund.

WHITE, ANDREW DICKSON (1832–1918). American diplomat; born at Homer, N. Y.; attaché of the United States legation at St. Petersburg during the Crimean War; professor of history and English literature, University of Michigan (1857–1863); lecturer on history (1863–1867); New York state senator (1863–1867); president of Cornell (1867–1885), to which he contributed $300,000 and his historical library of 40,000 volumes, founding a school of history and political science; Santo Domingo commissioner (1871); minister to the German Empire (1879–1881); minister to Russia (1892–1894); commissioner on Venezuela-Guiana boundary (1896); ambassador to Germany (1897–1903); chairman of American delegation to The Hague Peace Conference (1899).

WICKERSHAM, GEORGE WOODWARD (1858–1936). He was born in Pittsburgh, Pa., educated at Lehigh and the University of Pennsylvania, practiced for two years in Philadelphia and for many in New York City. He was attorney general in the cabinet of President Taft, a member of several boards and commissions, including those on codification of international law, on reorganization of New York state government, international justice and good will of the Council of Churches in America, president of the American Law Institute, and chairman of the Hoover committee on enforcement of laws in 1930.

WILHELMINA (*vil-hel-mē'nä*) (1880–). Queen of the Netherlands since 1890; only daughter of William III., king of the Netherlands (1849–1890), and Queen Emma, who was regent from the death of King William till the coronation of her daughter in 1898. Wilhelmina married Duke Henry of Mecklenburg-Schwerin, February 7, 1901; a daughter, Princess Juliana, was born April 29, 1909. Queen Wilhelmina's reign has been one of uninterrupted peace and prosperity.

WILLIAM I., THE CONQUEROR (about 1027–1087). King of England (1066–1087). He was the son of Robert II., Duke of Normandy. When his father set out on his pilgrimage to the Holy Land he caused William to be chosen to rule in his absence. On Robert's death in 1035 William became Duke of Normandy. His entire rule in Normandy was a succession of rebellions against him. In 1051 he visited Edward the Confessor in England and was probably promised the throne on the death of Edward. When Edward died in 1066 and Harold, Earl of Wessex, claimed the throne, William landed in Hastings with an army and gave battle to Harold at Senlac Hill. Harold was slain and the Normans were victorious. William then took the throne under the title of William I., the Conqueror. By 1070 the subjugation of England was well-nigh complete. In 1072 William invaded and conquered Scotland. He created the New Forest in 1076. He introduced the Curfew Bell, caused a survey of the whole country to be written out in the Domesday Book in 1085; parceled out the lands of the English to his followers, introduced the Feudal System, whereby the Duke had complete control over all of his subjects.

WILLIAM II., RUFUS (about 1056–1100). King of England (1087–1100). He was the third son of William the Conqueror, who named him as his successor in 1087. Lanfranc, Archbishop of Canterbury, was his guide, and as long as he lived, William's conduct and reign were satisfactory. On Lanfranc's death he began a rule which caused the English chronicle to record on his death that "he was loathsome to well-nigh all his people and abominable to God." He made war upon Scotland and its king did him homage. With his brother, Robert of Normandy, he made war upon his younger brother, Henry (afterward Henry I.), and drove him into exile. He gave Robert 10,000 marks for his kingdom in Normandy to enable him to join the Crusades. He was shot by an arrow from the bow of Sir Walter Tyrrel while hunting in the New Forest, and was buried at Winchester without ceremony.

WILLIAM III. or **WILLIAM HENRY OF NASSAU, PRINCE OF ORANGE** (1650–1702). King of England; born in The Hague, Holland; son of William II. of Orange. He was crowned king in February, 1689. The resistance of the adherents of James II. was broken in Ireland by the battle of the Boyne (1690). In 1691 William led the army in the Netherlands in person; took Namur (1692); signed the treaty of Ryswick (1697), and was acknowledged king of England; he was sole ruler after 1694, on which date Mary, who reigned jointly with him, died.

WILLIAM IV. (1765–1837). King of England (1830–1837). Third son of George III. and uncle of Queen Victoria, who succeeded him. The great event of his reign was the passage of the Reform Bill, which was passed by the House of Lords unwillingly by reason of the king's threat to create a sufficient number of new lords to secure its passage.

WILLIAM I. (1797–1888). King of Prussia and emperor of Germany; born at Berlin; son of Frederick William III. of Prussia. Took part in the campaign against Napoleon I. (1814–1815), and, on the accession of his brother, Frederick William IV., to the Prussian throne (1840), he became governor of Pomerania. His Absolutist attitude at the time of the revolution in Berlin (1848) made it necessary for him to seek refuge in England; but he soon returned, suppressed the revolutionary Badeners (1849), and in 1858 was appointed regent. This position he held until his brother's death in 1861, when he was crowned king of Prussia. In the war of 1866, which proved so humiliating to Austria, William took the field as commander in chief of the Prussian army; he also led the German forces in the war with the French (1870–1871), and received the capitulation of Paris January 28, 1871. His success led the German states to offer him the crown, which he accepted; he was proclaimed emperor at Versailles, January 18, 1871.

WILLIAM II. (1859–). German emperor and king of Prussia, the eldest son of Frederick William, afterwards Frederick III., was born in Berlin. His mother was Victoria of the royal family of Great Britain, but William never quite forgave her for not adapting herself throughout to German manners. After a thorough military training, he rose to the rank of colonel in the Hussars. On the death of his father in 1888, he became emperor, and two years later, Bismarck, the iron chancellor, who had long guided the minds of Germany, felt impelled to resign. William already had arrived at several positive policies: (1) a desire to be regarded as real head of the nation, a semi-absolute ruler at least; (2) the ambition to develop the colonies and increase trade throughout the entire world; (3) the training of an effective army and the building of a powerful navy, equal to that of any European nation; (4) the wish to get rid of growing democratic tendencies, which promised to undermine his power, and which eventually led to his downfall in 1918. He met opposition of England in Africa and the Far East, and France became growingly suspicious. In moments of exaltation he sometimes spoke rather too frankly to the grief of his ministers. Apparently he was forced into the World War, but took no decided stand at important crises. By midsummer 1918 it looked as if he might be forced to abdicate, but he appointed Max of Baden—a man of rather different ideals—as imperial chancellor. At last on Nov. 9, Prince Max proclaimed the end of the reign or at least a regency. Almost immediately a republican government was set up, and the other reigning kings and princes of the German empire also abdicated. William was a versatile man, interested in art, poetry, painting, and religion, but not thorough in his learning or in his ideas of government.

WILMOT, DAVID (1814–1868). American politician; born in Bethany, Pa. Remembered chiefly for the famous "Wilmot Proviso" (1846) declaring slavery unlawful in any territory acquired from Mexico. Although passed by the House, the Senate rejected the bill. Wilmot was admitted to the bar (1834); he was a Democrat and served his state, Pennsylvania, in the House (1844–1851) and in the Senate (1861–1863); supported the Republicans on the slavery issue.

WILSON, JAMES (1835–1920). American cabinet officer; born in Scotland; lived with his parents in Norwich, Conn. (1852–1855), then removed to Tama County, Iowa; member of the state assembly for three terms, during the last of which he was speaker; member of Congress (1873–1877 and 1883–1885); secretary of agriculture (1897–1913). His long tenure of the secretaryship of agriculture, 16 years, introduced many changes and new enterprises. Wilson favored everything practical to help the farmers and to conserve the natural resources of the country. Instruction in the state schools of agriculture was strengthened, a system of crop and soil surveys was instituted, and reports were sent to every corner of the nation.

WILSON, WOODROW (1856–1924). Both by temperament and by training a deep student of national and international affairs, came to the presidency of the United States with fixed views of national and foreign affairs. His father, the Reverend James Wilson, and his mother, Jessie Woodrow, were of good old Scotch-Irish and English stocks. After their marriage in Ohio, and a sojourn of two years in Western Pennsylvania they moved to Virginia, where Woodrow was born, then went to Augusta, Georgia, where he was educated at home and by private tutors. After an academic course at Davidson College and Princeton, ending in 1879, Wilson studied law in the University of Virginia and practiced for about a year in Atlanta, Georgia. Turning to political science as his life work, he took a doctorate at Johns Hopkins, where he acted as instructor, after which time he served as an associate professor of history and politics at Bryn Mawr and professor at Wesleyan University. He was called at Princeton in 1890, remaining till

he assumed the governorship of New Jersey in 1911,—first, as professor of jurisprudence and political science, and then as president from 19^2 to the fall of 1910. Though serving as a Democrat in a Republican stronghold, he was enabled to initiate a number of important changes in the acts relating to primaries, public service commissions, trusts, and administration of public institutions in New Jersey. Thus the natural candidate of his party for the presidency he defeated Taft and Roosevelt in a three-cornered contest. In spite of more or less opposition, his ideals and high sense of duty won Wilson many friends. He based his claim for a second term on his policy of "watchful waiting" as regards Mexico, his views of international obligations, and his holding aloof from the World War, despite a vigorous insistence that America throw off the mask of neutrality. The return of Germany to submarine warfare on a large scale, and other acts, led president Wilson to ask congress to declare war on April 2, 1917. Hereafter he gave himself unstintedly to the prosecution of the war and to the advocacy of the League of Nations. After securing the recognition of his principles in the Versailles Conference, which he attended in person, Wilson returned to America, began a speaking tour, but was stricken in September, 1920. From this time on, he was forced into virtual retirement from all public appearances. After leaving office in 1921, he returned to private life, dying February 3, 1924, in Washington, D. C. President Wilson was twice married, first to Ellen Louise Axton, 1885, who died in the White House in 1914, and then to Mrs. Edith Bolling Galt, who survived him. He left three daughters, all children of the first Mrs. Wilson.

WINGATE, FRANCIS REGINALD (1861–). British colonial administrator, was educated in the Royal Military Academy at Woolwich, served in India (1881–83), in the Gordon relief expedition (1884–85), and in various enterprises in Africa, in December 1899 succeeded Kitchener as governor of the Sudan, and in 1916 became high commissioner to Egypt, remaining in this post till 1919. He was made a baronet in 1920.

WINTHROP, JOHN (1588–1649). First colonial governor of Massachusetts; born at Edwardston, Suffolk, England. In 1630 he left England for America, being among the first Salem colonists; was made governor of the colony and held that position almost continuously till his death. He kept an elaborate journal covering the whole period of his life in Massachusetts, which is of inestimable value.

WIRTH (*vĭrt*), **KARL JOSEPH** (1879–). German statesman, member of the Baden diet in 1913, of the Reichstag in 1914, minister of finance (1919–22), and chancellor (1921–22). At the time of his resignation in November 1922, the value of the mark fell to a low level of 9,000 to the dollar, and Dr. Cuno was called upon to form a cabinet to restore the mark to something like its former level.

WITTE (*vĭt'ĕ*), **SERGEI YULIEVITCH** (1849–1915). Russian statesman; minister of communications (1892) and, soon after, minister of finance until 1903. As such he promoted manufacturers, favored protection, introduced the gold standard, and government monopoly of alcholol. He increased the revenues and negotiated large loans; was appointed president of the Committee of Ministers (1903) and a member of the Council of the Empire; negotiated the Treaty of Portsmouth, N. H., with Japan; took an active part in the Duma; regarded as one of Russia's greatest statesmen.

WOLSEY (*wo͝ol'zĭ*), **THOMAS** (1475–1530). "The Great Cardinal." Graduate of Magdalen College, Oxford (1490); ordained priest (1498); royal chaplain to Henry VII. and special ambassador in important missions; royal almoner to Henry VIII.; member of Privy Council (1511), the practical ruler of England; bishop of Lincoln (1514); archbishop of York (1514); cardinal (1515) and lord warden. Arrogant and imperious, he opposed the king; was charged with high treason but died before his trial.

WORK, HUBERT (1860–). Before entering public life, he was a physician in Greeley, and then in Pueblo, Colorado, where he founded Woodcroft Hospital. He was first assistant postmaster general, 1921–22, postmaster general, 1922–23, and secretary of the interior, 1923–28. Work held several offices in the Republican Party, becoming chairman of the National Committee in 1928.

WU TING FANG (*wŏ tĭng fäng'*) (1842–1922 Chinese diplomatist, who was born in the district Kwangtung, China, educated in Canton, and in la in England (1874–1877). After serving on the sta of Li Hung Chang, he helped negotiate the treaty peace for China after the war with Japan, and acted as vice-president of the war board and aided the construction of railways. He represented Chi in the United States, Spain, and Peru from 1897 1902, and again in the United States, 1907. In 191 he was appointed minister of foreign affairs for Chin

XERXES (*zûrk'sēz*). King of Persia, calle Ahazuerus in the story of *Esther* in the Bible, wh ruled from 485–465 B. C. Son of Darius I. Afte subduing the revolted Egyptians he spent three yea in preparing an attack upon the Greeks. With a army estimated at one million he marched from Sard for the Hellespont in the spring of 480 B. C. He ha also a fleet of 1,200 ships. Successful at Thermopyla he was overwhelmed first at Salamis and then Plataea. He fled from Greece and attacked Babylo on the way home, razing the temples of the city Murdered with his eldest son, Darius, by Artabanus captain of the guard.

YOSHIHITO (*yō-shē-hē'tō*) (1879–1926), 122d em peror of Japan and third son of Emperor Meiji. Edu cated in school of princes. Married Sakada, the fourt daughter of Prince Michitaka, in 1900. Their elde son, Hirohito, now emperor of Japan, was born i 1901. Ruled actively from 1912 to 1921, being su ceeded virtually by his son as regent because Goshihito's ill health, which ended in his death i December, 1926. Reign known as "Era of Grea Righteousness."

YOUNG, OWEN D. (1874–), capitalist an public servant, has been prominent in the Genera Electric, Radio Corporation, Federal Reserve Bank General Motors and other companies. Served on nu merous commissions, including the Industrial Confe ence Board, Expert on Reparations from the Centra Powers, Conference on Unemployment, and Genera Education Board. See DICTIONARY OF FINANCIER

YUAN SHIH-KAI (*yū-än' shē-kī'*) (1859–1916) First president of the Chinese republic. When twenty three years old went to Korea as a minor secretary imperial resident of the Korean court (1885–1894) when he took part in the Chino-Japanese war; judicia commissioner of Chihli (1897); governor of Shantun during the Boxer rebellion, and afforded protection t foreigners; victory of Chihli (1901), and during hi tenure of office laid the foundation of China's moder army; grand councilor (1897), and prominent in go ernment at the death of the emperor and the dowager dismissed by the regent (1909) and soon after took th field as military dictator; after breaking out of rebe lion recalled and made premier, Nov. 8, 1911; Feb. 1 1912, asked to organize a provisional republican go ernment; two days later made provisional presider for 10 months; elected president for five years (1913) the newly elected parliament being impractical an stubborn, Yuan finally dissolved it, and was virtuall dictator. When the elections (Nov., 1915) seeme to favor a return to monarchy and the crown wa offered to Yuan, he finally accepted it. Later, findin the people averse to monarchy so numerous, he with drew his acceptance. A remarkably able statesma

ZAIMIS (*zä'ē-mēs*), **ALEXANDER** (1855–1936) Greek statesman, seven times premier (1897–99, 1901 02, 1915, 1916, 1917, 1926, 1927). From 1906 1911 he was high commissioner of the Powers i Crete. In 1913–15, and twice afterward between pr mierships, he was governor of the National Bank. I 1922, after the second abdication of Constantine, h refused to be premier, but again accepted the office i the group of three ex-premiers and two Royalists i 1926, continuing in 1927 and 1928 in coalition cab nets that succeeded. Though not naturally incline to political life, he accepted office at various critic times because of a sense of duty.

ZENOBIA. Queen of Palmyra from 266 or 267 272, when she was overthrown by the Roman empero Aurelian. She was the wife of Odaenathus until h death, and then made conquests in Egypt, Asia Mino and as far west as Chalcedon opposite Byzantiu When she and her son began to remove the head of th emperor from Roman coins used in Egypt, Aurelia suspected her professed friendship for Rome. In th war which ensued, Zenobia was defeated finally Palmyra, where she had been driven from the wes and for the rest of her life lived near Rome.

DICTIONARY OF SCIENTISTS

Including Modern Explorers and Aviators.

ABBE (*ab'ē*), **CLEVELAND** (1838–1916). Called the father of the U. S. weather bureau. Directed the Cincinnati Observatory (1869–73) and weather forecasts for the U. S. Signal Corps (1870–91), and was senior professor of meteorology in the service after 1891. He introduced the system of standard time now used and placed weather forecasting on a scientific basis.

ABBOTT, CHARLES GREELEY (1872–). Authority on solar research, a graduate of Massachusetts Institute of Technology, and connected with the Smithsonian Institution from 1895, acting as director from 1907. Observed total eclipses, studied spectra, and with others proved the variability of the sun. He won the Draper medal (1910), and the Rumford medal (1916) for his discoveries.

ABEL, JOHN JACOB (1857–1938). Professor at Johns Hopkins, educated at the University of Michigan and abroad, and discovered the constituent part of the suprarenal glands which causes high blood pressure. He also investigated the effects of certain chemical and vegetable poisons on animal tissues and fluids. Won the Willard Gibbs medal for his researches in 1927.

ABRUZZI (*ä-brŭ'sē*), **DUKE OF THE** (1873–1933). Italian explorer who first ascended Mt. St. Elias in Alaska (1897), the Ruwenzori in Africa (1906), peak K2 of the Himalayas (1909), and attained 86° 3′, the point farthest north at the time (1899). During the World War he acted for a time as vice-admiral of the fleet in the Adriatic.

ACHARD (*ähk-ärt*), **FRANZ KARL** (1753–1821). A Prussian chemist who first made sugar from beets in quantity on his estate at Kunern, discovered a way of refining platinum, established a school of chemical research, and published numerous works on science.

ADAMS, JOHN COUCH (1819–1892). A British astronomer, educated at Cambridge, became a professor there and finally director of the Observatory. By astute mathematical calculation he discovered the planet Neptune, which causes certain variations in the motion of Uranus long recognized but until then unexplained. The French scientist Leverrier, working independently, arrived at similar results. Adams also explained certain perturbations of other heavenly bodies and made important researches in magnetism.

AGASSIZ (*ăg'ä-sĭ*), **ALEXANDER** (1835–1910). American naturalist and capitalist, only son of Louis. With his knowledge of geology and engineering he developed the Calumet and Hecla copper mines, south of Lake Superior, bringing him great wealth, which he has devoted to zoölogical research, donating over one million dollars to endowment of the Harvard Museum of Comparative Zoölogy; author of several zoölogical works, mostly on deep sea animals. Interesting books of his are *Seaside Studies in Natural History and Marine Animals of Massachusetts Bay.*

AGASSIZ, LOUIS (1807–1873). Distinguished Swiss-American naturalist; born in Switzerland; studied under Cuvier at Paris; professor of natural history at Harvard (1848–1873); preëminently a teacher of great force, clearness, and enthusiasm, whose lectures, everywhere in demand, were the inspiration of a new era in American biological research; founded the Harvard Museum of Comparative Zoölogy (1858); author of important zoölogical works such as *History of Fresh Water Fishes of Central Europe* and *Contributions to the Natural History of the United States.* As a teacher he relied more on stimulating careful observation than on the use of books or lectures. His favorite saying was "The book of nature is always open."

AIRY, GEORGE BIDDELL (1801–1892). British astronomer, director of the Cambridge Observatory, who calculated the mean density of the earth through experiments in mines and found a new inequality in the motions of Venus and the earth, from which some improvement was made in solar tables. He was astronomer royal from 1835 to 1881.

AMPERE (*ăn-pāyr'*), **ANDRE MARIE** (1775–1836). Distinguished French physicist who for years was professor of mathematics in the École Polytechnique of Paris and who demonstrated the relation between electricity and magnetism. His name is now given to the unit of measure of an electric current.

AMUNDSEN (*ä'mŭnd-sĕn*), **ROALD** (1872–1928). The first man to behold the regions of both the North and South Poles, was born in Norway and educated at Oslo. From his youth determined to explore the frozen zones. At 25 joined the *Belgica* antarctic expedition; went north in 1901 and 1903, and in 1906 located the north magnetic pole and the northwest passage; in 1910 led the Norwegian expedition which reached and crossed the South Pole in 1911; 1918–21, sought northeast passage; in 1925 with Lincoln Ellsworth got by airplane to 87° 44′ North; and with Ellsworth and Umberto Nobile floated in the dirigible *Norge* across the Pole to Teller, Alaska, in 71 hours in May, 1926; on June 18, 1928, set out with Rene Guilbaud and four companions in attempt to rescue the Nobile party after the wreck on May 24 of the *Italia* north of Spitzbergen. After wireless communication ceased at 7 that evening, Amundsen was never heard from. Probably his Latham plane broke from weight of ice on the wings. Thus perished in a last heroism Roald Amundsen, "the greatest polar explorer of all time." In 1927 he published *My Life as an Explorer.*

ANAXIMANDER (*ă-năk-sĭ-măn'dĕr*) (611–c. 547 B. C.). A Greek scientist and philosopher, who showed that the ecliptic is oblique, introduced the sundial into Greece, and some claim made the first map. He taught that all things came from an indestructible substance from which a fiery mass arose enclosing the rings of the sun, moon, and stars, with earth in the center.

ANDREWS, ROY CHAPMAN (1884–). American naturalist, explorer, and author, a graduate of Beloit College, and connected with the American Museum of Natural History in New York City from 1906. After assisting in several expeditions to the Far East and Alaska and specializing in the study of water mammals, he devoted himself to explorations in Asia. His party discovered in Mongolia extensive fossil deposits, new formations, and the first fossil dinosaur eggs known to man, together with other evidence of primitive animal life in Asia. Author of *Whale Hunting, Across Mongolian Plains, and On the Trail of Ancient Man* (1927).

APOLLONIUS OF PERGA (b. c. 260 B. C.). One of the great geometers of antiquity along with Achimedes and Euclid (q. v.). He left an important book on conics, and names of other works, now lost, have come down to us. Apollonius belonged to the great Alexandrian school of learned men.

ARCHIMEDES (*ar-ki-mee'dees*). See in DICTIONARY OF INVENTORS.

ARCHYTAS (c. 428–347 B. C.). A famous Greek philosopher, mathematician, general, and statesman; regarded as the founder of scientific mechanics; distinguished harmonical progression, doubled the cube, invented the pulley, and taught that the earth is a sphere rotating on its axis in 24 hours.

ARISTARCHUS (fl. about 275 B. C.). First to assert that the earth revolves around the sun, and to add to the supposed length of the solar year (365 days) a part of day.

ARISTOTLE. See under DICTIONARY OF PHILOSOPHERS.

ARRHENIUS (*ăr-rā'nĭ-ŭs*), **SVANTE AUGUST** (1859–1927). One of the founders of modern physical chemistry. His thesis at Uppsala in 1884, marked by the examiners lowest in the passing scale for the doctorate, was awarded the Nobel prize in 1903. His work laid the basis for all recent theories of conductivity of solutions. For many years he was a professor at Stockholm, and in 1905 was made head of the Nobel Institute there.

ARTEDI (*ăr-tā'dē*), **PETER** (1705–1735). Swedish naturalist; friend of Linnaeus; author of an important work on fishes, which Cuvier says is the first attempt at a truly scientific classification.

ATWATER, WILBUR OLIN (1844–1907). An American chemist; a leader in the investigation of problems of nutrition; originated methods of experimentation now widely adopted; constructed a respiration calorimeter, and other physiological apparatus. Professor at Wesleyan University, Middletown, Conn., for many years.

ATWOOD, GEORGE (1746–1807). See under DICTIONARY OF INVENTORS.

AUDUBON (*â'dū-bŏn*), **JOHN JAMES** (1785–1851). An American naturalist, born in Haiti, but lived most of his life in the United States, with long professional visits in Europe. He studied and illustrated birds in their native haunts in his *Birds of America*, an important portfolio of 435 hand-colored plates, showing over 1,000 life-size pictures of 489 distinct species. Later he was assisted by his sons, John and Victor, and finally in *The Viviparous Quadrupeds of America* by Rev. John Bachman, father-in-law of both his sons.

AVEBURY, LORD. See LUBBOCK, JOHN.

AVOGADRO (*ä-vō-gä'drō*), **AMADEO** (1776–1856). An Italian physicist; celebrated for first formulating the fundamental principle of chemistry known as Avogadro's Law of the Atomic Theory, in 1811. His law states that equal volumes of gases at the same temperature and pressure contain the same number of molecules. This law is important in fixing the atomic weights of chemical substances.

BABBAGE, CHARLES (1792–1871). An English mathematician noted for his table of logarithms and over 80 other writings.

BACON, FRANCIS (BARON VERULAM) (1561–1626). A celebrated English philosopher. He was the first of his time to make the method of induction the object of investigation, and began the reform of existing sciences and the harmonizing of all knowledge. By his *Essays*, *Advancement of Learning*, and *Novum Organum*, he directed the attention of learned men to the reform of school methods. He exerted a wonderful influence on the scientific thought and teaching of the European scholars who succeeded him. See INDEX for mention in other sections.

BACON, ROGER (1214–1294). An English monk and philosopher; born at Ilchester, Eng. In his *Opus Majus*, an encyclopedia of all sciences, grammar, logic, mathematics, physics and moral philosophy, he shows the need of different methods of study in language and nature. He made remarkable chemical discoveries, invented the magnifying glass, and rectified the calendar.

BAER (*bär*), **KARL ERNST VON** (1792–1876). A German biologist who made important discoveries concerning pre-natal development of man and animals. His works on *History of Development* and *Development of Fishes* have had a wide influence on subsequent theories. Baer could not accept the theories of Darwin and Wallace.

BAFFIN, WILLIAM (1584–1622). English navigator who in 1615 made important observations and discoveries in an attempt to find a Northwest passage. He discovered the large bay that now bears his name, and from 1616 for 236 years no navigator sailed farther north than he, to about 77° 45′. Baffin apparently was the first to show how to take the longitude at sea by lunar observation.

BAILEY, LIBERTY HYDE (1858–). American horticulturist, professor at Cornell University from 1888 to 1913, who made important researches in sedges, blackberries and other fruit, palm trees of this hemisphere, and in rural economics. Edited *The Standard Cyclopedia of Horticulture*.

BAILEY, SOLON IRVING (1854–1931). Harvard University professor who established highest meteorological station in the world at 19,000 feet at El Misti, Peru, where important observations were secured. He was in charge also of the station at Arequippa, Peru, and made investigations in South Africa.

BAILLY (*bä'yē*), **JEAN SYLVAIN** (1736–1793). A French astronomer and orator, who calculated the orbit of Halley's comet and made notable observations of the satellites of Jupiter. At the outbreak of the French Revolution, he was mayor of Paris, retired to Nancy in hiding, but made a visit to Laplace, the French astronomer at Melun, was discovered there, arrested, and executed. See DICTIONARY OF RULERS AND STATESMEN.

BAINBRIDGE, WILLIAM SEAMAN (1870–) An American physician and professor in the New Yor Polyclinic Hospital, who made important investig tions of cancer, and goiter, and developed new metho in abdominal surgery. Consulting physician to man hospitals and for the United States during the Worl War.

BAIRD, SPENSER FULLERTON (1823–1887) Eminent American naturalist, who made an extensiv study of the vertebrates of North America, and wa connected with the Smithsonian Institution of Wash ington from 1850 to his death. His studies of birds reptiles, and mammals were unsurpassed in his ger eration. As head of the U. S. fish commission he de veloped a method of fish culture which has bee widely copied in foreign lands. Baird's writings con prise 13 large folio volumes.

BAKER, S. JOSEPHINE (1873–). America physician and authority on public health, educate at Bellevue Medical College, New York. Under gov ernment auspices she established the first bureau c child hygiene in New York City, which resulted i establishing the lowest baby death rate for large citie in the United States or Europe.

BALFOUR, FRANCIS MAITLAND (1851–1882) A British naturalist and author. He took a leadin part in upbuilding the study of natural science a Cambridge, England, where in 1876 he was appointe lecturer of animal morphology. He received a gol medal from the Royal Society for his discoveries which are embodied in his *Comparative Embryology* remarkable for profound learning and clear stat ment. Perished in attempting to scale a part of Mon Blanc.

BALL, SIR ROBERT STAWELL (1840–1909) English astronomer. He embodied his observations i many popular works on astronomy; in recognition o his ability was appointed to many posts of honor, chie among them being astronomer royal of Ireland.

BALLOU (*bâ-lō'*), **WILLIAM HOSEA.** See unde EDUCATORS.

BANKS, EDGAR JAMES (1866–). America naturalist, educated at Amherst, Harvard, and th University of Breslau. For the University of Chicag he excavated the old city of Bismya in Babylonia, di covering thousands of objects dating from 4500 t 2800 B. C., including the statue of David, an earl Babylonian king, said to be the oldest of its kind i the world.

BANKS, SIR JOSEPH (1743–1820). An Englis naturalist, who was with the first Cook expeditio to study the transit of Venus in the Pacific, havin fitted out a ship at his personal expense. Being un able to attempt the second voyage, he turned his a tention to Iceland (1772) and discovered the gre geysers there. On a previous expedition to Labrad (1766) he collected a large number of plants and i sects.

BANTING, FREDERICK GRANT (1891–1941). Canadian physician, who was born at Allison, Ont and educated at the University of Toronto. Enliste in the ambulance corps in 1914, and was discharge because of wounds received at Cambrai. In 192 settled at London, Ont., as a practicing physician an demonstrator of anatomy at Western University. A the age of 30 he discovered insulin in the laborato of Prof. J. J. McLeod at Toronto, with the assistan of Dr. C. H. Best and with some help also from D J. J. Collip. This remedy, refined from an extract the pancreas of sheep, is used in diabetes, allowin sufferers to live for years in comfort. Banting w awarded the Nobel prize in medicine, which he share with his colleagues. He was Banting-Best Profess at the University of Toronto.

BARANY, ROBERT (1876–1936). Austrian sp cialist in diseases of the ear and of the brain, wh worked out a system of diagnosis of deafness. I 1914 he was awarded the Nobel Prize for medicine b cause of his study of internal surgery.

BARKLA, CHARLES GLOVER (1877– British professor of physics in succession at Liverpo King's College, London, and Edinburgh. He sp cialized in the study of X-rays and electrical ph nomena, and in 1917 won the Nobel prize for physi

BARNARD, EDWARD EMERSON (1857–1923 An American astronomer; was astronomer in Li Observatory, California, in 1887–1895; became pr fessor of astronomy in Chicago University and direct of the Yerkes Observatory. His principal discover

are the fifth satellite of Jupiter in 1892, and 16 comets, and the star having the greatest discovered motion. He was also associate editor of the *Astronomical Journal*.

BARTLETT, ROBERT ABRAM (1875–). An explorer, who was born in Newfoundland; was associated with R. E. Peary as commander of the *Roosevelt*, 1905–09; as captain of the *Karluk*, crushed in the ice in 1914, and succeeded finally in bringing 13 of the 15 survivors to Nome, Alaska; and commanded the third Croker Land expedition in 1915; and subsequently engaged in various exploring voyages. Awarded various medals and honors for heroism. Wrote *Last Voyage of the Karluk* and *The Log of Bob Bartlett*.

BATES, HENRY WALTER (1825–1892). English naturalist and explorer of Orinoco River region in South America, where he collected at least 8,000 specimens of insects unknown before to science. He remained in the tropics 11 years, wrote *The Naturalist on the Amazon*, a delightful book, and explained the protective "mimicry" whereby animals take on the colors of their surroundings and so succeed in hiding. He also made a valuable collection of coleoptera.

BATESON, WILLIAM (1861–1926). A British authority on the determination of sex in animals. He taught at Cambridge, the Royal Institution, and lectured at Yale. The Royal Society conferred the Darwin medal on him in 1904. Bateson's chief books are *Mendel's Principles of Heredity* and *Problems of Genetics*.

BAYLISS, WILLIAM MADDOCK (1866–1924). Eminent British physiologist, who spent 35 years in the exclusive study of science. With Starling he discovered the secretion or harmone which affects the pancreas and helps in the digestive process; studied infected wounds during the World War, and saved scores of lives.

BECQUEREL (*běk'rĕl*), **ANTOINE CESAR** (1788–1878). A French chemist, noted for his researches in biochemistry and electro-chemistry. He invented a process of electrotyping. From 1837 to 1878 he was a professor at the Museum of Natural History in Paris. His son, Alexander Edmond (1820–1891), investigated light, phosphorescence, and perfected an apparatus for the study of the effects of light by prolonging the interval between the exposure to the source and the effect of the light itself. A grandson, Antoine Henri (1852–1908), was codiscoverer with the Curies of radioactivity, and for this in 1903 shared the Nobel prize with Prof. Pierre Curie.

BEEBE, WILLIAM (1877–). An American naturalist, born in Brooklyn, educated at Columbia, and honorary curator of birds in the New York Zoölogical Garden. He brought the collection up to 900 species. On various expeditions he also collected rare marine animals and plants. For his *Pheasants* he was awarded the Elliott Medal, and his other picturesque works were widely read, including his *Jungle Peace, Galapagos*, and *The Arcturus Adventure*.

BEHRING (*bā'rĭng*), **EMIL VON** (1854–1917). A German bacteriologist, the "father of immunology." With a Japanese assistant, Kitasato, he proved in 1890 that an animal could be made immune to tetanus if it was innoculated with blood serum from one having the disease. He continued his research by proving the same in regard to diphtheria in 1891, and in 1892 the antitoxin for this came on the market in Berlin.

BERNOULLI (*bĕr'nōō-yē'*), **DANIEL** (1700–1782). Of a celebrated Swiss family of mathematicians, professor at St. Petersburg, and at Basle. His specialty was hydrodynamics, on which he wrote a book, and studied velocities of various liquids, the problems of propelling vessels, the measurement of time at sea, and the vibration of cords. His uncle, Jacques Bernoulli (1654–1705), determined the "elastic curve," or that of a plate with a weight applied to one end while the other remains fixed, the catenary or curve of a chain suspended at both ends. Jean Bernoulli (1667–1748), another uncle of Daniel, discovered the exponential calculus and the line of most rapid descent, with certain practical applications.

BERTHELOT (*bĕrt-lō'*), **PIERRE EUGENE MARCELLIN** (1827–1907). A French chemist. In 1878 he became president of the committee on explosives which introduced smokeless powder. His labors also led to the discovery of dyes extracted from coal tar.

BERTHOLLET (*bĕr'tō-lā*), **COUNT CLAUDE LOUIS** (1748–1822). A famous French chemist, native of Savoy, to whom we owe the discovery of the bleaching properties of chlorin, the remarkable salt called chlorate of potash, and many improvements in the manufactures. He demonstrated that ammonia is a compound of hydrogen and nitrogen.

BERTILLON (*bĕr-tē-yôn'*), **ALPHONSE** (1853–1914). A French scientist who perfected a system of identification by means of bodily measurements or anthropometry. The Bertillon system has been widely used in America by police officers.

BERZE'LIUS, JOHAN JAKOB, BARON (1779–1848). A celebrated Swedish chemist, one of the creators of modern chemistry; instituted the chemical notation by symbols based on the notion of equivalents; discovered selenium, thorium, and coerium; and shared with Davy the honor of propounding the electro-chemical theory.

BESSEL, FRIEDRICH WILHELM (1784–1846). A German astronomer who perfected many measurements in science, including the length of the pendulum, all stars up to the ninth magnitude in a certain area (—15° to +45° dec.), and the ellipticity of the earth. Modern methods of precise measurements were first attempted by him. He directed the Königsberg observatory from 1813 till his death.

BINET (*bē'nā*), **ALFRED** (1857–1911). A French psychologist and mathematician, studied law and medicine, but soon abandoned thought of either as a profession. Binet may be called the father of the measuring scales to determine intelligence. For many years he worked to devise a series of tests, eventually leading to the celebrated Binet-Simon group, finally perfected in 1909. Altogether more than 90 tests of this nature have been devised in Europe and America since the pioneer work of Binet. He also made studies in hypnotism, fatigue of the brain, and abnormal states of mind.

BLACKWELL, ELIZABETH (1821–1910). She was born in England, came to America in 1832, applied for admission to various medical schools, but was refused by all save the Medical College at Geneva, N. Y., from which she was graduated as a doctor in 1849. After additional study abroad, she founded a medical college staffed by women in New York, and later settled in general practice in England. She was also the first recognized woman M. D. in England.

BLAKE, FRANCIS G. (1887–). Professor of medicine, served on the staffs of various hospitals, after receiving an arts degree at Dartmouth and a medical degree at Harvard. Active war service, 1918–1919. Professor at Yale since 1921. Author of *Studies on Experimental Pneumonia, Studies on Measles, Treatment of Scarlet Fever with Anti-toxin*.

BLUE, RUPERT (1867–). A distinguished American sanitarian, who served in epidemics of bubonic plague in San Francisco (1903–04, 1906–07), yellow fever in New Orleans (1905), and as adviser for the United States in Europe during and since the World War. Chief of the U. S. Health Service, as surgeon-general (1912–20).

BLUMENBACH, JOHANN FRIEDRICH (1752–1840). A German naturalist and founder of the science of anthropology. He advocated the theory of the unity of the human species, which he divided into the five types—Caucasian, Mongolian, Negro, American, and Malay. He published a valuable study of 50 human crania.

BOAS, FRANZ (1858–). American anthropologist of German birth, a professor in several American institutions, and curator of ethnology (1901–05) in the American Museum of Natural History of New York. As a member of the Jesup expedition to the Pacific northwest he discovered important relationships between the culture and people there and those of north Asiatic regions. *Baffin Land, The Central Eskimo, Tsimshian Texts* are among his published works.

BODE, JOHANN ELERT (1747–1826). A German astronomer, who founded and issued 51 yearly volumes of the *Astronomical Year-books*, was a director of the Berlin Observatory from 1786 to 1825, and made 20 star maps, with a catalogue of over 17,000 stars and nebulae, the greatest number listed to that time. He revised and perfected an old theory of the relative distances of planets from the earth.

BOHR (*bōr*), **NIELS** (1885–). A Danish physicist, educated at Copenhagen and in the laboratories in England under J. J. Thomson and Sir Ernest Rutherford, and in 1920 became head of an institute

for theoretical physics at Copenhagen. He did brilliant work in explaining the nature of the stationary and active states of the atom, which had a definite effect on the explanation of X-ray and other phenomena and led to the discovery by others of the element hafnium. In 1922 he was awarded the Nobel prize for physics, in 1921 the Hughes medal of the Royal Society, of which he became a foreign member in 1926.

BORDET, JULES (1870–). A Belgian physiologist, who did important work in distinguishing microbes through sera, and developed a method for diagnosis of fevers, now widely used in locating typhoid, plague, tuberculosis, and other diseases of germ nature. He also discovered the microbe of whooping cough and showed how coagulin is made up of two parts or elements. He published a treatise on immunity acquired through infectious diseases. In 1919 he received the Nobel prize, and was made a professor at the University of Brussels.

BOYLE, ROBERT (1627–1691). A British natural philosopher; devoted his life and contributed greatly to science, especially chemistry and physics, formulating a law of physics known as Boyle's Law. This states that the volume of a gas varies inversely according to or as the pressure. Boyle also made important researches into the nature of gold and silver, the function of the air in the diffusion of sound, the expansive force of freezing water, and various problems of hydrostatics. He also zealously studied chemistry. He left money for lectures in defense of Christianity against false doctrines.

BRADLEY, JAMES (1693–1762). English astronomer, who by developing larger and improved instruments, such as an 8-ft. quadrant, led to modern scientific observations of the heavens. He explained the aberration of light, learned that the inclination of the earth's axis to the ecliptic is not constant, and so explained the precession of the equinoxes. In 1742 he succeeded Edmund Halley as astronomer royal.

BRAGG, WILLIAM HENRY (1862–). British physicist who advanced our knowledge of radio-active substances, and with his son, William Lawrence Bragg (1890–), did much to explain the arrangement of atoms and crystals by use of the X-ray spectrometer, their own invention. Jointly they won the Nobel prize in 1915.

BRAHE (*brä*h), **TYCHO** (1546–1601). A Danish astronomer; discovered a new star in Cassiopeia and the variations of the moon. He also corrected many of the earlier tables and observations. For 21 years he worked in a magnificent observatory on the island of Hveen granted him by the king of Denmark, but later he transferred his instruments to Prague where he enjoyed the patronage of Rudolph II. of Bavaria. Kepler (q. v.) coöperated with him in 1600.

BRAUN (*broun*), **ALEXANDER** (1805–1877). German botanist who made important discoveries concerning the morphology of planets and was long a foremost teacher at Freiburg, Giessen, and Berlin. He was a brother-in-law of Louis Agassiz, the celebrated Swiss-American naturalist.

BRESTED, JAMES HENRY (1865–1935). An American orientalist who occupied a chair at the University of Chicago, and in 1919 established on scientific lines a laboratory for the study of ancient civilizations. He directed several expeditions into Asia Minor and Egypt, translated some ancient inscriptions, and wrote extensively of the early life of man in the Orient.

BREWSTER, SIR DAVID (1781–1868). An eminent Scottish natural philosopher; especially distinguished for his discoveries in light, his studies in optics, and for his optical inventions, such as the kaleidoscope and the sterescope. He was one of the founders of the British Association for the Advancement of Science and was elected one of eight foreign members of the French Institute in succession to Berzelius.

BRIGGS, HENRY (1556–1630). English mathematician, who with the sanction of Napier changed the scale of logarithms so that unity was assumed to be the logarithm of the ratio of ten to one. This decimal arrangement now continues to be the one in general use. He spent many years compiling and making new tables, all of which were printed in his *Trigonometria Britannica* in 1633.

BRIGHT, RICHARD (1789–1858). A physician of Guy's Hospital, London, who discovered that certain diseased conditions of the kidneys are present in cases of dropsy. These are named Bright's disease. Bright also made important studies in tumors of the abdomin region, diseased arteries of the brain, and troubl in the central nervous system.

BRITTON, NATHANIEL LORD (1859–1934) American botanist, professor at Columbia Universit and Director of the New York Botanical Garden. H was one of the leading botanists of America, speciali ing in the flora of North America, the West Indie Paraguay, and Bolivia. With others he compiled th monumental *Illustrated Flora of the Northern Unite States and Canada, The Bahama Flora,* and *Nort American Flora.*

BROOKS, WILLIAM KEITH (1848–1908). Amer can zoölogist; born at Cleveland, Ohio; professor o zoölogy, Johns Hopkins University (1876–1908). H specialized in the study of marine animals, especiall the tunicates, crustaceans, and oysters, and hi theories profoundly influenced the investigation i biology of his age.

BROWN, ROBERT (1773–1858). A Scotch bota nist in 1801 appointed naturalist to Flinders's sur veying expedition to Australia; returned with nearl 4,000 species of plants. His great work did muc to encourage the adoption of the natural classificatio of plants according to Jussieu.

BRUCE, JAMES (1730–1794). Scottish explore and discoverer of the source of the Blue Nile, whic he thought the river known to the ancients, thoug it is smaller than the White Nile. While British con sul in Algiers he studied the ruins of that land, an later explored those at Palmyra, Baalbek, and Thebes His voluminous work, liberally illustrated, is calle *Travels to Discover the Source of the Nile in the Year 1768–73.*

BUCKLAND, FRANCIS TREVELYAN (1826–1880). An English naturalist; an authority on fis culture and an uncompromising opponent of Darwin ism. Among his books are *Fish Hatching, Curiosities of Natural History, Natural History of British Fishes.*

BUDGE, ERNEST ALFRED WALLIS (1875–1934). English archeologist and keeper of antiquitie in the British Museum, who made valuable explorations and excavations at Assuan, Ninevah, in the Sudan, and at Der in Mesopotamia. Of his publications those of immediate interest are *The Gods of Egypt, The Nile, Literature of the Ancient Egyptians.*

BUFFON (*bü'fôn*), **GEORGE LOUIS LECLERC, COMTE DE** (1707–1788). A French naturalist and philosopher. His great work is his *Natural History*, which was the first attempt to gather known facts in that department of knowledge and to present them in a readable, interesting and intelligible form. The original edition in 44 quarto volumes extended over 55 years in time of publication, the last eight appearing in 1804 after the death of Buffon. It was translated into many languages.

BUNSEN, ROBERT WILHELM (1811–1899). A German chemist. Among his many discoveries and inventions are the commercial production of magnesium, magnesium light, spectrum analysis, the electric pile, and the burner which bears his name. He also discovered that ferric oxide is an antidote to arsenic poisoning, devised a method for measuring the volume of gases, prepared magnesium in metallic form for the first time, discovered two new elements in the alkali group, and investigated the geysers in Iceland.

BURBANK, LUTHER (1849–1926). American horticulturist and originator of new varieties of plants and fruits, who was born in Lancaster, Mass., and in education went as far as the local academy. He acquired a tract of land in his home town, and there produced the celebrated Burbank potato (1872). Three years later he settled at Santa Rosa, California, where for a half century he continued to grow new varieties of plums, prunes, berries, corn, squash, peas, and a giant edible cactus good for desert cattle. Some of his show creations were the plumcot, stoneless prunes, the Shasta daisy, a giant amaryllis, and several large callas. He described his work in *Luther Burbank, His Methods and Discoveries* and in the series of descriptive catalogs called *New Creations.*

BURNHAM, FREDERICK RUSSELL (1861–). Explorer born in Minnesota, served in South Africa, where he discovered gold ornaments of great antiquity among old granite ruins, assisted Lord Roberts in the South African War, and made many explorations in Africa. Found a lake of pure carbonate of soda in Africa.

BURR, WILLIAM HUBERT (1851–1934). Civil engineer, born in Connecticut, and member of many commissions, such as that to determine the possibility of building a bridge over the North River in New York City, to report on the possibilities of deep harbor on the coast of Southern California, the Isthmian Canal Commission, the barge canal board of New York, the New York and New Jersey vehicular tunnel commission, and other projects. He was awarded first prize in the competition for a proposed memorial bridge across the Potomac at Washington.

BURROUGHS, JOHN (1837–1921). American naturalist and author, born in the state of New York, where he lived mainly all his life, except for nine years in Washington, D. C. As the successor to H. D. Thoreau, he wrote many papers on outdoor life, full of keen and delightful observations. *Wake-Robin, Birds and Poets, Locusts and Wild Honey*, and *Ways of Nature* are some of his best volumes.

BURTON, RICHARD FRANCIS (1821–1890). English linguist, soldier, and explorer, who was the first of his nation to enter the sacred city of Mecca, to which he made a pilgrimage in disguise after serving in the Indian army under Napier; the first to explore Somaliland, and to discover the great lakes of central Africa. By profound study he acquired Arabic, Hindustani, Persian, and several minor Indian dialects. In some of his expeditions he was accompanied by Capt. J. H. Speke (q. v.). Burton also made the standard Translation of the *Arabian Nights* and a fine rendering of Camoens's *Lusiads*.

BYRD, RICHARD EVELYN (1888–). American explorer, born in Virginia, educated at Annapolis. He made an expedition to Greenland with Macmillan in 1925, flew to the North Pole and back on May 9, 1926, from Spitsbergen, and flew from near New York to France in 1927, but his plane was wrecked in making a forced landing off the coast. In 1928–30 he made an expedition to the Antarctic regions, including a flight to the Pole and back to his base, making also valuable observations and locating land not before charted.

CABOT, JOHN (1450–1498). An Italian navigator, who was born in Genoa, traded with caravans at Mecca, and conceived the idea of reaching Asia by sailing westward. He moved to Bristol, England, and finally set out from there and reached the coast of what is now Cape Breton Island in June 1497. The next year he set out to reach Japan or Cipangu as he called it, but he was driven north to Greenland, and finally to the coast where he had been the previous season, going as far south as the 38th parallel. His son Sebastian (c. 1476–1557) in 1526 discovered the Rio de la Plata in South America, and spent three years looking for silver reported to him by three Spaniards left there by an expedition of 1515.

CAILLETET (*kī-ĕ-tā'*), **LOUIS PAUL** (1832–1913). A French worker in iron who succeeded in liquifying oxygen on Dec. 2, 1877, and hydrogen, nitrogen, and air a little later. The Swiss chemist, Pictet, independently did the same just before or just after Cailletet. The latter also found a way for measuring the height of an airplane.

CAJORI (*cà-yō'rē*), **FLORIAN** (1859–1930). An American mathematician, born in Switzerland, and educated at the University of Wisconsin and Johns Hopkins. After teaching three years at Tulane University (1885–88), he was a professor at Colorado College till 1918 and then at the University of California. He wrote valuable histories of mathematics, physics, the slide rule, and of mathematical notations.

CANDOLLE, AUGUSTIN PYRAME DE (1778–1841). An eminent Swiss botanist; assisted Cuvier and Lamarck; classification of plants was his contribution to botanical science. By request of the government he made a botanical survey of the entire country.

CANNON, ANNIE JUMP (1863–). An American astronomer, educated at Wellesley College, did special work in astronomy at Radcliffe College, and became connected with the Harvard Observatory in 1897. She made observations of variable stars of long period, photographed large portions of the heavens, and discovered 200 variable stars, 4 new stars, and phenomena of bright lines and variable spectra of many stars. Her catalog of 225,000 stellar spectra fills nine quarto volumes.

CARDAN (*kär'dăn*), **JEROME** (1501–1576). Italian mathematician and astrologer, besides interesting works on the origin of animals and plants, and on astrology, in his work *Concerning the Subtlety of Nature* advanced a method for teaching the blind to read through the sense of touch, and the deaf to talk by means of signs.

CARNOT (*kär-nō*), **NICHOLAS LEONHARD SADI** (1796–1832). Eminent French physicist who made important studies in the nature of heat and methods of finding its mechanical equivalent. Some of his discoveries are fundamental in thermodynamics, especially his principle that the efficiency of a reversible engine depends on the temperature. His important researches were printed in 1824, but many remain in manuscript. He died of cholera.

CARREL (*kà'rel*), **ALEXIS** (1873–). French American physician, for many years a resident of France, where he was educated at the University of Lyons, came to America in 1905 and became connected with the Rockefeller Institute of Medical Research in 1906. In 1912 he won the Nobel prize in science for successfully suturing blood vessels and proving that organs may be transplanted in the human body. He served during the World War in medical military service in France. Dr. Carrel is the author of many notable monographs on surgical methods. For a time after his arrival in the United States he taught at McGill and Chicago Universities.

CARTER, HOWARD (1873–1939). Egyptologist born in Norfolk, England, discoverer of various tombs of great historical interest in Egypt; began his professional life as a painter. He was trained as an explorer under Lord Amherst, Professors Griffith, Flinders–Petrie, and Naville, and Sir Gaston Maspero. He was assistant to Professor Petrie in the Amherst expedition of Tel-el-Amarna in 1892; inspector general of antiquities for the Egyptian government, reorganizing the antiquities administration of Upper Egypt. Acting for the Egyptian government. he discovered many tombs, and others as assistant to the Earl of Carnarvon. In 1916 they began an elaborate series of investigations, which led in 1923 to the discovery of the tomb of Tutankamun, of greatest historical and antiquarian value.

CAVENDISH, HENRY (1731–1810). An English natural philosopher and chemist; the first to analyze the air of the atmosphere, determine the mean density of the earth, discover the composition of water, and ascertain the properties of hydrogen; the founder of pneumatic chemistry. Cavendish spent his whole life in study and experiments, being somewhat of a recluse. All his scientific papers were published, some of them for the first time, in 1921. In the course of his work he anticipated something like Ohm's law, the identification of argon, and the properties of arsenic acid as stated a little later by Scheele.

CESCINSKY (*sĕs-sĭn'skĭ*), **HERBERT** (1875–). English authority on furniture, specializing in the restoration of old buildings. He was consulted on many projects, lectured in European and American art galleries, and wrote important works on old furniture, clocks, Chinese styles, and woodwork.

CHAMBERLAIN, THOMAS CHROWDER (1843–1928). American geologist, who served on several state surveys, and was professor at the University of Chicago (1892–1919), having served also as president of the University of Wisconsin (1887–92). He specialized in the study of glaciers, the origin of comets and meteorites, and the development of the earth and of planetoids and satellites.

CHAMPOLLION (*shŏn-pōl-yŏn'*), **JEAN FRANCOIS** (1790–1832). French professor of history, and later of Egyptian antiquities in the College of France. He found a method of deciphering ancient monuments of Egypt, with Rosellini conducted an expedition to the Nile, and is now generally recognized as the father of Egyptology.

CHAPMAN, FRANK M. (1864–). American authority on birds and one of the originators of the use of the camera in bird study in nature; curator of ornithology, American Museum of Natural History, where he arranged the bird groups in habitat style according to nature. He also studied birds in the Andes Mountains.

CHEVREUL (*chĕv-rūl*), **MICHEL EUGENE** (1786–1889). French chemist, known for important discoveries which led to improvement in the making of soap, having found the composition of stearin and olein and isolated certain fats and oils. As director of the Gobelins tapestry works, he made fruitful studies in colors and contrasts in fabrics. On the occasion of his centenary, Harvard and other universities conferred degrees upon him.

CHRISTIAN, EUGENE (1860–). American dietitian and author of numerous books on the regulation and selection of foods. After many years in commercial pursuits, he settled in New York City in 1900, and developed a system of diet. Some of his works are *Uncooked Foods, Encyclopedia of Diet, How to Live 100 Years, 12 Lessons on Weight Control and the Basis of Health.*

CLARK, ALVIN GRAHAM (1832–1897). American astronomer and instrument maker, son of Alvin Clark, who founded the business of making telescope lenses. Many of the great lenses were made by this firm, including those for the U. S. Naval Observatory, the Lick, and the Yerkes, the last being 40 inches in diameter, for years the largest of its kind in the world. He discovered a number of stars.

CLARK, WILLIAM (1770–1838). American explorer, the leader of the first expedition within the United States to cross the continent. In 1803–06, with Meriwether Lewis he made the round trip from St. Louis to the Pacific. He served as governor of the territory of Missouri (1813–20), and as commissioner of Indian affairs at St. Louis (1822–38).

CLAUSIUS, RUDOLF JULIUS EMMANUEL (1822–1888). German mathematical physicist, who held professorships in turn at Zurich, Würzburg and Bonn. Taking advantage of the theory of Carnot, he stated a "second law" that "heat cannot pass from a colder to a hotter body," and ideas later effectively used in the development of steam engines. He made important researches in gases and in electrolysis, some of which were later confirmed by Arrhenius.

COLUMBUS, CHRISTOPHER (c. 1446 or 1451–1506). His name in Spanish is Cristobal Colón. He was apparently born in Genoa, but the date is uncertain. His son, Ferdinand, wrote a *Life of Columbus*, which tells us he was educated at Pavia in the physical sciences, especially in geography and navigation. For a time he followed his father's trade of weaving at Genoa and Savona (1476). He visited at Chios (1474–75), made a voyage to England (1476), when his fleet of four ships was attacked by a privateer, and he may have gone to Iceland early in 1577. On his return to Portugal (about 1478), he married a daughter of the celebrated navigator, Bartholomew Perestrello, whose maps and charts later gave him great aid. Some say he was a maker of charts and maps at Porto Santo, where his father-in-law was the governor (about 1480), and one account tells us that he corresponded with Toscanelli, the great Florentine scientist, about the possibility of reaching India by going westward instead of south and east around the Cape now called Good Hope. Certain evidence of floating objects from the west had indicated possibility of land. During service in Portugal while John II. reigned, Columbus appealed for help; a council reported adversely, but it is said a secret expedition was sent west to try the plans of Columbus. This soon turned back, and Columbus, finding it out, left for Spain (1484). He took with him Diego, the only son of his wife, now dead. Later he married again and had several children. The Duke of Medina Celi favored the project, but lacked the means to carry it out, and he secured an audience with Queen Isabella for Columbus. She and her husband, Ferdinand of Aragon, however, were engaged in wars with the Moors, and the plan was delayed, final decision being made at last that the plan was impracticable. Next he went to Salamanca, where as everywhere he made many friends, who, however, failed to gain enough financial backing for the enterprise. In 1488 he was again invited by the king of Portugal to return, but nothing came of the plans for a westward voyage till, once more in Spain, he began a journey toward the court of France for aid. When he reached a point near Granada, messengers from Isabella recalled him, and on April 17, 1492, agreement was made to equip the expedition. Two private individuals of Palos, however, in the end provided much of the money necessary. In three ships the expedition set sail from Palos on Aug. 3, 1492, and, after threatened mutiny and many false reports of land, they struck an island in the Caribbean Sea early on Oct. 12, 1492. During this first expedition, several other lands were touched upon, including what is now called Cuba and Santo Domingo. The island first sighted was San Salvador or Watling. Whether Columbus really knew that a continent lay to the west has been disputed; some claim he died thinking he had reached the east. He arrived at Palos again on March 15, 1493, and every possible honor was showered upon him in Spain. In the following September, the second voyage began, with three great ships, fourteen smaller ones, and 1,500 men. On th first voyage there had been 88, some of whom wer left to found a colony at Hispaniola (Santo Domingo) He explored the Cuban coast, Porto Rico, Jamaic and skirted several other islands, and lay ill at Isabell for five months, worn out by toil and vigils. On th third voyage in 1498 he discovered Trinidad an skirted the coast of South America, and later visite the colony planted at Santo Domingo. Much troubl with the natives had developed in his absence. Ad miral Boabdilla was sent to relieve him, and Columbu went back to Spain in chains, but he was released an again rose in favor. In Nov. 1504 he set out on hi last voyage to the New World, where he again tried t plant settlements. Returning home desperately ill, h fell for a time into neglect, which was compensated fo by a great state funeral at Valladolid where he died i 1506. His remains were sent to his beloved Seville in 1542 removed to Santo Domingo, in 1796 trans ferred to Havana, when the French took possession o Haiti, and again after the Spanish-American War re moved to Seville. Thus in death he completed a fourt voyage to the world he had discovered. Whether h actually touched the coast of continental United State is doubtful, but he skirted what is now Honduras Though he was actuated partly by dreams of gold colonization, and building up an estate, his mai motives were scientific, patriotic, and religious.

COMPTON, ARTHUR HOLLY (1892–). Amer ican professor of physics, awarded the Nobel prize i 1927, for his investigations of X-rays; also contributed papers on the earth's rotation, and studied the specifi heat of solids. He was educated at the College o Wooster, Ohio, at Princeton, and Cambridge Univer sity, England, and taught at Minnesota, Washingto University of St. Louis and became a professor at th University of Chicago in 1923.

COMSTOCK, JOHN HENRY (1849–1931). Amer ican entomologist, for many years professor at Cornel University, retired in 1914. By his lectures, papers and books he contributed notably to the advance of ou knowledge of insects, birds, and butterflies. His wife Anna Botsford Comstock, assisted him especially i writing *A Manual on the Study of Insects* and *How to Know the Butterflies.*

COOK, JAMES (1728–1779). An English naval captain and explorer, who charted the St. Lawrence River, the coasts of Newfoundland, New Zealand, and Australia. He first discovered or rediscovered several islands in the Pacific including the Sandwich group, New Caledonia, and the Isle of Pines. On his third voyage around the world, he aimed to discover a passage from the Pacific through the Arctic to the coast of Greenland. Stopping at Hawaii he was killed by hostile natives. His work is described in his *Three Voyages Round the World.*

COOPER, ASTLEY PASTON (1768–1841). English surgeon at Guy's Hospital and professor at the Royal College of Surgeons, of which he became president (1827–36). His greatest accomplishments are the attempt to tie the carotid artery, and the tying of the abdominal aorta for aneurism. He was created a baronet in 1820.

COPE, EDWARD DRINKER (1840–1897). American naturalist; born in Philadelphia. His investigations of the ichthyology and herpetology of North America and his contributions to the history of extinct vertebrates laid the foundation for the modern classification of North American fishes, amphibians, and reptiles.

COPERNICUS (KOPPERNIGK), NICHOLAS (1473–1543). German astronomer; father of modern astronomy; disproved the Ptolemaic theory. In his great work, *The Revolution of the Celestial Orbs*, the first copy of which was handed to him on the day of his death, he demonstrated that the sun is the center of the system. The part of the work involving the use of trigonometric tables had been issued in 1542 by his favorite pupil, G. J. Rheticus. Discarding ancient theories that the earth is the center of our universe, Copernicus advanced the theory that the sun is stationary and the planets revolve around it. He explained the changes in seasons, the precession of the equinoxes, and other phenomena, but it remained for later astronomers like Kepler, Galileo, and Newton to account for certain variations, and to place modern astronomy on a definite scientific basis.

CORTEZ, HERNANDO. See DICTIONARY OF HISTORY.

COUES, ELLIOTT (1842–1899). An American ornithologist. He was connected with the Smithsonian

Institution; author of the well-known *Key to North American Birds*, which applied to zoölogy the method already in use for classifications in botany. He did important work on the reports of the Lewis and Clark and the Zebulon Pike explorations of the northwest and the Mississippi regions. His *Fur-Bearing Animals* (1877) is still a standard text for classification and identification of North American species.

COULOMB (*kōō lôm*), **CHARLES AUGUSTIN** (1736–1806). A French electrician whose work laid the foundation for the later mathematical theory of electricity of Poisson. His important work was in the study of electric discharges and verified the law of the inverse square, which Cavendish years before had left in his unpublished manuscripts. His name was given to the unit of measurement of electric quantity. Memoires of his researches appeared successively between 1785 and 1789.

COULTER, JOHN MERLE (1851–1928). American authority on the plants of the Rocky Mountain region and of Texas, who was born of missionary parents in China, educated in Indiana, was professor at Wabash College, president of the University of Indiana (1891–93) and of Lake Forest College (1893–96), and then head of the department of botany, University of Chicago to 1925. He organized graduate courses in botany which were taken by many students now famous botanists.

COURTOIS (*kōōr-twâ'*), **BERNARD** (1777–1838). French chemist who with Séguin found the alkaloids of opium and discovered iodine in the liquor prepared from leaching burnt seaweed. The latter, as developed and named by Gay-Lussac, has had a profound influence on both the arts and on medicine.

CROOKES, WILLIAM (1832–1919). English chemist who for many years in his own laboratory conducted research into rare earth elements, radiation, and vacuum tubes. He was knighted in 1897. Among his discoveries and inventions are the element thallium (1861), the radiometer, the theory of radiant matter, and developed older models into the efficient Crookes tube, which has made the study and use of radium possible. Among his practical inventions was a glass which would shield the eyes of workers from harmful rays sent off from molten glass.

CURIE, PIERRE (1859–1906) and **MARIE** (1867–1934). French scientists, husband and wife, who jointly discovered radium and fixed the atomic weight accurately (1898) after infinite patience and elaborate fractionation of pitchblande rock. Madame Curie was mainly responsible for the discovery of the element polonium. She was born Marie Sklodowska at Warsaw, the daughter of a doctor. She married Professor Curie in 1895. He was instantly killed when run over by a dray in Paris on April 19, 1906. Madame Curie succeeded him as professor at the University of Paris and afterward as director of the radium institute established for her. In 1921, on a visit to the United States, President Harding presented to her one gramme of radium paid for by public subscription. With Henri Becquerel, who had discovered radio-action in uranium, the Curies were awarded the Nobel prize in 1903, and Madame Curie was given the entire award for chemistry in 1911, the first woman to win this and to that date the first person to share in two distinct Nobel awards. She received many other awards, medals, and honors.

CURTISS, GLENN HAMMOND (1878–1930). American aviator and inventor, who constructed a motorcycle which in 1906 went a mile in 26⅖ seconds at Ormond Beach, Florida, and who won the *Scientific American* cup, the international cup and the N. Y. *World's* award of $10,000 for a flight from Albany to New York in a plane of the flier's own construction. He made the first hydro-airplane (1911), and the first flying boat (1912). See also under Aviation.

CUSHING, FRANK HAMILTON (1857–1900). American student of Indian remains who lived for some time among the Zuni Indians, and wrote valuable works on their lore and history. He also discovered remains of ancient peoples on the Florida coast (1896).

CUSHING, HARVEY (1869–1939). American surgeon, educated at Yale, the Harvard Medical School, and Johns Hopkins where he became a professor, and in 1911 went to Harvard. His work and papers on surgery of the brain, especially under local anesthesia, on the pituitary body, and on the conditions of blood pressure established an international fame. His *Life of Sir William Osler* (1925) won the Pulitzer prize for biography.

CUVIER (*cü-vyā'*), **GEORGES LEOPOLD CRETIEN FREDERIC DAGOBERT, BARON** (1769–1832). French naturalist recognized as the founder of modern comparative anatomy; educated at Stuttgart, he was professor in the College of France (1799–1814), and held various offices in the university and state. He made minute studies in the anatomy of the mollusca, fishes, fossil mammals and reptiles, specializing also in osteology. He laid foundations for the later study of paleontology. Natural history became a science under his leadership. Cuvier published several learned works on these subjects.

DALTON, JOHN (1766–1844). An English chemist and natural philosopher; wrote *New System of Chemical Philosophy* (1808–1810). He distinguished himself in the development of the atomic theory, which revolutionized chemistry and contributed more valuable results than any other idea introduced into the study of physics.

DANA, JAMES DWIGHT (1813–1895). An American scientist; born in Utica, N. Y. His researches in geology made him famous; wrote *The System of Mineralogy*, which gained an international reputation; *Manual of Mineralogy, Manual of Geology, Corals and Coral Islands, Text-Book of Geology*, and *The Geological Story Briefly Told.*

DARWIN, CHARLES ROBERT (1809–1882). English naturalist, the grandson of Erasmus Darwin (q. v.), educated at Shrewsbury School and Cambridge. He had spent a time at Edinburg preparing for medicine, the profession of his father and grandfather, and at Cambridge thought some of becoming a clergyman. His associates turned him toward science. From 1831 to 1836 he was on the voyage of the *Beagle* in various parts of the Atlantic and Pacific Oceans. This voyage determined his life interest in human and animal changes, especially as modified by environment. His *Voyage of the Beagle* and *Journal of a Naturalist* bear on this phase of his studies. By this time he had acquired habits of elaborate and painstaking research. Various papers were published at intervals, and in 1858 his theory of variations in species was well formulated, when he received a report from A. R. Wallace of very similar conclusions. Both men share in the honor of the theory. In 1859 he issued his great work *On the Origin of Species by Natural Selection.* Much of his subsequent life was taken up with collecting further illustrations of his theories. Darwin's idea of "the survival of the fittest,"—or that only the best types and specimens continue to survive, —raised a great storm, and led to what was later called Darwinism. The fact is, Darwin was not so much interested in evolution as in the causes for a possible change in species. Later in his *Descent of Man* he sought to apply his theory of natural selection to the human race. His idea was that man might have come from an ancestor related to the ancestors of the man-like apes,—not that man descended from apes and monkeys, as the popular notion has been. His work laid the basis for subsequent investigations of Mendel, Lamarck, De Vries, and other recent scientists.

DARWIN, ERASMUS (1731–1802). English physician and naturalist; grandfather of Charles Darwin. His *Zoönomia*, a prose medical work, received wide notice. It contained many novel and startling ideas, and Samuel Butler says that Paley's *Natural Theology* was written to refute these ideas. Darwin's poem, *Botanic Garden*, developed his idea of the loves of the plants. He suggested that all animals that have warm blood might have come from a primal offshoot of the "First Cause," endowed with ability to add and change organic parts. This theory agrees more with the hypotheses of Lamarck than with those of his celebrated grandson, Charles Darwin.

DAVENPORT, CHARLES BENEDICT (1866–). An American zoölogist, who was educated at the Brooklyn Polytechnic Institute and at Harvard, was a professor at the University of Chicago (1899–1904), and then became director of the laboratory at Cold Spring Harbor, New York, maintained by the Carnegie Institution. He made elaborate investigations of the laws of heredity in animals and man, such as the color of the hair, eye, and skin and temperaments of man, and the feathers, general forms, and reactions of chickens. Some of his works are *Statistical Methods in Biological Variations, Inheritance in Poultry, Eugenics, Defects Found in Drafted Men.*

DAVEY, JOHN (1846–1923). An American tree surgeon who was born in England, where he learned landscape architecture at Torquay (1866–72), and settled finally at Kent, Ohio. He instituted a scientific

method of preserving trees (1890), and continued to develop this until his death. He wrote *The Tree Doctor, A New Era in Tree Growing*, and other valuable books, and was often called upon to preserve ornamental and historic trees.

DAVIS or **DAVYS, JOHN** (1550?–1605). English navigator who made voyages to Greenland trying to find a north-west passage (1785), and again a year or two later, when he pushed into the straits that now bear his name, coasting along west Greenland to 73° N. He seems to have commanded a ship in the attack on the Spanish Armada (1588) and three years later set out to find a way to reach "the back parts of America" around the Strait of Magellan, at which time he discovered the Falkland Islands. He sailed with Raleigh in 1596–97 to the Azores, and three times toward or to the East Indies. On the last return voyage he was killed off Sumatra by Japanese pirates.

DAVY, SIR HUMPHRY (1778–1829). English chemist and natural philosopher; born at Penzance, in Cornwall. The publication of his experiments in science brought him fame. He discovered the effect of nitrous oxid (laughing gas), and the metals sodium, barium, calcium, and magnesium. His work, *On Some Chemical Agencies of Electricity*, was sufficient to establish his reputation as a chemist. He is also remembered as the inventor of the safety-lamp known by his name.

DAWSON, JOHN WILLIAM (1820–1899). Canadian geologist and educator who made a reputation by his researches in the coal-bearing deposits of Canada and the discovery of the remains of an "air-breathing" reptile, first noted of its type. From 1855 to 1893 he was principal and professor of geology at McGill University. He was knighted in 1884. His son, George Mercer Dawson (1849–1901), acted as one of the Bering Sea commissioners in 1891, made an expedition for the government into the Yukon in 1887, where Dawson City was named for him, and wrote many papers on the geology and glaciers of northwestern Canada.

DE MORGAN, AUGUSTUS (1806–1871). An eminent English mathematician; wrote treatises on arithmetic, algebra, trigonometry, and differential and integral calculus. He was author of several works on logic, in which he tried to reconcile this subject with mathematics. He was professor of mathematics for many years at University College, London. William Frend De Morgan, the celebrated English novelist, was his son.

DERCUM, FRANCIS X. (1856–1931). American authority on mental and nervous diseases, who was born in Philadelphia and educated at the University of Pennsylvania, and from 1892 to 1925 was a professor at the Jefferson Medical College. Decorated a chevalier of the Legion of Honor of France. First described the disease now called Dercum's disease (*adiposis dolorosa*). Author of *Rest, Suggestion, and other Therapeutic Measures in Nervous and Mental Diseases, The Biology of the Internal Secretions*, and *The Physiology of Mind*.

DEVRIES (*dĕ-vrēēs'*), **HUGO** (1848–1935). A Dutch botanist who first stated the mutation theory of the origin of species. Instead of observing and interpreting natural specimens, he first noted certain exceptions growing among regular forms of Oenothera or the evening primrose, which had been introduced from America into Holland. He produced many new and striking variations through cultivation and mutation, quite distinct from the natural selection method of Darwin. New species and varieties suddenly appear through sudden change or mutation. His books, *The Mutation Theory* (1901) and *Plant Breeding* (1907) explain his own methods.

DEWAR (*dū'er*), **JAMES** (1842–1923). British chemist and physicist, who was educated at Edinburgh, and served as professor at Cambridge and the Royal Institution of London. He won many medals and honors, including knighthood in 1904. Though his work covers a large range, he is best known for his experiments in liquids at low temperature, his successful liquefaction of hydrogen (1898), and solidification of this (1899), and the use of vacuum-jacketed bottles to preserve liquids—a principle now widely used in thermos bottles and the like.

DICK, GEORGE FREDERICK (1881–), and **GLADYS HENRY** (1881–). American physicians who developed the Dick test for detection of immunity to scarlet fever. Dr. G. F. Dick was born in Indiana and graduated from Rush Medical College, Chicago, where he became a professor in 1918. Gladys Henr Dick was born in Nebraska, educated at the stat university, and received the M. D. at Johns Hopkin She became a fellow of McCormick Institute, Chicag in 1914. They specialized in the study of infectiou diseases.

DICKSON, JAMES DOUGLAS HAMILTON (1849). British physicist who worked with Lord Kelvi in determining the relation between the electrostati and the electromagnetic unit of electricity, assiste in the laying of the French Atlantic cable (1869) and in perfecting Lord Kelvin's siphon recorder.

DIOPHANTUS (*dī-ŏ-fān'tŭs*) (fl. c. 375). A Gree mathematician of Alexandria; called the father o algebra; wrote the *Arithmetica*, of which only 6 book now survive, a treatise of *Polygonal Numbers*, an perhaps one on "Porisms," some interesting problem on the relations among numbers stated in terms o algebra.

DIOSCORIDES (*dī-ŏs-kŏ'rĭ-dēz*), **PEDANIOS** (fl. c 60). A Greek physician who served in the arm under Nero. He compiled a *Materia Medica* in whic the curative properties of several hundred plants ar noted; he also discussed the use of animals in die and medicine. This work held its immense popularit for nearly 1,500 years.

DRAPER, JOHN WILLIAM (1811–1882). Ameri can scientist, who was born in England, educated a the University of Pennsylvania, and taught at Nev York University from 1839 to 1881, acting as presi dent also of the medical school (1850–1873). He im proved the photographic process of Daguerre and wa the first to use light in taking pictures (1839). O his several literary works, *Contributions to Chemistr* and *History of the Conflict between Science and Re ligion* are now best known.

DU CHAILLU (*dū shā'yŭ*), **PAUL BELLON** (1835–1903). An American explorer who visite Africa for the Philadelphia Academy of Sciences. H saw many anthropoid apes, secured the first specime of a gorilla brought from there, and located in the in terior a race of pygmies or little men of which tradi tion for centuries had borne record. He spent fou years in Africa on his first visit (1855–59), returnin again to confirm his early discoveries (1863–65) Some of his books are *The Gorilla Country, The Coun try of the Dwarfs*, and a *Journey to Ashango Lan* (1867), which aroused some doubt and unfavorabl comment.

DUMAS, JEAN BAPTISTE ANDRE (1800–1884) One of the leaders in chemical theory and experimen in the 19th century. He wrote distinguished paper on the atomic theory (1826), on the theory tha hydrogen in certain compounds may be replaced by similar amount of a haloid element without muc change, on certain methods of quantitative analysis and on sulphuric ether. He held several politica offices.

DUNN, GANO (1870–). American electrica engineer and authority on power transmission, presiden of the J. G. White Company, New York, 1913. H has served on many boards and commissions, nationa and international, and was designated chairman of th National Research Council in 1923.

DURHAM, HENRY WELLES (1874–). Civi and sanitary engineer, who was born in Chicago an educated at Columbia, and who served on the Nicara guan Canal Survey (1898–1900), and was in charg of all municipal improvements at Panama (1904–07) and of paving and sanitation in Nicaragua since 1924 He served in forest and sanitary operations in Franc during the World War. Author of books on stree paving and sanitation in Panama.

EHRLICH, PAUL (1854–1915). Eminent au thority on the making of serums, who was born in Silesia, received his M. D. in 1878, and in 1890 be came a professor in Berlin. In 1896 he became at tached to the Royal Institute of Serum Research a Steglitz, which as director he transferred to Frank fort three years later. In 1908 he received half o the Nobel prize in medicine for that year. Though he perfected ways for making and propagating se rums, his greatest discovery was an arsenical prepara tion now called salvarsan (Ehrlich 606) and neosal varsan (Ehrlich 914), now valuable in the treatmen of blood diseases.

EINSTEIN (*īn'stīn*), **ALBERT** (1879–). A German-Swiss physicist, the formulator of the theory of relativity, was born of Jewish parents in Germany

For years he was professor in the technical institute at Zurich, but returned to Germany about the time of the World War, and was a professor in the Kaiser Wilhelm Academy of Research. He refused to sign the manifesto of German men of science denying responsibility of Germans for the war; and afterwards he eagerly championed the cause of the Republic. His theories of relativity were first announced in 1905 and extended in 1915. Certain astronomical tests and observations of total eclipses of the sun by many are said to confirm the main essentials of his theory. He also developed some of the theories of Planck, and formulated the "light-quantum" hypothesis, which states that radiation if prolonged has a quantum-like structure.

EINTHOVEN, WILLEM (1860–1927). A Dutch physiologist who won the Nobel prize for medicine in 1924 for his use of the apparatus for taking electrocardiograms. He also applied the string-galvanometer so as to record the electrical phenomena connected with the human heart.

ENCKE (*en'ke*), **JOHANN FRANZ** (1791–1865). A German astronomer; calculated the orbit of the comet observed by Mechain, Miss Herschel, and Pons, predicted its return, and detected a gradual acceleration of movement ascribed by him to the presence of a resisting medium. The comet is now known as Encke's comet. He also investigated the comet of 1680, properly calculated the return of the comet of 1812 in 71 years, and wrote on the transits of Venus of 1761 and 1769.

ERASISTRATUS (*ĕr-ā-sĭs'trā-tŭs*) (fl. 300 B. C.). Greek physician, who formed a school of anatomy at Alexandria after living for a time at the court of Nicanor Seleucus, king of Syria. He traced the nerves to the brain, distinguished sensory from motor nerves, studied the bile, spleen, liver, and named the trachea.

ERATOSTHENES (*ĕr-ā-tos'thê-nēz*), (c. 275–195 B. C.). A Greek scientist and author who was born at Cyrene and acted as librarian at Alexandria. He wrote on mathematics, geography, and history of the theaters. His *Geographica* reveals that he knew the earth is round and that the circumference is about 25,000 miles. Some of his methods resemble closely those in use today.

ESPY, JAMES POLLARD (1785–1860). A meteorologist; born in Pennsylvania; did notable work in investigating the causes of storms, and in 1841 published *The Philosophy of Storms;* was appointed to the Washington Observatory, where he carried on experiments in the cooling of gases and atmospheric expansion. It was through Espy that the present United States Weather Bureau became a possibility.

EUCLID (*ū'klĭd*) (fl. 300 B. C.). The most famous of the Greek geometricians. He lived at Alexandria in the time of Ptolemy I. (306–283 B. C.). The Greeks called him the "Author of the Elements." His name is even now synonymous with elementary geometry. His *Elements* was known to the Arabs, having been translated in the time of Harun-al-Raschid. It was translated from the Arabic into Latin by Adelard of Bath about 1120, and this translation was printed in Venice in 1482. This was rendered into English by Billingsley in 1570. Euclid's other words are *Data, Phenomena, Optics, Reflections,* and *Division of the Scale.*

EULER (*oĭ'lĕr*), **LEONHARD** (1707–1783). Swiss mathematician, who was born in Basle and studied theology, languages, and medicine. He was at the court of Catherine I. of Russia (1727–41), and at that of Frederick the Great (1741–66), and again in Russia. Much of his later work was done under the handicap of virtual blindness. He developed the theory of equations, treated trigonometry much as it is now, wrote a calculus, and wrote works on lunar motions and on optics, the last in three volumes (1771).

EUSTACHIO (*ay-oos-tah'ke-o*), **BARTOLOMMEO** (about 1500–about 1574). An Italian physician and anatomist. He devoted himself to medical science and in particular to anatomy, which he much enriched by his researches. Among his discoveries were the Eustachian tube of the ear and the Eustachian valve of the heart.

EVANS, ARTHUR JOHN (1851–). English archeologist and keeper of the Ashmolean Museum at Oxford from 1884 to 1908. He made valuable studies of ancient civilizations in Lapland and Finland, the Balkan states, and in the island of Crete. He found remains of early Greek life in Crete, including the pre-Phoenician script and the palace at Knossos. Evans was knighted in 1911.

EWING, JAMES ALFRED (1855–1935). Scottish physicist, who was professor in turn at Tokyo, Dundee, Cambridge, and the University of Edinburgh, of which he became principal and vice chancellor in 1916. He made important discoveries in the magnetic properties of metals and invented several pieces of apparatus for testing them, including the permeability bridge which has been of great value in testing iron and steel used in making electrical apparatus.

FAHRENHEIT (*far'en-hīte*), **GABRIEL DANIEL** (1686–1736). A distinguished German physicist and instrument-maker; improved the accuracy of thermometers by substituting mercury for alcohol; devised the graduated scale for thermometers; discovered the fixed boiling point of other liquids than water, and that the boiling point varies with change in atmospheric pressure.

FALLOPIUS, GABRIELLO (1523–1562). An Italian anatomist who left the priesthood to study medicine at Ferrara and later to act as a professor at Pisa and Padua. He and Vesalius cooperated in some studies. Among his discoveries were certain nerves in the head, the sphenoid sinus, the ovarian tubes, and certain facts of the human embryo.

FARADAY (*făr'ă-dā*), **MICHAEL** (1791–1867). Eminent English chemist and electrician, who began mature life as a bookbinder, and later acted as assistant of Humphry Davy of the Royal Institution, whom he succeeded in 1825. His lectures were models of clear and interesting exposition. In chemistry he discovered two new carbon chlorides, succeeded in liquefying several gases, and perfected laboratory methods. In electricity he discovered a way to produce a continuous rotation of magnets and wires around each other; the induction of electric currents; the identity of electricity no matter how produced; and that different substances act differently in the matter of induction of the electric current. After four years of rest (1841–45), he showed the effects of magnetism on polarized light, and the phenomena of diamagnetism. All his researches had more or less practical effect on development of electrical apparatus.

FIALA, ANTHONY (1869–). American explorer who accompanied the Baldwin-Ziegler Polar Expedition (1901–02), and acted as commanding officer of the Ziegler Expedition (1903–05), reaching 82° 4′ North. He accompanied Theodore Roosevelt in the exploration of the wilderness of Brazil (1913–14), and served in the Mexican border service and in the World War. In early days Fiala was a lithographer and photo-engraver.

FISHER, EMIL (1852–1919). German organic chemist whose researches in the purine and the sugar group of elements have had far-reaching effects on modern chemical methods. He made minute and elaborate researches into the various carbohydrates, defining glucoses, fructoses, and many other forms of sugar. These he followed by experiments in fermentation and finally in proteins. During the World War he was active in producing ammonia, nitrate acid, glycerine, and substitutes for important war chemicals.

FLAMMARION (*flă-măr'rē-ŏn*), **NICOLAS CAMILLE** (1842–1925). French astronomer, noted for his attempts to make science attractive to the general public; educated in theology, but at 16 produced a voluminous work, which he used in part in a later book. After acting as a computer in the Paris Observatory, he settled on an estate given him by a friend and spent the rest of his life in observation and research. He discovered several double stars, made numerous maps of Mars, edited at different times a number of journals, and late in life turned his attention to psychic study. *Popular Astronomy, The Imaginary and the Real World, Celestial Marvels* are some of his books.

FLAMSTEED, JOHN (1646–1719). English astronomer, educated at Cambridge, and made many observations beginning in 1689, some of which were issued by others without his consent, especially the *Historica coelestis* by the great Halley in 1712. The complete edition was issued in three folio volumes in 1725. He made the first notable catalog of stars and compiled data of great service to later astronomers.

FLEMING, JOHN AMBROSE (1849–). An English physicist, who was a lecturer at Cambridge and then professor of electrical engineering at University College, London (1885–1926). As advisor to the Edison and other companies, he did much to apply

theories of physics and mathematics to electric lighting, wireless telegraphy, and the development of thermionics of importance to radio communication.

FLETCHER, HORACE (1849–1919). An American who did much to encourage the selection and proper eating of foods, especially by means of more complete mastication. To "fletcherize" became the term for eating slowly and with thorough chewing. He was born at Lawrence, Mass., educated at Dartmouth, and traveled a great deal. Besides books on other topics, Fletcher wrote *Nature's Food Filter, or When and What to Swallow* and *Fletcherism.*

FLEXNER, SIMON (1863–). American pathologist, who was born in Kentucky, educated at Louisville, Johns Hopkins, several European universities, and the Pasteur Institute, Paris. He was a professor at Johns Hopkins (1889–99), University of Pennsylvania (1899–1903), and then became director of the laboratories of the Rockefeller Institute in New York. Among his notable work was the perfection of a serum for use in cerebrospinal meningitis (1905) which reduced the mortality from 75% to 25%, and for the study of poliomyelitis (infantile paralysis), together with a serum treatment.

FOWLER, CHARLES EVAN (1867–). American engineer who has built many important bridges in various lands, including the Williamsburg in New York, arch bridge at Sydney, Australia, and rebuilt Niagara Railway arch at Niagara Falls. He also acted as engineer in other projects at Seattle, Manila, White Pass, Alaska, Lake Pontchartrain, Louisiana, and at Oakland, California.

FRANKLAND, SIR EDWARD (1825–1899). English chemist. He contributed to science the theory of valency, i.e., the conclusion that each atom of an elementary substance possesses a clearly limited power of saturation, so that only a correspondingly limited number of atoms of other elements can be attached to it. With Sir William Lockyer he discovered helium in the sun. As a member of a royal commission on rivers (1868–74), Frankland learned much about the sources of contamination and means of preventing it.

FRANKLIN, BENJAMIN. See under DICTIONARY OF INVENTORS.

FRANKLIN, JOHN (1786–1847). English explorer, who served in the battle of Copenhagen (1801) and of Trafalgar (1805), and in 1818 and 1825 was with expeditions that tried for the north-west passage through the Arctic Ocean. Each time on land important explorations were made in Canada. He acted as lieutenant governor of Van Dieman's Land (1836–43). He was knighted in 1829. On May 19, 1845, he set out with two ships and 129 officers and men to find a way through the northern ice pack. Nothing more was heard of them until traces were found of a camp at Beechley Island in 1851. Not until the spring of 1859 was the fate of Franklin learned from a record discovered in a cairn at Point Victory. He had died on June 11, 1847, and the survivors left the ship almost a year later never to be found alive. Franklin and his men really deserve the honor of finding the passage.

FRAUNHOFER (*frŏwn'ho-fĕr*), **JOSEPH VON.** See under DICTIONARY OF INVENTORS.

FRAZER, JAMES GEORGE (1854–). English anthropologist, who in 1890 attained great fame by the publication of *The Golden Bough*, a vast collection of information in regard to ancient peoples, cults, and their folk lore. He was born and educated in Glasgow and also studied at Cambridge, and was called to the bar in 1879. Many other books of history and myth have come from his pen.

FREMONT, JOHN CHARLES (1813–1890). Known as the pathfinder of the northwest, was born in South Carolina, educated at Charleston, taught mathematics, and became a practical surveyor. In 1841 he surveyed the Des Moines River, in 1842 found an overland route across the Rocky Mountains, in 1843 went as far as the Columbia River, and in 1845 explored much of the great basin, reaching California in 1846. Gold discovered on land given him in California made him a wealthy man, but he lost all his means in 1870. See also under DICTIONARY OF RULERS AND STATESMEN.

FREMY, EDMOND (1814–1894). French chemist. In 1888 he and Verneuil produced rubies similar in color and chemical composition to the natural stones. Fremy also did important work in the coloring of plants, fermentation, and the manufacture of various practical substances like glass, steel, iron, and soap.

FRENCH, OWEN BERT (1865–). American geodesist, who for the U. S. has determined boundaries, explored coasts, found accurate latitudes and longitudes of observatories, and proved that invar (nickel steel) is the best material for measuring tapes in geodesy. Professor at George Washington University from 1920; assistant in U. S. surveys (1889–1915).

FREUD (*froit*), **SIGMUND** (1856–1939). The originator of psychoanalysis was born of Hebrew parentage at Freiberg, became interested in science, was in the physiological laboratory of Brücke (1876–82) and in 1885 began a course of study in Paris. Receiving the history of a case from the Vienna physician, Breuer, in 1884, Freud persuaded him to collaborate in 1893 in his *Studies of Hysteria.* By 1906 he had made his theories attractive. These have to do with the unrecognized importance of the sub-conscious in mental life. Freud seeks to restore to a normal state certain minds by getting them to recall other experiences, some of which may be "repressions."

FROBISHER, MARTIN (c. 1535–1594). English explorer who made one of the early attempts to find a north-west passage to India. With three vessels from the navy he explored some of the coast of Labrador in 1576, bringing back to England some ore. On the supposition that much gold lay in America, two other expeditions went out in the next and second year following, and more ore was brought back, and some exploring was done. In 1578 the 15 vessels of a larger expedition reached Greenland, explored Frobisher Bay, and attempted to found a settlement. Later he was with Drake in the West Indies, fought against the Armada and was knighted, went to the Spanish coast with Raleigh, and received a wound in the siege of Brest which caused his death. He was a stern and able seaman.

GALEN (130–about 201). Greek physician, medical writer, and philosopher. His works covered anatomy, physiology, dietetics, hygiene, pathology, diagnosis, pharmacy, materia medica, therapeutics, surgery, and philosophy. These were written originally in Greek; some were translated into Latin and Arabic.

GALILEO (*găh-lē-lā'ō*), **GALILEI** (1564–1642). Italian astronomer; discovered about 1582 the isochronism of the vibrations of a pendulum, and in 1590 the law by which the velocity of falling bodies is accelerated; adopted in astronomy the system of Copernicus; constructed his wonderful telescope (1600). Through it he discovered the satellites of Jupiter, and was enabled to explore the surface of the moon and view the phases of Venus. He also ascertained that the "Milky Way" is composed of myriads of stars.

GALL, FRANZ JOSEPH (1758–1828). The founder of phrenology, who was born in Baden and educated at Baden, Strasbourg, and Vienna, attempted to show that the faculties and characteristics of people correspond to external appearance of the skull. In 1802 his lectures were stopped by government order.

GALLE (*gawl'ĕh*), **JOHANN GOTTFRIED** (1812–1910). A German astronomer; wrote extensively on the natural sciences and mathematics. He was the first to observe the planet Neptune (September 23, 1846); discovered three comets (1839–1840).

GALTON, FRANCIS (1822–1911). An English anthropologist whose researches led to the modern science of eugenics, born at Birmingham and educated at King's College, London, and Cambridge. He was one of the first to study the weather and to prove the theory of anticyclones. In connection with his study of eugenics, he advocated the restriction of the birth-rate among the unfit; he originated the scheme of composite photography and developed the idea of taking finger-prints of criminals.

GALVA'NI, LUIGI (1737–1798). An Italian anatomist. He studied theology and, later, medicine at the University of Bologna, and was elected professor of anatomy. Galvani owes the wide celebrity attached to his name to his discoveries in animal electricity.

GAMA, VASCO DA (c. 1460–1524). A Portuguese navigator who first rounded Cape of Good Hope after a tedious journey of four months out from Lisbon (1497), tried to establish a settlement at Calicut, but was driven off by hostile natives. Cabral followed with a large fleet, which, driven westward, discovered Brazil, but finally reached Calicut but those left there were murdered. Da Gama was sent to avenge this treachery in 1502. On his return he was given additional honors and grants. In 1524 he was called from retirement to go

as governor to Cochin China, but died there three months after arrival. His voyage opened trade by water with the east.

GAUSS (*gaŭs*), **KARL FRIEDRICH** (1777–1855). A distinguished German mathematician; wrote *Disquisitiones Arithmeticae* and many other important works on the theory of surfaces, least squares, astronomy, and physics. With Weber he established a laboratory without iron in it for the study of magnetism, and they succeeded in sending telegraph messages over a line they constructed. Gauss also made some discoveries in optics.

GAY-LUSSAC (*gay-lu-sak'*), **JOSEPH LOUIS** (1778–1850). French chemist and physicist; employed himself in chemical and physical research, in connection with which he made two balloon ascents. His name is associated with many notable discoveries in chemistry and physics, e.g., the law of volumes, isolation of cyanogen, etc.

GEGENBAUR (*gay'gen-bower*), **KARL** (1826–1903). A leading comparative anatomist in Germany; the first to place the study of anatomy on an evolutionary basis. His most notable work was to show the origin of the form of the skull.

GEIKIE (*gī'kēy*), **SIR ARCHIBALD** (1835–1924). A British geologist. His researches in all branches of geology have made him an authority on these subjects. While serving on the Geological Survey (1855) he wrote *Scenery of Scotland*, which first brought him to public notice. He acted as director of the Scottish geological survey (1867–1881), was also professor at Edinburgh (1871–1881), and director of the survey of the United Kingdom (1881–1901). For many years Geikie studied various features of the geology of volcanic regions, visiting various parts of Europe and American for evidence. Other books are *The Ancient Volcanoes of Great Britain* and *Outline of Field Geology*.

GEOFFROY SAINT-HILAIRE, ETIENNE (1772–1844). French naturalist; professor of vertebrate zoölogy at Paris; accompanied Bonaparte to Egypt and founded the Institute of Cairo; made teratology, or the study of monstrosities, a science; created the science of embryology. His son, Isidore (1805–1861), continued the works and teachings of his father.

GERHARDT, KARL FRIEDRICH (1816–1856). An eminent French chemist; in collaboration with Cahours, published a memoir on essential oils, embodying new theories; his treatises upon his views of series, theories of types, and researches upon acids and oxids mark an epoch in the history of chemistry.

GESNER, KONRAD VON (1516–1565). German-Swiss botanist and linguist, and a doctor for a time, who made a catalog of plants in four languages (1542), and a four-volume work on the history of animals which has often been called the foundation of modern zoölogy. Gesner also compiled a list of all authors of the past, which he printed in Latin, Greek, and Hebrew, and later a description of 130 languages, with the Lord's Prayer printed in 22 of them.

GIBBS, JOSIAH WILLARD (1839–1903). American mathematical physicist, who was born in New Haven, Conn., and completed his education at Paris, Berlin, and Heidelberg (1866–68). He was a professor at Yale from 1871 to 1903. His paper *On the Equilibrium of Heterogeneous Substances* had much to do with later developments in physical chemistry of men like Ostwald. Vector analysis, the subject of a book compiled from his notes by a pupil, E. B. Wilson; the use of graphical methods in thermodynamics; and the application of the theory of light to certain elastic solids,—are other important subjects investigated by Gibbs. He received the Copley medal of the Royal Society of England and many other honors.

GILBERT, WILLIAM (1544–1603). English physicist, who was born at Colchester, educated at Cambridge, traveled widely, and acted as a physician in London. He was a member of a committee to prepare a pharmacy manual, acted as physician to the Queen and to James I. and held other public offices. For many years he was busy on his monumental work called by him *De Magnete*, which is the earliest treatise on magnets and certain forms of electricity. He said that the earth is a large magnet, and this explains the dip of the needle, and also adopted the Copernican theory, arriving at the idea that the fixed stars are not all at the same distance from the earth.

GLAUBER (*glō'bēr*), **JOHANN RUDOLF** (1604–1668). A German chemist who first explained that hydrochloric acid is prepared by adding sulphuric acid to common salt, and that nitric acid results when nitre is used instead of the salt. He also made many combinations or preparations of chlorides and other salts of various substances such as tin, zinc, arsenic. Glauber's salt (decahydrated sodium sulphate) takes its name from the fact that Glauber first prepared it.

GOETHALS (*gō'thăls*), **GEORGE WASHINGTON** (1858–1928). United States army officer and engineer; born in Brooklyn, N. Y.; graduate of West Point Military Academy (1880), where he was instructor in civil and military engineering until 1888; in charge of construction of Muscle Shoals Canal in the Tennessee River; chief of engineers during Spanish-American War; on the board for coast and harbor defenses; chief engineer of Panama Canal (1907–1914), appointed governor of the Canal Zone, February, 1914.

GOLGI (*gōl'jē*), **CAMILLO** (1844–1926). An Italian physician and chemist who discovered the germs that cause malaria in the human blood. He was the first to use silver nitrate in staining tissue for purposes of observation of the nerves, discovered groups of nerve fibers or endings found in tendons, and wrote important works on these subjects. He was educated at Pavia, and taught there and at Siena.

GOODE, GEORGE BROWN (1851–1896). American naturalist, who was born in Indiana, educated at Wesleyan University at Middletown, Conn., studied under Agassiz at Harvard and from 1874 to his death was connected with the National Museum at Washington. A new scientific system of classification was introduced, new styles of display in museums, and other methods later widely copied. Great interest was aroused by his preparations of exhibits at various fairs and expositions. Of his voluminous writings, *The Fisheries and Fishing Industry in the United States* (7 vols., 1884–87), and *Ocean Ichthyology*, attained a great reputation for scientific exactness.

GORGAS, WILLIAM CRAWFORD (1854–1920). American surgeon and sanitarian, who was educated at the University of the South and in medicine at Bellevue Hospital Medical College in New York City, where he became an M. D. in 1879. From 1898 to 1902 he conducted a series of experiments to show that yellow fever is carried by the mosquito, and at Panama he established remarkably safe and healthful conditions for the digging of the Panama Canal. In 1914 he became surgeon general of the U. S. Army, with rank of brigadier general, and in 1916 was made a major general, retired in 1918. He also investigated the cause of influenza in South African mining camps and yellow fever in Central and South America.

GOSNOLD, BARTHOLOMEW (d. 1607). English navigator who was instrumental in trying to establish colonies in the new world. In 1602 he skirted the coast from Maine to Martha's Vineyard, returning with a cargo of furs, sassafras, and other commodities obtained of the Indians. He was one of the early colonists with John Smith at Jamestown, Virginia.

GOULD, BENJAMIN APTHORP (1824–1896). An American astronomer, noted for having been the first to establish longitude by means of the Atlantic cable (1866), and for having spent 15 years in Argentina, during which time he compiled a catalog of 32,000 stars from meridian observations. Gould was born in Boston and educated at Harvard, with special studies later under Gauss of Göttingen.

GRAHAME-WHITE, CLAUDE (1879–). English aviator, who in 1906 was given a pilot's certificate, the first Englishman to receive one. He entered many races and won the Gordon Bennett cup (1910), founded an English flying school in France (1909), and in the World War was in charge of building planes. Of his several works on aviation, *The Aeroplane* (1911), *The Aeroplane in War* (1912), and *Our First Airways* (1918) are well known.

GRAY, ASA (1810–1888). Eminent American botanist and naturalist, who was born at Paris, New York, studied chemistry under Dr. James Hadley of Yale, and received a degree in medicine at the Fairfield Medical College (1831). Five years later he issued the first of his many works on botany, all of which did much to develop popular interest in plants and flowers. In 1842 he became a professor at Harvard, where he built up the largest herbarium in the country, collected a valuable library, and experimented with flowers in his garden. Journeys to Europe and to various parts of the United States gave him the material for his *Synoptic Flora*. For twenty years he corresponded with Darwin, and often expressed his

belief that present species are not the results of individual creations, but may have developed from earlier forms.

GREELY, ADOLPHUS WASHINGTON (1844–1935). American scientist and explorer, who was born in Massachusetts, served in the Civil War, and reached (1882) the farthest northern point up to the time at 83° 24′ and 42° 25′ W. All but seven of his party perished, and the survivors were rescued by a third relief expedition under Capt. Schley. While serving as chief of the Weather Bureau (1887–1906), many cable and ordinary telegraph lines were built in various lands. Among his books are *Three Years of Arctic Service, Handbook of Polar Discoveries, Polar Regions of the Twentieth Century* (1928).

GRIGNARD (*grē-nyar′*), **VICTOR** (1871–1912). A French chemist who took the degree of doctor of science at Lyon in 1901, and announced in his thesis the discovery of new magnesium compounds. Magnesium dissolves readily in certain solutions containing chlorine, iodine, and the like, making what has been called Grignard reagents. In the preparation of alcohols, unsaturated hydrocarbons, and certain acids his discovery is of great practical value.

GULLSTRAND (*gōōl′strand*), **ALLVAR** (1862–). Swedish doctor, educated at Uppsala, Vienna, and Stockholm, and a professor at Uppsala from 1894. His work has been in the laws of dioptics, giving rise to a new theory of optical images, and the relation of the diffusion of light to the eye. He won the Nobel prize for medicine in 1911.

GUTHRIE, SAMUEL (1782–1848). American physician, who was born in Massachusetts and practiced in New York. He was one of the first to vaccinate patients, made the first good percussion powder, and discovered that distillation of alcohol with chloride of lime would produce chloroform. He published a paper in July 1831, several months before the independent discoveries of Soubeiran and Liebig.

HABER (*hä′ber*), **FRITZ** (1868–1934). A German chemist who did much to explain certain features of electrochemistry, the reactions of gas and methods of preventing gas attacks during war, and with Bosch a method of producing ammonia from nitrogen of the air. The Nobel prize for chemistry went to him in 1918.

HAECKEL (*hĕk′ĕl*), **ERNST HEINRICH** (1834–1919). German biologist, chief exponent of Darwinism in his country, and author of various studies of classes of animals. He believed in the essential unity of all nature, animate and inanimate, and sought to prove the descent of man from early forms through chimpanzee and similar types which resemble man in a general way. He was born in Prussia, educated in medicine at Wurzburg, Berlin, and Vienna, and acted as professor of zoölogy at Jena. Among his books are *The History of Creation, Life in the Deep Seas,* and *Popular Lectures on Evolution.*

HAHNEMANN, SAMUEL CHRISTIAN FRIEDRICH (1755–1843). German physician and originator of the homeopathic system of medical practice. He noted in 1790 that certain effects of quinine on the normal human body resembled the states of diseases that quinine was used to remedy. From this developed his principle *similia similibus curantur*, that is, like cures like. In 1810 he further developed his ideas and called the new theory homeopathy. Opposition drove him to Cöthen and finally to Paris, where he practiced medicine till his death.

HALE, GEORGE ELLERY (1868–1938). An American astronomer, who discovered the principle of the spectro-heliograph at the Kenwood Observatory which he founded in Chicago. Later while a professor at the University of Chicago, he developed the Yerkes Observatory of which he was head till 1904. Then he organized the Mt. Wilson Observatory and directed this till 1913, after which he held various positions in learned societies. In 1927 he perfected the spectro-helioscope for observation of the solar atmosphere.

HALL, ASAPH (1829–1907). An American astronomer, who became a carpenter at 16, but resolved to study astronomy, which plan he accomplished under difficulties. From 1862 to 1891 he was professor of mathematics at the Naval Observatory at Washington, D. C., and then acted as a professor at Harvard (1895–1901). He observed some of the planets and their satellites, orbits of double stars, and sought to determine stellar parallax. His greatest discovery was the two satellites of Mars (1877), the orbits of which he calculated.

HALL, MARSHALL (1790–1857). An English physician and physiologist; specialist in nervous diseases. His name is also associated with a well-known method of restoring suspended respiration. He showed the function of the blood in coming into direct contact with tissues between arteries and veins, and made important studies in diseases due to derangement of the spinal nerve. The method perfected by him of restoring breath has saved thousands from suffocation by drowning.

HALL, G. STANLEY. See under DICTIONARY OF PHILOSOPHERS.

HALL, WINFIELD SCOTT (1861–). American physiologist, who was a professor at Northwestern University from 1895 to 1919. He specialized in the problems of life and of eugenics, making a close study of adolescence, virility, old age, and the influence of narcotics and alcohol on the human body. Some of his books are *From Youth to Manhood, Life Problems, A Physician's Counsel to Parents,* and *Constructive Eugenics.*

HALLER, ALBRECHT VON (1708–1777). A celebrated anatomist, physiologist, botanist, physician, and poet; born at Bern; was a voluminous author. Haller made important discoveries in classification of tissues as to sensibility, and the functions of nerves and muscles as to sensitive and irritative qualities.

HALLEY (*hăl′lēy*), **EDMUND** (1656–1742). English discoverer of the comet that bears his name. He lived at St. Helena for a time for the purpose of making observations in the southern latitudes, obtaining a record of 341 stars, observed a transit of Mercury, and numerous other phenomena. He published at his own expense Newton's great *Principia.* In 1682 he observed a great comet, calculated its orbit, and predicted correctly its return in 1757. In 1720 he became professor of geometry at Oxford. When 64 he attempted to observe the moon during a revolution of all her nodes (18 years in time), and he lived to complete the task. Halley's comet returned within our vision in 1910.

HAMILTON, WILLIAM ROWAN (1805–1865). A Scotch-Irish mathematician whose extensive researches fill many manuscript books. At 22 he was appointed a professor of astronomy at Trinity College, Dublin, and he spent the rest of his life at an observatory near there. Among his numerous problems, those of the quaternions (a new method used by him in higher mathematics), some papers in dynamics, and his solutions of algebraic equations of the fifth degree, have had a profound effect on later study. Only a small part of his work was published, the rest being in various manuscript books now at Trinity College, Dublin.

HAMMER, WILLIAM JOSEPH. See under DICTIONARY OF INVENTORS.

HARVEY, WILLIAM (1578–1657). English physician who practiced at London, observed many animals and human beings, and finally came to the conclusion that the heart is a pump which circulates the blood through the arteries and veins. He was educated at Cambridge and in Italy, and as early as 1615 told his conclusions to his pupils at the London college of surgeons. It was a long time before his views became established. Harvey also made important studies in the origins of life, he being one of the first to trace the relationships among animals so far as organs and functions are concerned. His chief works are *Treatise on the Motion of the Heart and Blood* and *Treatise on Generation of Animals.*

HAYDEN (*hāy′d'n*), **FERDINAND VANDEVEER** (1829–1887). American geologist who explored many of the western states for the U. S. government. He explored the Bad Lands of Dakota, wrote a valuable work on the geology of Colorado, did much to call attention to Yellowstone Park, and made researches in Wyoming, Nebraska, and other states. As the geologist of a United States survey (1867–1879) he collected an immense amount of information.

HEDIN, SVEN (1865–). Swedish explorer has made extensive explorations and discoveries in Asia, particularly in Turkestan, Bokhara, Pamir, and Tibet. His three journeys to Asia (1893–97, 1899–1902, 1906–08) gained much information of the history, geography, and natives of lands not often visited by foreigners. He was made a Swedish noble in 1902 and one of the 18 members of the Swedish Academy.

HEKTOEN, LUDVIG (1863–). American pathologist, who was born in Wisconsin, educated at Chicago and abroad, and became a professor at Rus-

Medical College (1895–1924), and at the University of Chicago in 1901. Member of many learned societies. Made notable investigations in anatomy with reference to disease. His chief scientific work is *Introduction to the Study of Infectious Diseases.*

HELLRIEGEL (*hĕl-rē-gĕl*), **HERMANN** (1831–1895). A German chemist who made a special study of leguminous plants, such as beans, peas, clover, and alfalfa. He discovered that these have tubercles on the roots which allow them to make use of nitrogen from the air. Important applications have been made of this knowledge at agricultural experiment stations and in practical farming.

HELM'HOLTZ, HERMANN LUDWIG FERDINAND VON (1821–1894). A German physicist. His work has been chiefly in acoustics and optics; wrote *Conservation of Force, Sensation of Tone;* proposed the generally accepted theory of color; invented the ophthalmoscope and other useful physical apparatus. His work had important results in the study of color-blindness, in the measurement of tones in music and in speaking, and in electro-dynamics and various theories of electricity.

HENRY, JOSEPH (1797–1878). An American physicist who was born, educated, and first taught at Albany, N. Y. His attention was turned to magnets by an appointment in the Albany Academy. He was the first to discover the principle of the electric coil, the first to insulate wire for magnetic work, and to arrange the "spool" which is the chief part of every type of electric dynamo yet invented. In 1830–31 he demonstrated the idea of sending sounds over a wire, and this idea was used practically by Morse in his electric telegraph. Henry was called to Princeton as a professor in 1832, was made the first secretary of the new Smithsonian Institution in 1846, and for 30 years compiled many valuable works. The Institute made weather investigations which led to the establishment of the U. S. Weather Bureau. His study of sound in connection with signals at sea suggested a practical method of great service in warning ships of danger during fogs and storms. Among his other scientific accomplishments are the explanation of the laws now used in electric transformers, the discharge of gases in a Leyden jar as inductive of other discharges at a distance (a principle now used in wireless), and a new method for calculating the speed of shells fired from guns.

HERSCHEL, CAROLINE LUCRETIA (1750–1848). A German-English astronomer; sister of Sir William Herschel; made important observations of her own, which were published, including a *Catalogue of Stars* containing 561 omitted in the British list.

HERSCHEL, SIR JOHN FREDERICK WILLIAM (1792–1871). English astronomer and chemist; only son of the eminent Sir William Herschel. He conducted his astronomical observations as had his father, discovering 525 nebulae and double stars, thereby making in all between three and four thousand.

HERSCHEL, SIR WILLIAM (1738–1822). A distinguished astronomer; born at Hanover, Germany; went to England in 1757, and held several appointments as an organist; gave his leisure time to the study of astronomy; discovered the planet Uranus in 1781 (which he called *Georgium sidus* in honor of George III.); discovered also the six satellites of Uranus, and drew up a catalogue of 5,000 heavenly bodies or clusters of them.

HERTZ, HEINRICH RUDOLF (1857–1894). German physicist; professor of physics at Karlsruhe, where he made his remarkable experiments with electromagnetic waves, showing their reflection, refraction, diffraction and polarization, which facts have since been developed into wireless telegraphy.

HIPPARCHUS (fl. 161–126 B. C.). A Greek astronomer and mathematician. He was the founder of scientific astronomy and trigonometry; computed a table of chords; discovered the precession of the equinoxes; invented the astrolabe; and made a catalogue of 1,000 stars, which Ptolemy incorporated in the *Almagest.*

HIPPOC'RATES (460?–377? B. C.). The greatest physician of ancient times, usually designated the "Father of Medicine"; born in the island of Cos. Among his authentic writings are *Prognosis; On Epidemics; On Diet in Acute Diseases; On Air, Water, and Place; On Wounds of the Head.* He was distinguished for his remarkable skill in diagnosis, and his accurate and vivid description of morbid symptoms. His works were early translated into Arabic.

HITCHCOCK, EDWARD (1793–1864). American geologist. Was instrumental in popularizing the science of geology in the United States. While acting as state geologist of Massachusetts he conducted the first geological survey of importance, the results being published by the state.

HOFMANN, AUGUST WILHELM VON (1818–1892). German chemist who discovered how to make aniline dyes from coal-tar products, and other secrets which made great changes in the dye industry. He was born at Giessen, was for a time assistant to Liebig, chemist of the mint, after acting as head of the royal college of chemistry in London, from 1845 to 1865, and then returned to the University of Berlin. His *Introduction to Modern Chemistry* changed the teaching of the subject in several ways.

HOLT, LUTHER EMMETT (1855–1924). American physician who was professor of the diseases of children at the New York Polyclinic from 1890 to 1901 and then at the College of Physicians and Surgeons. His books on his specialty became famous, including *The Care and Feeding of Children* and *Diseases of Infancy and Childhood.*

HOOKER, SIR JOSEPH DALTON (1817–1911). Noted British botanist and traveler. He made trips to the Antarctic regions, the Himalayas, Great Atlas Mountains in Morocco, Palestine, Syria, and California, returning each time with thousands of plants which he later classified. *Genera Plantarum* is his greatest work.

HORNADAY (*hôr'nä-dā*), **WILLIAM TEMPLE** (1854–1937). American naturalist, born in Indiana, educated in Iowa, collected specimens in various lands, and was chief taxidermist of the National Museum (1882–90). He directed the New York Zoölogical Garden from 1896 to 1926. Hornaday did much to preserve certain types of wild animals in danger of being hunted out of existence, such as the bison and various birds. Among his interesting books are *Two Years in the Jungle, The Man Who Became a Savage, Our Vanishing Wild Life,* and *A Democracy of Crocodiles.*

HOUDINI (*hō-dē'nē*), **HARRY** (originally **WEISS**) (1874–1927). The son of a Wisconsin minister, very early became interested in tricks and legerdemain. He began as a trapeze performer in 1882, made a number of world tours, and entertained countless thousands in vaudeville and other popular audiences. He popularized certain tricks by using handcuffs and other methods of arrest from which he escaped by clever manipulation. Engaged in making motion pictures and in writing for the press on exposure of ancient tricks and originating new ones. In 1910 the Aeronautic League of Australia awarded him a prize for the first successful airplane flight in that continent. Houdini also wrote on the methods of spiritualistic mediums and the means used by some of them to deceive.

HOWARD, LELAND OSSIAN (1857–). American entomologist, who was born in Illinois, educated at Cornell, and was assistant and then chief entomologist of the U. S. at Washington from 1878 to 1927. He served on several committees, was chairman of the Pan-Pacific Food Conservation Congress, and wrote, among other books, *Mosquitoes—How they Live* and *The House Fly—Disease Carrier.*

HRDLICKA (*hŭrd-lĭts'kä*), **ALES** (1869–). American anthropologist who was born in Bohemia, and educated in medicine in New York City. While a member of many expeditions to study man, he visited a number of countries, making a special study of the American Indian. Dr. Hrdlicka believed the Indian came from Asia and that in Europe, not in the Orient, was the cradle of mankind. Among his books are *Anthropometry, Physical Anthropology,* and *Ancient Man in North America.*

HUBER, FRANCOIS (1750–1831). A Swiss naturalist who for a long period studied the habits of honeybees, after which he explained the habits of the hive, the construction of wax, ventilation, the killing off of certain males, and habits of queen bees, and other useful information. His chief literary work is *New Observations on Bees.*

HUDSON, HENRY. See DICTIONARY OF HISTORY.

HUDSON, WILLIAM HENRY. See under DICTIONARY OF AUTHORS.

HUGGINS (*hŭg'ins*), **WILLIAM** (1824–1910). A British naturalist and astronomer who set up a private observatory near London in 1856, and before long adopted the study of astronomy through photographs

as his lifework. With the coming of the gelatine dry plate (1875), he was able to make long exposures and attain great results. Among the discoveries were that certain nebulae are masses of gas, that comets contain carbon, that calcium prepared in the laboratory contains spectroscopic lines identical with those in the solar spectrum. His *Atlas of Representative Stellar Spectra* (1899) won for him the Actonian prize of the Royal Institution. Lady Huggins, who was born Margaret Lindsay Murray, assisted him in many researches.

HUMBOLDT, ALEXANDER, BARON VON (1769–1859). German naturalist and traveler; contributed to almost every branch of science. His *Kosmos* (1845–1859), a work explaining the physical universe, is his greatest achievement, while his *Voyage aux Regions équinoxiales du Nouveau Continent* embodies his researches in the New World. He founded the modern study of physical geography or physiography. Humboldt sought to improve the lot of miners, to abolish slavery, and to assist young men of science in every way.

HUNTER, JOHN (1728–1798). British surgeon and anatomist, who found important evidence concerning the lymphatic circulation, the nature of blood coagulation, the operation of cutting through tendons to relieve local conditions of joints, methods of recovering persons supposed to be drowned, the operation of tying an artery between a tumor and the heart as a remedy for aneurism. Hunter was born in Lanarkshire, studied at Edinburgh, at Chelsea Hospital in London, served from 1759 to 1763 in the British army as a staff surgeon, and afterward practiced mainly in London. For the *Philosophical Transaction* he wrote many papers on a great variety of subjects. Besides these he published *Natural History of the Human Teeth, Treatise on Blood Inflammation,* and *Gunshot Wounds.*

HUXLEY, THOMAS HENRY (1825–1895). English scientist and comparative anatomist. As a result of four years of research in natural science he published a work *On the Anatomy and the Affinity of the Medusae.* When Darwin's *Origin of Species* was published (1859), Huxley became a zealous advocate of evolution. His masterly work, *Man's Place in Nature,* was based upon the new doctrine.

HUYGENS, CHRISTIAN (1629–1695). A famous Dutch physicist, astronomer, and mathematician; the author of notable researches on the polarization, reflection, and refraction of light. He invented an apparatus for the application of the pendulum to clocks and by its use to determine the acceleration of gravity. He made powerful telescopes which enabled him to discover the ring of Saturn and its fourth satellite.

HYATT, ALPHEUS (1838–1902). An American naturalist; born at Washington, D. C.; professor of zoölogy and paleontology at the Massachusetts Institute of Technology and at Boston University (1881). In the field of invertebrate paleontology his work was masterly and his writings voluminous. Hyatt was largely instrumental in founding the American Society of Naturalists and in starting the marine laboratory of biology at Woods Hole, Mass.

JACOBI, ABRAHAM (1830–1919). German-American doctor, who in 1860 was elected to the first chair of children's diseases in the United States at the New York Medical College and who established the earliest clinic in this country for the treatment of the diseases of children. He acted as consulting surgeon for several hospitals, wrote many medical papers, and is considered as the founder of pediatrics in this country. Some of his books are *Intestinal Diseases of Infancy and Childhood, Infant Diet, and Treatise on Diphtheria.*

JACOBI, MARY PUTNAM (1842–1906). Wife of the preceding and one of the first women physicians in America, who was born in London, became the first woman student at the New York College of Pharmacy, and was graduated in medicine in Philadelphia in 1864. Desiring to enter the School of Medicine of Paris, she was forced to obtain a special order from the Minister of Education to enable the school to break its rule by admitting a woman student. After graduating with high honors, she became professor of diseases of children at the Woman's Medical College of New York.

JELLIFFE, SMITH ELY (1866–). American neurologist, educated at Columbia University, New York, and in European universities, and professor at the New York College of Pharmacy, Columbia, Fordham, and the Post-Graduate Medical School. An authority on diseases of the nervous system, psychology of the unconscious, and certain forms of insanity. Among his works are *Modern Treatment of Nervous and Mental Diseases* (with W. A. White), and *Technique of Psychoanalysis.*

JENNER, EDWARD (1749–1823). English physician. After much experimental study of vaccine lymph as a preventive of smallpox, he succeeded in convincing medical men of the value of the lymph for that purpose so that vaccination has become universal.

JORDAN, DAVID STARR (1851–1931). An American educator and naturalist; studied fishes under Agassiz and became one of the foremost ichthyologists; wrote *A Manual of Vertebrate Animals of the Northern United States, North and Middle America, Food and Game Fishes of North America.* President Leland Stanford Jr. University (1891–1913); chancellor (1913–1916), and then chancellor emeritus. Besides being a member of the U. S. fish commission at different times, he served on other bodies, notably as president of the World Peace Congress (1915) and as vice president of the American Peace Society.

JOULE (*jūl*), **JAMES PRESCOTT** (1818–1889). An English physicist, who discovered many facts concerning electrical energy and heat, the mechanical equivalent of heat, and made important studies in surface condensation that led to improvements in the steam engine. The practical unit of measurement of energy is called a joule.

JUDD, ORANGE (1822–1892). American authority on agriculture, who was a graduate of Wesleyan University at Middletown, Conn., and editor of various farm papers, including the *American Agriculturist* (1853–83). He provided the money for the first agricultural experiment station in the country at Wesleyan (1875), and in this and other ways had a great influence on American agriculture. His encouragement led to the work of W. O. Atwater (q. v.).

KANE, ELISHA KENT (1820–1857). American explorer and scientist, who entered the Navy in 1843 after obtaining his M. D. at Virginia, and made two expeditions to the Arctic regions, the second being financed by Henry Grinnell. Kane passed into the region now known as Kane basin in 1853 in the small brig *Advance,* and for two years the expedition gained much valuable data, but finally had to abandon the ship. The party was rescued at Upernivik. For 16 years the record attained stood as the farthest north (80° 35′ in June, 1854).

KAYSER, HEINRICH GUSTAV JOHANNES (1853–). He was educated at Strasbourg and Berlin and taught physics at Berlin, Hanover, and Bonn (1878–1920). Among his valuable researches are those in the velocity of sound waves, of sound in wood, and spectroscopy. With Runge he made experiments which determined the series in the spectra of the elements.

KEANE, AUGUSTUS HENRY (1833–1912). An Irish anthropologist who was professor of Hindustani at University College in London, and who arranged and classified most of the known languages and from his studies determined a system of ethnology. *The World's People, Man, Past and Present, Ethnology,* and *The Gold of Ophir* are some of his works.

KELLER, HARRY (1849–1922). One of the greatest magicians of all time, who was born in Pennsylvania, educated in Ohio, and traveled in many parts of the world learning various tricks and illusions. He was with Davenport Brothers for several years, and after 1884 appeared on American platforms mainly.

KELLOGG, VERNON LYMAN (1867–1937). American zoölogist and professor at the University of Kansas (1890–94) and at Stanford University (1894–1920). He did much to popularize science, especially as director of the division of educational relations of the national research council. Some of his books are *Darwinism To-day, The Animals and Man, Nuova, or the New Bee, Human Life as a Biologist Sees It.*

KELLY, EDWARD JOSEPH (1876–). American civil engineer and sanitarian connected with the sanitary district of Chicago from 1894. As South Park commissioner he had charge of 70 miles of water front development with an expenditure of many millions of dollars along the Chicago lake front. He also directed other civic improvements and advocated 10,000 cubic feet of water a second as the allowance to go through the main drainage canal of Chicago.

KELLY, HOWARD A. (1858–). Distinguished surgeon, professor at Johns Hopkins University, and author of many works in medicine and

surgery, was graduated from the University of Pennsylvania where he taught surgery for a time. Honored by election of numerous foreign medical associations, and decorated several times, Dr. Kelly became an international figure. Some of his best works are *Vermiform Appendix, Operative Gynecology, Walter Reed and Yellow Fever, Cyclopedia of American Medical Biography, A Scientific Man and the Bible.*

KELVIN, WILLIAM THOMSON, LORD (1824–1907). English scientist and inventor, professor of natural philosophy in the University of Glasgow (1846–1899); electrical engineer for the Atlantic cables of 1857–1858, 1865–1866, making many improvements in signaling apparatus, and also exceedingly valuable theoretical observations. In addition, his many inventions include the mirror galvanometer, siphon recorder, many pieces of electrical apparatus and methods for measurement, an improved form of mariner's compass, a deep-sea sounding apparatus, and a method of arriving at an absolute scale of temperature. Lord Kelvin also made notable discoveries in the mathematical theories of electricity, heat, elasticity, vortex-motion, magnetism; wrote much on scientific subjects.

KEPLER, JOHN (1571–1630). Illustrious German astronomer; by his long study of the motions of Mars he was led to the discovery of the planetary laws known as Kepler's laws and by their means we are enabled to tell the place of any planet in its orbit at any time, past or present.

KIEPERT (*kē'pĕrt*), **HEINRICH** (1818–1899). German geographer and map-maker, from 1854 a professor at the University of Berlin. He visited Asia Minor four times, on the first visit spending two years there (1841–2), and made valuable maps of that and other regions. His historical-geographical atlas of the world is a standard work. Richard Kiepert (1846–1915), his son, continued the work of mapping the ancient and modern world, brought his father's atlas of Asia Minor up to date, made a new atlas of China, and compiled valuable data from the notes of many travelers.

KING, CLARENCE (1842–1901). American geologist, who was graduated from the Sheffield Scientific School of Yale, studied at Harvard under Agassiz, and did much to develop the geological survey of the country. He explored and mapped much of the region of California and Arizona, and of the 40th parallel of latitude. In 1879 he became the first director of the geological survey, and later acted as a consulting engineer in mining. His *Systematic Geology* is still a standard text.

KITASATO (*kē-tä-sä'tō*), **SHIBASABURO** (1856–1931). Japanese bacteriologist, who became a doctor of medicine and studied in Germany under Koch. In 1892 he was made head of the Japanese institute for the study of infectious diseases. After researches in tetanus and diphtheria, he found the bacillus that causes bubonic plague (1894) and that of dysentery (1898), and a second plague bacillus (1900). In 1915 he established his own laboratory.

KLAPROTH, MARTIN HEINRICH (1743–1817). German chemist at the new University of Berlin (1810–17), who discovered several elements and perfected our knowledge of other rare ones already known. Of his original discoveries uranium, zirconium, and cerium are most important; of the others, tellurium, chromium, and strontium. Modern methods in analytical chemistry gained much from his patient and intelligent researches.

KOCH (*kōk*), **ROBERT** (1843–1910). Eminent German bacteriologist, who was born in Hanover, educated at Göttingen, and for a time practiced as a doctor. His work lay, however, in the causes and remedies of certain germ diseases, and investigations attempted by him, some of which reached fruition, greatly modified subsequent methods in bacteriology. Koch discovered the germ of anthrax (1876), succeeded in isolating the bacillus of tuberculosis (1882), perfected tuberculin to treat the disease (1892), but this proved effective only in assisting diagnosis, not in a permanent cure, and found a means of fighting rinderpest (1896), when he was called to South Africa to study the disease. He was also called to Bombay to study bubonic plague, to South Africa again to investigate certain cattle diseases, and to East Africa to combat sleeping sickness. Besides numerous other honors, he was awarded the Nobel prize for medicine (1905). Koch also originated the theory that bovine and human tuberculosis are not the same.

KOCHER (*kō'ker*), **EMIL THEODOR** (1841–1917). Swiss surgeon at the University of Berne, who made important investigations in the physiology and diseases of the thyroid gland. He received the Nobel prize for medicine (1905). *Text Book of Operative Surgery*, translated into English, remains a standard work of his.

KOLBE, ADOLPHE WILHELM HERMANN (1818–1884). German chemist, who succeeded Bunsen as professor of chemistry at Marburg and in 1865 went to Leipzig. He led to the structural theory in chemistry by a series of brilliant experiments, and predicted secondary and tertiary alcohols, which later others discovered. Among his greatest accomplishments were the electrolysis of fats, the preparation of salicylic acid from phenol, and the discovery of methane.

KUNDT (*kŏŏnt*), **AUGUST ADOLPHE** (1839–1894). A German physicist, who taught successively at Zürich, Würtzburg, Strasbourg, and finally took the chair of Helmholz at Berlin. Among other discoveries. he found how to measure the velocity of sound in gases and also in solids, and also how to show the dispersion of light in solids, liquids, and vapors.

LAENNEC, RENE HYACINTHE (1781–1826). French physician, inventor of the stethoscope. His important *Traité de l'auscultation médiate* has greatly influenced the art of diagnosis.

LAGRANGE, JOSEPH LOUIS (1736–1812). A great French mathematician. By his completion of the calculus of variations he established for himself a firm European reputation. His investigations in astronomy are also of value. Of his works the *Mécanique Analytique* (1788) is his masterpiece.

LALANDE, JOSEPH JEROME LEFRANCAIS DE (1732–1807). A French astronomer who at Berlin (1751) determined the parallax of the moon, and (1759) issued a corrected edition of the tables of Halley, and published results of his study of the transit of 1769. Delisle withdrew in his favor from the chair of astronomy at the College of France (1762), which Lalande occupied for 46 years.

LAMARCK (*lä'märk*), **JEAN BAPTISTE PIERRE ANTOINE DE MONET DE** (1744–1829). A French zoölogist who ranked as the greatest between Linnaeus and Cuvier. He was the founder of organic evolution and of invertebrate paleontology. He was the first to draw a strict distinction between the vertebrates and invertebrates, and to attempt a complete grouping of certain living and fossil animals and also of plants.

LAMB, HORACE (1849–1934). English mathematician, who wrote the standard treatise on hydrodynamics, and made other researches in wave propagation, electrical induction, and the motion of the air involved in successful airplane flight.

LANCIANI (*län-chä'nē*), **RODOLFO AMADEO** (1846–1929). An Italian archeologist, who in 1878 became a professor at the University of Rome, and who did much to increase our knowledge of the classical city. Some of his valuable publications are *Ancient Rome in the Light of Recent Discoveries, Pagan and Christian Rome*, and *Wanderings in the Campagna.*

LANGLEY, SAMUEL PIERPONT (1834–1906). American physicist and astronomer, who was born at Roxbury, Mass., educated in Boston, taught at Harvard College Observatory and the Western University of Pennsylvania, and then became secretary of the Smithsonian Institution. He made important discoveries in air and temperature conditions, invented the barometer which is a most accurate instrument for recording very small changes in temperatures, and then turned his attention to aeronautics. In 1896 he placed in the air a steam-driven "aerodrome," which actually stayed up for a minute and a half and flew a half mile. Later attempts to perfect a man-carrying plane ended in disaster to the craft and the abandonment of his researches due to lack of public sympathy. See HISTORY OF AIRCRAFT.

LANGMUIR, IRVING (1881–). American chemist whose research in the discharge of electricity in a vacuum tube led to much of the current development in radio. He discovered the atomic form of simple hydrogen, and from this knowledge developed a better way of welding through the use of flames of hydrogen.

LA PEROUSE (*lá-perūz'*), **JEAN-FRANCOIS DE** (1741–c. 1788). A French navigator and scientist who set out with two ships in 1785 for a voyage of

discovery around the world. He intended to seek the western passage missed by Cook through the Arctic sea, but was driven back from Alaska by poor weather, explored the Pacific coast, crossed the ocean to the Philippines, China, Japan, and Korea. In 1787 he sent home his interpreter with the data discovered up to that time. After he left Australia, Feb. 7, 1788, no further trace was found of his expedition, till in 1826 Capt. Peter Dillon discovered the wreckage of the two ships on the reefs of the New Hebrides.

LAPLACE (*lă-pläs'*), **PIERRE SIMON, MARQUIS DE** (1749–1827). A celebrated French mathematician who attained a position among mathematicians and astronomers almost equal to Newton's. His *Three Laws* demonstrated the stability of the solar system. He published many treatises on lunar and planetary problems, and a nebular hypothesis. Laplace showed the cause of the inequalities of Jupiter and Saturn, made studies in the equilibrium of a rotating fluid, and explained a theory of probabilities.

LA SALLE (*lă-săl'*), **RENE ROBERT CAVELIER, SIEUR DE** (1643–1687). A French explorer, who went to Canada in 1666, explored the region around the great lakes, and finally made a voyage from Chicago through the Illinois down the Mississippi. He took possession of all the land bordering on the river, called it Louisiana, sought to establish forts, and finally was driven back to France for aid. He set out with four ships, but the commander and part of the men returned to France from the West Indies, while the rest went on. La Salle failed to find the Mississippi again, wandered till two of his ships were destroyed, some of his men died, and only a small part went with La Salle across land toward Canada. On the way he was killed by one of his own followers. Though his grand attempts met with failure, he claimed a vast domain for his country.

LAVOISIER (*läh-vwäw-zēāy'*), **ANTOINE LAURENT** (1743–1794). French chemist; founder of modern chemistry; guillotined by French revolutionary tribunal. Lavoisier established the law of the conservation of mass; made important discoveries in chemical union; and devised a system of rational nomenclature.

LAYARD, AUSTIN HENRY (1817–1894). British explorer and author, who traveled much in Asia, spent some time in the political service, and made important excavations in the Mosul district, during which he located the site of ancient Nineveh. Later (1849) he investigated the location of Babylon. His reports, accompanied by many illustrations, are models of fine description and history. *Discoveries in the Ruins of Nineveh and Babylon* (1855) is his most interesting book.

LAZAREV, PETR PETROVICH (1878–). A Russian physicist, who made important investigations in photochemistry, in molecular physics, and the fundamental problems of living tissues. He was made a professor at the technical college of Moscow (1912) and director of biophysics in Moscow (1917).

LE CONTE (*lē-kônt'*), **JOSEPH** (1823–1901). An American geologist, who was born in Georgia, educated at New York College of Physicians and Surgeons, and at Harvard under Agassiz, whom he accompanied (1851) on an expedition to study the Florida reefs. After teaching at Oglethorp University, Franklin College, and South Carolina College, he was called to Leland Stanford, where he remained till his death. Some of his works on optics, vision, and psychology were valuable, but he spent much time on problems of geology, the formation of the earth crust, and the action of volcanoes. His text-books were long popular.

LEEUWENHOEK, ANTHONY VAN (1632–1723). Dutch biologist who demonstrated that the simple microscope was more practical than some compound lenses in use. He made remarkable discoveries in the structure of teeth, bones, muscles and other parts of the body, showed first the nature of the red corpuscles, and distinguished different cellular structure in plants. Bacteria was first represented by him in a drawing (1683).

LEIBNITZ (*lēp'nĭts*), **GOTTFRIED WILHELM FREIHERR VON** (1646–1716). One of the most celebrated scholars and philosophers that Germany has ever produced. Authorities seem generally agreed that he discovered the differential calculus independent of any knowledge of Newton's method of fluxions. He was eminent in history, divinity, philosophy, political science, experimental science, mathematics, mining, engineering and literature. See DICTIONARY OF PHILOSOPHERS.

LEIDY, JOSEPH (1823–1891). American naturalist; born at Philadelphia. Contributed much to natural science, particularly in paleontology. In 1864 he discovered that the parasite *Trichina spiralis* is introduced into the human system in raw or imperfectly cooked pork.

LEVERRIER (*lay-vair-re-ā'*), **URBAIN JEAN JOSEPH** (1811–1877). A French astronomer; distinguished in chemistry before he devoted himself to astronomy; rose to eminence in the latter science by a paper on the variations in the orbits of the planets and *Tables de Mercure;* discovered Neptune.

LEWIS, MERIWETHER (1774–1809). An American explorer, who was born in Virginia, was private secretary to President Jefferson, for whom with Lieut. William Clark he acted in the Louisiana purchase. In 1804 they left St. Louis for a western exploring trip, passed the next winter near the present Bismarck, N. D., and finally they reached the mouth of the Columbia River in the following November. No white man had crossed north of Mexico before. On the return trip from the Pacific coast they reached St. Louis again on Sept. 23, 1806. Many valuable scientific data were obtained.

LIEBIG (*lē'bĭk*), **JUSTUS, BARON VON** (1803–1873). A German chemist; one of the first to apply chemical analysis to the phenomena of organic life. His *Chemistry in its Application to Agriculture and Physiology* and *Researches on the Chemistry of Food* show how he has applied the teachings of science to practical utilities.

LINDBERGH, CHARLES A. (1902–), first man to fly alone across the Atlantic, was born in Detroit, graduated from high school at Little Falls, Minn., and studied at Univ. of Wisconsin. Learned to fly at Lincoln, Nebr., 1922. U. S. Air Reserve, 1923. Made first mail flight Chicago to St. Louis, 1926. Flew across Atlantic in *Spirit of St. Louis*, about 3,600 miles in less than 34 hours, May 20 and 21, 1927. Awarded scores of honors and prizes.

LINDENTHAL (*lĭn'dĕn-tăl*), **GUSTAV** (1850–1935). American engineer, who was born in Austria, emigrated to the United States in 1871, practiced engineering in Philadelphia, Pittsburgh, and New York. He was consulting engineer for the East River bridge at Hell Gate, completed in March 1917, which then had the longest steel arch span in the world (1,017 feet).

LINNAEUS (*lĭn-nē'ŭs*), **CARL VON LINNE** (1707–1778). Swedish botanist who was the first to devise the scheme of genera and species of the three kingdoms of nature. His *Genera Plantarum* has given rise to much of the modern study of botany, including classification, though there has been some departure from his original plans. He visited Lapland, Dalecarlia, and England in search of evidence for his studies. After acting for a time as lecturer in botany at Uppsala, and for one year as professor of medicine, he took the chair of botany in 1742. From this time he gave his main attention to teaching and the perfection of his classifications. Among his other works are *Philosophia Botanica, Species Plantarum*, and *Genera Morborum*. In 1761 he was ennobled and took the name of Carl von Linné.

LISTER, JOSEPH, FIRST BARON (1827–1912). An English surgeon. In addition to important observations on the coagulation of the blood, the early stages of inflammation, and other matters, his great work is known as the antiseptic system of surgery. He was made baronet in 1883 and a peer, as Lord Kinnear, in 1897; wrote largely on antiseptic treatment and the germ theory of putrefaction.

LIVINGSTONE (*lĭv'ĭng-stŭn*), **DAVID** (1813–1873). Scotch missionary and explorer of Central Africa, was born in Lanarkshire, was mainly self-educated, and in 1840 went as a missionary to South Africa. Much of the geography of the central part of the dark continent was blank on the maps until in 1853–54 and again in 1858 he made journeys, the first to the Congo from the Zambezi, and the second to the district north of the Zambezi. He discovered Victoria, Shirwa, and Nyasa lakes, contributed valuable scientific data, and suffered almost untold hardships on these journeys. In 1871 a relief expedition sent out by Gordon Bennett of the *New York Herald* and commanded by Henry M. Stanley found Livingstone at Ujiji, and left there with him stores and provisions. Two years later, after greater trials than

before, Livingstone was attacked by dysentery near Lake Bangweolo and was found dead on May 1. He was carried by faithful natives across Africa to Zanzibar, taken to England, and interred in Westminster Abbey. As missionary and explorer he inspired a generation of intrepid followers.

LOCKYER (*lŏk'yĕr*), **JOSEPH NORMAN** (1836–1920). English astronomer, who acted as director of the solar physics laboratory at Sidmouth, called afterward the Norman Lockyer Laboratory. The government provided facilities for eight expeditions to investigate solar eclipses (1870–1905). He was a pioneer in the use of the spectroscope in the study of the upheavals in the sun,—the "sun spots"—and the chemistry of its composition. Lockyer and Janssen, without collaborating, discovered (1868) that a method could be used to study the prominences of the sun by daylight. Among his books are *The Chemistry of the Sun* and *The Sun's Place in Nature.*

LODGE, OLIVER JOSEPH (1851–1940). English physicist and investigator of spirit phenomena, who was born in Staffordshire, educated at University College of London, was a professor at University College, London, University College, Liverpool, and then principal (1900–20) of Birmingham University. Previous to 1910 he did much work in lightning, electromagnetic waves and wireless, and certain practical applications of electricity. Some of his books in this field are *Signalling without Wires, Electrons,* and *The Ether of Space.* After 1910 he devoted much time to attempts to prove the possibility of communicating with the dead. Books in this field are *The Survival of Man, Raymond, or Life and Death,* in which he gives accounts of supposed conversations with his son, who died in the World War, and *The War and After.* Lodge also wrote a number of popular scientific works such as *The Making of Man, Relativity,* and *Talks about Wireless.* He was knighted in 1902.

LOEB (*lōb*), **JACQUES** (1859–1924). A German biologist, who, after teaching at Würtzburg, Strasbourg, and Naples, emigrated to the United States, and was a professor at the University of Chicago, in 1902 at the University of California, and after 1910 director of the division of general physiology of the Rockefeller Institute. His main labors concern the differences between living and dead tissue, a chemical explanation of life, and the effects of electric, radiant, and heat energy on living matter. Interesting experiments succeeded in producing young from the unfertilized ova of sea-urchins and of frogs.

LONG, CRAWFORD WILLIAMSON (1815–1878). American physician, born in Georgia, educated there, at the University of Pennsylvania, and in New York hospitals. He is now given the credit for the first use of ether on an actual patient, the first recorded use of anesthesia in surgery in modern times (March 30, 1842). Later he performed a number of similar operations. Other doctors who early used some anesthetic in dental or other surgery were Dr. Horace Wells of Hartford, Conn., nitrous oxide in extracting his own tooth (1844), Dr. W. T. G. Morton, a Boston dentist, acting on the suggestion of Dr. C. T. Jackson, used ether vapor (1846), and Dr. J. C. Warren (1846) performed the first public operation using ether at the Mass. General Hospital.

LORENTZ, HENDRIK ANTOON (1853–1928). A Dutch physicist who taught at Leyden and later at the Teyler Institute, Haarlem. Among various attempts to explain electricity and similar forces, he developed the idea of an ether which is always at rest, but containing moving electrons, applied the theory of Maxwell (q. v.) of ether waves, and sought to explain Zeeman's theory of radiating centers, which Lorentz said were electrons. The Nobel prize for physics was divided between him and Zeeman (q. v.) in 1902. Lorentz did much to secure international coöperation in science.

LORENZ (*lō'rĕnts*), **ADOLPH** (1854–). Austrian physician, born in Silesia, educated at Vienna, where he became a professor. He practiced and advocated adjustments of the hip to correct congenital malformations. Dr. Lorenz also operated manually on club feet. In 1902 and 1922 he lectured and practiced in the United States.

LOWELL, PERCIVAL (1855–1916). American astronomer, who was born at Boston, Mass., was graduated from Harvard, entered business and then engaged in literature and travel (1883–1893). He then devoted his time and fortune to the building of an observatory at Flagstaff, Ariz., where he made a study of Mars, among other scientific investigation. He believed that the inhabitants of that planet are trying to keep alive by making a system of canals for irrigation. Professor Lowell predicted the existence of an undiscovered planet which was first seen by the Harvard Observatory in 1930. *Mars and Its Canals, The Evolution of Worlds,* and *Memoir on Saturn's Rings* are some of his highly interesting books.

LUBBOCK, JOHN, FIRST LORD AVEBURY (1834–1913). An English business man and naturalist. In 1865 he succeeded to the baronetcy after the death of his father, and in 1900 was made a peer. As a member of Parliament he introduced various bills of a reform nature. He was best known, however, as the author of both popular and technical scientific books. Of the popular sort were *British Wild Flowers, Ants, Bees, and Wasps,* and *The Pleasures of Life;* of the scientific type *Marriage, Totemism and Religion, The Origin of Civilization and the Primitive Condition of Man,* and *The Origin and Metamorphosis of Insects.*

LYELL, SIR CHARLES (1797–1875). A British geologist. In his *Antiquity of Man* he summarized the evidence in favor of the theory that the race of man was much older than was currently believed. Lyell has been called the founder of modern geology. His *Principles of Geology* taught the continuity of the earth, and ranks with the *Origin of Species* as an epoch-making work.

McBURNEY, CHARLES (1845–1913). American surgeon, who did important work on the diagnosis of appendicitis by pressure at a certain point (now called McBurney's point), and a method of cutting a small incision without harming muscle fiber. He was educated at Harvard, Physicians and Surgeons in New York, and abroad.

McCOLLUM, ELMER VERNER (1879–). American biologist, who was born in Kansas, educated at the University of Kansas and at Yale, and taught at Wisconsin and after 1917 at Johns Hopkins University. At Wisconsin he discovered what is now known as vitamin A, and later had much to do with the finding of others, becoming a recognized authority on the relations between growth and disease.

MACLEOD (*măk-loud'*), **JOHN JAMES RICKARD** (1876–1935). Physiologist, who was born in Scotland, educated at Aberdeen and Leipzig, was connected with the London Hospital, and from 1903 to 1918 was a professor at Western Reserve University, Cleveland. Then he became professor and associate dean at the University of Toronto, where he did important work in metabolism and was one of the discoverers of insulin with Dr. F. G. Banting (q. v.). With Banting he shared the Nobel prize for medicine in 1923.

MAGELLAN, FERDINAND (c. 1480–1521). Portuguese navigator who served in the East Indies and Morocco, and then offered his services to the king of Spain. In 1519 he started for the Moluccas by the western route, reached the Rio de la Plata, and passed finally through the straits now bearing his name, sailed across the Pacific (which he named), and reached the Philippines. He was killed in a skirmish in the Philippines. Having passed from the other side on an eastward journey beyond this point, he thus, in two voyages, completed the circumnavigation of the globe.

MALPIGHI (*mäl'pē-gē*), **MARCELLO** (1628–1694). An Italian anatomist; noted for his important discoveries of the structure of the kidneys, lungs, skin, and spleen, giving his name to various parts of such. He made important discoveries through the use of the microscope, used first to any extent by him.

MALMGREN, FINN (1895–1928). Swedish meteorologist, who in 1922 was with Amundsen in the voyage in the North Polar Basin in the airship *Norge.* Malmgren gave up a post at Vastmanlands Dala College to accompany the Nobile expedition in 1928. When the ship was wrecked on May 24, he was among the ten thrown out on the ice, when he was somewhat wounded. With two others he tried to walk to North Cape, but was unable to continue. He begged his companions to leave him, as they did after doing all they could for him. His companions were picked up by a plane. A professorship at Uppsala has been named for him.

MANCE, HENRY CHRISTOPHER (1840–1926). English scientist, who for several years was in the service of the Persian Gulf Telegraph in the Indian administration, becoming a chief engineer in 1879. He is now known as the inventor of the heliograph, a method of locating breaks in cables, and one of estimating the internal resistance of a battery.

MARGGRAF, ANDRE (1709–1782). German chemist. He added alumina and magnesia to the then known earths—lime and silica—and was the first to extract sugar from beet root.

MARSH, OTHNIEL CHARLES (1831–1899). American zoölogist and paleontologist; born at Lockport, N. Y. Made many important discoveries of fossil vertebrates, and traced the phylogeny of the horse. Left to Yale University his valuable collection of fossil vertebrates.

MAWSON (*mô-sŭn*), **DOUGLAS** (1882–), Australian explorer of the antarctic, professor at the University of Adelaide in 1920, educated at Sydney University, and engaged in various scientific expeditions. As a member of the Shackleton expedition (1908–09), he made an ascent of Mt. Erebus and discovered the magnetic south pole, and on his own expedition (1911–14) he discovered land which he explored on a sledge trip of 800 miles.

MAXWELL, JAMES CLERK (1831–1879). Scottish physicist. His chief researches were into the kinetic theory of gases, the composition and vision of color, and electricity. In the last "he connected the theory of electricity and magnetism, and proved the oneness of the disturbances of the ether caused electrically and by light." Invented the Maxwell discs and color-box.

MAYER, JULIUS ROBERT (1814–1878). A German physicist and surgeon, who in 1840 made discoveries in Java regarding the nature of animal heat, and who claimed credit for stating independently what has been called "the first law of thermodynamics," relating to the conservation of energy, a principle also credited to Helmholtz and Joule.

MAYO, CHARLES HORACE (1865–1939), and **WILLIAM JAMES** (1861–1939). The Mayo brothers, American surgeons, established at Rochester, Minn., a clinic which became celebrated internationally. Together they gave $1,500,000 to establish a hospital at Rochester, which was placed under the control of the graduate department of the University of Minnesota. The Mayo Foundation offered graduate training to thousands of physicians. Charles H. Mayo specialized in surgery of goitre, the nose and throat, bones, and nerves. William J. Mayo specialized in surgery of the stomach, the gall bladder, and cancer, the study of the history of operative cases at the Mayo Institute at Rochester, and held important offices in medical and surgical societies.

MECHNIKOV (*metsh'nĕ-kŏf*), **ILYA** (1845–1916). A Russian biologist, who held the professorship of zoölogy at Odessa (1870–82), became assistant to Pasteur in Paris (1892), and succeeded him three years later. In 1908 he shared the Nobel prize for medicine with Paul Ehrlich. His study by microscope of blood diseases, certain problems of cell assimilation of food, and operations on animals for knowledge of human anatomy developed important results. He developed the theory of phagocytosis, or the study of digestion or rejection of particles by human cells; and this gave much information as to immunity from disease and similar problems.

MENDEL, GREGOR JOHANN (1822–1884). An Austrian abbot at Brunn who studied hybridization in garden peas, and developed a law of heredity which has greatly modified all subsequent theories of genetics. His experiments were carried on for fifteen years while he taught natural science, and he kept an accurate list of the succeeding generations in a given family to trace the similar and the dissimilar offspring. By this means he arrived at a working theory which, with modifications by later scientists, explains both the stable and the apparently variant characteristics in families, such as color of hair, height, shape of body, and other items.

MENDELEEV (*mĕn-dĕl-y-ā'yĕf*), **DIMITRI IVANOVITCH** (1834–1907). A great Russian chemist. He promulgated the theory of the Periodic Law of the elements, known as Mendeleev's Law, by which he was able to foretell the existence, atomic weights, and other properties of elements not then known, but which have since been discovered.

MERCATOR (*mĕr-kā'tĕr*), **GERARDUS (GERHARD KREMER)** (1512–1594). Flemish mathematician, geographer, and cartographer, who developed a system of making maps which determined the form of most later works of this type. The name Mercator is the Latin form of the Flemish word for merchant, *kremer*. He was educated at Louvain, in 1553 went to Antwerp, and five years later became map-maker to the duke of Cleves in Germany. Some important maps by him were those of Flanders (1540), of Europe (1554), of Lorraine (1563), of the world (1587), on which he had the help of a son, and also some terrestrial and at least one celestial globe. Mercator finally broke away from the Ptolmaic conception of geography and corrected many of the former readings of degrees. All his work was accurate and skilfully executed.

MERRIAM, CLINTON HART (1855–). American biologist, who specialized in marine animals and formations (1875–85), and in 1885 took charge of the division of ornithology and mammalogy, later the U. S. biological survey; in 1910 he was connected with the Smithsonian Institution, and from 1917 to 1925 was chairman of the U. S. geographic board. In his numerous papers he described many animals not previously classified.

MESMER, FRIEDRICH ANTON (1733–1815). A German physician; the founder of animal magnetism, called mesmerism after him. Mesmer believed that some force is active in the universe and especially influences the nerves of men and communication between persons. He was driven from Austria by adverse comment, settled in Paris, and became immensely popular in his séances. A commission, of which Franklin and Baillie were members, drew up a long report, admitting some phenomena claimed by Mesmer, but disputing his theory and many of his conclusions.

MICHELSON, ALBERT ABRAHAM (1852–1931). American physicist, who was born in Germany, educated at San Francisco and at the U. S. Naval Academy, studied in Europe, and was professor at Case, Cleveland (1883–89), Clark University (1889–92), and then at the University of Chicago. He achieved important results in determining the velocity of light, the measurement of distances by means of light-waves, and finally calculated (1920) the diameter of Betelgeuse (260 million miles), which was the first accurate determination of the size of a star. During the World War he gave all his time to naval service, perfecting a range-finder that was adopted as standard. Among the many honors showered on him was the Nobel prize for physics (1907) and the designation as "distinguished service professor" by Chicago University (1926).

MILLIKAN, ROBERT ANDREWS (1868–), studied and taught at Oberlin College, went to the University of Chicago in 1896, and was professor of physics there from 1910 to 1921, and then went to California where he became director of the Norman Birge Laboratory and president of the California Institute of Technology at Pasadena. He lectured at other colleges, was first exchange professor to Belgium on the C. R. B. Foundation in 1922, and vice chairman of the National Research Council from 1917. For isolating and measuring the ultimate electrical unit, the electron, Dr. Millikan was awarded the Nobel prize for physics in 1923.

MITCHELL, MARIA (1818–1899). American astronomer; studied particularly comets and nebulae; discovered a new comet (1847); professor of astronomy at Vassar (1865–1888). By means of photographs she made special studies of the sun and of Jupiter and Saturn.

MITCHELL, SILAS WEIR (1829–1914). American physician and author, who practiced for years in Philadelphia, specializing in nervous disorders, and acquiring fame as an advocate of the "rest cure." Dr. Mitchell wrote numerous scientific papers on a great range of topics, besides interesting stories and novels. See also under DICTIONARY OF AUTHORS.

MODJESKI, RALPH (1861–1940). American engineer, who was born at Cracow, Poland, the son of the actress, Helen Modjeska, was educated at the school for bridges at Paris, and then settled in the United States. He became known for distinguished service in the engineering and construction of bridges, especially the government bridge over the Mississippi, at Rock Island, Ill., the McKinley Bridge at St. Louis, the Northern Pacific Bridge at Bismarck, N. D., two bridges in Oregon, railroad bridges at Metropolis, Ill., and New London, Conn., and many others. As chief engineer he saw the construction of the Philadelphia-Camden Bridge over the Delaware River, which when finished (1926) was the longest suspension bridge in the world.

MOISSAN (*mwô-sàn'*), **HENRI** (1852–1907). A French chemist, connected with the Sorbonne, Paris (1889–1907), who made important researches in

oxides of certain metals, chromous salts, fluorene, fluorine gas and its combinations and the electric arc furnace at high temperatures, by means of which he prepared many new compounds.

MOORE, RICHARD BISHOP (1871–1931). Dean of the School of Science and head of the department of chemistry of Purdue University. He was born in Cincinnati, Ohio, went with parents to England in 1878 and was educated at London and Paris, and returned to take a degree at the University of Chicago (1896). After teaching at the University of Missouri (1897–1905), Butler College, Indianapolis (1905–11), he became chemist with the government. His chief work has been in the investigation of rare metals for the U. S. Bureau of Mines (1919–23), and meanwhile he was in charge of all helium experiments for the government. He popularized the use of mesotherium now used in making luminous watch dials, numbers, and airplane instruments. In 1907–08 he studied and experimented with Sir William Ramsay in London.

MORGAN, THOMAS HUNT (1866–). American biologist who made many investigations in the problems of heredity, especially those of sex determination, the physical basis of heredity, and the theory of the "genes," elements that are paired in heredity and give certain characteristics to the individual. Morgan was born in Kentucky, educated there and at Johns Hopkins, and was a professor at Bryn Mawr until called to Columbia University in 1904.

MORTON, WILLIAM THOMAS GREEN (1819–1868). Known as the American dentist who used sulphuric ether in anesthesia for the extraction of a tooth on Sept. 30, 1846, and sixteen days later administered ether to a patient at the Mass. General Hospital for Dr. J. C. Warren to perform a painless operation. Dr. C. W. Long of Georgia (q. v.) had already used ether, but this fact was not known till after Dr. Morton independently discovered a method of administering this as suggested by Dr. C. T. Jackson of Boston, who had made himself unconscious in the laboratory through the use of the gas.

MUIR, JOHN (1838–1914). An American naturalist, whose love of nature and zealous advocacy of a national policy of conservation led to the establishment of the Yosemite National Park and other monuments in the United States. An accident in early life drove him into the open, and he made many journeys on foot, finally settled down in California in a wooded tract, and did much to popularize the love of forests, streams, and animals in their natural haunts. Among his writings are *A Thousand-Mile Walk to the Gulf*, *My First Summer in the Sierras*, and *Steep Trails*.

MÜLLER, MAX (1823–1900). He was named Friedrich Maximilian, but dropped all of this name but the simple Max. Known for years as a learned student of Sanskrit, Müller failed of election to the chair at Oxford (1860), and then turned his attention to the origins of language in general, comparative religions, and especially in later life to the sacred books of the East. In 1868 a special chair of comparative philology was created for him at Oxford, but he held this only till 1875. Hosts of honors were bestowed upon him by learned societies, native and foreign monarchs, for his zealous endeavors to make the study of language popular. Among his works are *Science of Language*, *The Sacred Books of the East*, and *Introduction to the Science of Religion*.

MURPHY, JOHN BENJAMIN (1857–1916). An American surgeon who advanced the facility and success of abdominal operations by his discovery of a simpler method (now called Murphy's button). He also attained great fame by a method of bone grafting and one for tying arteries when severed by accident. After his graduation from Rush Medical College in Chicago, he studied for two years in Europe, and taught at Rush, the College of Physicians and Surgeons, and Northwestern Medical School at Chicago.

NANSEN, FRIDTJOF (1861–1930). Norwegian explorer, professor, and publicist, who was the first to cross the ice-cap of Greenland (1888), and organized the expedition of the *Fram* (Forward) to attempt to work a passage through the polar ice fields, which succeeded (1893–96), and later engaged in scientific and humanitarian labors. He became a professor at Christiana (1896), made another trip to the Arctic (1900) and acted as minister from Norway to England (1906–08). In later years he made other voyages in the North Atlantic. For the League of Nations (1918) he did distinguished service in repatriation of a half-million prisoners of war, and later for the Hoover relief commission helped feed a million and a half starving Russians. In 1923 he was awarded the Nobel Peace Prize, which he used to assist agriculture and the peasants in a district in Russia.

NAPIER, JOHN (1550–1617). A Scottish mathematician, the inventor of logarithms, and evidently the first to use the decimal point in arithmetic, calculating rods or bones, and certain rules in trigonometry. To assist in repelling the attack of Spain, he also invented some secret devices of war. His *Canonis Descriptio* (1614) explains the logarithms, and his *Rabdolgia* explains the use of rods or bones in making multiplications and divisions.

NERNST, WALTER (1864–). German physical chemist, a professor at Göttingen and later at Berlin and elsewhere, who is well known for his electric lamp, theory of solutions—especially in the study of diffusion and other phenomena of electrolytes—and the measurement of heat at low temperatures. In 1920 he was awarded a Nobel prize.

NEWCOMB, SIMON (1835–1909). A Canadian astronomer and mathematician; professor of mathematics U. S. Naval Observatory, 1861; observed transit of Venus at Cape of Good Hope (1882); director of Nautical Almanac (1877–1897); professor mathematics Johns Hopkins (1894–1901); editor *American Journal of Mathematics;* officer of the Legion of Honor in France.

NEWTON, SIR ISAAC (1642–1727). English mathematician and natural philosopher, born at Woolstorp, educated at Cambridge, and early turned to the study of higher mathematics. Some of his early discoveries were the bionomial theorem (1665), the elements of the differential calculus (1665–66) (which he called fluxions), and certain theories of color (1666–72), the latter of which were amplified and corrected later. As early as 1666, while away from London because of the plague, he began to think more seriously about gravitation, his discovery for a time, however, being doubted by him, because he could not account for the motions of the planets. These and some later deductions were published in the celebrated *Principia* (1686–87), in three parts issued at different times. In 1682 he had become familiar with Picard's measurement of the earth's diameter, which hitherto had not been accurate; and this, with Kepler's observations, led Newton to formulate his law of gravitation definitely. Many honors came to him, including a professorship at Cambridge (1669), a seat in Parliament for Cambridge (1689–90), warden of the mint (1696), and master (1700–27). As president of the Royal Society for 25 years, he did much to advance the cause of science and scholars. His work in every way had a far-reaching influence, which still continues.

NOBEL (*nō'bĕl*), **ALFRED BERNHARD**. See under DICTIONARY OF INVENTORS.

NOBILE, UMBERTO (1885–). Italian explorer, who specialized in the building and operation of airships, including the *Norge* and the *Roma*. With Amundsen and an American, Lincoln Ellsworth, in the former of these he made a flight across the Pole in May 1926, landing at Teller, Alaska. Two years later he commanded the ill-fated *Italia*, which crashed on the ice shortly after crossing the Pole on May 24, 1928. Of the 10 thrown from the airship in the collision, all save Malmgren (q. v.) escaped alive in various ways; but 7 were carried away in the craft itself and never traced again. After an elaborate investigation by an Italian commission in 1929, Nobile was declared responsible for the accident, and in consequence he resigned the rank of general and all other honors which had been given him.

NOGUCHI (*nō'gō-chē*), **HIDEYO** (1876–1928). Japanese bacteriologist and martyr to scientific research, who was born in Fukushima, educated at Tokyo, in the United States and Europe, and worked for the Rockefeller Institute from 1904. He succeeded in isolating the germ of syphilis, devised a test for the detection through the skin, discovered the germ of yellow fever (1918), and made a serum for use in combating the disease, but fell a victim to this scourge while making investigations in West Africa in 1928.

NORDAU (*nôr'dou*), **MAX.** See under DICTIONARY OF AUTHORS.

OERSTED (*ur'stèd*), **HANS CHRISTIAN** (1777–1851). A Danish physicist who, in 1806, was elected a professor at the University of Copenhagen. Besides attempts to make science intelligible and popular in lectures and books, he showed that magnetism, galvanism, and electricity are the same. This discovery led the way to important developments in electro-

magnetism. His main results were published (1820) in *Experiments on the Effects of Opposing Electricity Upon the Magnetic Needle.*

OHM, GEORG SIMON (1787–1854). German physicist; discovered the law in electricity bearing his name while studying the relative conductivity of metals. The name "ohms" was established for the unit of electrical resistance in 1881, by the Paris Congress of Physicists.

OMAR KHAYYAM (*kī-yäm'*) (d. 1123). Great Persian mathematician, philosopher, and poet, best known to western nations through the *Rubaiyat,* the best English version of which was made by FitzGerald. (See DICTIONARY OF AUTHORS.) Omar, whose last name means *tentmaker,* was one of the chief scientists of his age. He wrote notable works in Arabic on algebra, revised the astronomical tables, and reformed the calendar.

ONNES, HEIKE KAMERLINGH (1853–1926). Dutch physicist, who occupied the chair of experimental physics at Leyden, and did some notable investigation in the effect of very low temperatures on metals. In all his work he emphasized the need for exact scientific measurements. He liquefied helium (1908) in his famous cryogenic laboratory, but failed to reduce it to a solid state, a task accomplished by his successor. Other important work nas to do with the theory of electrical conduction of solids. Onnes won the Nobel prize for physics in 1913.

OSBORN, HENRY FAIRFIELD (1857–1935). Eminent American paleontologist, who was born in Connecticut, educated at Princeton, taught in his alma mater (1881–91), and at Columbia after 1891. In 1891 he became connected also with the American Museum of Natural History, acting as president from 1908. Besides important work in classification and arrangement of the specimens in the Museum, he published several hundred papers, did much to extend our knowledge of the animals and vertebrates, past and present, and conducted several field expeditions to far-off lands. The most fruitful were the expeditions to the desert of Gobi in Asia, where among other valuable finds, fossil dinosaur eggs were discovered for the first time by scientists.

OSLER, WILLIAM (1849–1919). A celebrated medical authority, who received his scientific training mainly at McGill University, where he was a professor also from 1874 to 1884, after which he held successively professorships in medicine at the University of Pennsylvania, Johns Hopkins, and from 1905 to 1919 at Oxford, England. Popularly Dr. Osler is best known because of his jocose remark, at a banquet of physicians, that the average person should be chloroformed at 58 or 59,—a bit of pleasantry well advertised in the newspapers. Dr. Osler wrote authoritative books on some of the diseases of children, afflictions of the digestive apparatus, and several treatises on the general practice of medicine.

OSTWALD (*ôst'vält*), **WILHELM** (1853–1932). A German chemist, who served as a professor at Riga (1882–87), and at Leipzig (1887–1906), when he retired. Among important contributions to knowledge, he found the affinity constants of acids and bases, made experiments on the viscosity of certain solutions by means of a viscometer he devised, and found a way of oxidizing ammonia to form nitrogen oxides. The Nobel prize for chemistry went to him in 1909.

OWEN, RICHARD (1804–1892). An English biologist, who studied medicine at Edinburgh and London, prepared catalogs of specimens in the museum of the College of Surgeons, and in 1836 was made Hunterian professor, and in 1856 head of the natural history department of the British Museum. Much of his time was spent in dissection of existing forms of animals, in the study of those now extinct in Australia and elsewhere, and in classification of groups, and as a follower of Cuvier in investigating invertebrate osteology. He discovered (1835) the parasite that causes trichinosis.

PACKARD, ALPHEUS SPRING (1839–1905). An American naturalist; best known as an entomologist. His classification of insects has been widely accepted. He studied under Agassiz at the Lawrence Scientific School; curator and, later, director of the Peabody Academy of Sciences, Salem (1867–1878); entomologist of Massachusetts (1871–1873); professor of zoölogy and geology at Brown University (1878), wrote *Guide to the Study of Insects, etc.*

PALLAS, PETER SIMON (1741–1811). German-Russian naturalist. Specimens gathered by him during six years of travel in Siberia formed the nucleu of the museum of the Academy of St. Petersburg. Hi important works include *Elenchus zoöphytorum* an *Flora Russicia.*

PALMER, D. D. (1845–1913). American healer who founded chiropractic, a system developed from hi observations (1895) that certain spinal adjustment cured a patient of defective hearing. With a son h founded a school at Davenport, Iowa, devoted to th study of anatomy and the teaching of the art of adjust ing the bodily frame to correct troubles due to mal adjustments.

PARACELSUS, THEOPHRASTUS (c. 1490–1541) A German empirical physician, lecturer in medicin at Basle, who for a time attracted much attention but was forced to leave because of his arrogant atti tude toward other physicians before and during hi time. He taught simplicity in practice, original ob servation and investigation, experiment, and a phil osophical training for physicians. From 1528 to 154 he went from place to place, later settling at Salzburg Among his extravagant claims, tendency toward al chemy and mysticism, he introduced some new reme dies, used mineral baths, and added certain tincture to the list of prescriptions.

PARK, MUNGO (1771–1806?). An explorer o Africa, who was born in Scotland, and became physician. He discovered (1796) the mouth of th Niger River, explored the stream for 300 miles, en dured great hardships, and at last reached Pisania i June 1797. On a second expedition (1805–06), h was reported killed by hostile natives after explorin hundreds of miles of the Niger, which he thought wa the same as the Congo. His son Thomas (1827) die of a fever in Africa on his way to Bussa to search fo Park, on the theory that he might have been retaine as a prisoner.

PARSONS, WILLIAM BARCLAY (1859–1932) An American engineer of New York City, who acted a designer of the first subway system constructed there was a member of the Isthmian Canal Commission chief engineer of the Cape Cod Canal project, an assisted in many other civic and public enterprises

PASTEUR, LOUIS (1822–1895). A celebrate French scientist. He contributed results of investi gations of the highest importance to nearly ever branch of science; but it is with processes of ferments tion and putrefaction that his name is inseparably con nected. In the germ theory and the treatment o hydrophobia his results are best known.

PAVLOV, IVAN PETROVICH (1849–1936). Russian physiologist who was celebrated for his re searches in problems of digestion, in brain activity circulation of the blood, which he observed in animal under normal conditions, and the physiology of th heart. He was a director of the institute for experi ment in medicine, and from 1897 a professor in th medical academy of St. Petersburg.

PEARY, ROBERT EDWIN (1856–1920). Ameri can Arctic explorer and naval engineer, who mad many trips to the Arctic regions; established the in sularity of Greenland; discovered the noted Eskim meteorites; reached latitude 87 degrees 6 minutes, onl 200 miles from the pole (1906); a new expeditio in 1908; reached the pole April 6, 1909; rear admira (1911).

PETRIE (*pī'tri*), **WILLIAM MATTHEW FLIN DERS** (1853–). English Egyptologist, who dis covered many ancient cities and towns (such a Naucratis in the Nile delta, Am and Daphnae), an explored the pyramids at Giza and the temple o Medum. In 1893 he was appointed a professor Egyptology at University College, London. Amon his many notable works are *Ten Years' Diggings Europe, Hyksos and Israelite Cities, Eastern Explora tion, Social Life in Ancient Egypt,* and *Revolution Civilization.*

PICKERING, WILLIAM HENRY (1858–1938) American astronomer, who was born at Boston, edu cated at the Massachusetts Institute of Technology where he taught from 1880 to 1887, and then becam connected with the Harvard Observatory. Amon many researches, his work in photographing planet was most notable, together with the discovery of th 9th and 10th satellites of Jupiter, and the demonstra tion of the reason why their motions are in the op posite direction from those of the other satellites.

PINCHOT (*pĭn'shō*), **GIFFORD** (1865– American forester and public servant, who was bor

in Connecticut, educated at Yale, and started the first systematic forestry work in the country in the Vanderbilt forest of North Carolina. He was connected with the U. S. forest service from 1896 to 1910, from 1898 acting as chief of the division, later made a bureau. Through energetic publicity the conservation policy of the nation was furthered. In 1920 he was appointed state forester of Pennsylvania, and served as governor from 1923 to 1927, introducing a budget system.

PINKERTON, ALLAN (1819–1884). American detective and founder of the U. S. secret service, who was born in Scotland, emigrated to America in 1842, and settled in Chicago. Among his notable achievements were the capture of a band of counterfeiters in Chicago (1846), the protection of President Lincoln from a plot to assassinate him at Baltimore (1861), the capture of the robbers who stole $700,000 from the Adams Express Company (1866), and the breaking up of the Molly Maguires, a band of terrorists in the mining regions of Pennsylvania. He founded Pinkerton's Detective Agency in 1852.

PLANCK, MAX (1858–). A German physicist who originated the "quantum" theory of radiation of a black body, first published in his Law of Radiation (1901) and later extended (1912) to all forms of energy. Planck asserted that emission is not continuous, while absorption is continuous. He won the Nobel prize for physics in 1918.

POLO, MARCO (c. 1254–1324). An Italian traveler, long a resident at the court of Kubla Khan, emperor of China, with his father and an uncle. After about a score of years at Cathay, the three were chosen to accompany a lady of the empire to Persia, where she was to be the wife of the emperor, and from there they returned to Venice in 1295. Three years afterward, he was imprisoned by the Genoese for nearly a year, after he had been captured in one of the vessels of the Venetian fleet, defeated by the Genoese navy. While in prison he dictated his *Book of Marco Polo* to a fellow prisoner, and it proved one of the most interesting travel books we have.

PONCE DE LEON, JUAN (c. 1460–1521). A Spanish explorer who discovered Florida. He had sailed with Columbus on the second voyage to America, and in 1509 had conquered Porto Rico. Hearing of a land to the westward where there was a fountain of eternal youth, he set out to find this Bimini, as it was named. In 1513 on Easter Sunday, he touched the coast of what he named Florida, explored much of the lower part of the Peninsula, and in 1521 returned from Spain with a commission to conquer and rule the land. In a skirmish with hostile natives he was fatally wounded and died in Cuba.

PRIESTLY, JOSEPH (1733–1804). An English clergyman and chemist, who combined preaching, teaching, acting as a librarian for Lord Shelburne, with studies in various combinations, and after holding other appointments settled at Birmingham. In 1791 several men there met to celebrate the anniversary of the fall of the Bastile, and a mob gathered in opposition, burned Priestly's chapel and sacked his house. He escaped to London, and finally spent the last 10 years of his life at Northumberland, Pennsylvania. He discovered oxygen, hydrochloric acid gas, sulphur dioxide, silicon fluoride, sal ammoniac, and other chemical compositions. In a day when chemistry as we now know it was hardly thought of, he did remarkably well for a man who had received no fundamental training in science.

PRZHEVALSKI (*pĕrz-hĕ-väl'sky*), **NIKOLAI MIKHAILOVITCH** (1839–1888). Russian explorer and naturalist; made extensive explorations in eastern Siberia and Mongolia, where he discovered a true species of wild horse.

PTOLEMY (*tol'e-mee*) **(CLAUDIUS PTOLEMAEUS)** (flourished about 150). Ancient astronomer and geographer; born in Egypt; was the author of the system of astronomy called after him. His works on astronomy (*Almagest*) and geography were the text-books of the world on these subjects until the time of Copernicus and the maritime discoveries of the fifteenth century.

PUPIN (*pū-pēēn'*), **MICHAEL IDVORSKY.** See under DICTIONARY OF INVENTORS.

RALEIGH (*râw'lēē*), or **RALEGH, SIR WALTER** (c. 1552–1618). English courtier and navigator, was educated at Oxford, served in the war in the Netherlands, and went with his half-brother, Humphrey Gilbert, on a trip to America. Later he rose high in favor of the queen, was knighted, and made an expedition to the new world, from which he brought back to England the potato and tobacco. After James came to the throne, Raleigh was suspected and imprisoned for 13 years, during which time he wrote his *History of the World*. He staked his life on the success of an expedition to Guiana in 1616, but failed utterly. He was obliged to remain at Trinidad because of illness, and his son was killed in a skirmish with the Indians. On his return James revived an old sentence against him, and he was executed.

RAMSAY, WILLIAM (1852–1916). English chemist; the leading exponent of physical chemistry in Great Britain. In 1894, jointly with Rayleigh, he discovered the element argon. He afterward isolated xenon, krypton, and neon—three more gaseous elements—and more recently discovered that radium in its apparent disintegration evolves helium.

RASMUSEN (*räs-mö'sĕn*), **KNUD JOHAN VICTOR** (1879–1933). A Danish explorer born in Greenland; on his mother's side he was of Eskimo descent. He visited on various expeditions all tribes in the polar regions and believed that they were originally of Indian ancestry. Among his works is *Greenland by the Polar Sea* (1919).

RAY, JOHN (1628–1705). He wrote his name Wray till about 1670. An English naturalist, who for a time held a fellowship at Trinity College, Cambridge, which, as a non-conformist, he had to resign in 1662. After making a tour of Europe with Willughby, he completed a botanical collection described in his books, the most important of which was a *General History of Plants* (1686–1704). His *Catalog of English Plants* (1670) has been used by most subsequent authors.

REAUMER (*ray-ow'mur*), **RENE ANTOINE FERCHAULT DE** (1683–1757). A French scientist; is best known as the inventor of the thermometer that bears his name. Some of his researches led to practical methods in the manufacture of iron, such as the method of tinning iron which is still in use.

REED, WALTER (1851–1902). American bacteriologist who traced the spread of yellow fever to a certain type of mosquito. Reed was born in Virginia, educated at the University there, and entered the medical corps in the U. S. Army, becoming professor in the Army Medical School in 1893. During the Spanish-American War he studied typhoid fever among soldiers and made important discoveries. From 1895 on he studied yellow fever intensively, arriving at conclusions that existing theories were erroneous, except that he revived the old supposition of Dr. Carlos Finley that a mosquito might cause the spread of the scourge. With companions (two of whom lost their lives), he began experiments, which proved his theory, and this is now well established. Very soon yellow fever was eliminated from Cuba, and since then from other localities.

REMSEN, IRA (1846–1927). An American chemist and university president, who received his A. B. at the College of the City of New York, and his M. D. at the College of Physicians and Surgeons at Columbia University, and his Ph. D. at Göttingen, Germany. After six years as a professor of chemistry at Williams College, he became identified with Johns Hopkins in 1876, as professor and from 1901 to 1912 as president. In 1879 he founded the *American Chemical Journal* and became its editor. Besides many scientific articles and addresses, President Remsen wrote books on chemistry and allied subjects, some of which are *The Principles of Theoretical Chemistry, Elements of Chemistry*, and *Inorganic Chemistry*.

RICHARDS, THEODORE WILLIAM (1868–1928). American chemists, who taught at Harvard from 1894, and who received the Nobel prize for chemistry in 1914. Among his important results are the work in atomic weights, electro-chemistry, and surface tension. Several learned societies elected him to important offices.

ROBINSON, BENJAMIN LINCOLN (1864–1935). American botanist; born at Bloomington, Ill.; Asa Gray professor of systematic botany and curator of Gray herbarium, Harvard; editor *Gray's New Manual of Botany*, 7th Edition.

ROENTGEN or **RONTGEN** (*rĕnt'gen*), **WILLIAM CONRAD VON** (1843–1923). German physicist, who was educated at Zürich, and became a professor at Hohenheim, Strasbourg, Gissen, and Würzburg. In 1895 while experimenting with a vacuum tube in trying to make electricity pass through certain gases,

he noticed that a barium platinocyanide screen near by became luminous. This effect did not seem to be that of light, and he named the new rays X-rays, that is, the unknown rays. He also made discoveries in elasticity, the conduction of heat, polarized light, and similar effects. In 1901 he was awarded the Nobel chemistry prize.

ROSCOE, HENRY ENFIELD (1833–1915). English chemist; professor of chemistry in Owens College, Manchester (1858–1887); with Schorlemmer wrote the exhaustive *Treatise of Chemistry* in 8 volumes. He was among the first to make exact measurements of the chemical action of light. He discovered a method of making vanadium in a pure state, conducted researches in various elements, and proved that certain mixtures are not true compounds since their composition depends on external pressure.

ROSS, JAMES CLARK (1800–1862). British explorer and admiral, who made several voyages to the Arctic, discovered the location of the magnetic pole (1831), and commanded the Antarctic expeditions of the *Erebus* and *Terror* (1839–43). He also was captain in the first party to search for the Franklin expedition.

ROSS, RONALD (1857–1932). A British physician, who studied the causes of malaria, the life history of the parasites causing this disease, and methods of combating it. He later taught tropical medicine in Liverpool University, at King's College in London, and at the Ross Institute. In 1921 he received a Nobel prize.

ROWLAND, HENRY AUGUSTUS (1848–1901). An American physicist, who attempted as a professor at Johns Hopkins University a series of computations of remarkable accuracy and exactness by the use of highly specialized instruments. Among these were the mechanical equivalent of heat, the value of the ohm, diffraction gratings for use in the study of spectrum effects (14,000–20,000 rulings to the inch on a glass surface), and maps of the solar system by means of the use of these gratings. See also under DICTIONARY OF INVENTORS.

RUMFORD, BENJAMIN THOMPSON, COUNT (1753–1814). An American scientist; discovered the principle upon which chimneys and fireplaces are now constructed; established the fact that heat is a form of motion; wrote largely on economics, physics, meteorology, and chemistry.

RUTHERFORD, ERNEST (1871–1937). British scientist, who was born in New Zealand, educated at Cambridge, and was a professor at McGill University, Montreal, at Manchester, and at Cambridge, also accepting a professorship in the Royal Institution in 1920. He was knighted in 1914. Among his extraordinary achievements was the series of investigations into the electrical structure of matter, the nature of the atom, and of certain radio-active transformations. Besides the Nobel prize in 1908, various honors were showered upon him. He published several books on radio-activity.

SACHS (*säks*), **JULIUS VON** (1832–1897). A German botanist, who taught at three schools of agriculture and at Freiburg until in 1868 he became a professor at Würzburg. He did much work on growing plants, to determine their physiology, cell structure, coloring, and powers of assimilation.

SANTOS-DUMONT (*sän-tōs-dü-mōn*), **ALBERTO.** See under DICTIONARY OF INVENTORS.

SARGENT, CHARLES SPRAGUE (1841–1927). An American dentrologist, who for many years was professor of arboriculture and directed the Arnold arboretum at Harvard University. Besides editing the papers left by Asa Gray (1889), he published many studies in forests and trees, including *Catalogue of Forest Trees of the United States, The Woods of the United States,* and *Manual of the Trees of North America.*

SCHEELE, CARL WILHELM (1742–1786). A Swedish chemist; made numerous important discoveries and published many chemical papers; discovered tartaric acid (1770), chlorin (1774), baryta (1774), oxygen (1774), and glycerin (1784); formed the arsenite of copper known as Scheele's green; and separated hydrocyanic acid (1782).

SCHLIEMANN (*shlēē'man*), **HEINRICH** (1822–1890). A German archeologist, the son of a poor clergyman and largely self-educated, eventually learning seven or eight languages; in early youth he conceived a great desire to learn more of ancient Greece. He made a fortune as a military contractor. In 185 he became an American citizen. After travels i Greece, Tunisia, and other lands, he spent much o his fortune in excavating at the alleged site of Tro through which he dug to a much older town lyin below (1873). Three years later he made importan discoveries at ancient Mycenae, where he came acros a great treasure of gold and jewels, and later mad important excavations at ancient Tiryns. Schliemann laid foundations for much of later research int ancient civilizations in the Greek world.

SCHOOLCRAFT, HENRY ROWE. See unde DICTIONARY OF AUTHORS.

SCOTT, ROBERT FALCON (1868–1912). Britis explorer, who from 1900 to 1904 carried on an im portant expedition in the *Discovery;* and then fo six years served in the navy, until another expeditio was arranged. With government and Canadian back ing, the *Nova Terra* set sail in June, 1910, Scott an four companions began the sledge journey in Nov 1911, and reached the Pole on Jan. 18, 1912, onl to find that Roald Amundsen had been there first On the return journey all the members perished befor they reached the base ship, March, 1912.

SHACKLETON, ERNEST H. (1873–1922). Englis naval officer and explorer; leader of British-Antarcti expedition (1908–9) which located the south magneti pole, lat. 72 degrees 25 minutes S., long. 154 degree E.; ascended Mt. Erebus 13,100 feet; on January 9 1909, by sledges over ice at an elevation of abov 10,000 feet, reached lat. 88 degrees 23 minutes, onl 97 geographical miles or 111 common miles from th South Pole.

SHALER, NATHANIEL SOUTHGATE (1841- 1906). An American geologist; author of *Nature an Man in America, The Interpretation of Nature,* an many other notable works.

SILLIMAN, BENJAMIN (1816–1885). An Ameri can chemist. He was graduated at Yale in 1837, an became professor of chemistry in the School of Applie Chemistry (now Sheffield Scientific School); delivere the first series of lectures on agricultural chemistr given in the United States.

SLOSSON, EDWIN EMERY (1865–1929). A grad uate of the University of Kansas, with graduate study at Chicago, who acted as professor at Wyoming, an then as literary editor of *The Independent* (1912- 20). Afterward he became director of Science Service which did much to spread the knowledge of new in ventions, theories, and all developments of science.

SMITH, WILLIAM (1769–1839). English geologist His reputation rests upon his theory of the stratifica tion of rocks. The first published geological maps o England were prepared by him.

SMITHSON, JAMES (1765–1829). An Englis philanthropist; was graduated at Oxford. In 1835 hi property, amounting to $515,169, came into the pos session of the United States government, having bee bequeathed by him "for the purpose of founding a institution at Washington, D. C., to be called th Smithsonian Institution, for the increase and diffusio of knowledge among men."

SODDY, FREDERICK (1877–). A Britis scientist, graduate of Oxford, and professor at th University of Glasgow, Aberdeen University, and a Oxford. With Sir Ernest Rutherford (q. v.) he de veloped the disintegration theory of radio-active ele ments, and alone he demonstrated that certain element have two or more forms, different atomic weights, an some characteristics, but are the same chemically This theory, since confirmed many times, had im portant bearing on certain obscure phenomena i chemistry. In 1921 he was given the Nobel prize fo chemistry.

SPEKE, JOHN HANNING (1827–1864). An Eng lish explorer of Africa; discovered Lake Nyanza i 1858, and in 1862 discovered that it is the source o the Nile. See BURTON, RICHARD F.

SPENSER, HERBERT. See under DICTIONARY O PHILOSOPHERS.
